PORT MOVEMENTS, FIRST SIX MONTHS OF 1902.

ROSARIO.

One hundred and ninety-one steamships and 62 sailing vessels cleared from the port of Rosario during the first six months of 1902. The domestic products carried by them and their destination are given in the following statement:

United States.—Oxhides, dry, 211,898; various hides, 243 bales and 500 pieces; wool, 9,874 bales; hay, 2,751 bales; linseed, 1,552 tons; bran, 35 tons; minerals, 35 tons; bones, 2,913 tons.

Germany.—Oxhides, dry, 4,139; oxhides, salted, 46,419; horsehides, salted, 561; wool, 276 bales; sheepskins, 42 bales; wheat, 368 tons; corn, 9,231 tons; linseed, 11,950 tons; bran, 14,287 tons; fine bran, 3,334 tons; minerals, 1,846 tons; horns, 21 tons; sugar, 30,192 tons.

England.—Oxhides, dry, 4,606; wool, 19 bales; wheat, 3,477 tons; flour, 401 tons; corn, 43,639 tons; linseed, 18,570 tons; bran, 519 tons; fine bran, 825 tons; minerals, 17 tons; bones, 176 tons; horns, 172 tons; sugar, 11,183 tons.

Buenos Ayres.—Oxhides, dry, 26,148; oxhides, salted, 32,461; various hides, 1,797 bales and 7,436 pieces; wool, 1,267 bales; sheepskins, 348 bales; corn, 174 tons; bones, 15 tons; sugar, 86 tons.

Brazil.—Various hides, 3 bales; sheepskins, 5 bales; hay, 200,003 bales; wheat, 5,676 tons; flour, 2,348 tons; bran, 80 tons; fine bran, 152 tons; sugar, 27 tons.

Belgium.—Oxhides, salted, 11,355; various hides, 31 bales and 1,500 pieces; wool, 677 bales; sheepskins, 10 bales; wheat, 746 tons; corn, 1,775 tons; linseed, 1,135 tons; horns, 8 tons; quebracho, 2,250 tons.

France.—Wool, 1,219 bales; linseed, 1,387 tons; bones, 16 tons.

South Africa.—Hay, 586,699 bales; corn, 13,303 tons; linseed, 656 tons; bran, 4,187 tons; fine bran, 1,396 tons.

Holland.—Linseed, 5,889 tons.

Uruguay.—Sugar, 647 tons.

Spain.—Bones, 381 tons.

Orders.—Wheat, 45,605 tons; corn, 106,235 tons; linseed, 26,216 tons; minerals, 24 tons; quebracho, 6,814 tons.

The totals of the articles enumerated were as follows:

Oxhides, dry		246,791	Corn	tons	174,357
Oxhides, salted		90,235	Linseed	do	67,355
Horsehides, salted		561	Bran	do	19,108
Various hides	bales	2,074	Fine bran	do	5,707
Do	pieces	9,436	Minerals	do	1,922
Wool	bales	13,332	Bones	do	3,501
Sheepskins	do	405	Horns	do	201
Hay	do	789,453	Sugar	do	42,135
Wheat	tons	55,872	Quebracho	do	9,064
Flour	do	2,749			

BAHIA BLANCA.

During the first six months of the present year, 56 steamships cleared the port of Bahia Blanca, carrying the following merchandise to the different countries enumerated:

Brazil.—Wheat, 194,833 tons.

England.—Wheat, 464,245 tons; wool, 187 bales; hay, 485 bales; linseed, 71,458 tons.

Belgium.—Wheat, 553,110 tons; wool, 5,387 bales; linseed, 242 tons; oats, 2,071 tons; hair, 5 bales; sheepskins, 61 bales.

Holland.—Wheat, 409,593 tons.

Italy.—Wheat, 77,142 tons.

France.—Wool, 9,539 bales.

Germany.—Wheat, 93,343 tons; wool, 14,977 bales; linseed, 2,982 tons; bran, 7,382 tons; hair, 1 bale; oxhides, dry, 500; oxhides, salted, 30,907; calfskins, 4,000; horsehides, dry, 2,800; horsehides, salted, 11,851; quebracho extract, 2,220 tons; various hides, 51 bales, 4 boxes, and 40 pieces; flax cakes, 1,602 tons.

The following table shows the total amount of the exports:

Wheat	tons	2,613,352
Wool	bales	30,090
Linseed	tons	74,682
Hay	bales	485
Oats	tons	2,071
Bran	do	7,382
Hair	bales	6
Oxhides:		
Dry		500
Salted		30,907
Sheepskins	bales	61
Calfskins		4,000
Horsehides:		
Dry		2,800
Salted		11,851
Various hides	bales	51
Do	boxes	4
Do	pieces	40
Quebracho extract	tons	2,220
Flax cakes	do	1,602

LA PLATA.

During the first six months of 1902, 125 steamships and 8 sailing vessels entered the port of La Plata. The same number of sailing vessels and 124 steamships cleared the port during that period, carrying the following articles:

Corn	kilos	6,108,957
Wheat	do	47,749,055
Linseed	do	2,186,308
Bran	do	922,161
Dried meat	do	2,010,928
Butter	do	213,960
Hay	do	1,271,711
Horses	head	140
Sheep	do	12,537
Tongues	kilos	72,585
Sheepskins	do	261,191
Goatskins	kilos	2,541
Frozen meat	do	3,061,692
Fruits	do	92,390
Quebracho	do	860,000
Hair	do	3,502
Casein	do	8,000
Oats	do	520,359
Birdseed	do	14,100
Cattle	head	1,655
Mules	do	93

TRADE OF ROSARIO IN 1901.

The official valuation of the imports that passed through the Rosario custom-house in 1901 was $11,211,486 gold, against $9,569,015 in 1900. The principal items making up the former figures were: Provisions, $1,665,648; wines and spirits, $508,343 (an increase of $73,000); spun and woven goods, $896,082 (a decrease of $443,000); drugs, etc., $423,517; lumber, etc., $1,071,258 (an increase of $129,000); hardware, agricultural implements, etc., $2,743,789 (against $1,677,176 in 1900); building materials, paints, oils, etc., $2,115,801 (against $1,492,125 in 1900); combustibles, kerosene, etc., $657,217 (an increase of $72,000). Imports declined in value from $128,941 in 1900 to $60,721 in 1901. This decrease is attributable in part to a larger consumption of the native product.

The principal exports from the port in 1901 were: Wheat, 421,009 tons (decrease of 388,000 tons); linseed, 153,857 tons (increase of

71,000 tons); maize, 273,459 tons (increase of 71,000 tons); flour, 18,967 tons (increase of $13,500 tons); sugar, 39,447 tons (increase of 23,400 tons); quebracho, 29,077 tons; hay, 78,041 tons. The total value of the exports was $28,265,319 gold, against $29,256,194 in 1900. The exports to the following countries increased: United Kingdom, $400,000; United States, $700,000; France, $230,000; Brazil, $640,000; Belgium, $129,000; Spain, $232,000; Uruguay, $72,000; Paraguay, $112,000. The following decreased: Germany, $300,000; Italy, $60,000; Portugal (including St. Vincent for orders), $2,544,000; various (including South Africa), $611,000. The United Kingdom sends one-third of the imports and receives one-fourth of the exports.

During 1901 ocean-going vessels numbering 635, with a total tonnage of 993,347 tons, entered the port of Rosario. Of these, the British numbered 411, with 681,039 tons; German, 93, with 174,311 tons.

EXPORTS OF THE REPUBLIC.

During the first five months of the year 1902 the exports of the Republic embrace the following articles and quantities:

Cattle	head	37, 877	Bones	tons	11, 845
Horses	do	7, 931	Linseed	do	294, 810
Sheep	do	25, 528	Maize	do	202, 109
Frozen mutton	tons	26, 951	Hay	do	39, 938
Horse hair	do	798	Wheat	do	439, 432
Kid skins	do	619	Sugar	do	18, 448
Sheepskins	do	13, 506	Flour	do	12, 606
Hides, salted	do	15, 178	Bran	do	42, 652
Dry hides	do	6, 884	Quebracho extract	do	3, 348
Wool	do	139, 208	Quebracho logs	do	114, 480
Jerked beef	do	10, 503	Nutria skins	do	393
Frozen beef	do	23, 412	Ostrich feathers	do	18
Grease	do	19, 901			

NEW COLD-STORAGE AND REFRIGERATING PLANT.

The Monthly Review of the Board of Trade of Buenos Ayres states that an Argentine company entitled "La Blanca" has been organized in Buenos Ayres with a capital of $1,500,000 gold for the purpose of engaging in the business of frozen meats. This plant will be erected at Barracas del Sur, a suburb of the national capital, and the products will be exported to Europe, South Africa, and other markets. In addition to the exportation of frozen meats, the company will traffic in live cattle, and will supply Buenos Ayres and other centers of the Republic with fresh meat, and with this object in view will establish a large slaughterhouse. The refrigerating plant will have a capacity for handling 5,000 sheep and 250 cattle daily, and the machinery will be ample to freeze 1,000,000 sheep and 50,000 head of cattle annually, while the storage capacity will accommodate 70,000 carcasses of sheep and 4,000 carcasses of cattle.

BOLIVIA.

REGISTRATION OF TRADE-MARKS.

Señor Don Manuel V. Ballivián, Honorary Corresponding Member of the International Union of American Republics, has sent the Monthly Bulletin a copy of the following important decree relating to the registration of trade-marks:

"Whereas it is imperative to supplement the rules for the registration of trade-marks, explaining the manner in which they must be numbered, designating the offices from which they are to be issued and the manner in which they shall be recorded, and to establish also a rule that will protect merchants who have acted in good faith, and who have ordered merchandise bearing a trade-mark subsequently registered by others:

"Now, therefore, I, José Manuel Pando, Constitutional President of the Republic, decree:

"Article 1. Certificates of trade-marks shall contain the number that corresponds to them in the order of their registration in the Department of Public Works, and shall have attached on the reverse side thereof the drawing that represents the trade-mark, sealed with the seal of the Department, and signed by the Chief Clerk of the Division.

"Art. 2. The Department of Public Works shall keep a book for the registration of the certificates issued, recording the number and the nature of the article, and shall attach a copy of the drawing of the trade-mark, sealed and signed by the patentee or his attorney, observing these same formalities of guaranty in the register kept by the notaries of the treasury.

"Art. 3. Merchandise of a definite trade-mark, ordered from abroad on a date prior to that of the filing of the application with the Prefect for registration of the same trade-mark, shall not be considered articles of commerce issued under a counterfeit trade-mark.

"Art. 4. The Prefects of the Department shall order the publication in the Department Bulletin of the filing and registration of trade-marks, or in some other newspaper of greater circulation, so that merchants who have ordered goods in advance covered by the trade-mark whose registration is solicited shall be duly advised.

"Art. 5. Certificates already granted shall form Series A, and shall be numbered in the order of their filing in the Department. Series B shall commence with No. 1, and shall apply to trade-marks registered on and after this date.

"Art. 6. These instructions supplement those established by Executive decrees of March 24, 1897, and March 13, 1900.

"The Minister of Fomento and Public Instruction is charged with the execution and fulfillment of this decree.

"Given in the city of La Paz, May 30, 1902.

"José Manuel Pando."

FOREIGN COMMERCE IN 1901.

The foreign trade of Bolivia during the year 1901, including imports and exports, represented an aggregate value of 54,531,434.72 *bolivianos.* The total weight of the merchandise imported and exported was 168,763,463 kilograms.

The following statement shows the weight and value of the merchandise imported or exported through each port of the Republic, but the figures relating to El Acre only cover the first half of the year. Data relating to the second half are still unpublished.

Custom-houses.	Imports.		Exports.		Total.	
	Quantity.	Value.	Quantity.	Value.	Quantity.	Value.
	Kilos.	*Bolivianos.*	*Kilos.*	*Bolivianos.*	*Kilos.*	*Bolivianos.*
Uyuni	22,167,392	1,071,452.39	91,333,538	19,382,062.60	113,500,930	20,453,514.99
La Paz	17,052,139	5,988,028.88	4,248,538	2,969,501.59	21,300,677	8,957,530.47
Antofagasta	13,496,375	7,060,743.29	....	....	13,496,375	7,060,743.29
Acre	283,710	60,144.48	2,297,471	6,474,090.40	2,581,181	6,534,234.88
Oruro	1,125,635	259,905.96	10,278,166	5,731,079.97	11,403,801	5,990,985.93
Tupiza	217,216	523,137.89	1,513,299	1,173,860.80	1,730,515	1,696,998.69
Villa-Bella	322,128	210,765.33	795,093	1,600,843.72	1,117,221	1,811,609.05
Arica	1,805,696	865,939.78	....	....	1,805,696	865,939.78
Puerto Suarez	740,769	434,549.51	105,694	212,448.15	846,463	646,997.66
Tarija	789,080	478,556.24	191,524	34,323.74	980,604	512,879.98
Total	58,000,140	16,953,223.75	110,763,323	37,578,210.97	168,763,463	54,531,434.72

A comparison between the foregoing figures and the figures representing the commerce of 1900 shows the following:

	Bolivianos.
Imports:	
1900	13,344,114.47
1901	16,953,223.75
Increase	3,609,109.28
Exports:	
1900	35,657,689.96
1901	37,578,210.97
Increase	1,920,521.01

It is seen, therefore, that both imports and exports have increased and that the value of the exports exceeds that of the imports.

The nations from which Bolivia imported merchandise in 1901, arranged in accordance with the value of the imported articles, are as follows:

	Bolivianos.
Germany	3,243,090.33
England	2,291,851.18
France	1,912,274.54
The United States	1,674,254.57
Chile	1,663,906.71
Peru	1,543,232.84
Belgium	1,305,957.86
Italy	679,367.72
Argentine Republic	604,802.17
Spain	364,460.77
Brazil	33,799.86
Paraguay	16,588.24
Uruguay	14,618.71
Ecuador	4,760.42
Cuba	4,632.10
Portugal	3,777.60
India	1,850.60
Switzerland	88.20
Not specified	1,589,909.18
Total	16,953,223.75

BRAZIL.

VALUE OF TRADE IN 1901.

According to statistics published in the "Serviço de Estatistica Commercial," of Rio de Janeiro, the imports and exports of Brazil for the year 1901 amounted to 415,053,516 *milreis* and 860,826,969 *milreis*, respectively.

The imports and exports by countries were as follows:

Countries.	Imports.	Exports.
	Milreis.[a]	*Milreis.*[a]
Argentine Republic	56,173,430	19,218,773
Austria-Hungary	7,632,843	24,229,034
Belgium	9,547,634	18,876,880
France	33,263,299	100,338,297
Germany	39,080,606	126,749,284
Great Britain and possessions	130,278,411	111,487,400
Holland	2,514,248	41,989,849
Italy	15,857,616	8,109,950
Portugal	26,928,540	5,091,239
Spain	2,973,894	1,351,823
Sweden and Norway	4,966,550	....
Switzerland	2,910,347	....
United States	51,635,665	31,147,265
Uruguay	27,085,441	9,999,657
Orders	....	3,726,295
Other countries	4,204,992	12,206,047
Total	415,053,516	860,826,694

[a] Value of *milreis* in United States money is $0.486.

STATUS OF THE BRAZILIAN RAILWAYS.

In his message to Congress, delivered in May last, President CAMPOS SALLES deals at length upon the conditions governing the administration of the railways of the Republic, the following points being specially dwelt upon:

Among the most important benefits rendered to the public treasury must be classed the combined operation of taking over and leasing the railways on which interest had been guaranteed. For the purpose of attracting foreign capital for investment in the construction of railways, the Government adopted, in 1852, the plan of guaranteeing, for ninety years, 7 per cent interest on the capital so invested, and in conformity with this plan, made grants to companies for building railways from Pernambuco to the San Francisco River, from Bahia to the same, and from Santos to Jundiahy, the guaranty for the last of these roads being subsequently relinquished. Law No. 2450 of 1873, and the regulations of February 28, 1874, altered this plan in some of its principal points, but left it unchanged in others. While reducing the term of the guaranty from ninety to thirty years, they have retained the provisions regulating the expropriation of railways virtually intact. When the first grants were made, it was believed that the receipts would exceed the sums guaranteed, and under this impression no provision was made for accumulating, during the existence of the guaranty, a sinking fund for the sums advanced by the Government so as to relieve the treasury of its burdens. The Government reserved for itself only the net receipts of the railways after deducting the amount of administrative expenses in Europe.

At the end of thirty years after the first grants, those of Pernambuco and Bahia, the Government took into serious consideration the idea of redemption, and the budget law of September 3, 1884, authorized the transaction, the said authorization being renewed every year until 1900. As doubts had arisen in regard to the meaning of the expression "net income," which constituted the basis for redemption, the joint sections of Empire and Finance of the Council of State were consulted on the subject, and in their exhaustive report, dated October 30, 1884, stated that if the Government should redeem the railways it should give the respective companies securities producing "the same income as before;" that is, 7 per cent, equivalent to the full amount of guaranteed interest. To effect the redemption of the two roads on this basis, the Government, in 1888, appointed an agent, who, considering the basis onerous, took no action in the matter. In 1890 the same agent was appointed to report on the subject of guaranties, and he proposed the redemption of all the roads. This suggestion the Government, on account of circumstances beyond its control, was unable to adopt.

Recently the Government, considering that the subject demanded its serious attention, examined the matter, and after this preliminary step solicited authorization, which was granted to it by law No. 746, of December 29, 1900, article 29, clause 25, for the redemption of all the roads having guaranties of interest and for constituting at the same time a sinking fund for the securities given in payment to the companies, the said sinking fund to be composed of the amount received for the lease of the roads and the difference between the amount of the guaranties and that of the interest and sinking fund of the securities. For this purpose the above-mentioned agent, Dr. José Carlos Rodrigues, was reappointed. He recently returned from his mission, which he performed in the most satisfactory manner.

The Government has contracted for the redemption of the following railways: The Recife and San Francisco, the Bahia and San Francisco, the Timbo branch, the Natal and Nova Cruz, the Conde d'Eu, the Central Bahia, the Minas and Rio, the Santa Maria da Bocca do Monte and Uruguay, the Paranagua and Curityba and its extension, the Donna Thereza Christina. The redemption of the two first-mentioned roads, whose guaranties still had over forty years to run, was contracted on the basis of a net income of 5 per cent, and not of 7 per cent, which, in the opinion of the Council of State, the Government was bound by its contract to adopt. The sum thus saved on the Bahia and San Francisco roads amounts to £38,000 per annum. The redemption of the other roads involved protracted negotiations, and even, in some instances, law suits between the companies and their bondholders. The operation has, however, obtained the approval of economists, and it is worthy of note that although the amount of securities to be issued in virtue of the contracts for the extinction of the guaranties exceeds £13,000,000, this has led to no decline in other securities, which, on the contrary, have recently risen in European markets.

The guaranties of the Recife and San Francisco and the Bahia and San Francisco roads, as above stated, had forty years to run, absorbing annually £182,000, or, for the whole period, counting from 1901, over £8,000,000. The guaranties of the other roads whose redemption has been contracted, extended from eight and a half to twenty-four years and would cost the national treasury £7,527,987, less the small net income which (with one exception) they have produced, for under English management nearly all have been operated at a loss. Thus, without redemption, the national treasury would have been obliged to spend over £15,000,000, less the amount of net receipts. And after spending this money the Government would not have owned the roads unless it had redeemed them with securities producing an income equal to the amount of guaranteed interest. The redemption was effected by means of 4 per cent bonds, whose total amount is less than that which the treasury would have had to spend with guaranteed interest.

In 1891, the gross receipts of the roads whose expropriation has been contracted for, including the two still dependent upon further formalities, was 5,060,000 *milreis*, or, adding the receipts of the Sud-Ouest, which began to operate in 1895, 5,360,985 *milreis*. The gross receipts of the same roads in 1898 amounted to 9,813,769 *milreis*. This increase of over 83 per cent not only proves the value of the resources of the country, but also justifies the redemption scheme, which has added about 1,970 kilometers of railroad line to the assets of the nation.

The Government has already taken possession of some of these roads, and the terms on which they have been leased shows the timeliness of their redemption. The Bahia and San Francisco Railway, which had previously been operated at a loss, produced in the first half year of its provisional lease a surplus of 129,000 *milreis*. The Conde d'Eu line, which, since 1891, has, with the exception of one year (1896) been operated at a loss, is now leased to an English company, which pays into the national treasury the sum of about 50,000 *milreis* per annum, and will pay almost double that sum when the total receipts of the system to which that lease belongs shall have reached a certain amount. The Recife and San Francisco Railway, from whose net receipts the national treasury had derived in the last few years before redemption an average of about £7,000, is now leased for £18,000 to the aforesaid company. The Sul de Pernambuco road, belonging to the Government, is now producing £9,375 per annum (or, at the rate of 12d, per *milreis*, $187,500), while between 1895 and 1899 it cost the treasury in deficits 865,000 *milreis*.

Of the foreign roads which had guaranteed interest, there are only three which have not been redeemed.

VITAL STATISTICS.

According to the latest census returns, the population of the principal cities of Brazil is as follows:

Rio de Janeiro	700, 000	Fortaleza	33, 000
São Paulo	260, 000	Parahyba	32, 000
Bahia	200, 000	San Luiz	32, 000
Recife	120, 000	Campos	30, 000
Belém	100, 000	Campinas	28, 000
Porto-Alegre	80, 000	Curytiba	25, 000
Manãos	40, 000	Petropolis	20, 000
Nictheroy	35, 000	Cuyaba	18, 000
Santos	35, 000	Santa Catharina	16, 000
Maceió	33, 000	Pelotas	15, 000

CONCESSION FOR IMPROVING LANDS IN THE STATE OF RIO DE JANEIRO.

The concession for draining and improving the sanitary condition of the lowlands of the State of Rio de Janeiro, for which bids were recently asked by the Department of Public Works and Industries of that State, and to which reference was made in the March BULLETIN, has been awarded to Dr. FRANCISCO RIBEIRO DE MOURA ESCOBAR, of Rio de Janeiro.

The region covered by the concession is the strip of land lying between the ocean and the chain of mountains skirting the coast and extending from the State of Espirito Santo on the north to the State of São Paulo on the south. It comprises lands of great fertility, largely covered by luxuriant tropical forests. The climate is excellent, and there is an abundant rainfall. There are two seasons, spring and summer, the former lasting eight months and the latter four. This region comprises 1,788,000 hectares of land suitable for agricultural purposes, and has a population of 300,000. It is traversed by railways and drained by rivers which are navigable for a considerable distance. It also has a number of large lakes well stocked with fish, one of which, Lagôa Feia, covers an area of 37,000 hectares.

The principal works to be undertaken are the improvement of the sanitary condition of the lands, the canalization of the rivers, and the establishment of cheap communication with the city of Rio de Janeiro, which is the principal market for the products of this region. The

Government will also endeavor to promote the colonization of this region by offering special inducements to immigrants.

It is claimed that all the food products required to supply the markets of Rio de Janeiro, which, with the exception of small quantities sent from the interior, are now imported, could easily be produced on the lands embraced in this concession. The following table shows the import values of food products at Rio in 1901:

Alfalfa	$350,000	Olive oil	$500,000
Bacon and fat	1,400,000	Onions and garlic	250,000
Beans	500,000	Pepper	150,000
Beer	350,000	Potatoes	600,000
Butter	1,500,000	Rice	3,200,000
Cattle	1,900,000	Salt	300,000
Cheese	500,000	Tea	140,000
Corn	450,000	Vinegar	25,000
Flour	7,500,000	Wheat	3,700,000
Ham	140,000	Wines	6,400,000

It will be seen from the above what a vast saving to the country will be effected when these lands are placed under cultivation. In the northern part of this zone stretch vast areas of rich lands particularly adapted to the cultivation of sugar and rice, while many varieties of textile plants are found throughout the region.

Considering the natural advantages which this region enjoys and its proximity to the city of Rio de Janeiro, it would seem to offer exceptional opportunities to those wishing to engage in small farming. It will not be surprising if in a short time it will be able not only to supply the home markets, but produce a surplus for markets abroad.

DEVELOPMENT OF SUGAR GROWING.

In order to promote the development of sugar culture in the Republic, the Federal Government has authorized the Banco da Republica to make advances in support of that industry to the amount of 1,500 *contos* of *reis*, on conditions favorable to the planters, but with ample guarantee for the protection of the Brazilian treasury. At a meeting of Brazilian sugar traders held in Bahia in June, 1902, delegates from Rio de Janeiro, Maranhão, Rio Grande do Norte, Parahyba, Pernambuco, Alagoas, Sergipe, São Paulo, and Bahia assured the Congress that they were in a position to state that the various Governors of the States they represented had pledged themselves to assist the sugar industry to the very best of their ability by simplifying taxation and abolishing all interstate taxes which tended to hamper the expansion and development of the sugar trade.

RUBBER EXPORTS IN 1901-2.

According to final returns, the shipments of rubber from the Amazon Valley for the season of 1901–2 amounted to 29,997 tons, or 2,317 tons more than in 1900–1901. The rubber fields of the lower river, especially on the islands, are declining both in quantity and quality of production, but the decrease is more than compensated for by the development of new fields and the expansion of those on the Upper Amazon. It is estimated that the output for the season just begun will surpass all previous crops.

The movement of the Amazon Valley rubber product for the seasons of 1896–97 to 1901–2, inclusive, has been as follows:

Year.	Destination.		Total.
	United States.	Europe.	
	Tons.	*Tons.*	*Tons.*
1896–97	9,848	12,368	22,216
1897–98	11,422	10,796	22,218
1898–99	12,398	12,848	25,246
1899–1900	12,474	14,407	26,881
1900–1901	15,194	12,486	27,680
1901–2	14,066	15,930	29,997

EXPORTS FROM PARÁ FOR JULY, 1902.

From Dr. A. BEZERRA, Honorary Corresponding Member of the International Union for Brazil, we have received the following statistics of the exports from Pará for the month of July:

Articles.	Destination.		Total.
	Europe.	United States.	
Rubber ... kilos	697,877	630,634	1,328,511
Cacao ... do	537,631	23,323	560,954
Chestnuts ... hectoliters	2,207	6,183	8,390

NEW COFFEE MACHINES.

The July number of the "Revista Agricola" contains a drawing, accompanied by a description, of a new machine for the preparation of coffee, invented by Dr. SCHULMANN, of São Paulo. The article states that the inventor, in planning the machine, had two main objects in view—perfection of work and cheap installation. The machine turns out 500 arrobas of coffee per day, separating it into six different types. Two of these grades are clean flat coffee; one is a pure Mocha; another a Mocha of larger size; another, flat with a few black grains, and the last grade is of such a good quality that it may be classed as ordinary coffee. The last-mentioned grade is the only one that contains broken coffee, and that in very small proportion. The huller, ventilator, sizer, and separator all work in unison and with perfect freedom of action, together occupying a space of not more than 2 meters square. The machine is divided into two parts of comparatively small weight, so that it can readily be taken apart for purposes of shipment. The cost of the machine, including the mounting, does not exceed 12 contos ($5,800).

NAVIGATION OF THE MADEIRA RIVER.

On the 12th of May, 1902, the President of Brazil signed a decree granting to Dr. PEDRO SOUTO MAYOR a concession to operate a line of steamers on the Madeira River between Santo Antonio and a point near the mouth of the Beni River, at 10° 20′ S. latitude. The term of the concession is twenty-five years. The concessionaire binds himself to execute such works as may be necessary to improve the bed of the river, and to build dams, or open up canals along the banks of the river, at those points where navigation is interrupted by falls. By the terms of the contract the plans of the works to be executed must be submitted to the Minister of Public Works within one year from the date of the contract, and the works must be begun within one year from the date of the approval of the plans, and completed within five years, counted from the same date.

BALATA GUM SUPPLY.

The following report on balata gum in Brazil was made by Mr. WILLIAM GERDEAU at the request of Mr. K. K. KENNEDAY, United States consul at Pará, who forwarded it to the Department of State of the United States on July 15, 1902:

"Pursuant to your request, I submit the following report of my personal investigations of the balata fields of Brazil during my recent explorations of this region:

"The balata, or bulle tree (*Minsaps balata*), known in the Brazilian language as the "macaranduba," grows in great abundance throughout the Amazon Valley, but up to this time no attempt has ever been made to introduce the gutta-percha trade in this country.

"For more than thirty years this trade has been carried on with immensely profitable results in the Guianas and the Orinoco Valley, but those fields are now almost exhausted and very little gutta-percha has recently been shipped.

"It is my opinion that this balata trade can be made to rival the rubber trade in this country, as it can be produced here in unlimited quantities, and its quality is, if not better, at least as good as the Guiana balata.

"I have found the balata trees scattered and in groves, sometimes amounting to forests many miles in extent, all over the States of Pará and Amazonas, and I am informed on trustworthy authority that vast areas of these trees are growing on the Purus and Acre rivers and other tributaries of the Upper Amazon River.

"The method of bleeding the balata tree is entirely different from that used to extract the gum of the rubber tree, and only experienced and expert bleeders can be employed. But, on the other hand, these trees yield many times as much sap as the rubber trees, and one man can easily produce as many kilograms of gutta-percha in a day as twenty men can extract of rubber. The trees will average 3½ pounds of gutta-percha each, and a competent bleeder can prepare 40 to 50 pounds per day. The gum is first fermented and then dried in the sun, after which it is ready for shipment.

"I am surprised to find that this valuable gum, which is so easy of access and so cheaply prepared for market, has never become known to the trade here. Many great fortunes have been made in Guiana from this trade, and I believe the time is now ripe for American capital to develop the trade here. I found the Brazilians cutting down these valuable trees for firewood and building material, being ignorant of their true properties.

"Concessions of balata fields of any extent can readily be secured from the Brazilian Government, and private balata lands can be purchased for a fair price. It only requires some capital and practical knowledge of the business to develop one of the greatest industries in Brazil."

TRADE IN CACAO AND BRAZIL NUTS.

The Brazilian nut crop for 1902 is nearly all in the hands of the dealers or in transit from the fields, and an accurate estimate of the total can be made. The crop is nearly double the combined output of the two previous years. The quality has also been unusually good, and the supply has been so judiciously handled that there has been neither a glut nor a shortage in the market during the season. Prices have ruled firm throughout, and at no time has any stock accumulated. The demand from the United States increases steadily. In 1900 the United States took 44 per cent of the crop and Europe the remainder. In 1901 50 per cent of the crop was taken by the United States, and this year that country's purchases have amounted to 55 per cent.

The total shipments of nuts from the Amazon up to date have been 6,871 tons, of which Manãos shipped 3,778 tons and Pará 3,093 tons. The most conservative estimates of the remainder of the crop place it at about 300 tons, thus making a total for the crop of 1902 of about 7,200 tons. The crop of 1900 was 2,514 tons; that of 1901, 2,808 tons.

THE CACAO CROP.

The cacao market has been steady at average prices, and the demand fully equal to the supply. No crop in this country is subject to such fluctuations as cacao, and for this reason comparisons with previous crops are valueless.

The total shipments from the Amazon for the first six months of 1902 were:

	Tons.
January	314
February	310
March	409
April	408
May	562
June	587
July	300
Total	2,890

Something more than one-third was taken by the United States, and the balance by Europe. France, as usual, is the largest consumer, with Holland second. The trade with the United States is, however, increasing, and before long that country will doubtless consume the bulk of the cacao product of South America.

RAILWAY MILEAGE OF THE STATE OF MINAS GERAES.

The total length of the railways of the State of Minas Geraes is 3,480.187 kilometers, of which 2,312.595 kilometers are owned by the State and 1,167.592 kilometers are under Federal control.

The railways owned by the State are: The Leopoldina, with a total length of 842.156 kilometers; West of Minas, 684 kilometers; Sapucahy, 371 kilometers; Bahia and Minas, 233.8 kilometers; Muzambinho, 94.895 kilometers; Cataguazes, 48.18 kilometers; João Gomes and Piranga, 26.564 kilometers; Paraopeba, 12 kilometers.

The Federal railways are: Central Railway of Brazil, 574.592 kilometers; Minas and Rio, 147 kilometers; Muzambinho, 144 kilometers, and Mogyana Railway, 302 kilometers.

AURIFEROUS ALLUVIAL DEPOSITS OF THE CARMO RIVER.

Dr. TIMOTHEO DA COSTA, in an article published in the "Jornal do Commercio," of Juiz de Fora, gives the results of preliminary workings recently made by him in the gold-bearing alluvial deposits of the Carmo River.

The auriferous alluvial deposits of the Carmo River are among the most important of the State of Minas Geraes, extending from the city of Mariana to the district of Barra Longa. This region has been extensively developed, as may be seen from the large number of abandoned workings. Dr. COSTA claims that the gravel from these workings still contains large quantities of fine gold which could easily be recovered if modern mining machinery were employed. The preliminary workings carried on by Dr. COSTA and his party covered a period of five months. During this time 10,500 pan washings were made. The average yield of gold per cubic meter of gravel was 3.13 grams, although some of the washings gave as high as 6 grams.

The deposit is estimated to contain 18,750,000 cubic meters of gold-bearing gravel. Calculating the yield of gold to be 3.13 grams per cubic meter, the total amount to be extracted is 58,687,500 grams.

Dr. COSTA states that there are many other alluvial deposits in Brazil containing gold which could be worked at small expense and with great profit.

COFFEE STATISTICS.

Authentic figures of coffee production for the harvest year closed June 30, 1902, are as follows:

	Bags of 132 pounds.
Received in the port of Rio	4,971,686
Received in the port of Santos	10,149,327
Total in the two ports	15,121,013

The receipts of the other ports (Victoria, Bahia, Pernambuco, etc.) will be sufficient to make up a total of 16,000,000 bags.

The present harvest, the marketing of which commenced on July 1 of this year, may be estimated at 10,000,000 bags.

The Agricultural Association of the State of São Paulo called a meeting of the coffee planters of that State on the 15th of July to discuss measures for the relief of the coffee industry, São Paulo being the greatest coffee-producing State of Brazil, and furnishing 60 per cent of the world's production. The following are some of the measures proposed and adopted: To restrict, temporarily, the area devoted to the cultivation of coffee; to establish central mills for the classification of coffee intended for export; to prohibit the export of inferior coffee; to offer premiums to roasters who shall open up new markets for São Paulo coffee; to promote the establishment in the State of large roasting mills to facilitate the consumption of coffee; to promote immigration, locating colonists in the agricultural and producing centers; to establish agricultural experiment stations; to facilitate the introduction of the most improved agricultural machinery; to solicit from the Federal Government legislation for the control of trusts and combinations, and the negotiation of commercial treaties reducing import duties on coffee.

MISCELLANEOUS NOTES.

At a meeting of the stockholders of the General Improvement Company of Pernambuco, held on the 26th day of June, 1902, it was decided to contract a loan of 920 *contos* ($447,120), giving as security the Cucaú sugar factory, situated in the municipal district of Serinhaem, State of Pernambuco. The company will issue 4,600 debentures, of the nominal value of 200 *milreis* ($97) each, bearing 7 per cent interest, payable semiannually. The loan is redeemable in twelve years, payments to be made annually, beginning with the year 1904.

The amount of gold exported from the State of Minas Geraes from 1896 to 1901 was as follows, expressed in grams: 1896, 1,988,527; 1897, 2,233,214; 1898, 3,090,205; 1899, 4,192,414; 1900, 4,304,688; 1901, 4,012,221; total, 19,821,999. The exports of manganese in 1901 amounted to 92,601,146 kilograms.

The total receipts of the custom-houses of Brazil for the first quarter of 1902 amounted to 45,904,504 *milreis*, compared with 43,324,323 *milreis* for the same period of the preceding year.

The Brazilian Congress has voted a special appropriation of 200 *contos* for the printing of the work entitled "Sertum Palmarum," compiled by the Brazilian botanist, João Barbosa Rodriguez.

According to the "Gazeta Comercial e Industrial," carbons and diamonds have recently been discovered in the district of Moro do Chapeo, State of Bahia.

CHILE.

AGREEMENTS ENTERED INTO BETWEEN CHILE AND THE ARGENTINE REPUBLIC ON MAY 28, 1902.

PROTOCOL.

At a meeting held in the Department of Foreign Relations of Chile by Señor Don JOSÉ FRANCISCO VERGARA DONOSO, Secretary of Foreign Relations, and Señor Don JOSÉ ANTONIO TERRY, Envoy Extraordinary and Minister Plenipotentiary of the Argentine Republic in Chile, for the purpose of fixing rules for the settlement of differences of all kinds which may arise between the two countries and disturb the good relations existing between them, thereby affirming the peace, which so far has been preserved in spite of the alarms felt from time to time on account of the long-standing question of limits, the Argentine Plenipotentiary said: that the purpose of his Government, as illustrated by the international policy constantly pursued by it, is to secure in all cases the settlement by friendly methods of the questions which might arise between it and the other Governments; that the Argentine Republic, while earnestly defending its rights, has always respected in all its fullness the sovereignty of the other nations, without mingling with either their domestic business or their foreign questions; that as a consequence of this fact there is no possibility to impute to his Government any aspiration to territorial expansion; that it is the intent of his Government to persevere in this policy; and that he (the Argentine Plenipotentiary), wishing to give expression to the public sentiment of his country, thought it proper to make these declarations now, when the moment had come for the Argentine Republic and Chile to remove all causes of disturbance of their international relations.

The Secretary of Foreign Relations said on his part: that his Government has entertained and continues to entertain the same high purpose which the Minister of the Argentine Republic has explained in behalf of his Government; that Chile has given abundant proofs of the sincerity of its aspirations by stipulating in its international compacts that arbitration should be resorted to for the adjustment of differences between it and the friendly nations; that, respecting the independence and territorial integrity of the other States, it does not entertain any wish of expanding its territory, unless it is in fulfilment of treaties already concluded or which hereafter may be concluded; that the Chilean Government would also persevere in this policy; that fortunately the question of limits between Chile and the Argentine Republic has ceased to be a danger to the peace of the two nations, which are now waiting for the decision soon to be given by His Britannic Majesty; and that he, wishing also to give expression to the public sentiment of Chile, and agreeing with the Argentine Minister that the moment had arrived for Chile and the Argentine Republic to remove all cause of disturbance of their mutual relations, thought it his duty to make these declarations.

In view of this conformity of aspirations, the following was agreed:

1. To conclude a General Treaty of Arbitration, by which the purposes above explained should be fostered and guaranteed.

2. To make a record of the present conference, said record to be considered as an integral part of the Arbitration Treaty.

In whose testimony they signed this instrument, in duplicate, this 28th day of May, 1902.

J. F. Vergara Donoso.
J. A. Terry.

GENERAL TREATY OF ARBITRATION.

The Governments of Chile and the Argentine Republic animated by the desire to settle by friendly methods whatever questions may arise between both countries, have decided to conclude a General Treaty of Arbitration, and appointed for this purpose as their respective Plenipotentiaries:

His Excellency the President of the Republic of Chile, Señor Don José Francisco Vergara Donoso, Secretary of State in the Department of Foreign Relations,

And His Excellency the President of the Argentine Republic, Señor Don José Antonio Terry, Envoy Extraordinary and Minister Plenipotentiary of the Argentine Republic in Chile,

Who, after having communicated to each other their respective full powers and finding them in due legal form, have agreed to the stipulations contained in the following articles:

Article I. The High Contracting Parties bind themselves to submit to arbitration all questions of whatever nature which from whatever cause may arise between them, in so far as they do not affect the provisions of the Constitution of the one or the other country, provided always that they can not be settled by direct negotiations.

Art. II. Questions that may have been the object of definite agreements between the Parties can not be reopened by virtue of this Treaty. In such cases the arbitration shall be limited exclusively to the questions that may arise upon the validity, interpretation, and fulfillment of the said agreements.

Art. III. The High Contracting Parties select as Arbitrator the Government of His Britannic Majesty. If either of the Parties should sever its friendly relations with the Government of His Britannic Majesty, both Parties select as Arbitrator in such case the Government of the Swiss Confederation.

Within the period of sixty days, counted from the exchange of ratifications, both parties shall petition, jointly or singly, the Government of His Britannic Majesty, Arbitrator in the first case, and the Government of the Swiss Confederation, Arbitrator in the second case, to deign to accept the office of Arbitrator conferred upon them by this treaty.

Art. IV. The points, questions, or divergencies to be arbitrated shall be fixed by the Contracting Governments, which shall fix the extent of the powers of the Arbitrator and all circumstances relating to the procedure.

Art. V. In default of agreement, either of the parties may solicit the intervention of the Arbitrator, whose duty it shall be to fix the matters to be arbitrated, and the time, place, and rules of procedure of the arbitration. He shall also decide all the questions of procedure that may arise in the course of the debate. The parties to the arbitration bind themselves to place at the disposal of the Arbitrator all the information within their reach.

Art. VI. Each one of the parties shall have the power to appoint one or more persons to represent it before the Arbitrator.

Art. VII. The Arbitrator is competent to decide upon the validity of the agreement to arbitrate and its interpretation; and he is also equally competent to decide the disputes that may arise between the parties to the arbitration as to whether certain questions have or have not been submitted to the arbitral jurisdiction in the deed of agreement to arbitrate.

Art. VIII. The Arbitrator shall decide in conformity with the principles of International Law, unless the arbitral agreement stipulates the observance of special rules, or empowers him to decide as a friendly mediator.

Art. IX. The decision shall settle definitely each point in dispute, and shall give the reasons on which it is founded.

Art. X. The decision shall be drawn in duplicate, and notice thereof shall be given to each one of the parties through its representative.

Art. XI. A legally pronounced decision settles, within the limits of its scope, the contention between the parties.

Art. XII. The Arbitrator shall state in the decision the period of time within which it is to take effect, and he shall be competent to decide the questions that may arise out of the execution of the same.

Art. XIII. No appeal can be taken from the decision, and its fulfillment is confided to the honor of the nations signatory to this treaty. Nevertheless, the recourse of revision before the Arbitrator who pronounced the sentence shall be admitted, provided that application therefor be made before the expiration of the time fixed for its execution, and in the following cases:

1. If the decision has been based upon a false or spurious document.
2. If the decision has been wholly or in part the consequence of an error of fact resulting from the procedure or the documents of the case.

Art. XIV. Each one of the parties shall pay its own expenses and half of the general expenses of the arbitration.

Art. XV. The present treaty shall remain in force for ten years from the date of the exchange of the ratifications. If it should not be denounced six months before its expiration, it shall be considered as renewed for another term of ten years, and so on in succession.

The present treaty shall be ratified and its ratifications exchanged in Santiago within six months from its date.

In testimony whereof the Plenipotentiaries of Chile and the Argentine Republic have signed and sealed in duplicate the present treaty, at the city of Santiago, this 28th day of May, 1902.

[SEAL.] J. F. Vergara Donoso.
[SEAL.] J. A. Terry.

CONVENTION ON NAVAL ARMAMENTS.

At a meeting held at the Department of Foreign Relations of Chile by Señor Don José Francisco Vergara Donoso, Secretary of Foreign Relations, and Señor Don José Antonio Terry, Envoy Extraordinary and Minister Plenipotentiary of the Argentine Republic in Chile, it was agreed by both parties to set forth in the following Convention the conclusions reached by them for the purpose of limiting the naval armaments of the two Republics, which conclusions have been reached owing to the initiative and good offices of His Britannic Majesty, represented by Sir Gerard A. Lowther, his Envoy Extraordinary and Minister Plenipotentiary in Chile, and by Sir W. A. C. Barrington, his Envoy Extraordinary and Minister Plenipotentiary in the Argentine Republic.

Article I. With the object of removing all disquieting or suspicious motive in one or the other country, the Governments of Chile and of the Argentine Republic renounce the acquisition of the war vessels they have in construction and the making for the present of any new acquisitions.

Both Governments agree, moreover, to reduce their respective fleets, to which end they will continue to treat until they arrive at an agreement which shall effect a prudent equilibrium between the said fleets. This reduction shall be made in the term of one year counted from the date of the exchange of the present convention.

ART. II. The two Governments bind themselves not to increase during five years their naval armaments without previous notice, which the one desirous of increasing shall give to the other eighteen months in advance. It is understood that this agreement does not include all armament for the fortification of coasts and ports, it being permitted to acquire any floating machine intended solely for coast and port defense, such as submarines, &c.

ART. III. The sales to which this convention may give rise shall not be made to countries having questions pending with one or other of the contracting parties.

ART. IV. With the object of facilitating the transfer of pending contracts, both Governments bind themselves to extend for two months the term they have stipulated for the delivery of the respective vessels under construction, to which end they shall give the necessary instructions at the time of signing this convention.

ART. V. The ratification of this convention shall be exchanged in the term of sixty days, or before if possible, and the exchange shall take place in this city of Santiago.

In witness whereof the Plenipotentiaries have signed and sealed, in duplicate, this convention at the city of Santiago this 28th day of May, 1902.

[SEAL.] J. F. VERGARA DONOSO.
J. A. TERRY.

At a meeting held at the Department of Foreign Relations of Chile by Señor Don JOSÉ FRANCISCO VERGARA DONOSO, Secretary of Foreign Relations, and Señor Don JOSÉ ANTONIO TERRY, Envoy Extraordinary and Minister Plenipotentiary of the Argentine Republic, both of them being duly authorized for the purpose of fixing the interpretation to be given to the Treaty of Limits of July 23, 1881, the Protocol of May 1, 1893, the agreement of April 17, 1896, and the "actas" of the 15th, 17th, and 22d of September, 1898, have agreed in the name of their respective Governments, and in order to avoid any difficulty which might present itself in the actual demarcation of the boundary line between the two countries, in the part thereof submitted to the decision of His Britannic Majesty, to request the Arbitrator to appoint a Commission whose duty it shall be to mark on the ground the limits which the decision may establish.

In testimony whereof they have signed the present "acta" in duplicate at Santiago on the 28th of May, 1902.

[SEAL.] J. F. VERGARA DONOSO.
[SEAL.] J. A. TERRY.

NOTES EXCHANGED BETWEEN THE CHILEAN SECRETARY OF FOREIGN RELATIONS AND THE ARGENTINE MINISTER IN CHILE.

SANTIAGO, *May 26, 1902.*

MR. MINISTER: As the proceedings in the arbitration respecting the limits between our respective countries have reached a stage which permits the belief that the decision will soon be given, my Government, animated as it has always been, by the desire that this long standing dispute should be closed as soon as possible, would be exceedingly gratified if the Government of Your Excellency, if intending to make use of its right to file a new argument, would be pleased to do it in a manner which would not prevent the Arbitrator from rendering his decision within the present year.

Hoping that Your Excellency will be pleased to give me an answer on this point, I remain, etc.,

J. F. VERGARA DONOSO.

His Excellency Don JOSÉ A. TERRY,
Envoy Extraordinary and Minister Plenipotentiary
of the Argentine Republic.

ARGENTINE LEGATION, *Santiago, May 28, 1902.*

MR. SECRETARY: I have the honor to acknowledge the receipt of Your Excellency's note of the 26th instant, stating that as the proceedings of the arbitration of limits between our respective countries are so advanced the Government of Your Excellency, animated by the desire that this long-standing dispute should be settled as soon as possible, would be pleased to have the Argentine Government cooperate for this purpose in the form which, in its judgment, might be adequate to facilitate the work of the Arbitrator and secure his decision within the present year.

In answer thereto, Mr. Secretary, it is gratifying to me to inform Your Excellency that I have received instructions from my Government permitting me to state that it is animated by exactly the same feelings and purposes set forth by Your Excellency, and that it is ready to facilitate the action of the Arbitrator, in order that his decision be rendered within the time mentioned. To this effect it will take the necessary steps.

I am, Mr. Secretary, etc.,

J. A. TERRY.

His Excellency the SECRETARY OF FOREIGN RELATIONS.

SANTIAGO, *May 28, 1902.*

MR. MINISTER: The second part of Article I of the Convention entered into for the limitation of the naval armaments of Chile and the Argentine Republic says: "Both Governments agree, moreover, to reduce their respective fleets, to which end they will continue to treat until they arrive at an agreement which shall effect a prudent equilibrium between the said fleets. This reduction shall be made in the term of one year, counted from the date of the exchange of the present Convention."

This Government understands that the differences which may arise out of the execution of the above clause should be adjusted by the Arbitrator, as provided in Article I of the General Treaty of Arbitration concluded on this date.

Hoping Your Excellency will be pleased to communicate to me the ideas of your Government in regard to this point, I remain, etc.,

J. F. Vergara Donoso.

His Excellency Don Jose A. Terry,
Envoy Extraordinary and Minister Plenipotentiary
of the Argentine Republic.

Santiago, *May 28, 1902.*

Mr. Secretary: I had the honor to receive Your Excellency's note of this date, informing me that your Government interprets the second part of Article I of the Convention on Limitation of Naval Armaments in the sense that any differences which may arise and can not be directly adjusted within one year by the two Foreign Offices ought to be submitted to arbitration, in compliance with the general treaty on that subject concluded on this date.

In reply thereto it is gratifying to me to express to Your Excellency that my Government interprets in the same way the stipulation referred to.

I am, etc., J. A. Terry.

His Excellency the Secretary of Foreign Relations.

PREMIUM FOR THE MANUFACTURE OF SULPHURIC ACID.

The following is a translation of a law passed recently by the National Chilean Congress, the text of which was published in the "Diario Oficial" of June 12, 1902:

"Article 1. A premium of 3 *centavos* will be granted for each kilogram of sulphuric acid at 60 degrees Baumé manufactured in the country, provided that the production of each factory is not less than 1,500 tons annually.

"Art. 2. The interested parties, in order to enjoy this premium, must begin work on their factory within one year, dating from the promulgation of the present law.

"Art. 3. The President of the Republic is authorized to expend annually, during a period of five years, a sum amounting to 50,000 *pesos*, to pay the premiums provided for in article 1.

"ART. 4. If the sum of 50,000 *pesos* is insufficient to subsidize the total production of the different factories of sulphuric acid established in the country, the amount will be divided in proportion to the production of each factory."

Mention should be made of the fact that the pyrites suitable to the manufacture of sulphuric acid abound in Chile.

Sulphuric acid would be especially valuable in the treatment, by the wet process, of the poor copper ores which are found in abundance in the Cordilleras.

COLOMBIA.

CUSTOMS TARIFF.

(Revised up to March, 1902.)[a]

[Money, weights, and measures: The monetary unit of Colombia is the *peso* = 100 *centavos* (4s. nominal value). For weights and measures Colombia has adopted the metrical system.]

Foreign products shall, on entering national territory, be subject, per kilogram, to the duties established below. (Law 36 of 1886.)

The following reductions shall be made to these duties:

Forty per cent in the custom-houses of Aruca and Meta. (Law 53 of 1884 and decree 397 of 1886.)

Twenty per cent in the custom-house of Buenaventura.

Fifty-five per cent for unembroidered cotton tissues, and 30 per cent for other goods, in the custom-house of Tumaco. (Laws 10 and 129 of 1888.)

Every payment in the custom-house shall be subject to a surtax of 25 per cent. Said amount shall be distributed between the States with the exception of the State of Panama. (Laws 88 of 1886, 48 of 1887, and 10 and 129 of 1888.)

No reductions shall be made nor surtaxes levied on the increases stipulated in decree 453 of 1893.

No.	Goods.	Duties.
	Comestibles and condiments.	
1	Sweet potatoes or yams, potatoes, onions, maize, rice, chick peas, lentils, beans, and all kinds of vegetables, pot herbs, and fruits, fresh	*Pesos.* 0. 01
	The same, imported through the custom-houses of Buenaventura and Tumaco (law 29 of 1887)[a]	Free.
2	Garlic	.05
3	Flour, including sago, arrowroot, tapioca, maïzena, and other similar products	.05
	The same, imported through the custom-houses of Buenaventura and Tumaco (law 29 of 1887)[b]	Free.
4	Wheat flour prepared for vermicelli and other similar alimentary pastes, imported for the manufacture of said products (Decree 537 of 1888, Diario Oficial 7430)[c] [d]	.01

[a] Revision effected by the International Tariffs Bureau.

[b] The Government shall levy a duty on these products as soon as the reasons which caused the exemption cease to exist. (Art. 2 of law 29 of 1887.)

[c] Decree 1278, of December 29, 1894 (Diario Oficial 9677, of January 11, 1895): The decree 537 of 1888, published in No. 7430 of the Diario Oficial, reducing the import duties leviable on several raw materials destined to industries, is repealed.

[d] Ordinance of June 26, 1895, relative to the régime applicable to wheat (Diario Oficial 9781, of July 6, 1895). An ordinance, dated November 16, 1889, annexed to the bill of the budget law of 1890, having prescribed that barley should be comprised among the alimentary products of the Second Class of the Tariff, the same classification should, by analogy, be adopted for wheat, which is a product of the same nature.

No.	Goods.	Duties.
	Comestibles and condiments—Continued.	
5	Salt codfish and meat in brine, and, in general, fish and meat not prepared	*Pesos.* 0. 05
6	Sugar	. 05
7	Hazlenuts, nuts and almonds, in the shell, and, in general, all alimentary products not prepared and not elsewhere mentioned	. 10
8	Vermicelli and other pastes	. 10
9	Alimentary products, prepared, such as Bologna sausages, salmon, hams, sweetmeats, confectionery, preserved and dried fruits, etc., fruits preserved in vinegar, and condiments of all kinds not specially mentioned	. 20
10	Olives, in barrels	. 10
11	Tea	. 70
12	Cinnamon	. 30
13	Saffron	[a] 1. 20
14	Aniseed	. 20
15	Ice (law 36 of 1886 and 129 of 1888)	. 01
16	Salt [b] [c] ... 12½ kilograms	1. 20
	Beverages.	
17	Beer and other fermented beverages	. 05

	Liquids, other.	
21	Vinegar, in barrels	. 05
22	Olive oil	. 10
	Linseed oil for preparing paint	. 10
23	Inks:	
	Black, for writing	. 05
	Colored, for writing	. 10
	Printing, for bookbinders and lithographers (liquid or solid)	. 01
24	Liquids of all kinds, with the exception of perfumery and liquids specially mentioned	. 20

---

[a] This duty does not include the increase stipulated in decree 453 of 1893.

[b] Decree 447, of October 3, 1895, modifying the decree 1449 of 1893, which prescribes the duties leviable on salt imported through the custom-houses of Buenaventura and Tumaco (Diario Oficial 9842, of October 8, 1895): The import duties leviable on salt imported through the custom-houses of Buenaventura and Tumaco are reduced to 10 centavos per 12½ kilograms.

This reduction shall be effected by tenths, at the rate of one-tenth per month, on and after January 2 next, conformably to the stipulations of article 205 of the constitution.

[c] Decree 299 of March 12, 1901, establishing the salt régime (Diario Oficial 11449, of March 23, 1901): Art. 3. The duty payable at custom-houses of the Republic on salt imported from abroad shall be 4 pesos per 12½ kilograms.

An executive decree may reduce the above rate in the Buenaventura and Tumaco custom-houses.

The first article of decree 11 of 1901 and article 1 of the customs tariff are modified accordingly.

[d] This duty does not include the increase on San Rafael wine stipulated in decree 453 of 1893.

[e] Decree 846 of July 15, 1901, establishing the import duties payable upon alcohol and other spirits (Diario Oficial 11536, of August 8, 1901): Sole article. As soon as the present decree shall have come to the knowledge of the respective customs administrators of the Republic, the undermentioned alcohol and liquors shall pay the following customs duties:

Spirits (aguardiente), absinthe, alcohol (pure, disinfected, rectified, etc.), bitters, brandy, cognac, creams, curaçao, chartreuses and other cordials, gin, kirsch, rum, whisky, and the like, kilogram	$2. 00
Extract of cognac, essences and spirits for making liqueurs ... kilogram	10. 00

No.	Goods.	Duties.
	Cotton.	
	Cotton manufactured into unbleached tissues, without white or colored parts, not figured and without needlework	*Pesos.* 0.40
26	Cotton, fulled (en fulas), blue; and tissues, white, or unbleached with white parts, plain, neither dyed nor figured, without needlework or embroidery, such as those known as bogotonas, calicos, liencillos, madapolams, bramantes, etc	.50
27	Drills and other tissues, white or colored, not otherwise mentioned	.60
28	Counterpanes, tissues called marsellas, and figured or damasked tissues not included in any other category; velvet, ferret, and ribbons	.70
29	Shawls, with or without woolen fringes	.60
30	Handkerchiefs, with or without common embroidery; rouens and cotton tissues in the piece for their manufacture	.80
31	Stockings and other kinds of hosiery, such as undershirts, drawers, and gloves; muslins, lawns, and other transparent tissues; damasks, table covers, and hammocks; ready-made underclothing without embroidery, lace, or other ornamentation, composed of material subject to higher duties	.90
32	All kinds of tissues, embroidered or with network, and imitations thereof, including lace, insertions, etc., and the same articles in ready-made clothing not otherwise mentioned	1.20
33	Thread—	
	White	.40
	Colored	.60
34	Fringes, galloons, cords, braids, tassels, and other similar articles	.90
35	Wicks for lamps and tinder boxes	.20
	Wicks for candles and matches	.10
36	Bridle reins	.20
	Unembroidered cotton tissues, imported through the custom-house of Tumaco, shall enjoy a reduction of 25 per cent in addition to the general reduction granted to all goods imported through the port of Tumaco, as stipulated in the preliminary notes to the tariff. (Law 129 of 1888.)	
	Hemp and flax.	
37	Sacks or bags, empty, of coarse cloth, tarred or not, with or without waterproof paper, and coarse tissue for the manufacture of such bags	.01
38	Cloth, unbleached (coleta)	.10

90	Stearic acid[a]	.01
91	Petroleum	.10
92	Matches:	
	Of wood[b]	.20
	Of wax[b]	.60

[a] Ministerial ordinance of January 4, 1899, relative to the customs treatment of stearin (Diario Oficial 10861, of January 16, 1899): In virtue of a ministerial ordinance dated January 4, 1899, stearin, classed in No. 87 of the tariff, is assimilated to stearic acid and shall be dutiable like the latter product according to tariff No. 90, at the rate of 1 *centavo* per kilogram.

[b] I. Decree No. 438, of September 28, 1897, prohibiting the importation of matches as well as raw materials destined to their manufacture (Diario Oficial 10461, of October 5, 1897): On and after October 8, 1897, the importation into the territory of the Republic of matches of all kinds and the following enumerated raw materials as well as articles destined to their manufacture and packing is prohibited, to wit:

1. Common phosphorus.
2. Red phosphorus.
3. Wood in strips or vestas, for matches.
4. Cardboard boxes.
5. Cardboard prepared for the manufacture of boxes.

Art. 2. Matches and the above enumerated materials imported after the aforesaid date shall be considered as contraband and confiscated comformably to the customs regulations, and one-half of the value of the contraband shall be attributed to the denunciator or to those having effected the seizure and the other half shall be handed over to the farmer of the monopoly for the manufacture and sale of matches.

II. Ministerial ordinance of December 30, 1898, authorizing the importation of matches (Diario Oficial 10857, of January 11, 1899): In virtue of a ministerial ordinance dated December 30, 1898, the manufacture, importation, and trade in matches are authorized, on observance of the laws in force.

III. Ministerial ordinance of January 18, 1899, suspending the execution of ordinance dated December 30, 1898, relative to the importation of matches (Diario Oficial of January 24, 1899): The effects of ministerial ordinance of December 30, 1898, authorizing the manufacture, importation, and sale of matches are suspended.

[a] Ordinance of February 23, 1895, relative to the customs treatment of machetes and knives (Diario Oficial 9706, of February 28, 1895): For the classification of knives and machetes proceeding from abroad, as well as those of such articles the customs clearance of which has not yet been effected, the customs must comply with the following stipulations:

Pruning knives (calabozos), sickles (aguinches), and other edged implements for grubbing, as well as machetes or hunting knives not exceeding 40 centimeters (40 pulgadas granadinas) in length, shall be ranged in the fourth class of the customs tariff, and subject to a duty of 5 cenavos per kilogram. Knives or edged implements employed in arts and trades, such as knives for bookbinders and shoemakers, and those employed for agricultural purposes (other than the edged implements for grubbing and the hunting knives mentioned above) shall be ranged in the sixth class, and subject to a duty of 20 centavos.

Machetes and peinillas which are carried with a belt (other than those employed in the army), daggers, and all other similar articles shall be considered as side arms and ranged in the fourteenth class, and subject to a duty of $1 per kilogram.

Machetes, peinillas, and sabers employed in the army are arms of war, and, as such, prohibited on importation.

Common table knives are ranged in the eighth class, and those with handles of ivory, mother-of-pearl, plated, and of Britannia metal are comprised in the fourteenth class.

Knives and machetes not enumerated in the preceding paragraphs are comprised in the eighth class.

Should the handles, sheaths, or other parts of machetes, knives, etc., be of silver or a material other than that generally employed in their manufacture, and should, owing to their weight or other circumstances, such parts be subject to higher duty when imported separated (ordinance of February 10, 1887, Diario Oficial 6958), the machetes or knives in question shall be subject to the duty leviable on the latter material.

No.	Goods.	Duties.
	Iron and steel—Continued.	
		Pesos.
157	Presses for printers, bookbinders, and lithographers	0.02½
158	Motors of all kinds and of any power	.02½
159	Tin plate	.05
160	Monitores and large cylinders for coffee-preparing machines	.02½
161	Boilers, large	.05
162	Tanks for potable water	.01
163	Stampers and blocks of iron, steel, or bronze for ore-crushing machines and mills (law 129 of 1888)	.01
164	Anvils and pulley blocks	.05
165	Plows	.02½
166	Plates or rods not included in roughly wrought iron; beds, large chains, safes, nails, and tacks; kitchen utensils, not tinned or only tinned on the interior; flat irons; large implements for agricultural purposes, for quarries and for mines, such as hoes and picks, levers, shovels, drill bits, large hooks (garlanchas), axes, large crowbars for mines, spades, hammers, pickaxes, drills, machetes, and other knives for felling timber	.05
167	Steel in bars or rods, for manufacturing purposes (law 129 of 1888)	.02½
168	Machetes or hunting knives, not exceeding 20 inches in length (law 129 of 1888) [a] [b]	.05
169	Drills of steel for mines (law 129 of 1888)	.05
170	Tools for blacksmiths, stone masons, carpenters, and bricklayers	.20

172	Wire, rings, buttons, hinges, screws, and springs for furniture	.20
173	Furniture	.20
174	Tires, wheels, axles, springs, and pins for carriages and carts	.05
175	Scales, balances, Roman, etc.:	
	For weighing more than 100 kilograms	.10
	For weighing 100 kilograms and less	.20
176	Currycombs and brushes	.20
177	Cooking utensils and other articles of tin, or of iron tinned both on the interior and on the exterior	.20
178	Knives for arts and industry, such as bookbinders' and shoemakers' knives [a]	.20
179	Cutlery not otherwise mentioned [c]	.40
180	Side arms, firearms, and other arms, including sporting guns [c]	1.00
181	Razors and scissors, fine or half fine; knives and forks with handles of ivory, mother-of-pearl, britannia metal, or with electroplated handles; nipples for guns; beads, gilt or silvered; pencil cases, jewelry, and all gilt or silvered articles; also those of German silver or electroplated, fine or half fine [a]	1.00
182	Drills of steel not otherwise mentioned	.20
183	Iron and steel manufactured into articles not otherwise mentioned	.40
	Copper and bronze.	
184	Copper or bronze, unwrought, in bars and in ingots	.10
185	Plates or sheets, of whatever weight	.10
186	Pans or boilers, or other articles the weight of which exceeds 25 kilograms	.20
187	Articles the weight of which exceeds 500 grams but does not surpass 25 kilograms	.40
	Articles the weight of which does not exceed 500 grams	.50

[a] See note on p. 730.

[b] Ordinance of May 10, 1895, completing the provisions relative to machetes or hunting knives (Diario Oficial 9753, of May 17, 1895): The law 129 of 1888, which, in the classification of machetes or hunting knives, established for these knives a length not exceeding 20 inches, meant the English measure, as said measure is generally inscribed in the catalogues of models published by the firms manufacturing the kinds of knives ordinarily imported into this country. Besides, this measure is used in the orders and in the commercial invoices, and also usually in the sales and purchases effected on the markets of the country.

Consequently, for the collection of import duties, the customs must range in the fourth class of the tariff, such machetes or hunting knives the blade of which does not measure more than 0.508 meter in length, equivalent to 20 English inches.

[c] See note, p. —.

241	Precious stones	[a]1.20
242	Umbrellas	.80
243	Hats, caps, bonnets, etc., shall pay, respectively, as ready-made clothing according to the tissues or materials of which composed, with the exception of straw hats, which, in general, pay 1.20 pesos per kilogram, and 60 centavos per kilogram if common.	
244	Articles imported for account of the Government, whatever their nature	Free.

[a] This duty does not include the increase stipulated in decree 453 of 1893.

No.	Goods.	Duties.
	Miscellaneous—Continued.	
		Pesos.
245	Personal effects of Foreign Ministers or Diplomatic Agents accredited to the Government, provided that the Governments to whom they belong grant the same privilege to the Ministers and Diplomatic Agents of the Republic and on compliance with the formalities relative to the matter	Free.
246	Baggage up to the weight of 500 kilograms of Ministers and Diplomatic Agents of the Republic who return to the country: Provided, always, that they bring the same with them and declare on their word of honor that said baggage does not contain articles for sale (law 36 of 1886)	Free.
247	Used furniture imported by Colombian Envoys Extraordinary and Ministers Plenipotentiary on their return to the country (law 129 of 1888)	0.01
248	Natural products of Ecuador, the United States of Venezuela, Peru, and of other countries which have granted, or which in the future may grant, by treaty, the same privilege to Colombian products	Free.
249	Passengers' baggage, up to the weight of 150 kilograms per person, provided that the effects be clearly destined for their use and that they be presented by them in person at the custom-house on entry into the country. Any excess of said weight not accompanied by an invoice shall be dutiable as the most highly taxed article mentioned in the tariff[a]	Free.
250	Any artisan or agriculturist coming to work in the country may, in addition to his baggage, import free of duty, up to a weight of 100 kilograms, the implements, which, in the opinion of the Government, are necessary for his calling[b] (law 65 of 1887)	Free.
251	All articles not otherwise mentioned	1.00
	NOTE.—Said goods form, in consequence, one class exempt from duty and fourteen classes paying 1, 2½, 5, 10, 20, 30, 40, 50, 60, 70, 80, 90, 100, and 120 centavos, respectively, and called first class, second class, third class, etc.[c] The Minister of Finance shall publish the tariff as divided into classes.	

---

[a] By baggage is to be understood the articles which a traveler brings with him on the ships conveying him and which are destined to his own use, to wit, clothes, foot wear, watch, bed, saddle, arms, and professional instruments.

The used effects which, in addition to baggage, immigrants may import free of duty are household furniture, and tools and other instruments necessary in the exercise of their calling, but, in no case, shall such exemption extend to articles of commerce. (Art. 131 of the Fiscal Code.)

In order to enjoy this exemption the interested party must comply with the prescriptions of articles 132 and 133 of the Fiscal Code.

[b] In order to enjoy this exemption the interested party must comply with the prescriptions of decree 523 of 1887. (Diario Oficial 7135.)

[c] To these classes must be added those relative to the duties leviable on salt and tobacco. (Laws 36 of 1886 and 85 of 1892.)

Are maintained in the customs code all the dispositions hitherto in force which designate the articles whose entry is prohibited either through certain custom-houses or through any custom-house of the Republic.

The importation into the Republic is prohibited of walking sticks, umbrellas, etc., in which are concealed swords, daggers, or other weapons, which might cause injury to persons.

The importation of the following articles is, unless imported for the Government, likewise prohibited:

Cannon, of whatever shape or system, machine guns of all kinds, rifles, carbines, and other weapons of precision;

Swords, cutlasses, sabers, and cavalry lances; percussion caps, bullets, grenades, and other projectiles for the above-mentioned firearms;

Rifles, guns, firelocks, muskets, and other warlike arms not specially intended or necessary for sporting purposes;

Cartridge boxes, shoulder belts, and all descriptions of accoutrement for soldiers;

And, in general, any instrument, apparatus, or article which, not being manifestly adopted for personal defense, might, by its nature and use, be employed in war or for the armament or equipment of troops.

The importation of spurious coin and foreign coin of a fineness of less than 90 per cent, also of machinery for minting coins, is prohibited; this is likewise the case for all national money of any denomination, or metal, with exception of gold or silver money of a fineness of 90 per cent, and for blanks (esqueletos) for bank notes. (Laws 36 of 1886 and 107 of 1887.) The Government is, however, authorized by Law 41 of 1888 to permit the clearance through custom-houses of the Republic of all current coin of a fineness of 835 thousandths.[a]

The transit through national territory of spurious coins, apparatus, arms and ammunition the importation of which is prohibited, and of nitroglycerin, is likewise illegal.

DUTIES APPLICABLE TO TOBACCO.

I. *Law 72, dated November 16, 1894, repealing law 85 of 1892, and establishing duties on tobacco.*

[Diario Oficial 9652, of December 12, 1894.]

ARTICLE 1. Tobacco imported into the country shall be subject to the following duties:

		Pesos.
Cigars	kilogram	4.0
Cigarettes	do	3.0
Tobacco, cut, and other tobacco of all kinds	do	2.0

Notwithstanding the provisions of this article, the Government is authorized to reserve the right, if it sees fit, for a period of six years, dating from the sanction of the present law, to import and manufacture cigarettes; and may therefore alienate the revenue derived from such monoply.

The contract for such revenue shall be made by public auction, conformably to the formalities prescribed by the Fiscal Code, as to the leasing of revenues, the sale having previously been advertised at least one hundred and eighty days in advance.

On the leasing in question, as well as for public auctions of revenues, no percentage shall be collected.

At the expiration of the lease, any stock of cigarettes, or of raw materials for manufacturing the same, shall be subject to the payment of an impost equal to the above-mentioned import duty.

ART. 2. The cultivation and exportation from the country of tobacco is entirely free; it shall only be subject to a consumption tax not exceeding 1.50 peso per 12½ kilograms for cigars and leaf tobacco of first quality, and in proportion for inferior qualities.

The tax shall be established by each Assembly in the manner thought most convenient in view of the existing circumstances in each Department, and by taking for a basis the state of local industries. Consequently, the tax may be applied either on tobacco destined for sale, on tobacco intended to be manufactured or prepared in any manner, or on the manufactories, stores, shops, or places of sale for this product.

ART. 3. Out of the net proceeds of the consumption tax on national tobacco, 60 per cent shall be attributed to the Department and 40 per cent to the municipalites.

The customs duties established by the present law on cigarettes imported from abroad shall be collected for the benefit of the Treasury.

ART. 4. The collection of the consumption tax on national tobacco, established in virtue of the present law, shall be leased by public auction, and these auctions shall be held in every district.

In the event of inability to hold such auction, the Department shall collect this revenue, conformably to the ordinances on the matter.

ART. 5. Law 85, of December 10, 1892, relative to the consumption tax on tobacco, is hereby repealed.

---

[a] See Decree 378 of 1888. (Diario Oficial 7363.)

II. *Decree 594, dated December 12, 1899, establishing the import duties on tobacco of all kinds and cigarette paper.*

[Diario Oficial 1179, of January 2, 1900.]

SOLE ARTICLE. From and after the date of entry into force of Article 1 of Decree 559, dated the 20th November last (Diario Oficial 11154), relating to the suppression of the cigarette monopoly, tobacco and cigarette paper shall be subject to following duties:

		Pesos.
Cigars	kilogram	5.00
Cigarettes	do	5.00
Cut and other tobacco	do	4.50
Cigarette paper	do	.50

III. *Decree 400, of April 9, 1901, relating to customs duties on imported tobacco and cigarette paper.*

[Diario Oficial 11466, of April 18, 1901.]

ARTICLE 1. Tobacco imported under different forms and raw materials necessary for the manufacture of cigarettes shall pay the undermentioned customs duties, and shall cease to be subject to the additional duties applicable thereto prior to the date of this decree:

		Pesos.
Cigars	kilogram	5.00
Cigarettes	do	5.00
Cigarette tobacco	do	3.00
Other unenumerated tobacco	do	4.50
Special cigarette paper	do	.50

Stamped paper for packets of cigarettes shall be assimilated to labels, and, as such, dutiable under Class VI of the customs tariff in force.

ART. 2. Decree 594, dated December 12, 1899,[a] is to be construed and amended as above, and the modifications hereby decreed shall be applicable as soon as the customs authorities of the Republic have received notice of same.

RÉSUMÉ OF THE CUSTOMS TARIFF AS ARRANGED IN CLASSES.

The classes of the tariff according to the duties therein applicable to goods are:

First class.—Goods free of duty.
Second class.—Goods paying 1 centavo per kilogram.
Third class.—Goods paying 2½ centavos per kilogram.
Fourth class.—Goods paying 5 centavos per kilogram.
Fifth class.—Goods paying 10 centavos per kilogram.
Sixth class.—Goods paying 20 centavos per kilogram.
Seventh class.—Goods paying 30 centavos per kilogram.
Eighth class.—Goods paying 40 centavos per kilogram.
Ninth class.—Goods paying 50 centavos per kilogram.
Tenth class.—Goods paying 60 centavos per kilogram.
Eleventh class.—Goods paying 70 centavos per kilogram.
Twelfth class.—Goods paying 80 centavos per kilogram.
Thirteenth class.—Goods paying 90 centavos per kilogram.
Fourteenth class.—Goods paying 100 centavos per kilogram.
Fifteenth class.—Goods paying 120[a] centavos per kilogram.

To this enumeration should be added the duty on salt, which is 4 pesos per 12½ kilograms, and that on tobacco, which is subject to the duties stipulated by law.

These duties are subject to the rebates and surtaxes stipulated at the commencement of the foregoing tariff.

A. PROVISIONS AS TO INCREASE AND DECREASE OF CUSTOMS DUTIES.

I. *Decree 453 of February 10, 1893.*

The Vice-President of the Republic, intrusted with the executive power, in execution of article 5 of law 93 of 1892 and of the last article of law 109 of the same year (Diario Oficial 9020 and 9034), decrees:

---

[a] This duty does not include the increase stipulated in Decree 453, of 1893.

ARTICLE 1. The import duties stipulated in the customs tariff for the following goods shall be increased monthly from March 16 to December 16 of this year (1893), at which date the definite augmentation shall be complete.

This increase shall be applied at the following rate and per kilogram:

Five centavos for brandy, rum, whisky, geneva, rosolis, and concentrated liquids for the manufacture of said beverages; for the wines included in the eighth class of the tariff (duty 40 centavos) and for the goods mentioned in the fifteenth class (duty 1 peso 20 centavos).

One centavo for all pharmaceutical specialties, such as wines, sirups, pills, ointments, elixirs, lozenges, etc., and all patent medicines.

ART. 2. The increased duties mentioned in the foregoing article shall not be subject to the rebates in the custom-houses of Buenaventura and Tumaco decreed by law 10 of 1888, such rebates only being applicable to the tariff then in force, and they shall not be subject to the surtax of 25 per cent established by laws 88 of 1886 and 99 of 1888.

ART. 3. Said increase shall be liquidated separately from the customs duties stipulated in the tariff and shall be divided into two equal parts, one of which shall be paid into the National Bank immediately after collection.

ART. 4. The present decree can not be revoked or modified unless by law, conformably to the prescriptions of the above-mentioned law 109 of 1892.

Given at Bogota, February 10, 1893.

M. A. CARO.
PEDRO BRAVO,
The Minister of Finance.

II. *Circular 24810, of January 25, 1895.*

[Diario Oficial 9695, of February 1, 1895.]

In virtue of the present circular the total increase of duties applicable to certain goods stipulated by the decree 453 of February 10, 1893, shall be decreased monthly by one-tenth from February 20 proximo.

The same successive decrease shall be applied from February 21 proximo to the duties on tobacco increased by the ordinance of March 9, 1893, until the rate of duty established by article 1 of law 72 of 1894 shall be reached. Cigarettes and cut tobacco, the importation of which is prohibited to private persons, the State having reserved the monopoly for their manufacture and importation, are excepted.

III. *Law 160 of December 28, 1896, augmenting the import duties.*

[Diario Oficial 10233, of January 12, 1897.]

ARTICLE 1. The import duties leviable by the custom-houses of the Republic are increased by 20 per cent on all goods included in classes 2 to 13, inclusive, and by 50 per cent on the articles comprised in classes 14 and 15 of the tariff in force.

ART. 2. A sixteenth class of the tariff is established, to consist of the articles hereinafter mentioned, which shall be liable to a duty of 3 pesos per kilogram.

Side arms, fire or other arms, excepting shotguns.

Brocades and all other tissues of gold, silver, or other metals, as well as threads of the same materials.

Perfumery and toilet articles, such as essences, creams, and perfumed soaps.

Gold and silver in any form other than coins or bars.

Precious stones and playing cards.

ART. 3. The increase set forth in Article 1 of the present law shall be collected on the duties established by the law 36 of 1886, and according to the terms of article 205 of the constitution.[a]

ART. 4. The following goods are exempted from the increase of duties referred to in Article 1, viz:

Coal and materials imported for the manufacture of ice, which shall only pay one-half centavo per kilogram.

Crucibles for smelting works.

Printing presses and machines.

Unsized printing paper.

Rails and fixed stock for public or private railways not otherwise exempt.

Ships, in whole or in part, and their respective machinery.

Cotton tissues, blue or white or unbleached and partly white, neither figured, sewn, nor brocaded, such as those known under the name of bogotanas, calicoes, liencillos, madapolam, tissues called bramantes, drills, prints (zarazas), and the like.

---

[a] Under article 205 of the constitution duties can only be increased or decreased by tenths, and only three months after the promulgation of the law.

PARAGRAPH.—The dispositions of the present law do not modify the ordinance of the Minister of Finance dated July 6, 1895, in relation to classes.

ART. 5. The Government is authorized to include in the same class of the customs tariff similar articles which have been distributed in different classes.

ART. 6. The Postal Service being paid by the Universal Postal Union, the tonnage dues provided by article 192 of the Fiscal Code are reestablished and shall be collected by the respective custom-houses at the rate of 1 peso 5 centavos per ton, according to the terms of the said article.

PARAGRAPH.—The Government will consequently not take into consideration the conventions respecting the conveyance of the mails nor the exemptions from the tonnage dues enumerated in articles 11 and 22 of the law 109 of 1880, such articles being repealed.

ART. 7. Exemptions from custom duties granted by law or stipulated in contracts entered into with the Government to railway or navigation companies, manufactories, etc., which do not specifically state the duty-free articles, shall only apply to the following goods, viz: Machines and extra parts for the same, rails, nails, tools, rolling stock, and telegraph accessories. All other goods shall be subject to import duties according to the class of the tariff under which placed.

ART. 8. The Government is authorized to establish a duty not to exceed 2 pesos upon packages sent by mail. Such duty shall be collected in proportion to the weight and within the limits determined in conventions concerning the matter.

ART. 9. Merchandise imported with passengers' baggage shall be dutiable according to class 16, even when such baggage weighs less than 150 kilograms.

PARAGRAPH. Every artisan or agriculturist coming to work in the country may, in addition to his luggage, import free of duty up to 100 kilograms of goods and also the tools deemed necessary for the purposes of his trade.

ART. 10. The Executive Power is authorized for the benefit of the Treasury, and if so deemed fit, to diminish or suppress the duties established in virtue of the present law upon goods imported through the custom-house at Tumaco.

ART. 11. On and after January 1, 1897, the value of the different kinds of stamped paper and Government stamps shall be fixed as follows:

First class	$0.30
Second class	1.00
Third class	2.00

PARAGRAPH. The Government shall adopt the necessary measures in order that no stamped paper or stamps can be used without a special countermark indicating the new value.

IV. *Ministerial decision dated February 6, 1897, rectifying an omission in the text of the law 160, of December 28, 1896.*

[Diario Oficial 10257, of February 9, 1897.]

In consequence of an omission in the text of the law 160, of December 28, 1896, published in the Diario Oficial 10233, of January 12, 1897,[a] the said law should be completed as follows:

The sole paragraph to article 4 shall read as follows:

"PARAGRAPH. The dispositions of the present law shall not modify the Ordinance of the Ministry of Finance, dated July 6, 1895, relative to the régime applicable under the tariff to the importation of articles destined to the electric enterprise mentioned in the said ordinance, such goods being moreover exempt from the surtax established in virtue of the present law."

V. *Circular of the Ministry of Finance 27829, of February 27, 1897, relative to the application of law 160, of December 28, 1896.*

[Diario Oficial 10273, of February 27, 1897.]

The increase and decrease of import duties, as provided in articles 1, 2, 3, and 4 of law 160 of 1896[a], shall commence to be applied on April 19, 1897, conformably to articles 205 of the Constitution and 61, 62, 64, and 65 of law 149 of 1888.

The increase referred to shall be computed on the duties established by law 36 of 1886 without taking into account the modifications thereto, and the amount so obtained shall be added to the duties as now leviable according to the said law 36 and subsequent modifications thereto, subject to complying with the stipulations of article 4 of said law 160. To such total must be added the surtax of 25 per cent established in virtue of article 1 of law 88 of 1886, and article 1 of law 185 of 1896.

---

[a] See the law 160, III.

VI. *Decree 140, of April 13, 1897, relative to import duties collectible at Tumaco.*

[Diario Oficial 10313, of April 15, 1897.]

In virtue of a decree dated April 13, 1897, issued in pursuance of article 10 of law 160 of 1896, the duties now in force shall be collected by the customs at Tumaco until the Executive Power shall decide to apply in said port the whole or any part of the duty established in virtue of the above-mentioned law 160.

VII. *Circular of the Ministry of Finance of May 3, 1897, relative to the application of the surtax of 25 per cent established by law 160 of 1896.*

[Diario Oficial 10340, of May 17, 1897.]

In addition to the import duties proper, returable to Treasury and set forth in the tariff, the customs shall collect on merchandise imported into the country a duty of 25 per cent, to be computed on customs liquidations; this surtax shall go to the Departments and shall, under the strict responsibility of the Customs Administrators, be remitted direct to the superior financial officers of the said Departments.

The above-mentioned duties were originally fixed in the said tariff, and upon these duties, without taking into account any modifications thereto under laws and decrees issued in virtue of authorities granted to the Government, it was decided to calculate the surtaxes established in articles 1, 3, and 4 of law 160 of 1896 according to the stipulations of article 3. However, inasmuch as the additional 25 per cent can not be calculated on the duties originally fixed, owing to the fact that law 88 of 1886 establishing same expressly states in article 1 that this 25 per cent must be computed on the liquidations, it necessarily follows that the surtax referred to must not apply to the duties in force at the time it was decreed, but to the duties chargeable at the time when the liquidations are effected, and at present such duties are those originally established by law 36 of 1886, increased or decreased in conformity with the different laws modifying the same.

VIII. *Decree 506 of May 1, 1901, relating to the payment of duties in the Cúcuta custom-house.*

[Diario Oficial 11488, of May 21, 1901.]

Article 1. From and after the day when the present decree shall have come to the knowledge of the administrator and treasurer of the Cúcuta custom-house, the import duties shall be collected at such custom-house on the basis of decree 507, of May 1, 1901, namely, 50 per cent in silver money of a standard of 0.835 and 50 per cent in paper money.

* * * * * * *

Art. 4. The decrees and other provisions emanating from civil and military chiefs of the department of Santander regarding the mode of levying import duties in the Cúcuta custom-house and also regarding the rate of such collection are hereby repealed.

IX. *Decree 507, of May 1, 1901, increasing the duties on foreign goods imported into the custom-houses of the Republic.*

[Diario Oficial 11488, of May 21, 1901.]

Article 1. From and after the day when this decree shall have come to the knowledge of the administrators of customs of the Republic there shall be levied on importation of articles liable to duty under existing laws and tariff a tax double the rate at present charged.

Art. 2. The ministry of finance will at once proceed to establish a new customs tariff whereby goods shall be imposed in accordance with this decree, subject to adopting such reforms as experience and advice from the principal commercial centers may have suggested, and also those necessary for insuring the development of native industries, and of a nature to facilitate for the trade and for the public offices charged with the collection of this tax the manner of keeping their books and effecting their liquidations.

Art. 3. As soon as the tariff referred to has been established and approved by decree, collection of import duties will be effected in conformity with such tariff from and after the date fixed by the approbatory decree.

X. *Decree 1016 of August 16, 1901, to levy a surcharge of 10 per cent upon every import duty account unpaid within eight days.*

[Diario Oficial 11544, of August 23, 1901.]

Sole Article. Every import duty account, the amount of which shall not be paid within eight days, being the term fixed by article 146 of the fiscal code, shall be subject to a surcharge of 10 per cent, to be levied as a war contribution, without prejudice to any interest due both on the principal sum and amount of such surtax.

B. REGULATIONS CONCERNING PAYMENT OF CUSTOMS DUTIES AND PORT DUES.

I. *Circular 346, of December 20, 1900, relating to the payment of customs duties.*

[Diario Oficial 11412, of February 5, 1901.]

A decree of the Executive requires payment down of 20 per cent of all import and export duties, to be applied toward expenses of customs offices and of posts connected therewith, the balance to be represented by bills at fifteen days' sight to the order of the General Treasury.

II. *Decree 370 of April 1, 1901, regulating the payment of port dues.*

[Diario Oficial 11468, of April 22, 1901.]

Article 1. From and after May 15, 1901, port dues leviable on vessels arriving in Colombia shall be paid down in gold of the country from which the ships cleared. Exception from this rule is made in favor of light-house dues when the light-houses are not exclusively State property, and the proceeds of their receipts are not to accrue to the Treasury. In such cases, these dues shall continue to be charged in the manner determined by decree 62, of January 18, 1901 (Diario Oficial 11403) and the port dues will be collected in same manner, provided that under contracts entered into with the lessees or according to some special law, such dues are to be paid in currency of the country.

Art. 2. Port dues the subject of the exception contained in the foregoing article, may be collected in gold whenever the lessees of the light-houses have, in their contracts with the Government, undertaken to pay over to the Treasury 50 per cent of the net proceeds of the revenue arising from their business, and to abandon to the State the ownership of the light-houses, on expiration of their privilege, or after a period agreed upon, or in case holders of other privileges enabling them to levy dues, such as quay dues, etc., have likewise agreed to be bound by the same terms and conditions advantageous to the State as are secured by the light-house concession.

EXPORT DUTIES.

I. *Decree 63, of January 18, 1901, modifying article 1 of the export duty law 777, dated June 11, 1900.*

[Diario Oficial 11403, of January 22, 1901.]

Article 1. From and after March 1 next the following goods, when exported from the Republic abroad, shall be liable to the undermentioned duties:

Art. 2.

Coffee, husked (pilado)	quintal	$3.00
Coffee, parchment	do	2.50
Caoutchouc	do	5.00
Hides, neat cattle	do	3.00
Goat and like skins	do	4.00
Vegetable ivory	do	1.00
Dividivi	do	.50
Tobacco:		
Leaf	do	2.00
Plug	do	3.00
Manufactured	do	5.00
Cotton:		
Raw	do	2.00
Ginned	do	3.00
Seed	do	1.00
Bananas	bunch	$0.20
Dried birds	kilog	10.00
Heron plumes	do	50.00
Orchids	do	10.00
Tortoise shell	quintal	5.00
Balsams	do	5.00
Vegetable oil of canime	do	3.50
Fustet wood	do	3.50
Brazil wood or dyewood	do	.50
Cedar (galiavo), mahogany, and all other building wood, 1,000 square feet		5.00
Cocoanuts	thousand	5.00
Neat cattle	head	20.00

Gold, platinum, and silver in stamped bars will pay 2 per cent upon the value thereof as per certificate issued after fusion and assay, this payment to be effected in paper money at the rate of exchange current on the day of export.

Gold dust, platinum, and silver which have not been assayed, as well as gold and platinum in the form of jewelry, or coined into money, or in any other form whatsoever, will be liable to payment in paper money as aforesaid of 2½ per cent of their insurance value.

In the absence of assay certificates or insurance policies, said articles will pay as below, viz:

Gold	gram	$0.20
Platinum	do	.15
Silver	do	.10
Ores	ton	20.00

Unenumerated articles declared for export shall be appraised by examining officers at the exporting custom-house under the control of the administrator and subject to payment in paper money of 2 per cent of the value assessed thereon.

Art. 3. On any exportation through ports of the Republic, the persons concerned shall be required to make their declaration before the corresponding customs officials in such form and within such time as are generally adopted in the case of imports, besides complying with the regulations laid down by the export duty decree 789 of July 2, 1900.

Art. 4. The export duties established under this decree shall be levied as long as public order remains in a troubled condition, and on the disturbances ceasing, same shall, unless otherwise determined by Congress, continue to be charged, for the purpose of being exclusively applied to the redemption of the paper money until extinction of the latter.

Art. 5. * * *

II. *Decree 205 of February 15, 1901, amending decree 63 of the same year, in reference to export duties on certain goods.*

[Diario Oficial 11414, of February 24, 1901.]

Sole article. The export duty on orchids applicable in ports of the Republic is reduced to 1 *peso* per kilogram.

III. *Decree 368 of April 1, 1901, relative to the exportation of neat cattle.*

[Diario Oficial 11471, of April 25, 1901.]

Article 1. The under-quoted decree relating to the exportation of neat cattle, issued January 26, 1901, by the Civil and Military Chief of the Department of Bolivar, is approved:

"Article 1. Exportation of neat cattle is prohibited.

"Article 2. Any person placing at the disposal of the Intendant-General by way of loan without interest such a sum as shall be agreed upon with the Civil and Military Chief or the Secretary of Finance shall be allowed to export neat cattle subject to paying a duty of 60 *pesos* per head of cattle.

"Article 3. The advance so made shall be paid off by levying the duty aforesaid, and as soon as the sum has been refunded the person who lent the money shall cease to export any further cattle.

"Article 4. * * *"

Art. 2. As soon as this decree shall have come to the knowledge of the Civil and Military Chief of the Department of Bolivar and of the Customs Administrators, and until otherwise ordered by Congress, there shall be levied 20 *pesos* in gold for every head of neat cattle exported.

Art. 3. Exporters who have entered into contracts in pursuance of the hereinbefore approved decree of the Civil and Military Chief of the Department of Bolivar may continue exporting, but shall be required to pay the tax provided in the foregoing article 2. In that case, the sums lent to the Government shall be taken into account, and such advances, made in paper money, shall be converted into gold coin at the rate of exchange current on the day of export at the place where the custom-house is situate.

Art. 4. In case exporters who have made advances should not wish to continue operations under the system of the newly established tax, the amounts so advanced, together with legal interest in respect of the balance due, shall be immediately refunded to them.

Art. 5. If, pursuant to decree 63 of January 18 of this year, cattle have been exported subject to the tax of 20 *pesos* paper money per head, such lending exporters as have sent out cattle during the same period, viz, from March 1 of this year until the date upon which this decree enters into force, and from which the payment in gold hereinbefore provided is therefore to commence, and paid 60 *pesos* paper money according to their contract, shall only be liable to the duty at the rate of 20 *pesos* like other exporters, the difference of 40 *pesos* per head being deducted from the balance due to them by the Government. This balance shall be applied to payment of the duties chargeable on exports subsequently made by them, or it will be refunded to them as provided in the foregoing article.

IV. *Decree 495 of April 30, 1901, relating to the payment of export duties in gold.*

[Diario Oficial 11488, of May 21, 1901.]

Article 1. From and after the date upon which this decree shall come to the knowledge of the Customs Administrators of the Republic, the export duties imposed by various decrees (decrees 777, 63, and 421, respectively, dated June 11, 1900, January 18 and April 12, 1901), shall be payable in gold, according to the following table:

		Gold pesos.
Coffee, husked (pilado)	quintal	0.40
Coffee, parchment	do	.30
Caoutchouc	do	.60
Hides, neat cattle	do	.40
Goat and like skins	do	.50
Vegetable ivory	do	.15
Dividivi	do	.075
Tobacco:		
Leaf	do	.20
Plug	do	.30
Manufactured	do	.50
Cotton:		
Raw	do	.20
Ginned	do	.25
Cotton seed	quintal	0.10
Bananas	bunch	.01
Dried birds	kilog	1.00
Heron plumes	do	6.00
Orchids	do	.10
Tortoise shell	do	1.00
Balsams	quintal	.80
Fustet wood	do	.04
Brazil wood or dyewood	do	.06
Cedar (galiavo), mahogany, and all other building wood, 1,000 square feet		1.60
Cocoanuts	thousand	.50
Neat cattle	head	20.00

Gold, platinum, and silver in stamped bars will pay 3 per cent upon the value thereof as per certificate issued after fusion and assay.

Gold dust, platinum, and silver which have not been assayed, as well as gold and platinum in the form of jewelry, or coined into money, or manufactured into any other form whatsoever, will be liable to 3 per cent of their insurance value.

Gold and silver ore shall pay 2 per cent on the insurance value thereof.

In default of assay certificates or insurance policies, gold will pay per gram $0.03; platinum, $0.02; silver, $0.01, and crude ore, $4 per ton.

Unenumerated articles declared for export shall be appraised by examining officers at the exporting custom-house under the control of the Administrator and subject to payment in gold at 3 per cent of the value assessed thereon.

Art. 2. The Government will, through the Ministry of Finance, enact the measures to be adopted in order to facilitate and render efficient the collection of the export tax and so that the proceeds thereof accrue in full to the fund of Junta de Amortización, to be applied to the redemption of paper money, as provided in Decree 418, of April 12, 1901, all this to be in agreement with the instructions of the junta aforesaid.

Art. 3. The above-mentioned decrees are repealed or modified so as to be consistent with this present decree.

V. *Decree 454 of October 11, 1895, establishing the rules to be observed for the collection of export duties applicable to coffee.*

[Diario Oficial 9849, of October 21, 1895.]

Article 1. In addition to the prescriptions in force relative to exportation, the stipulations of the present decree must be complied with.

Art. 2. After the shipping permit, mentioned in articles 200 and 201 of the Fiscal Code, has been granted, the chief of every customs post must specially visit the vessel, in order to satisfy himself that there are no export articles on board. The employees mentioned in articles 57 and 58 of the Code may, when the Administrator deems it necessary, likewise be present at this inspection.

Art. 3. In addition to the general manifest of the vessel which the consignor is required to furnish conformably to article 202, every exporter of coffee must remit a special manifest of the produce he ships. In this document, which must be drawn up according to the form adopted for importations, shall be entered the minutes of verification and the receipt of customs duties.

Art. 4. All the export manifests in question must be presented in quadruplicate to the director of posts in the customs district of the place of shipment within the time fixed by the Customs when issuing the permit to load the vessel. Manifests relative to coffee must state whether the coffee is hulled or without pellicles or not. This official must immediately compare all the copies of every manifest and transmit, without delay, three to the Customs, and retain the fourth to be forwarded by first mail to the Minister of Finance. The Customs shall dispose of the copies received by them in the manner prescribed by the regulations in force for importations, and the examination of the packages shall be effected at once.

Art. 5. The verification shall be effected by opening and examining, amongst the packages not entered in the manifest as containing coffee without pellicles, those which the Customs deem proper, to prevent that coffee does not pass under the name of any other kind of goods, or that coffee without pellicles is not declared as coffee with pellicles, and by ascertaining the weight of all packages of coffee.

Art. 6. After examination of the cargo, the Customs shall enter in the three copies of the manifest remitted to them the amount of duties, collect such amount, and issue the permit of shipment at the foot of one of the copies, which shall be returned to the exporter on payment of the duties.

Should the cargo not be subject to duty, the shipment permit shall be issued immediately after the examination.

Art. 7. The permit in question shall not be issued when the exporter has not previously guaranteed to deposit, within the shortest possible delay, a copy of the bill of lading of the goods he intends to ship.

Art. 8. The following provisions are applicable to exportations: The provisions of section 3 of article 325 of the Fiscal Code, relative to contraventions, and of section 9 of the same article, relative to manifests, as well as the penalties prescribed by said dispositions, and the procedure to be followed on their application according to sections 3 and 4 of chapter 9, Title III, Book I, of the Fiscal Code.

Art. 9. Complaints relative to material facts shall be decided conformably to the stipulations of article 13 of law 36 of 1886, relative to importations. Contestations concerning errors in figures in liquidations, and other irregularities connected with administrative procedure, or any other case not provided for in the present decree, shall, in so far as no incompatibility exists, be decided according to the stipulations of article 143 and others of the Fiscal Code, relative to importations.

COSTA RICA.

MODIFICATION OF THE CUSTOMS TARIFF.

DECREE OF JULY 2, 1902.

ASCENCIÓN ESQUIVEL, Constitutional President of the Republic of Costa Rica, by virtue of the authority conferred upon him by article 1 of decree No. 46 of July 16, 1888, and paragraph 2 of article 2 of decree No. 7 of June 14, 1901, decrees:

ARTICLE 1. From the 10th of the present month, inclusive, the articles named below shall be appraised at the following rates:

		Colones.	U. S. gold.
Red wine, for table use, containing up to 10 per cent alchol:			
When imported in bottles	per kilogram	0.05	=$0.023
When imported in demijohns or barrels	do	.12	.056
White wine, not sparkling, and generous wines, dry or sweet, that contain up to 15 per cent alcohol:			
When imported in bottles	per kilogram	.15	.07
When imported in demijohns or barrels	do	.30	.14

	Colones.	U.S. gold.
White wines, except sparkling, or red wines, dry or sweet, when mixed with other aromatic vegetables, such as wines known as Vermouth, Blackberry, Bilberry, and other wines containing up to 15 per cent alcohol:		
When imported in bottles .... per kilogram..	0.20	$0.09
When imported in barrels or large bottles .... do....	.40	.19

NOTE.—For each per cent in excess of the alcoholic strength indicated as the maximum for wines covered by the foregoing sections, provided the proportion of alcohol does not exceed 20 per cent, there shall be collected an additional duty of 0.008 of a *colon* ($0.0037) per kilogram, gross weight, on bottled wines, and 0.023 of a *colon* ($0.0107) on wines in other packing (demijohns and barrels).

Sparkling wines, such as champagne and Moselle (regardless of their alcoholic strength) .... per kilogram..	1.50	.70

NOTE.—Cider is included in this section.

Liquors, brandies, rum, gin, whisky, and other spirituous beverages that contain up to 60 per cent alcohol:		
When imported in bottles .... per kilogram..	1.20	.56
When imported in demijohns or barrels .... do....	2.40	1.12

NOTE.—For each per cent of increase in the alcoholic strength of the beverages covered by this section there shall be collected an additional duty as follows: On liquors in bottles, 0.02 of a *colon* ($0.009), and on liquors in barrels or demijohns, 0.05 of a *colon* ($0.023) per kilogram, gross weight.

DECREE OF JULY 5, 1902.

The Constitutional Congress of the Republic of Costa Rica, in exercise of the powers given it by section 4, article 94, of the constitution, decrees:

ARTICLE 1. From the publication of this law, the articles mentioned below shall be classified in accordance to the rates specified therein:

A. Furniture of ordinary wood, not inlaid with sheets of fine wood, plainly finished, and without carved or turned pieces, nor backs or other pieces curved or bent by steam, without looking-glasses, although it may have cane-bottom seats, 0.25 of a *colon* ($0.116) per kilogram.

B. Common wooden furniture, inlaid, and blocks of fine wood, even when one or both have carved or turned pieces and cane seats, with or without looking-glasses, provided they are not covered, 0.45 of a *colon* ($0.209) per kilogram.

C. Wooden furniture covered with skins or cloth not containing silk, even when it has only a band, adornment, or braid of silk, provided that the total covering properly speaking does not contain silk, 0.60 of a *colon* ($0.279) per kilogram.

D. Wooden furniture, when covered with silk, or with cloth that contains silk, 0.75 of a *colon* ($0.348) per kilogram.

E. Furniture of all kinds and materials when inlaid with wood, shells, ivory, mother-of-pearl, or metal, 1 *colon* ($0.465) per kilogram.

F. Furniture of bent wood, known under the name of "Vienna furniture," and rattan or cane furniture, Chinese style, 0.51 of a *colon* ($0.237) per kilogram.

G. Brooms made of withe, reed, cane, or other vegetable fibers, 0.30 of a *colon* ($0.139) per kilogram.

H. Tallow for soap, 0.02 of a *colon* ($0.009) per kilogram.

Caustic soda, 0.02 of a *colon* ($0.009) per kilogram.

Rosin, 0.01 of a *colon* ($0.0046) per kilogram.

ART. 2. The inlaid furniture referred to in Section E, article 1, consists of the most delicate inlaid work, in which is comprised furniture with incrustations of celluloid, coral, tessellated onyx, wood, or paste, etc., and there is not included in said section furniture which has inlaid a plate, handles, or keys, nor that which has ordinary metal trimmings attached after the manner of moldings, rosettes, or carvings.

ART. 3. Looking-glasses that form part of a piece of furniture are those which can not be separated from it without rendering the furniture incomplete; consequently there shall not be considered as a part of the furniture looking-glasses such as are placed on a piece of furniture without being attached in some manner to the same, and which can be used separately.

ART. 4. The woods which, with respect to this law, are considered fine are mahogany, ebony, granadilla tree, jessamine, walnut, palisander or amaranth, rosewood, rodino, arbor vitæ, and striped wood.

ART. 5. The foregoing classifications shall not apply to articles that are in the custom-house on the day of the publication of this law, nor to those that are then in ships anchored or that arrive at the ports of the Republic on that day.

ART. 6. Section 66, class 7; section 37, class 4; section 72, class 8, and section 25, class 3, of the customs tariff, as well as executive decree No. 143, of January 18, 1895, are modified in accordance with the foregoing terms.

ART. 7. This law shall be in force from the date of its publication.

DECREE OF JULY 8, 1902.

ASCENCIÓN ESQUIVEL, Constitutional President of the Republic of Costa Rica, considering:

1. That the indefinite manner in which the present classification tariff describes the articles composing the commerce of importation has occasioned, and continues to occasion grave injuries to the national treasury;

2. That under various names merchandise is introduced containing alcohol, of which large quantities are imported;

3. That under the same classification of the customs tariff merchandise and alimentary substances that have been adulterated, thereby injuring the public interest and health, are imported, and

4. That the custom-houses lack the means and elements to prevent such frauds, decrees:

ARTICLE 1. There shall be established in the custom-houses of San José and Punt Arenas chemical-commercial laboratories for the examination, analysis, inspection, and determination of the merchandise imported into the country, especially of groceries and beverages, as well as drugs and preparations of all classes employed in medicine, pharmacy, and perfumes.

Art. 2. These laboratories shall examine and report upon the food substances submitted to them by the sanitary police; they shall also make such chemical-legal inspection as the authorities may desire, and any other works that the Government may order.

Art. 3. The administrators of the custom-houses shall retain, in accordance with instructions of the Treasury Department, a sample of each article subject to analysis, to be sent to the office of the laboratory. These shall be simply numbered, and a record of their forwarding shall be kept in a book for that purpose, in order to record the results and communicate them to the proprietor.

Art. 4. The chemical-commercial laboratories shall be in charge of a technical chief, and other employees as may be ordered by the Executive power.

Presidential Mansion, *San José, July 8, 1902.*

Decree of July 25, 1902.

Ascensión Esquivel, Constitutional President of the Republic of Costa Rica, in use of the faculties given me by Article I of decree No. 46, of July 16, 1888, and paragraph 2 of Article II of decree No. 7, of June 14, 1901, I do hereby decree:

Article 1. The merchandise herein enumerated shall be appraised as follows:

		Colon.
1. Essential oils or concentrated essences of absinthe, "alcaravea," bitter almonds, "angelica," aniseed, "mircia" (Bay St. Thomas), bergamot, cinnamon, cassia, cedar, cloves, "enebro," "eneldo," eucalyptus, rose geraniums, laurel, "laurel cerezo," "lavandula," lime, citronelle, lemon, melisse, mint, "mirbana," nitro-benzol, mustard, nutmeg, pine, rosemary, sandal, "santónico," turpentine, wintergreen, and others not specified	kilogram	7.00
2. The same essential oils, if of genuine rose, orange blossoms, neroli, cananga, and ilang-ilang	kilogram	10.00
3. Essential oils of bitter almonds (artificial)	do	.50
4. Essential oils of aniline (pure)	do	1.00
5. Ajonjolí oil	do	.25
6. Camphorated oil	do	.50
7. Cotton oil	do	.15
8. Sweet-almond oil	do	.30
9. Fetid animal oil	do	2.00
10. Hyocyama oil (cooked)	do	1.00
11. Belladonna oil	do	1.00
12. Cocoa-butter oil	do	1.00
13. Cade ó enebro oil	do	.35
14. Cocoanut oil	do	.02
15. Croton oil	do	1.00
16. Cod-liver oil	do	.10
17. Laurel oil	do	.50

		Colon.
18. Linseed oil	kilogram	.15
19. Machine oil (fine)	do	.20
20. Machine oil (ordinary)	do	.10
21. Nutmeg oil	do	.50
22. Olive oil (fine)	do	.20
23. Olive oil (ordinary)	do	.10
24. Palm oil	do	.02
25. Ox-foot oil	do	.50
26. Castor oil	do	.10
27. Cesamo oil	do	.25
28. Turpentine oil	do	.15
29. Oils not enumerated, except toilet oils	do	.50
30. Aloes	do	.30
31. Ascetic acid	do	.15
32. Camphoric acid	do	2.00
33. Arsenious acid or white arsenic	do	.15
34. Benzoic acid	do	1.00
35. Boric acid	do	.10
36. Bromhidric acid	do	2.00
37. Carbolic acid (raw)	do	.15
38. Carbolic acid (pure)	do	.50
39. Carbolic acid (liquidated)	do	1.00
40. Prussic acid	do	1.00
41. Citric acid	do	.15
42. Muriatic acid (technical)	do	0.15
43. Muriatic acid (pure)	do	.30
44. Crisofanic acid	do	2.00
45. Chromic acid	do	1.00
46. Fluorhydric acid	do	3.00
47. Formic acid	do	1.00
48. Phosphoric acid	do	1.00
49. Gallic acid	do	1.00
50. Lactic acid	do	1.00
51. Nitric acid (raw)	do	.15
52. Nitric acid (pure)	do	.30
53. Oleic or estearic acid	do	.15
54. Oxalic acid	do	.20
55. Pyrogalic acid	do	2.00
56. Picric acid	do	1.00
57. Salicilic acid	do	.50
58. Sulphuric acid (raw)	do	.10
59. Sulphuric acid (pure)	do	.20
60. Sulphurous acid	do	.20
61. Tannic acid	do	.50
62. Tartaric acid	do	.15
63. Timic acid (timol)	do	2.00
64. Valerianic acid	do	3.00
65. Iodic acid	do	5.00
66. Spirits of turpentine	do	.15
67. Bromide of camphor	do	1.00
68. Oxidized camphor	do	5.00
69. Refined camphor	do	.50
70. Cotton, ordinary or gray, glued or unglued	do	.05

		Colon.
71. Absorbent cotton (white)	kilogram	.10
72. Absorbent cotton (impregnated)	do	.15
73. Gun cotton	do	1.00
74. Starch in general	do	.25
75. Alum	do	.10
76. Ammonia (liquid and compressed)	do	.15
77. Ammonia rosin	do	.45
78. Acetate of ammonia	do	.50
79. Benzoate of ammonia	do	5.00
80. Bicarbonate of ammonia	do	.30
81. Bichromate of ammonia	do	.50
82. Bromide of ammonia	do	1.00
83. Carbonate of ammonia	do	.15
84. Clorhydrate of ammonia	do	.15
85. Phosphate of ammonia	do	.20
86. Glicero phosphate of ammonia	do	2.00
87. Molibdate of ammonia	do	1.00
88. Nitrate of ammonia	do	.20
89. Oxalate of ammonia	do	.20
90. Salicilate of ammonia	do	1.00
91. Sulphate of ammonia	do	.20
92. Sulpho-cyanide of ammonia	do	.50
93. Sulpho-ictiolate	do	5.00
94. Valerianate of ammonia	do	2.00
95. Iodide of ammonia	do	5.00
96. Antipyrine	do	3.00
97. Aniline	do	.25
98. Chloride of antimony	do	1.00
99. Antimony, metallic	do	1.00
100. Oxide of antimony (white)	do	1.00
101. Tartrate of antimony and potassium	do	1.00
102. Sulphide of antimony (orange color)	do	1.00
103. Sulphide of antimony (black)	do	.40
104. Sulphide of antimony (red or kermes)	do	1.00
105. Indigo	do	.25
106. Arrowroot	do	.10
107. Arsenic (white)	do	.15
108. Bromide of arsenic	do	2.00
109. Arsenic, metallic	do	2.00
110. Iodide of arsenic	do	5.00
111. Borax or borate of sodium	do	.20
112. Oxide of lead (red)	do	.15
113. Sugar candy	do	.25
114. Lactine or sugar of milk	do	.25
115. Acetate of lead or sugar of lead	do	.25
116. Glucose	do	.25
117. Caramel or burnt sugar	do	.25
118. Sugar manufactured with centrifugal apparatuses	do	.25
119. Refined sugar	do	.30
120. Sugar of all other kinds (raw or refined)	do	.30
121. Saccharine	do	2.00
122. Sulphur (leche de azufre)	do	.15
123. Sulphur in bars or in powder as flowers of sulphur	do	.15

		Colon.
124. Iodide of sulphur	kilogram	5.00
125. Blue: English ashes	do	.50
126. Blue: Metilene	do	1.00
127. Blue: Paris	do	.20
128. Blue: Prussia, or cyanide of iron	do	.15
129. Blue: Transmarine	do	.10

ART. II. The foregoing appraisements are not subject to the increase of 50 per cent established by decree of April 27, 1901, approved by law No. 7, of June 14, 1901.

ART. III. The present law shall go into force on August 15 next, but it may be applicable from the day of its publication to all the articles leaving the custom-houses which are now appraised at a lower rate.

Given at the Presidential House, San José, July 25, 1902.

ASCENSIÓN ESQUIVEL.

CLETO GONZÁLEZ VÍQUEZ,

Secretary of the Treasury and Commerce.

DECREE OF JULY 28, 1902.

ASCENSIÓN ESQUIVEL, Constitutional President of the Republic of Costa Rica, in use of the faculties given me by Article I of decree No. 46, of July 16, 1888, and paragraph 2 of Article II of decree No. 7, of June 14, 1901, hereby decrees:

ARTICLE I. The merchandise herein enumerated shall be appraised as follows:

		Colon.
1. Balsam of Canada	kilogram	0.05
2. Balsam of "comendador ó católico"	do	4.00
3. Balsam of copaiba	do	.50
4. Balsam of fioraventi	do	.50
5. Balsam of Gurgún	do	.50
6. Balsam of Opodeloc	do	1.00
7. Balsam of Peru	do	1.00
8. Balsam of Tolu	do	1.00
9. Balsam of tranquilo	do	2.50
10. Balsam not specified	do	2.50
11. Bays or fruits of gin, laurel, myrtle, and others not specified	do	.20
12. Benzine	do	.10
13. Benzol	do	.10
14. Benzonapthol	do	1.00
15. Benzosol	do	10.00
16. Betol ó naftalol	do	5.00
17. Bitumen (of Judea or asphalt)	do	.10
18. Benzoate of bismuth	do	2.00
19. Carbonate of bismuth	do	1.00
20. Citrate of bismuth	do	2.00
21. Chloride of bismuth	do	2.00
22. Gallate of bismuth (dermatol)	do	1.00

		Colon.
23. Lactate of bismuth	kilogram	2.00
24. Bismuth, metallic	do	5.00
25. Oxalate of bismuth	do	2.00
26. Oxide of bismuth	do	2.00
27. Salicitate of bismuth	do	1.00
28. Subnitrate of bismuth	do	1.00
29. Tanate of bismuth	do	1.00
30. Tartrate of bismuth	do	2.00
31. Valerianate of bismuth	do	2.00
32. Iodide of bismuth	do	5.00
33. Salts of bismuth, not specified	do	2.00
34. Oxide of zinc or white of zinc	do	.15

Secretary of the Treasury and Commerce.

PROPOSED BRANCH RAILWAY TO SANTO DOMINGO AND CARTAGO.

On July 31, 1902, President ESQUIVEL promulgated an important decree authorizing the survey and preparatory work for the construction of a branch railway, or electric tramway, from a point on the line of the Pacific Railway to the towns of Alajuela and Heredia, terminating in the province of Santo Domingo. A survey will also be made for a branch road which will run from the station of the Pacific Railway at San José to Cartago. The construction of these branch roads by the State will take place, in the order mentioned, on the completion of the main line of the Pacific Railway.

COSTA RICA RAILWAY IN 1901.

The Department of Finance and Commerce of the Republic of Costa Rica has published the following report, dated San José, June 5, 1902:

"On the 7th of last May there was held in London a meeting of the shareholders of the Costa Rica Railway Company, in which the result of the exploitation of the Costa Rica Railway in 1901 was considered. In accordance with the statement of this office in its report of March 31, 1902, the net profits of the year amounted to £131,041 5s. 10d.; adding balance from the year 1900, £3,712 13s. 10., and interest collected on deposits and inversions £751 6s. 3d., makes a total of £135,505 5s. 11d., which it was agreed to distribute as follows:

	£	s.	d.
Payment of interest on preferred bonds	9,470	0	0
Amortization of preferred bonds	2,400	0	0
Payment of 6 per cent annual interest on first mortgage bonds	39,300	0	0
Payment of 6 per cent annual interest on second mortgage bonds	36,000	0	0
Payment of interest on amounts loaned	999	9	0
Preliminary expenses on the second issue of preferred bonds	3,213	19	2
Legal expenses in England	869	17	3
Two per cent dividend on £1,800,000 value of the ordinary shares	36,000	0	0
Balance passed to new account	7,252	0	6
	135,505	5	11

The general account of the net profits of the Costa Rica Railway Company during the ten and one-half years that its lines have been in operation is condensed in the following figures:

Dr.	£	s.	d.
Net profit, July 1, 1891, to June 30, 1892	35,611	6	6
July 1, 1892, to June 30, 1893	69,739	14	6
July 1, 1893, to June 30, 1894	51,065	6	2
July 1, 1894, to June 30, 1895	85,130	4	6
July 1, 1895, to December 31, 1895	17,506	2	7
in 1896	95,701	9	2
in 1897	136,994	8	7
in 1898	133,317	16	10
in 1899	116,435	18	10
in 1900	135,552	5	6
in 1901	131,041	5	10
Profit on isssue of £75,000 preferred bonds in 1897	3,000	0	0
Interest on deposits and inversions, 1899–1901	3,965	8	2
	1,015,071	7	2
Cr.			
6 per cent interest for 10½ years on £655,000 first-mortgage bonds	412,650	0	0
Interest to 1895, 4½ years, on £600,000 second-mortgage bonds	[a] 64,006	0	4
6 per cent interest for 6 years on £600,000 second-mortgage bonds	216,000	0	0
5 per cent interest on £200,000 preferred bonds from date of their issue	[b] 68,567	8	6
Amortization of preferred bonds	11,000	0	0
Expenses of changing rails in the Central Division	16,165	0	10
Repairs to road in 1894–95	3,778	7	4
Reduction of freight on bananas in 1896	390	16	6
Renewal of rolling stock 1897–98	4,540	0	0
Reconstruction of branch to Guapiles	2,800	0	0
Set apart for reserve fund	15,000	0	0
Legal expenses in England	6,708	5	0

---

[a] As interest on second-mortgage debentures is not accumulative, these bonds did not obtain the full payment of interest until on and after 1896, inclusive.

[b] The £200,000 of the first series of prior mortgage debentures were issued as follows: Up to December 31, 1895, £125,000; December 31, 1896, £22,830; December 31, 1897, £52,170.

Cr.	£.	s.	d.
Special appropriation in favor of Mr. Allen (1898)	2,000	0	0
Dividends on ordinary shares	180,000	0	0
Interest on amounts loaned	999	9	0
Preliminary expenses of second issue of preferred bonds (up to December 31, 1901)	3,213	19	2
Balance on hand carried to new account	7,252	0	6
	1,015,071	7	2

The account of the inversion of the capital of the Costa Rica Railway Company on December 31, 1901, is as follows:

	£	s.	d.
Purchase of the lines and the concession	3,050,000	0	0
Balance of completed contracts by the company	10,904	2	3
Expenses for additional equipment and improvements	128,339	19	4
Settlement of claim of Angel M. Velasquez	1,000	0	0
Appropriation for jetties	6,202	0	2
Expenses of new wharf at Limón	76,922	6	0
	3,273,368	7	9

ASSETS.

	£	s.	d.
Balance of account former capital	13,938	15	3
Material in Costa Rica and in transit	64,797	5	8
Bills payable	6,198	13	5
Renewal of rolling stock, suspense account	5,828	9	2
Inverson at cost	13,480	1	2
Sundry debtors:			
London	4,050	3	0
Costa Rica	10,977	1	5
Cash:			
In London, including insurance fund, etc	31,547	17	7
In Costa Rica	6,054	9	1
	156,872	15	9

LIABILITIES.

	£	s.	d.
Balance of account of net profits	7,252	0	6
Reesrve fund	15,000	0	0
Fire-insurance fund	9,648	3	3
Two per cent on ordinary shares, dividend of 1901, not yet paid	36,000	0	0
Interest payable on preferred bonds	3,150	0	0
Interest payable on first-mortgage bonds	19,650	0	0
Interest payable on second-mortgage bonds	18,000	0	0
Interest in suspense	1,162	0	0
Bills payable	1,017	12	2
Amounts of loans	25,000	0	0
Balance account repair of Guápiles line	1,021	7	4
Sundry creditors:			
London	8,473	18	6
Costa Rica	11,497	14	0
	156,872	15	6

The list of rolling stock on December 31 last includes:

Locomotives	27
Hand crane	1
First-class passenger coaches	17
Coach for the President	1
Second-class passenger coaches	17
Combination coaches	6
Box cars for freight	325
Cattle cars	25
Platform cars	63
Retention cars	10
Cars for workmen	12
Machine cars for setting posts	2
Water car	1

The superintendent of the railway believes that the profits of the exploitation during the present year will not be less than those obtained in 1901, and hopes that the increase of the amount of the freight on bananas will offset the decrease of freight on coffee, due to the short crop of that grain.

ART. 2. The term *aguardiente* is understood to be the spirituous product obtained from the distillation of the fermented juices of fruits, grains, or other saccharine substances.

For the purposes of classification, liquids more or less spirituous that contain more than 20 per cent alcohol shall be considered as *aguardientes.*

The custom-house shall determine the alcoholic strength, either by distillation or by means of Gay Lussac's alcoholometer, with the corresponding decrease or increase, according as the temperature rises or falls from 15° C.

To reduce to the given standard of 15° C. when the observation is made at a greater temperature, there shall be deducted three-tenths of an alcoholic degree for each thermometric degree in excess of 15°, or there shall be added three-tenths of an alcoholic degree for each thermometric degree less than 15° at the time of making the observation.

The *aguardientes* covered by this section must not contain medical substances, such as sirups, perfumes for toilet use, nor the essences of fruits.

All alcoholic beverages that, either by maceration or distillation of seeds, barks, fruits, or aromatic plants, or which by simply dissolving their essential oils, have the aroma of those vegetable products, and at the same time a very sweet taste due to the sirups used in their preparation, shall be classified as liquors.

ART. 3. The foregoing appraisements are not subject to 50 per cent of the increase established by decree of April 27, 1901, and approved by law No. 7 of June 14 of the same year.

PIER CONSTRUCTION AT PORT LIMON.

A contract for a new pier at Port Limon has been signed by the Government of Costa Rica and the Northern Railway Company, a firm in close connection with the United Fruit Company.

By the conditions of this contract the pier is to be completed within two years from the date of approval by Congress (July 4, 1902). When completed it is to become the property of the Government, and is to be at the service of the public under such regulations as the Government may prescribe. The company is obligated to keep it in good condition during the term of the concession, and it may collect for this purpose a wharfage tax from ships according to rates prescribed in the contract.

The pier is to be situated on the site, more or less, of the old wooden pier, the use of which was discontinued some two years ago, and is to be distant at the nearest point not less than 50 meters (54.5 yards) from the new iron pier of the Costa Rica Railway. It is to be on a foundation of wooden piles, covered with plates of copper composition. The flooring is to be of wood, with superstructure of iron and roof and sides of corrugated iron. The pier shall be at least 300 meters (327 yards) long, and 15 meters (16.3 yards) wide. A space is to be reserved for the use of the Government in storing goods.

The company is to have the exclusive right to lay rails on the pier to connect with its line running from Port Limon into the banana country, but sufficient space is to be left for foot passengers and carts. The Government reserves the right to build a line of rails to carry goods to and from the custom-house, whenever it is deemed necessary.

The company is to be allowed to introduce, free of duty, the necessary material for the construction and preservation of the pier, under supervision of the Minister of Finance.

The consignees of merchandise arriving in ships which unload at this pier, and shippers of merchandise also, shall not be obliged to pay any dues to the company for use of the pier, but may always, at their own cost and risk, load or unload merchandise into or from ships consigned to the company, and transport the same in any manner which does not interfere with the movement of the company's trains on the pier.

There shall be at least two berths for ships, of equal facilities, at one of which the company may place the necessary machinery for loading and discharging. The company shall have free access, night or day, to the pier for the purpose of loading or discharging fruit ships, subject to such regulations as the Government may establish.

At one of the berths preference shall be given to ships of the company, or those consigned to it or to the United Fruit Company, when they come to load fruit. But this preference shall not prevent other ships from using both berths when the ships mentioned are not in port.

The company agrees to discharge or load ships for third parties when this work is consigned to it, and to carry on its rails merchandise or products delivered to it to the custom-house or to any part of Port Limon reached by its lines. A tariff is prescribed for such service.

War vessels and revenue ships of the Government are to be exempt from wharfage dues.

The concessions granted by this contract, as well as the obligations incurred, are to be in force during the term of the contract with the Northern Railway Company, made in 1894—ninety-nine years—or until 1993.

The iron for the pier has already been ordered in the United States.

CUBA.

UNITED STATES PATENTS AND TRADE-MARKS.

The Department of State of the United States has received from the legation of Cuba, Washington, under date of July 5, 1902, the announcement of the following decision by the Department of Agriculture, Commerce, and Industry of Cuba, dated June 25, 1902, in respect to the registration of United States trade-marks and patents, viz:

"Patents and trade-marks of all descriptions, printed matter, titles, and labels, duly registered in the Patent Office of the United States, for whose protection in this island application shall hereafter be made, from this date, by filing the same, shall be registered in the department of which I have charge, if admissible, upon observing the procedure followed for the registration of those of other countries and upon the payment of $35 currency for patents and of $12.50 currency for trade-marks, prints, etc.—that is to say, the same fees as are paid by the other foreign and national marks and patents in lieu of the 1 *peso* currency,[a] indicated with regard to the American in the circular No. 21, of June 1, 1899, issued by the Division of Customs and Insular Affairs of the War Department, of Washington."

HAITI.

TRADE WITH GREAT BRITAIN.

A large and important trade in cotton and linen goods and hardware is carried on between the Republic of Haiti and Great Britain, according to a report recently made by His Majesty's consul-general at Port-au-Prince. As, however, there is no direct communication between the two countries, all exports for England from Haiti are forwarded in transit via New York, from which point three lines of steamers connect with Haitian ports.

---

[a] The present value of the *peso* is about 60 cents.

According to the "Exposé Général de la Situation," published by the Haitian Government, for the year 1900, the value of imports (gold) and the countries of origin are given as follows:

United States	$3,401,257
France	437,057
England	422,983
Germany	192,843
Other countries	260,984

The exports consist chiefly of coffee, cocoa, and logwood. These find their best market in Germany and France, particularly in the latter country, owing to the commercial treaty concluded between France and Haiti in July, 1900. The value of exports for the year 1900 is stated as $3,197,549 gold.

HONDURAS.

NEW TRADE-MARK LAW.

The National Congress, taking into consideration the necessity of a law regarding trade-marks, decrees the following:

LAW OF TRADE-MARKS.

ARTICLE 1. Any sign which determines for commerce the specialty of an industrial product is considered a trade-mark.

ART. 2. The form, color, or designations which of themselves do not constitute a determining sign of the specialty of the product are not considered as trade-marks. In no case will an immoral sign be allowed.

ART. 3. Any proprietor of a trade-mark, be he a native or a foreigner residing in the country, can acquire the exclusive right to use the same in the Republic, subjecting himself to the formalities of the present law. Natives and foreigners who reside outside of the country can register their trade-marks if they have in the country an agency or industrial or mercantile establishment for the sale of their products; this applies in regard to foreigners where treaties do not otherwise provide.

ART. 4. In order to acquire the exclusive right to a trade-mark, the interested party should present, either in person or by means of a representative, to the Secretary of Fomento a statement to the effect that he applies in accordance with his rights accompanied by the following documents:

(1) Power of attorney from his principal (if the interested party does not present himself in person).

(2) Two examples of the mark, or representation of same by means of a drawing or engraving.

(3) In case the mark appears in relief or intaglio, or it presents any other peculiarity, two models which show these details.

(4) The written contract in virtue of which an agency has been established. This applies to article 3. This document must be duly legalized.

Art. 5. In the aforesaid presentation there must be expressed the name of the fabric, the place where it is made, the domicile of the proprietor, and the branch of commerce or industry to which the mark is to be applied.

Art. 6. A trade-mark belonging to a foreigner not resident in Honduras can not be registered unless it has been legally registered in the country of its origin.

Art. 7. The first party who has made legal use of the mark is the only one who can legally obtain the same. In case of dispute between two parties claiming the same mark, it belongs to the first possessor; and if this can not be proved, to him who first solicits registry.

Art. 8. The exclusive use of a mark can not be had save by virtue of a declaration by the Secretary of Fomento that the interested party has reserved his rights after having complied with all legal requisites.

Art. 9. The declaration mentioned in the foregoing article will be made without previous examination, on the exclusive responsibility of the petitioner, and without affecting the rights of a third party. The Secretary of Fomento will publish the petition of the interested party, and, in case of opposition presented within ninety days following publication, will not register the mark until a judicial decision has been rendered as to who is entitled to registry.

Art. 10. Trade-marks are not transferable, except in connection with the establishment for which they serve, and such transfer is not subject to any special rules or formalities and is conducted according to the regulations of common law.

Art. 11. The duration of a trade-mark is indefinite, but it will be forfeited by failure of production for one year or more.

Art. 12. Facsimiles of trade-marks will be kept by the Secretary of Fomento, and anyone can obtain, at his own expense, a certified copy of same.

Art. 13. Any trade-marks not filling the foregoing conditions will, on request, be declared of no value.

Art. 14. The judge declaring void any trade-mark will send a copy of his decision to the Secretary of Fomento.

Art. 15. Trade-marks are false—

(1) When a copy of any legally registered trade-mark is used.

(2) When an imitation has some slight difference, but may be easily mistaken for the original.

Art. 16. Anyone will be considered guilty of the crime of counterfeiting, no matter where this may be committed, who has imitated a mark or made use of such imitation in application to articles of the same industrial or mercantile nature.

Art. 17. The crime of counterfeiting a trade-mark is subject to penalties, as prescribed by the penal code.

Art. 18. Drawings and industrial models are included in the provisions of this law.

Art. 19. The protection which the present law gives to trade-marks does not extend to articles covered by them, except those made and sold in this country.

Art. 20. The present law goes into effect from the date of its promulgation, and all petitions which at that time are pending will be decided in accordance therewith.

Given in Tegucigalpa this 7th day of March, 1902.

DECREE GOVERNING LAND CONCESSIONS.

DECREE NO. 50.

Article 1. The Executive Power will cause to be measured all national lands in the district of Tela, and all which may be included in paragraph 1 of article 30[a] of the law of agriculture, with the exception of those on which there may be ruins of ancient populations, into lots of 25.50 and 100 hectares[b] each, with their respective plans.

Art. 2. Each lot will have a number or name, and boundaries will be duly marked.

Art. 3. The usufruct of said lots can be acquired by Honduraneans, or by foreigners domiciled in, or who intend to be domiciled in the country, without any expense and without other formality than a simple written request made by the interested party to the collector or subcollector of the respective customs, or before such office as the Government may designate.

Art. 4. The acquisition of which this treats will give personal title, and, with the exception of one's heirs, can be transferred only when one-fourth of same is under cultivation.

Art. 5. If any person asks for more than one lot, he must make petition to the Minister of Fomento, who, taking into consideration the resources of the interested party, can concede or deny. The Executive Power, on conceding more than one lot, can not give title to a larger number of lots than would cover 500 hectares (1,235 acres). These lots will be registered in the same way as the others.

---

[a] Paragraph 1, article 30, law of agriculture: "All lands belonging to the nation which are within 8 kilometers (4.9 miles) from the sea or from Carataska or Brewers Lagoon, and all islands."

[b] 1 hectare=2.471 acres.

Art. 6. These lots are destined by preference to agricultural purposes, and cultivation must be begun inside of two years from date of concession.

Art. 7. The lessee of each lot will pay an annual rent of 25 cents (10 cents in United States currency) for each hectare (2.471 acres), payment to be made in advance from January 1 to December 31; but if a concession is obtained after the first of a year, the tax will be in proportion to the time necessary to complete the year, which concludes December 31. Once cultivation has been established, the annual tax will be reduced to 10 cents (4 cents) for each hectare under cultivation. This tax can not be increased during the next twenty-five years.

Art. 8. The lessee, or his successor, will forfeit his rights if he does not begin cultivation of the lot or lots given inside of two years from date of concession; also if the tax mentioned in the foregoing article is not paid when due, but in this case, if a quarter part of the lot is under cultivation, he will only forfeit the uncultivated part, the Government having the right to collect taxes on the part under cultivation.

Art. 9. At any time in which it may be necessary to occupy one or more lots, or parts of same, for roads, railroads, wharves, landings, for navigation or canalization, bridges, or other works of public benefit or necessity, the lease will stop, and the lessee will be paid the value of the improvements on the portion needed, value of same to be fixed by arbitration.

Art. 10. The lessees of said lots will enjoy, from the moment they begin to cultivate the same, the privileges and exemptions established by the law of agriculture.

Art. 11. In the division of lots there are excepted the lands adjacent to the ports, towns, and districts which in the opinion of the Government may be necessary for the future increase of said places and for the establishment of wharves, landings, and places of deposit. The space which separates the lots remains destined to common use.

Art. 12. This law does not affect in any manner any prior contracts or concessions.

Art. 13. The executive power will issue regulations for the application of the present law.

Art. 14. The law will take effect from the date of promulgation.

Transitory dispositions.

People who without legal title may be in possession of lands included in zones referred to by article 1 should present themselves before the respective authority within six months from the date on which this law takes effect and obtain title, being subject in such case to all the obligations of the same. Persons who have a valid title to lands included in aforesaid zones are not subject to the obligations established by the present decree.

Given in Tegucigalpa the 22d day of February, 1902.

MEXICO.

FOREIGN COMMERCE, FIRST NINE MONTHS OF 1902.

The Bureau of Statistics of the Mexican Government has compiled some interesting data showing the imports and exports of the Republic during the first nine months of the fiscal year 1901–2. The imports during this period, compared with the same period of 1900–1901, were as follows:

	First nine months of fiscal year—		Gain (+) or loss (−).
	1901–2.	1900–1901.	
	Pesos.	*Pesos.*	*Pesos.*
Animal products	3,605,187.98	3,858,839.80	− 253,651.82
Arms and explosives	985,776.43	1,048,742.78	− 62,966.35
Chemical and pharmaceutical products	1,907,757.73	1,934,839.19	− 27,081.46
Machinery and apparatus	5,470,583.20	7,408,152.31	−1,937,569.11
Mineral products	12,774,042.92	12,471,785.14	+ 302,257.78
Paper and paper products	1,397,834.43	1,631,490.64	− 233,656.21
Spirits and beverages	1,938,553.39	2,067,142.13	− 128,588.74
Textile products	6,193,946.65	7,339,503.04	−1,145,556.39
Vegetable products	7,800,311.56	7,808,866.62	− 8,555.06
Vehicles	935,048.85	1,198,769.60	-- 263,720.75
Miscellaneous	1,369,207.91	1,269,720.28	+ 99,487.63
Total	44,378,251.05	48,037,851.53	--3,659,600.48

A comparison of the countries of origin gives the following result:

	First nine months of fiscal year—		Gain (+) or loss (−).
	1901–2.	1900–1901.	
	Pesos.	*Pesos.*	*Pesos.*
Africa	14,467.31	20,423.62	− 5,956.31
Asia	376,149.29	423,093.78	− 55,944.49
Central America	24,750.33	58,581.55	− 33,831.22
Europe	18,878,245.40	21,893,964.90	−3,015,719.50
North America	24,897,028.46	25,444,127.38	− 547,098.92
Oceania	35,092.73	53,891.50	- 18,798.77
South America	117,929.88	98,970.80	+ 18,959.08
West Indies	34,587.65	35,798.00	− 1,210.35
Total	44,378,251.05	48,037,851.53	−3,659,600.48

Mexico imported from Europe, during the period mentioned, goods valued as follows:

	First nine months of fiscal year—		Gain (+) or loss (−).
	1901-2.	1900-1901.	
	Pesos.	*Pesos.*	*Pesos.*
Austria-Hungary	256,093.24	309,457.59	− 53,364.35
Belgium	736,940.13	621,037.18	+ 115,902.95
France	4,474,944.30	5,067,284.64	− 592,340.34
Germany	4,592,972.08	5,508,979.89	− 916,007.81
Great Britain	5,899,231.92	7,215,377.66	−1,316,145.74
Holland	171,581.15	208,356.36	− 36,775.21
Italy	293,501.04	422,537.20	− 129,036.16
Norway	58,453.50	83,337.17	− 24,883.67
Portugal	28,875.95	44,336.40	− 15,460.45
Russia	2,896.83	1,192.00	+ 1,704.83
Spain	2,002,342.39	2,130,160.53	− 127,818.14
Sweden	39,011.77	21,490.81	+ 17,520.96
Switzerland	310,380.85	252,545.03	+ 57,835.82
Other European countries	11,020.25	7,872.44	+ 3,147.81
Total	18,878,245.40	21,893,964.90	−3,015,719.50

In the nine months referred to, the trade with Asia consisted of goods imported from China, Hindoostan, Japan, and other Asiatic countries to the value of 376,149.29 *pesos*, as compared with 432,093.78 *pesos* during the same period of 1900–1901. The principal trade was with Hindoostan, amounting during the time mentioned to 257,580.89 *pesos*, as compared with 285,478.06 *pesos*, the value of the trade of the months corresponding to the same months of the previous year.

The imports from North, Central, and South America during the period in question were as follows:

	First nine months of fiscal year—		Gain (+) or loss (−).
	1901–2.	1900–1901.	
NORTH AMERICA.	*Pesos.*	*Pesos.*	*Pesos.*
Canada	12,430.55	6,109.50	+ 6,321.05
United States	24,884,597.91	25,438,017.88	−553,419.97
CENTRAL AMERICA.			
British Honduras	11,215.18	442.00	− 10,773.18
Guatemala	11,472.15	50,013.55	+ 38,541.40
Other Central American countries	2,063.00	8,126.00	− 6,063.00
SOUTH AMERICA.			
Argentine Republic	2,127.00	179.00	+ 1,948.00
Brazil	15,010.92	4,033.00	+ 10,977.92
Chile	8,320.00	5,612.00	+ 2,708.00
Colombia	13,322.00	15,146.80	− 1,824.80
Ecuador	51,082.83	49,700.75	+ 1,382.08
Peru	6,993.38	2,210.00	+ 4,783.38
Venezuela	20,401.75	21,114.25	− 712.50
Other South American countries	672.00	975.00	− 303.00
Total	25,039,708.67	25,601,679.73	−561,971.06

The imports referred to in the foregoing tables were entered at the following ports:

	First nine months of fiscal year—		Gain (+) or loss (−).
	1901–2.	1900–1901.	
	Pesos.	*Pesos.*	*Pesos.*
Gulf	25,626,027.99	28,331,921.77	−2,705,893.78
Pacific	3,177,820.62	3,328,296.98	− 150,476.36
Northern frontier	15,483,145.43	16,212,084.03	− 728,938.60
Southern frontier	91,257.01	165,548.75	− 74,291.74
Total	44,378,251.05	48,037,851.53	−3,659,600.48

The exports from Mexico during the period referred to are shown in the following table:

	Pesos.
Mineral products	$68,168,546.16
Vegetable products	34,105,264.42
Animal products	8,402,554.65
Manufactured products	2,482,572.69
Sundry products	337,160.58
Total	113,496,098.50

The exports according to destination were as follows:

	First nine months of fiscal year—		Gain (+) or loss (−).
	1901–2.	1900–1901.	
	Pesos.	*Pesos.*	*Pesos.*
Asia	500.00	....	+ 500.00
Europe	17,991,718.57	21,273,479.23	−3,281,760.66
North America	91,591,076.03	88,315,770.19	+3,275,305.84
Central America	667,585.01	401,786.68	+265,798.33
South America	40,693.89	43,286.15	− 2,592.26
West Indies	3,204,525.00	4,102,055.00	− 897,530.00
Total	113,496,098.50	114,136,377.25	− 640,278.75

A further analysis of the figures shows that the exports to the different countries embraced in the six grand divisions already mentioned were as follows:

	First nine months of fiscal year—		Gain (+) or loss (−).
	1901–2.	1900–1901.	
ASIA.	*Pesos.*	*Pesos.*	*Pesos.*

Total	113,496,098.50	114,136,377.25	− 640,278.75

These exports were made through the following ports:

	First nine months of fiscal year—		Gain (+) or loss (−).
	1901–2.	1900–1901.	
	Pesos.	*Pesos.*	*Pesos.*
Gulf	76,114,369.49	67,947,542.86	+8,166,826.63
Pacific	6,980,103.56	9,764,906.89	−2,784,803.33
Northern frontier	29,263,530.16	35,184,479.00	−5,920,948.84
Southern frontier	1,138,095.29	1,239,448.50	− 101,352.21
Total	113,496,098.50	114,136,377.25	− 640,278.75

From these figures it is seen that decreased import valuations were most marked in machinery and apparatus, cotton goods, paper and paper goods, and spirituous and fermented liquors. Such decrease is not caused, however, by a decline in consumption of the articles indicated nor by a decreased demand for them, but is the result of Mexico's supplying the demand by home manufactures. The manufacture of cotton goods has been fostered in every way by the Mexican Government, and the production has increased so rapidly that Mexico is prepared to export and is looking for markets in Central and South America to take the surplus. In the manufacture of paper great advances have been made and at present any class and quantity can be produced in the Republic. The home production does not, however, quite supply the demand. The manufacture of spirituous liquors and the production of beer have developed immensely during the last few years, and Mexico now has sufficient breweries to supply the home consumption with an article equal to that imported and at much lower cost. The alcohol used is produced from Mexican plants, and the annual tax on alcohol distilleries is $500,000.

LEGALIZATION OF FOREIGN SHARES AND BONDS.

United States Consul W. W. CANADA transmitted to the Department of State of the United States from Veracruz, June 5, 1902, an abstract of a recent law amending the requirements for legalizing in the Republic bonds and shares of stock issued in foreign countries, as follows:

"Bonds and shares of stock issued in a foreign country by societies, companies, or corporations established in this Republic must be issued according to the following rules to be legal:

"I. The charter or articles of corporation authorizing their issue must be according to the laws of the country where issued.

"II. The issue of such bonds or shares must be made in accordance with the laws of the country where issued.

"III. The Mexican Ambassador or Minister, or, where there is none, the Mexican Consul, must certify that the requirements mentioned in the foregoing articles have been complied with.

"IV. The charter or articles of corporation authorizing the issue of the bonds or shares of stock must be recorded in the records of a notary public in the Republic of Mexico, and a certified copy of said record must then be inscribed in the public register of commerce, as directed by Article XIV of section 21 of the Code of Commerce.

"V. Should the shares, bonds, or stock be guaranteed by mortgage, said mortgage must be placed on record according to the laws of the State, federal district, or territory in which the property is located.

* * * * * * *

"SEC. 19. The duties and rights resulting from or growing out of the charter or articles of corporation shall be governed by the laws of the place where executed, provided said laws do not conflict with the laws of Mexico on the subject, although the charter or articles of corporation may be in operation wholly or in part in the Republic of Mexico; unless it is expressly stated in the charter or articles of corporation that they shall be governed by the laws of Mexico. Shares, bonds, or stock guaranteed by real estate located in the Republic of Mexico shall be governed wholly by Mexican laws, so far as the guaranty of the mortgage is concerned.

"SEC. 20. The Mexican tribunals shall in all cases have jurisdiction to decide any question, dispute, or contest arising in regard to the rights or duties of such charters, agreements, contracts, articles of corporation, etc."

PROGRESS OF THE TEHUANTEPEC RAILROAD.

The "Scientific American" for July 26, 1902, contains an account of the conditions governing the reorganization of the railroad across the Tehuantepec Isthmus of Mexico and the possible effect of the completion and operation of the line on the projected isthmian canal. It is stated that the road will be in thorough working order by May, 1903, and will be equipped for the handling of traffic expeditiously and at low tariff. For the cost of this improvement the Mexican Government contributes free of interest $5,000,000 (Mexican), and for the additional rolling stock, working equipment, and haulage facilities the Mexican Government and the contracting company provide equal amounts, to be furnished as required. The port works on the Atlantic and Pacific coasts are to be sufficiently completed by May, 1903, to enable transportation to be effected with celerity and facility, but the works will not be finished until 1905.

The length of the Tehuantepec Railroad is 192 miles, and the whole of the roadbed is being overhauled, leveled where necessary, and reembanked at sections to afford security, so that when completed the track will be as even and smooth running as any line in existence. It is a single-line track and is being relaid throughout with heavier steel rails. The bridges formerly used are being demolished and modern steel structures built in their stead. Owing to the possibility of seismic disturbances, the bridges are being built principally with steel girders. This is considered more economical than the erection of arch bridges, since in the event of an earthquake a steel bridge will give somewhat, and if seriously disturbed the damage can be quickly repaired, whereas in the case of an arch it will crack and have to be rebuilt. The spans for the most part are about 85 feet, but in one or two cases they rise to 100-feet span, and in one instance to 110 feet. The girders are supported upon steel caissons sunk into the bed of the river and filled with concrete, thus securing a solid and rigid foundation. The bridges are of sufficient strength to carry a load of 20 tons per axle.

The most important part of the undertaking is, however, in connection with the dock facilities and harbor accommodations at the terminal points of the line—Salina Cruz on the Pacific coast and Coatzacoalcos on the Atlantic. The Coatzacoalcos harbor works are of the most solid description to insure safe anchorage to vessels, and as the River Coatzacoalcos is conveniently adapted for extensive wharfage arrangements and is navigable for several miles from the sea, the only real engineering difficulty encountered has been the sand bar extending across the estuary. The contractors, however, are constructing a heavy training wall, by means of which an open channel will always be maintained. Extensive dredging operations are being carried on whereby the depth of the water alongside the wharves will be made about 35 feet at low water.

At Salina Cruz, owing to the entire absence of natural conditions for protection, a complete harbor is being built. A breakwater about 3,300 feet long is being constructed by means of which a large harbor will be formed. Entering from this there will be a dock with over 4,000 feet of quay space. In the construction of the breakwater, rubble is thrown overboard and continued to water level, the superstructure consisting of concrete blocks each weighing 40 tons. The material for these blocks is being excavated from the quarries near by and consists of tough limestone and granite. The concrete blocks are made by electric mixers and laid in position by a traveling Titan crane. This latter appliance is the second of its size in operation and was especially designed for the construction of the breakwater at Vera Cruz, by the same company.

At the present time the engineers are making trials with three different types of locomotives to ascertain those most economical and best adapted for haulage purposes. The engines in competition have been furnished by two American and one English firm of builders, and the result is at present in favor of the English type.

The completion of this road will tremendously accelerate communication between Europe and the East, and arrangements are being prepared in England and the Orient to establish Tehauntepec as a great trade route. Negotiations are in progress for a regular Japanese steamship service from Salina Cruz, the Pacific terminal of the line, direct to Yokohama; another to Yokohama via other ports, and also a direct steamship line to San Francisco. On the Atlantic side, English steamship companies trading with the East have arranged for a regular steamship service direct from Liverpool to Coatzacoalcos immediately the dock accommodation is provided. This latter place is a thriving and prosperous town of about 2,400 inhabitants, whose progress will receive a new impetus from the completion of the line in question.

NEW CONTRACT RELATING TO THE TEHUANTEPEC RAILROAD.

The Mexican Government has made a new contract with Messrs. S. Pearson & Son, Limited, for the improvement and operation of the Tehuantepec Railway and terminal ports, an extract of which is as follows:

"The subject-matter of the contract of partnership comprises the Tehuantepec Railway, the telegraph line appertaining thereto, the shops, buildings, offices, rights of way, stock, stationary and floating plants, piers, stores, including those in the warehouses, with all the appurtenances and accessories of the railway, all of which is included and specified in this contract under the name of 'the railway;' also the ports of Coatzacoalcos and Salina Cruz, in their present condition, together with pier-entrance channels, inner ports, stationary and floating docks, quays, jetties, piers, maritime plants, buildings, warehouses, offices, railway tracks, the equipments of all the above things, their accessories, appurtenances, and annexes, all of which is included and specified in this contract under the name of 'Ports.'

"The corporate capital is five millions of dollars. Each partner will pay in to corporate fund, on the first day of July of the year 1901, the sum of $1,000. The balance, until the sum of $5,000,000 is completed, will be paid in when and as it becomes necessary.

"In consideration of the fact that the losses, if any, will be borne equally by the Government and the contractors, and that in the division of the profits between them a larger share will go to the Government than to the contractors, the Government agrees that the capital necessary for the operation and business of the railway company shall be furnished in equal shares by the Government and the contractors.

"The railway company will have its headquarters in the City of Mexico, but it may open agencies, either at home or abroad, wherever its interests are located.

"The period of the partnership is fifty-one years, which will begin from the first day of July, 1902.

"The contractors will be entitled to consider this contract as rescinded if there has been a loss of corporate capital amounting to four millions of dollars in Mexican currency or more.

"Moreover, if, as a consequence of any measure of the Government, the contract for the Coatzacoalcos and Salina Cruz port works shall not be carried through within the period of the time fixed in said contract, the contractors will be entitled either to have this contract rescinded or to have the Government pay to the railway company, during the period of suspension, the amount of the losses sustained by said company in the exploitation of the property, as well as the interest on debts contracted or bonds issued by the company with respect to which payments may be due.

"The Government will be entitled to demand that the present contract be rescinded in the following cases only:

"I. On account of the contractors not contributing their share of the corporate capital.

"II. On account of their having transferred the present contract, or many of its franchises, to another company or private individual without the approval of the Executive of the Union.

"III. On account of breach of trust, fraud against property, or other act involving a delinquency, according to the penal code in force, to the detriment of the nation's interests, and of which the superior management of the railway shall become guilty. In this event action for rescinding the contract shall be in order, even though no criminal prosecution be instituted.

"IV. On account of the railway company having lost in operation five millions of dollars, or, in other words, its corporate capital.

"V. On account of the superior management of the railway company having made a contract, of which the direct purpose is to limit or prevent general traffic over the railway, especially general transit traffic, provided that the company, when called upon by the Government to rescind or annul such contract, shall fail within a month to do so.

"The Government of the Republic will, through inspectors, whose number is not to exceed eight, exercise the right of vigilance over both the physical and technical condition of the railway and ports and their administration and bookkeeping.

"The railway company will fix the tariffs for local traffic, which shall not exceed the following rates unless authorized by the department of communications:

"PASSENGERS.

"For the transportation of passengers per kilometer or fraction thereof:

First class	four cents.
Second class	three cents.
Third class	two cents.

"MERCHANDISE.

"For the carriage of one ton, of one thousand kilograms, of merchandise per kilometer of distance:

First class	eight cents.
Second class	seven cents.
Third class	six cents.
Fourth class	five cents.
Fifth class	four cents.
Sixth class	three cents.

"Freight rates shall always be proportionate to the length of the haul, fractions being computed by units of ten kilograms when the freight is carried by a passenger train.

"STORAGE.

"For the first two days after the arrival of the merchandise the latter will not pay anything.

"For the next five days following upon the two days above mentioned the rate charged will be one cent per day per one hundred kilograms or fraction of one hundred kilograms.

"For the second period of five days the charge will be at the rate of two cents per day per one hundred kilograms.

"For every additional day and for every one hundred kilograms or fraction of one hundred kilograms, three cents.

"Precious metals and valuables will pay double the foregoing rates for every two hundred dollars or fraction of two hundred dollars.

"The railway company may also make such charges as are necessary to cover expenses of receipt and delivery at the warehouses.

"TELEGRAMS.

"The charge for telegrams can not exceed the following:

"For each message containing not more than ten words, in addition to the date, address and signature, sent a distance of one hundred kilometers, fifteen cents. For each ten kilometers additional distance or each additional word contained in the message, over and above the first ten words, the charge will be proportional to fifteen cents per ten words sent one hundred kilometers.

"Local traffic, for the purposes of this article, is all traffic moved between any points on the Tehuantepec Railway, except passengers or freight carried between Coatzacoalcos and Salina Cruz to be placed on list of the last-named class will be considered as transit traffic.

"The freight rates on domestic merchandise will be differential on a decreasing scale by sections, and they will be drawn up by an agreement between the Government and the railway company, in view of the length of the haul and the origin, destination, and nature of the freight. The rebate will commence on hauls exceeding one hundred kilometers. The railway company may, if it chooses, extend the graduation to hauls of less than one hundred kilometers and to foreign freight, after approval of the rates by the department of communications and public works.

"The railway company is authorized, in its connections with maritime lines and other railways, to make arrangements for its transit traffic for a special direct tariff from the point of shipment to the point of final destination. The company receiving a certain percentage may be different in each case of connection.

"Cereals will always be considered as belonging to the sixth class. Rails and railroad construction material will, in addition, enjoy a rebate of thirty per cent on the tariff of said sixth class. The tariff for mineral coal will be one cent and a half per ton per kilometer, provided that it is carried in carload lots and is destined for consumption in the Mexican Republic.

"The company may import, free from all kinds of import or customhouse duties and from taxes, federal or local, for the construction, exploitation, maintenance, and repair of the railway, ports, and maritime services referred to, together with their appurtenances and accessories, as well as for the construction, exploitation, maintenance, and repair of the works and extensions that may be executed, the following articles:

"Fixed material for the track, rolling stock, vehicles, telegraph material, and miscellaneous articles."

NEW CONCESSIONS.

The Mexican Government has recently granted a number of important concessions, full details of which have been published from time to time in the "Diario Oficial." Among these are the following:

Smelting works.—To M. ELSASSER & Co. for the construction and exploitation of a smelter at the station of Wadley, San Luis Potosi, with the privilege of erecting smelters in other parts of the Republic, for the treating of ores containing antimony, arsenic, manganese, bismuth, lead, zinc, nickel, cobalt, iron, copper, and sulphur, and for the manufacture from these metals of chemical and industrial products of all kinds. The concessionaires agree to invest 200,000 *pesos* in the plant. The concession allows the free importation of construction materials, etc., to be used in the erection and equipment of the plant.

A similar concession for the erection of a smelting plant at Matehuala, State of San Luis Potosi, has been granted to Mr. JAMES A. KILTON, who agrees to invest 100,000 *pesos* in the construction of the plant.

J. E. FLORENCE and RUDOLPH SCHALK, of New York, have been authorized by the Mexican Government to construct and operate a smelter for the treatment of all kinds of ores in the district of Guaymas, State of Sonora.

Navigation companies.—A concession has been granted to the Yucatan Line Steamship Company for the establishment of a line of steamers to ply between Progreso, Yucatan, and New York, with the privilege of making stops at Vera Cruz, Tampico, and the southern ports of the United States, such as New Orleans, Mobile, and Galveston.

To the Mexican Navigation Company for the establishment of line of steamers to ply between Mexican Gulf ports, such as Vera Cruz, Tampico, Nautla, Tecolutla, Tuxpam, Progreso, Coatzacoalcos, Frontera, Laguna, and Campeche.

Railroads.—Concession granted to EUSEBIO ROJAS for the construction of a railroad in the State of Guanajuato as an extension of the railroad from Marfil to the mineral belt of San Gregoria, and terminating at San Miguel de Allende.

A similar concession has been granted to LEONARDO E. CARBAJAL for the construction of a railroad in the States of Oaxaca and Vera Cruz; said railroad to run from the Hacienda del Refugio, in the district of Soyaltepec, State of Oaxaca, to the station of Brisbin on the Vera Cruz and Pacific Railway, with permission to extend the line to the Hacienda de la Estanzuela, Canton of Cosamaloapam, State of Vera Cruz.

GEORGE W. DEITZ has also been granted a concession for the construction of a railroad in the States of Vera Cruz, Puebla, and Hidalgo. This railroad will start from some desirable point on the right bank of the Tuxpam River, and will connect with the Mexican Central Railway at Pánuco.

BANKING OPERATIONS IN THE REPUBLIC.

The expansion of banking business in Mexico is demonstrated from the following statement covering operations from 1865 to April of 1902; the amounts given representing the value of transactions in the years named:

1865	$1,000,000	1899	$210,295,000
1878	5,000,000	1900	259,264,000
1885	30,000,000	1901, May 31	262,057,253
1893	93,000,000	1901, July 31	270,141,623
1898	116,198,000	1902, April	312,526,167

According to the "Mexican Herald," from which the preceding figures are taken, the use of checks was unknown in Mexico twenty years ago, while now they are in general use. The number of chartered banks, operating on concessions or charters from the Mexican Government, based on the general banking law, is 25, the authorized capital of which aggregates $83,300,000.

COPPER PRODUCTION, FIRST HALF OF 1902.

The production of copper in Mexico during the first half of the fiscal year 1901–2 (July to December) was 14,992 tons, valued at $4,611,809.73. Besides this quantity, 5,434 tons of copper, valued at $1,480,012.85, were exported during the period named, making an aggregate of 20,426 tons, worth $6,091,822.58. In the corresponding half of the previous fiscal year (1900–1901), 14,455 tons of copper, valued at $4,726,873.75, and 268 tons of copper ore, valued at $16,772, or a total tonnage of 14,713, with a total value of $4,743,645.75, represented the copper-mining industry of the Republic.

NEW STEAMSHIP LINE ON THE PACIFIC COAST.

The "Diario Oficial" has published the full text of an important steamship concession granted to A. E. STILWELL to operate a line of steamers on the Pacific coast, plying between any of the Mexican ports on the Gulf of California and on the Pacific Ocean, such as Guaymas, Topolobampo, La Paz, Mazatlan, San Blas, Manzanillo, Acapulco, Puerto Angel, Salina Cruz, Tonala, and other intermediate points. The concessionaire may also traffic between the United States, South America, Asia, and the Orient. The concession runs for ten years, with the privilege of extending it for an additional ten years.

GOVERNMENT DISBURSEMENTS FOR 1903.

The Mexican estimates of disbursements for the fiscal year 1903, commencing July, 1902, and ending June, 1903, as approved by Congress, provide for the expenditure of $65,429,880.64. This sum is $691,064.81 in excess of that estimated for by Secretary LIMANTOUR, and covers the following items:

Legislative power	$1,146,888.80
Executive power	304,159.51
Judicial power	425,250.65
Department of Foreign Relations	720,941.30
Department of Interior	5,122,734.00
Department of Justice	894,284.65
Department of Public Instruction	2,646,335.30
Department of Fomento, Colonization, and Industry	1,097,266.31
Department of Public Communications and Works	9,461,828.90
Department of Finance and Public Credit:	
Administrative services	7,103,512.35
Public debt	22,216,893.00
Department of War and Navy	14,299,785.87
Total	65,429,880.64

The estimates for the fiscal year 1901–2 were $62,275,101.83, the expenditure for 1903 thus being shown to be $3,154,778.81 in excess of the current year.

MISCELLANEOUS NOTES.

The Government of the State of Yucatan has definitely decided to undertake the work of drainage of the city of Merida and the paving of the streets in asphalt. The municipality and the street-car company will contribute a certain amount toward the execution of these works.

Mr. Emilio Segura has applied to the Department of Fomento for a concession to establish an iron foundry at Tepeyahualco, district of Libres, State of Puebla. The new foundry will be devoted to the manufacture of Bessemer steel and rails. The foundry has asked to enjoy the benefits of the law on new industries.

The value of the Mexican cattle exports to the United States and to Cuba during the year 1901 reached $5,101,277. During the first five months, from January to June, 104,602 head were exported. Mexico also exported to the United States during the year 1901 raw hides to the value of $5,635,210.37.

The copper exports during the first seven months of the year 1901–2 rose to $8,073,032.70, against $6,259,675.01 in 1900–1901. The exports of lead during the same period amounted to $3,078,406.30, against $3,080,379 in 1900–1901.

The "Diario Oficial" has published a concession authorizing the establishment of a new bank of issue in the State of Oaxaca with a capital of 500,000 pesos. The life of the concession is twenty-five years.

An English company is being formed for the construction of a railroad to connect Coatzacoalcos with the line from Campêche and Merida.

NICARAGUA.

REGISTRY OF LAND TITLES.

Under date of March 20, 1902, the following decree was promulgated regarding the registry of land titles in the Republic of Nicaragua:

"Now, whereas, in the interest of good fiscal administration and for the guaranty of private property, it is necessary to formulate rules which shall determine clearly the boundaries of every parcel of land, and for the purpose of avoiding the complications attendant upon transfers;

"And whereas, in the district of San Juan del Norte, and on account of the peculiar nature of land tenure there, there are no recognized and determinate boundaries—for, though there is a plan showing the tracts of land situate within the district, this plan does not indicate the landmarks which limit the claims of each landowner, and is therefore productive of confusion in the processes of transferring property; and because to obviate these difficulties it is necessary to have a general demarcation;

"Now, therefore, by virtue of the administrative powers in him vested by the Constitution [the President] doth decree:

"Article 1. All proprietors of town or country real estate situate in the district of San Juan del Norte, from the right bank of the River

Punta Gorda to the boundary line or frontier of the Republic of Costa Rica shall, within six months of the publication of this decree, present to the governor of the city (of San Juan del Norte) their titles in the original, and they shall declare before the said functionary the price at which they value the property aforesaid, that, firstly, the same may be recorded in a book provided for this purpose; and, secondly, that the same may be recorded upon the face of the title itself.

"Art. 2. The governor of San Juan del Norte shall keep the record of titles in a book which he shall sign, upon every page, before making any entry therein; and upon the first page he shall state how many leaves the book contains in all; and in this book he shall record as follows:

"(1) The date—day, month, and year—in which the entry is made.

"(2) The date upon which such title shall have been transferred, the names and surnames of him who makes the transfer, and the names and surnames of the transferee.

"(3) Whether or not such title be of Mosquito (Indian) origin, or whether a transfer to the owner by the (Nicaraguan) Government or its agents.

"(4) Whether it be in all points perfectly legal, and whether the various past owners have duly paid all taxes with regularity, and who those may be who still owe taxes to the public revenue, and what the amounts thereof may be.

"(5) Names of the various owners who have by bequest or gift or assignment transferred such title in the past.

"(6) Size of the parcel of land as stated upon the face of the title deed.

"(7) The street upon which the parcel of land is situate, and, if in the city (limits), whether it have buildings upon it or not.

"(8) If in the country, whether the parcel of land be under cultivation or not, and what sort of crop it bears.

"Art. 3. No deeds except such as are based upon Mosquito (Indian) titles or have been transferred to the owners by the (Nicaraguan) Government or its agents shall constitute a valid title; and the present holders of land under such deeds shall be, as aforesaid, considered not as owners, but as tenants, and shall pay such rental as the Government may establish or have already established.

"Art. 4. When the register of titles shall have been completed or when the time fixed by article 1 shall have elapsed, the governor shall cause the lots to be remeasured by an engineer whom the Government shall appoint. The engineer, in his work of remeasuring, shall begin at the eastern end of the city, taking for his starting point the first lot set down upon the plan of the city, and shall have before him the title of the piece of property whose boundaries he is trying to establish, as well as the titles to those adjoining the same; and he shall record the dimensions of the tract of land, as established by him, for later confrontation with the register kept in the Gobernacion (City Hall). The expense of such remeasurement shall be borne by the owner, his agents, or representatives.

"ART. 5. Every landowner, once the demarcation has been made by the surveyor (engineer), shall place landmarks of stone and mortar at each angle (of his parcel of land), and upon these the engineer shall mark in linear feet the length of the boundaries, north and south and east and west. Neglect in complying with this provision shall subject the owner to a fine of 15 pesos ($5.73) for every fifteen days' delay, which fine shall be appropriated to public works by the governor.

"ART. 6. Those who do not, within the time prescribed by this law, present their titles shall lose all right of ownership to the benefit of the State, excepting solely such as reside in foreign lands, to whom another additional six months are granted in which to present their titles for registry.

"ART. 7. In the same manner, owners of rural property within the district mentioned in article 1 of this law shall submit to the governor their property titles and also a map of their property; and the governor shall register the same, noting the number of "manzanas" of superficial area, what proportion of the land is under cultivation and what proportion is not, and stating whether the landmarks have been placed as provided by the agrarian law. Failure to present the documents called for in this article shall subject the owner to a fine of 20 pesos ($7.64) for every month's delay, and such moneys shall be applied to highways.

"ART. 8. Those who do not present titles of property during the space of time exacted by articles 1 and 6 of this law shall not be recognized as owners, and their property shall become that of the nation.

"ART. 9. The governor shall charge for the registry of each title 2½ pesos (95 cents), and shall indicate at the foot of each its date of registration.

"This law shall take effect from the date of publication."

PARAGUAY.

TARIFF MODIFICATIONS.

The following modifications of the customs tariff of Paraguay have been issued, under date of April, 1902, as first supplement to No. 123 (second edition) of the International Customs Journal:

I. Law of August 22, 1901, levying an import duty on unrefined sugar.

[Diario Oficial of August 25, 1901.]

ARTICLE 1. From and after the date of promulgation of the present law, unrefined sugar of every description shall be liable to an import duty of 70 per cent upon the value assessed thereon in the valuation tariff in force.

II. Law of August 31, 1901, exempting bicycles from import duty.

[Diario Oficial of September 4, 1901.]

ARTICLE 1. From and after the date of promulgation of the present law, bicycles generally and their accessories shall, during a period of one year, be exempt from all import duties.

III. Law of September 3, 1901, ordering payment of export duties in gold and amending article 22, paragraph a, of law dated November 18, 1899, as to charging an additional 5 per cent duty in gold.

[Diario Oficial of September 4, 1901.]

ARTICLE 1. From and after the date of promulgation of the present law, export duties shall be paid in gold or in bills payable in gold, found to be valid by the general administration of customs.

ART. 2. Out of the additional 5 per cent duty established by article 22, paragraph *a*, of law dated November 18, 1899, and intended to redeem the paper money circulation, 2½ shall be applied to the budget of general receipts of the State.

IV. Decree of January 21, 1902, continuing to exempt from duty carriages and carriage harness.

[Diario Oficial of January 25, 1902.]

ARTICLE 1. The effects of the law dated September 5, 1900, granting duty-free importation of carriages and carriage harness are prolonged for a period of one year.

FOREIGN COMMERCE FOR TWENTY YEARS.

The exports and imports of the Republic of Paraguay, according to data published by the Bureau of Statistics from 1882 to 1901, inclusive, are shown in the following table:

[Expressed in gold.]

	Imports.	Exports.		Imports.	Exports.
1882	$1,320,326	$1,650,679	1892	$2,486,855	$1,857,990
1883	953,077	1,770,458	1893	2,533,299	1,598,960
1884	1,448,000	1,572,000	1894	2,222,203	2,220,000
1885	1,524,000	1,493,000	1895	2,460,050	2,545,726
1886	1,621,000	1,571,000	1896	2,786,335	2,450,000
1887	2,443,880	2,154,000	1897	2,343,303	2,170,638
1888	3,289,757	2,588,608	1898	2,598,157	2,453,526
1889	3,198,167	2,183,381	1899	2,147,837	2,500,000
1890	2,721,443	2,900,729	1900	2,655,741	2,707,074
1891	1,802,000	3,166,000	1901	3,003,657	2,529,306

The principal exports in 1898, 1899, 1900, 1901, and the first five months of 1902, were as follows:

	1898.	1899.	1900.	1901.	1902.
Salted hides	$2,132,800	$1,131,804	$3,593,250	$3,696,116	$1,290,360
Dry hides	1,827,000	998,911	3,146,112	2,228,667	1,434,629
Beams of hardwood	96,334	91,016	95,000	90,036	28,373
Ironwood ties	74,140	205,872	216,992	354,144	102,095
Tobacco	1,528,032	967,038	2,126,614	1,425,012	447,051
Paraguay tea	4,119,456	2,013,996	12,309,993	7,099,744	4,618,992
Ground Paraguay tea	1,118,495	1,200,173	575,841	384,000	121,791

At the close of 1900 there were 2,743,665 head of horned cattle in the Republic, valued at $100,286,835.

FINANCIAL AND ECONOMIC CONDITIONS.

According to data published in the "Review of the River Plate" for July 7, 1902, the internal debt of the Republic of Paraguay, on May 31, 1902, amounted to $11,069,020, while the external debt stood at $4,775,077, the former consisting of bonds, paper money, and treasury bills, while the latter comprised the loans realized in England in 1871 and 1872 and is at gold valuation.

The general revenue of the Republic in 1901 amounted to $11,412,747 paper, equivalent to $1,342,676 gold. The foreign trade of the country for the year was represented by imports to the value of $3,003,657 gold, and exports valued at $2,529,306, gold valuation. The principal exports consisted of the following items: Salt hides, 3,696,116 kilograms, as compared with 3,953,250 for the preceding year; dry hides, 2,228,667 kilograms, as against 3,146,112 kilograms in 1900; hardwood logs, 90,036 kilograms; quebracho logs, 354,144 kilograms; tobacco, 1,425,012 kilograms; yerba maté, 7,099,744 kilograms, and ground yerba maté, 384,000 kilograms, all the last-named items, with the exception of quebracho logs, showing a decreased amount as compared with the preceding year.

According to the latest returns of the Statistical Department, there exist in the country 2,298 business houses, with a capital of $66,673,000, and 1,094 industrial establishments, capitalized at $135,448,066. The live stock at the close of 1900 numbered 2,743,665 head of cattle, valued at $100,286,835.

PERU.

MESSAGE OF PRESIDENT ROMAÑA.

Through the courtesy of the Department of State of the United States of America the International Bureau of the American Republics is enabled to publish the following extracts from the message transmitted on July 28, ultimo, by the President of the Republic of Peru to the Peruvian Congress.

No. 1.

PAN-AMERICAN CONGRESS.

Abounding in sentiments of justice, of our own dignity, and of the most cordial harmony with friendly nations, we took part in the Second International Conference of American States held in the City of Mexico in the month of October last, and in which were represented all the nations of North, Central, and South America.

In the aforesaid assembly were adopted 22 resolutions designed to establish bonds of fellowship between the various nations of this continent and to obtain for all new elements of peace and prosperity.

As regards arbitration, the most opposite ideas were expressed relative to the character with which it should be invested, and finally two simultaneous resolutions were accepted. One of them, sustained by the vote of the majority, consisted in the adoption of an ample and obligatory treaty of arbitration; the other one, upheld by the vote of the delegates, was the signing of a protocol of adhesion to the Convention of The Hague.

The Peruvian delegates, in accordance with the instructions of their Government, which were in harmony with our traditional policy, displaying the resources of their power of initiating and of their patriotism, warmly and nobly upheld the principle of obligatory arbitration uniformly with the delegates of other nations, until they succeeded in obtaining a favorable vote by the majority.

The Conference held at Mexico, forerunner of others of a similar nature, will bring about most beneficial and important results for the nations therein represented as soon as the principal resolutions become definitely sanctioned.

No. II.

ACRE CONCESSION.

In view of a vast concession made by Bolivia to a foreign syndicate in which is included territory which we consider our own, we have found it proper to formulate the necessary protests for safeguarding our rights. We have at the same time caused our protest to be made known to the Governments of the nations to whom the capitalists interested in the negotiations belong and also to the managers or representatives of the enterprise.

No. III.

TACNA-ARICA QUESTION.

My Government has constantly had in view the solution of our pending questions with Chile, especially with reference to the present situation and the future destiny of the provinces of Tacna and

Arica. The state of the negotiations which followed the disapproval of the Billinghurst-La Torre protocol has not permitted their further prosecution.

Peru, as appears in various documents, has proposed divers equitable and friendly solutions, including arbitration, all of which have been rejected by Chile. It was consequently incumbent upon that Government to point out the bases upon which an arrangement should be made, but so far none have been suggested. The best spirit will be found among us for discussing them, and the utmost willingness to assent to anything within the bounds of justice and the rule established by the Treaty of Ancon. Peru has not only refused, but will always refuse, to subscribe voluntarily to its own dismemberment. It is impossible and wrong to smother in that manner the aspirations of the entire nation, and especially of the Peruvians of the provinces mentioned, whose patriotism and abnegation are exceptionally marked. My Government, on the other hand, will not avoid taking the initiative anew in this matter if convinced of the possibility of arriving at a solution, equitable and satisfactory for both countries, without detriment to the dignity of either.

No. IV.

FINANCES.

The general revenues for 1901 were estimated at 13,853,200 *soles*, the amount of same actually collected being 14,988,180.98 *soles*, being an excess over and above the estimated amount of the revenues of 1,134.980.98 *soles*. The estimated amount of the general expenses, as show in the budget for 1901, was 14,248,195.43 *soles*, while the actual disbursements for that year only amounted to 13,450,419.81 *soles*, or an expenditure less than the estimated amount by 797,775.62 *soles*, to which add the excess of the revenues actually received, 1,134,980.98 *soles*, making a total of 1,932,756.60 *soles*. But as the unprovided for expenses, amounts chargeable to the treasury, and the deficit of the budget make a total amount of 5,403,173.93 *soles*, there results a difference during the year of 3,470,417.33 *soles*, to which difference has been applied the excess in the actual over the estimated revenues and the credit balances due the treasury, in all 3,747,497.31 *soles*, leaving a net balance of 276,979.98 *soles*, which exists in the treasuries, custom-houses, and other fiscal offices, as is shown in the general statement.

One of the most flattering indications of our economical condition has been the progressive and constant increase in our general revenues since the year 1896, an increase no less notable in the year 1901, whose receipts amounted to 14,988,180.98 *soles*, those of 1900 amounting to 12,989,828.14 *soles*, or an increase in 1901 of 1,998,352.84 *soles*.

Custom-house statistics show a result equally satisfactory in the general commerce of the Republic, according to the following figures:

	Soles.
Imports	27,582,239.31
Exports	42,983,788.74
Total	70,566,028.05
1900	68,151,501.78
Increase in 1901	2,414,526.27

Upon comparing one year with the other, it is seen that the importations have been greater by 4,410,732.92 *soles*, while the exports, due to the fall in the price of sugar, have diminished by 1,966,206.71 *soles*.

The exportations of minerals amounted to 17,508,484.55 *soles*, exceeding by 557,926.20 *soles* those of the preceding year, notwithstanding the decline in the price of copper.

The increase in the exportation of articles of national manufacture is likewise interesting. Calicoes, which in 1900 barely reached 10,000 *soles*, were exported in 1901 to the value of 146,951 *soles*.

Guano, which had ceased to figure in the items of exportation, produced the amount of 266,409 *soles*, and medical leaves the sum of 255,126 *soles*.

A decrease has been felt principally in sugar, borax, coffee, cotton seed, and gold.

Worthy of note has been the increase in the receipts of the Callao Custom-House, 2,268,345 *soles*, and from that of Mollendo, 961,416 *soles* over those of the preceding year.

On the other hand, there has been a notable decrease in the receipts from all the sugar-shipping ports.

* * * * * * *

The statement of the ordinary budget for 1903 is as follows:

	Soles.
Income	15,396,682.00
Expenditure	14,562,323.38
Surplus	834,358.62

And of the extraordinary budget—

	Soles.
Expenditures	1,235,146.77
Surplus of the ordinary budget	834,358.62
Deficit	400,787.15

The deficit above indicated will be more than met by the two bills which have been pending before Congress since last year; the first, reestablishing the stamp tax on tobacco, and the second, modifying the customs schedules at Iquitos.

It is to be borne in mind that the ordinary budget of expenditures amounts to 14,562,323.38 *soles*, while in the budget for 1902 it amounted only to 13,375,410.92 *soles*, being an increase in the ordinary expenditures of 1903 of 1,186,912.46 *soles*.

The difference is explained in part by the increase in the salaries of the Judiciary and the Army, pensions to the survivors of our national war, pensions to widows, and other recently granted benefactions.

No. V.

ST. LOUIS EXPOSITION.

There can not possibly be any necessity for me to show the great advantages which must accrue to Peru from its taking part in the approaching Exposition of St. Louis, but in order to do this you must provide the Government with funds to defray the heavy expense entailed in order to make a respectable showing.

VI.

PANAMA CANAL.

The early opening of the Panama Canal will disclose new prospects for the nation. With our rich coal mines and petroleum deposits at a short distance from the coast, and with bays like those of Paita, Chimbote, and Callao, we may most assuredly expect that the stream of commerce which that route must foster will naturally benefit to a large extent our seacoast trade, and that no country can reap from it greater benefits than Peru.

It would therefore seem prudent to prepare for such an excellent opportunity and to see that there should not be wanting at least some of the most necessary advantages which the foreign shipping coming to our shores has a right to expect. Amongst these I make free to suggest the idea of offering most liberal concessions for the construction of a dry dock of sufficient dimensions to admit vessels of the largest size in Callao or on the Island of San Lorenzo, and for that of a floating dock in the port of Paita.

MARKET FOR MACHINERY AND IMPLEMENTS.

The British foreign office has received from the British consul-general at Callao a report on the conditions governing the market for agricultural and mining machinery and implements in the Republic of Peru. The report states that, with the exception of plows, few agricultural implements are made in the country. Those used in inland provinces are usually made by native blacksmiths and are of the most primitive kind. The coast belt is planted with sugar cane, rice, cotton, maize, beans, etc., for the cultivation of which machinery and implements are imported. Sugar-grinding machinery and distilling apparatus are imported to some extent, but stills are also made in Lima and Callao.

Steam engines and boilers are imported from the United Kingdom, the United States, France, and Germany. Those of more than 25 horsepower are brought from England, but the smaller varieties are mostly supplied by the United States. Pumping machinery of various kinds is imported, principally from the United States, and most of the steam thrashing machines and corn-grinding mills are from the same country. Reapers, mowers, and plows, other than steam, are chiefly of United States makes, while cane-grinding machinery and distillery apparatus are mainly of British origin, though one French firm, one German, and a few United States firms transact some business in these lines. Lubricating oil for machinery is largely imported from the United States.

It is stated that the use of electricity for purposes of illumination is increasing rapidly in Peru. The town of Lima is lighted entirely by this means, and the same agency is employed in many of the private houses of the city. Three companies supply the town. Arequipa is also lighted to a considerable extent by electricity, and companies are being formed for equipping Callao, Trujillo, and Chiclayo. Most of the installation comes from the United States. British machinery of this class is practically unknown in the country, and German dynamos and motors have been tried, but are regarded as too complicated.

Telephonic lines exist in the Departments of Lima, Piura, La Libertad, Arequipa, and Ica, the total length of wire being probably over 3,000 miles. A number of applications for authority to make new installations have recently been made. Most of the telephonic appliances employed come from Sweden.

REORGANIZATION OF THE PERMANENT INDUSTRIAL EXPOSITION.

The President of the Republic, believing that in order for the permanent exposition established in Lima to fulfill in a proper manner the purposes for which it was created, and to enable it to be truly useful, it is absolutely necessary to give it greater scope and to classify its functions and duties, hereby decrees:

1. The Permanent Exposition shall be composed of four sections dedicated, respectively, to the following branches: First, machinery

and tools, including the exposition now in operation; second, an industrial museum; third, patents and trade-marks; and fourth, library and public gatherings.

2. The Museum shall include industrial products, and the raw material produced in the Republic, and a collection should be formed that will serve as a school of practical instruction to industrial companies, merchants, and travelers.

3. In the section devoted to patents the public may inspect the models and description of objects and processes patented by the Government, as well as all kinds of trade-marks that have been officially registered.

The Department of Public Works shall furnish the exposition with copies of the concessions now in force, and, in future, shall send to the exposition at the end of each month copies of the concessions issued during that month. The applicants shall furnish for this purpose the copies that may be necessary.

4. The library shall be of a character essentially industrial. It shall contain publications of practical processes for the manufacture of national products in their different applications, and shall be duly catalogued.

5. Annual meetings shall be held in the month of July for the purpose of considering matters relating to the development of the commerce and industries of Peru, at which meetings the exhibitors in the museum may take part. With the same object in view, public conferences shall be initiated and encouraged.

The by-laws of the institution shall indicate the composition of the juries, the premiums, and the conditions of each case.

6. The Permanent Exposition of Industries shall be governed by a board of directors composed of five members, including the director of the establishment, who shall be its secretary, and who is authorized to carry on official correspondence with the heads of departments and the prefects and consular agents of Peru regarding matters relating to the exposition.

7. The board of directors shall prepare new by-laws in accordance with the foregoing articles, and shall submit them to the Government for approval at the earliest possible moment.

EDUARDO L. DE ROMAÑA.

GOVERNMENT PALACE, LIMA, *April 5, 1902.*

SALVADOR.

BUDGET FOR FISCAL YEAR 1902-3.

[From Diario Oficial, June 7, 1902.]

RECEIPTS.

	Pesos.
Importation duties	1,960,000
Taxes	1,301,800
Exportation duties	524,320
Receipts from internal revenue:	
Tax on liquors	1,700,000
Sundry taxes and receipts	445,300
Total	5,931,420

DISBURSEMENTS.

National Assembly	33,380

Charities	317,600
Department of Foreign Relations	85,640
Department of Justice	375,507
Department of Finance	465,751
Department of Public Credit	2,100,000
Department of War and Marine	1,214,920
Total	6,937,748

COMPARISON.

Receipts	5,931,420
Disbursements	6,937,748
Deficit	1,006,328

UNITED STATES.

TRADE WITH LATIN AMERICA.

STATEMENT OF IMPORTS AND EXPORTS.

Following is the latest statement, from figures compiled by the Bureau of Statistics, United States Treasury Department, showing the value of the trade between the United States and Latin-American countries. The report is for the month of July, 1902, with a comparative statement for the corresponding month of the previous year; also for the seven months ending July, 1902, as compared with the preceding year. It should be explained that the figures from the various custom-houses, showing imports and exports for any one month, are not received at the Treasury Department until about the 20th of the following month, and some time is necessarily consumed in compilation and printing, so that returns for the month of July, for example, are not published until some time in September.

CONSULAR TRADE REPORTS.

The following reports are furnished the International Bureau of the American Republics by the various Latin-American consular officers at the ports mentioned:

The Consul-General of Mexico at New York City announces that the imports through the port of New York from the Republic of Mexico during the month of July, 1902, were made up of the following articles:

Alligator skins	bales	133	Heron plumes	boxes	33
Broom root	do	2,639	Hides	bales	2,047
Cedar	logs	912	Hides	loose	6,402
Chicle gum	bales	1,524	Honey	barrels	550
Cigars	boxes	54	Ixtle	bales	3,423
Coffee	sacks	5,446	Lead bullion	bars	21,039
Copper bullion	bars	453	Metals	boxes	22
Deerskins	bales	144	Ores	sacks	15,600
Dyewood	logs	3,000	Rubber, crude	bales	31
Fustic	do	10,754	Tecali marble	pieces	97
Goatskins	bales	885	Tobacco, leaf	bales	184
Hair	do	30	Sarsaparilla	do	209
Heniquen	do	5,100	Vanila	boxes	69

During the same month 14 ships, carrying 150,240 packages of merchandise consigned to Mexican ports, cleared from the port of New York, and 9 ships, bringing 80,780 packages from Mexico, entered that port.

The Mexican Vice-Consul at Mobile, Alabama, reports that during the month of July, 1902, 5 steamships and 2 sailing vessels, proceeding from the Mexican ports of Frontera, Progreso, and Veracruz, entered the port of Mobile, bringing cargoes of heniquen, hemp, and mahogany. During the same period 9 vessels sailed from Mobile, bound to the Mexican ports of Campeche, Coatzacoalcos, Laguna, Progreso, Tampico, and Veracruz, carrying cargoes of lumber, coal, brick, hay, iron chains, wooden sleepers, and general merchandise.

The Mexican Consul at Philadelphia advises that the merchandise exported from that port to Mexican ports during the month of July, 1902, consisted of the following articles:

Articles.	Weight.	Value.
	Kilos.	
Coal	10,703,000	$31,100.75
Powder	50,177	10,500.00
Total	10,753,177	41,600.75

The Mexican Consul at Pascagoula, Mississippi, states that the shipments of lumber from that port to Mexican ports during the month of July, 1902, was as follows:

Campeche	$1,330
Frontera	1,186
Progreso	3,293
Tampico	4,625
Veracruz	4,061
Total	14,495

The Mexican consul at New Orleans reports that during the month of July, 1902, five vessels entered the port of New Orleans proceeding from the Mexican ports of Chiltepec, Progreso, and Veracruz, bringing the following products:

Coffee	sacks	23
Heniquen	bales	8,201
Mahogany	logs	550
Rope	bales	4,984

During the same month five vessels cleared from the port of New Orleans destined to the Mexican ports of Progreso, Tampico, and Veracruz, carrying cargoes of lumber, cotton, tools, and machinery.

The Consul of Nicaragua at Mobile, Alabama, advises that the American Fruit and Transportation Company, of Chicago, Illinois, has established a line of steamers between Mobile and Bluefields, Nicaragua. A steamer with a cargo of merchandise is dispatched every twenty days from Mobile to Bluefields, and returns laden with bananas to be distributed from Mobile to the fruit markets of the United States. The exports from Mobile to Nicaragua during the months of May, June, and July, 1902, are shown in the following table:

Month.	Number of packages.	Value.
May	129	$1,906.15
June	16	2,874.00
July	1,255	6,449.91
Total	1,400	11,230.06

The Consul-General of Venezuela advises that the total shipments from the port of New York to the Republic of Venezuela during the month of July, 1902, consisted of 16,240 packages of merchandise, weighing 1,061,047 kilograms, valued at 594,199.30 *bolivares* ($114,680.46), as compared with 160,110 packages, weighing 3,179,831 kilograms, invoiced at 1,094,709.85 *bolivares* ($211,279), shipped from New York to Venezuelan ports in July, 1901.

The following table shows the movement of this merchandise during the month of July of the years referred to:

Ports.	Articles.	July, 1901.			July, 1902.		
		Number of packages.	Weight.	Value.	Number of packages.	Weight.	Value.
			Kilos.	*Bolivares.*		*Kilos.*	*Bolivares.*
La Guaira	Merchandise	28,287	1,746,843.25	492,040.40	10,377	673,724.84	321,416.65

FOREIGN COMMERCE IN JULY, 1902.

The following tables show the trade statistics of the United States for the month of July, 1902, as compared with those for the corresponding month of the previous year; also for the seven months ending July, 1901 and 1902, respectively, as prepared by the Government Bureau of Statistics:

	July—		Seven months ending July—	
	1901.	1902.	1901.	1902.
IMPORTS.				
Articles of food, and animals	$18,770,570	$18,831,167	$133,115,650	$114,612,806
Articles in a crude condition which enter into the various processes of domestic industry	22,388,766	24,781,660	174,353,666	200,132,535
Articles wholly or partially manufactured for use as materials in the manufactures and mechanic arts	7,795,714	8,499,430	47,000,101	52,172,515

Steam	2,720,809	2,605,558	14,955,993	14,094,967

During the seven months ending with July, 1902, the exportation of manufactures was nearly $10,000,000 greater than in the corresponding months of the preceding year, and the importation of manufacturers' materials was $30,000,000 greater than in the corresponding months of the preceding year. The exportation of manufactures during the seven months of the present year has averaged $35,108,000 per month, or at the rate of $421,000,000 per annum, while the importation of manufacturers' materials has averaged $36,000,000 per month, or at the rate of $432,000,000 per annum. Nearly all of the principal manufactured articles exported, except iron and steel, show an increase in quantity, and, in most cases, in value.

Among the articles which show a marked increase in exports are cotton goods, the exports of which amount to nearly $21,000,000 in the seven months ending with July, 1902, against a little less than $15,000,000 in the corresponding months of 1901. This increase is almost exclusively in cotton cloths, of which the exportations in the seven months ending with July, 1902, were $17,098,452, against $11,124,018 in the corresponding months of 1901, the number of yards exported being 334,865,962 in the seven months of the present year, against 207,377,567 in the corresponding months of last year. Copper, in which there was a marked decrease in the exportations of last year, owing to high prices, now shows a marked increase, the figures being $29,614,210 for the seven months ending with July, 1902, against $20,731,622 for the same months of 1901. The chief decrease in exports occurs in iron and steel, the total exports during the seven months of this year being $57,263,304, against $61,160,730 in the corresponding months of last year.

On the import side nearly all the principal classes of manufacturers' materials show an increase. Chemicals increased in import valuation from $32,591,372 in seven months of 1901 to $33,832,677 in the same months of 1902; imports of raw cotton increased from 32,976,486 pounds in seven months of 1901 to 61,488,963 pounds in seven months of 1902, the quantity having thus nearly doubled. Of fibers, the importations in the seven months ending with July, 1901, amounted in value to $15,380,786, and in the corresponding months of 1902, to $22,457,293. Of hides and skins, the figures of imports for the seven months of 1901 were $32,141,436, and for the corresponding months of 1902, $33,795,088.

India rubber shows a slight decrease in importations, the total having fallen from 34,899,446 pounds in seven months of 1901 to 30,308,134 pounds in the same months of 1902, though the figures of 1902 are considerably in excess of those for the corresponding months of 1901.

Silk shows a marked increase, the total value of unmanufactured silk imported having increased from $19,702,083 in seven months of 1901 to $22,186,841 in the corresponding months of 1902.

Tin shows an increase in imports of from 44,398,650 pounds in seven months of 1901 to 50,918,903 pounds in the corresponding months of 1902.

Importations of lumber and unmanufactured wood have increased from $8,658,870 in seven months of 1901 to $10,819,018 in the corresponding months of 1902.

Raw wool shows an increase in importations of from $8,199,625 in seven months of 1901 to $12,002,855 in the corresponding months of 1902.

DESTINATION OF MANUFACTURED EXPORTS.

The destination of the leading manufactured exports from the United States during the year 1901 is extensively treated by the Treasury Bureau of Statistics in a paper published in the Monthly Summary of Foreign Commerce for June, 1902. The figures given show that during the year 1901 52 per cent of the manufactures exported went to Europe, 23 per cent to North America, 6.6 per cent to South America, 8.2 per cent to Asia, 7 per cent to Oceania, and a little less than 3 per cent to Africa. The total value of manufactures exported to Europe was $215,000,000; to North America, other than the United States, $96,000,000; to South America, $27,000,000; to Asia, $33,700,000; to Oceania, $29,000,000; and to Africa, $10,500,000.

IRON AND STEEL.

Of the total exports of manufactures to Europe, amounting to $215,000,000, the largest item was iron and steel manufactures, to the value of $43,812,323; the next items in order of magnitude being copper manufactures, $41,454,074; oil, refined or manufactured, $40,735,548; leather and its manufactures, $21,211,083; agricultural implements, $10,494,530; chemicals, drugs, and dyes, $6,741,068; paraffin, $5,934,471; wood manufactures, $5,595,256; scientific instruments, $3,840,763; cars and carriages, $3,718,381; cotton manufactures, $2,737,898; india rubber manufactures, $2,187,455; paper and manufactures, $2,290,045; and musical instruments, $1,994,092.

To North America, the largest item in the exports of manufactures was iron and steel, $33,518,293; other important items being cotton manufactures, $6,628,035; cars and carriages, $3,577,765; leather and manufactures, $3,396,321; and wood manufactures, $3,279,527.

To South America, iron and steel exports were $8,754,860; oils, refined, $4,836,106; and cotton manufactures, $3,321,494. To Asia, oils, refined or manufactured, formed the largest item, $12,443,126; the next largest items being iron and steel manufactures, $8,992,967; cotton manufactures, $6,355,381; and tobacco manufactures, $1,000,857.

To Oceania, the principal manufactures exported were: Iron and steel manufactures, $8,871,602; oils, refined, $3,019,661; paper and manufactures, $2,279,601; and leather and manufactures, $2,118,101.

To Africa, iron and steel manufactures formed the largest item, $2,358,635; next in order being oils, refined, $1,606,957; spirits, distilled, $1,388,801; wood manufactures, $650,951; and cars and carriages, $543,674.

AGRICULTURAL IMPLEMENTS.

Of the agricultural implements exported, amounting to $16,313,434, the shipments to Europe were $10,494,530; to North America, $2,608,852; to South America, $1,726,973; and to Oceania, $1,010,101. Of the $20,272,418 worth of cotton manufactures exported, $6,628,935 went to North America; $6,355,381 to Asia; $6,321,494 to South America; $2,737,898 to Europe; and $847,784 to Oceania. Of the $117,319,320 worth of iron and steel manufactures exported, $43,812,328 went to Europe; $43,518,993 to North America; $8,992,967 to Asia; $8,871,602 to Oceania; $8,754,800 to South America, and $2,363,635 to Africa.

In conjunction with the tables showing the distribution of manufactures by countries and grand divisions, the Bureau has prepared a statement which shows for the first time the exportation of manufactures in each year from 1790 to the present time. In 1790 the total amounted to a little over $1,000,000, and formed 6 per cent of the total exports; in the decade from 1791 to 1800 exports of manufactures averaged about $2,000,000 per annum; in the decades ending with 1810 and 1820, respectively, they averaged about $3,000,000 per annum, and formed about 7 per cent of the total exports; in the decade 1821–1830 they averaged about $6,000,000, and never reached as much as $10,000,000 prior to 1840. By 1850 the exports of manufactures had reached $17,500,000, and in 1860 for the first time touched the $40,000,000 mark, but did not cross the $50,000,000 line until 1870, when they amounted to $68,279,674. In 1877 they for the first time crossed the $100,000,000 line, the total for that year being $122,577,652. In 1896 they crossed the $200,000,000 line, the total for that year being $228,571,173. In 1899 the total was $339,592,146, and since 1900 the exportation of manufactures constantly exceeded $400,000,000 per annum.

THE SHIPBUILDING INDUSTRY IN 1902.

The Bureau of Navigation reports that during the fiscal year ended June 30, 1902, 1,657 vessels of 473,981 gross tons were built in the United States and officially numbered, compared with 1,709 vessels of 489,616 tons for the previous fiscal year.

The decrease compared with last year is in sail vessels and canal boats, barges, etc. This year's new sail tonnage is 101,072 tons; last year's, 128,099 tons. This year's new canal boats, barges, etc., aggregate 57,502 tons; last year's, 88,331 tons. New steel steamers aggregate 275,479 tons, compared with 235,265 tons last year.

Included in the total new tonnage are 94 vessels, each of over 1,000 tons, aggregating 315,062 tons, or two-thirds of the output. Of this large construction, 41 steel steamers of 158,631 tons were built on the Great Lakes. The lakes have built for ocean trade two West Indian fruit steamers, *Watson* and *Buckman*, of 1,820 tons each; one cargo steamer, *Hugoma*, of 2,182 tons, and two large cargo steamers, *Minnetonka* and *Minnewaska*, of 5,270 tons each, cut in two to pass the Canadian canals. An accident in transit delayed the arrival of these two at salt water.

The output of completed steel steamers on the seaboard has been much below the indications of last July. The launching of nearly every large steamer has been delayed from three to eight months, and some are still on the ways which by this time were to have been in operation. The delays have been partly due to the steel strike last summer, to the great demand for structural steel in all directions, to low ocean freights, and to the lack of new shipbuilding orders, which has left builders and owners without motive for haste. Last July 255,000 tons of ocean steel steamers were under construction or under contract, while at present only about 160,000 tons are under construction, and no new large seaboard contracts are reported.

The year's new steamers on the seaboard, however, include the trans-Atlantic liner *Kroonland*, 12,760 tons, the largest vessel ever built in this country; the Pacific mail liner *Korea*, 11,276 tons, of 19 knots, the largest and fastest merchant steamer on the Pacific; *Shawmut* and *Tremont*, of 9,806 tons each, built for the opening trade with the Philippines, and *Alaskan*, 8,671 tons, for the New York-Hawaiian trade, the largest vessel ever launched into Pacific waters. The sister ships *Finland* and *Siberia*, to the trans-Atlantic and trans-Pacific mail liners named, have been launched and will be officially numbered and in operation in the early autumn. Two steamers, *Nevadan* and *Nebraskan*, of 4,408 tons each, have been added to, and two more, of 8,000 tons each, are building for, the steam fleet to Hawaii around Cape Horn. The remaining nine new ocean steamers, of 1,000 tons or more, are for local coasting trades.

A CENTURY'S INDUSTRIAL GROWTH.

Conditions in the United States at decennial intervals from 1800 to 1850 and annually from 1850 to 1902 are presented in a monograph just issued by the Treasury Bureau of Statistics, entitled, "Progress of the United States in its Material Industries." This monograph consists of a series of tables showing area, population, wealth, debt, money in circulation, banks and bank clearings and depositors, farms and farm values, manufactures and their value, revenues, expenditures, imports, exports, railways and their business, the shipping industry, and many other features of national development in the census years from 1800 to 1850 and annually from 1850 to 1902.

The figures presented, regarding more than 100 subjects, show an interesting and in many cases a phenomenal growth in the industries, finances, production, and transportation of the country. The area has grown from 827,844 square miles in 1800 to 3,025,600 square miles in 1902, exclusive of Alaska and the islands belonging to the United States. The population per square mile, which was 3.6 in 1810, was 26.1 in 1902, notwithstanding the great increase in area meantime.

The total wealth has grown from $7,000,000,000 in 1850 to an estimated $94,000,000,000 in 1900, and the per capita wealth from $307 in 1850 to $1,235 in 1900. In no feature has there been greater fluctuation perhaps than in the public debt and interest charge. In 1800 the public debt was $15 per capita; in 1840 it had fallen to 21 cents per capita; in 1852 it was $2.67 per capita; in 1861, before the beginning of the war, $2.74, and then mounted rapidly until it became $76.98 per capita in 1865, gradually falling again after the war to $38.27 in 1880, $14.22 in 1890, $12.64 in 1893, $13.60 in 1896, and $12.97 in 1902.

The money in circulation amounted to $13.85 per capita in 1860, touched $20.57 during the period of paper currency near the close of the war, but again fell below the $20 mark until 1881, when it reached $21.71 per capita. By 1892 it had reached $24.60 per capita; in 1896 it was $21.44; in 1900, $26.93; and in 1902, $28.40 per capita, the highest point that it has ever reached. Deposits in savings banks amounted to $1,138,576 in 1820, $2,973,304 in 1830, $43,431,130 in 1850, $149,277,504 in 1860, $549,874,358 in 1870, $819,106,973 in 1880, $1,524,844,506 in 1890, $1,810,597,023 in 1895, and $2,597,094,580 in 1901. Meantime the individual deposits in national banks has grown from $500,910,873 in 1865 to $3,111,690,196 in 1902.

The cause of these financial conditions above noted—the increase of currency, bank deposits, etc.—is found in other tables showing the development of farms, manufactures, and of the various industries. The number of farms increased from 1,449,073 in 1850 to 5,739,657 in 1900, the value of farms and farm property from $4,000,000,000 in 1850 to $20,000,000,000 in 1900, and the value of their product, which was not measured until 1870, grew from $1,958,000,000 in that year to $3,764,000,000 in 1900. The value of farm animals increased from $544,000,000 in 1850 to $2,981,000,000 in 1900. The value of the product of the manufacturing industries grew from $1,000,000,000 in

1850 to $13,000,000,000 in 1900, while the number of people employed therein grew from less than 1,000,000 in 1850 to 6,750,000 in 1900.

The following table shows the figures for a few of the more important columns of the monograph for the years 1890 and 1902:

	1890.	1902.
Public debt, less cash in Treasury	$890,784,370	$969,457,214
Money in circulation	$1,429,251,270	$2,246,529,412
Bank clearings	$58,845,279,505	$111,190,226,021
Deposits in savings banks	$1,524,844,506	$2,597,094,580
Deposits in national banks	$1,485,095,856	$2,191,690,196
Number of farms	4,564,641	5,739,657
Value farm products	$2,460,107,454	$3,764,177,706
Value farm animals	$2,418,766,028	$2,981,054,115
Coal produced ... tons	140,866,931	261,677,961
Steel produced ... do	4,277,071	13,473,595

Average number of employees	4,712,622	5,719,137
Wages paid	$2,283,216,529	$2,735,430,848
Value of products	$5,369,579,191	$13,039,279,566
Iron and steel industry:		
Wages paid	$95,736,192	$134,739,004
Value of products	$478,687,519	$835,759,034
Railways in operation ... miles	166,654	201,839
Freight carried 1 mile ... tons	520,439,082	584,695,935
Rate per ton per mile	$0.93	$0.75

COPPER PRODUCTION.

The stock of copper on hand in the United States on January 1, 1902, is estimated by the United States Geological Survey to have been at least 300,000,000 pounds, equivalent to six months' production.

The world's production of copper in 1901 was 511,803 long tons, as against 487,206 tons in 1900, 463,693 tons in 1899, and 429,379 tons in 1898.

The total production of domestic copper in the United States in 1901 was 268,782 long tons, as against 270,588 long tons in 1900.

The total value of the exports of copper from the United States in 1901 was $36,071,448, as compared with $58,875,439 in 1900, with $43,845,654 in 1899, and with $35,545,251 in 1898. Germany is by far the largest customer of United States copper, since the greater part of the metal shipped to the Netherlands is in transit for that country; on the other hand, some of the copper which goes to the United Kingdom is shipped thence to other countries. The details of these movements can not well be followed.

The estimated consumption of copper in the United States in 1901 was 382,761,014 pounds, as against 356,891,121 pounds in 1900.

INTERNAL-REVENUE RECEIPTS FOR JULY, 1902.

On August 25 the Internal-Revenue Office issued an interesting statement concerning the receipts of the office for the month of July, 1902, as compared with those for July, 1901. This comparison is of special importance because of the fact that July was the first month under the reduction of internal revenue provided in the war tax repeal act of last session.

The statement shows gross receipts from spirits for the month of July, 1902, amounting to $11,636,197, as against $10,234,432 for the same month a year ago. On the other hand, tobacco shows $3,428,887 this year, as against $3,475,673 a year ago. Fermented liquors are $6,066,418, as against $9,790,418. Oleomargarine shows $144,846, as against $406,002. Adulterated butter yielded $8,083, as against nothing last year, while miscellaneous receipts, including filled cheese, mixed flour, playing cards, etc., were $951,926, as against $5,437,369. There is thus an increase for 1902 of $1,401,764 on spirits, and of $8,083 on adulterated butter. Miscellaneous receipts show a decrease of $4,485,442, oleomargarine has fallen off $261,156, fermented liquors have declined $3,724,000, and tobacco has decreased $46,786.

This makes a total decrease in all lines of $7,107,537, aggregate receipts falling from $29,343,896 to $22,236,359. In spirits the principal growth of receipts occurred under the head of spirits distilled from materials other than apples, peaches, and grapes, the increase being $1,345,180 on that account alone. It should be remembered, too, that the miscellaneous receipts for July, 1902, include more than $800,000 from the legacy tax. Under the head of fermented liquors the principal decline occurred in the barrel tax, which shows a gross reduction of $3,732,963.

PARCELS-POST SERVICE WITH GREAT BRITAIN.

Beginning September 1, the post-office of Great Britain will accept parcels for transmission to the United States. The various attempts of the British Government to conclude a parcel-post arrangement with the United States having resulted in failure, the British postal department has arranged this independent service.

The Cunard and White Star lines will convey the parcels to the United States and the American Express Company will deliver them in that country. The charge will be 24 cents for each 3-pound package, and 72 cents for packages weighing from 7 to 11 pounds to principal points in the United States, with an additional charge of 24 cents for a British customs clearance fee. The United States customs fees will also be added. A similar parcels-post service is to be inaugurated from the United States to Great Britain.

The weight and size limitations of parcels accepted under this service will be the same as those now controlling the British inland parcels post, namely, a maximum weight of 11 pounds and a maximum length of 6 feet for length and girth combined.

IMMIGRATION STATISTICS FOR 1902.

The details of the immigration statistics for the fiscal year ending June 30, 1902, show that the arrivals in the United States for the year in question exceeded those of any year in the history of the country. It is also shown that Italy continues to lead all other countries in the number of emigrants. Nearly one-third of the whole number came from Italy, and Austria-Hungary ranks next. The details and comparison with the previous year are as follows:

	Arrivals.	Increase.
Austria-Hungary	171,989	58,599
German Empire	28,304	6,653
Italy, including Sicily and Sardinia	178,375	42,379
Norway	17,484	5,236
Russian Empire and Finland	107,347	22,090
Sweden	30,894	7,563
England	13,575	1,361
Ireland	29,138	....
Great Britain	46,036	1,913
Scotland	2,560	490
Wales	763	62

Of the total increase of 167,930 passengers over the previous fiscal year, Italy and Austria-Hungary furnish more than 100,000. The Russians and Fins are next in the increase. The total immigration from Asia was 22,271, an increase of 8,678. Japan furnished all of this increase. Africa and the remainder of the world contribute comparatively small numbers.

EXPORTS OF DOMESTIC PRODUCTS, JULY, 1902.

The monthly report by the Bureau of Statistics of exports of domestic products shows a decrease of $21,000,000 for the month of July, and of $109,500,000 since the 1st of January, as compared with the corresponding periods of the preceding year. Of the $109,500,000, breadstuffs contributed $74,000,000, cotton $15,000,000, provisions $10,500,000, cattle and hogs $8,000,000, and mineral oils $1,000,000. The following table gives the exports of domestic products:

	July, 1902.	Decrease.	Jan. 1 to July 31, 1902.	Decrease.
Breadstuffs	$12,503,349	$11,664,727	$89,340,350	$74,567,246
Cattle and hogs	1,782,585	1,233,271	13,580,831	8,106,419
Provisions	12,985,854	3,161,787	98,179,087	10,578,231
Cotton	4,729,454	4,517,464	129,166,777	15,071,515
Mineral oils	5,509,664	722,062	38,532,775	1,272,956
Total	38,510,906	21,299,311	368,799,820	109,596,367

The Bureau reports in detail on the quantity and value of agricultural exports for July and for the seven completed months since January 1, as follows:

		July, 1902.	June, 1902.	July, 1901.
Barley	bushels	133,368	1,061	52,023
Corn	do	486,184	535,399	6,953,718
Corn meal	barrels	23,710	23,767	67,256
Oats	bushels	473,121	1,092,402	3,160,832
Oatmeal	pounds	5,092,659	4,711,399	4,516,692
Rye	bushels	234,094	435,294	360,716
Wheat	do	8,461,453	7,286,897	18,388,414
Flour	barrels	1,272,089	1,248,857	1,550,940
Cotton	bales	124,095	176,270	235,237
Mineral oils	gallons	85,035,700	96,011,012	97,413,060

Quantities of wheat, corn, and cotton exported in July for a series of years:

	Wheat.	Corn.	Cotton.
July—	*Bushels.*	*Bushels.*	*Bales.*
1902	8,461,453	486,184	124,095
1901	18,388,414	6,953,718	235,237
1900	5,500,895	15,950,784	156,008
1899	9,103,643	17,484,892	181,183
1898	7,618,401	10,881,707	92,871
1897	3,987,492	12,405,466	62,775
1896	6,062,006	5,612,751	98,987
1895	4,271,483	3,909,514	58,270
1894	5,557,970	1,046,600	84,626
1893	12,444,729	5,910,930	143,427

Shipments since January 1:

	1902.	1901.	1900.
Barley ... bushels..	1,837,539	1,653,180	8,120,928
Corn ... do....	6,168,617	87,781,999	109,281,148
Corn meal ... barrels..	143,891	519,226	475,441
Oats ... bushels..	2,761,479	21,433,817	16,364,530
Oatmeal ... pounds..	30,945,991	43,812,857	37,203,182
Rye ... bushels..	1,753,035	1,780,242	1,427,399
Wheat ... do....	61,584,882	95,826,074	50,435,491
Flour ... barrels..	9,060,159	11,064,523	10,832,009
Cotton ... bales..	2,942,271	3,147,505	3,326,060
Mineral oils ... gallons..	604,702,012	591,039,897	536,564,417

Exports of breadstuffs and cotton and total exports in July in years previous to those reported above were:

	Breadstuffs.	Cotton.	Total agricultural exports.
1900	$18,669,175	$7,647,608	$50,354,598
1899	21,804,805	5,457,692	49,642,629
1898	16,737,158	2,828,669	37,183,721
1897	13,932,801	2,438,516	37,564,160
1896	12,719,689	3,601,343	36,985,511
1895	8,500,916	1,918,979	29,445,340

TOTAL EXPORTS.

	Seven months ending July—		
	1902.	1901.	1900.
Barley	$918,924	$731,921	$3,805,092
Corn	4,239,210	41,368,924	47,140,529
Corn meal	463,746	1,209,088	1,103,848
Oats	1,330,795	7,174,580	5,040,092

Rye	1,087,849	990,788	865,392
Wheat	46,301.552	70,318,506	35,596,453
Flour	34,070,287	41,035,408	39,219,090
Total	89,340,350	168,905,596	133,655,392

MINERAL PRODUCTION IN 1901.

The United States Geological Survey has issued its annual statistical summary of the mineral products of the United States for the calendar year 1901. It shows for the entire country a grand total of $1,092,224,380 as the value of minerals produced in 1901, against $1,064,408,321 in 1900. This comprises $566,351,096 worth of non-metallic mineral products, $524,873,284 for metallic products, and $1,000,000 (estimated) of mineral products unspecified, including building sand, glass sand, iron ore used as a flux in lead smelting, tin ore, nitrate of soda, carbonate of soda, sulphate of soda, and alum clays used by paper manufacturers. The following table shows the values of the various products enumerated:

Pig iron	$242,174,000	Marls	$30,000
Silver	77,126,382	Phosphate rock	5,316,403
Gold	80,218,800	Pyrite	1,024,449
Copper	86,629,266	Salt	6,617,449
Lead	23,280,200	Sulphur	223,430
Zinc	11,265,760	Barytes	157,844
Quicksilver	1,382,305	Cobalt oxide	24,048
Aluminum	2,238,000	Mineral paints	789,962
Antimony	542,020	Zinc, white	3,111,120
Nickel	3,551	Asbestos	13,498
Platinum	13,000	Asphaltum	655,335
Bituminous coal	236,201,899	Bauxite	79,914
Pennsylvania anthracite	112,504,020	Chromic iron ore	5,790
Natural gas	27,067,500	Clay (all other than brick)	2,591,332
Petroleum	66,417,335	Feldspar	220,422
Brick clay	13,800,000	Fibrous talcum	483,600
Cement	15,786,789	Flint	149,297
Stone	55,615,926	Fuller's earth	80,697
Corundum and emery	146,040	Graphite	167,714
Garnet (abrasive)	158,100	Limestone (for iron flux)	5,659,836
Grindstones	580,703	Magnesite	43,057
Infusorial earth and tripoli	52,950	Manganese ore	116,722
Millstones	57,179	Mica	118,578
Oilstones, etc	158,300	Mineral waters	7,586,962
Borax	1,012,118	Monazite	59,262
Bromine	154,572	Precious stones	289,050
Fluorspar	113,803	Rutile	5,710
Gypsum	1,577,493	Soapstone	424,888

In the following table the quantities of metals produced in the first and last years of the decade are given:

		1892.	1901.
Pig iron	gross tons	9,157,000	15,878,354
Iron ore		16,296,666	28,887,479
Silver	troy ounces	63,500,000	59,653,788
Gold	do	1,596,375	3,880,578
Copper	pounds	352,971,744	597,443,212
Lead	short tons	173,654	270,700
Zinc	do	87,260	140,822
Quicksilver	flasks	27,993	29,727
Aluminum	pounds	259,885	7,150,000
Antimony	short tons	1,790	2,649
Nickel	pounds	92,252	6,700
Tin	do	162,000	None.
Platinum	troy ounces	80	1,827

URUGUAY.

FOREIGN COMMERCE DURING THE FIRST QUARTER OF 1902.

The statistical department of the custom-house at Montevideo has just published the gross statement of the foreign commerce of the Republic during the first quarter of 1902, to which, for the sake of comparison, are added the figures for the same period in the preceding year, as follows:

EXPORTATION.

	1901.	1902.
Live stock	$157,829	$149,435
Slaughterhouse products	9,205,228	10,321,663
Rural products	45,419	702,254
Other products	149,796	140,935
Various articles	3,427	1,167
Provisions for ships	35,300	30.923
Total	9,656,999	11,346,377

IMPORTATION.

	1901.	1902.
Drinks in general	$595,402	$515,397
Eatables, cereals, and spices	1,348,619	1,262,055
Tobacco and cigars	79,907	43,951
Textile materials	1,150,308	1,194,645
Made clothing	319,331	289,927
Raw material and machinery	2,285,681	1,905,421
Various	612,445	587,826
Live stock	167,027	31.766
Total	6,558,720	5,830,988

The following table gives the totals of importation and exportation for the first quarter during the last five years:

	Imports.	Exports.	Total commerce.
First quarter:			
1898	$6,438,175	$11,361,506	$17,799,681
1899	5,994,577	12,710,155	18,704,732
1900	6,210,926	6,210,926	15,560,243
1901	6,558,720	9,656,999	16,215,719
1902	5,830,988	11,346,377	17,177,365

Comparing 1902 with 1901 there has been an increase of $1,589,378 in the exportation for the quarter, a decrease of $727,732 in the importation, and a net increase of $961,646 in the total commerce. The exportation, as was expected, shows a substantial improvement, but, as regards importation, the figures are the reverse of encouraging.

EXPORTS FROM MONTEVIDEO, FIRST HALF OF 1902.

According to the "Buenos Aires Handels-Zeitung," 567 steamships and 60 sailing vessels cleared from Montevideo during the months of January to June, 1902, carrying the following products to various countries:

To the United States: Oxhides, dry, 306,253; oxhides, salted, 54,115; hair, 335 bales; wool, 151 bales; sheepskins, 51 bales; dried meat, 4,278 bales; bones and bone ash, 3,717 tons; horns, 176,190 pieces.

To Italy: Oxhides, dry, 34,854; hair, 85 bales; wool, 1,170 bales; sheepskins, 307 bales; dried meat, 100 bales; tallow, 2,885 pipes and 149 casks; wheat, 14,314 sacks and 942 tons; bone and bone ash, 222 tons; horns, 125,606 pieces.

To France: Oxhides, dry, 8,827; oxhides, salted, 71,830; hair, 289 bales; wool, 14,354 bales; sheepskins, 4,073 bails; various hides, 8 bales; tallow, 504 pipes and 876 casks; birdseed, 309 sacks; linseed, 3,920 sacks: wheat, 4,197 sacks; bone and bone ash, 11,386 sacks and 80 tons; intestines, 1 bale and 20 casks; horns, 132,778 pieces.

To Portugal: Oxhides, dry, 40,023; hair, 7 bales; wool, 10 bales; sheepskins, 1 bale; dried meat, 770 bales; tallow, 717 pipes; conserved meat, 116 boxes.

To Spain: Oxhides, dry, 31,889; oxhides, salted, 1,100; wool, 5 bales; dried meat, 923 bales; tallow, 1,713 pipes and 1,417 casks; birdseed, 692 sacks; corn, 50 sacks; cattle, 314; sheep, 148; intestines, 55 bales.

To Belgium: Oxhides, dry, 18,655; oxhides, salted, 98,236; hair, 104 bales; wool, 12,860 bales; sheepskins, 28 bales; wheat, 4,000 sacks; barley, 1,583 sacks; bone and bone ash, 611 sacks; tongues, 408 casks and 2,802 boxes; intestines, 329 casks.

To Germany: Oxhides, dry, 33,640: oxhides, salted, 110,122; hair, 45 bales; wool, 20,383 bales; sheepskins, 48 bales; dried meat, 585 bales; bran, 23,415 sacks and 145 tons; linseed, 17 tons; wheat, 310 tons; intestines, 5 casks.

To England: Oxhides, dry, 839; oxhides, salted, 13,080; hair, 93 bales; wool, 5,542 bales; sheepskins, 62 bales; dried meat, 2,248 bales; tallow, 1,133 pipes and 5,312 casks; corn, 7,666 sacks; wheat, 212 tons and 17,598 sacks; barley, 70 tons; bone and bone ash, 2,412 tons; tongues, 3,362 boxes and 3,047 casks; horses, 2; oxen, 50; grease, 424 bales; hay, 22 bales; meat, broth, 10 boxes; conserved meat, 53 boxes.

To Brazil: Oxhides, salted, 1,000; wool, 347 bales; sheepskins, 4 bales; dried meat, 152,414 bales; tallow, 1,504 pipes and 3,828 casks; birdseed, 1,977 sacks; flour, 44,381 sacks; bran, 1,751 sacks; linseed, 50 sacks; corn, 9,910 sacks; wheat, 92,705 sacks and 364 tons; bone and bone ash, 11 sacks; tongues, 750 boxes; mules, 62; oxen, 1; cattle, 1; sheep, 2,817; hogs, 150; meat extract, 13 boxes; intestines, 51 bales; hay, 2,039 bales; conserved meat, 30 boxes.

To Cuba: Dried meat, 67,641 bales and 1,831 tons.

To the West Indies: Dried meat, 350 bales; birdseed, 50 sacks; bran, 50 sacks; horses, 3; mules, 25.

To Chile: Dried meat, 874 bales; tallow, 455 pipes and 240 casks; birdseed, 460 sacks; flour, 2,426 sacks; bran, 32 sacks; corn, 1,418 sacks; wheat, 240 sacks; grease, 125 casks, 450 boxes, 205 cuarterolas, and 200 barrels; meat extract, 4 boxes.

To the Malvinas islands: Flour, 90 sacks; corn 181 sacks.

To Holland: Wheat, 1,800 tons.

Orders: Wheat, 60 sacks; corn, 105 sacks; flour, 1,006 sacks; oxhides, dry, 1,477; oxhides, salted, 13,505; tallow, 40 pipes and 49 casks.

JERKED BEEF EXPORTS TO CUBA.

The exports of jerked beef from the river Plate establishments to Cuba have been officially reported as below:

	Metric tons.[a]
1901–2	8,974.5
1900–1901	9,804.6
1899–1900	6,222.3

Thus, for this season, there have been sent to Cuba and Porto Rico 19,777,182 pounds of meat product, making the voyage of over 7,000 miles chiefly by sailing vessels.

For the same period the slaughter of cattle for jerked beef is officially reported as follows:

	Number.
Montevideo saladeros	348,316
River saladeros	337,500
Uruguayan slaughter	685,816
Buenos Ayres saladeros	169,900
Argentine River saladeros	201,400
Argentine slaughter	371,300
Total	1,057,116

The slaughter for meat extracts—which are all exported to Europe—has been 238,600 head of choice cattle. This makes a total of 1,305,716 for the season, and exceeds that of any year since 1898. These cattle are largely of the mixed-blood class, and the average cost per head for 3 to 5 year olds has not exceeded $22 in United States gold.

FOREIGN COMMERCE IN 1901.

The Bureau of Statistics of the Republic of Uruguay has published a pamphlet entitled "Foreign Commerce and Movement of Navigation of the Republic of Uruguay," containing data for the year 1901, as compared with 1900. The information given in this publication shows that the imports in 1901 were less than those of 1900 by $286,274, and that the exports decreased during the same year, as compared with 1900, to the extent of $1,679,736, making a total decrease in 1901, as compared with 1900, of $1,966,010. The total foreign commerce in 1901 amounted to $51,423,058, as is shown in the following table:

---

[a] Of 2,204.6 pounds.

	Imports.	Exports.	Total.
England	$6,167,348	$2,270,094	$8,437,442
Germany	2,913,537	3,195,124	6,108,661
Italy	2,108,469	482,818	2,591,287
France	2,161,139	4,925,604	7,086,743
Spain	1,860,762	615,086	2,475,848
United States	2,077,750	1,938,128	4,015,878
Belgium	1,424,008	4,188,009	5,612,017
Cuba	99,615	463,475	563,090
Chile	87,684	288,547	376,231
Paraguay	152,562	....	152,562
Portugal	17,123	234,770	251,893
Holland	6,227	....	6,227
Canary Islands	....	56,335	56,335
Scotland	....	148,079	148,079
Falkland Islands	....	3,268	3,268
Austria-Hungary	....	75	75
Unknown ports	....	127,877	127,877
Argentina	3,074,753	4,339,587	7,414,340
Brazil	1,540,955	4,454,250	5,995,205
Total	23,691,932	27,731,126	51,423,058

From the foregoing table it will be seen that England occupies the first place, France the second, Germany the third, Brazil the fourth, Belgium the fifth, and the United States the sixth place in the Uruguayan commerce. The commerce with the Argentine Republic, which amounts to more than seven millions of dollars, consists principally of goods in transit, and does not, therefore, represent a true item of imports and exports intended for consumption or reciprocal exchange.

As to the importations, England occupies the first place, followed by Germany, France, Italy, and the United States, respectively. France occupies the first place as regards the commerce of exportation, and is followed by Brazil, Belgium, Germany, England, and the United States, respectively, in the order of their importance.

FINES FOR THE INFRACTION OF MARITIME SANITARY REGULATIONS.

The Executive has sanctioned the law recently passed by the Legislative Assembly fixing the penalties attached to infractions of the regulations which the Board of Health was authorized to issue by the law of October 31, 1895. The law touching said penalties is as follows:

"1. Captains of vessels who, on entering the port, fail to hoist the yellow flag at the foremast are to be fined $50.

"2. Captains of vessels who give false information when interrogated by the sanitary authorities will be fined from $50 to $500, according to the gravity of the case and the opinion of the sanitary inspector.

"3. Captains of vessels who, before receiving the health visit, fail to prevent communication with other ships will be fined from $50 to $400. If in quarantine the fine will be $800.

"4. Captains who disobey the orders of the health authorities will be fined $200.

"5. Captains who conceal cases of sickness of any description will incur a fine of $200 to $500, which will be increased to one of from $500 to $1,000 should they land a sick person without the permission of the health authorities, except in cases of fracture or wounds.

"6. Ocean steamers which do not have packet privileges and which carry more than sixty persons, including passengers and crew, and having no doctor on board, will be fined $200, through their agents.

"7. Ocean steamers which have packet privileges must comply with the sanitary regulations, infractions of which will be punished with a fine of from $50 to $300, according to the gravity of the offense.

"8. Owners of boats, etc., who, while the health visit is being made, approach nearer than 500 meters to the particular ship, will be fined $25, which will be increased to $50 if they make fast before the yellow flag is hauled down.

"9. The fines thus imposed will be by the Port Health Inspectors and will be recovered from the captain, the agent, or the owner of the ship who will be responsible for the payment, without prejudice to any action for repayment of the same against the parties legally responsible for the infringement.

"The fines will not be enforced for three months after the date of the present decree.

"All other laws dealing with fines of the above description are abrogated.

"April 21, 1902."

REALTY TRANSACTIONS IN 1901.

In 1901, according to data published by the Bureau of Statistics, there were 10,018 transfers of real estate, the value of which amounted to $17,517,149, as compared with 9,107 transfers, valued at $15,029,090, in 1900. The greatest activity occurred at Montevideo, where 4,002 transfers, valued at $8,355,009, were made in 1901, as compared with 3,962 transfers, valued at $7,828,621, made in 1900. There were 6,016 sales of rural property in 1901, valued at $9,162,140, as compared with 5,145 sales, valued at $7,200,469, in 1900. In 1901 the number of mortgages made rose to 3,071, valued at $6,599,894, as compared with 2,738 mortgages, amounting to $6,587,865 in 1900.

PUBLIC DEBT.

According to data compiled by the Bureau of Public Credit (*Oficina de Crédito Público*) of Montevideo, the debt of the Republic June 30, 1902, was $123,843,694.95, as is shown by the following table:

Amount of debt on August 26, 1897		$121,427,447.69
Issue of treasury certificates, and series 1 and 2 of the special loan made in accordance with the law of 1901		10,017,400.00
		131,444,847.69
Less payments made from August 26, 1897, to December 31, 1901	$6,641,560.12	
Less payments corresponding to first quarter of 1902	959,592.62	7,601,152.74
Amount of public debt June 30, 1902		123,843,694.95

MISCELLANEOUS NOTES.

On July 11, 1902, President Cuestas promulgated a decree authorizing the purchase of a steam launch to be used for the purpose of inspecting the port works at Montevideo. The vessel referred to will cost $32,000.

Executive decree of July 11, 1902, authorizes the Rural Association of Uruguay to inscribe in registers kept for that purpose the pure breeds of cattle, sheep, and horses (except race horses) composing the fine stock of the Republic.

VENEZUELA.

CONCESSION FOR A RAILWAY BETWEEN MARACAIBO AND PARIJA.

A summary of a concession recently granted for the construction of a railway line between Maracaibo and Parija reads as follows:

"The line is to be a single track, with distance between rails of 1.07 meters (42.13 inches) and a minimum radius of curves of 60 meters (196.8 feet). Work must be commenced within twelve months after the signing of the contract and the road completed and open for traffic within another twelve months. At the station of San Ignacio the road may divide, one branch going to the north, passing through the town of Rosario, and the other to the south, through Machiques. The general plan of the line and branches shall be presented to the Government for approval. The concessionnaire shall also establish a steamship line between Barranquita and Maracaibo. The grant is for ninety-nine years, counting from the date on which the road is open to service; at the expiration of that time the railway, with its rolling stock, warehouses, and offices, shall become national property. The Government also reserves the right to buy the road. Mails are to be carried free. Government troops and baggage, as also public employees on service, are to be transported for one-half of the tariff rate. This concession is not transferable without the previous consent of the National Executive. As a guaranty, the company shall deposit 50,000 bolivars ($9,650) in the bank of Maracaibo three months after the approval of the contract. This deposit can be withdrawn as soon as a section of 20 kilometers (12.4 miles) shall be completed; otherwise, if the works of construction and continuation are not performed within the specified time, it is forfeited. The following franchises and privileges are granted the company: The expropriation of private lands needed for the lines, switches, offices, warehouses, and stores, to be ordered by the Government and paid for by the concessionnaire; to take up, subject to no indemnification, public lands, woods, and waterways needed for the construction of the line; the introduction of materials, machinery, tools, instruments, during the period of exclusive privileges, free of all custom-house duties and impost, excepting the stamp tax, subject to the dispositions contained in the finance code and other laws on the subject; the trans-shipment of materials at Maracaibo; the construction of wharves on the lake, and the preference in the acquirement of all mines or quarries found on the track of said line by fulfilling the legal formalities. Besides the property right to the public lands occupied by the line for necessary works, the Government concedes to the company the property right to alternating strips of land 1,000 meters (1,090 yards) in length by 500 meters (545 yards) in width; and also the authorization to introduce foreign immigrants for the purpose of populating the lands near the lines, as well as other lands in the Perija district. For this purpose the concessionnaire shall obtain *gratis* portions of lands of 500 hectares (1,235.5 acres) each for agricultural purposes and 2 leagues for breeding purposes. These rights are subject to the immigration law of August 26, 1894, now in force."

COMMERCE OF THE CARACAS DISTRICT, 1901.

The report on the trade of the British consular district of Caracas for the year 1901, received at the foreign office of the United Kingdom on June 6, 1902, covers the commercial movements of the ports of La Guaira, Puerto Cabello, and Maracaibo. The import trade in La Guaira and Puerto Cabello districts showed a slight increase for the former and a pronounced decline in the latter throughout the year 1901, while the products exported from both sections show a great decrease, as compared with the preceding year. In the Maracaibo district it appears that the export business was a little better than in 1900. From the report in reference, the following details of the commerce and general conditions prevailing of the Republic have been collected.

According to the figures of the statistical tables, there was an increase over 1900 at the port of La Guaira in the quantities of goods of all classes imported—coal, provisions, merchandise, and cement showing the largest advance. In provisions the increased importation appears principally in the months of August and September, and is due to the enormous quantity of corn imported from the United States in view of a decree issued in July providing for the free admission of corn and beans for a period of two months. The increase in this item over the preceding year is stated as 2,835 tons. The augmentation in the importation of merchandise, amounting to an advance of 1,834 tons over the preceding year, is to be accounted for by the fact that in May a new decree went into effect increasing the import duties by 12½ per cent, and a few of the larger houses anticipated the effect of the decree by larger purchases abroad.

The increase in coal receipts amounted to 4,396 tons, and the number of vessels engaged in the trade numbered 13 more than in the preceding year. The coffee crop of the district proved very poor in quantity, owing to the severe drought, and the exports fell off 3,010 tons, as compared with the preceding year. Cocoa also showed a decline in shipments amounting to 1,992 tons. The decline in hides was to the number of 32,469, equal to 293 tons. The greater part of the coffee was shipped to New York, 40 per cent of the total finding a market at that port, while 20 per cent was sent to Hamburg and the rest to Havre and other ports. Venezuelan cocoa finds its best market in France, and of the 70,821 bags shipped about 57,000 went to the three ports of Havre, St. Lazaire, and Bordeaux. Hides and skins go principally to New York, whither 76,000 of the total 84,000 were shipped. During the whole of 1901 the port of La Guaira was scarcely a day without a foreign war ship, sometimes three or four being there at the same time. This was naturally of material benefit to the town, as large quantities of fresh meat, poultry, and vegetables were required. In specializing the position taken by the United Kingdom in the trade of the port, the report states that the total quantity of imports from that country showed an advance of 3,264 tons, coal forming the principal item.

In the report on the section for which Puerto Cabello is the port of entry, it is shown that the minor crops suffered by the continued aridity, and large quantities of grain were brought into the country. Rice was the leading article of import. The figures covering the trade with Germany and Holland show a slight increase over last year, while trade with the United States, in spite of the larger shipments of corn and beans, on which duties were abolished for a while, did not reach its previous standard. The following are the official figures of imports at Puerto Cabello during 1901:

Country of origin.	Value.			Country of origin.	Value.		
	£.	s.	d.		£.	s.	d.
United Kingdom	64,320	3	5	Italy	4,381	7	11
Germany	63,476	11	3	Spain	3,432	3	1
United States	51,506	0	1	Other countries	607	8	9
France	34,629	1	0				
Holland	32,533	5	2	Total	254,886	0	8

According to these figures imports at the port show a decrease of fully 25 per cent as compared with the year 1900 and of more than 40 per cent as compared with 1898.

Export figures show the following returns:

Articles.	Quantity.	Articles.	Quantity.
	Tons.		*Tons.*
Coffee	9,281	Old metals	61
Cacao	456	Quina	13
Hides	540	Lumber	374
Deerskins	35	Divi-divi	7
Goatskins	261	Cotton	4
Copra	75	Seeds	19

The number of vessels from foreign ports entered and cleared during the year was 317 steam and 8 sailing, Norwegian, French, and Dutch vessels leading. The export of cattle to Cuba continued during the year from Puerto Cabello, the total reaching the high figure of 66,049 head, as compared with 18,774 in 1900 and 64,083 for 1899 from Puerto Cabello and Guatna combined.

The report of the Maracaibo section shows a somewhat more promising condition, as regards trade, than during 1900. Exports of nearly all produce increased a little, and for the first seven months of the year was quite satisfactory. The following table shows the quantity of general produce exported from Maracaibo during 1901 and 1900:

Articles.	Quantities.		Articles.	Quantities.	
	1901.	1900.		1901.	1900.
	Tons.	*Tons.*		*Tons.*	*Tons.*
Coffee	25,626	20,829	Copaiba	40¾	36½
Cocoa	154	184	Fustic	6,272	5,421
Quinia bark	6¼	4	Divi-divi	3,368	1,781
Hides	456	338	Brown sugar	283	274
Goatskins	139	121	Fish sounds	36	43
Deerskins	7¾	4½			

IMPORTS FROM NEW YORK DURING FISCAL YEAR 1901-2.

During the fiscal year 1901–2 (July, 1901, to June, 1902, inclusive), the shipments from the city of New York to Venezuelan ports, according to data furnished by the Consul of Venezuela at New York, consisted of 663,120 packages of merchandise, weighing 31,649,061 kilograms, valued at 14,992,209.95 *bolivares* ($2,893,496.52), as compared with merchandise having a value of 19,096,476.45 *bolivares* ($3,685,619.95) shipped in 1900–1901. This commerce in 1901–2 was carried on in 116 steamships and 6 sailing vessels, and the total number of invoices during the year referred to rose to 3,444. The following table is a detailed statement of the shipments of merchandise for the year 1901–2:

Articles.	Packages.	Weight.	Value.
		Kilos.	*Bolivars.*
Axes and agricultural implements	1,747	55,211.56	81,111.65
Barbed wire	21,164	867,564.00	232,887.80
Beer and hops	328	22,451.90	11,668.00
Blankets	2,450	312,490.50	1,013,989.00
Butter	5,889	314,497.50	422,791.55
Cement (roman)	3,111	525,233.00	24,165.00
Coal	5,700	700,953.00	21,935.00
Cordage	12,723	363,156.60	386,082.65
Cotton drill, white and colored	1,273	177,237.75	424,155.55
Crude cotton drill and canvas	2,109	218,264.00	417,455.65
Drugs and perfumes	5,748	307,629.13	581,443.90
Fine hardware, etc	130,991	1,325,978.71	975,018.50
Flour	158,522	10,593,026.00	2,268,681.95
Forage	616	34,852.00	6,280.25
Glass and lamp ware	1,928	92,670.72	60,839.95
Groceries	38,827	1,527,580.45	879,797.70
Gold coin	34	608.60	1,659,835.00
Hardware and carriages	22,260	2,015,559.55	786,403.15
Kerosene	114,292	4,179,901.00	562,826.25
Lard	46,838	2,064,505.00	1,965,469.85
Liquors	452	19,111.00	22,189.15
Live animals	26	11,109.00	14,610.00
Lumber (undressed)	11,874	729,864,00	91,405.00
Machinery and electrical supplies	8,873	845,116.15	767,704.95
Oils and paints	3,240	240,806.35	127,301.50
Printing supplies (paper, machinery, and type)	1,477	276,367.20	97,187.70
Revolvers	4	76.50	1,080.00
Sailcloth and ducking	1,294	142,985.50	287,182.10
Sewing machines and parts thereof	661	32,843.58	64,346.75
Small fruits	49,699	2,482,434.00	418,900.65
Soap and candles	6,934	1,081,702.00	142,016.10
Sugar	140	7,016.00	4,010.00
Tobacco:			
Chewing tobacco	1,077	23,623.00	59,347.65
Leaf tobacco	178	8,362.50	26,810.60
Tobacco fillings	630	47,600.00	78,904.45
Manufactured tobacco	11	673.00	6.375.00
Total	663,120	31,649,060.75	14,992,209.95

THE WORLD'S COMMERCE IN 1901.

The import and export commerce of all the countries in the world amounted in 1901, according to German returns, approximately to $23,800,600,000 and was divided among the leading commercial nations as shown below, in round numbers:

Country.	Value.	Country.	Value.
Great Britain	$4,165,000,000	Switzerland	$380,800,000
British colonies, total	2,618,000,000	Spain	282,400,000
Germany	2,468,060,000	China	305,000,000
United States	2,118,200,000	Sweden	275,600,000
France	1,618,400,000	Argentina	280,000,000
Holland	1,332,800,000	Japan	238,000,000
Austria-Hungary	856,800,000	Brazil	238,000,000
Belgium	785,400,000	All other countries	4,624,340,000
Russia and Siberia	642,600,000		
Italy	571,200,000	Total	23,800,600,000

THE WORLD'S FUELS.

The subject of coal production has become one of prominence in view of the growing demands for fuel. It is an important economic question in Europe, where the development of manufacturing industries is, in some cases, far outstripping the capacity of the home collieries. The future coal supply of the world has been recently discussed in a most interesting way by Dr. Ferdinand Fischer, of Göttingen, Germany, who has collected with much care all the available data as to the coal resources of the whole world.

Briefly summing up the estimates which Dr. Fischer has based upon his studies, he concludes that the attainable coal supply of Germany amounts, in round numbers, to 160,000 million tons; that of Great Britain to 81,500 million tons; that of Austria-Hungary, Belgium, and France together to 17,000 million tons. The coal deposits of Russia are still so little known that Dr. Fischer does not attempt to estimate the attainable output, though he says that the resources are undoubtedly enormous, particularly in the southern regions, from the Government of Poltava eastward into the land of the Don Cossacks.

He estimates that the coal resources of the whole of America are at least 684,000 million tons. All our later information with regard to China has tended to confirm the conclusions reached by VON RICHTHOFEN as to the enormous wealth in coal of that Empire. There is as yet no reason to believe that this very careful scientific traveler overshot the mark when he estimated the coal provision of the eighteen provinces at 630,000 million tons of anthracite and an equal quantity of bituminous coal.

It is a curious commentary that, while China, as far as is known, is richer in coal than any other country in the world, almost none of it is yet available for steam power. It is largely used by the Chinese, but mainly in the regions where it is mined. The land routes are so poor that it does not pay to haul coal more than 25 miles. Unless a mine is within this distance of water carriage the area of the distribution of the output is confined to the immediate neighborhood. Steamships at Shanghai are to-day filling their bunkers with coal brought from Europe, because it is cheaper than coal expensively brought from Chinese mines in the interior.

The United States now far surpasses all other nations in the employment of machinery in coal mining. The cheaper and more rapid methods of machine mining have undoubtedly been a factor in the influences that have made it the first among the coal-producing States. The quantity of machine-mined coal increased from 6,200,000 tons in 1891 to 48,963,000 tons in 1899. Dr. FISCHER advises the Germans to give more attention to the mining of coal by machinery.

In his opinion, Germany has a coal supply that will meet the needs of the country for about one thousand years to come. Dr. FISCHER also reaches the conclusion, based upon the latest and most accurate information, that probably within the next fifty years, and certainly within this century, Great Britain will exhaust her coal resources at the present rate of consumption—that is to say, she can not go on indefinitely supplying the larger part of the world's export coal. The total production of coal in Great Britain in 1901 amounted to 219,046,945 gross tons, against 225,181,300 tons in 1900, a decrease of 6,134,355 tons.

Japan has large coal resources, particularly in the southern province of Kiushiu. Borneo is rich in coal formations, as also is New South Wales, a fact that is enabling Sydney to forge ahead of the other Australian cities in industrial development. Africa and South America are poorer in coal than any of the other continents, but the development of coal mines in South Africa bids fair to supply the industrial needs of the country.

COAL IN THE UNITED STATES.

According to returns to the United States Geological Survey from producers representing fully 97 per cent of the entire coal output of the United States, the production in 1901 amounted to 292,240,758 short tons, valued at $348,813,831. As compared with 1900, when the output amounted to 269,831,827 short tons, worth $306,891,364, this represents an increase of 22,358,931 short tons, or 8 per cent in quantity, and of $41,922,467, or 13.6 per cent in value. The production of Pennsylvania anthracite showed a phenomenal increase from 51,221,353 long tons (equivalent to 57,367,915 short tons) in 1900 to 60,242,560 long tons, or 67,471,667 short tons, in 1901. This represented a gain of 17½ per cent, the largest percentage of gain made by the anthracite trade in twenty years. Part of this increase in 1901 was due to a decreased output of anthracite in 1900 as compared with 1899, as owing to the historic strike of 1900 the output that year was reduced by over 2,500,000 long tons.

The increase in the value of the anthracite product is still more striking, the amount received at the mines last year showing a gain of $27,716,169, or more than 31 per cent over that of 1900. This was entirely due to the unprecedented period of prosperity which enabled consumers generally to pay higher prices for their fuel. The average price for the marketed anthracite coal—that is, the product shipped to market or sold to local trade—was $2.05, the highest figure obtained since 1888.

The production of bituminous coal, lignite, cannel coal, etc., increased from 212,513,912 short tons in 1900 to 224,769,091 short tons in 1901, indicating a gain of 12,255,179 tons, or about 6 per cent. The value of this product amounted to $236,309,811, as compared with $221,133,513 in 1900, an increase of $15,176,298, or a little less than 7 per cent. The price of the bituminous product did not show any material advance in 1901.

Of the 27 States producing coal in 1901 all but 4 showed increased productions. The 4 whose product decreased were California, Montana, New Mexico, and Tennessee. The production by States is shown in the following table:

	Tons.	Value.
BITUMINOUS.		
Alabama	9,078,677	$9,987,811
Arkansas	1,784,136	2,033,193
California	151,079	394,106
Colorado	5,699,016	6,411,891
Georgia and North Carolina	354,825	426,685
Illinois	27,313,296	28,452,278
Indiana	6,962,940	7,078,842
Indian Territory	2,408,943	3,887,793
Iowa	5,578,522	8,016,274
Kansas	4,880,526	5,973,381
Kentucky	5,487,994	5,208,094
Maryland	5,113,127	5,046,491
Michigan	1,040,530	1,543,756
Missouri	3,799,993	4,703,174
Montana	1,396,081	2,009,316
New Mexico	1,086,546	1,546,652
North Dakota	166,085	212,635
Ohio	19,695,723	19,789,958
Oregon	69,011	173,646
Pennsylvania	82,914,840	82,099,906
Tennessee	3,546,551	3,969,249
Texas	1,086,012	1,885,083
Utah	1,322,614	1,666,082
Virginia	2,953,999	2,523,270
Washington	2,578,217	4,271,076
West Virginia	23,816,434	20,908,705
Wyoming	4,485,374	6,060,462
Total bituminous	224,769,091	236,309,811
Pennsylvania anthracite	67,471,667	112,504,020
Total	292,240,758	348,813,831

The coal production of the United States last year was nearly 20 per cent more than Great Britain's; nearly 80 per cent larger than Germany's; nearly seven times that of Austria-Hungary, and more than eight times that of France.

England, however, continues to sell more coal to the countries which import it than all the rest of the world together. It supplies far more coaling stations than any other country. It is the only land that does an enormous business in the exportation of coal.

The business of selling coal abroad is usually very profitable, and one reason why England surpasses all competitors in this business is because she has special facilities for it. Her coal is so near the sea that England is able to ship it less expensively than any other exporting nation. Owing to the more extensive use of coal-mining machinery, a great deal of the United States coal at the pit mouth does not cost so much as British coal when raised to the surface, but by the time it is shipped on the ocean it usually costs more than British coal.

Another reason why, usually, when the price of European coal is not abnormally high, the United States can not compete with British exports, is because of the sea carriage to the continent of Europe, which is by far the greatest importer, is very much longer than that of England. Thus England has special advantages for the export coal trade, and she improves them to the utmost, in spite of the fact that economists are again beginning to reassert that the present century will undoubtedly see the end of her coal resources.

A comparison of the coal resources of Great Britain and the United States was recently made by Mr. A. S. E. Ackermann. Mr. Ackermann shows that the area of coal fields of the United States is about 225,000 square miles, and only 9,000 square miles in the United Kingdom. The American deposits have not been worked so long as the British. The former are found in wider seams and practically level strata, while the latter are tilted up at all sorts of angles and are so lean that a vein 15 inches wide is not neglected. Perhaps the greatest disparity exists between the depths at which it is necessary to work, a disparity whose importance is recognized when the cost of hoisting and pumping is considered. Few American mines go deeper than 200 feet, while it is not uncommon on the other side of the Atlantic to mine coal 4,000 feet below the surface. Still another natural advantage enjoyed in this country is the relative scarcity of fire damp.

When it comes to actual mining operations, the American uses much more machinery than the Briton. No specific reference is made to the difference in wages, which are greater in the United States than in England; but Mr. ACKERMANN says that the annual product of the American miner averages 526 tons, while that of the British miner is only 300. In the United States legal damages in consequence of the subsidence of the region over the mines are much lower than abroad, because the land is usually owned here by the coal companies. In America the railway freight charge per ton-mile is about one-sixth as large as in Great Britain. Two causes operate to produce that result. Coal in the United States is usually shipped in cars holding 50 tons, while in Great Britain it is broken up into 6-ton or 10-ton lots; secondly, the original investment of capital in railroads is much greater a mile in England than in America, and the rates must be heavier in order to pay dividends. Before transportation becomes necessary, and while the coal is yet at the mouth of the mine, Mr. ACKERMANN believes that the cash expenditure in the United States is only one-half as great as in Great Britain. An equal advantage should be enjoyed, then, after land carriage has been paid for three times the distance which British coal must travel to reach the seaboard.

OIL.

In connection with the coal conditions, the recent experiments made by the United States Navy with regard to oil as fuel are worthy of notice. The results have astonished the experimenters, and according to statements made it seems almost certain that oil fuel will supersede coal as a controlling element of naval warfare. Admiral MELLVILLE, Chief of the Bureau of Steam Engineering of the United States Navy, has stated it as his conviction that the oil-fuel problem will be solved.

It has been his desire to have an American battle ship cross the Atlantic Ocean burning only liquid fuel in her furnaces. He has always realized that by reason of the United States possessing an almost inexhaustible supply of crude petroleum, the Navy ought to possess a great military and strategic advantage if oil fuel could be adapted to naval purposes. It is an advantage of considerable importance to have the oil fuel used under natural draft. As the war ship, however, is primarily built for a few hours of battle, it is under forced-draft conditions that the use of oil would be most advantageous. In fact, it may be said that oil fuel is valueless for naval purposes unless it can be used under heavy forced-draft conditions.

For one year a board of naval officers has been experimenting with a water tube boiler specially constructed for the purpose.

These tests have been under all sorts of practical conditions, natural draft and forced draft of 1 inch, 2 inches, and 3 inches of air pressure. The best as well as the average quality of coal has been used.

The coal consumption has varied from 18 to 70 pounds a square foot of grate. The detailed results of these tests will eventually be published by the Bureau of Steam Engineering. The experimental boiler has been of such design that it has been possible to make the furnace volume as large as possible, and this gave the opportunity to determine whether the character of the steam generator had anything to do with the burning of liquid fuel. In order to settle this question, every test that has been made under the experimental boiler with coal will be duplicated with oil fuel.

Preparations for the oil-fuel tests have been under way for several months. Two official trials have been conducted under the supervision of the same board of naval officers who carried on the coal tests. The first test was under forced-draft conditions, where an air pressure of one inch was used. All the data collected in this test were checked and counterchecked, so that indisputable results were secured. The second test was also under forced-draft conditions, with an air pressure of two inches, and the same care was taken in the collection of the data. In both cases it was found that the volume of steam generated by the oil was greater than that secured by the coal test of like character.

SOLID PETROLEUM.

A late report by Consul Brunot, of St. Etiénne, France, states that a concern in that country is now engaged in the manufacture of solid petroleum, that is petroleum solidified, so that it may be handled as coal or coke.

In describing this product Consul Brunot says that it is manufactured in the form of briquettes, which are composed chiefly of petroleum, either crude or refined, and possess all the desirable qualities of coal and ordinary petroleum without any of the objectionable characteristics of either.

In addition to their lightness they leave "only 2 or 3 per cent of residue; do not form clinkers; do not melt or run; burn without smell or smoke; do not absorb moisture; will float on the water; do not explode; and are not liable to spontaneous combustion under any circumstances; will keep indefinitely, retaining all their qualities of combustion; give off a very white flame 8 to 10 inches high; produce twice as much heat as coal; can be used in any kind of furnace, and are easy and agreeable to handle."

It is believed, continues Consul Brunot, that this new form of fuel will be found particularly valuable for torpedo boats and, in cases of emergency, for larger vessels. The briquettes occupy only one-half the space necessary for coal, and it is calculated that a boat which requires 2,000 tons of coal to steam a given number of miles can cover the same distance with only 1,000 tons of petroleum briquettes.

Again, the saving in space which would be made possible by the use of this condensed fuel would enable a ship to carry a much larger cargo. Moreover, it is said that a boat using briquettes can get up steam in from one-quarter to one-third the time ordinarily required when coal is employed, and, further, that no smoke attends the combustion.

The principal object of expense in the manufacture of the new fuel seems to be the oil. The other ingredients contained in its composition and the labor and machinery cost comparatively little.

ALCOHOLIC SPIRITS.

Announcement has been recently made that, on the initiative of the German Emperor, the Norddeutsche Lloyd and the Hamburg-American steamship companies had decided to conduct a series of experiments with the object of ascertaining the value of alcoholic spirits as fuel. The German distillers are so confident as to the result of these trials that they are already urging the employment of spirits instead of coal as fuel for the German navy. It is pointed out that a cubic meter of spirits has just double the heating power of a cubic meter of coal, and that the use of the former fuel will carry with it many and great advantages; for example, the disagreeable incidents of coaling would be avoided, and stokers and trimmers would be dispensed with, for the supply would be regulated automatically and steam could be got up much more quickly than at present. There would also be no smoke, a circumstance which, especially in the case of torpedo boats, would be of great importance. Not only would Germany be in the happy position of being independent of English coal, but she would have the advantage over England, needing far fewer fuel stations abroad. German distilleries, too, are in a position to provide the navy with spirits in any quantity.

PEAT AS FUEL.

Serious attention is being given in recent years to the possibilities in the use of peat as fuel. In the north European countries, in Ireland, and in some other regions, the peat deposits have for a long time formed an important source of fuel. Even in Germany, which is relatively rich in coal, the peat bogs are being exploited fairly extensively. In the United States, on account of the great abundance of coal and other fuels, there has been little inducement for the development of the country's peat wealth; nevertheless many have believed that even at present there is a wide field for profitable use of peat fuel in this country. Far greater possibilities in this direction exist in Canada. Practically bare of coal, but rich indeed in peat (as is also the United States), that country is gradually finding itself forced to consider the use of this latter material on an extended scale to supply its needs for fuel.

Peat, in its natural state, is a poor fuel. It holds, suspended in the meshes of the network of vegetable fibers of which it is composed a very large percentage of water, and also contains much water in more intimate combination.

A number of methods of treating peat have been developed, and some of them are in operation. It has long been realized, however, that the most desirable peat product would be a coke, and numerous attempts have been made in this direction. Up to the present none of these attempts has had sufficient success. A process developed quite recently promises better results. If the claims made for it are well-founded the peat coke it produces will soon be a valuable and widely used fuel.

IRON AND STEEL PRODUCTION OF THE WORLD.

The "Commercial Intelligence," of London, in a lengthy report on the subject states that the world's total product of pig iron in 1901 amounted to 40,408,000 tons, of which the United States contributed 15,878,000 tons; the United Kingdom, 7,750,000 tons; Germany, 7,663,000 tons; Russia, 3,100,000 tons; France, 2,362,000 tons, and the remaining countries of the world, 3,655,000 tons. Comparing the product of 1901 with that of the annual average for the five-year period, 1866–1870, the United States has increased its product of iron and steel from 1,464,000 tons to 15,878,000 tons, a gain of 985 per cent; the United Kingdom from 5,133,000 tons to 7,750,000 tons, an increase of 51 per cent; Germany from 1,226,000 tons to 7,663,000 tons, an increase of 525 per cent; and the entire world, exclusive of the countries mentioned, from 2,710,000 tons to 9,117,000 tons, an increase of 236 per cent.

An even more noticeable feature of this growth, pointed out by the authority quoted, is the steady and enormous advance in the proportion of the world's product supplied by the United States and the equally rapid decadence in the position held by Great Britain. Thirty-five years ago the United Kingdom produced practically one-half of the world's pig iron, while the United States produced less than one-seventh of the total; whereas in 1901 the United States stood first in its proportion of the total, contributing practically four-tenths, as against less than two-tenths by the United Kingdom and about the same share by Germany. In the five-year period, 1866–1870, the world's per capita consumption of pig iron was 17 pounds; in 1901 it was 57 pounds, while in the latter year the United States consumed 455 pounds per capita and the United Kingdom 350 pounds per capita.

TRADE OPPORTUNITIES IN LATIN AMERICA.

Mexican advices state that a project is now on foot whereby the four railways at present entering Vera Cruz, namely, the Mexican Railway, the Interoceanic Railway of Mexico, the Vera Cruz and Pacific Railway, and the Vera Cruz Railways, Limited (this latter being part of a system embracing the city of Vera Cruz tramlines, the Alvarado Railway, and a line of river steamers navigating the rivers immediately to the south of Vera Cruz), have made a proposition to the Government for the construction of a joint passenger station and hotel and other improvements, which, if carried out, will materially benefit the port, as not only will it enable all merchandise to be handled in a far more expeditious and satisfactory manner from the point of view of the railway companies, but also of the steamships frequenting Vera Cruz, and at the same time it will reduce to a moderate figure the handling charges on goods.

Regarding American axes in Brazil, United States Consul J. H. Johnson, stationed at Santos, in a report to the State Department, says: "I saw a traveling salesman here recently who represented a German hardware house, who had with him a full assortment of goods and claimed to be doing a good business; and the presence of this salesman reminded me of something a gentleman told me recently. He said the axes manufactured in the United States were greatly preferred to any other, but that, on account of inferior packing, they were covered with rust when they arrived here, and hence were unsalable; that the Germans wrapped each axe in oil paper, and thereby protected them from the damp, salt atmosphere while in transit."

Mexican advices state that a company has been formed in Tamaulipas for the purpose of manufacturing harinolina, a flour obtained from corncobs, and which is in great demand in Germany and Switzerland for feeding cattle. Hitherto the corncob in Mexico has been used only as fuel on the ranches and haciendas where wood is scarce. During the last two or three years harinolina has been made by rancheros and haciendados, but without any organized system. It is said that last year 4,221,496 kilograms of this flour were exported from Tampico, most of it going to Hamburg. The new enterprise proposes to work on an extensive scale and to import machinery from the United States for grinding the cobs.

Inquiries are expected to be shortly made for machinery, etc., to be installed in an extensive cold-storage plant which is to be erected at Buenos Ayres, Argentine Republic. A company has been formed under the name of La Blanca for the purpose of building the plant and exporting frozen meat. The concern is a reorganization of the Estancieros Frigorific. The subscribed capital of the new concern is stated to be $1,000,000 gold. The plant is to have a capacity for freezing 5,000 sheep and 250 head of cattle daily.

The Buenos Ayres Grand National Tramway Company, Limited, which is composed of British capital and operates about 50 miles of horse tramways in the city of Buenos Ayres, Argentine Republic, is contemplating the conversion of its system into electric motive power. J. H. Wall, the general manager of the company in Buenos Ayres, is now on his way to London for the purpose of conferring with the directors of the company on the subject of the proposed change. The head offices of the company are at 6 Eastcheap, London, E. C.

The Ferro-Carril de Rio Seco, which was recently incorporated with a capital of $300,000 for the purpose of constructing a railroad from Pasco de Cardenas and Chiltepec, in the State of Tabasco, Mexico, it is reported, will shortly let contracts in connection with the building of the line. One of the principal Mexicans interested in the enterprise is now in New York and may be reached through Mr. Ferguson, whose office is on the fifteenth floor of the Johnson Building, Broad street.

Reports state that arrangements are being made with a view to the establishment of metallurgical works at Wadley Station, on the Mexican National Railway, located about 440 miles from the City of Mexico. It is proposed to invest $200,000 in the work. Bismuth, zinc, cobalt, sulphur, and other mineral products are to be prepared and made into chemicals.

The Coatzacoalcos Light and Power Company, Coatzacoalcos, Mexico, has placed a contract with Westinghouse, Church, Kerr & Co., for a complete air pump and condenser outfit. Another Mexican order secured by the Westinghouse interests is for a compound engine, to be installed in the plant of the Montezuma Lead Company, Santa Barbara, Mexico.

The River Plate Electric Light and Traction Company is reported to have secured a contract from the Rosario municipality for the electric lighting of that South American city. The company is expected to be shortly in the market for a power station and equipment, underground cables, etc.

Varela Cuneo & Co., of Buenos Ayres, Argentine Republic, are expected to decide by July 31 as to the construction of a new electric traction system from Rivadavia, located on the outskirts of Buenos Ayres, going to the Tigic and passing through all the northern suburbs.

The city of Guadalajara, Mexico, will shortly have an electric traction system, which, it is expected, will be furnished almost entirely with American equipment. The existing road is a mule one, 42 miles in length. J. M. Bermejillo, of the banking house of Bermejillo & Co., Guadalajara City, is the controlling factor in the scheme.

Some 250,000 acres of land in the State of Vera Cruz, owned by the Vera Cruz Railroad Company, is reported to be exploiting for oil under a contract made with Doulton & Fuller, of Bakersfield, Cal. Four wells are to be drilled at four widely separated points, and if these operations are satisfactory, 80 wells are to be sunk.

The Mexican Gas and Electric Light Company's (City of Mexico) electric plant is to be installed with three 800-kilowatt and one 400-kilowatt generators of general electric manufacture, to be directly connected to two 1,200-horsepower and one 600-horsepower cross compound condensing engines to be built by McIntosh, Seymour & Co.

The Municipal Council of Progreso, the flourishing Yucatan port, has issued a call for bids and plans for the drainage of the swamp near the city. Parties interested might get further information from Felipe G. Canton, whose offices are in the Columbia Building, No. 29 Broadway, New York.

L. B. Shepherd, of the City of Mexico and Monterey, it is reported, will let contracts very shortly for the equipment of a large power plant at Montemorelos. It is intended also to construct an electric traction system 23 miles in length.

The Government of Mexico, through the governor of the State of Oaxaca, Mexico, has offered a prize of $5,000 in Mexican currency to any person or company that within three years shall drill and put into working order an artesian well in Oaxaca or in the towns of Xochimilco and San Filipe del Agua and Hacienda de Aguilera. Details of the offer have been transmitted to the State Department by Andrew D. Barlow, the United States consul-general at Mexico City.

A company is reported to have been organized in Hermosillo, Mexico, for the purpose of building an extensive ice factory. The plant is intended to furnish ice not only for the city of Hermosillo but also many other places acccessible by rail. This is a new class of enterprise for Mexican capital.

BOOK NOTES.

Books and pamphlets sent to the Bureau of the American Republics, and containing subject-matter bearing upon the countries of the International Union of American Republics, will be treated under this caption in the Monthly Bulletin.

The desire of the Peruvian Government to attract the tide of European emigration has led to the publication of an "Immigrant's Guide," published in Spanish, Italian, and French, for distribution in Europe, in which the advantages offered by Peru to intending emigrants are set forth. The center of the Republic from latitude 11° to 4° 30′ is watered by navigable rivers, and it is this central region which is most suitable for colonization. This is especially true of the part traversed by the central road from Oroya (connected by a railway 206 kilometers in length with Lima) to Port Bermudez, on the river Pichis, a distance of 338 kilometers. By a law of December, 1898, the mountain lands may be bought at 5 *sols* or rented at 1 *sol* per hectare, or lots of not more than 2 hectares may be obtained gratuitously, the only condition attached being the cultivation of the land. Under another law land may be bought on the coast on condition of irrigating the same. The mountain lands are covered with forests of india rubber, resinous and hard-wood trees, and the land, when cleared, can be cultivated to produce cacao, coffee, sugar cane, coca, etc. The Government sets apart the sum of 90,000 *sols* annually for keeping the central road in good condition and for promoting the colonization of the region through which it passes. The law of December, 1898, besides authorizing the sale of land, permits, in certain districts, the letting of groups of 150 india-rubber trees at 20 cents per annum per group, and the same sum for every hectare of land occupied by the trees; also the letting of a certain number of hectares covered by those trees for the term of ten years, the concessionary being prohibited from cutting or destroying the trees and having to sell the gum to the Government at 2 *sols* for every 46 kilos extracted.

The following extracts from the pamphlet in reference are reproduced as of interest in this connection: "The immigrant enjoys the same civil right as the native Peruvian. He may become the proprietor of mountain or forest lands conformably to the law of 1898, which establishes the methods of acquisition by purchase, by concession, by contract of colonization, and by free adjudication. Coast lands can be acquired on condition of irrigating them, conformably to the law of 1893. In order to encourage immigration, the Government offers the colonist all kinds of exemption from taxes. Wages are more remunerative in Peru than in the neighboring countries, on account of the scarcity of labor. A field hand gets from 34 to 58 cents per day; mechanics, carpenters, and blacksmiths according to competition, from 97 cents to $1.95 per day. The district offering the greatest advantages to immigration is that which the central road traverses, from San Luis de Shuaro to Iquitos. The natural products are gums and building woods. The soil readily lends itself to the cultivation of coffee, cacao, and sugar cane, and, on account of the inequalities of surface and of the variety of the climate, all the fruits of the cold, temperate, and tropical countries may be produced. Peru is essentially a mining country. Silver and copper are mined on a vast scale. There are also rich deposits of salt, naphtha, coal, petroleum, mineral waters, and borax. The number of mining claims registered were:

	Number.
1899	1,107
1900	1,663
1901	1,014
1902 (first semester)	532

"As regards means of communication, aside from her waterways and highroads, Peru has eleven broad-gauge railways, with a total length of 1,386 kilometers (861 miles), and seven narrow-gauge roads of 204 kilometers (126.7 miles) now in operation."

A timely and interesting paper is published in the Monthly Summary of Commerce and Finance of the United States, July, 1902, prepared by the Bureau of Statistics of the United States, concerning Submarine Telegraphs. The number of such telegraphs in the world is 1,750, with an aggregate length of nearly 200,000 miles and transmitting more than 6,000,000 messages annually. The estimated cost of these lines is $275,000,000. Adding the above figures to those of the land telegraph systems of the earth, the total length of line is shown to be 1,180,000 miles, the length of their single wires or conductors 3,800,000 miles, and the total number of messages annually sent over them about 400,000,000. The Pacific Ocean alone has not been invaded by this network of wires. Thirteen wires are in successful operation between the United States and Europe and three others connect South America with the African and south European coast lines. The Gulf of Mexico and the Caribbean Sea are traversed in all directions by lines which bring their islands into speaking relations with each other and with South America, Central America, the United States, and thence with Europe, Africa, and Asia. South America is skirted with cable lines along its entire border save the extreme south, where land lines continue the interoceanic connection. The chief obstacle in the past to the construction of a trans-Pacific cable was found in the fact that mid-ocean resting places could not be satisfactorily obtained or arranged for, as no single government controlled a sufficient number of landing places suitable for the purposes. The acquisition of Pacific insular possessions by the United States seems to meet this objection, as the points of land contact for a cable line across that ocean would not be farther apart than the distance covered between France and the United States. The commercial utility of cable lines is demonstrated by the statement that in 1866, the year of the first successful operation of telegraphic communication between the United States and Europe, the inter-trade between those two sections of the world amounted to $652,232,289, and by 1898 it had grown to $1,279,739,936, while the trade of the United States with the world at large grew from $783,671,588 in 1866 to $2,285,000,000 in 1902. The article treats also of the various land telegraph systems of the world, and includes the various reports of surveys made in the interests of a trans-Pacific cable line. A chronology of submarine telegraph construction throughout the world and the development of submarine telegraphy adds to the value of the paper, and a map showing the world's telegraphic systems indicates the distances at present traversed and those yet to be covered.

"Industrial and Commercial Conditions in Cuba" form the subject of ALBERT G. ROBINSON's paper in the Review of Reviews for August, 1902. The trade interests of the Republic are covered from 1503 to the present day, and the prediction is made that the "island will take its place in the world as the land of peace and plenty." The railroads, sugar properties, mining enterprises, tobacco and other interests are considered from the standpoint that Cuba's highest development will be reached when she becomes a land of small farmers, with such diversity of products as is readily possible with her soil and climatic conditions. Sugar and tobacco need not in the future form the sole basis of foreign trade, but with freer access to American markets there is no reason that these products might not attain much larger proportions than heretofore. Economic conditions after the Spanish-American war are dealt with, and extracts from leading Cuban journals, bearing on the subject, are quoted.

The Columbus Memorial Library has received from the Saalfield Publishing Company, of Akron, Ohio, their new edition of "South America: social, industrial and political," by FRANK G. CARPENTER, who explains that the present volume is the outcome of a journalistic expedition to South America in search of information for the American business man and the general reader. Mr. CARPENTER'S journey included the Isthmus of Panama, Colombia, Ecuador, Peru, Bolivia, Chile, Argentina, Paraguay, Uruguay, Brazil, the Guianas, Venezuela, and the Orinoco Basin. He describes the commercial and social life of the cities, the chief industries, notes the characteristic features of the inhabitants, and discusses the resources and possibilities of the various countries. The work is not statistical in character, but is interesting and entertaining. It is well illustrated.

A copy of the "Thirtieth Annual Report of the Silk Association of America," issued March 25, 1902, has been received in the Columbus Memorial Library of the International Bureau of the American Republics. It is a volume of 142 pages. The first part is devoted solely to the business of the association, the secretary's annual report, etc., followed by brief notes on the different phases of the silk industry and its development in the United States. Extensive statistical tables are given of imports of spun silk, 1899–1901, by countries of export, the world's supply of raw silk in the silk seasons from 1882 to 1902 (given in kilograms and pounds), the total arrivals and values of raw silks at all ports of the United States for the last five years (ending December 31, 1897–1901), with other data of value to those interested in the international silk trade, contained in special reports made to the Silk Association of America by their agents or taken from reports of the United States consular officers and the Bureau of Statistics, Treasury Department.

The "Scientific American" for August 23 publishes an interesting article on "Some Recent Archæological Discoveries in Mexico City," by THOMAS R. DAWLEY, JR., which is illustrated with five excellent photographs taken by the author, who spent the past winter in Mexico, and was the special commissioner for "The Outlook" at the sessions of the Second International Conference, held in that city. The discoveries were made right in the heart of the capital, thirteen feet below the level of the present city. They consist of the remains of the Aztec temple *Coateocalli* (in Aztec the house of the various gods), a huge monolith of a tiger, or *ocelotl*, weighing several tons; also a monolith of a serpent's head corresponding to two others which have already been found, each of which constituted the corner pieces of the wall inclosing the Great Teocallis of Tenochtitlan, and various idols and other objects. The discovery was made while renovating, or practically rebuilding, an old Spanish edifice not far from the Zocolo, and the author states that it is due to young DIAZ, the son of the President, that the excavations were made leading to the discoveries. From these discoveries the author, who has explored many of the ruins of the ancient cities and temples of Central America, deduces that after the conquest and destruction of Tenochtitlan the ruins of the city were allowed to lie abandoned many years. As evidence of this he cites the stumps of trees found at the base of the temple recently unearthed, which trees evidenly sprouted and grew from the crevices of the stones, having had ample time to grow to be good sized trees before they were eventually destroyed and covered up by the débris, upon which was built the edifice known as the palace of the Acevedos, more than a century or a century and a half later. "The great cathedral," says Mr. Dawley, "was not commenced till a century after the destruction of the city by Cortez, and, like the palace of the Acevedos, it must have been built upon the ruins of the Great Teocalli. We can therefore conceive Tenochtitlan a ruined city for upwards of a century, with its demoralized remnants of a once proud race wandering about the ruins, till finally the site was accepted for the capital and the reconstruction commenced in earnest. The value and quantity of relics which are buried beneath these structures can only be conjectured."

"Revista do Museu Paulista," Vol. IV, São Paulo, 1900. This volume contains, in addition to a list of the objects added to the collection of the Museum during the year, a number of interesting articles on subjects pertaining to ornithology, paleontology, entomology, and archeology. In the preface the Director of the Museum states that the most valuable collection acquired by the Museum during the year (1898) was that of relics of the Carajás Indians. Among the objects of this collection are two large dancing masks, a semilunar-shaped stone hatchet having an ornamented handle, lances, musical instruments, etc. The director calls attention to the ornithological section of the Museum, which is especially fine. Out of the 602 species of birds which have been observed up to the present time in the State of São Paulo, 510 are represented in the Museum's collection. The sections of conchology, paleontology, and entomology are also deserving of special mention. The following are some of the articles contained in this volume: Description of the Nests and Eggs of Birds of Brazil; Comparative Catalogue of the Nests and Eggs of Birds of Brazil; Some Fossils of the Paleozoic Age from the State of Paraná; Observations on some of the Terrestrial Snails of Brazil; Archeology of Rio Grande; Some Fishes from São Paulo, Brazil; and Snails of the Family *Solaropsis.*

BOLETÍN MENSUAL

DE LA

OFICINA INTERNACIONAL DE LAS REPÚBLICAS AMERICANAS,

Unión Internacional de Repúblicas Americanas.

VOL. XIII. SEPTIEMBRE, 1902. No. 3.

TRATADO GENERAL DE ARBITRAJE ENTRE LA REPÚBLICA ARGENTINA Y LA DEL PARAGUAY, PROCLAMADO EL 5 DE JUNIO DE 1902.

Los Gobiernos de la República Argentina y de la República del Paraguay, animados del común deseo de solucionar por medios amistosos cualquier cuestión que pudiera suscitarse entre ambos países, han resuelto celebrar un Tratado General de Arbitraje, á cuyo efecto nombran como sus Plenipotenciarios, á saber:

El Excmo. Señor Presidente de la República Argentina á su Enviado Extraordinario y Ministro Plenipotenciario en la República del Paraguay, Don LAURO CABRAL, y el Excmo. Señor Presidente de la República del Paraguay á su Ministro Secretario de Estado en el Departamento de Relaciones Exteriores, Don JOSÉ S. DECOUD, quienes una vez comunicados sus plenos poderes, que fueron hallados en buena y debida forma, convinieron en los artículos siguientes:

ARTÍCULO 1°. Las Altas Partes Contratantes se obligan á someter á juicio arbitral todas las controversias, de cualquier naturaleza, que por cualquier causa surgieren entre ellas, en cuanto no afecten á los preceptos de la Constitución de uno ú otro país y siempre que no puedan ser solucionadas mediante negociaciones directas.

ART. 2°. No pueden renovarse en virtud de este tratado, las cuestiones que hayan sido objeto de arreglos definitivos entre las partes. En tales casos el arbitraje se limitará exclusivamente á las cuestiones que se susciten sobre validez, interpretación y cumplimiento de dichos arreglos.

ART. 3°. En cada caso ocurrente se constituirá el tribunal arbitral que deba resolver la controversia suscitada. Si no hubiere conformidad en la constitución del tribunal, éste se compondrá de tres jueces. Cada Estado nombrará un árbitro y éstos designarán el tercero. Si no pudiesen ponerse de acuerdo sobre esa designación, lo hará un Jefe de un tercer Estado, que indicarán los árbitros nombrados por las partes. No poniéndose de acuerdo para este último nombramiento, se solicitará su designación del Presidente de la Confederación Suiza. El árbitro así elegido sera de derecho Presidente del tribunal.

No podrá nombrarse árbitro tercero á la persona que en ese carácter haya sentenciado ya en un juicio arbitral con arreglo á este tratado.

Art. 4°. Ninguno de los árbitros, podrá ser ciudadano de los Estados contratantes ni domiciliado en su territorio. Tampoco podrá tener interés en las cuestiones que sean objeto del arbitraje.

Art. 5°. En caso de no aceptación ó renuncia ó impedimento sobreviniente de uno ó más de los árbitros, se proveerá á su sustitución por el mismo procedimiento adoptado para su nombramiento.

Art. 6°. Los puntos comprometidos se fijarán por los Estados contratantes que podrán también determinar la amplitud de los poderes de los árbitros y cualquier otra circunstancia relativa al procedimiento.

Art. 7°. En defecto de estipulaciones especiales entre las partes, corresponde al tribunal designar la época y el lugar de sus sesiones fuera del territorio de los Estados contratantes, elegir el idioma que deberá emplearse, determinar los métodos de substanciación, las formalidades y términos que se prescribirán á las partes, los procedimientos á seguirse, y en general, tomar todas las medidas que sean necesarias para su propio funcionamiento y resolver todas las dificultades procesales que pudiesen surgir en el curso del debate. Los compromitentes se obligan á poner á disposición de los árbitros todos los medios de información que de ellos dependan.

Art. 8°. Cada una de las partes podrá constituir uno ó más mandatarios que la representen ante el tribunal arbitral.

Art. 9°. El tribunal es competente para decidir sobre la regularidad de su propia constitución, validez del compromiso y su interpretación. Lo es igualmente para resolver las controversias que surjan entre los compromitentes sobre si determinadas cuestiones han sido ó no puntos sometidos á la jurisdicción arbitral en la escritura de compromiso.

Art. 10. El tribunal deberá decidir de acuerdo con los principios del Derecho Internacional, á menos que el compromiso imponga la aplicación de reglas especiales ó autorize á los árbitros á decidir como amigables componedores.

Art. 11. No podrá formarse tribunal sin la concurrencia do los tres árbitros.

En el caso que la minoría, debidamente citada, no quisiese asistir á las deliberaciones ó á otros actos del proceso, se formará tribunal con solo la mayoría de los árbitros, haciéndose constar la inasistencia voluntaria ó injustificada de la minoría.

Se tendrá como sentencia lo que resuelva la mayoría de los árbitros, pero si el árbitro tercero no aceptase el parecer de ninguno de los árbitros nombrados por las partes, su dictamen será cosa juzgada.

ART. 12. La sentencia deberá decidir definitivamente cada punto en litigio y con expresión de su fundamento.

Será redactada en doble original y firmada por todos los árbitros. Si alguno de ellos se negase á suscribirla, los otros deberán hacer mención en acta especial de esta circunstancia y la sentencia producirá efecto siempre que esté firmada por la mayoría de los árbitros. El árbitro en disidencia se limitará á hacer constar su discordia en el acto de firmar la sentencia y sin expresión de sus fundamentos.

ART. 13. La sentencia deberá ser notificada á cada una de las partes por medio de su representante ante el tribunal.

ART. 14. La sentencia legalmente pronunciada decide dentro de los límites de su alcance la contienda entre las partes.

ART. 15. El tribunal establecerá en la sentencia el plazo dentro del cual debe ser ejecutada, siendo competente para decidir las cuestiones que puedan surgir con motivo de la ejecución de la misma.

ART. 16. La sentencia es inapelable y su cumplimento está confiado al honor de las Naciones signatarias de este pacto.

Sin embargo, se admitirá el recurso de revisión ante el mismo tribunal que la pronunció, siempre que se deduzca antes de vencido el plazo señalado para su ejecución en los siguientes casos:

1°. Si se ha dictado sentencia en virtud de un documento falso ó adulterado.

2°. Si la sentencia ha sido en todo ó en parte la consecuencia de un error de hecho que resulta de las actuaciones ó documentos de la causa.

ART. 17. Cada una de las partes pagará los gastos propios y la mitad de los gastos generales del tribunal arbitral.

ART. 18. El presente tratado estará en vigor durante diez años á contar desde el canje de las ratificaciones. Si no fuese denunciado seis meses antes de su vencimiento, se tendrá por renovado por otro período de diez años y así sucesivamente.

El presente tratado será ratificado y canjeadas sus ratificaciones en Asunción dentro de seis meses de su fecha.

En fé de lo cual los Plenipotenciarios de la República del Paraguay y de la República Argentina firmaron y sellaron con sus respectivos sellos y por duplicado el presente tratado en la ciudad de Asunción, á los seis días del mes de noviembre del año de mil ochocientos noventa y nueve.

[L. S.] JOSÉ S. DECOUD.
[L. S.] LAURO CABRAL.

Reunidos en el Despacho del Ministerio de Relaciones Exteriores de la República del Paraguay sus Excelencias el Señor LAURO CABRAL, Enviado Extraordinario y Ministro Plenipotenciario de la República Argentina, y el Señor Doctor Don MANUEL DOMÍNGUEZ, Ministro de Relaciones Exteriores, conformes en el propósito de modificar el Tratado General de Arbitraje celebrado entre ambos Gobiernos en 6 de noviembre de 1899, en la parte que trata de la formación del Tribunal Arbitral, y con el objeto de asegurar su constitución sin los inconvenientes propios de un tribunal permanente, han convenido en lo siguiente:

El Artículo 3° del Tratado referido queda modificado como sigue:

"ARTÍCULO 3°. En cada caso ocurrente se constituirá el Tribunal Arbitral que deba resolver la controversia suscitada. Si no hubiera conformidad en la constitución del tribunal éste se compondrá de tres jueces. Cada Estado nombrará un árbitro y éstos designarán el tercero. Si no pudieren ponerse de acuerdo sobre esta designación, lo hará el Jefe de un tercer Estado, que indicarán los árbitros nombrados por las partes. No poniéndose de acuerdo para este último nombramiento, cada parte designará una Potencia diferente y la elección del tercer árbitro será hecha por las dos Potencias así designadas. El árbitro así elegido será de derecho Presidente del Tribunal. No podrá nombrarse árbitro tercero á la persona que en ese carácter haya sentenciado ya en un juicio arbitral con arreglo á este tratado."

El presente protocolo será ratificado y canjeado simultáneamente con el Tratado de Arbitraje del que formará parte integrante.

En fé de lo cual lo firman en dos ejemplares en la Ciudad de la Asunción á los veinte y cinco de enero del año un mil novecientos dos.

[L. S.] LAURO CABRAL.
[L. S.] MANUEL DOMÍNGUEZ.

En la Ciudad de la Asunción, á los diez y seis días del mes de mayo del año un mil novecientos dos, reunidos en la Secretaría del Ministerio de Relaciones Exteriores de la República del Paraguay, Su Excelencia el Señor Doctor Don MANUEL DOMÍNGUEZ, Ministro de Relaciones Exteriores, y Su Señoría el Señor Don CÁRLOS BURGOS, Encargado de Negocios *ad interim* de la República Argentina, con el objeto de protocolizar el acuerdo celebrado en conferencias anteriores, expusieron: haber caducado el seis del corriente mes el plazo fijado en el Protocolo Adicional, firmado el tres de mayo de mil novecientos uno, ya prorrogado por dos veces, para la ratificación y canje del Tratado General de Arbitraje celebrado entre ambos Gobiernos el seis de Noviembre de mil ochocientos noventa y nueve, en razón de no haberse aprobado para el citado día por el H. Congreso Nacional del Paraguay el Protocolo del veinte y cinco de enero último, modificando el artículo tercero del expresado pacto.

Por lo cual y después de haber exhibido sus Plenos Poderes, que se encontraron en buena y debida forma, convinieron los negociadores transferir hasta el quince de julio próximo el plazo dentro de cuyo término debe de efectuarse la ratificación y canje del referido Tratado General de Arbitraje.

Este Protocolo será considerado como parte adicional del pacto aludido.

En fé de lo cual, firmaron y sellaron con sus respectivos sellos el presente Protocolo.

[L. S.] MANUEL DOMÍNGUEZ.
[L. S.] CARLOS BURGOS.

ACTA DE CANJE.

Reunidos en el Despacho del Ministerio de Relaciones Exteriores de la República del Paraguay, Su Excelencia el Señor Dr. Don MANUEL DOMÍNGUEZ, Ministro de Relaciones Exteriores, y Su Señoría el Señor Don CÁRLOS BURGOS, Encargado de Negocios *ad interim* de la República Argentina, con el objeto de proceder al canje de las ratificaciones del Tratado General de Arbitraje concluido entre la República del Paraguay y la República Argentina, el día seis de noviembre del año mil ochocientos noventa y nueve, y después de haberse comunicado sus respectivos Plenos Poderes que fueron hallados en buena y debida forma, procedieron, como corresponde, á la lectura de los instrumentos de ratificación del referido Pacto Internacional y encontrándolos conformes efectuaron el canje de estilo.

En fé de lo cual firmaron y sellaron la presente acta, por duplicado, en la Ciudad de la Asunción á los cinco días del mes de junio de mil novecientos dos.

[L. S.] MANUEL DOMÍNGUEZ.
[L. S.] CÁRLOS BURGOS.

CONFERENCIAS PENDIENTES.

En el momento en que va á la prensa este Boletín sólo han manifestado oficialmente su deseo de concurrir á las conferencias pendientes las naciones que siguen:

A la Conferencia para el estudio de la producción, distribución y consumo del café.—Guatemala, Honduras, México, Nicaragua y Salvador

A la Convención Sanitaria.—Chile, Guatemala, Honduras, Nicaragua y Salvador.

Al Congreso Aduanero.—Bolivia, Guatemala, Honduras México, y Venezuela.

Los Estados Unidos de América tomarán parte en todas ellas.

REPÚBLICA ARGENTINA.

ENMIENDAS AL ARANCEL ADUANAS.

[Del "Boletín Oficial" del 28 de junio de 1902.]

El Presidente de la República, decreta:

Las aduanas al aplicar el arancel aduanero en vigor tendrán en cuenta las siguientes modificaciones:

PARTIDA 228. Vinagre, léase como derecho específico por botella $0.015 en lugar de $0.15.

PARTIDA 1781. Suprímase la coma que separa las palabras "verde" y "cardenillo."

PARTIDA 1824. En lugar del aforo de $0.15 el kilo, debe leerse $0.015.

PARTIDA 1900. Agréguese al final de la leyenda "hasta doce piezas, en cajas ó frascos."

PARTIDA 1901. Sustitúyanse las palabras "hasta doce piezas, en cajas ó frascos," por las de "hasta 50 cápsulas ó perlas."

PARTIDA 2242. Antepónganse á la leyenda las palabras "de plata."

PARTIDA 2723. Léase "de porcelana, loza, vidrio ó papier maché, para ropa de hombre y los de hule para muebles, muy ordinario."

PARTIDA 2729. Agréguese al final de la nota, "Se exceptúan del anterior recargo los botones de sastre que vengan en cajas de cartón de menos de 600 gramos."

Las damajuanas para envases á que se refieren las partidas 1394 y 1395 deberán aforarse por docenas, en lugar de kilo bruto.

UN NUEVO FRIGORÍFICO.

"La Revista Mensual de la Cámara Mercantil" de Buenos Aires dice que ha quedado constituida en la capital de la República, bajo la denominación de "La Blanca," una Compañía argentina para la explotación de carnes congeladas, cuyo capital será de $1,500,000 oro, dividido en acciones de $100 oro cada una.

La nueva sociedad explotará un nuevo frigorífico sobre el Riachuelo (Barracas al Sur) para la exportación de carne congelada á Europa, Sud-África y otros mercados, así como la exportación de carne salada en tarros ó conservada por otros sistemas, ganados en pie y también abastecerá á la Capital Federal y otros puntos de la República con carne fresca, para lo cual dispondrá de un gran matadero.

Existe el propósito de construir el frigorífico en la margen sur del Riachuelo, en un area de 66,066 varas cuadradas, entre el Mercado Central de Frutos y el gran molino inglés, con 500 metros de frente al Riachuelo, ligado por un ramal del Ferrocarril del Sur. El frigorífico tendrá capacidad para beneficiar 5,000 carneros y 250 vacunos por día. Las máquinas tendrán fuerza para congelar la carne de 1,000,000 de carneros y 50,000 novillos por año, y en sus cámaras frías se podrán almacenar 70,000 reses ovinas y 4,000 vacunas.

Se dará preferencia en las compras de ganado á los estancieros consignatarios y corredores que sean accionistas cuando menos por diez acciones compradas directamente al sindicato.

La compañía se propone dedicar especial atención al comercio de la carne dentro del país, creyendo fácil conseguir una parte del abasto

---

BOLIVIA.

DECRETO REGLAMENTANDO EL REGISTRO DE LAS MARCAS DE FÁBRICA.

El Señor Don Manuel V. Ballivián, miembro honorario correspondiente de la Oficina Internacional de las Repúblicas Americanas, ha enviado al Boletín Mensual una copia del siguiente decreto, reglamentando el registro de las marcas de fábrica:

"José Manuel Pando, Presidente Constitucional de la República. Considerando:

"Que es de necesidad complementar la reglamentación del registro de las marcas de fábrica, designando el número con que se expidan estas y las oficinas y manera en que deben ser anotadas, fijando, además, una regla que ampare á los comerciantes de buena fé que hubiesen pedido mercaderias con una marca, posteriormente registrada por otros. Decreto:

Artículo 1°. Las patentes de marcas de fábrica llevarán el número que les corresponda por el orden de su registro en el Ministerio de Fomento y tendrán adherido, en el reverso, el dibujo que represente la marca de fábrica, sellado con el sello del Ministerio y firmado por el oficial mayor del ramo.

"Art. 2°. En el Ministerio de Fomento se llevará un libro de Registro de las patentes expedidas, anotando el número y el objeto, y adhiriendo otro ejemplar del dibujo de la marca de fábrica que será sellado y firmado por el concesionario ó su apoderado, debiendo llenarse estas mismas formalidades de garantía en el registro que llevan los notarios de hacienda.

"Art. 3°. Las mercaderías con marca determinada, pedidas al extranjero en fecha anterior á la de la presentación de la solicitud del registro de la misma marca ante una prefectura, no se reputarán objetos de comercio expedidos con marca falsificada.

"Art. 4°. Los prefectos de departamento ordenarán que la publicación de las solicitudes de depósito y registro de las marcas de fábrica se haga en el "Boletín Departamental," ó en alguno de los periódicos de más circulación, para que sean conocidas oportunamente por los comerciantes que tuviesen pedido antelado de mercaderías con la marca cuyo registro se solicita.

"ART. 5°. Las patentes anteriormente concedidas formarán la Serie A, y serán numeradas por el orden de su presentación en el Ministerio. La Serie B se abrirá con el N°. 1, para las patentes que se registren desde la fecha.

"ART. 6°. Estas disposiciones son complementarias de las establecidas por los decretos supremos de 24 de marzo de 1897 y de 13 de marzo de 1900 que continuarán en plena vigencia.

"El Ministro de Fomento é Instrucción Pública, queda encargado de la ejecución y cumplimiento del presente decreto.

"Dado en la ciudad de La Paz, á los 30 días del mes de mayo de 1902 años.

JOSÉ MANUEL PANDO.

ESTADISTICA COMERCIAL.

El comercio general de importaciones y exportaciones en la República de Bolivia, en el año de 1901, ha estado representado por la suma total de 54,531,434.72 bolivianos. El peso de las mercancías importadas y exportadas fué de 168,763,463 kilogramos.

El cuadro siguiente da los pormenores de este comercio por aduanas, pero es de advertir que no se incluyen, por carecerse de ellos hasta ahora, los datos correspondientes á las importaciones por el Acre en el segundo semestre del año de que se trata.

BRASIL.

COMERCIO EN 1901.

Según las estadísticas oficiales publicadas en Río de Janeiro respecto al comercio de importación y exportación del Brasil en 1901, el movimiento representado alcanza la suma de 415,053,510 milreis para el primero, y de 860,826,969 milreis para el segundo.

Las importaciones y exportaciones por países fueron como sigue:

Países.	Importaciones.	Exportaciones.
	Milreis.	*Milreis.*
República Argentina	56, 173, 430	19, 218, 773
Austria-Hungría	7, 632, 843	24, 229, 034
Bélgica	9, 547, 634	18, 876, 880
Francia	33, 263, 299	100, 338, 297
Alemania	39, 080, 606	126, 749, 284
La Gran Bretaña y sus posesiones	130, 278, 411	111, 487, 400
Holanda	2, 514, 248	41, 989, 849
Italia	15, 857, 616	8, 109, 950
Portugal	26, 928, 540	5, 091, 239
España	2, 973, 894	1, 351, 823
Suecia y Noruega	4, 966, 550	....
Suiza	2, 910, 347	....
Estados Unidos	51, 635, 665	31, 147, 265
Uruguay	27, 085, 441	9, 999, 657
Otros países	4, 204, 992	12, 206, 047
Suma	415, 053, 516	857, 100, 399

Á la suma de las exportaciones hay que agregar 3,726,295 milreis, valor de órdenes recibidas á fin de año, lo cual hace el total de 860,826,694 milreis.

POBLACIÓN DE VARIAS CIUDADES.

Según el último censo la población de las más importantes ciudades del Brasil es como sigue:

Río de Janeiro	700,000	Fortaleza	33,000
São Paulo	260,000	Parahyba	32,000
Bahía	200,000	San Luis	32,000
Recife	120,000	Campos	30,000
Belem	100,000	Campinas	28,000
Porto Alegre	80,000	Curytiba	25,000
Manaos	40,000	Petropolis	20,000
Nictheroy	35,000	Cuyaba	18,000
Santos	35,000	Santa Catharina	16,000
Maceio	33,000	Pelotas	15,000

INGRESOS EN LAS ADUANAS DEL BRASIL EN EL PRIMER TRIMESTRE DE 1902.

Los ingresos en las Aduanas del Brasil en el primer trimestre de 1902 han subido á 45,904,504 milreis. En el mismo período de 1901 fueron 43,324,323 milreis.

EXPORTACIÓN DE ORO.

La cantidad de oro exportado por el Estado de Minas Gerães de 1896 á 1901 fue como sigue:

	Gramos.		Gramos.
1896	1,988,527	1900	4,304,688
1897	2,233,214	1901	4,012,221
1898	3,090,205	Totales	19,821,999
1899	4,192,414		

Las exportaciones de manganeso en 1901 alcanzaron á 92,601,146 kilogramos.

COLOMBIA.

TARIFA PARA EL COBRO DE LOS DERECHOS DE IMPORTACIÓN SOBRE LAS MERCADERÍAS EXTRANJERAS, PUESTA AL DÍA HASTA EL MES DE MARZO DE 1902.

[Monedas, pesas y medidas: La unidad monetaria en Colombia es el *peso*, que vale próximamente 5 pesetas y se divide en 100 centavos. Con respecto á pesas y medidas, Colombia ha adoptado el sistema métrico.]

Las mercaderías extranjeras causan á su importación en el territorio nacional los siguientes derechos por cada kilogramo (ley 36 de 1886); los cuales se rebajan en las aduanas de Arauca y Meta en el 40 por ciento (ley 53 de 1884 y decreto 397 de 1886); en la de Buenaventura en 20 por ciento; y en la de Tumaco en 55 por ciento respecto de los tejidos de algodón sin bordar, y en el 30 los de las demás mercaderías (leyes 10 y 129 de 1888).

Cada liquidación se recarga con un 25 por ciento para distribuirlo entre los departamentos, excepto el de Panamá. (Leyes 88 de 1886, 48 de 1887, y 10 y 129 de 1888.)

No están sujetos á las rebajas ni al recargo los derechos que expresa el decreto 453 de 1893, que se reproduce á continuación de esta tarifa (página 862).

Nota.—Con respecto á los aumentos y disminuciones de derechos de aduana, véanse páginas 862 y siguientes.

Partida.	Mercaderías.	Derechos.
	Alimentos y condimentos.	
1	Batatas ó camotes, papas, cebollas, maíz, arroz, garbanzos, lentejas, frisoles y toda clase de legumbres y hortalizas y frutas frescas	*P. C.* 0.01
	Batatas ó camotes, papas, cebollas, maiz, arroz, garbanzos, lentejas, frisoles y toda clase de legumbres y hortalizas que se importen por las aduanas de Buenaventura y Tumaco (ley 29 de 1887) [a]	Libres.
2	Ajos	.05
3	Harinas, comprendiendo el sagú, arrow-root, tapioca, maicena y demás semejantes	.05
	Íd. que se introducen por las Aduanas de Buenaventura y Tumaco (ley 29 de 1887) [a]	Libres.
4	Harina de trigo preparada para hacer fideos y demás pastas alimenticias de la misma clase, en las fábricas de ellas (Decreto 537 de 1888, Diario Oficial 7,430) [a] [b]	.01
5	Bacalao y carnes en salmuera, y en general los pescados y carnes que se hallen sin preparar	.05
6	Azúcar	.05
7	Avellanas, nueces y almendras, con cáscara; y en general todos los alimentos sin preparar no mencionados	.10
8	Fideos y demás pastas	.10
9	Alimentos preparados como mortadelas, salmón, jamón; los dulces, confites, frutas conservadas y frutas pasas, etc., y los encurtidos y condimentos de todas clases no mencionados especialmente	.20
10	Aceitunas en barriles	.10
11	Té	.70
12	Canela	.30
13	Azafrán	[c] 1.20
14	Anís	.20
15	Hielo (Leyes 36 de 1886 et 129 de 1888)	.01
16	La Sal [d] [e] cada 12½ kilogramos	1.20
	Bebidas	
17	Cerveza y demás bebidas fermentadas	.05
18	Mosto de cebada ó de otra materia fermentada, ó infermentada, líquida ó sólida, para hacer cerveza, y la cerveza condensada	.02½
19	Vino tinto común en pipas, barriles y damajuanas	.02½
	Vino tinto Burdeos, Borgoña, Catalán y San Rafael medicinal, en botellas (Ley 129 de 1888)	[f] .05
	Vinos blancos, dulces y secos en pipas ó barriles	.05

(*a*) El Gobierno retirará esta exención tan pronto como cese la causa que la motiva (Art. 2° de la ley 29 de 1887).

(*b*) Decreto nº 1278 de 29 de Diciembre de 1894. ("Diario Oficial" nº 9677 de 11 de Enero de 1895.)—Declárase insubsistente el decreto nº 537 de 1888, por el cual se rebajaron los derechos de importación sobre algunas materias primas para la industria, publicado en el nº 7430 del Diario oficial.

(*c*) Resolución de 26 de Junio de 1895, señalando la clase de la tarifa de aduanas á que corresponde el trigo ("Diario Oficial" nº 9781, de 6 de julio de 1895).—Habiéndose dispuesto por Resolución de 16 de noviembre de 1889, inserta entre los documentos adjuntos á la Memoria de Hacienda de 1890, que la cebada se repute incluída entre los alimentos de la 2ª clase de la tarifa de Aduanas, debe procederse de igual modo, por analogía, respecto del trigo que se importe, pués esta mercadería es de la misma naturaleza que aquélla.

[a] Fuera del aumento que expresa el decreto 453 de 1893, que se reproduce á continuación de esta tarifa.

[d] Decreto n° 447, de 3 de octubre de 1895, por el cual se reforma el n° 1449 de 1893, que fijó los derechos de importación de la sal en las Aduanas de Buenaventura y Tumaco. ("Diario Oficial," de 8 de octubre de 1895, n° 9842).—Rebájanse á 10 centavos por cada doce y medio kilogramos los derechos de importación de la sal en las Aduanas de Buenaventura y Tumaco.

La rebaja se hará por décimas partes mensuales, á contar desde el 2 de enero próximo, de acuerdo con el artículo 205 de la Constitución.

[e] Decreto n° 299 de 12 de marzo de 1901. ("Diario Oficial" de 23 de marzo de 1901, n° 11449).—ART. 3.—Fíjase en $4 el derecho de importación en las aduanas de la República por cada doce y medio kilogramos de la sal extranjera.

Por decreto ejecutivo podrá reducirse este gravamen en las Aduanas de Buenaventura y Tumaco. Quedan reformados en estos términos los artículos 1° del Decreto n° 11 de 1901 y 1° de la Tarifa de Aduanas.

[f] Fuera del aumento sobre el "vino de San Rafael medicinal," que expresa el decreto 453 de 1893 que se reproduce á continuación de esta tarifa.

[a] I. Decreto nº 438, de 28 de septiembre de 1897, prohibiendo la importación de fósforos y materias primas destinadas á su fabricación. ("Diario Oficial" de 5 de octubre de 1897, nº 10461.)—ART. 1º. Prohíbese desde el dia 8 de octubre de 1897 próximo en adelante, la importación al territorio de la República de toda clase de fósforos y de las siguientes materias primas y objetos destinados á la fabricación y empaque de los mismos, á saber:

1º. Fósforo común.
2º. Fósforo rojo.
3º. Vástagos de madera ó cerilla.
4º. Cajetillas de cartón.
5º. Cartón preparado para la fabricación de cajetillas.

ART. 2º. Los fósforos y las materias enumeradas que se importen después de la fecha indicada serán declarados de contrabando y decomisados de acuerdo con las disposiciones sobre Aduanas: bien entendido que la mitad del valor de los contrabandos será destinada para los denunciantes y aprehensores y la otra mitad para el dueño del privilegio para la fabricación y venta de fósforos.

II. Resolución de 30 de diciembre de 1898, declarando libre el comercio de fósforos ("Diario Oficial" de 11 de enero de 1899, nº 10857). Por la presente resolución se declaran libres la fabricación, importación y comercio de fósforos, actos que continuarán regidos por las leyes vigentes.

III. Resolución de 18 de enero de 1899 sobre fósforos. ("Diario Oficial" de 24 de enero de 1899.) Suspéndense los efectos de la resolución dictada por el Ministerio de Hacienda el día 30 de diciembre último, por la cual se declara libre el comercio de los fósforos.

[b] Orden ministerial de 18 de octubre de 1897, nº 28494, relativa al régimen aduanero aplicable al carburo de calcio y al yodolite ("Diario Oficial" de 11 de diciembre de 1897, nº 10510). El carburo de calcio se clasificará en la 3ª clase de la Tarifa de Aduanas y el yodolite en la 4ª clase de la misma, ó sea á razón de 2½ y 5 centavos respectivamente.

[c] Fuera del aumento que sobre los derechos de algunas de estas mercaderías debe hacerse conforme al Decreto 453 de 1893, que se reproduce á continuación de esta tarifa.

[d] Fuera del aumento que expresa el Decreto 453 de 1893, que se reproduce á continuación de esta tarifa.

	Que arrojen hasta 100 kilogramos de peso	.20

[a] Resolución de 23 de febrero de 1895, sobre clasificación de machetes y cuchillos. ("Diario Oficial" nº 9706 de 28 de febrero de 1895.) Las aduanas clasificarán, de acuerdo con lo que se expresa enseguida, los cuchillos y machetes que se importen en lo sucesivo, y los importados respecto de los cuales estén pendientes en aquellas oficinas las liquidaciones de derechos:

Los "calabozos, agüinches y demás machetes para desmontar," y los "machetes ó cuchillos de monte" cuya longitud no sea mayor de 40 centímetros (40 pulgadas granadinas), corresponden á la cuarta clase de la tarifa de aduanas, gravada con 5 centavos por kilogramo.

Los cuchillos para artes y oficios, como los de encuadernación, zapatería y los peculiares á trabajos de campo diferentes de los de desmontar y los de monte de que se ha hablado, son de la sexta clase, que tiene asignado el impuesto de 20 centavos.

Los machetes y peinillas para el cinto distintos de los que se usen en la milicia, los puñales y los demás semejantes ó de naturaleza análoga, son armas blancas de la clase décima cuarta que pagan $1 por kilogramo.

Los machetes, peinillas y espadas que se usan en la milicia son de prohibida importación, como armas de guerra.

Los cuchillos comunes para el servicio de mesa son de la octava clase; y los que tienen mangos de marfil, nácar, electro-plata y metal británico, pertenecen a la clase décima cuarta.

Los cuchillos y machetes no mencionados en los párrafos que preceden son de la octava clase.

Cuando los mangos, las cubiertas ú otra de las partes de los machetes ó cuchillos, etc., fueren de plata ú otra materia diferente de las que se emplean para ellos ordinariamente, y ésta sea por su peso y demás circumstancias la que causara mayores derechos si estuviera sóla, al tenor de la resolución de 10 de febrero de 1887 ("Diaro Oficial" nº 6958), se reputarán comprendidos en la clase á que correspondan tales derechos.

[b] Resolución de 10 de mayo de 1895, aclarando la disposición relativa á los machetes ó cuchillos de monte. ("Diario Oficial" nº 9753, de 17 de mayo de 1895.) Al fijarse en la ley nº 129 de 1888 el derecho de importación sobre los machetes ó cuchillos de monte hasta de 20 pulgadas de longitud, fue la mente del legislador la de referirse á la medida inglesa de esta denominación, por ser ella la que sirve generalmente de base en los catálogos de diseños que de tales artículos publican las fábricas que producen los que de ordinario se traen á este país; la que se usa, por tanto, en las notas de pedido y en las respectivas facturas comerciales; y la que se emplea por lo común en las compras y ventas que se hacen en las plazas mercantiles de la República.

"En consecuencia, las aduanas reputarán como de la cuarta clase de la tarifa, para el cobro de los derechos de importación, los machetes ó cuchillos de monte cuya hoja no tenga una longitud mayor de 50 centímetros y 8 milímetros, equivalentes á 20 pulgadas inglesas."

245	Los efectos que para su uso traigan consigo ó hagan traer los Ministros públicos ó agentes diplomáticos extranjeros que se acrediten cerca del Gobierno de la República, siempre que las naciones á que pertenezcan concedan igual exención á los ministros y agentes diplomáticos de la República y que se cumpla con los requisitos que la ley exija sobre la materia	Libres.
246	Los equipajes de los ministros y agentes diplomáticos de la República que regresen á ésta, hasta el peso de 500 kilogramos, serán libres de derechos, siempre que los traigan consigo y que declaren bajo su palabra de honor que no traen en dichos equipajes artículos para hacer con ellos operaciones comerciales. (Ley 36 de 1886.)	Libres.
247	Los muebles usados que introduzcan los enviados extraordinarios y ministros plenipotenciarios de Colombia, á su regreso al país, pagarán 1 centavo por kilogramo. (Ley 129 de 1888.)	.01
248	Las producciones naturales del Ecuador, los Estados Unidos de Venezuela, el Perú y demás naciones á las cuales se haya concedido ó se concediere franquicia con carácter de reciprocidad por tratados públicos	Libres.
249	Los equipajes de los pasajeros hasta el peso de 150 kilogramos por persona, siempre que los efectos sean evidentemente de su uso, y sean presentados por ellos mismos al tiempo de pasar por las aduanas y entrar en el territorio nacional. Por el exceso sin factura pagarán como las mercaderías de la clase más gravada de esta tarifa	[b]Libres.
250	Todo artesano ó agricultor que viniere á trabajar en el país tiene derecho, además de su equipaje, á introducir libres de impuesto hasta 100 kilogramos de peso en las herramientas necesarias para su oficio á juicio del Gobierno. (Ley 65 de 1887.)	[a]Libres.
251	Todos los artículos no mencionados en esta tarifa pagarán	1.00
	PARÁGRAFO.—Dichas mercaderías forman, en consecuencia, una clase libre del impuesto y catorce gravadas con 1, 2½, 5, 10, 20, 30, 40, 50, 60, 70, 80, 90, 100, y 120 centavos respectivamente; y se denominarán por su orden 1ª, 2ª, 3ª, etc.[c]	
	Por el Ministerio de Hacienda se formará y publicará un resumen de la tarifa, dividiéndola en las expresadas clases.	

---

[a] Puera del amento que expressa el decreto 453 de 1893, que se reproduce á continuación de esta tarifa.

[b] Véase página 860.

Se mantienen en el Código de Aduanas todas las disposiciones hasta ahora vigentes que designan los artículos de prohibida importación, ya por determinadas aduanas, ya por todas las de la República.

Es absolutamente prohibida la importación en la República de bastones, paraguas, etc., en que esté oculto á la vista el estoque, puñal ó aparato con que se pueda herir ó hacer daño á las personas.

Es igualmente prohibida, menos para el Gobierno Nacional, la importación de los siguientes artículos:

Cañones de artillería de cualquiera forma ó clase; ametralladoras de cualquiera forma, rifles, carabinas y demás armas de precisión;

Espadas, sable-espadas, sables y lanzas de caballería, cápsulas, balas, granadas y otros proyectiles propios para las armas de fuego mencionadas;

Rifles, fusiles, chopos, escopetas y otras armas de guerra, que no sean especial y necesariamente adecuadas para la caza;

Cartucheras, tahalíes, y toda clase de fornituras propias para soldados;

Y en general todo instrumento, aparato ú objeto que, no siendo naturalmente propio para la defensa individual, sea por su naturaleza y objeto adecuado para la guerra ó el armamento ó equipo de tropa;

Es prohibida la importación de moneda falsa y la extranjera de ley inferior á la de 0,900 y de aparatos para fabricar moneda; así como la moneda nacional de cualquiera denominación y metal, con excepción de la de oro y plata de 0,900, y los esqueletos para billetes del Banco Nacional (Leyes 36 de 1886 y 107 de 1887); pero el Gobierno está autorizado por la Ley 41 de 1888 para permitir "la introducción por las Aduanas de la República de toda moneda legítima á la ley de ochocientos treinta y cinco milésimos (0.835)."[d]

El comercio de tránsito por el territorio nacional, de la moneda falsa y de los aparatos, armas y municiones de prohibida importación, y el de nitroglicerina, es igualmente prohibido.

DERECHOS APLICABLES AL TABACO.

1. *Ley nº 72 de 16 de noviembre de 1894, por la cual se deroga la nº 85 de 1892 y se grava el consumo del tabaco.*

["Diario Oficial" nº 9652, de 12 de diciembre de 1894.]

ARTÍCULO 1º. El tabaco que se importe al pais quedará gravado así:

Cada kilogramo de cigarros, con cuatro pesos.

Cada kilogramo de cigarrillos, con tres pesos.

Cada kilogramo de picadura ó de tabaco en cualquiera otra forma, con dos pesos.

No obstante lo dispuesto en este artículo, el Gobierno queda autorizado para reservarse, si lo creyere conveniente, por el término de seis años, contados desde la sancíon de la presente ley, el derecho de importar y fabricar cigarrillos; y puede, en consecuencia, enajenar la renta que de tal derecho se derive. El contrato de arrendamiento debe celebrarse en licitación pública, con las formalidades del Código Fiscal sobre arrendamiento de rentas, anunciando aquella con ciento ochenta días de anticipación, por lo menos.

En los contratos de que habla este artículo no se hará uso del derecho de tanto, como tampoco en ningún remate de rentas.

Al vencimiento del contrato de arrendamiento, toda existencia de cigarrillos y de materias primas para la fabricación de éstas quedará sujeta al pago de un impuesto equivalente á los derechos de importación de que habla este artículo.

ART. 2º. Es completamente libre la produccíon y exportación de tabaco del país, sin otra condición que la de pagar un impuesto sobre el consumo, que será hasta de un peso cincuenta centavos ($1.50) por cada doce y medio kilogramos para los cigarros y el tabaco en rama de primera calidad, y en proporción para las calidades inferiores.

---

[a] "Por equipaje se entienden los objetos que un viajero trae consigo en el mismo buque en que llega, y que son aplicables á su uso particular, á saber: la ropa, el calzado, el reloj, la cama, la montura, las armas y los instrumentos de su profesión."

"Los efectos ya usados que, además del equipaje, se admiten á los inmigrantes, libres de derechos, son: el mobiliario de casa y las herramientas y demás instrumentos de su oficio, pero de ningún modo artículos de comercio." (Art. 131 del Código Fiscal.)

Para gozar de esta última exención debe procederse como indican los artículos 132 y 133 del mismo Código.

[b] Para gozar de esta exención debe procederse de acuerdo con el decreto 523 de 1887. ("Diario Oficial" nº 7135.)

[c] Además de estas clases hay las de la sal y el tabaco. (Leyes 36 de 1886 y 85 de 1892.)

[d] Véase el decreto nº 373 de 1888. ("Diario Oficial" 7363.)

El gravamen deberá establecerlo cada Asamblea del modo que juzgue más conveniente, atendidas las circunstancias de cada Departamento, y la manera como la industria está allí establecida, pudiendo, en consecuencia, hacer la imposición ya sobre el tabaco que se dé á la venta, ya sobre el que se elabore ó prepare en alguna forma, ya sobre las fábricas, almacenes, tiendas ó sitios de expendio.

Art. 3º. El producto líquido del impuesto sobre el consumo de tabaco del país se distribuirá así: el 60 por ciento para el departamento y el 40 por ciento para los municipios.

El producto de los derechos de aduana que esta ley señala para los cigarrillos que se introduzcan del exterior, ingresará á las arcas nacionales.

Art. 4º. La renta de consumo de tabaco del país que por esta ley se establece, se administrará por medio de remates; y éstos se harán por distritos. Sólo en caso de no poder efectuarse los remates, administrarán los departamentos directamente dicha renta, según lo determinaren las ordenanzas respectivas.

Art. 5º. Derógase la Ley nº 85 de 10 de diciembre de 1892, que grava el consumo del tabaco.

II. *Decreto nº 594, de 12 de diciembre de 1899, por el cual se fijan los derechos de importación del tabaco en sus diferentes formas y del papel especial de fumar para cigarrillos.*

["Diario Oficial" de 2 de enero de 1900, nº 11179.]

Artículo único. Desde que sea declarado en vigor el artículo 1º del Decreto nº 559, de 20 de noviembre último ("Diario Oficial" nº 11154), "sobre abolición del monopolio de cigarrillos," el tabaco y el papel de fumar para cigarrillos quedarán gravados así:

Cada kilogramo de cigarros, con cinco pesos	$5.00
Cada kilogramo de cigarrillos, con cinco pesos	5.00
Cada kilogramo de tabaco en picadura ó en cualquiera otra forma, con cuatro pesos cincuenta centavos	4.50
Cada kilogramo de papel de fumar para cigarillos, con cincuenta centavos	.50

III. *Decreto nº 400 de 9 abril de 1901, relativo á la importacion del tabaco.*

["Diario Oficial" de 18 de abril de 1901, nº 11466.]

Artículo 1º.—Las Aduanas de la República cobrarán por el tabaco en sus diferentes formas y materias primas necesarias para la elaboración de cigarillos que se importen lo siguiente, sin ninguna otra clase de derechos adicionales establecidos hasta hoy:

Por cada kilogramo de cigarros, cinco pesos ($5);

Por cada kilogramo de cigarrillos, cinco pesos ($6);

Por cada kilogramo de picadura de tabaco para cigarrillos, tres pesos ($3);

Por cada kilogramo de tabaco en formas de las no mencionadas, cuatro pesos cincuenta centavos ($4.50);

Por cada kilogramo de papel especial de fumar para cigarrillos, cincuenta centavos $0.50).

§ Las marquillas ó papel timbrado para formar los paquetes, seguirán perteneciendo á la sexta clase de la tarifa vigente por considerárseles como etiquetas impresas.

Art. 2º.—Queda en estos términos reformado y aclarado el decreto legislativo nº 594 de 12 de diciembre de 1899, y así principiará a regir desde que sea conocido en las Aduanas de la Republica.

RESUMEN DE TARIFA DE ADUANAS POR CLASES.

Las clases de la tarifa según las cuotas de derechos que en ella tienen asignadas las mercaderías, son:

1ª. Libre de derechos.
2ª. Gravada con 1 centavo por kilogramo.
3ª. Gravada con $2\frac{1}{2}$ centavos por kilogramo.
4ª. Gravada con 10 centavos por kilogramo.
5ª. Gravada con 10 centavos por kilogramo.
6ª. Gravada con 20 centavos por kilogramo.
7ª. Gravada con 30 centavos por kilogramo.
8ª. Gravada con 40 centavos por kilogramo.
9ª. Gravada con 50 centavos por kilogramo.
10ª. Gravada con 60 centavos por kilogramo.
11ª. Gravada con 70 centavos por kilogramo.

---

[a] Fuera del aumento que expresa el decreto 453 de 1893. que sigue á este resumen.

13ª. Gravada con 80 centavos por kilogramo.
13ª. Gravada con 90 centavos por kilogramo.
14ª. Gravada con 100 centavos por kilogramo.
15ª. Gravada con 120[a] centavos por kilogramo.

Hay además la de sal, gravada con $4 por cada 12½ kilogramos, y la del tabaco con los derechos que le asigna la legislación que precede á este resumen.

Estos derechos están sujetos a las rebajas y recargo que se expresan al principio de la tarifa que precede.

REPRODUCCIONES Á QUE HACEN REFERENCIA ALGUNAS DE LAS NOTAS DE LA TARIFA QUE PRECEDE.

A. DISPOSICIONES SOBRE AUMENTO Y DISMINUCIÓN DE LOS DERECHOS DE ADUANA.

I. *Decreto número 453 de 1893.*

[10 de febrero.]

El Vice-presidente de la República encargado del Poder Ejecutivo, en ejecución del artículo 5° de la ley 93 de 1892, y del último de la Ley 109 del mismo año ("Diario Official," 9020 y 9034), Decreta:

Artículo 1°. Los derechos de importación que la Tarifa de Aduanas asigna á las mercaderías que se van á mencionar, se aumentará mensualmente desde el 16 de marzo hasta el 16 de diciembre de este año, en que quedará completo el definitivo aumento, con las siguientes cantidades por cada kilogramo:

Con 5 centavos, los del brandy, el rom, el whiskey, la ginebra, el rosoli y los líquidos condensados para fabricar estas bebidas; los vinos que se hallan comprendidos en la octava clase de la tarifa; y las mercaderías que componen la décima quinta clase.

Y con 1 centavo, los de todas las especialidades farmacéuticas, como vinos, jarabes, píldoras, pomadas, elixires, grajeas, etc., y todos los medicamentos patentados.

Art. 2°. El aumento de los derechos de que trata el artículo anterior, no está sujeto á las rebajas en las Aduanas de Buenaventura y Tumaco, que decretó la ley 10 de 1888, con exclusiva referencia á la tarifa que entonces regía; ni al recargo del 25 por ciento adicional que expresan las leyes 88 de 1886 y 99 de 1888.

Art. 3°. Dicho aumento se liquidará con separación de los derechos que fijan las disposiciones anteriores sobre tarifa de aduanas, y se dividirá en dos partes iguales, de las cuales la una se remitirá al Banco Nacional inmediatamente que se recaude.

Art. 4°. El presente decreto no puede ser revocado ni reformado sino por ley, de acuerdo con lo que en este sentido prescribe la 109 de 1892, ya citada.

Dado en Bogotá, á 10 de febrero de 1893.

M. A. Caro.
El Ministro de Hacienda.
Pedro Bravo.

II. *Circular número 24810 de 25 de enero de 1895.*

["Diario Oficial," nº 9695 de 1º de febrero de 1895.]

En virtud de la presente circular, el total aumento de los derechos de algunas mercancías, que se ordenó por el decreto nº 453 de 10 de febrero de 1893, debe irse disminuyendo mensualmente por décimas partes desde el 20 de febrero próximo en adelante; y de igual modo debe procederse para disminuir, desde el 21 del mismo febrero, la diferencia entre la totalidad del aumento de los derechos sobre el tabaco de que trata la resolución de 9 de marzo de 1893 y los que asigna el artículo 1° de la ley 72 de 1894; exceptuando los cigarillos y la picadura, que son de prohibida importación por los particulares, por haberse reservado el Gobierno la fabricación é introducción de aquellos.

III. *Ley número 160 de 28 de diciembre de 1896, aumentando algunas contribuciones nacionales.*

["Diario Oficial" de 12 de enero de 1897, nº 10233.]

Artículo 1. Auméntanse en veinte por ciento (20%) los derechos de importación que se cobran en las aduanas de la República sobre los artículos comprendidos en las clases segunda á décima tercia inclusive, y en cincuenta por ciento (50%) sobre los artículos comprendidos en las clases décima cuarta y décima quinta de la tarifa vigente.

---

[a] Fluera del aumento que expusa el decreto 453 de 1893, que sigue á este resumen.

Art. 2°. Créase la clase décima sexta de la Tarifa de Aduanas, que pagará tres pesos ($3) por kilogramo, y en la cual se comprenden los artículos siguientes:

Armas blancas, de fuego ó de cualquiera otra clase, exclusive las escopetas. Los brocatos y demás géneros de oro, plata ú otros metales, así como los hilos de las mismas materias;

Artículos de perfumería y tocador como esencias, cremas y jabones perfumados;

Oro y plata en cualquiera forma, excepto en monedas y barras;

Piedras preciosas y naipes.

Art. 3°. El aumento de que trata el artículo 1° de esta ley se cobrará sobre los derechos primitivos fijados por la ley 36 de 1886 y en los términos del artículo 205 de la Constitución.[a]

Art. 4°. Exceptúanse del aumento de los derechos de importación establecido por el arttículo 1°:

El carbón mineral, que pagará medio centavo por kilogramo;

Las substancias que se introduzcan para la fabricación del hielo, que también pagarán medio centavo (0, 0½ c^s.) por kilogramo;

Los crisoles para fundición;

Las prensas y máquinas de imprenta;

El papel de imprenta sin cola;

Los rieles y elementos para material fijo de vías férreas públicas ó particulares que no disfruten de excepción de derechos;

Los buques armados ó desarmados y sus respectivas maquinarias;

Algodón en fulas azules y en telas blancas ó crudas con parte blanca sin labrado, costura ni bordado alguno, como las conocidas con los nombres de bogotanas, calicós, liencillos, madapolanes, bramantes, driles, zarazas y otros de igual calidad.

Parágrafo.—Lo dispuesto en la presente ley no altera la resolución dictada por el Ministerio de Hacienda con fecha 6 de julio de 1895, relativa á la clase.

Art. 5. Autorízase al Gobierno para refundir en una misma clase de la Tarifa de Aduanas los artículos similares que se hallen distribuídos en varias clases.

Art. 6. Estando pagado el servicio de correos por la Unión Postal Universal, se restablece el derecho de toneladas creado por el artículo 192 del Código Fiscal, derecho que se cobrará en lo sucesivo por las aduanas respectivas á razón de un peso cincuenta centavos ($1.50) por tonelada y en los términos fijados por el artículo citado.

Parágrafo.—En consecuencia, serán prescindidos por el Gobierno los convenios celebrados para la conducción de correspondencia y consiguiente exención de derechos de tonelada, conforme á los artículos 11 y 22 de la Ley 109 de 1880, los cuales quedan derogados.

Art. 7. Las franquicias aduaneras concedidas por la ley ó por contratos celebrados por el Poder Ejecutivo á empresas ferrocarrileras, de navegación, fábricas industriales, etc., en las cuales no se hayan hecho especificaciones y se hable de materiales y útiles para dichas empresas, sólo comprenden la maquinaria y sus repuestos, rieles, clavazón, herramientas, material rodante y útiles para telégrafos. Los demás efectos que se introduzcan quedan sujetos al pago de derechos de importación según la clase de la tarifa á que correspondan.

Art. 8. Autorízase al Gobierno para establecer un derecho hasta de dos pesos ($2) sobre las encomiendas postales, proporcionalmente al peso de éstas y en cuanto lo permitan las convenciones sobre la materia.

Art. 9. Las mercaderías que vinieren dentro de los equipajes de los viajeros, aún cuando dichos equipajes no alcancen el límite de ciento cincuenta kilogramos de peso, pagarán derechos conforme á la clase 16^a.

Parágrafo.—Todo artesano ó agricultor que viniere á trabajar en el país tiene derecho á introducir, además de su equipaje, hasta cien kilogramos de peso libres de impuesto, y las herramientas necesarias para su oficio á juicio del Gobierno.

Art. 10. Autorízase al Poder Ejecutivo para disminuir ó suprimir el impuesto de que trata esta ley sobre las mercancías que se introduzcan por la Aduana de Tumaco, si así conviniere á los intereses del fisco.

Art. 11. Del 1° de enero de 1897 en adelante, los precios de las diferentes clases de papel sellado y de estampillas de timbre nacional serán los siguientes:

Primera clase	$0. 30
Segunda clase	1. 00
Tercera clase	2. 00

Parágrafo.—El Gobierno dictará las medidas conducentes á que el papel sellado y las estampillas no se usen sin una contramarca especial que exprese el nuevo precio.

---

[a] En virtud del artículo n° 205 de la Constitución, todo aumento ó disminución de derechos no podrá llevarse á cabo más que por décimas partes y tan sólo tres meses después de la promulgación de la ley.

IV. *Resolución ministerial de fecha 6 de febrero de 1897, corrigiendo una omisión padecida en el texto de la ley 160 de 28 de diciembre de 1896.*

["Diario Oficial" de 9 de febrero de 1897, nº. 10257.]

Habiéndose padecido un error en el texto de la ley 160 de 28 diciembre de 1896, publicada en el "Diario Oficial" de 12 de enero de 1897, nº 10233[a], esta ley se completa como sigue:

El parágrafo único del artículo 4 se entenderá redactado de la siguiente manera:

"PARÁGRAFO.—Lo dispuesto en la presente ley no altera la resolución dictada por el Ministerio de Hacienda con fecha 6 de julio de 1895, relativa á la clase de la tarifa á que corresponden los artículos de la empresa eléctrica de que trata dicha resolución, y dichos artículos quedan además exentos del recargo que se establece por la presente ley."

V. *Circular del Ministerio de Hacienda, de 27 de febrero de 1897, nº. 27829, relativa á la fecha en que ha de ejecutarse el aumento y la disminución de los derechos de aduana de que trata la ley 160 de 1896,*[a] *y modo como deben hacerse las respectivas liquidaciones.*

["Diario Oficial" de 27 de febrero de 1897, nº. 10273.]

El aumento y la disminución de los derechos de importación de que tratan los artículos 1º, 2º, 3º y 4º de la ley 160 de 1896 comenzarán á ejecutarse el día 19 de abril del presente año, de acuerdo con los artículos 205 de la Constitución y 61, 62, 64 y 65 de la ley 149 de 1888.

Dicho aumento, ó sea la cantidad que ha de cobrarse además de los derechos que determina la ley 36 de 1886, con las reformas que se le han hecho hasta ahora, inclusive las del artículo 4º de la citada ley 160, deberá liquidarse separadamente, computándolo sólo sobre los derechos primitivos fijados en la misma ley 36 sin las referidas reformas.

Verificado ésto, se sumará el enunciado aumento con los demás derechos de que se ha hablado y se recargará el total de la liquidación con el 25 por ciento que expresan los artículos 1º de la ley 88 de 1886 y 1º de la ley 185 de 1896.

VI. *Decreto nº. 140, de 13 de abril de 1897, sobre derechos de importación en la aduana de Tumaco.*

["Diario Oficial" de 15 de abril de 1897, nº. 10313.]

En virtud del presente decreto, continuarán cobrándose en la aduana de Tumaco los mismos derechos de importación que se exigen en la actualidad, mientras el Poder Ejecutivo no disponga que en aquel puerto se ponga en vigor en todo ó en parte el impuesto de que trata la ley nº. 160 de 1896.[a]

VII. *Circular de 3 de mayo de 1897, relativa al impuesto del 25 por ciento sobre las liquidaciones de derechos de aduana.*

["Diario Oficial" de 17 de mayo de 1897, nº. 10340.]

En las aduanas se cobran sobre las mercaderías que llegan al país, por una parte, los derechos de importación propiamente dichos, que son los que siempre han correspondido al Tesoro Nacional y se fijan en la respectiva tarifa; y por otra parte, un impuesto de 25 por ciento computado sobre la liquidación de tales derechos, que pertenecía á los departamentos y se remitía directamente y bajo estricta responsabilidad de los administradores de aduanas á los empleados superiores de hacienda de aquellas secciones de la República.

Los enunciados derechos se fijaron primitivamente en dicha tarifa, y es sobre ellos y prescindiendo de las alteraciones que se les han hecho por varias leyes y por decretos expedidos en virtud de autorizaciones conferidas al Gobierno, que se ha dispuesto se computen los aumentos de que tratan los artículos 1º, 3º y 4º de la ley 160 de 1896, para dar así estricto cumplimiento al mismo artículo 3º. Pero el 25 por ciento adicional no puede liquidarse sobre los derechos primitivos únicamente, por que la ley 88 de 1886 que lo estableció dice terminantemente en su artículo 1º que ese 25 por ciento se compute sobre las liquidaciones; de donde se deduce recta y forzosamente que él debe recaer no sobre los derechos que existían cuando se estableció, sino sobre los derechos que existan cuando se hagan las liquidaciones; y en la actualidad, estos derechos son los primitivos fijados por la ley 36 de 1886 aumentados ó disminuidos en las proporciones determinadas por las varias leyes modificativas de ésta.

---

[a] Véase el anterior nº. III.

VIII. *Decreto nº 506 de 1º de mayo de 1901, por el cual se dispone la manera de cobrar los derechos de importación en la Aduana de Cúcuta.*

["Diario Oficial" de 21 de mayo de 1901, nº 11488.]

ARTÍCULO 1º. Desde que el presente decreto llegue á conocimiento del Administrador Tesorero de la Aduana de Cúcuta, el cobro de los derechos de importación en la referida Aduana se hará en la cuantía fijada por el Decreto legislativo nº 507, de esta misma fecha, y en la siguiente proporción. Cincuenta por ciento (50 por 100) en moneda de plata á la ley de 0.835, y cincuenta por ciento (50 por 100) en papel moneda.

* * * * * * *

ART. 4º. Quedan derogados por el presente los decretos y demás disposiciones dictadas por los Jefes Civiles y Militares del Departamento de Santander, sobre la manera de cobrar los derechos de importación en la Aduana de Cúcuta y sobre la cuantía de los mismos derechos.

IX. *Decreto nº 507 de 1º de mayo de 1901, sobre aumento de los derechos de importación de las mercaderías extranjeras en las Aduanas de la República.*

["Diario Oficial" de 21 de mayo de 1901, nº 11488.]

ARTÍCULO 1º. Desde que el presente decreto llegue á conocimiento de cada uno de los respectivos Administradores de las Aduanas de la República, se cobrará en estas Oficinas, sobre todos las artículos de importación gravados conforme á las leyes y tarifas vigentes, un impuesto doble del que actualmente pagan.

ART. 2º. Por el Ministerio de Hacienda se procederá inmediatamente á la formación de una nueva Tarifa de Aduanas en que se graven los artículos de importación de conformidad con lo que en este decreto se dispone, pero introduciendo las reformas que la experiencia y el dictamen de los principales centros comerciales hayan aconsejado, y las que fueran necesarias para fomentar el desarrollo de las industrias nacionales y para facilitar al comercio y á las oficinas públicas encargadas de la recaudación de este impuesto la manera de llevar su contabilidad y hacer sus liquidaciones.

ART. 3º. Una vez formada la Tarifa de que habla el artículo precedente, y aprobada que sea por Decreto legislativo, el cobro de los derechos de importación se hará de acuerdo con la citada Tarifa y desde la fecha que en el decreto aprobatorio se señale.

X. *Decreto nº 1016 de 16 de agosto de 1901, por el cual se establece un recargo sobre ciertas cuentas por derechos de importación.*

["Diario Oficial" de 23 de agosto de 1901, nº 11544.]

ARTÍCULO ÚNICO. Toda cuenta por derechos de importación, cuyo valor no sea cubierto dentro de los ocho días que señala el artículo 146 del Código Fiscal, tendrá un recargo de diez (10) por ciento, que se tendrá como contribución de guerra, sin perjuicio del cobro de los intereses sobre el valor principal y sobre dicho recargo.

B. DISPOSICIONES RELATIVAS AL PAGO DE LOS DERECHOS DE ADUANA Y DE PUERTO.

I. *Circular nº 346, de 20 de diciembre de 1900, relativa al pago de los derechos de Aduana.*

["Diario Oficial" de 5 de febrero de 1901, nº 11412.]

Por decreto del Poder Ejecutivo se ha dispuesto que el pago de los derechos de importación y de exportación, que se causen en las Aduanas, se haga al contado en un veinte (20) por ciento, para atender á los gastos de esas mismas Oficinas y sus dependencias, y el resto, en letras á favor de la Tesoreria General con quince días de plazo.

II. *Decreto nº 370 de 1º de abril de 1901, sobre pago en oro de los derechos de puerto.*

["Diario Oficial" de 22 de abril de 1901, nº 11468.]

Artículo 1º. A contar del quince de mayo próximo, los derechos de puerto que causen los buques que lleguen á la República se pagarán en moneda de oro del país de la procedencia de los mismos buques, con excepción de los de faro, en aquellos faros que no sean de la exclusiva propiedad del Gobierno y cuyos proventos no correspondan integramente al mismo Gobierno, los cuales se seguirán pagando de la manera establecida en el Decreto número 62 de 18 de enero del presente año (Diario Oficial número 11403), lo mismo que los demás derechos de puerto que por contrato con los concesionarios ó por ley especial deben cubrirse en moneda corriente.

Art. 2º. Los derechos de puerto exceptuados en el artículo anterior podrán cobrarse en oro, siempre que los concesionarios de privilegios para el establecimiento de faros convengan, por medio de contratos celebrados con el Gobierno. en ceder al Tesoro nacional el cincuenta por ciento del producto neto de tales faros, y en ceder á la nación la propiedad de los mismos á la expiración del privilegio, ó dentro de un plazo equitativo y prudencial, y que los concesionarios de los otros privilegios, que permiten el cobro de derechos, como los de muelles, etc., convengan también en otorgar á la nación concesiones favorables, análogas á las exigidas para los faros.

DERECHOS DE EXPORTACIÓN.

1. *Decreto n° 63 de 18 de enero de 1901, por el cual se reforma y adiciona el articulo 1° del legislativo n° 777, de 11 de Junio de 1900, "que establece derechos de exportación sobre algunos artículos comerciales."*

[" Diario Oficial " de 22 de enero de 1901, nº 11403.]

Artículo 1º. Desde el dia 1º de marzo próximo se gravará la exportación de todo artículo de comercio que de la República se extraiga con destino á los mercados del exterior, del modo como se expresa en el artículo siguiente:

Art. 2º.	Cada quintal de café pilado pagará	$3.00
	Cada quintal de café en pergamino	2.50
	Cada quintal de caucho	5.00
	Cada quintal de cueros de res vacuna	3.00
	Cada quintal de cueros de cabra y similares	4.00
	Cada quintal de tagua ó marfil vegetal	1.00
	Cada quintal de divi-divi	.50
	Cada quintal de tabaco en rama	2.00
	Cada quintal de andullo	3.00
	Cada quintal de andullo manufacturado	5.00
	Cada quintal de algodón en rama	2.00
	Cada quintal de algodón desmotado	3.00
	Cada quintal de semillas	1.00
Art. 2º.	Cada racimo de plátanos	$0.20
	Cada kilogramo de pájaros disecados	10.00
	Cada kilogramo de plumas de garza	50.00
	Cada kilogramo de orquídeas (parásitas)	10.00
	Cada quintal de carey	5.00
	Cada quintal de bálsamo	5.00
	Cada quintal de acéite vegetal de canime	3.50
	Cada quintal de mora ó fuste	3.50
	Cada quintal de brasil ó tinte	.50
	Cada mil pies superficiales de cedro, galiavo, caoba ó cualquier otra madera de construcción	5.00
	Cada mil cocos	5.00
	Cada res vacuna	20.00

El oro, la platina y la plata en barras ensayadas, pagarán 2 por ciento del valor del certificado de fundición y ensaye, convertido en papel moneda al precio del cambio al tiempo de la exportación.

El oro en polvo, la platina, la plata no ensayada y el oro y platina en alhajas, acuñados en moneda ó en otra forma cualquiera, pagarán el 2 por ciento del valor del aseguro, convertido en papel moneda, del mismo modo.

Faltando los documentos de ensaye y aseguro, el oro pagará $0.20 por cada gramo, la platina $0.15, la plata $0.10 y el mineral en bruto $20 por tonelada.

Los artículos no mencionados que se manifiesten para la exportación serán avaluados por la sección de reconocimiento de la respectiva aduana, con aprobación del administrador de ella, y pagarán el 2 por ciento de su avalúo en papel moneda.

Art. 3º. Toda exportación que se intente hacer por los puertos de la República, deberá ser manifestada en la administración de la respectiva aduana en la misma forma y términos en que se ha hecho siempre con las importaciones, llenando además los requisitos que establece el decreto ejecutivo numero 789, de 2 de julio de 1900, "que reglamenta el cobro de los derechos de exportación."

Art. 4º. Los derechos sobre la exportación que se establecen por el presente decreto, se recaudarán por todo el tiempo que dure turbado el orden público; y cuando éste se haya restablecido, se continuarán recaudando para destinar su producto exclusivamente á la amortización del papel moneda hasta su extinción, siempre que el Congreso no disponga otra cosa.

Art. 5º. En los términos del presente decreto queda adicionado y reformado el artículo 1º del legislativo nº 777, de 11 de junio de 1900. ("Diario Oficial" nº 11291.)

II. *Decreto nº 205 de 15 de febrero de 1901, por el cual se reforma el legislativo nº 63 del mismo año, que establece un gravamen sobre algunos artículos de exportación.*

["Diario Oficial" de 21 de febrero de 1901, nº 11424.]

Artículo único. Redúcese á un peso ($1) el gravamen sobre cada kilogramo de orquídeas que se exporte por los puertos de la República.

En los términos del presente queda reformado el decreto número 63 de 1901.

III. *Decreto nº 368 de 1º de abril de 1901, sobre exportación de ganados.*

["Diario Oficial" de 25 de abril de 1901, nº 11471.]

Artículo 1º. Apruébase el decreto de 26 de enero de 1901, sobre exportación de ganados, expedido por el Jefe Civil y Militar del Departamento de Bolívar, y que á la letra dice:

"Art. 1º. Prohíbese la exportación al extranjero de ganado vacuno.

"Art. 2º. Los individuos que den al Intendente General, en calidad de empréstito sin interés, la suma en que se convenga con el Jefe Civil y Militar ó con el Secretario de Hacienda, podrán exportar ganados, pagando por cada res la suma de sesenta pesos ($60).

"Art. 3º. La suma dada en préstamo se les cubrirá con el producto de la contribución decretada, y cuando se haya terminado el pago, cesará el derecho de exportar."

* * * * * * * *

Art. 2º. Tan luego como el presente decreto legislativo llegue á conocimiento del Jefe Civil y Militar del Departamento de Bolívar y de los administradores de aduana, empezará á cobrarse un gravamen de veinte pesos ($20) en oro por cada cabeza de ganado que se exporte. Este gravamen seguirá cobrándose hasta tanto que el Congreso no disponga otra cosa.

Art. 3º. Los exportadores de ganado que hubieren celebrado contratos para exportarlo en consonancia con el decreto del Jefe Civil y Militar del Departamento de Bolívar, que por el presente se aprueba, podrán seguir exportándolo, pero mediante el pago del gravamen señalado en el artículo precedente. Para ese efecto se aplicarán las sumas dadas en préstamo al Gobierno, haciendo la conversión de las sumas anticipadas en papel moneda por moneda de oro, al precio del cambio vigente en la plaza de la respectiva aduana al tiempo de verificarse la exportación.

Art. 4º. A los exportadores prestamistas que no quisieren seguir exportando mediante el pago del nuevo gravamen en oro, se les hará inmediatamente la devolución de las sumas quo hubieren anticipado, con los intereses legales sobre el saldo que se les adeudare.

Art. 5º. En caso de que por razón de la vigencia del decreto legislativo número 63, de 18 de enero del presente año, se hubieren hecho exportaciones de ganado, pagando solamente un gravamen de veinte pesos ($20) en papel moneda por cada cabeza de ganado, á los exportadores prestamistas que hubieren hecho exportaciones durante ese mismo período, ó sea desde el 1º de marzo del presente año hasta el momento en que se ponga en vigor el presente decreto y el gravamen en oro que por él se establece, y hubieren pagado los sesenta pesos ($60) en papel moneda, pactados en los respectivos contratos, sólo se les cobrará á razón de veinte pesos ($20) como á los otros exportadores, y la diferencia de cuarenta pesos ($40) por cada cabeza, se imputará al saldo que les adeude el Gobierno y que debará aplicarse al pago de los derechos de las exportaciones que hicieren en lo futuro, ó que se les debe devolver al tenor de lo prescrito en el artículo precedente.

Queda reformado en los términos del presente el decreto legislativo número 63 de 18 de enero de 1901.

IV. *Decreto nº. 495, de 30 de abril de 1901, por el cual se dispone que el cobro de los derechos de exportación se haga en oro, para aplicarlos á la amortización del papel moneda.*

["Diario Oficial" de 21 de mayo de 1901, nº. 11488.]

ARTÍCULO 1º. Desde que el presente decreto llegue á conocimiento de los respectivos administradores de las aduanas de la República, el cobro de los derechos de exportación establecidos por los decretos arriba citados (decretos legislativos números 777, 63 y 421, de fechas 1º de junio de 1900, y 18 de enero y 12 de abril de 1901, respectivamente), se hará en oro, en la forma y cuantia que pasan á expresarse:

	Pesos oro.
Por cada quintal de café pilado	0.40
Por cada quintal de café en pergamino	.30
Por cada quintal de caucho	.60
Por cada quintal de cueros de res vacuna	.40
Por cada quintal de cueros de cabra y similares	.50
Por cada quintal de tagua ó marfil vegetal	.15
Por cada quintal de dividivi	.075
Por cada quintal de tabaco en rama	.20
Por cada quintal de andullo	.30
Por cada quintal de tabaco manufacturado	.50
Por cada quintal de algodón en rama	.20
Por cada quintal de algodón desmotado	.25
Por cada quintal de semillas	0.10
Por cada racimo de plátanos	.01
Por cada kilogramo de pájaros disecados	1.00
Por cada kilogramo de plumas de garza	6.00
Por cada kilogramo de parásitas (orquideas)	.10
Por cada kilogramo de carey	1.00
Por cada quintal de bálsamo	.80
Por cada quintal de mora ó fustete	.04
Por cada quintal de brasil ó tinte	.06
Por cada mil pies superficiales de cedro, galiavo, caoba ó cualesquiera otras maderas de construcción	1.60
Por cada mil cocos	.50
Por cada res vacuna	20.00

El oro, la platina y la plata en barras ensayadas, pagarán el 3 por ciento del valor del certificado de fundición y ensaye.

El oro en polvo, la platina, la plata no ensayada y el oro y la platina en alhajas, acuñados en monedas ó en otra forma no especificada, pagarán el 3 por ciento del valor del aseguro.

El mineral de oro y plata pagará 2 por ciento del valor del aseguro.

Faltando los documentos de ensaye y aseguro, el oro pagará $.003 por cada gramo, la platina $0.02, la plata $0.01 y el mineral en bruto $4 por tonelada.

Los artículos no mencionados que se manifiesten para la exportación serán avaluados por la sección de reconocimiento de la respectiva aduana, con aprobación del administrador de ella, y pagarán el 3 por ciento de su avalúo en oro.

ART. 2º. Por conducto del Ministerio de Hacienda dictará el Gobierno las medidas necesarias para que la recaudación del gravamen sobre la exportación se haga de manera fácil y eficaz y para que su producto ingrese íntegramente á la Tesorería de la Junta de Amortización, á fin de que ésta lo aplique á la amortización del papel moneda, en consonancia con las prescripciones del decreto legislativo nº. 418, de 12 de abril de 1901, todo de acuerdo con las indicaciones que sobre el particular hiciere la junta mencionada.

ART. 3º. En los términos del presente decreto quedan reformados y adicionados los decretos legislativos citados al principio.

V. *Decreto nº. 454, de 11 de octubre de 1895, sobre formalidades para el cobro de los derechos de exportación del café.*

["Diario Oficial," nº. 9849, de 21 de octubre de 1895.]

ARTÍCULO 1º. Además de las disposiciones vigentes sobre exportación, se observarán las que contiene el presente decreto.

ART. 2º. Concedido el permiso para cargar de que tratan los artículos 200 y 201 del Código Fiscal, se hará por el respectivo Jefe del Resguardo una visita especial del buque con el fin de cerciorarse de que en éste no hay artículos de exportación. A dicha visita concurrián también los empleados que expresan los artículos 57 y 58 del Código, siempre que así lo disponga el Administrador de la Aduana.

ART. 3º. Fuera del manifiesto general que debe presentar el consignatario del buque según el citado artículo 202, presentará cada exportador de café uno relativo á esta mercadería, en forma análoga á la de los que se emplean para la importación, con el objeto de que se pueda extender en él la diligencia de reconocimiento y la liquidación de derechos correspondientes.

ART. 4°. Todos los manifiestos de exportación de que se ha hablado se presentarán, por cuadruplicado, al Administrador de correos del lugar de la respectiva Aduana, dentro del término que ésta fije al extender el permiso para la carga del buque; y los que se refieran á café expresarán cual se halla pilado ó sin película, y cual no lo está. Inmediatamente dicho Administrador comparará entre sí todos los ejemplares de cada manifiesto y remitirá, sin demora, tres de ellos á la Aduana, y el otro lo reservará para enviarlo al Ministerio de Hacienda por el próximo correo. La Aduana dará á los ejemplares que reciba un destino igual al que para los de importación prescriben las disposiciones vigentes; procediendo sin tardanza al reconocimiento de los bultos.

ART. 5°. El reconocimiento se hará abriendo y examinando, de los bultos cuyo contenido no haya sido manifestado como de café sin película, los que la Aduana juzgue conveniente para impedir que el café pase como si fuera otra mercadería, ó como si tuviera película el que está sin ella; y verificando el peso de todos los bultos de café.

ART. 6°. Una vez reconocido el cargamento, la Aduana extenderá la liquidación de los derechos que se hayan causado, en los tres ejemplares del manifiesto que tenga en su poder, exigirá el pago y expedirá la licencia de embarque al pié de uno de aquellos documentos y lo devolverá el exportador luego que éste haya cubierto el impuesto.

Si el cargamento no hubiere causado derechos, se extenderá la licencia de embarque inmediatamente después de que sea reconocido.

ART. 7°. Dicha licencia no se entregará sin que previamente afiance el exportador la pronta entrega de un ejemplar del respectivo conocimiento de embarque.

ART. 8°. Las disposiciones sobre infracciones que contienen el artículo 325 del Código Fiscal, en su inciso 3°, y en el 9°, en cuanto se refiere á manifiestos; así como las penas con que ellas se castigan, y el procedimiento para imponerlas de acuerdo con lo que determinan las Secciones 3ª y 4ª del Capítulo 9°, Titulo 3°, Libro 1°, del Código Fiscal, se declarán extensivas á las exportaciones.

ART. 9°. Las reclamaciones relativas á hechos se resolverán de una manera análoga á la que determina para las importaciones el artículo 13 de la Ley 36 de 1886. En cuanto á las que se refieran á errores numéricos en las liquidaciones, ú otras conexionadas con puntos administrativos, se aplicarán también por analogía, lo mismo que en todos los demás casos de cualesquiera naturaleza no previstos en este Decreto, las disposiciones del artículo 143 y las otras del Código Fiscal relativas á importaciones, en cuanto no sean incompatibles.

Convenio de comercio y navegación entre Colombia y Francia.

En virtud de un arreglo comercial firmado en Bogotá el 30 de mayo de 1892 por los respectivos Plenipotenciarios de Colombia y Francia, las dos Altas Partes Contratantes se garantizan recíprocamente el trato de la nación más favorecida, por lo que respecta al establecimiento de sus súbditos y en materia de comercio y navegación, tanto á la importación, exportación y tránsito como, en general, á todo cuanto se refiera á los derechos de Aduana y á las operaciones comerciales, así como al ejercicio del comercio ó de la industria y al pago de las tasas afectas á este ejercicio.

En los términos del artículo 2, el referido arreglo entrará en vigor ocho días después del canje de las ratificaciones[a] continuando en vigor hasta la expiración de un año, contado desde el día en que una ú otra de las Altas Partes Contratantes lo hubiere denunciado.

COSTA RICA.

MODIFICACIONES DEL ARANCEL DE ADUANAS.

I.

DECRETO DEL 2 DE JULIO DE 1902.

ASCENSIÓN ESQUIVEL, Presidente Constitucional de la República de Costa Rica, en uso de las facultades que le confieren los artículos 1° del decreto n° 46 del 16 de julio de 1888 y el párrafo 2° del artículo 2° del decreto n° 7 del 14 de junio de 1901, decreta:

ARTÍCULO 1°.—Desde el día 10 del presente mes, inclusive, los artículos que á continuación se expresan, se aforarán con las cuotas siguientes:

	Colones.
Vino tinto para mesa, que contenga hasta 10 por ciento de alcohol:	
Cuando se importe en botellas, kilogramo	0.05
Cuando se importe en damajuanas ó barriles, kilogramo	.12
Vino blanco, no espumoso y los vinos generosos, secos ó dulces, que contengan hasta 15 por ciento de alcohol:	
Cuando se importen en botellas, kilogramo	.15
Cuando se importen en damajuanas ó barriles, kilogramo	.30
Vinos blancos, con excepción de los espumosos, ó tintos, secos ó dulces, cuando estén adicionados de otros vegetales aromáticos, como vinos llamados de Vermouth, el vino de moras (Blackberry wine), de mirtillo y otros, que contengan hasta 15 por ciento de alcohol:	
Cuando se importen en botellas, kilogramo	.20
Cuando se importen en barriles ó garafones, etc., kilogramo	.40

NOTA.—Por cada uno por ciento que exceda la riqueza alcohólica de la señalada como máximum para los vinos de las fracciones atrás descritas, siempre que no exceda de 20 por ciento, la aduana cobrará un derecho adicional de ocho milésimos de colón por kilogramo de peso bruto, en los vinos embotellados, y de veintitrés milésimos de colón en los otros envases (damajuanas y barriles).

Vinos espumosos, como el de Champagne y los de Moselle (sea cual fuere la graduación), kilogramo	1.50

NOTA.—En esta fracción ha de considerarse comprendido el vino de sidra.

Licores, aguardientes, ron, ginebra, whiskey y demás bebidas espirituosas

que contengan hasta 60 por ciento de alcohol:	Colones.
Cuando se importen embotellados, kilogramo	1.20
Cuando se importen en damajuanas ó barriles, kilogramo	2.40

NOTA.—Por cada uno por ciento que aumente la riqueza alcohólica de las bebidas contenidas en esta fracción, la aduana cobrará una cuota adicional en esta forma:

Sobre licores etc., embotellados, dos céntimos de colón; y sobre los envasados en barriles ó damajuanas, cinco céntimos de colón por cada kilogramo de peso bruto.

ART. 2°. Se entiende por aguardiente el producto espirituoso obtenido por la destilación de los jugos fermentados de frutos, granos ú otras materias sacarínas.

Para los efectos de cotización se reputan como aguardientes los caldos más ó menos espirituosos que contengan más de 20 por ciento de alcohol.

La riqueza alcohólica la determinará la aduana, ya sea por medio de la destilación ó por medio del alcoholómetro de Gay Lussac, con la reducción ó aumento que correspondan, según que la temperatura suba ó baje de 15° centígrados.

Para la reducción al tipo dado de 15° centígrados cuando la observación se haga á mayor temperatura se deducirán tres décimos al grado alcohólico para cada grado termométrico que exceda de los 15°, ó se aumentarán cuando la temperatura en el momento de la observación sea menor de 15°.

Los aguardientes que esta fracción comprende no han de contener sustancias medicamentosas—jarabes, aromas para usos de tocador, ni esencias de frutas.

Se reputarán como licores todas las bebidas alcohólicas que, bien por maceración ó destilación sobre semillas, cortezas, frutas ó plantas aromáticas ó por simple disolución de sus aceites esenciales tienen el aroma de aquellos vegetales, á la vez que un sabor muy dulce debido al jarabe que entra en su preparación.

ARTÍCULO 3°. Los aforos anteriores no están sujetos al 50 por ciento de aumento establecido por decreto de 27 de abril de mil novecientos uno y aprobado por la ley número 7 de 14 de junio del mismo año de 1901.

Dado en la Casa Presidencial, en San José, el día dos de julio de mil novecientos dos.

ASCENSIÓN ESQUIVEL.

El Secretario de Estado en el despacho de Hacienda y Comercio.

CLETO GONZÁLEZ VÍQUEZ.

II.

DECRETO DE 5 DE JULIO DE 1902.

El Congreso Constitucional de la República de Costa Rica, en uso de la atribución que le concede la fracción 4ª, artículo 94 de la Constitución, decreta:

ARTÍCULO. 1°. Desde la publicación de esta ley se aforarán los artículos que á continuación se expresan, de conformidad con las cuotas que aquí se determinan:

A. Muebles de madera ordinaria, no chapeada con hojas de madera fina, sencillamente labrados, que no tengan tallados ni piezas torneadas, ni respaldos ú otras piezas encorvadas ó dobladas al vapor, que no tengan espejos, aunque tengan asientos de rejilla de bejuco, veinticinco céntimos el kilogramo.

B. Muebles de madera ordinaria chapeada y los macizos de madera fina, aun cuando unos y otros tengan piezas talladas ó torneadas y asientos de rejilla de bejuco con espejos ó sin ellos, siempre que no estén tapizados, cuarenta y cinco céntimos el kilogramo.

C. Muebles de madera tapizados con piel ó tela que no contenga seda, aun cuando tengan sólo una banda de adorno ó fleco de seda, siempre que la totalidad del tapiz, propriamente dicho, no contenga seda, 60 céntimos el kilogramo.

D. Muebles de madera, cuando estén tapizados con seda ó con tela que contenga seda, 75 céntimos el kilogramo.

E. Muebles de todas clases y materias, cuando tengan embutidos de madera, concha, marfil, carey ó metal, 1 colón el kilogramo.

F. Muebles de madera de vuelta, conocidos bajo el nombre de muebles de Viena y los de mimbre ó bejuco, de estilo chino, 51 céntimos el kilogramo.

G. Escobas de mimbre, junco, caña ú otras fibras vegetales, 30 céntimos el kilogramo.

H. Sebo para jabón, 2 céntimos el kilogramo.
Soda cáustica, 2 céntimos el kilogramo.
Pez rubia, 1 céntimo el kilogramo.

ART. 2°. Los embutidos á que se refiere la fracción E del artículo 1°, son aquellos que constituyen el más delicado trabajo de marquetería, por lo que comprende los muebles con incrustaciones de celuloide, coral, mosaico de ónix, madera ó pasta, etc., y no han de considerarse incluidos en dicha fracción E los muebles que tengan embutida una placa, tiradores ó bocallaves, ni aquellos que tengan adornos de metal ordinario sobrepuestos á manera de molduras, rosetones ó tallados.

ART. 3°. Los espejos que forman parte de un mueble son aquellos que siendo parte integrante de él no puede separárseles sin que éste quede incompleto; por lo tanto, no deben considerarse como parte de muebles los espejos que, como los que se colocan sobre una consola, no están en manera alguna adheridos al mueble y pueden usarse completamente aislados.

ART. 4°. Las maderas que en relación á muebles considera esta ley como finas, son: la caoba, el ébano, el granadillo, el jazmín, el nogal, el palisandro ó palo santo, la madera de rosa, el palo de Rodas ó rodino, la tuya y el gateado.

ART. 5°. Los aforos anteriores no se aplicarán á los artículos que estén en las Aduanas el día de la publicación de esta ley ni á los que ya entonces estén en las naves surtas ó que llegaren á los puertos de la República en ese día.

ART. 6°. Quedan reformadas en estos términos y en lo conducente, la partida 66, clase 7ª; la partida 37, clase 4ª; la partida 72, clase 8ª; y la partida 25, clase 3ª del Arancel, así como el acuerdo n° 143 de 18 de enero de 1895.

ART. 7°. Esta ley empezará á regir desde el día de su publicación.

Al poder ejecutivo.

Dado en el Salón de Sesiones del Congreso, Palacio Nacional, San José, á los tres días del mes de julio de mil novecientos dos.

FRANCISCO M. IGLESIAS,
Presidente.
CARLOS SÁENZ,
1er Secretario.
PEDRO ZUMBADO,
2º Secretario.

San José, á los cinco días del mes de julio de mil novecientos dos.

Ejecútese.

ASCENSIÓN ESQUIVEL.

El Secretario de Estado en el despacho de Hacienda y Comercio,
CLETO GONZÁLEZ VÍQUEZ.

III.

DECRETO DE 8 DE JULIO DE 1902.

ASCENSIÓN ESQUIVEL, Presidente Constitucional de la Repúlica de Costa Rica considerando:

1°. Que la manera vaga en que la actual Tarifa de aforos describe los artículos del comercio de importación, ha ocasionado y sigue ocasionando graves menoscabos al Tesoro Nacional;

2°. Que bajo nombres diversos se introducen mercaderías que encubren el alcohol, del cual se importan grandes cantidades;

3°. Que con la nomenclatura propia del Arancel se importan mercancías y sustancias alimenticias que han sido adulteradas con perjuicio de los intereses y de la salubridad del público; y

4°. Que en las Aduanas se carece de los medios y elementos para evitar tales fraudes, decreta:

ARTÍCULO 1°. Establécense en las Aduanas de San José y de Puntarenas laboratorios químico-comerciales para el examen, análisis, reconocimiento y determinación de las mercancías que se importen al país, muy especialmente los comestibles y bebidas, así como las drogas y preparaciones de todas clases empleadas en la medicina, la farmacia y perfumería. La oficina de San José hará los análisis correspondientes á la Aduana de Limón.

Art. 2°. Estos laboratorios examinarán y dictaminarán acerca de los artículos de alimentación que les sometan las autoridades de la Policía de Higiene; también harán los reconocimientos químico-legales que requieran las autoridades, y cualesquier otros trabajos que les ordene el Gobierno.

Art. 3°. Los Administradores de Aduana retirarán, según instrucciones de la Secretaría de Hacienda, una muestra de cada artículo sujeto á análisis para remitir á la Oficina del Químico. Estas serán simplemente numeradas, y de su envío se llevará un libro, á fin de anotar los resultados y comunicarlos al propietario.

Art. 4°. Los laboratorios químico-comerciales estarán á cargo de un Jefe técnico y de los demás auxiliares que acuerde el Poder Ejecutivo.

Dado en la Casa Presidencial. San José, á los ocho dias del mes de julio de mil novecientos dos.

Ascensión Esquivel.

El Secretario de Estado en el despacho de Hacienda y Comercio.

Cleto González Víquez.

IV.

Decreto de 25 de Julio de 1902.

Ascensión Esquivel, Presidente Constitucional de la República de Costa Rica, en uso de las facultades que le confieren el artículo 1° del decreto n° 46 del 16 de Julio de 1888, y el párrafo 2° del artículo 2° del decreto n° 7 del 14 de Junio de 1901, decreta:

Artículo 1°. Las mercancías que á continuación se expresan, se aforarán con las cuotas siguientes:

		Colones.
1. Aceites esenciales ó esencias concentrades de ajenjo, alcaravea, almendras amargas verdadero, angélica, anís, mircia (Bay St. Thomas), bergamota, canela ó casia, cedro, clavos de olor, enebro, eneldo, eucalipto, geranio rosa, laurel, laurel-cerezo, lavándula, lima ó citronela, limón, melisa, menta, mirbana ó nitrobenzol, mostaza, naranja, nuez moscada, pino, romero, sándalo, santónico, trementina, wintergreen y otros no expresados	kilogramo	7.00
2. Los mismos aceites esenciales, cuando sean de rosa verdadera, azahar ó nerole, Cananga é ilang-ilang	kilogramo	10.00
3. Aceite esencial de almendras amargas artificial	do	.50
4. Aceite de anilina puro	do	1.00
Aceites grasos:		
5. Aceite de ajonjolí	do	.25
6. Aceite alcanforado	do	.50
7. Aceite algodón	do	.15
8. Aceite de almendras dulces	do	.30
9. Aceite de animal fétido	do	2.00
10. Aceite de beleño cocido	do	1.00

			Colones.
11.	Aceite de belladona	kilogramo	1.00
12.	Aceite de cacao (manteca de cacao)	do	1.00
13.	Aceite de cade ó enebro	do	.35
14.	Aceite de coco	do	.02
15.	Aceite de croton	do	1.00
16.	Aceite de hígado de bacalao	do	.10
17.	Aceite de laurel	do	.50
18.	Aceite de linaza	do	.15
19.	Aceite de máquina fino	do	.20
20.	Aceite de máquina ordinario	do	.10
21.	Aceite de nuez moscada	do	.50
22.	Aceite de olivas fino	do	.20
23.	Aceite de olivas ordinario	do	.10
24.	Aceite de palma	do	.02
25.	Aceite de pata de buey	do	.50
26.	Aceite de ricino ó castor	do	.10
27.	Aceite de césamo	do	.25
28.	Aceite de trementina	do	.15
29.	Aceite no expresados que no sean de tocador	do	.50
30.	Acíbar ó aloe	do	.30
31.	Acido acético	do	.15
32.	Acido alcanfórico	do	2.00
33.	Acido arsenioso ó arsénico blanco	do	.15
34.	Acido benzoico ó flor de benjuí	do	1.00
35.	Acido bórico	do	.10
36.	Acido bromhídrico	do	2.00
37.	Acido carbólico ó fénico crudo	do	.15
38.	Acido cabólico ó fénico puro	do	.50
39.	Acido carbónico licuado	do	1.00
40.	Acido cianhídrico	do	1.00
41.	Acido cítrico	do	.15
42.	Acido clorhídrico ó muriático técnico	do	.15
43.	Acido clorhídrico ó muriático puro	do	.30
44.	Acido crisofánico	do	2.00
45.	Acido crómico	do	1.00
46.	Acido fluorhídrico	do	3.00
47.	Acido fórmico	do	1.00
48.	Acido fosfórico	do	1.00
49.	Acido gálico	do	1.00
50.	Acido láctico	do	1.00
51.	Acido nítrico crudo	do	.15
52.	Acido nítrico puro	do	.30
53.	Acido oleico ó esteárico	do	.15
54.	Acido oxálico	do	.20
55.	Acido pirogálico	do	2.00
56.	Acido pícrico	do	1.00
57.	Acido salicílico	do	.50
58.	Acido sulfúrico crudo	do	.10
59.	Acido sulfúrico puro	do	.20
60.	Acido sulfuroso	do	.20
61.	Acido tánico ó tanino	do	.50
62.	Acido tartárico	do	.15
63.	Acido tímico ó timol	do	2.00
64.	Acido valeriánico	do	3.00

		Colones.
65. Acido yódico	kilogramo	5.00
66. Aguarrás	do	.15
67. Alcanfor bromuro	do	1.00
68. Alcanfor oxidado ú oxafor	do	5.00
69. Alcanfor refinado	do	.50
70. Algodón ordinario ó gris, con ó sin cola	do	.05
71. Algodón para cirujía blanco	do	.10
72. Algodón impregnado	do	.15
73. Algodón pólvora ó piroxilina	do	1.00
74. Almidones (en general)	do	.25
75. Alumbre	do	.10
76. Amoniaco líquido y comprimido	do	.15
77. Amoniaco resina	do	.45
78. Amonia, acetato	do	.50
79. Amonia, benzoato	do	5.00
80. Amonia, bicarbonato	do	.30
81. Amonia, bicromato	do	.50
82. Amonia, bromuro	do	1.00
83. Amonia, carbonato	do	.15
84. Amonia, cloruro ó sal amoniaco	do	.15
85. Amonia, fosfato	do	.20
86. Amonia, glicero fosfato	do	2.00
87. Amonia, molibdato	do	1.00
88. Amonia, nitrato	do	.20
89. Amonia, oxalto	do	.20
90. Amonia, salicilato	do	1.00
91. Amonia, sulfato	do	.20
92. Amonia, sulfo cianuro	do	.50
93. Amonia, sulfo ictiolato	do	5.00
94. Amonia, valerianato	do	2.00
95. Amonia, yoduro	do	5.00
96. Analgesina ó antipirina	do	3.00
97. Anilina color	do	.25
98. Antimonio, cloruro ó manteca de antimonio	do	1.00
99. Antimonio, metal	do	1.00
100. Antimonio óxido blanco	do	1.00
101. Antimonio y potasio, tartrato ó tártaro estibiado	do	1.00
102. Antimonio sulfuro naranjado	do	1.00
103. Antimonio sulfuro negro	do	.40
104. Antimonio sulfuro rojo ó kermes	do	1.00
105. Añil ó índigo	do	.25
106. Arrow-Root ó sagú de San Vicente	do	.10
107. Arsénico blanco	do	.15
108. Arsénico bromuro	do	2.00
109. Arsénico metálico	do	2.00
110. Arsénico yoduro	do	5.00
111. Atíncar ó borax, ó borato de sodio	do	.20
112. Azarcón ó minio ú óxido de plomo rojo	do	.15
113. Azúcar cande	do	.25
114. Azúcar de leche ó lactosa	do	.25
115. Azúcar de plomo ó acetato de plomo	do	.25
116. Azúcar de uva ó glucosa	do	.25
117. Azúcar quemado ó caramelo	do	.25
118. Azúcar de caña centrifugado	do	.25

			Colones.
119.	Azúcar de caña refinado	kilogramo	.30
120.	Azúcar de otras clases, refinado ó sin refinar	do	.30
121.	Azucarina ó sacarina	do	2.00
122.	Azufre, leche de azufre	do	.15
123.	Azufre, en cilindros y en polvo ó flor de azufre	do	.15
124.	Azufre, yoduro	do	5.00
125.	Azul, cenizas inglesas	do	.50
126.	Azul, metileno	do	1.00
127.	Azul, París	do	.20
128.	Azul, Prusia ó cianuro de hierro	do	.15
129.	Azul, Ultramar	do	.10

ARTÍCULO 2°. Los aforos anteriores no están sujetos al 50 por ciento de aumento establecido por decreto de 27 de Abril de 1901, aprobado por la ley n° 7 del 14 de Junio del mismo año.

ART. 3°. Esta ley empezará á regir el 15 de Agosto próximo; con todo, podrá aplicarse desde su publicación al desalmacenaje de todos los artículos que resulten aforados con una cuota menor de la que estaba establecida y que por este decreto queda modificada.

Dado en la Casa Presidencial.—San José, á los veinticinco días del mes de Julio de mil novecientos dos.

ASCENSIÓN ESQUIVEL.

CLETO GONZÁLEZ VÍQUEZ,
Secretario de Estado en el despacho de Hacienda y Comercio.

V.

DECRETO DE 28 DE JULIO DE 1902.

ASCENSIÓN ESQUIVEL, Presidente Constitucional de la República de Costa Rica, en uso de las facultades que le confieren el artículo 1° del decreto n° 46 de 16 de Julio de 1888 y el párrafo 2° del artículo 2° del decreto n° 7 de 14 de Junio de 1891, decreta:

ARTÍCULO 1°. Las mercancías que á continuación se expresan se aforarán con las cuotas siguientes:

		Por kilogramo de peso bruto. Colones.
1.	Bálsamo de Canadá	0.05
2.	Bálsamo comendador ó católico	4.00
3.	Bálsamo copaiba	.50
4.	Bálsamo fioraventi	.50
5.	Bálsamo Gurgún	.50
6.	Bálsamo Opodeldoc	1.00
7.	Bálsamo Perú	1.00
8.	Bálsamo Tolú	1.00
9.	Bálsamo tranquilo	2.50
10.	Bálsamos no expresados	2.50
11.	Bayas ó frutas, de Ginebra, laurel, mirtilo y otras no expresadas	.20
12.	Benzina	.10
13.	Benzol ó bencena	.10
14.	Benzonaftol	1.00
15.	Benzosol	10.00

	Por kilogramo de peso bruto. Colones.
16. Betol ó naftalol	5.00
17. Betún de Judea ó asfalto	.10
18. Bismuto, benzoato de	2.00
19. Bismuto, carbonato de	1.00
20. Bismuto, citrato de	2.00
21. Bismuto, cloruro de	2.00
22. Bismuto, galato-básico ó dermatol de	1.00
23. Bismuto, lactato de	2.00
24. Bismuto, metálico	5.00
25. Bismuto, oxalato de	2.00
26. Bismuto, óxido de	2.00
27. Bismuto, salicilato de	1.00
28. Bismuto, subnitrato de	1.00
29. Bismuto, tanato de	1.00
30. Bismuto, tartrato de	2.00
31. Bismuto, valerianato de	2.00
32. Bismuto, yoduro de	5.00
33. Bismutos, no expresados	2.00
34. Blanco de zinc ú óxido de zinc	.15
35. Bol blanco, rojo y de Armenia	.80
36. Bronce en polvo ó líquido	.50
37. Cabezas de adormideras	.20
38. Cafeina, benzoato de	3.00
39. Cafeina, citrato de	3.00
40. Cafeina, hidrobromato de	5.00
41. Cafeina, hidroclorato de	5.00
42. Cafeina, pura	3.00
43. Cafeina, salicitato de	5.00
44. Sodio benzoato, bromuro, salicilato, sulfato, valerianato y los no expresados	5.00
45. Calcio, compuestos acetato, benzoato y bromuro	1.00
46. Calcio, compuestos carbonato ó creta, ó blanco de España ó mármol	.06
47. Calcio, compuestos carburo de	.25
48. Calcio, compuestos cloruro de	1.00
49. Calcio, compuestos de Viena	.10
50. Calcio, compuestos glicerofosfato de	1.00
51. Calcio, compuestos hipoclorito (cloruro de cal)	.03
52. Calcio, compuestos hipofosfito de	1.00
53. Calcio, compuestos hiposulfito de	.15
54. Calcio, compuestos lactato de	1.00
55. Calcio, compuestos lactofosfato de	1.00
56. Calcio, compuestos nitrato de	2.00
57. Calcio, compuestos permanganato de	5.00
58. Calcio, compuestos salicilato de	2.00
59. Calcio, compuestos yeso ó alabastro	.03
60. Calcio, compuestos sulfito de	1.00
61. Calcio, compuestos sulfuro de	1.00
62. Calcio, compuestos yoduro de	5.00
63. Calcio, compuestos no expresados	2.00
64. Cantáridas	1.00
65. Caña fístula	.02
66. Carbono bisulfuro ú hormiguicida	.01

	Per kilogramo de peso bruto. Colones.
67. Carrahagahen liquen	.50
68. Caseina	1.00
69. Castoreo	5.00
70. Catecú	.50
71. Cebada perlada	.10
72. Cebada tostada ó malta	.03
73. Celoidina	1.00
74. Cera amarilla	.35
75. Cera blanca	.35
76. Cera del Japón ó vegetetal	.35
77. Cera mineral ó cerecina	.35
78. Cera negra	.35
79. Cinabrio ó vermellon ó sulfuro rojo de mercurio	.35
80. Clavos de olor	.30
81. Cloral anidro	2.00
82. Cloral hidrato	2.00
83. Cloretilo ó cloruro de étilo	5.00
84. Clorodina	1.00
85. Clorófilo soluble en grasa	2.00
86. Clorófilo soluble en alcohol	1.00
87. Cloroformo comercial	1.00
88. Cloroformo químicamente puro	3.00
89. Cobre, acetato de, ó Cardenillo	.50
90. Cobre, aluminato de	1.00
91. Cobre, bicloruro de	1.00
92. Cobre, carbonato de	1.00
93. Cobre, cloruro de	1.00
94. Cobre, metal	1.00
95. Cobre, nitrato de	1.00
96. Cobre, óxido de	1.00
97. Cobre, sulfato de	.25
98. Cobre, sulfuro de	1.00
99. Cobre, compuestos de, no expresados	1.00
100. Cocaina pura, hidroclorato, nitrato, salicilato, sulfato y los no expresados	10.00
101. Cochinilla ó grana	.30
102. Codeina pura, clorhidrato, fosfato y sulfato	10.00
103. Cola blanca, ordinaria de Colonia, de pescado ó ictiocola	.15
104. Colodión	1.00
105. Colofonia ó goma-pez	.01
106. Colores, para siropes y vinos	.35
107. Colores, vegetales	.35
108. Cornezuelo de centeno	1.00
109. Cornutina ó ergotina	3.00
110. Corteza de canela ó casia	.30
111. Corteza de condurango	.50
112. Corteza de cuasia	.50
113. Corteza quilaya ó Panamá ó tarzana	.05
114. Corteza de quina	.50
115. Corteza simarruba	.50
116. Cortezas tintóreas	.05
117. Cortezas no expresadas	.50
118. Creolina	.15

	Per kilogramo de peso bruto. Colones.
119. Creosota, benzoato de	5.00
120. Creosota blanca	1.00
121. Creosota carbonato ó creosotal	2.00
122. Creosota, fosfato de	2.00
123. Creosota haya	1.00
124. Creosota mineral	1.00
125. Cresol	.15
126. Cuajo en polvo ó tabletas	.10
127. Cubebas	1.00
128. Dextrina	.15
129. Diastasa ó maltina	.20
130. Digitalina	5.00
131. Diuretina	2.00
132. Dormiol	2.00
133. Duotal	2.00

ART. 2°. Los aforos anteriores no están sujetos al 50 por ciento de aumento establecido por decreto de 27 de abril de 1901, aprobado por la ley n°. 7 del 14 de junio del mismo año de 1901.

ART. 3°. Esta ley empezará á regir el 15 de agosto próximo; con todo, podrá aplicarse desde su publicación al desalmacenaje de todos los artículos que resulten aforados con una cuota menor de la que estaba establecida y que por este decreto queda modificada.

Dado en la Casa Presidencial, San José, el día veintiocho de julio, de mil novecientos dos.

ASCENSIÓN ESQUIVEL.

CLETO GONZÁLEZ VÍQUEZ,
Secretario de Estado en el despacho de Hacienda y Comercio.

EL FERROCARRIL DE COSTA RICA EN 1901.

Por la Secretaría de Hacienda y Comercio de la República de Costa Rica se ha publicado el siguiente informe.

PALACIO NACIONAL,
DIRECCIÓN GENERAL DE ESTADÍSTICA,
San José, 5 de junio de 1902.

Señor SECRETARIO DE ESTADO en los despachos de Hacienda y Comercio.

El miércoles, 7 de mayo próximo pasado, hubo en Londres una reunión de los accionistas de la Costa Rica Railway Company, en la cual se consideró el resultado de la explotación del ferrocarril de Costa Rica en el año natural de 1901.

Conforme lo había dicho esta Oficina en su informe del 31 de marzo de 1902, las utilidades netas del año ascendieron á £131,041 5s 10d. Agregando el saldo del año 1900, £3,712 13s 10d, y los intereses cobrados sobre depósitos é inversiones, £751 6s 3d, se forma un total de £135,505 5s 11d, que se acordó distribuir así:

	£.	s.	d.
Pago de los intereses de los bonos privilegiados	9,470	0	0
Amortización de bonos privilegiados	2,400	0	0
Pago de intereses 6 por ciento anual sobre bonos de primera hipoteca	39,300	0	0
Pago de intereses 6 por ciento anual sobre bonos de segunda hipoteca	36,000	0	0
Pago de intereses sobre sumas emprestadas	999	9	0
Gastos preliminares de la segunda emisión de bonos privilegiados	3,213	19	2
Gastos legales en Inglaterra	869	17	3
2 por ciento dividendo sobre £1,800,000 valor acciones ordinarias	36,000	0	0
Saldo que pasa á cuenta nueva	7,252	0	6
	135,505	5	11

La cuenta general de los productos netos de la Costa Rica Railway Company en los diez y medio años que lleva de explotar las líneas se condensa en las cifras siguientes:

DEBE.

	£	s.	d.
Producto neto 1º julio 1891 á 30 junio 1892	35,611	6	6
1º julio 1892 á 30 junio 1893	69,739	14	6
1º julio 1893 á 30 junio 1894	51,065	6	2
1º julio 1894 á 30 junio 1895	85,130	4	6
1º julio 1895 á 31 diciembre 1895	17,506	2	7
Año natural de 1896	95,701	9	2
1897	136,994	8	7
1898	133,317	16	10
1899	116,435	18	10
1900	135,552	5	6
1901	131,041	5	10
Ganado en la emisión de £75,000 de bonos privilegiados en 1897	3,000	0	0
Intereses sobre depósitos é inversiones, 1899-1901	3,975	8	2
	1,015,071	7	2

HABER.

	£	s.	d.
6 por ciento intereses en 10½ años sobre £655,000 bonos de 1ª hipoteca	412,650	0	0
Intereses en 4½ años sobre £600,000 bonos de 2ª hipoteca hasta 1895	[a] 64,006	0	4
6 por ciento intereses en 6 años sobre £600,000 bonos de 2ª hipoteca hasta 1895	216,000	0	0
5 por ciento intereses sobre £200,000 bonos privilegiados, desde su emisión	[b] 68,567	8	6
Amortización de bonos privilegiados	11,000	0	0
Gasto de cambio rieles en la División Central	16,165	0	10
Reparaciones de la vía en 1894-1895	3,778	7	4
Rebaja sobre fletes bananos en 1896	390	16	6
Renovación de material rodante 1897-1898	4,540	0	0
Reconstrucción del ramal á Guápiles	2,800	0	0

---

[a] Como el interés sobre los bonos de 2ª hipoteca (second mortgage debentures) no es acumulativo, estos bonos no obtuvieron el pago íntegro de los intereses hasta de 1896 inclusive en adelante.

[b] Las £200,000 de la primera serie de bonos privilegiados (prior mortgage debentures), se emitieron así: Hasta 31 de diciembre de 1895, £125,000; hasta 31 de diciembre de 1896, £22,830; hasta 31 de diciembre de 1897, £52,170.

HABER—continúa.	£	s.	d.
Destinado á fondo de reserva	15,000	0	0
Gastos legales en Inglaterra	6,708	5	0
Voto especial en favor del señor Allen (1898)	2,000	0	0
Dividendos sobre acciones ordinarias	180,000	0	0
Intereses sobre sumas emprestadas	999	9	0
Gastos preliminares de la 2ª emisión de bonos privilegiados (hasta 31 de diciembre de 1901)	3,213	19	2
Saldo en existencia, llevado á cuenta nueva	7,252	0	6
	1,015,071	7	2

La cuenta de inversión del capital de la Costa Rica Railway Company, el 31 de diciembre de 1901, da estas cifras:

	£	s.	d.
Compra de las líneas y la concesión	3,050,000	0	0
Saldo de contratos completados por la compañía	10,904	2	3
Gastos en equipo adicional y mejoras	128,339	19	4
Arreglo reclamación Angel M. Velázquez	1,000	0	0
Contribución para trabajos del tajamar	6,202	0	2
Gastos del nuevo muelle de Limón	76,922	6	0
	3,273,368	7	9

El capital está representado así:

	£	s.	d.
Bonos de 1ª hipoteca, 6 por ciento interés	655,000	0	0

El señor Administrador del Ferrocarril confía en que el resultado de la explotación del año en curso no será inferior al obtenido en 1901; espera que el aumento en el producto de los fletes de bananos compense la diferencia de fletes del café, por lo reducido de la cosecha.

Soy de V. muy atento servidor,

MANUEL ARAGÓN.

NUEVO FERROCARRIL QUE SE CONSTRUIRÁ POR EL ESTADO.

El Congreso Constitucional de la República de Costa Rica decreta:

ARTÍCULO 1°. Procédase por cuenta del Estado á hacer, á la mayor brevedad posible, los estudios necesarios para la construcción de un ramal de ferrocarril ó tranvía eléctrico que partiendo de la línea férrea al Pacífico pase por las ciudades de Alajuela y Heredia y termine en Santo Domingo de esta última provincia. Asimismo se harán iguales estudios para otro ramal, que partiendo de la estación del Pacífico en esta capital llegue á la ciudad de Cartago.

ART. 2°. Una vez concluída la línea principal al Pacífico, se procederá por cuenta del Estado á construir ambos ramales de ferrocarril ó tranvía eléctrico hasta Santo Domingo de Heredia y Cartago, respectivamente. Los planos y contratos para la ejecución de esas obras, deberán someterse al Congreso Constitucional para su aprobación.

Al poder ejecutivo.

Dado en el Salón de Sesiones del Congreso, Palacio Nacional, San José, á los treinta y un días del mes de julio de mil novecientos dos.

FRANCISCO M. IGLESIAS,
Presidente.
CÁRLOS SÁENZ,
1er Secretario.
PEDRO ZUMBADO,
2º Secretario.

San José, treintaiuno de Julio de mil novecientos dos.

Ejecútese.

ASCENSIÓN ESQUIVEL.

CHILE.

ACUERDOS CONCLUIDOS ENTRE LOS GOBIERNOS DE CHILE Y LA REPÚBLICA ARGENTINA, MAYO 28 DE 1902.

ACTA.

Reunidos en el Ministerio de Relaciones Exteriores de Chile, el Ministro del ramo, Señor JOSÉ FRANCISCO VERGARA DONOSO y el Enviado Extraordinario y Ministro Plenipotenciario de la República Argentina, Señor Don JOSÉ ANTONIO TERRY, con el objeto de acordar las reglas á que deberán someterse las divergencias de cualquiera naturaleza que pudieren perturbar las buenas relaciones existentes entre uno y otro país, y de consolidar así la paz, conservada hasta ahora no obstante las alarmas periódicas nacidas del largo litigio de límites; el Señor Ministro Plenipotenciario de la República Argentina manifestó: que los propósitos de su Gobierno, conformes con la política internacional que constantemente había observado, eran procurar en todo caso resolver las cuestiones con los demas Estados de un modo amistoso; que el Gobierno de la República Argentina había obtenido ese resultado manteniéndose en su derecho y respetando en su latitud la soberanía de las demas naciones, sin inmiscuirse en sus asuntos internos ni en sus cuestiones externas; que, de consiguiente, no podían tener cabida en su ánimo propósito de expansiones territoriales; que perseveraría en esa politica y que, creyendo interpretar el sentimiento público de su país, hacía estas declaraciones ahora que había llegado el momento de que Chile y la República Argentina removieran toda causa de perturbación en sus relaciones internacionales.

El Señor Ministro de Relaciones Exteriores expuso por su parte: que su Gobierno ha tenido y tiene los mismos elevados propósitos que el Señor Ministro de la República Argentina acababa de expresar en nombre del suyo; que Chile había dado numerosas pruebas de la sinceridad de sus aspiraciones incorporando en sus Pactos internacionales el principio del arbitraje para solucionar las dificultades con las naciones amigas; que, respetando la independencia é integridad de los demás Estados, no abriga tampoco propósitos de expansiones territoriales, salvas las que resultaren del cumplimiento de los Tratados vijentes ó que más tarde se celebraren; que perseveraría en esa política; que felizmente la cuestion de límites entre Chile y la República Argentina habia dejado de ser un peligro para la paz desde que ambos aguardan el próximo fallo arbitral de Su Majestad Británica; que, por consiguiente, creyendo interpretar el sentimiento público de Chile, hacía estas declaraciones, pensando, como el Señor Ministro Argentino, que había llegado el momento de remover toda causa de perturbación en las relaciones entre uno y otro país.

En vista de esta uniformidad de aspiraciones, quedó acordado:

1°. Celebrar un Tratado General de Arbitraje que garantiera la realización de los propósitos referidos;

2°. Protocolizar la presente conferencia, cuya acta se consideraría parte integrante del mismo Tratado de Arbitraje.

Para constancia firmaron dos ejemplares de la presente acta, á los veintiocho dias del mes de mayo de mil novecientos dos.

(Firmado) J. F. Vergara Donoso.
(Firmado) J. A. Terry.

TRATADO GENERAL DE ARBITRAJE.

Los Gobiernos de la República Argentina y de la República de Chile, animados del deseo de solucionar por medios amistosos cualquier cuestión que pudiere suscitarse entre ambos países, han resuelto celebrar un Tratado General de Arbitraje, para lo cual han constituido Ministros Plenipotenciarios, á saber:

S. E. el Presidente de la República de Chile al Señor Don José Francisco Vergara Donoso, Ministro de Estado en el Departamento de Relaciones Exteriores, y

S. E. el Presidente de la República Argentina al Señor Don José Antonio Terry, Enviado Extraordinario y Ministro Plenipotenciario de este país.

Los cuales, después de haberse comunicado sus respectivos plenos poderes, que encontraron bastantes y en debida forma, han convenido en las estipulaciones contenidas en los artículos siguientes:

Artículo I. Las altas partes contratantes se obligan á someter á juicio arbitral todas las controversias de cualquiera naturaleza que por cualquier causa surgieren entre ellas, en cuanto no afecten á los preceptos de la Constitución de uno ú otro país y siempre que no puedan ser solucionadas mediante negociaciones directas.

ART. II. No pueden renovarse en virtud de este tratado las cuestiones que hayan sido objeto de arreglo definitivo entre las partes. En tales casos, el arbitraje se limitará exclusivamente á las cuestiones que se susciten sobre validez, interpretación y cumplimiento de dichos arreglos.

ART. III. Las altas partes contratantes designan como árbitro al Gobierno de Su Majestad Británica. Si alguna de las partes llegare á cortar sus relaciones amistosas con el Gobierno de su Majestad Británica, ambas partes designan como árbitro para tal evento al Gobierno de la Confederación Suiza.

Dentro del término de sesenta días, contados desde el canje de ratificaciones, ambas partes solicitarán, conjunta ó separadamente, del Gobierno de Su Majestad Británica, árbitro en primer término, y del Gobierno de la Confederación Suiza, árbitro en segundo término, que se dignen aceptar el cargo de árbitros que les confiere este tratado.

ART. IV. Los puntos, cuestiones, ó divergencias comprometidos se fijarán por los Gobiernos Contratantes, quienes podrán determinar la amplitud de los poderes del Arbitro y cualquiera otra circunstancia relativa al procedimiento.

ART. V. En defecto de acuerdo, cualquiera de las Partes podrá solicitar la intervención del Arbitro, á quien corresponderá fijar el compromiso, la época, lugar y formalidades del procedimiento, así como resolver todas las dificultades procesales que pudieren surgir en el curso del debate. Los comprometentes se obligan á poner á disposición del Arbitro todos los medios de información que de ellos dependan.

ART. VI. Cada una de las Partes podrá constituir uno ó más mandatarios que la representen ante el Arbitro.

ART. VII. El Arbitro es competente para decidir sobre la validez del compromiso y su interpretación; lo es igualmente para resolver las controversias que surjan entre los comprometentes, sobre si determinadas cuestiones han sido ó no sometidas á la jurisdicción arbitral en la escritura de compromiso.

ART. VIII. El Arbitro deberá decidir, de acuerdo con los principios del Derecho Internacional, á ménos que el compromiso imponga la aplicación de reglas especiales ó le autorice á decidir como amigable componedor.

ART. IX. La sentencia deberá decidir definitivamente cada punto en litigio, con expresión de sus fundamentos.

ART. X. La sentencia será redactada en doble original y deberá ser notificada á cada una de las Partes, por medio de su representante.

ART. XI. La sentencia legalmente pronunciada decide, dentro de los límites de su alcance, la contienda entre las Partes.

ART. XII. El Arbitro establecerá en la sentencia el plazo dentro del cual debe ser ejecutada, siendo competente para decidir las cuestiones que pueden surgir con motivo de la ejecución de la misma.

Art. XIII. La sentencia es inapelable y su cumplimiento está confiado al honor de las Naciones signatarias de este pacto. Sin embargo, se admitirá el recurso de revisión ante el mismo Arbitro que la pronunció, siempre que se deduzca antes de vencido el plazo señalado para su ejecución y en los siguientes casos:

1°. Si se ha dictado sentencia en virtud de un documento falso ó adulterado.

2°. Si la sentencia ha sido en todo ó en parte la consecuencia de un error de hecho, que resulte de las actuaciones ó documentos de la causa.

Art. XIV. Cada una de las partes pagará los gastos propios y la mitad de los gastos generales del arbitraje.

Art. XV. El presente tratado estará en vigor durante diez años á contar desde el canje de las ratificaciones. Si no fuere denunciado seis meses ántes de su vencimiento, se tendrá por renovado por otro período de diez años, y así sucesivamente.

El presente tratado será ratificado y canjeadas sus ratificaciones en Santiago de Chile dentro de seis meses de su fecha.

En fé de lo cual los Plenipotenciarios de la República Argentina y de la República de Chile firmaron y sellaron con sus respectivos sellos, y por duplicado, el presente tratado en la ciudad de Santiago, á veintiocho del mes de mayo de mil novecientos dos.

(Firmado) J. F. Vergara Donoso.
(Firmado) J. A. Terry.

CONVENCIÓN SOBRE ARMAMENTOS NAVALES.

Reunidos en el Ministerio de Relaciones Exteriores de Chile los Señores Don José Francisco Vergara Donoso, Ministro del ramo, y Don José Antonio Terry, Enviado Extraordinario y Ministro Plenipotenciario de la República Argentina, han acordado consignar en la siguiente convención las diversas conclusiones adoptadas para la limitación de armamentos navales de las dos Repúblicas; conclusiones que han sido tomadas mediante la iniciativa y los buenos oficios del Gobierno de Su Majestad Británica, representado en Chile por su Enviado Extraordinario y Ministro Plenipotenciario, Señor Don Gerardo A. Lowther, y en la República Argentina por su Enviado Extraordinario y Ministro Plenipotenciario, Sir W. A. C. Barrington.

Artículo I. Con el propósito de apartar todo motivo de inquietud ó recelo en uno ú otro país, los Gobiernos de Chile y de la República Argentina desisten de adquirir las naves de guerra que tienen en construcción y de hacer por ahora nuevas adquisiciones.

Ambos Gobiernos convienen además en disminuir sus respectivas escuadras, para lo cual seguirán gestionando hasta llegar á un acuerdo que produzca una discreta equivalencia entre dichas escuadras. Esta disminución se hará en el término de un año, contado desde la fecha del canje de la presente convención.

ART. II. Los dos Gobiernos se comprometen á no aumentar durante cinco años sus armamentos navales sin previo aviso que el que pretenda aumentarlos dará al otro con diez y ocho meses de anticipación. Es entendido que se excluye de este arreglo todo armamento para la fortificación de las costas y puertos, pudiéndose adquirir cualquiera máquina flotante destinada exclusivamente á la defensa de éstos, como sea submarinos, etc.

ART. III. Las enajenaciones á que diere lugar esta Convención no podrán hacerse á países que tengan cuestiones pendientes con una ú otra de las Partes Contratantes.

ART. IV. A fin de facilitar la trasferencia de los contratos pendientes, ambos Gobiernos se obligan á prorrogar por dos meses el plazo que tengan estipulado para la entrega de los respectivos buques en construcción, para lo cual darán las instrucciones del caso en el acto de ser firmada esta Convención.

ART. V. Las ratificaciones de esta Convención serán canjeadas en el término de sesenta días, ó antes si fuere posible, y el canje tendrá lugar en esta ciudad de Santiago.

En fe de lo cual los infrascritos firman y sellan en doble ejemplar la prevente Convención en la ciudad de Santiago, á los 28 días del mes de mayo de 1902.

(L. S.) J. F. VERGARA DONOSO.
(L. S.) J. A. TERRY.

ACTA.

Reunidos en el Ministerio de Relaciones Exteriores de Chile el Ministro del ramo, Señor Don JOSÉ FRANCISCO VERGARA DONOSO, y el Enviado Extraordinario y Ministro Plenipotenciario de la República Argentina, Señor Don JOSÉ ANTONIO TERRY, debidamente autorizados é interpretando el tratado de límites de 23 de julio de 1881, el protocolo de 1° de mayo de 1893, el acuerdo de 17 de abril de 1896 y las actas de 15, 17 y 22 de setiembre de 1898, á fin de evitar cualquiera dificultad en la demarcación material de la línea limítrofe entre ambos países, en la parte sometida al fallo de S. M. Británica, acuerdan, en nombre de sus respectivos Gobiernos, pedir al Arbitro que nombre una Comisión que fije en el terreno los deslindes que ordenare en su sentencia.

En fe de lo cual firman la presente acta en doble ejemplar en Santiago, á 28 de mayo de 1902.

(Firmado) J. F. VERGARA DONOSO.
(Firmado) J. A. TERRY.

NOTAS CAMBIADAS ENTRE EL SEÑOR MINISTRO DE RELACIONES EXTERIORES Y EL SEÑOR MINISTRO PLENIPOTENCIARIO DE LA REPÚBLICA ARGENTINA.

SANTIAGO, *26 de Mayo de 1902.*

Señor MINISTRO: Estando ya tan avanzada la tramitación del juicio arbitral sobre límites entre nuestros respectivos países, á punto que todo permite creer que el fallo no tardará en venir, mi Gobierno, animado siempre del deseo de que esta larga cuestión termine cuanto antes, miraría con verdadero agrado que, si el Gobierno de V. E. pensara hacer uso del derecho de presentar un nuevo escrito, lo hiciese en forma que no fuera obstáculo para que el Arbitro pudiera dictar su fallo en el presente año.

Esperando se sirva V. E. darme una respuesta sobre el particular, me es grato renovar á V. E. las seguridades de mi consideración muy distinguida.

(Firmado). J. F. VERGARA DONOSO.

Al Excmo, Señor José A. TERRY,
Enviado Extraordinario y Ministro Plenipotenciario de la República Argentina.

LEGACION ARGENTINA, *Santiago, 28 de mayo de 1902.*

Señor MINISTRO: Tengo el honor de acusar recibo de la nota de V. E., fechada el 26 del presente, por la que se sirve comunicarme que estando ya tan avanzada la tramitación del juicio arbitral sobre límites entre nuestros respectivos países, su Gobierno, animado siempre del deseo de que esta larga cuestión termine cuanto antes, miraría con verdadero agrado que el Gobierno Argentino, por su parte, cooperase á ese propósito, en la forma que á su juicio encontrase más adecuada, para facilitar al Arbitro su tarea y para que éste pueda dictar su fallo en el presente año.

En respuesta, Señor Ministro, me es satisfactorio participar que he recibido instrucciones de mi Gobierno, que me permiten manifestar que le animan iguales propósitos á los espresados por V. E., y que está dispuesto á facilitar la acción del Arbitro para que éste pueda dar su fallo en el término ántes indicado, á cuyo efecto adoptará las disposiciones necesarias.

Me es igualmente grato, Señor Ministro, aprovechar esta oportunidad para reiterar á V. E. las seguridades de mi más distinguida consideración.

(Firmado). J. A. TERRY.

A S. E. EL SEÑOR MINISTRO DE RELACIONES EXTERIORES DE CHILE.

SANTIAGO, *28 de mayo de 1902.*

Señor MINISTRO: La segunda parte del artículo primero de la convención celebrada para limitar los armamentos navales de Chile y de la República Argentina, dice: "Ambos Gobiernos convienen, además, en disminuir sus respectivas escuadras, para lo cual seguirán gestionando hasta llegar á un acuerdo que produzca una discreta equivalencia entre dichas escuadras. Esta disminución se hará en el término de un año, contado desde la fecha del canje de la presente convención."

Este Gobierno entiende que las diferencias que pudieren surgir con motivo de la ejecución de la cláusula transcrita, deberán ser falladas por el Arbitro, en conformidad á lo dispuesto en el artículo primero del Tratado general de Arbitraje celebrado en esta fecha.

Esperando que V. E. se sirva expresarme el pensamiento de su Gobierno al respecto enunciado, me es grato renovar á V. E. las seguridades de mi distinguida consideración.

(Firmado.) J. F. VERGARA DONOSO.

Al Excmo. Señor JOSÉ A. TERRY,
Enviado Extraordinario y Ministro Plenipotenciario de la República Argentina.

LEGACIÓN ARGENTINA, *Santiago, 28 de mayo de 1902.*

Señor MINISTRO: He tenido el honor de recibir la nota de V. E., de esta fecha, en la que se sirve comunicarme que su Gobierno interpreta la segunda parte del artículo primero de la convención sobre limitación de armamentos en el sentido de que cualquiera divergencia que se suscite y que no pueda ser allanada directamente dentro del año entre las Cancillerías, deberá ser materia de arbitraje general, con arreglo al Tratado firmado en esta fecha.

En contestación, me es grato manifestar á V. E. que mi Gobierno da igual interpretación á dicha cláusula.

Renuevo á V. E. las seguridades de mi distinguida consideración.

(Firmado.) J. A. TERRY.

A S. E. el SEÑOR MINISTRO DE RELACIONES EXTERIORES DE CHILE.

ESTADOS UNIDOS.

COMERCIO CON LA AMÉRICA LATINA.

IMPORTACIONES Y EXPORTACIONES.

En la página 786 aparece la última relación del comercio entre los Estados Unidos y la América latina, tomada de la compilación hecha por la Oficina de Estadística del Departamento de Hacienda de los Estados Unidos. Estos datos se refieren al valor del comercio arriba mencionado. La estadística corresponde al mes de julio de 1902, comparada con la del mes correspondiente del año anterior, y también comprende los datos referentes á los siete meses que terminaron en julio de 1902, comparados con igual período de 1901. Debe explicarse que la estidística de las importaciones y exportaciones de las diversas aduanas referente á un mes cualquiera, no se recibe en el Departmento de Hacienda hasta el 20 del próximo mes, necesitándose algún tiempo para su compilación é impresión, de suerte que los datos estadísticos correspondientes al mes de julio, por ejemplo, no se publican sino en setiembre.

UN SIGLO DE PROGRESO EN LOS ESTADOS UNIDOS.

[Dé "Las Novedades" de New York.]

"El negociado de Estadística de los Estados Unidos publicó el 29 de agosto un conjunto de datos sobre el movimiento progresivo de este país desde 1800 á 1900, incluyendo en ocasiones datos hasta la fecha, cuya lectura causa espanto, aún á los iniciados en la historia contemporánea de la gran República. Mirándolos con alguna atención es como únicamente se pueden comprender las maravillas de potencialidad que se encierran en país como éste y se convence uno de qué empresas no podrá realizar con tal que las intente con su acostumbrada energía. * * *

"Este país tenía en 1800 una extensión de 827,344 millas cuadradas, y en 1902, no contando Alaska, ni las recién adquiridas colonias, tiene 3,025,600, de modo que contando todo, creció más de cuatro veces. * * * La población de los Estados Unidos, en 1800, era, según censo, de 3,308,214 habitantes; en 1900 de 76,303,387 y en 1902 se calcula en 80,000,000, números redondos, sin incluir Puerto Rico, Hawaii, Guam ni Filipinas; esto es, se multiplicó unas 23 veces.

"El crecimiento experimentado por la riqueza del país no es menos asombroso. No sabemos á lo que montaba en 1800, época en que la nación era pobrísima. En 1850 el total de la riqueza se calculaba en $7,000,000,000, un promedio de $307 por cabeza entre una población de poco más de 23,000,000 de habitantes, mientras que en 1900 el cálculo de riqueza es de $94,000,000,000, ó sea unos $1,235 por habitante.

"El movimiento de la deuda fué variadísimo. En 1800 era de $15 por habitante; en 1840 bajó la proporción á solos 21 centavos por cabeza; en 1852 era de $2.67; en 1861, antes de estallar la guerra civil, era de $2.74, y en 1865, al terminar el conflicto, había subido á $76.98 por habitante, bajando luego gradualmente hasta $13.60 en 1896 y $12.97 en 1902. Estas últimas cifras demuestran la poca mella que la guerra con España y la insurrección filipina hicieron en la hacienda americana, no obstante haber costado lo menos $600,000,000.

"Hace algún tiempo dimos apuntes sobre la riqueza agrícola é industrial de los Estados Unidos, tomando por punto de partida estadísticas de 1850, que ampliaremos ahora un poco. Las haciendas de labranza, que eran 1,449,073 y valían unos $4,000,000,000 en 1850, son 5,739,657 y valen $20,000,000,000, cinco veces más, según el censo de 1900, siendo seguro que de entonces á la fecha no perdieron en valor. Los productos de la agricultura, excluyendo animales, no se computaron hasta 1870, en cuyo año ascendieron á $1,958,000,000, para subir en 1900 á la suma de $3,764,000,000. Los productos de la industria animal, relacionada con la agrícola, fueron de $544,000,000 en 1850 y hoy son de $2,981,000,000. Los productos de industrias manufactureras, que en 1850 se calcularon en $1,000,000,000 y dieron ocupación á cosa de un millón de personas, ascendieron en 1900 á $13,000,000,000, y á 6,750,000 el número de personas ocupadas.

"Otros datos estadísticos interesantes son, por ejemplo, los que se refieren al movimiento efectuado en varios importantes ramos desde 1890 hasta la fecha. En 1890 había $1,429,251,270 en circulación, y en 1902, á principios de agosto, había $2,246,529,412. Los depósitos en las Cajas de ahorros ascendieron de $1,524,844,506 en 1890 á $2,597,094,580 en 1901; y los depósitos en bancos nacionales, que eran $1,485,095,856 en 1890, son $3,101,690,196 en esta fecha. Las liquidaciones bancarias, que montaron en 1890 á $58,845,279,505, subieron en 1901 á la aterradora cifra de $114,190,220,021, apunte que, sin más comentario, basta y sobra por sí sólo para dar adecuada idea de lo que en este país se trabaja, se compra y se vende.

"En 1890 se pagaron en sueldos y salarios en industrias manfactureras, $2,163,216,529, y en 1900 $2,734,430,848. En 1890 se produjeron 140,866,931 toneladas de carbón, y 261,677,961 en 1901. La producción de acero triplicó en ese período, pues en 1890 fué de 4,277,071, y en 1901 de 13,473,595 toneladas. La industria de hierro y acero pagó en jornales y sueldos $95,736,192 durante 1890 y $134,739,004 durante 1900. * * *

"En 1890 había 166,654 millas de ferrocarriles en operación y en 1902 hay 201,839 millas. El precio de flete por milla y tonelada bajó de 93 centavos en 1890 á 75 en la actualidad."

MÉXICO.

LA PRÓXIMA COSECHA DE TABACO.

"El Economista Mexicano" dice que se calcula que la cosecha de tabaco del presente año llegará á 8,000,000 kilogramos. Los principales centros de producción son Tuxtlas, Playa Vicente y Misantla, en Veracruz; Huimanguillo, en Tabasco, el Territorio de Tepic y los Estados de Jalisco, Oaxaca, Puebla y Chiapas. Los plantadores de tabaco encuentran fácil mercado para todas sus cosechas, y aunque la exportación de este producto disminuyó $600,000 en el año fiscal de 1901–2, comparado con el de 1900–1901, el consumo local fué tan grande, que los fabricantes de cigarros contrataron todo el que les fué posible alistar seis meses antes de la cosecha, lo que hizo disminuir necesariamente la exportación. La demanda de tabacos mexicanos es continua y urgente para Inglaterra, Francia, Alemania, Bélgica y los Estados Unidos.

NUEVO FERROCARRIL Á LO LARGO DEL RÍO TUXPAM HASTA PÁNUCO.

Se ha dado á conocer oficialmente el texto de un contrato celebrado entre la Secretaría de Comunicaciones y el Lic. D. Rosendo Pineda, en representación del Señor George W. Deits, para la construcción de un camino de hierro, que partiendo del pueblo de Cabellos Blancos ú otro punto que se juzgue conveniente sobre la margen derecha del Río Tuxpam, vaya á unirse en Atlapexco con la línea del Pánuco del Ferrocarril Central Mexicano. El concesionario está facultado para construir ramales con el objeto de unir la línea troncal de la barra de Tuxpam con Tecolutla y con los yacimientos de asfalto de la hacienda de Chapopote del Cantón de Tuxpam. El concesionario deberá terminar, por lo menos, 20 kilómetros á los dos años y otros 20, también por lo menos, en cada uno de los siguientes, de modo que quede concluido el camino en el término de cinco años.

FERROCARRIL DE CANANEA, RÍO YAQUI Y EL PACÍFICO.

"El Diario Oficial" ha publicado un contrato celebrado entre la Secretaría de Fomento y el representante de la empresa del Ferrocarril de Cananea, Río Yaqui y el Pacífico. Dicho contrato deja establecido que para el día 11 de mayo de 1905 deberán estar terminados, cuando menos, 25 kilómetros de vía férrea, y en cada uno de los años siguientes otros 50 kilómetros, de manera que el camino esté concluido el 11 de noviembre de 1901.

COMPAÑÍA MEXICANA DE NAVEGACIÓN.

"El Diario Oficial" ha publicado el texto de un contrato celebrado entre la Secretaría de Comunicaciones y la "Compañía Mexicana de Navegación," en cuya virtud se obliga á hacer con sus vapores por lo menos dos viajes redondos cada mes, entre los puertos de Veracruz y Tampico, tocando á la ida y á la vuelta en los de Nautla, Tecolutla y Tuxpam; tres viajes redondos al mes, por lo menos entre los puertos de Veracruz y Progreso, tocando de ida y vuelta en los de Coatzacoalcos, Frontera, Laguna y Campeche; y dos viajes directos al mes, entre los puertos de Veracruz y Progreso.

NUEVAS HACIENDAS METALÚRGICAS.

"El Diario Oficial" ha publicado el texto de un contrato celebrado entre la Secretaría de Fomento y los Señores M. Elsasser y Ca., para construir y explotar en la estación de Wadley, Estado de San Luis Potosí, y en otros puntos de la República, haciendas metalúrgicas para el beneficio de los minerales de antimonio, arsénico, manganeso, bismuto, plomo, zinc, nickel, cobalto, fierro, cobre y azufre y la fabricación de todos los productos químicos é industriales de estos metales.

Los contratistas quedan obligados á invertir en la construcción de las haciendas de beneficio, compra de útiles, metales, etc., la suma de 200,000 pesos; exceptuándoseles, en cambio, por una sola vez, de los derechos arancelarios de las máquinas, aparatos de todas clases, materiales y útiles para la construcción de las haciendas.

La misma Secretaría ha celebrado otro contrato con el Señor JAMES A. KILTON, para el establecimiento de una hacienda metalúrgica para el beneficio de toda clase de minerales, sean éstos de los preciosos ú otros, en la municipalidad de Matehuala, Estado de San Luis Potosí.

El concesionario queda obligado á invertir en dicha hacienda la suma de 100,000 pesos, gozando de la exención de derechos de importación de máquinas, aparatos, etc., con destino á dicho objeto.

NUEVA INDUSTRIA.

Dice "El Economista Mexicano" que un grupo de capitalistas y empresarios mexicanos y extranjeros, residentes en la capital de Mexico se ocupa en la organización de una compañía con un capital mínimo de 200,000 pesos, para el establecimiento de una fábrica de automóviles, en cuya manufactura se empleará todo el material disponible del país. Tan pronto como el mencionado capital se subscriba, se hará ante la Secretaría de Fomento la solicitud relativa á la concesión, pidiendo todas las exenciones y privilegios que otorga la ley que protege la introducción de nuevas industrias. Durante los seis meses transcurridos de enero á junio del presente año los impuestos pagados por automóviles y carruajes introducidos en México montaron á 160,000 pesos.

NUEVO BANCO DE EMISIÓN EN EL ESTADO DE OAXACA.

"El Diario Oficial" publica el siguiente convenio que otorga una concesión para el establecimiento de un Banco de emisión en el Estado de Oaxaca:

ARTÍCULO 1. Se autoriza á los Señores QUIJANO y RIVERO, sucesores de JOSÉ ZORRILLA y COMPAÑÍA, TRÁPAGA y COMPAÑÍA, y MOWATT y GRANDISON HIJOS, para establecer un Banco de emisión en el Estado de Oaxaca, con entera sujeción á las prescripciones de la ley general sobre la materia, fecha 19 de marzo de 1897, y á las siguientes bases:

A. La denominación del banco será "Banco de Oaxaca."

B. El capital social se fija, por ahora, en $500,000, quinientos mil pesos.

C. El domicilio del banco será la ciudad de Oaxaca.

D. El Banco de Oaxaca no podrá establecer sucursales fuera del territorio de dicho Estado, sino con la autorización especial de que habla el artículo 38 de la ley citada.

E. Para garantizar el establecimiento del Banco queda depositada en la Tesorería General de la Federación la suma de cincuenta mil pesos ($50,000), en bonos del 3 por ciento de la Deuda Consolidada, que será devuelta tan pronto como el Banco dé principio á sus operaciones.

F. El "Banco de Oaxaca" gozará durante veinticinco años, á partir del 19 de marzo de 1897, de todas las exenciones y diminuciones de impuestos que la ley general de instituciones de crédito concede al primer Banco que se establezca en cada Estado.

G. Será nulo el traspaso de esta concesión que no fuere expresamente autorizado por la Secretaría de Hacienda, con excepción del que autoriza el artícula 10 de la ley de la materia.

H. Para compensar al Gobierno los gastos de intervención, el Banco entregará por trimestres adelantados y en dinero efectivo, la suma de tres mil pesos treinta centavos ($3,000.30) al año, en la Tesorería General de la Federación.

I. No podrán ser miembros del Consejo de Administración ni Gerentes del Banco, los funcionarios y empleados del Poder Ejecutivo del Estado de Oaxaca, ni los de la Federación que desempeñen sus funciones en el mismo Estado. Esta prohibición se hará extensiva á los funcionarios y empleados de los Estados en que el Banco llegue á establecer sucursales.

J. La presente concesión durará treinta años, contados desde el 19 de marzo de 1897.

K. Toda controversia que se suscite con el Gobierno, con motivo de esta concesión, será sometida á la decisión de los Tribunales federales de la República, con excepción de las que deban ser resueltas administrativamente conforme á las leyes.

ART. 2. Los señores QUIJANO Y RIVERO sucesores de JOSÉ ZORRILLA Y COMPAÑÍA, TRÁPAGA Y COMPAÑÍA Y MOWATT Y GRANDISON hijos aceptan la concesión para el establecimiento del "Banco de Oaxaca," en los términos y bajo las condiciones que expresa el artículo anterior, sujetándose en todo á las leyes y disposiciones sobre la materia.

Es hecho y firmado en la Ciudad de México, á 17 de julio de 1902, en dos ejemplares, en los cuales se han adherido, expensadas por los concesionarios, las estampillas correspondientes al capital de quinientos mil pesos ($500,000).

EL PETROLEO EN LA REPUBLICA DE MEXICO.

A las riquezas naturales que en el Estado de Guerrero se han ido descubriendo últimamente se agregará, dentro de poco tiempo, otra tan valiosa como el oro.

Nos referimos á los depósitos de petróleo, en los cuales se trabaja con actividad en terrenos situados en una de las márgenes del río Mexcala ó de las Balsas.

Las primeras exploraciones se hicieron en virtud de noticias suministradas por los indígenas de aquellas regiones; se luchó al principio con las dificultades inherentes á toda negociación menos que incipiente; pero después de varios trabajos formales y costosos, se llegó á localizar la existencia de manantiales subterráneos del rico combustible.

Al presente se está en espera de la maquinaria pedida á los Estados Unidos, con la cual se van á emprender trabajos serios de explotación.

Por los informes últimamente recibidos se sabe que este aceite abunda en la región, y que su calidad varía del 60 al 72 por 100 en producto puro.

NUEVA HACIENDA METALÚRGICA EN GUAYMAS.

"El Diario Oficial" ha publicado el texto de un contrato celebrado entre la Secretaría de Fomento y los Sres. J. ESDAILE FLORANCE y RUDOLPH SCHALK, de Nueva York, para el establecimicuto y explotación en el Distrito de Guaymas, Estado de Sonora, de una hacienda metalúrgica para el beneficio de toda clase de minerales. La fundición será de capacidad mínima para beneficiar 100 toneladas métricas de mineral por día, y su fábrica deberá quedar terminada dentro de un año de la fecha del contrato.

La empresa queda obligada á invertir en el término de cuatro años, en la construcción de las obras que requiera esa propiedad, vías férreas, etc., etc., la suma de $100,000.

EL NUEVO CONTRATO DEL FERROCARRIL DE TEHUANTEPEC.

"El Diario Oficial" ha publicado el texto de un contrato celebrado entre la Secretaría de Comunicaciones y la sociedad de "PEARSON & SON, Limitada," modificando la concesión del 6 de junio de 1900, relativa al ferrocarril de Tehuantepec.

La Sociedad se denominará en lo sucesivo "Compañía del Ferrocarril Nacional de Tehuantepec."

Su capital será 5,000,000 pesos en moneda mexicana. Cada socio enterará en la caja social el día 1° de julio de 1903 la cantidad de 500 pesos; el resto, hasta completar la suma de 5,000,000 pesos, será entregado cuando sea necesario y á medida que lo sea.

En consideración á que las pérdidas, si las hubiere, serán divisibles por mitad entre el Gobierno y los contratistas, y que las utilidades serán aplicables entre ambos, el Gobierno conviene en que el capital necesario para el giro y los negocios de la Compañía del ferrocarril, será proporcionado por partes iguales por el Gobierno y los contratistas.

El término de la Sociedad es de cincuenta y un años, que comenzarán á contarse desde el 1° de julio en curso.

La Compañía tendrá su domicilio principal en la ciudad de México, y llevará su contabilidad en territorio mexicano.

Los contratistas tendrán el derecho de dar por rescindido el contrato, cuando quiera que resulte una pérdida de 4,000,000 pesos ó más en moneda mexicana.

Además, si como consecuencia de alguna disposición del Gobierno, el contrato sobre obras en los puertos de Coatzacoalcos y Salina Cruz no se ejecutare dentro del término que el mismo contrato establece, los contratistas tendrán el derecho de rescindir dicho contrato ó de que el Gobierno pague á la Compañía, durante el término de la suspensión, las pérdidas que aquella tuviere en la explotación, así como el interés sobre las deudas contraídas ó los bonos emitidos y que estén pendientes de pago.

El Gobierno tendrá derecho de exigir la rescisión del contrato: por no proporcionar la Compañía la parte del capital con que debe contribuir; por traspasar la Compañía el contrato, sin previa aprobación del Ejecutivo de la Unión; por cualquier acto de carácter delictuoso; en caso de que la Compañía haya perdido 5,000,000 pesos; si la Dirección de la Compañía llevase á cabo algún contrato cuyos objetos directos sean limitar ó impedir el tráfico general.

El Gobierno de la República ejercerá su inspección tanto sobre la parte material y técnica del ferrocarril y los puertos, como sobre todo lo concerniente á su administración y contabilidad.

La Compañía del ferrocarril fijará las tarifas para el tráfico local, no pudiendo exceder de los precios siguientes, á menos que sea autorizada por la Secretaría de Comunicaciones:

Por transporte de pasajeros, por cada kilómetro ó fracción recorrida:

Primera clase	Cuatro centavos.
Segunda clase	Tres centavos.
Tercera clase	Dos centavos.

Á cada pasajero se librarán, por lo menos, 50 kilogramos de equipaje en pasaje de primera clase, 30 en el de segunda y 15 en el de tercera.

La Compañía del Ferrocarril podrá suprimir cualquiera de las dos primeras clases en el transporte de pasajeros, mientras el tráfico no requiera las tres, á juicio de la Secretaría de Comunicaciones y Obras Públicas.

Por el porte de cada tonelada de 1,000 kilogramos de mercancías, por cada kilómetro de distancia:

Primera clase	Ocho centavos.
Segunda clase	Siete centavos.
Tercera clase	Seis centavos.
Cuarta clase	Cinco centavos.
Quinta clase	Cuatro centavos.
Sexta clase	Tres centavos.

Los portes serán siempre proporcionales á las distancias, computándose las fracciones de 10 en 10 kilogramos para carga en tren de mercancías, y de 5 en 5 kilogramos para carga en tren de pasajeros.

Toda fracción de kilómetro se contará por kilómetro entero, en el concepto de que toda distancia de menos de 15 kilómetros, se considerará como de 15 kilómetros.

La Compañía del ferrocarril no tendrá obligación de recibir menos de 50 centavos por cualquiera cantidad de porte, cualquiera que sea la distancia.

La Compañía del Ferrocarril podrá cobrar, lo que fuere preciso por gastos de recibo y entrega en los almacenes.

El cobro de telegramas no podrá exceder de lo siguiente:

Por cada mensaje que contenga hasta diez palabras, además de la fecha, dirección y firma, que se transmita á una distancia de 100 kilometros, 15 centavos.

Por cada 10 kilómetros más de distancia ó por cada palabra más que contenga el mensaje sobre las diez primeras palabras, se pagará la parte proporcional á 15 centavos, por diez palabras en 100 kilómetros.

Tráfico local, para los efectos de este artículo, es todo el que se haga entre cualesquiera puntos del ferrocarril de Tehuantepec, excepto el que se verifique entre Coatzacoalcos y Salina Cruz, y tenga por objeto embarcar las mercancías ó pasajeros. El tráfico en este caso será de tránsito.

Las tarifas de mercancías nacionales serán diferenciales, de base decreciente, por secciones, y se establecerán de acuerdo entre el Gobierno y la Compañía del ferrocarril, atendiendo á la distancia recorrida, á la procedencia, destino y clase de mercancías. El decrecimiento comenzará á los 100 kilómetros.

La Compañía del ferrocarril establecerá tarifas de tránsito. Si las tarifas establecidas fueren demasiado elevadas y no permitieren el desarrollo del tráfico de tránsito en toda la extensión de que sea susceptible, el Gobierno tendrá el derecho de requerir á la Compañía para que reduzca esas tarifas, siempre que los gastos de explotación fueren menores del 57½ por ciento del producto bruto del ferrocarril y puertos; en caso de serlo, la Compañía estará obligada á poner en observación la tarifa reducida de tránsito.

Las tarifas generales de tránsito regirán para los productos nacionales destinados á la exportatión.

La Compañía está autorizada en sus conexiones con líneas marítimas ó de ferrocarriles, para establecer en el tráfico de tránsito una tarifa especial directa del punto de remisión al de final destino, recibiendo ella un tanto por ciento de la cuota total, aunque ese tanto por ciento sea diferente en cada caso de conexión.

Respecto de la distribución de efectos en las seis clases de la tarifa de mercancías, los cereales se considerarán siempre en la sexta clase; los rieles y materiales para la construcción de ferrocarriles gozarán, además, de una rebaja de 30 por ciento sobre la tarifa de sexta clase; la tarifa de carbón de piedra será de un centavo y medio la tonelada y por kilómetro, siempre que sea en carro por entero y destinado al consumo nacional.

La aplicación de las tarifas se hará siempre bajo la base de la más perfecta igualdad, no pudiendo concederse á nadie ventaja que no se conceda á todos los que se hallen en las mismas circunstancias.

El Gobierno gozará de franquicias en el transporte de tropas, municiones, caballos, mulas, víveres, etc. La Compañía podrá importar libre de derechos, los útiles, materiales, vehículos, etc., destinados á la construcción, explotación y conservación del ferrocarril, puertos y servicios inherentes.

Para los gastos que exijan los materiales, objetos y obras mencionadas en el artículo 28, la Compañía del ferrocarril queda autorizada para tomar dinero á préstamo, consignando ó dando en garantía los productos del ferrocarriles y puertos.

Los préstamos que, conforme al artículo anterior, contrajere la Compañía del ferrocarril dentro de los siete primeros años contados desde el 1° de julio actual, tendrán un interés máximo de 6 por ciento anual y serán reembolsados en un período de cuarenta años, que correrán desde el 1° de julio de 1903, ó desde otra fecha en que se convenga. El reembolso se hará por medio de una cantidad fija que comprenda el capital y los intereses. Los términos y condiciones de la emisión y la forma de los bonos serán objeto de futuros arreglos entre el Gobierno y los contratistas.

Los préstamos que la compañía contrajere después de los expresados siete años, tendrán un interés que no excederá del 6 por ciento anual y un fondo de amortización compuesto de una cantidad igual al 1 por ciento de la totalidad del préstamo, y de otra cantidad igual á los intereses anuales que hubieren sido pagados sobre los bonos amortizados, si ellos estuvieren pendientes de pago, y serán emitidos al tipo que el Gobierno determine. Si los contratistas no estuvieron de acuerdo con los términos fijados por el Gobierno para estos préstamos, solicitarán de él que suministre el dinero pedido por la Compañía del ferrocarril, en los términos en que lo ofreció á ésta; si el Gobierno no fija el tipo de interés ni el precio á que el empréstito debe contraerse y no aprueba la forma de los bonos que deben emitirse para realizar el préstamo, todo dentro de tres meses de haber la Compañía del ferrocarril dádole noticia de la necesidad de los fondos para los fines antes expresados, ó si en caso de que los contratistas hubieren estado en desacuerdo sobre los términos fijados por el Gobierno, éste no suministró á dicha Compañía el dinero dentro de los tres meses contados desde que los contratistas comunicaren á aquél su desacuerdo, los contratistas estarán autorizados para rescindir este contrato ó para fijar ellos, mismo como administradores de la socieded, el tipo de interés, el precio de la emisión y la forma del bono, y para proceder sin dilación á realizar el empréstito requerido, sin que la autorización para fijar la forma del bono signifique que puedan contraer obligaciones más amplias ó gravosas de las que expresa este artículo.

El Gobierno tendrá el derecho de contraer empréstitos por su cuenta, dando en garantía su derecho de propiedad en el ferrocarril y puertos, los derechos á que se refiere el artículo 88, y la parte de utilidades que le corresponden conforme al párrafo VI del artículo 98; pero todo contrato celebrado por el Gobierno se entenderá subordinado al presente, á los derechos que él establece á favor de los contratistas, y á los préstamos que, conforme á este artículo, haya contraído ó contraiga la Compañía del ferrocarril, dando en garantía los productos de este y de los puertos.

La Compañía tiene el derecho de establecer un servicio marítimo en el Pacífico, en el Golfo de México y en el Atlántico, para que se haga el tráfico á lo largo de las costas de la República y con los puertos de cualquiera otra nación á quien convenga extender el tráfico.

El Gobierno se obliga á no otorgar, hásta que finalice la sociedad, ninguna otra concesión para construir ó explotar ferrocarriles ó puertos dentro de una zona de 50 kilómetros á cada lado de las obras incluídas en el contrato. Igualmente se obliga á no autorizar á las líneas de ferrocarril que, conforme á sus concesiones, tengan ahora ó en lo futuro el derecho de enlazarse con el ferrocarril de Tehuantepec, ó de hacer correr sus trenes por él, para que establezcan tarifas de tránsito desde el Golfo de México hasta el Pacífico ó vice versa, siempre que para este tránsito tengan que usar del ferrocarril de Tehuantepec.

PARAGUAY.

LA DEUDA PÚBLICA.

La deuda pública de la República del Paraguay, según un artículo publicado en el "Boletín Quincenal de la Cámara de Comercio de la Asunción," se divide en interna y externa.

La deuda interna la constituyen los títulos que llevan este nombre, las obligaciones á pagar por el Estado, la emisión de billetes monetarios y la de certificados de Tesorería, con un total, en 31 de mayo de 1902 de $11,069,020.39.

Esta deuda en el último quinquenio fue:

Diciembre 31 de 1897	$11, 329, 109. 00
Diciembre 31 de 1898	12, 085, 000. 00
Diciembre 31 de 1899	10, 481, 000. 00
Diciembre 31 de 1900	11, 825, 665. 45
Diciembre 31 de 1901	11. 043, 471. 20

En cuanto á la cuenta emisión, cuyo monto al 31 de mayo de 1902 era de $10,520,000, ha tenido las siguientes alternativas en diez años:

Diciembre 31 de 1892	$5, 392, 757. 15
Diciembre 31 de 1893	4, 684, 442. 82
Diciembre 31 de 1895	5, 000, 000. 00
Diciembre 31 de 1897	8, 676, 785. 00
Diciembre 31 de 1898	9, 785, 000. 00
Diciembre 31 de 1899	9, 885, 000. 00
Diciembre 31 de 1900	11, 291, 325. 45
Diciembre 31 de 1901	10, 566, 171, 20

Debe hacerse notar que por ley del mes de julio de 1895 se elevó á $10,000,000 la emisión.

La deuda externa la constituyen los empréstitos realizados en Inglaterra en 1871 y 1882, y en 31 de mayo de 1892 formaba un total de total de $ 4,775,077.06 oro.

De acuerdo con el convenio de 14 de agosto de 1895 se viene amortizando medio por ciento anual y erogando la nación 1½ por ciento de interés trimestral.

En el último quinquenio esta deuda fué:

	Oro.
Diciembre 31 de 1897	$4, 973, 200. 00
Diciembre 31 de 1898	4, 971, 127. 00
Diciembre 31 de 1899	4, 956, 000. 00
Diciembre 31 de 1900	4, 944, 261. 79
Diciembre 31 de 1901	4, 787, 077. 06

RENTAS GENERALES DE LA NACIÓN.

El "Boletín Quicenal de la Cámara de Comercio de la Asunción," en su número fechado junio 16 de 1902, dice que las rentas generales de la Nación han llegado en 1901 á $11,412,746.98, ó sea, tomando la cotización media del año, $1,342,676.11 oro.

Las rentas generales de la nación las constituyen las propiedades fiscales, los derechos consulares, los de carneadas, matrícula y pregón, un pequeño impuesto interno, las marcas de fábrica y de comercio, la contribución territorial, el impuesto al consumo interno, los derechos aduaneros de importación y de exportación, el producto líquido de correos y telégrafos, el registro de la propiedad, los valores oficiales (papel sellado, etc.) y los derechos de policía:

En los últimos veinte años, las rentas han sido:

	Oro.
1882, $810,506.14 ó sea	$810, 506. 14
1883, $550,243.46 ó sea	550. 243. 46
1884, $839,972.19 ó sea	839, 972. 19
1885, $1,439,900.31 ó sea	1, 439, 900. 31
1886, $2,894,425.30 ó sea	2, 894, 425. 30
1887, $2,962,235.39 ó sea	2, 962, 235. 39
1888, $3,472,761.92 ó sea	3, 472, 761. 92
1889, $4,124,674.31 ó sea	4, 124, 674. 31
1890, $1.736,112.93 ó sea	1, 157, 408. 62
1891, $1,647,717.49 ó sea	329, 543. 50
1892, $2,746,992.45 ó sea	549, 398. 49
1893, $5,775,899.29 ó sea	829, 316. 54
1894, $4,895,809.36 ó sea	815, 968. 23
1895, $5,120,247.29 ó sea	930, 954. 05
1896, $5,832,867.71 ó sea	972, 144. 62
1897, $4,200,009.80 ó sea	643, 032. 27
1898, $8,976,255.56 ó sea	1, 196, 834. 07
1899, $9,411,627.18 ó sea	1, 254, 857. 62
1900, $9,856,063.02 ó sea	1, 232, 007. 88
1901, $11,412,746.98 ó sea	1, 342, 676. 11

Hay que notar que en el año 1885 comenzó la venta de tierras públicas y el arriendo de los yerbales, cuyo importe pasó á rentas generales, así como el de la venta del Ferrocarril Central en el año 1889.

En 1890 comenzó la inconversión.

En el año 1892 se empezaron á cobrar en oro los derechos de aduana y desde 1893 las emisiones pasaron también, en su gran parte, á rentas generales.

COMERCIO INTERNACIONAL.

Durante los últimos veinte años el comercio exterior fué:

[Oro.]

Años.	Importación.	Exportación.
1882	$1, 320, 326	$1, 650, 679
1883	953, 077	1, 770, 458
1884	1, 448, 000	1, 572, 000
1885	1, 524, 000	1, 493, 000
1886	1, 621, 000	1, 571, 000
1887	2, 443, 880	2, 154, 000
1888	3, 289, 757	2, 588, 608
1889	3, 198, 167	2, 183, 381
1890	2, 721, 443	2, 900, 729
1891	1, 802, 000	3, 166, 000
1892	2, 486, 855	1, 857, 990
1893	2, 533, 299	1, 598, 960
1894	2, 222, 209	2, 220, 000
1895	2, 460, 050	2, 545, 726
1896	2, 786, 335	2, 450, 000
1897	2, 343, 303	2, 170, 638
1898	2, 598, 157	2, 453, 526
1899	2, 147, 837	2, 500, 000
1900	2, 655, 741	2, 707, 074
1901	3, 003, 657	2, 529, 306

Para mejor información se publican los siguientes detalles de la exportación de los principales frutos, durante los años de 1898, 1899, 1900, 1901 y los cinco primeros meses de 1902:

	1898.	1899.	1900.	1901.	1902.
Cueros salados	$2,132,800	$1,131,804	$3,953,250	$3,696,116	$1,290,360
Cueros secos	1,827,000	998,911	3,146,112	2,228,667	1,434,629
Vigas de madera dura	96,334	91,016	95,000	90,036	28,373
Rollizos de quebracho	74,140	205,872	216,992	354,144	102,095
Tabaco	1,528,032	967,038	2,126,614	1,425,012	447,051
Yerba borobiré	4,119,456	2,013,996	12,309,993	7,099,744	4,648,992
Yerba molida	1,118,495	1,200,173	575,841	384,000	121,791

COMERCIO É INDUSTRIAS.

Según la última publicación de la Oficina de Estadística, existen en el país 2,298 casas de comercio que giran un capital de $66,673,000, y 1,904 instalaciones industriales con un capital en conjunto de $135,448,066.

GANADERÍA.

La ganadería, según la publicación citada, contaba á fines de 1900 con 2,743,665 cabezas de ganado vacuno, que representan $100,286,835.

En 1898 había 1,744,000 cabezas, y en 1899, 2,283,093.

RIQUEZA NACIONAL.

BANANAS.

Esta planta, la más importante de las regiones tropicales y subtropicales, da un fruto delicioso que constituye una nutritiva alimentación.

Dudo que exista otra planta sobre el globo, dice el ilustre Humboldt, que en un pequeño espacio de terreno pueda producir una masa de sustancia alimenticia tan considerable. Un terreno de 5 metros puede contener de 30 á 40 plantas de bananas, produciendo al año más de 2,000 kilos de sustancia alimenticia. El trigo en el mismo terreno solo produciría 15 kilos de granos, y la papa 45 kilos.

La producción de la banana comparada con la del trigo es como de 133 á 1 y la de la papa como de 44 á 1.

En estado verde, agrega, contiene el mismo principio alimenticio que se encuentra en el trigo, arroz etc. Media hectárea de bananas de la gran especie (*Platano arton*) pueden alimentar á 50 personas; mientras que 546 kilos de harina apenas pueden alimentar á dos personas. (Essai sur la Nouvelle Espagne, tome III, páginas 24–31.)

Un racimo de bananas de peso de 15 libras daría 3 libras de harina.

Del análisis practicado por el Dr. Murray Thomson resulta que esta harina contiene: agua, 13.33; harina, 71.60; goma y azúcar, 6.82; materia nitrogenosa, 2.01; celulosa, 5.99; aceite, 0.50; sales, 0.64.

En Inglaterra se vende á 675 francos la tonelada de 2,240 libras inglesas.

De la banana madura pueden fabricarse vinos, licores, cerveza y dulce. Este último se prepara en el Brasil en forma de marmelada (*bananada*) y produce más que las bananas en racimos.

La banana secada en estufas se exporta del mismo país á Inglaterra y es una industria lucrativa.

Finalmente, de la hoja puede extraerse una fibra, que puede reemplazar el cáñamo. La *Musa textilis* es de un valor especial para este fin.

El banano se encuentra en todo en el territorio de la República, y según la estadística de 1900 existen 47,697 plantas (48 hectáreas). En 1901 se exportaron 4,650 racimos, lo que indica que ha comenzado á despertar la atención de los agricultores este importante ramo, que puede ser materia de una considerable exportación.

El cultivo es sencillo y fácil y requiere pocos cuidados.

La producción de una hectárea de bananos es de 25,000 kilos aproximadamente.

En México un acre puede producir de 700 á 800 racimos que valen $225 oro.

En el Brasil media hectárea puede contener 3,000 plantas que dan según cálculos, 2,000 racimos.

En Costa Rica, 2,225 manzanas (535.25 hectáreas) con 570,000 bananos produjeron 425,000 racimos. En 1887 la exportación ascendió á 889,517 racimos con un valor de $669,554. En 1900 se exportaron bananas por un valor de $1,354,385.

Estas cifras bastan para demostrar cuán útil y lucrativo sería el desarrollo de este cultivo, no sólo para propósitos de alimentación sino también como ramo de exportación. En este último caso las plantaciones deben situarse preferentemente en las costas de los ríos ó en su proximidad para facilitar el embarque y evitar los gastos de transporte terrestre.

PERÚ

MENSAJE PRESIDENCIAL

Al inaugurarse las sesiones del Congreso ordinario de 1902, el 28 de julio último, el Señor Presidente de la República le envió el siguiente mensaje:

"Por tercera vez tengo el honor de inaugurar las labores legislativas de esta augusta asamblea. Vuestra presencia marca un año más de paz y de progreso; que ella sea también promesa de armonía y prenda de acierto en todas vuestras resoluciónes.

"Los actos de mi gobierno, en el orden internacional, han seguido inspirándose en los elevados sentimientos de justicia, de la propia dignidad y de la más cordial armonía con los países amigos.

"Abundando en esos sentimientos concurrimos á la Conferencia

Panamericana, reunida en México en el mes de octubre último, en la cual estuvieron representadas todas las naciones de Norte, Centro, y Sud América.

"En la mencionada asamblea se adoptaron 22 acuerdos destinados á establecer vínculos de solidaridad entre las naciones de este continente y á producir á todos nuevos elementos de paz y de prosperidad.

*   *   *   *   *   *   *

"El tribunal arbitral de Suiza encargado del reparto del dinero depositado en el banco de Inglaterra, entre los acreedores del Perú, cuyos títulos estuviesen sustentados con la garantía del guano, expidió su sentencia el 5 de julio de 1901.

"Por dicha sentencia se excluye del mencionado reparto á seis de los demandantes, y se ordena adjudicar el depósito, en la proporción establecida en el fallo, á la Compañía consignataria del guano de los Estados Unidos de América, á la Peruvian Corporation, á Dreyfus Hnos., y á la Compañía Financiera y Comercial del Pacífico.

"Para poner al país á cubierto de infundadas reclamaciones deducidas de esta sentencia, ha sido indispensable, con motivo de ella, recordar al Gobierno de la Confederación Suiza las condiciones bajo las cuales el Perú resolvió presentarse como parte ante la Corte arbitral, las cuales fueron: que el arbitraje se realizara en las condiciones formuladas por el Consejo Federal Suizo, que, independientemente del derecho á la distribución del depósito, hecho en el Banco de Inglaterra, establecido por la respectiva sentencia, los que se hubiesen presentado como acreedores del Perú no podrían invocar esta última para deducir en su contra responsabilidad alguna ulterior.

"Nuestro Ministro en Suiza, en complimiento de órdenes que le fueron impartidas, ha pasado una nota al Gobierno de la Confederación, en la cual, después de rememorar el antecedente enunciado, expresa que el Perú mantiene sus declaraciones anteriores, conforme á las cuales, su intervención en el arbitraje, como parte, tuvo carácter condicional.

"El asunto relativo á las reclamaciones de súbditos italianos, por daños ocasionados con motivo de la guerra civil de 1894–95, ha quedado definitivamente concluido con los fallos arbitrales del Enviado Extraordinario y Ministro Plenipotenciario de España, Señor Don Ramiro Gil de Uribarri. El Gobierno está vivamente reconocido á este distinguido diplomático por su labor desinteresada y justiciera.

"Nuestras cuestiones de límites con las naciones vecinas se siguen discutiendo con toda tranquilidad y espíritu amistoso. En vista de las dificultades para solucionarlas por medio de arreglos directos, nuestros trabajos se dirijen á obtener el sometimiento de ellas á una decisión arbitral.

"Con motivo de una vasta concesión hecha por Bolivia á un sindicato extranjero, en la cual se comprenden territorios que consideramos nuestros, nos hemos visto en el caso de formular las protestas necesarias para dejar á salvo nuestro derecho.

"Hemos hecho conocer, al mismo tiempo, á los Gobiernos de las naciones á las cuales pertenecen los capitales interesados en la negociación y á los mismos gerentes ó personeros de la empresa, nuestras protestas.

"Se ha constituido definitivamente en América la nueva República de Cuba, cuyo nacimiento á la vida libre nos ha sido comunicado en forma oficial y afectuosa por su primer mandatario, Señor ESTRADA PALMA. Cúmpleme, pues saludar el advenimiento á la vida propia é independiente de esa nación hermana, por cuya felicidad hago los más fervientes votos.

"Objeto de las constantes preocupaciones de mi Gobierno ha sido y es la solución de nuestras cuestiones pendientes con Chile, en especial la relativa á la situación actual y suerte futura de las provincias de Tacna y Arica.

"El estado á que llegaron las negociaciones con motivo de la desaprobación del protocolo Billinghurst-La Torre, no ha permitido continuarlas.

"El Perú, como se ha hecho constar en varios documentos, ha propuesto diversos medios de solución amistosa y equitativa, incluso el arbitraje, los cuales fueron desechados por Chile. Correspondía, por consiguiente, que el Gobierno de esa nación expresara las bases sobre las cuales, en su concepto, debe descansar el arreglo; pero ellas hasta hoy, no han sido formuladas.

"Encontrará en nosotros el mejor espíritu para discutirlas y la mejor voluntad para asentir á todo lo que se encuentre dentro de los límites de la justicia y de las reglas establecidas por el tratado de Ancón. El Perú sólo ha rehusado y rehusará siempre suscribir voluntariamente su propia desmembración. No puede ni debe sofocar, en esa forma, los anhelos de la nación entera, y en especial los de los peruanos de las provincias mencionadas, cuyo patriotismo y abnegación son excepcionalmente ejemplares.

"Mi Gobierno, por lo demás, no rehuirá tomar nueva iniciativa en este asunto, si adquiere el convencimiento de que es posible llegar á soluciones satisfactorias y equitativas para ambos países, sin detrimento de la dignidad de ninguno de ellos.

* * * * * * *

"Hoy, como en el año anterior, tengo la satisfacción de deciros que el orden público ha sido conservado, merced al buen sentido de los pueblos y al general deseo de que el país progrese á la sombra de una paz perdurable; sin que hayan sido motivo para alterarlo, los pequeños disturbios ocurridos en el sur, con ocasión del estanco de la sal y de algunas huelgas de obreros, movimientos que no han revestido ningún carácter político.

* * * * * * *

"El país entrará, dentro de breve plazo, en el período álgido de la elección presidencial. La legal y tranquila trasmisión del poder, función democrática que se impone como medio único de consolidar el orden público, tan felizmente conservado durante los dos últimos periodos es hoy necesidad más premiosa que nunca, por razón de la crisis que atraviesan nuestras principales fuentes de producción.

"Hago, pues, solemne llamamiento á todos los partidos para que inspirados en los verdaderos intereses de la patria, traten de evitar las conmonciones que han sido motivo de su decadencia, cada vez que se han contrariado las legítimas aspiraciones de los pueblos.

* * * * * * *

Los ramos de correos y telégrafos van tomando notable incremento. En el año de 1901 hubo un mayor ingreso de S. 101,282.94 en la renta de correos, y en la del telégrafo fué de 32 por ciento.

"Se ha llevado la línea telegráfica de Piura hasta Zarumilla, en la frontera del Ecuador, y se construyen actualmente las de Casma á Huaráz y de Pucará á Sandia.

"Pronto se os presentará un proyecto para la construcción de una red telegráfica que, partiendo de Huánuco hacia el norte, vaya á empalmar con la de Sullana en el departamento de Piura, pasando por Huancabamba.

* * * * * * *

"Está en plena vigencia la ley de conscripción militar y con arreglo á ella, hemos renovado, casi en su totalidad, el antiguo personal del ejército, con gente joven y sana.

"Motivo de verdadera complacencia es poder anunciaros que ha terminado el cruel y odiado sistema de reclutage y que, venciendo pacientemente las dificultades inherentes á toda innovación radical, renovaremos en adelante nuestro ejército, sin fatiga para nuestra población, con los moderados contingentes que el servicio reclama; servicio que dejará de ser carga exclusiva del mísero indígena, para ser compartido por todos los ciudadanos, cualquiera que sea su clase ó condición social.

* * * * * * *

"En más de una ocasión me he dirigido á vosotros encareciendo la necesidad de atender al aumento de nuestra reducida escuadra. Os propuse el año próximo pasado el establecimiento de un pequeño impuesto al consumo del azúcar como medio de adquirir un buque escuela y una cañonera. Siendo cada día más premioso llenar este vacío, hago un nuevo llamamiento á vuestro patriotismo, para que os preocupeis de darnos los medios de adquirir esos modestos elementos, indispensables al decoro y buen servicio del Estado.

Las rentas generales para 1901 fueron calculadas en	$13, 853, 200. 00
Y dieron un rendimiento líquido de	14, 988, 180. 98
Dejando un mayor ingreso de	1, 134, 980. 98
Los gastos generales asignados en el Presupuesto de 1901 fueron de	14, 248, 195. 43
Y los egresos efectivos han ascendido á	13, 450, 419. 81
Ó sea un menor pago de	797, 775. 62
Que agregado al mayor ingreso	1, 134, 980. 98
Forman un total de	1, 932, 756. 60
Pero como los egresos no previstos, Cuentas Deudoras al Tesoro y Déficit del Presupuesto, suman en conjunto	5, 403, 173. 93
Resulta en el año una diferencia de	3, 470, 417. 33
Á cuyo servicio se han aplicado los ingresos no previstos y saldos acreedores al Tesoro por el valor de	3, 747, 397. 31
Dejando un sobrante líquido de	276, 979. 98

Existente en tesorerías, aduanas y demás oficinas fiscales, como se comprueba en la Cuenta General.

"Uno de los síntomas más halagadores de nuestra situación económica ha sido el progresivo y constante incremento en nuestras rentas generales desde el año de 1896, incremento no menos notable en el año de 1901, cuyos ingresos subieron á, $14,988,180.98; siendo los de 1900, $12,989,828.14; ó sea un mayor rendimiento en 1901 de, $1,998,352.84.

"La estadística aduanera señala un resultado igualmente satisfactorio en el comercio general de la República, con las siguientes cifras:

Importación	S/.27, 582, 239. 31
Exportación	42, 983, 788. 74
Total	70, 566, 028. 05
En 1900 alcanzó á la suma de	68, 151, 501. 78
Ó sea un mayor rendimiento en 1901 de	2, 414, 526. 27

"Comparado un año con otro vemos que las importaciones de 1901 han sido mayores en S/.4,410,732.90, mientras que las exportaciones, por razón de la baja del precio de la azúcar, han disminuido en S/.1,966,206.71.

"La exportación de minerales llegó á S/.17,508,484.55 siendo mayor en S/.557,926.20 que la del año anterior á pesar de la baja del cobre.

"El algodón exportado produjo S/.3,685,411.24, es decir, casi medio millón más que en 1900.

"El progreso de la exportación de artículos de manufactura nacional es por demás interesante. El tocuyo, que en 1900 apenas figuraba por diez mil soles, se exportó en 1901 por valor de S/.146,951.

"El guano, que había dejado de figurar entre los renglones de exportación, produjo la suma de S/. 266,409, y las hojas medicinales 255,126.

"La baja se ha hecho sentir principalmente en el azúcar, borato, café, semilla de algodón y en el oro.

"Muy digno de notar ha sido el mayor rendimiento de la aduana del Callao de S/. 2,268,345, y el de la de Mollendo de 961,416 sobre el año anterior. En cambio ha habido notable baja en el de casi todos los puertos de exportación de azúcar.

* * * * * * *

"El balance del presupuesto ordinario para 1903, es como sigue:

Ingresos	S/. 15, 396, 682. 00
Egresos	14, 562, 323. 38
Sobrante	834, 358. 62

"El del extraordinario:

Egresos	S/. 1, 235, 146. 77
Sobrante del pliego ordinario	834, 358. 62
Déficit	400, 787. 15

"El déficit indicado se cubrirá con exceso, con los dos proyectos pendientes ante el Congreso desde el año anterior; el primero que restablece el uso del timbre en el impuesto del tabaco y el segundo que modifica el Arancel de la aduana de Iquitos.

"Debe tenerse presente que el pliego ordinario de egresos para 1903 sube á la cantidad de S/.14,562,323.38; mientras en el presupuesto de 1902 sólo figura por la suma de S/.13,375,410.92; ó sea un mayor gasto ordinario para 1903 de S/.1,186,912.46.

"Diferencia explicable en parte por los aumentos en los sueldos del Poder Judicial, del ejército, pensiones de los vencedores de las distintas batallas de la guerra nacional, de las viudas y demás gracias recientemente concedidas.

* * * * * * *

"El país anhela ver resuelto el problema de la inmigración como medio único de reconstituir su población y de aumentar su comercio é industrias. Mas, para lograr ese fin, es preciso preparar convenientemente el terreno. Ocioso sería y contraproducente traer un número crecido de inmigrantes sin asegurarles una ocupación lucrativa. Algunas de las novísimas leyes que habeis dictado, como la de expropiación de terrenos y la de aguas, los caminos que se abren en la montaña, las exploraciones para conocer mejor la riqueza de nuestros bosques y navegabilidad de nuestros ríos, y las irrigaciones en la costa, son todas medidas de preparación en este mismo sentido.

"El Ministerio de Fomento va dando también forma más concreta á su labor, poniendo las bases de un plan cuya realización será de positivos resultados.

"Como no era posible que los poderes públicos contemplaran con indiferencia la crisis que atraviesa la industria azucarera, fuente principal de la riqueza agrícola, he nombrado una Comisión que haciendo detenido estudio del asunto, proponga al Gobierno las medidas que puedan inmediatamente adoptarse y aquellas que, por requerir una ley, deban someterse á vuestra consideración.

* * * * * * *

"En el año en curso se ha construído el ferrocarril mineral de Ticlio á Morococha y el ramal de Supe á Barranca; y próximamente se inaugurarán las obras de la línea férrea que debe unir el Cerro de Pasco con la Oroya, conforme con la respectiva concesión.

"Para el proyectado ferrocarril de Pisco á Lima, se han presentado varias propuestas, que se estudian en el Ministerio del ramo, y abrigo la esperanza de que obra de tan reconocida importancia se llevará al fin á debido término, conforme con las aspiraciones nacionales.

* * * * * * *

"La próxima apertura del Canal de Panamá abrirá también vastos horizontes para la nación. Con ricas minas de carbón y de petróleo á corta distancia de la costa, y con bahías como las de Paita, Chimbote y el Callao, debemos esperar fundadamente que la corriente comercial que debe fomentar aquella nueva vía, ha de beneficiar en grande escala á nuestro litoral y que ningún país reportará de ella mayores beneficios que el Perú.

"Parece pues, prudente prepararse para aquella próxima oportunidad, y hacer que no falten siquiera algunas de las mas precisas ventajas que las naves que arriben á nuestras playas tienen derecho de esperar. Entre ellas, me permito sugerir la idea de ofrecer las concesiones más liberales para la construcción de un dique seco, de suficientes dimensiones para los más grandes navíos, en el Callao ó en San Lorenzo, y para un dique flotante en el puerto de Paita.

* * * * * * *

REORGANIZACIÓN DE LA EXPOSICIÓN PERMANENTE INDUSTRIAL.

El Presidente de la República, considerando·

Que para que la Exposición Permanente establecida en Lima, responda de un modo eficaz á los fines de su institución y sea de verdadera utilidad, es indispensable darle mayor amplitud y organizar sus atribuciones y labores, decreto:

1°. La Exposición Permanente comprenderá cuatro secciones, destinadas respectivamente: La primera, á la exhibición que hoy hace de máquinas y herramientas; la segunda, á un museo industrial; la tercera, á patentes y marcas de fábrica; y la cuartá, á biblioteca y certámenes públicos.

2°. El museo comprenderá los productos industriales y las materias primas naturales de la República, debiendo formarse una colección ordenada que pueda servir de escuela práctica á los industriales, comerciantes y viajeros.

3°. En la sección de patentes se darán á conocer al público todos los modelos y descripciones de objetos y procedimientos patentados por el Gobierno, como así mismo las marcas de fábrica y de comercio, de cualesquiera clases, oficialmente registradas.

La Dirección de Fomento remitirá á la Exposición copias de las concesiones hoy vigentes; y en adelante hará dicha remisión al fin de cada mes, en el orden de los decretos expedidos. Los solicitantes deberán acompañar, al efecto, los ejemplares necesarios.

4°. La biblioteca tendrá el carácter de esencialmente industrial; contendrá publicaciones de procedimientos prácticos para la manufactura de los productos nacionales en sus diferentes aplicaciones y estará debidamente catalogada.

5°. Se establecen concursos anuales, que se realizarán el mes de julio, sobre materias relativas al desarrollo del comercio y de las industrias del Perú, y además entre los exponentes del museo. Con idéntico propósito se iniciarán y fomentarán conferencias públicas.

El Reglamento de la institución indicará la composición de los jurados, los premios y las condiciones para cada caso.

6°. La Exposición Permanente industrial funcionará bajo la administración de una junta, compuesta de cinco miembros, inclusive el Director del establecimiento, quien hará de Secretario y queda autorizado para dirijirse de oficio á los Directores de los Ministerios, á los Prefectos y Agentes Consulares del Perú, aunque sólo para asuntos relativos á su cometido.

7°. La junta formulará el nuevo reglamento de acuerdo con las disposiciones que preceden, debiendo someterlo al Gobierno, á la brevedad posible, para su aprobación.

Dado en la casa de Gobierno, en Lima, á los 5 días del mes de abril de 1902.

SALVADOR.

PRESUPUESTO PARA EL AÑO ECONÓMICO DE 1902-1903.

["Diario Oficial" de junio 7, 1902.]

INGRESOS.

URUGUAY.

COMERCIO EXTERIOR EN 1901.

La Dirección General de Estadística ha publicado un folleto que se titula "Comercio Exterior y Movimiento de Navegación de la República Oriental del Uruguay," y varios otros datos correspondientes al año de 1901, comparado con el de 1900. La importación de 1901 fue menor que la de 1900 en $286,274, y la exportación en $1,679,736, ó sean en conjunto $1,966,010.

La navegación dió en 1901 un movimiento de 2,387 buques más que en 1900, entrados y salidos reunidos.

La inmigración fue también superior en 1901 con 34,859 individuos de entrada y 33,580 de salida.

En el metálico amonedado la entrada excedió en 1901 á 1900 en $2,517,256 y la salida en $1,668,262. La renta de aduana dió en 1901 $221,529 más que en 1900.

El valor oficial del comercio exterior, por países de procedencia y destino, conforme á los aforos de la tarifa de avalúos de los artículos de importación y á los precios corrientes de plaza los de exportación, se muestra en el siguiente cuadro:

Países.	Importación.	Exportación.	Total.
Inglaterra	$6,167,348	$2,270,094	$8,437,442
Alemania	2,913,537	3,195,124	6,108,661
Italia	2,108,469	482,818	2,591,287
Francia	2,161,139	4,925,604	7,086,743
España	1,860,762	615,086	2,475,848
Estados Unidos de América	2,077,750	1,938,128	4,015,878
Bélgica	1,424,008	4,188,009	5,612,017
Isla de Cuba	99,615	463,475	563,090
Chile	87,684	288,547	376,231
Paraguay	152,562		152,562
Portugal	17,123	234,770	251,893
Holanda	6,227		6,227
Canarias		56,335	56,335
Escocia		148,079	148,079
Malvinas		3,268	3,268
Austria-Hungría		75	75
Puertos no determinados		127,877	127,877
República Argentina	3,074,753	4,339,587	7,414,340
Estados Unidos del Brasil	1,540,955	4,454,250	5,995,205
Totales	23,691,932	27,731,126	51,423,058

Se ve por el cuadro que precede que Inglaterra ha sostenido con la República Oriental del Uruguay un movimiento comercial representado por más de ocho millones de pesos importaciones y exportaciones reunidas; sigue después Francia con más de siete millones, y después Alemania con más de seis millones; luego el Brasil con muy cerca de seis millones, y viene en seguida Bélgica con mas de cinco y medio millones, y después los Estados Unidos de América con mas de cuatro millones, Italia con más de dos y medio millones, y España con más de dos millones.

Los demás países que figuran en el cuadro no han alcanzado á un millón, excepto la República Argentina que presenta más de siete millones, pero respecto á ese país debe recordarse que la mayor parte de este movimiento con la República del Uruguay es puramente de tránsito, y por consiguiente no se debe hacerlo figurar entre los que representan las verdaderas importaciones ó exportaciones destinadas á consumos recíprocos.

En las importaciones continúa Inglaterra ocupando el primer puesto del comercio exterior, y luego siguen en su orden respectivo, Alemania, Francia, Italia, los Estados Unidos de América, España, el Brasil, Bélgica, etc.

Respecto á las exportaciones Francia figura en primera línea con muy cerca de cinco millones de pesos, luego el Brasil con más de cuatro millones; Bélgica con más de cuatro; Alemania con más de tres; Inglaterra con más de dos, y los Estados Unidos de América con cerca de dos millones.

COMERCIO EXTERIOR DURANTE EL PRIMER TRIMESTRE DE 1902.

La Dirección de Aduana ha publicado en la última quincena el resumen del comercio exterior de la República durante el primer trimestre del año corriente. De ese resumen resultan los siguientes datos:

Exportación	$11,346,377
Importación	5,830,988
Á favor de la República	5,515,389

DEUDA PÚBLICA.

La Oficina de Crédito Público, según El "Telégrafo Marítimo" de Montevideo, ha dado á luz tres estados detallados relativos á la deuda pública, de los cuales se extractan las cifras siguientes:

El estado número 1 demuestra el movimiento de la deuda desde el 26 de agosto de 1897 hasta el 30 de junio último, y su resumen es el siguiente:

Monto de la deuda en 26 de agosto de 1897	$121,427,447.69
Emitido en deuda de Certificados de Tesorería y Empréstito Extraordinario, 1ª y 2ª serie, y por la ley de 1901	10,017,400.00
Amortización desde el 26 de agosto de 1897 hasta el 31 de diciembre de 1901	6,641,560.12
Amortizaciones correspondientes al primer semestre de 1902	959,592.62
Total amortizado	7,601,152.74
Monto de la deuda pública en 30 de junio último	123,843,694.95

En el cuadro que precede están calculadas las amortizaciones de las Deudas Interior Unificada, Italiana, Empréstito Brasileño, y Extraordinario de 1897, 3ª y 4ª serie, á efectuarse en julio próximo.

El cuadro número 2 demuestra las emisiones de Deuda Pública autorizadas posteriormente al 26 de agosto de 1897 para solventar servicios y gastos imputables á la administración IDIARTE BORDA, que terminó en esa fecha, y da el resumen siguiente:

Emisiones autorizadas	$8,080,000.00
Servicios y gastos imputables á la administración Idiarte Borda	8,079,949.84
Diferencia	50.16
	8,080,000.00

El cuadro número 3 demuestra el servicio de la Deuda Pública desde 26 de agosto de 1897 hasta el 30 de junio de 1902, y da el resumen siguiente:

Intereses desde el 26 de agosto, 1897, á 31 de diciembre, 1901	$21,735,152.88
Amortización desde el 26 de agosto, 1897, á 31 de diciembre, 1901	4,319,802.49
Intereses en el primer semestre de 1902	1,632,510.30
Amortización en el primer semestre de 1902	659,533.77
Total de intereses y amortizaciones	28,346,999.44
Garantías de ferrocarriles	3,831,364.80

Comisiones		$70,082.61
Gastos		4,884.87
		32,253,331.72
Cambios:		
Ganancia	$26,615.96	
Pérdida	22,241.44	
		4,374.52
		32,248,957.20

A más de esta cantidad dice una nota de este cuadro número 3, se aplicó á la amortización de la deuda de liquidación $285,797.94, entregados por la Comisión liquidadora del Banco Nacional, y $24,061.53, procedentes de comisiones de depósitos judiciales.

El monto de los títulos de deuda publica amortizados en el período comprendido desde el 26 de agosto de 1897 hasta el 30 de junio de 1902 alcanza á la suma de $7,601,152.74, valor nominal, incluidas las amortizaciones á efectuarse en los primeros días del mes de julio próximo y que pertenecen al primer semestre del corriente año, quedando un monto correspondiente al 30 de juno de 1902 de $123,843,694.95, en el que está comprendida la cantidad de $382,935.87 del empréstito extraordinario de 1897, segunda série, á emitir, y la de $226,274.95 de la deuda de liquidación también á emitir y destinada á la conversión de los créditos pasivos del Banco Nacional, de acuerdo con la ley de 16 de agosto de 1899.

La cantidad invertida en el rescate de la citada suma de $7,601,152.74 en títulos alcanza á $4,979,336.26, procedentes de rentas generales á la que hay que agregar $285,797.94, entregados por la Comisión liquidadora del Banco Nacional, y $24,081.56 producto de comisiones de depósitos judiciales que se aplicaron al aumento del fondo amortizante de la deuda de liquidación.

Sumada á la cantidad invertida en amortizaciones, procedente de rentas generales, la pagada por intereses $23,367,663.18 alcanza lo invertido en el servicio de la deuda pública desde el 26 de agosto de 1897 á $28,346,999.44, y agregando lo pagado por concepto de garantías de ferrocarriles, comisiones y gastos, con deducción de la ganancia obtenida en los cambios, por pase de fondos á Londres, forman el total, de $32,248,957.20 según se detalla en el cuadro número 3.

DATOS SOBRE LA PROPIEDAD.

Durante el año de 1901, según datos publicados por la Dirección General de Estadística, fueron vendidas en toda la República 10,018 propiedades por un valor de $17,517,149.

En 1900 se vendieron 9,107 propiedades por $15,029,090. Resulta de esta comparación que la diferencia á favor de 1901 sólo fué de 911 propiedades vendidas por valor de $2,488,050.

Montevideo es el que figura con mayor número de propiedades que cambiaron de dueño, siendo en 1901 de 4,002 propiedades por valor de $8,355,009, y en 1900 de 3,962 propiedades por valor de $7,828,621, arrojando una pequeña diferencia á favor de 1901 de 33 propiedades por pesos 526,888.

En la campaña el número de propiedades vendidas en 1901 fué de 6,016 por $9,162,140, y en 1900 de 5,145 propiedades por $7,200,469, lo que da una diferencia á favor de 1901 de 871 propiedades por $1,961,671.

En estos datos, á pesar del débil movimiento que ofrecen de un año para otro, se ve una pequeña reacción tanto en el número de propiedades vendidas como en su valor.

En el año de 1901 se hipotecaron 3,071 propiedades por valor de $6,599,894, y en 1900, 2,738 propiedades por $6,587,865. La diferencia pues en todo el país, á favor de 1901 no fué mas que de 333 propiedades por $12,029.

En Montevideo fueron hipotecadas en 1901, 1,446 propiedades por $2,789,719; y en 1900, 1,521 propiedades por $3,269,203; lo que da una diferencia en contra de 1901 de 75 propiedades por $479,484.

En la campaña las hipotecas alcanzaron en 1901 á 1,625 propiedades por valor de $2,810,175; y en 1900 á 1,217 propiedades por $3,318,662, lo que da una diferencia á favor de 1901 de 408 propiedades por $491,513.

Respecto á la edificación, cuyos datos pertenecen únicamente al Departamento de Montevideo, no ofrecen tampoco grandes diferencias entre sí los años 1900 y 1901, como se verá por el cuadro siguiente:

	Metros.
Edificios nuevos en 1901	6,452.59
Idem idem en 1900	5,151.47
Reedificación en 1901	326.91
Idem en 1900	145.77
Refacciones en 1901	2,203.95
Idem en 1900	2,382.94
Cercos idem en 1901	6,797.07
Idem idem en 1900	3,920.86
Veredas idem en 1901	4,493.22
Idem idem en 1900	3,721.84

El único dato que ofrece el cuadro anterior con resultado de alguna importancia para 1901 es el relativo á la construcción de cercos, los cuales están representados en 1901 con 2,877 metros más que en 1900. Es probable que esta diferencia indique mayor ensanche de la novísima ciudad.

REGISTROS GENEALÓGICOS DE GANADERÍA NACIONAL.

MINISTERIO DE FOMENTO,
MONTEVIDEO, *julio 11 de 1902.*

Considerando: que es de suma conveniencia para los intereses ganaderos del país el establecimiento de los Registros Genealógicos de las razas puras de las diferentes especies de animales que comprende la ganadería nacional;

Considerando: que dicho servicio puede ser eficazmente prestado, sin recargo alguno para el Erario público, por la Asociación Rural del Uruguay, cuyas buenas disposiciones al respecto han sido manifestadas al Gobierno;

El Presidente de la República decreta:

ARTÍCULO 1°. Cométese á la expresada Asociación la formación de los Registros Genealógicos de las razas puras de las especies vacuna, ovina y caballar, exceptuándose de esta última las razas de carrera.

ART. 2°. La Asociación Rural del Uruguay formulará y presentará á la aprobación del Poder Ejecutivo los Reglamentos para la formación y el funcionamiento de los mencionados Registros.

ART. 3°. Los testimonios de inscripción y las certificaciones que con arreglo á los Registros expida la mencionada Asociación, tendrán valor de instrumentos públicos para la comprobación de los hechos que en dichos Registros se anoten.

ART. 4°. Las autoridades policiales prestarán su concurso á la Asociación Rural del Uruguay siempre que le fuese solicitado, para concurrir á la formación de los Registros que por el presente decreto se disponen.

ART. 5°. La Asociación Rural del Uruguay remitirá al Departamento Nacional de Ganadería copia de cada inscripción que efectúe.

ART. 6°. Comuníquese, publíquese, etc.

GASTOS PARA EL DRAGADO DEL PUERTO.

El Senado y Cámara de Representantes de la República Oriental del Uruguay, reunidos en asamblea general, decretan:

ARTÍCULO 1°. Apruébase la inversión de ciento veinte mil (120,000) francos que como sobrante de la suma de cuatro millones novecientos mil (4,900,000) francos destinada por el contrato de 18 de enero de 1901 para material de dragado, ha hecho el Poder Ejecutivo en la compra de un vapor destinado al servicio de inspección de las obras del puerto, por el precio de treinta y dos mil pesos ($32,000), según el contrato respectivo.

ART. 2°. Este precio de $32,000 se imputará á la reserva disponible de 120,000 francos á que se refiere el artículo anterior, y además á la suma de diez mil pesos oro ($10,000) en que se integra con tal objeto el presupuesto de la Oficina Técnica Administrativa de las Obras del Puerto.

ART. 3°. Comuníquese, etc.

BOLETIM MENSAL

DA

SECRETARIA INTERNACIONAL DAS REPUBLICAS AMERICANAS,

União Internacional das Republicas Americanas.

VOL. XIII. SETEMBRO DE 1902. No. 3.

TRATADO GERAL DE ARBITRAMENTO ENTRE A REPUBLICA ARGENTINA E A DO PARAGUAY, PROCLAMADO EM 5 DE JUNHO DE 1902.

Os Governos da Republica Argentina e da Republica do Paraguay, animados do commum desejo de resolver por meios amistosos qualquer questão que suscitar-se entre os dous paizes, resolveram celebrar um Tratado Geral de Arbitramento, e para este fim nomearam como seus Plenipotenciarios, a saber:

O Exmo. Senhor Presidente da Republica Argentina, seu Enviado Extraordinario e Ministro Plenipotenciario na Republica do Paraguay, Don LAURO CABRAL, e o Exmo. Senhor Presidente da Republica do Paraguay, seu Ministro Secretario de Estado das Relações Exteriores, Don JOSÉ S. DECOUD, os quaes, tendo communicado seus plenos poderes, que foram achados em boa e devida forma, convieram nos artigos seguintes:

ARTIGO 1°. As Altas Partes Contratantes obrigam-se a submetter a juizo arbitral todas as controversias, de qualquer natureza, que por qualquer causa surgirem entre ellas, comtanto que não affectem os preceitos da Constituição de um ou outro paiz e sempre que não possam ser resolvidas mediante negociações directas.

ART. 2°. Não podem renovar-se em virtude deste tratado, as questões que tenham sido objecto de arranjos definitivos entre as partes. Em taes casos o arbitramento será limitado exclusivamente ás questões que se suscitarem sobre validade, interpretação e cumprimento de ditos arranjos.

ART. 3°. Em cada caso occorrente será constituido o tribunal arbitral que deva resolver a controversia suscitada. Si não houver conformidade na constituição do tribunal, este será composto de tres juizes. Cada Estado nomeará um arbitro e estes designarão o terceiro. Si não puderem por-se de accordo sobre essa designação, o fará o Chefe de um terceiro Estado que indicarão os arbitros nomeados pelas partes. Não pondo-se de accordo, para esta ultima nomeação, será solicitada sua designação do Presidente da Conferencia Suissa. O arbitro assim eleito será de direito Presidente do Tribunal.

Não poderá ser nomeado arbitro terceiro a pessoa que nesse caracter tenha sentenciado já em um juizo arbitral de conformidade com èste tratado.

ART. 4°. Nenhum dos arbitros poderá ser cidadão dos Estados contratantes nem domiciliado em seu territorio. Tambem não poderá ter interesse nas questões que sejam objecto do arbitramento.

ART. 5°. No caso de não acceitação, de renuncia ou impedimento de um ou mais dos arbitros, se proverá a sua substituição do mesmo modo adoptado para a nomeação do arbitro primitivo.

ART. 6°. Os pontos compromettidos serão fixados pelos Estados contratantes, que poderão tambem determinar a amplitude dos poderes dos arbitros e qualquer outra circumstancia relativa ao procedimento.

ART. 7°. Em defeito de estipulações especiaes entre as partes, corresponde ao tribunal designar a epoca e o lugar de suas sessões fora do territorio dos Estados contratantes, escolher o idioma que deverá ser empregado, determinar os methodos de substanciação, as formalidades e termos que se prescreverão ás partes, os procedimentos a seguir-se, e, em geral, tomar todas as medidas que sejam necessarias para seu proprio funccionamento e resolver todas as difficuldades processaes que pudessem surgir no curso do debate. As partes comprometem-se a por á disposição dos arbitros todos os meios de informação que delles dependam.

ART. 8°. Cada uma das partes poderá constituir um ou mais mandatarios que a representem perante o tribunal arbitral.

ART. 9°. O tribunal é competente para decidir sobre a regularidade de sua propria constituição, validade do compromisso e sua interpretação. É igualmente competente para resolver as controversias que surgirem entre as partes contratantes sobre si determinadas questões têm sido ou não pontos submettidos á jurisdicção arbitral na escriptura de compromisso.

ART. 10. O tribunal deverá decidir de accordo com os principios do direito internacional, a menos que o compromisso imponha a applicação de regras especiaes ou auctorize aos arbitros a decidir como arbitros amigaveis.

ART. 11. Não poderá ser formado tribunal sem a concurrencia dos tres arbitros.

No caso que a minoria, devidamente citada, não quizesse assistir ás deliberações ou a outros actos do processo, o tribunal será formado com sómente a maioria dos arbitros, fazendo-se constar a ausencia voluntaria ou injustificada da minoria.

Se terá como sentença o que resolva a maioria dos arbitros, mas si o arbitro terceiro não acceitasse o parecer de nenhum dos arbitros nomeados pelas partes, seu dictame será cousa julgada.

Art. 12. A sentença deverá decidir definitivamente cada ponto em litigio e com expressão de seu fundamento.

Será redactada em duplicata e firmada por todos os arbitros. Si algum delles se negar a subscrevel-a, os outros deverão fazer menção em acta especial desta circumstancia e a sentença produzirá effeito sempre que esteja firmada pela maioria dos arbitros. O arbitro em dissidencia se limitará a fazer constar sua discordia no acto de firmar a sentença e sem expressão de seus fundamentos.

Art. 13. A sentença devera ser notificada a cada uma das partes por meio de seu representante perante o tribunal.

Art. 14. A sentença legalmente pronunciada decide dentro dos limites de seu alcance a contenda entre as partes.

Art. 15. O tribunal estabelecerá na sentença o prazo dentro do qual deve ser executada, sendo competente para decidir as questões que possam surgir com motivo da execução da mesma.

Art. 16. A sentença é inappellavel e seu cumprimento está confiado á honra das nações signatarias deste pacto.

Sem embargo, será admittido o recurso de revisão perante o mesmo tribunal que a pronunciou, sempre que se interponha antes de vencido o prazo assignalado para sua execução nos seguintes casos:

1°. Si se tem dictado sentença em virtude de um documento falso ou adulterado.

2°. Si a sentença tem sido em todo ou em parte a consequencia de um error de facto que resulta dos autos ou documentos da causa.

Art. 17. Cada uma das partes pagará os gastos proprios e a metade dos gastos geraes do tribunal arbitral.

Art. 18. O presente tratado vigorará por um periodo de dez annos a contar desde a troca das ratificações. Si não fôr denunciado seis mezes antes de seu vencimento, será em vigor por outro periodo de dez annos e assim successivamente.

O presente tratado será ratificado e trocadas suas ratificações em Assumpção dentro de seis mezes de sua data.

Em fe do qual os Plenipotenciarios da Republica do Paraguay e da Republica Argentina firmaram e sellaram com seus respectivos sellos e em duplicata o presente tratado na cidade de Assumpção, aos seis dias do mez de Novembro do anno de mil oitocentos noventa e nove.

[L. S.] José S. Decoud.
[L. S.] Lauro Cabral.

Reunidos no Gabinete do Ministerio das Relações Exteriores da Republica do Paraguay suas Excellencias o Senhor LAURO CABRAL, Enviado Extraordinario e Ministro Plenipotenciario da Republica Argentina e o Senhor Doutor Don MANUEL DOMINGUEZ, Ministro das Relações Exteriores, conformes no proposito de modificar o Tratado Geral de Arbitramento celebrado entre os dous Governos em 6 de Novembro do 1899, na parte que trata da formação do tribunal arbitral, e com o objecto de assegurar sua constituição sem os inconvenientes proprios de um tribunal permanente, convieram no seguinte:

O artigo 3° do tratado referido fica modificado como segue:

"ART. 3°. Em cada caso occorrente será constituido o tribunal arbitral que deva resolver a controversia suscitada. Si não houver conformidade na constituição do tribunal, este será composto de tres juizes. Cada Estado nomeará um arbitro e estes designarão o terceiro. Si não puderem por-se de accordo sobre essa designação, o fará o chefe de um terceiro Estado que indicarão os arbitros nomeados pelas partes. Não pondo-se de accordo para esta ultima nomeação, cada parte designará uma potencia differente e a eleição do terceiro arbitro será feita pelas duas potencias assim designadas. O arbitro assim escolhido será de direito presidente do tribunal. Não poderá ser nomeada arbitro terceiro a pessoa que nesse caracter tenha sentenciado já em um juizo arbitral de conformidade com este tratado."

O presente protocollo será ratificado e trocado simultaneamente com o tratado de arbitramento do qual formará parte integrante.

Em fê do qual o firmam em duplicata na cidade de Assumpção, aos vinte e cinco de Janeiro do anno de um mil nove centos e dous.

[L. S.] LAURO CABRAL.
[L. S.] MANUEL DOMINGUEZ.

Na cidade de Assumpção, aos dez e seis dias do mez de Maio do anno de mil novecentos e dous, reunidos no Gabinete do Ministerio das Ralações Exteriores da Republica do Paraguay, Sua Excellencia o Senhor Doutor Don MANUEL DOMINGUEZ, Ministro das Relações Exteriores, e sua Excellencia o Senhor Don CARLOS BURGOS, Encarregado de Negocios *ad interim* da Republica Argentina, com o objecto de por em protocollo o accordo celebrado em conferencias anteriores, expuzeram: haver caducado o dia seis do corrente mez o prazo fixado no protocollo addicional, firmado o tres de Maio de mil novecentos e um, já prorogado por duas vezes, para a ratificação e troca do Tratado Geral de Arbitramento celebrado entre ambos os Governos o dia seis de Nevembro de mil oitocentos noventa a nove, em razão de não haver-se approvado para o citado dia pelo Congresso Nacional do Paraguay o protocollo de vinte e cinco de Janeiro ultimo, modificando o artigo terceiro do dito pacto.

Pelo qual e depois de haver exhibido seus plenos Poderes, que foram encontrados em boa e devida forma, convieram os negociadores transferir até o quinze de Julho proximo o prazo dentro de cujo termo deve effectuar-se a ratificação e troca do referido Tratado Geral de Arbitramento.

Este protocollo será considerado como parte addicional do alludido pacto.

Em fé do qual, firmaram e sellaram com seus respectivos sellos o presente protocollo.

[L. S.] MANUEL DOMINGUEZ.
[L. S.] CARLOS BURGOS.

ACTA DE TROCA.

Reunidos no Gabinete do Ministerio das Relações Exteriores da Republica do Paraguay, Sua Excellencia o Senhor Don MANUEL DOMINGUEZ, Ministro das Relações Exteriores, e Sua Excellencia o Senhor Don CARLOS BURGOS, Encarregado de Negocios *ad interim* da Republica Argentina, com o objecto de proceder á troca das ratificações do Tratado Geral de Arbitramento concluido entre a Republica do Paraguay e a Republica Argentina, o dia seis de Novembro do anno mil novecentos noventa e nove, e depois de haver-se communicado seus respectivos plenos poderes que foram achados em boa e devida forma, procederam á leitura dos instrumentos de ratificação do referido pacto internacional e encontrando-os conformes, effectuaram a troca de estylo.

Em fê do que firmaram e sellaram a presente acta, em duplicata, na cidade de Assumpção aos cinco dias do mez de Junho de mil novecentos e dous.

(Firmado) MANUEL DOMINGUEZ.
(Firmado) CARLOS BURGOS.

BOLIVIA.

DECRETO RELATIVO ÁS MARCAS DE FABRICA.

ARTIGO 1°. As patentes de marcas de fabrica levarão o numero que lhes corresponda pela ordem de seu registro no Ministerio de Fomento e terão adherido, no reverso, o debuxo que represente a marca de fabrica, sellado com o sello do Ministerio e firmado pelo Official Maior do ramo.

ART. 2°. No Ministerio de Fomento se levará um livro de registro das patentes expedidas, annotando o numero e o objecto, e adherindo outro exemplar do debuxo da marca de fabrica que será sellado e firmado pelo concessionario ou seu apoderado, devendo cumprir-se estas mesmas formalidades de garantia no registro que levam os Notarios de Fazenda.

ART. 3°. As mercadorias com marca determinada, pedidas ao estrangeiro em data anterior á da apresentação da solicitude do registro da mesma marca perante uma Prefeitura, não se considerarão objectos de commercio expedidos com marca falsificada.

ART. 4°. Os prefeitos de Departamento ordenarão que a publicação das solicitudes de deposito e registro das marcas de fabrica se faça no Boletim Departamental, ou em algum dos periodicos de mais circulação, para que sejam conhecidas opportunamente pelos commerciantes que tivessem pedido mercadorias em data anterior á da apresentação da solicitude do registro da marca.

ART. 5°. As patentes anteriormente concedidas formarão a Serie A e serão numeradas pela ordem de sua apresentação no Ministerio. A Serie B se abrirá com o No. 1, para as patentes que se registrarem desde a data.

ART. 6°. Estas disposições são complementarias das estabelecidas pelos Decretos Supremos de 24 de Março de 1897 e de 13 de Março de 1900 que continuarão em plena vigencia.

O Ministerio de Fomento e Instrucção Publica, fica encarregado da execução e cumprimento do presente Decreto.

Dado na cidade de La Paz, aos 30 dias do mez de Maio de 1902.

JOSÉ MANUEL PANDO.
ANDRES S. MUÑOZ.

ESTADOS UNIDOS.

COMMERCIO COM A AMERICA LATINA.

IMPORTAÇÕES E EXPORTAÇÕES.

Na pagina 786 apparece a ultima relação do commercio entre os Estados Unidos e os paizes latino-americanos, tomada da compilação feita pela Secção de Estatistica do Departamento do Thesouro dos Estados Unidos. A relação corresponde ao mez de Julho de 1902, com uma relação comparativa para o mez correspondente do anno anterior, assim como para os siete mezes findos em Julho de 1902, comparados com os correspondentes de 1901. Deve-se explicar que os algarismos das diversas alfandegas, mostrando as importações e exportações de um só mez não são recebidos no Departamento no Thesouro até quasi o dia 20 do mez seguinte e perde-se algum tempo necessariamente em sua compilação e impressão. Por conseguinte as estatisticas para o mez de Julho, por exemplo, não são publicadas até os primeiros dias de Setembro.

A INDUSTRIA DE CONSTRUCÇÕES NAVAES EM 1902.

Segundo estatisticas organizadas pela Repartição de Navegação dos Estados Unidos, foram construidos e registrados durante o anno fiscal que terminou em 30 de Junho de 1902, 1,657 navios de 473,981 toneladas, contra 1,709 navios de 489,616 toneladas no anno anterior. A diminuição havida no numero dos construidos foi realizada em navios de vela, barcos de canal, escaleres, etc. A tonelagem total dos navios de vela construidos durante o anno foi de 101,072 toneladas, contra 128,099 toneladas no anno anterior. Os novos barcos de canal, escaleres, etc., têm um deslocamento total de 57,502 toneladas, contra 88,331 toneladas no anno anterior. O deslocamento dos novos vapores de aço é de 275,479 toneladas, contra 235,265 toneladas no anno passado. O numero dos vapores construidos foi de 94, tendo cada um um deslocamento de mais de 1,000 toneladas. Deste numero, 41 vapores de aço de 158,631 toneladas foram construidos nos estaleiros dos Grandes Lagos. Nestes estaleiros foram construidos com destino ao serviço com as Antilhas dous vapores, o *Watson* e o *Buckman*, de 1,820 toneladas cada um; um vapor para carga denominado *Hugoma*, de 2,182 toneladas, e dous grandes vapores de carga, *Minnetonka* e *Minnewaska*, de 5,270 toneladas cada um.

O numero dos vapores de aço lançados dos estaleiros da costa é muito inferior ao que se esperava. A ceremonia de lançamento no caso de quasi todos estes vapores realizou-se tres ou oito mezes mais tarde que a data fixada, e ainda não estão promptos alguns que se esperavam ser em trafego por esta data. Essas demoras foram devidas em parte á greve havida na industria do aço no anno passado, á grande procura de aço para construcções em toda a parte do paiz, aos baixos preços de fretes no mar, e ao pequeno numero de ordens recebidas para construcções navaes. Em Julho do anno passado havia em construcção ou contractados, vapores de aço para alto mar com 255,000 toneladas de deslocamento, ao passo que na actualidade os vapores em construcção têm un deslocamento total de só 160,000 toneladas.

Os novos vapores construidos nos estaleiros de costa comprehendem o paquete transatlantico *Kroonland*, de 12,760 toneladas, o qual é o maior vapor jamais construido neste paiz; o paquete *Korea* da linha Pacific Mail, de 11,276 toneladas de deslocamento e com uma velocidade de 19 nós, o qual é o maior e o mais rapido navio mercante do Pacifico; *Shamut* e *Tremont*, de 1,606 toneladas cada um, destinados á linha de navegação que faz o serviço entre os Estados Unidos e as Philippinas, e *Alaskan*, de 8,671 toneladas de arqueação que é o maior paquete jamais lançado dos estaleiros do Pacifico. Os vapores *Finland* e *Siberia* já foram lançados ao mar e serão registrados e postos em serviço antes do fim do anno. Dous vapores já estão promptos para o serviço de navegação entre os Estados Unidos e Hawaii via Cabo Horn, e mais dous paquetes de 8,000 toneladas estão em construcção para essa mesma linha. Os nove vapores de alto mar restantes são destinados á navegação costeira.

DESENVOLVIMENTO INDUSTRIAL DURANTE UM SECULO.

A Secção de Estatistica do Departamento do Thesouro publicou recentemente uma monographia intitulada "Progress of the United States in its Material Industries" (Progresso dos Estados Unidos em suas Industrias Materiaes) que mostra as condições nos Estados Unidos por periodos de dez annos desde 1800 até 1850, e annualmente desde 1850 até 1902. Esta monographia consiste de uma serie de mappas indicando a area, população, riqueza, divida, moeda em circulação, bancos, fazendas, fabricas, rendas, despezas, importação, exportação, estradas de ferro, a industria da construcção de navios e muitos outros factores do desenvolvimento nacional.

Os algarismos consignados mostram, em muitos casos um desenvolvimento phenomenal nas industrias, finanças, producção e vias de communicação do paiz. A area do paiz ascendeu de 827,844 milhas quadradas em 1800, a 3,025,600 milhas quadradas em 1902, não incluindo a Alaska e as ilhas pertencentes aos Estados Unidos. A população por milha quadrada, que foi de 3.6 em 1810, ascendeu a 26.1 em 1902, não obstante que a area augmentou enormemente durante este periodo.

A riqueza total ascendeu de $7,000,000,000 em 1850, a $94,000,000,000 em 1900, e a riqueza por cabeça ascendeu de $307 em 1850 a $1,235 em 1900. Os algarismos relativos á divida publica e juros são os em que se nota a maior fluctuação. Em 1800, a divida publica foi de $15 por cabeça; em 1840, baixou a 21 centavos; em 1852, foi de $2.67; em 1861, antes que rebentou a guerra, foi de $2.74, ascendendo a $76.98 por cabeça em 1865, e diminuindo depois da guerra a $38.27 em 1880; foi de $14.22 em 1890, $12.64 em 1893, $13.60 em 1896 e $12.97 em 1902.

A moeda em circulação montou a $13.85 por cabeça em 1860, chegou a $20.57 durante o periodo do papel moeda, baixando depois até 1881, quando chegou a $21.71 por cabeça. Em 1892, foi de $24.60 por cabeça, $21.44 em 1896, $26.93 em 1900, e $28.40 em 1902, que foi a maior cifra a que tem chegado. Os depositos nas caixas economicas montaram a $1,138,576 em 1820, a $2,973,304 em 1830, a $43,431,130 em 1850, a $149,277,504 em 1860, $549,874,358 em 1870, $819,106,973 em 1880, $1,524,844,506 em 1890, $1,810,597,023 em 1895 e $2,597,094,580 em 1901. Os depositos individuaes nos bancos nacionaes ascenderam de $500,910,873 em 1865 a $3,111,690,196 em 1902.

O numero das fazendas ascendeu de 1,449,073 em 1850 a 5,739,657 em 1900. O valor destas fazendas incluindo os edificios, etc., foi de $4,000,000,000 em 1850 e de $20,000,000,000 em 1900, e o valor total dos seus productos ascendeu de $1,958,000,000 em 1870 a $3,764,000,000 em 1900. O valor dos animaes domesticos augmentou de $544,000,000 em 1850 a $2,981,000,000 em 1900. O valor dos productos das fabricas ascendeu de $1,000,000,000 em 1850 a $13,000,000,000 em 1900, ao passo que o numero de operarios ascendeu de menos de 1,000,000 em

1850 a 6,750,000 em 1900. O seguinte mappa mostra os algarismos de alguns dos mais importantes quadros da monographia para os annos de 1890 e 1902:

	1890.	1902.
Divida publica	$890,784,370	$969,457,214
Moeda em circulação	$1,429,251,270	$2,246,529,412
Saldos de bancos liquidados	$58,845,279,505	$1,111,190,226,021
Depositos de caixas economicas	$1,524,844,506	$2,597,091,580
Depositos de bancos nacionaes	$1,485,095,856	$2,191,690,196
Numero das fazendas	4,564,641	5,739,657
Valor dos productos de fazenda	$2,460,107,454	$3,764,177,706
Valor dos animaes domesticos	$2,418,766,028	$2,981,054,115
Producção total de carvão ... toneladas	140,866,931	261,677,961
Producção do aço ... toneladas	4,277,071	13,473,595
INDUSTRIAS MANUFACTUREIRAS.		
Numero de operarios	4,712,622	5,719,137
Total dos salarios	$2,283,216,529	$2,735,430,848
Valor dos productos	$5,369,579,191	$13,039,279,566
A INDUSTRIA DO FERRO E DO AÇO.		
Total dos salarios	$95,736,792	$134,739,004
Valor dos productos	$478,687,519	$835,759,034
Extensão das vias ferreas em trafego ... milhas	166,651	201,839
Carga transportada pela distancia de uma milha ... toneladas	520,439,082	584,695,935
Preço de frete por milha e por tonelada ... centavos	93	75

PRODUCÇÃO DO COBRE.

A Secção de Estudos Geologicos dos Estados Unidos calcula em 300,000,000 libras o stock de cobre dos Estados Unidos no dia 1° de Janeiro de 1902.

A producção do cobre no mundo em 1901, foi de 511,803 toneladas inglezas, contra 487,206 toneladas em 1900, 463,693 toneladas em 1899 e 429,379 toneladas em 1898.

A producção total de cobre nos Estados Unidos em 1901 foi de 268,782 toneladas inglezas, contra 270,588 toneladas em 1900.

O valor total do cobre exportado pelos Estados Unidos em 1901 foi de $36,071,448, contra $58,875,439 em 1900, $43,845,654 em 1899 e $35,545,251 em 1898. A Allemanha é o principal importador do cobre, pois a maior parte do metal que se envia aos Paizes Baixos está em transito para aquelle paiz; por outro lado, uma parte do cobre que se exporta para o Reino Unido é reexportada para outros paizes.

O consumo do cobre nos Estados Unidos em 1901, foi calculado em 382,761,014 libras, contra 356,891,121 libras em 1900.

MEXICO.

COMMERCIO PARA OS PRIMEIROS NOVE MEZES DE 1902-3.

As estatisticas do commercio da Republica do Mexico para os primeiros nove mezes do anno financeiro de 1902, publicadas pela Secção de Estatistica do Departamento do Thesouro, mostram que a importação foi no valor de $44,378,251 ouro, comparada com $48,037,851 no mesmo periodo do anno anterior. A exportação foi no valor de $113,496,098.50, contra $114,136,377.25 no periodo correspondente de 1901. A diminuição notada no valor da importação foi realizada principalmente nos seguintes artigos: machinas e apparelhos mechanicos, generos de algodão, papel e manufacturas de papel e licores alcoolicos. Essa diminuição não foi devida a uma reducção no consumo, mas ao facto de que os mercados estão sendo suppridos pelas fabricas nacionaes.

A industria da fabricação de algodão tem sido favorecida pelo Governo do Mexico, e a producção tem augmentado tão rapidamente que o Mexico procura mercados na America Central e do Sul para o excesso da producção. Tem-se feito grande progresso na manufactura de papel e actualmente pode-se produzir na Republica papel de qualquer classe, mas a producção não é sufficiente para o consumo. A fabricação de licores espirituosos e de cerveja tem havido enorme desenvolvimento durante os ultimos annos e o Mexico tem hoje fabricas de cerveja que produzem um artigo igual ao importado e por um preço muito menor. O alcohol empregado é produzido de plantas do paiz. O imposto sobre as fabricas de destillação importa em $500,000 annualmente.

DESPEZA DO GOVERNO PARA 1903.

A despeza geral do Governo do Mexico para o exercicio de 190 (de 1° de Junho de 1902 até 1° de Junho de 1903) é orçada em $65,429,880.64. Esta somma é $691,064.81 mais que a fixada pelo Secretario LIMANTOUR e será distribuida pelos seguintes serviços:

Poder Legislativo	$1,146,888.80
Poder Executivo	304,159.51
Poder Judiciario	425,250.65
Ministerio das Relações Exteriores	720,941.30
Ministerio dos Negocios Interiores	5,122,734.00
Ministerio da Justiça	894,284.65
Ministerio da Instrucção Publica	2,646,335.30
Ministerio do Fomento, Colonização e Industria	1,097,266.31
Ministerio da Viação e Obras Publicas	9,461,828.90
Ministerio da Fazenda e Credito Publico	7,103,512.35
Serviços administrativos	22,216,893.00
Divida Publica	14,299,785.87
Total	$65,429,880.64

A despeza para o exercicio de 1901–2 foi fixada em $62,275,101.83, que é $3,154,778.81 menos que a orçada para o exercicio de 1903.

PERU.

FOMENTO DA IMMIGRAÇÃO NA REPUBLICA.

O Governo do Peru, com o fim de attrahir a corrente immigratoria europea para este paiz, publicou um pamphleto intitulado "Guia do Immigrante," impresso em hespanhol, italiano e francez, no qual se dão a conhecer as vantagens que o Peru offerece á immigração. A região do Peru que offerece maiores vantagens á colonização é a que atravessa a "via central" desde San Luis de Shuaro até Iquitos. Essa via põe em communicação directa os oceanos Pacifico e Atlantico e proporciona duas sahidas aos productos dessa região. Os terrenos adjacentes á via podem ser explorados já seja aproveitando seus productos naturaes, como a borracha, madeiras de construcção, resinas, etc., ou mediante cultivos de cacáo, café, canna de assucar e coca. Em virtude de uma lei promulgada em Dezembro de 1898, as terras de montanha podem ser adquiridas pelas formas seguintes; por compra, pagando cinco soles por hectare; por concessão, pagando um sol por hectare nos tres primeiros annos e igual somma no successivo pela parte cultivada e dous soles por cada hectare não cultivado; por contracto de colonização e por adjudicação gratuita, sempre que esta não passe de dous hectares. Os terrenos de montanha contêm arvores productores de borracha, resinas e madeiras de construcção e o solo presta-se admiravelmente ao cultivo de cacáo, café, canna de assucar, coca, etc. A desegualdade do territorio e sua variedade climatologica e geologica permittem que no Peru se produzam todos os fructos dos paizes frios, temperados e quentes. O Governo dedica annualmente para conservação de via central e para colonização dos terrenos immediatos a quantia de 90,000 soles.

A lei de Dezembro de 1898, além de auctorizar a venda de terrenos de montanha, estabelece duas formas de contracto para a exploração de arvores de borracha; arrendamento de grupos de 150 arvores, á razão de 20 centavos annuaes por cada grupo e igual somma por cada hectare de terreno em que se achem, e arrendamento de determinado numero de hectares de terreno pelo prazo de dez annos e com prohibição de cortar ou destruir as arvores, pagando o concessionario dous soles por cada 46 kilogrammas de borracha que extrahir.

O immigrante goza dos mesmos direitos civis que os nacionaes e pode convertir-se prompto em proprietario de terrenos de montanha ou seja da região das florestas, de conformidade com a lei de 21 de Dezembro de 1898, que estabelece como formas de acquisição, a de compra, a de arrendamento, a de contracto de colonização e a de adjudicação gratuita. Terras da costa, de conformidade com a lei de 9 de Outubro de 1893, podem ser adquiridas com a condição de irrigal-as sufficientemente. O Governo offerece ao colono toda classe de franquias. A escassez de braços para a agricultura e para as industrias dá lugar a que o trabalho esteja bem remunerado no Peru. Os salarios no campo para labores agricolas variam entre setenta centavos e um sol vinte. Os artesanos, carpinteiros, ferreiros, mechanicos, etc., ganham de dous a quatro soles diarios, segundo sua competencia e a necessidade que delles se tenha.

O Peru é um paiz essencialmente mineiro. As minas de prata e de cobre são exploradas em grande escala. Abundam tambem depositos de sal, naphta, carvão de pedra, petroleo, aguas mineraes e borax. O numero das propriedades mineiras registradas de 1899 a 1902 foi o seguinte:

	Numero.
1899	1,107
1900	1,663
1901	1,014
1902	532

Quanto ás vias de communicação, além dos caminhos naturaes, fluviaes e artificiaes, o Peru tem em trafego onze vias ferreas de bitola larga, tendo uma extensão total de 1,386 kilometros, e sete estradas de ferro de bitola estreita, com uma extensão total de 204 kilometros.

VENEZUELA.

COMMERCIO DO DISTRICTO DE CARACAS DURANTE O ANNO DE 1901.

O relatorio sobre o commercio do districto consular de Caracas para 1901, apresentado ao seu Governo pelo consul inglez, mostra o movimento commercial dos portos de La Guaira, Puerto Cabello e Maracaibo. A importação dos districtos de La Guaira e de Puerto Cabello em 1901, comparada com a de 1900, mostra um ligeiro augmento no caso daquelle, e uma sensivel diminuição no caso deste, ao passo que a exportação desses dous districtos accusa um consideravel augmento sobre a do anno anterior. No districto de Maracaibo, o valor da exportação foi um pouco maior em 1901 do que em 1900. Do relatorio em referencia foram tomados os seguintes detalhes sobre o commercio e a situação geral da Republica.

Segundo os dados estatisticos publicados no Boletim de Abril 1902, houve um augmento na quantidade dos artigos de todas as classes importados pelo porto de La Guaira em 1901, em confronto com a importação do anno anterior. Dos artigos importados, os principaes foram carvão de pedra, productos alimenticios, mercadorias e cimento. Quanto aos productos alimenticios, as maiores remessas foram recebidas nos mezes de Agosto e Setembro. O augmento havido na importação desses productos foi devido á enorme quantidade de milho importada dos Estados Unidos como resultado de um decreto promulgado em Julho, que dispunha a entrada livre de direitos do milho e feijão por um periodo de dous mezes.

A importação desses productos, comparada com a do anno anterior, mostra um augmento de 2,835 toneladas. A quantidade de mercadorias importadas em 1901, foi de 1,834 toneladas mais que no anno anterior. Esse augmento se deve ao facto de que em Maio foi posta em execução uma lei establecendo um augmento de direitos de importação de 12½ por ciento, e alguns importadores anteciparam o effeito desta lei, fazendo maiores compras no estrangeiro. O augmento nas entradas de carvão attingiu a 4,396 toneladas, e o numero das embarcações empregadas neste commercio em 1901, foi de 13 mais que no anno precedente. A colheita de café do districto foi muito reduzida, devido á secca, e a exportação desse producto mostra uma diminuição de 3,010 toneladas, comparada com a do anno anterior. A exportação de cacáo foi de 1,992 toneladas menos que em 1900. A diminuição havida no numero de couros exportados foi de 32,469, ou seja 293 toneladas.

A maior parte do café exportado foi com destino a Nova York. Da quantidade total exportada, 40 por cento foi enviado ao mercado de Nova York, 20 por cento a Hamburgo e a parte restante a Havre e outros portos. O cacáo de Venezuela encontra seu melhor mercado na França. Dos 70,821 saccos desse producto exportados durante o anno, 57,000 saccos foram enviados aos tres portos de Havre, St. Lazaire e Bordeaux. Os couros e pelles vão em sua maior parte para Nova York. Dos 84,000 couros e pelles exportados, 76,000 foram enviados para este porto. Durante todo o anno de 1901, achava-se ancorado no porto de La Guaira um navio de guerra estrangeiro, e ás vezes tres ou quatro navios ao mesmo tempo. Isto foi naturalmente de grande beneficio para a cidade, pois necessitavam de grandes quantidades de carne fresca, aves domesticas e legumes. Diz o relatorio que a quantidade total dos productos importados do Reino Unido no anno de 1901, comparada com a de 1900, mostra um augmento de 3,264 toneladas, sendo o carvão o principal artigo importado.

Quanto ao movimento commercial de Puerto Cabello, diz o relatorio que as pequenas colheitas soffreram grande prejuizo por causa da secca e foram importadas grandes quantidades de cereaes. O principal artigo importado foi o arroz. Os algarismos indicando o commercio com a Allemanha e a Hollanda mostram um ligeiro augmento, comparados com os do anno anterior, ao passo que o commercio com os Estados Unidos, não obstante as maiores remessas de milho e feijão, não attingiu ás cifras do anno anterior. O seguinte quadro dá o valor e a procedencia dos generos importados no Puerto Cabello durante o anno de 1901:

	£	s	d		£	s	d
Allemanha	63, 746	11	3	Hollanda	32, 533	5	2
Estados Unidos	51, 506	0	1	Italia	4, 381	7	11
França	34, 629	1	0	Reino Unido	64, 320	3	5
Hespanha	3, 432	3	1	Outros paizes	607	8	9

Conforme estes algarismos a importação do porto mostra um augmento de 25 por cento, comparada com a de 1900, e de mais de 40 por cento, comparada com a de 1898.

O quadro que segue indica a quantidade dos artigos exportados deste porto durante o anno:

	Toneladas.		Toneladas.
Algodão	4	Madeiras de construcção	374
Cacao	456	Metaes velhos	61
Café	9, 281	Pelles de cabra	261
Coco	75	Pelles de veado	35
Couros	540	Quinina	13
Divi-Divi	7	Sementes	19

Entraram e sahiram deste porto durante o anno 325 embarcações estrangeiras, das quaes 317 eram vapores e 8 veleiros. Os pavilhões que mais se fizeram representar nesse movimento foram os norueguenses, francezes e hollandezes.

A exportação de gado vaccum de Puerto Cabello em 1901 attingiu a 66,049 cabeças, contra 18,774 cabeças em 1900 e 64,083 cabeças em 1899, que representa a exportação de Puerto Cabello e La Guaira.

O movimento commercial do porto de Maracaibo em 1901 foi muito satisfactorio. Houve um ligeiro augmento na exportação. O seguinte quadro demonstra a quantidade dos productos exportados do porto de Maracaibo durante os annos de 1901 e 1900:

Generos.	Quantitade.	
	1901.	1900.
	Toneladas.	*Toneladas.*
Assucar mascavado	283	274
Bexigas de peixe	36	43
Cacao	154	184
Café	25, 626	20, 829
Copaiba	40¾	36½
Couros	456	338
Divi-Divi	3, 368	1, 781
Fustete	6, 272	5, 421
Pelles de cabra	139	121
Pelles de veado	7¾	4½
Quinina	6¼	4

OS COMBUSTIVEIS DO MUNDO.

O assumpto da producção de carvão de pedra tornou-se um dos mais importantes em vista da crescente procura de combustiveis. Constitue actualmente uma importante questão economica na Europa, onde, devido ao desenvolvimento das industrias manufactureiras, a producção das minas de carvão não basta para as necessidades do consumo. Este assumpto foi recentemente discutido de um modo muito interessante pelo Dr. Ferdinand Fischer, de Göttingen, Allemanha, quem tem colhido com muito cuidado todos os dados que lhe foi possivel obter relativos á riqueza em carvão do mundo.

Segundo os calculos feitos pelo Dr. Fischer, as camadas carboniferas da Allemanha contêm, em numeros redondos, 160,000 milhões de toneladas de carvão; as da Grã Bretanha, 81,500 milhões de toneladas; as da Austria-Hungria, Belgica e França reunidas, 17,000 milhões de toneladas. Os depositos de carvão da Russia são ainda tão pouco conhecidos que o Dr. Fischer não faz um calculo da quantidade exploravel, mas diz que as jazidas de carvão são inquestionavelmente enormes, particularmente no Sul do paiz, as jazidas estendendo-se desde Poltava para leste até a terra dos Cossacks. Calcula em 684,000 milhões de toneladas a quantidade de carvão para ser extrahida em toda a America. Quanto á China, as informações mais recentes recebidas tendem a confirmar as conclusões a que chegou Von Richthofen relativas aos enormes depositos de carvão daquelle Imperio. Não ha razão de creer que este viajante scientifico errou quando calculou a quantidade de carvão exploravel nas dezoito provincias em 630,000 milhões de toneladas de anthracite e igual numero de toneladas de carvão betuminoso.

Não obstante que os depositos de carvão da China são os maiores do mundo, sua exploração até agora tem sido muito limitada. Os Chinezes usam o carvão mas principalmente nas regiões onde é extrahido. A condição das estradas publicas é tal que não vale a pena transportar o carvão por uma distancia de mais de vinte e cinco milhas. Si a mina está distante mais de vinte e cinco milhas de um porto maritimo ou fluvial a area da distribuição de sua producção é limitada ao local. Os vapores no porto de Shanghai supprem-se de carvão importado de Europa porque é mais barato que o carvão conduzido das minas do interior da China.

Os Estados Unidos hoje sobrepujam todas as outras nações no emprego de machinas na mineração do carvão. Os methodos mais baratos de mineração têm sido sem duvida um dos factores que tem feito este paiz o primeiro entre os paizes productores de carvão. A quantidade de carvão extrahido por machinas ascendeu de 6,200,000 toneladas em 1891 a 48,963,000 toneladas em 1899.

Na opinião do Dr. FISCHER os depositos de carvão da Allemanha são sufficientes para supprir este paiz de carvão por um periodo de 1,000 annos. Elle tambem chega á conclusão, baseada nas informações mais recentes, de que provavelmente dentro dos proximos cincoenta annos, e certamente dentro deste seculo os depositos de carvão da Grã Bretanha serão esgotados, si for mantido o actual consumo, isto é, este paiz não pode continuar indefinidamente a supprir os principaes mercados do mundo de carvão. A producção total de carvão da Grã Bretanha em 1901 foi de 219,046,945 toneladas, contra 225,181,300 toneladas em 1900, ou seja uma diminuição de 6,134,355 toneladas.

O Japão possue grandes depositos de carvão, particularmente na provincia meridional de Kiusiu. A ilha de Borneo tem ricas jazidas carboniferas, e o tem tambem Novo Galles do Sul, um facto que está dando a Sydney a sua superioridade sobre as outras cidades da Australia como um centro manufactureiro. A Africa e a America do Sul são mais pobres em depositos de carvão que qualquer dos outros continentes, mas as minas de carvão da Africa do Sul promettem supprir as necessidades industriaes do paiz.

CARVÃO NOS ESTADOS UNIDOS.

Segundo estatisticas organizadas pela Repartição de Estudos Geologicos dos Estados Unidos, a producção de carvão deste paiz em 1901 foi de 292,240,758 toneladas (de 2,000 libras), no valor de $348,813,831, contra 269,831,827 toneladas, no valor de $306,891,364, em 1900, o que mostra um augmento de 22,358,931 toneladas, ou 8 por cento em quantidade, e de $41,922,467, ou 13.6 por cento em valor. A producção de carvão anthracite de Pennsylvania ascendeu de 51,221,353 toneladas inglezas em 1900, a 60,242,560 toneladas em 1901. Isto representa um augmento de 17½ por cento, que é a maior porcentagem de augmento havida no commercio de anthracite durante vinte annos. Este augmento foi devido em parte á reduzida producção de carvão anthracite em 1900, pois a greve daquelle anno deu em resultado uma diminuição na producção de 2,500,000 toneladas, comparada com a de 1899. O preço médio do carvão anthracite entregue no mercado foi de $2.05, que é o maior preço que se tem obtido desde 1888.

A producção de carvão betuminoso, lignite, carvão "cannel," etc., ascendeu de 212,513,912 toneladas de 2,000 libras em 1900, a 224,769,091 toneladas em 1901, o que mostra um augmento de 12,255,179 toneladas, ou cerca de 6 por cento. O valor total deste producto foi de $236,309,811, contra $221,133,513 em 1900, ou seja um augmento de $15,176,298, ou um pouco mais de 7 por cento. O preço do carvão betuminoso não mostra sensivel augmento sobre o de 1901.

Dos 27 Estados que produzem carvão, 23 mostram um augmento na producção, e 4 Estados accusam uma diminuição. Os 4 Estados cuja producção diminuiu foram California, Montana, Novo Mexico e Tennessee. O seguinte quadro demonstra a producção do carvão betuminoso por Estados:

Estados.	Producção.	Valor.
Alabama	9,078,677	$9,987,811
Arkansas	1,784,136	2,033,193
California	151,079	394,106
Colorado	5,699,016	6,411,891
Georgia e Carolina do Sul	354,825	426,685
Illinois	27,313,296	28,452,278
Indiana	6,962,940	7,078,842
Iowa	5,578,522	8,016,274
Kansas	4,880,526	5,973,381
Kentucky	5,487,994	5,208,094
Maryland	5,113,127	5,046,491
Michigan	1,040,530	1,543,756
Missouri	3,799,993	4,703,174
Montana	1,396,081	2,009,316
Novo Mexico	1,086,546	1,546,652
Dakota do Norte	166,085	212,635
Ohio	19,695,723	19,789,958
Oregon	69,011	173,646
Pennsylvania	82,914,840	82,099,906
Tennessee	3,546,551	3,969,249
Territorio Indiano	2,408,943	3,887,793
Texas	1,086,012	1,885,083
Utah	1,322,614	1,666,082
Virginia	2,953,999	2,523,270
Washington	2,578,217	4,271,076
West Virginia	23,816,434	20,908,705
Wyoming	3,485,374	6,060,562
Total do carvão betuminoso	224,769,091	$236,309,811
Total de carvão de Pennsylvania	67,471,667	112,504,020
Total	292,240,758	348,813,831

A producção de carvão dos Estados Unidos no anno de 1901 foi 20 por cento mais que a da Grã Bretanha; 80 por cento mais que a da Allemanha; sete vezes mais que a da Austria-Hungria e oito vezes mais que a da França.

A Inglaterra, porem, continua a exportar maior quantidade de carvão que todos os outros paizes reunidos. Suppre maior numero de estações para carregar carvão que qualquer outro paiz. Neste commercio tem a vantagem sôbre todos os paizes que lhe fazem concurrencia porque seus depositos de carvão estão situados perto do mar de modo que o carvão pode ser embarcado a pouco custo. Devido ao emprego de machinas na extracção do carvão, o carvão norte-americano á bocca da mina não custa tanto como o carvão inglez, mas quando entregue ao porto de embarque, custa mais que este.

Outra razão por que os Estados Unidos não podem fazer concurrencia com a Inglaterra neste commercio, é a grande distancia entre este paiz e os paizes da Europa Continental, que são os principaes importadores deste producto. Assim a Inglaterra tem vantagens especiaes para a exportação e não deixa de aproveital-as, não obstante que economistas affirmam que este seculo verá esgotados seus depositos de carvão.

Conforme o estudo comparativo dos depositos de carvão da Grã Bretanha e os Estados Unidos, feito recentemente por A. S. E. Ackermann, a area das camadas carboniferas nos Estados Unidos e no Reino Unido, é de 225,000 e 9,000 milhas quadradas, respectivamente. Os depositos de carvão dos Estados Unidos não têm sido explorados por tanto tempo como os da Grã Bretanha. Naquelle paiz as camadas são mais espessas e virtualmente horizontaes, ao passo que neste as jazidas são inclinadas e tão delgadas que um veio de 15 pollegadas não deixa de ser explorado. Talvez a maior differença entre as camadas carboniferas dos dous paizes é a profundidade a que são exploradas. Poucas minas norte-americanas têm uma profundidade maior que 200 pés, ao passo que no outro lado do Atlantico, não é raro extrahir carvão a uma profundidade de 4,000 pés. Outra vantagem de que goza este paiz é a escassez nas minas de gaz inflammavel.

Os salarios dos mineiros são maiores nos Estados Unidos que na Inglaterra. A quantidade de carvão extrahido annualmente pelo mineiro norte-americano, é pela média de 526 toneladas, ao passo que a quantidade extrahida pelo mineiro inglez é de só 300. Nos Estados Unidos a indemnização exigida em consequencia do descahimento da região sobre as minas é muito menor que no estrangeiro, porque esses terrenos são em geral de propriedade das companhias de carvão. Nos Estados Unidos os preços de fretes das vias ferreas são muito mais baixos que os pagos na Grã Bretanha. Isto é devido a duas causas: Primeiro, o carvão nos Estados Unidos é em geral transportado em carros contendo 50 toneladas, ao passo que na Grã Bretanha é conduzido em carros da capacidade de só 6 ou 10 toneladas; segundo, o capital empregado nas vias ferreas da Ingleterra em relação á sua extensão, é muito maior que nos Estados Unidos, e as companhias hão de estabelecer tarifas altas afim de obter rendimento para o pagamento dos dividendos. As despezas com a extracção de carvão nos Estados Unidos são sómente a metade das na Grã Bretanha.

PETROLEO COMO COMBUSTIVEL.

Nesta connexão, são de interesse as experiencias que a Marinha dos Estados Mnidos fez ultimamente com o petroleo como combustivel. O resultado desses ensaios foi muito satisfactorio e não ha duvida de que o petroleo substituirá o carvão de pedra como um elemento de guerra naval. Como nos Estados Unidos existem depositos quasi inexgotaveis de petroleo, a marinha deveria ter uma grande vantagem militar e estrategica si o petroleo como combustivel fosse adoptado para fins navaes. Constitue uma vantagem de consideravel importancia ter o petroleo empregado sob a acção de uma corrente natural de ar. Mas no caso dos navios de guerra, o uso de petroleo como combustivel será vantajoso sómente quando empregado sob a acção de uma corrente esforçada de ar. Uma commissão de officiaes navaes tem feito experiencias durante um anno com uma caldeira de tubos de agua especialmente construida para este fim. Esses ensaios foram feitos sob a acção de uma corrente natural de ar, assim como de uma corrente esforçada de uma, duas e tres pollegadas de pressão. Foi empregado carvão de qualidade superior, assim como o de qualidade ordinaria. O consumo de carvão variou de 18 a 70 libras por pés quadrado de grade. Os resultados detalhados desses ensaios serão publicados em breve pela "Bureau of Steam Engineering."

PETROLEO SOLIDO.

Mr. BRUNOT, Consul dos Estados Enidos em St. Etienne, França, em um relatorio recentemente apresentado ao seu Governo, diz que uma companhia naquelle paiz está actualmente occupada na fabricação de petroleo solido, isto é petroleo solidificado de modo que pode ser manejado como carvão ou coke. Diz o Consul BRUNOT que este producto é manufacturado na forma de briquettes, que se compõem em sua maior parte de petroleo, crú ou refinado, e possuem todas as qualidades desejaveis do carvão e petroleo ordinario.

Esses briquettes têm pouco peso e deixam sómente 2 ou 3 por cento de residuo; não derretem-se; queimam sem cheiro e sem fumo; não absorvem humidade; fluctuam na agua; não explodem; não estão sujeitos á combustão espontanea; podem ser conservados por grande periodo de tempo, sem perder suas qualidades de combustão; dão uma chamma muito branca de 8 a 10 pollegadas de altura; produzem duas vezes mais calor que o carvão e podem ser usados em um forno de qualquer classe e manipulados com facilidade.

Crê-se que este novo combustivel será particularmente valioso para torpedeiros, e em caso de necessidade, para navios maiores. Os briquettes occupam sómente a metade do espaço exigido para o carvão, e calcula-se que uma embarcação que necessita de 2,000 toneladas de carvão para navegar certo numero de milhas, pode cobrir a mesma distancia, usando sómente 1,000 toneladas de briquettes de petroleo. Das substancias empregadas na manufactura deste novo combustivel a mais custosa é o petroleo. Os outros ingredientes que entram em sua composição e o trabalho e machinas custam relativamente pouco.

ALCOOL.

Segundo noticias recebidas, as companhias de navegação Norddeutsche Lloyd e Hamburg-American resolveram fazer uma serie de experiencias com o fim de determinar o valor do alcool como combustivel. Os destilladores allemães estão confiantes do bom exito dessas experiencias e já recommendam com urgencia o emprego do alcool em vez do carvão como combustivel para a marinha allemã. Um metro cubico de alcool produz duas vezes mais calor que um metro cubico de carvão. O uso deste combustivel trará indubitavelmente grandes vantagens. Queima sem fuma, circumstancia que, especialmente no caso dos torpedeiros, será de grande importancia.

TURFA.

Nos ultimos annos tem-se dado seria attenção á praticabilidade do emprego de turfa como combustivel. Nos paizes do Norte da Europa, na Irlanda e em outras regiões, existem importantes depositos de turfa que tem sido explorados por muito tempo. Mesmo na Allemanha, paiz que é relativamente rico em carvão, os depositos de turfa são explorados em grande escala. Nos Estados Unidos, devido á abundancia de carvão e outros combustiveis, tem havido pouco incentivo á exploração de seus ricos depositos de turfa. O Canadá é virtualmente destituido de carvão, mas tem enormes depositos de turfa e usa este combustivel em grande escala.

A turfa, em seu estado natural, é um combustivel de pouco valor. Contem, suspensa na rede de fibras vegetaes de que se compõe, grande porcentagem de agua. Varios methodos para a preparação da turfa têm sido experimentados. Têm-se feito numerosas experiencias com o fim de produzir um coke mas até agora têm tido pouco exito. Um processo recentemente inventado promette melhores resultados. Ao que se diz o coke produzido por este processo é muito valioso e será em breve empregado em larga escala como combustivel.

BIBLIOGRAPHIA.

Nesta secção do Boletim Mensal se tratará dos livros e folhetos enviados á Secretaria Internacional das Republicas Americanas que se referem a assumptos de interesse aos paizes da União Internacional das Republicas Americanas.

Recebemos o Volume IV da Revista do Museu Paulista, São Paulo, 1900. Este é um volume de 600 paginas e contem os seguintes artigos: Descripção de ninhos e ovos das aves do Brazil, por Carlos Euler; aves observadas em Cantagallo e Nova Friburgo, por H. von Ihering; Joaquim Correia de Mello, por José de Campos Novaes; catalogo critico-comparativo dos ninhos e ovos das aves do Brazil, por H. von Ihering; alguns fosseis paleozoicos do Estado de Paraná, por E. Kayser; nota sobre o curare, pelo Dr. J. Bach; A *Hyla pulchella* Dum. Bibr. e a funcção chromatica, por P. A. Schupp; observações sobre alguns caracóes terrestres do Brazil, por Henry Suter; archeologia Rio Grandense, por I. M. Paldaof; sobre alguns peixes de S. Paulo, Brazil, por Carl H. Eigennann e E. Allen A. Norris; notas sobre coccidas, por T. D. A. Cockerell, e as coccidas brazileiras, por Adolph Hempel; os caracóes do genero *Solaropsis*, por H. von Ihering.

BULLETIN MENSUEL

DU

BUREAU INTERNATIONAL DES RÉPUBLIQUES AMÉRICAINES,

Union Internationale des Républiques Américaines.

VOL. XIII. SEPTEMBRE 1902. No. 3.

RÉPUBLIQUE ARGENTINE.

COMMERCE DE ROSARIO POUR L'ANNÉE 1901.

L'évaluation officielle des importations qui ont passé par la douane de Rosario en 1901 a été de $11,211,486 en or, contre $9,569,015 en 1900. Ces chiffres sont répartis comme suit: denrées, $1,665,648; vins et spiritueux, $508,343, (soit une plus-value de $73,000); drap filé ou tissé, $896,082, (soit une diminution de $443,000); drogues, etc., $423,517; bois de construction, etc., $1,071,258, (soit une augmentation de $129,000); quincaillerie, instruments agricoles, etc., $2,743,789, (contre $1,677,176 en 1900); matériaux de construction, couleurs, huiles, etc., $2,115,801, (contre $1,492,125 en 1900); coméstibles, huile de pétrole, etc., $657,217, (soit une augmentation de $72,000). Les importations, qui étaient de $128,941 en 1900, sont tombées à $60,721 en 1901. On attribue en partie cette diminution à une consommation plus considérable de produits indigènes.

En 1901, les principaux produits exportés de Rosario ont été les suivants: blé, 421,009 tonnes, (soit une diminution de 388,000 tonnes); graine de lin, 153,857 tonnes, (soit une augmentation de 71,000 tonnes); maïs, 273,459 tonnes, (soit une augmentation de 13,500 tonnes); sucre, 39,447 tonnes, (soit une augmentation de 23,400 tonnes); quebracho, 29,077 tonnes; foin, 78,041 tonnes. La valeur totale des exportations a été de $28,265,319 or, contre $29,256,194 en 1900. Les exportations aux pays suivants accusent une augmentation: Royaume-Uni, $400,000; Etats-Unis, $700,000; France, $230,000; Brésil, $640,000; Belgique, $129,000; Espagne, $232,000; Uruguay, $72,000; Paraguay, $112,000.

Les pays suivants accusent une diminution dans les exportations: Allemagne, $300,000; Italie, $60,000; Portugal, (y compris Saint-Vincent), $2,544,000; divers pays, (y compris l'Afrique du Sud) $611,000. Le Royaume-Uni envoie un tiers des importations et reçoit un quart des exportations.

Pendant l'année 1901, 635 navires, d'un tonnage total de 993,347 tonnes, sont entrés dans le port de Rosario. Sur ce nombre il y avait 411 navires anglais jaugeant 681,039 tonnes et 93 navires allemands jaugeant 174,311 tonnes.

EXPORTATIONS DE LA RÉPUBLIQUE.

Voici les exportations pendant les cinq premiers mois de l'année 1902, énumérées par articles et quantités:

Bétail	têtes	37,877
Chevaux	do	7,931
Moutons	do	25,528
Mouton gelé	tonnes	26,951
Crin	do	798
Peaux de chèvres	do	619
Peaux de moutons	do	13,506
Cuirs salés	do	15,178
Cuirs sechés	do	6,884
Laine	do	139,208
Bœuf seché	do	10,503
Bœuf gelé	do	23,412
Graisse	do	19,901
Os	tonnes	11,845
Graine de lin	do	294,810
Maïs	do	202,109
Foin	do	39,938
Blé	do	439,432
Sucre	do	18,448
Farine	do	12,606
Son	do	42,652
Essence de quebracho	do	3,348
Billes de quebracho	do	114,480
Peaux de nutria	do	393
Plumes d'autruche	do	18

CHILI.

PRIME POUR LA FABRICATION DE L'ACIDE SULFURIQUE.

Voici une traduction d'une loi votée récemment par le Congrès National Chilien et dont le texte a été publié dans le "Diario Oficial" du 12 juin 1902:

"Article premier. Il sera accordé une prime de 3 centavos par chaque kilogramme d'acide sulfurique à 60 degrés Baumé qui sera fabriqué dans le pays, pourvu que la production de chaque fabrique ne soit inférieure à 1,500 tonnes annuellement.

"Art. 2. Pour jouir de cette prime, les intéressés devront commencer les travaux d'installation de leur fabrique dans le délai d'une année, à partir du jour de la promulgation de la présente loi.

"Art. 3. Le Président de la République est autorisé à dépenser annuellement une somme totale pouvant aller jusqu' à 50,000 pesos, et cela pendant cinq années, pour payer les primes prévues à l'article premier.

"ART. 4. Si la somme de 50,000 pesos est insuffisante pour subventionner la production totale des différentes fabriques d'acide sulfurique qui s'établiront dans le pays, le montant en sera réparti au prorata de la production de chaque fabrique."

A ce propos nous croyons utile de rappeler que les pyrites propres à la fabrication de l'acide sulfurique abondent au Chili.

L'acide sulfurique trouverait surtout un débouché important dans le traitement, par la voie humide, des minerais de cuivre pauvres que l'on rencontre en abondance dans la Cordillère.

COLOMBIE.

TARIF DES DOUANES.

[Mis à jour jusque mars 1902.]

[Monnaies, poids et mesures.—L'unité monétaire en Colombie est le peso, qui se divise en 100 centavos et dont la valeur nominale est de 5 francs. Pour les poids et mesures, la Colombie a adopté le système métrique.]

Les produits étrangers acquitteront par kilogramme, à leur entrée sur le territoire national, les droits ci-après mentionnés. (Loi 36 de 1886.)

Ces droits bénéficieront des réductions suivantes: 40 pour cent dans les douanes d'Arauca et Meta (Loi 53 de 1884 et décret 397 de 1886); 20 pour cent dans la douane de Buenaventura; 55 pour cent pour les tissus de coton non brodés et 30 pour cent pour les autres marchandises dans la douane de Tumaco (Lois 10 et 129 de 1888).

Chaque liquidation en douane sera frappée d'une surtaxe de 25 pour cent à répartir entre les départements, à l'exception de celui de Panama. (Lois 88 de 1886, 48 de 1887 et 10 et 129 de 1888.)

Ne bénéficieront pas des réductions et ne subiront pas de surtaxes les droits stipulés dans le décret 453 de 1893.

Nos.	Articles.	Droits.
	Aliments et condiments.	*P. C.*
1	Patates ou ignames, pommes de terre, oignons, maïs, riz, pois chiches, lentilles, haricots et toute autre espèce de légumes, de plantes potagères et de fruits frais	0.01
	Les mêmes importés par les douanes de Buenaventura et de Tumaco (Loi 29 de 1887) [a]	Exempts.
2	Ail	.05
3	Farines, y compris le sagou, l'arrow-root, le tapioca, le maïzena et autres produits analogues	.05
	Les mêmes importés par les douanes de Buenaventura et de Tumaco (Loi 29 de 1887) [a]	Exempts.
4	Farine de froment préparée pour vermicelles et autres pâtes alimentaires similaires, importée pour la fabrication de ces produits (Décret 537 de 1888.—"Diario oficial" 7430) [b] [c]	.01

[a] Le Gouvernement taxera ces produits dès que le motif qui a provoqué l'exemption n'existera plus. (Art. 2 de la loi 29 de 1887.)

[b] Décret nº 1278, du 29 décembre 1894 ("Diario oficial," nº 9677, du 11 janvier 1895).—Est abrogé le décret nº 537 de 1888, réduisant les droits d'importation applicables à quelques matières premières destinées à l'industrie.

[c] Une ordonnance, en date du 16 novembre 1889, annexée au projet de loi budgétaire de 1890, ayant statué que l'orge doit être rangée parmi les produits alimentaires de la 2e classe du tarif, par ordonnance du 26 juin 1895, le même régime devra, par analogie, être réservé au froment, qui est un produit de même nature. ("Diario Oficial," nº 9781, du 6 juillet 1895.)

[a] Cette taxe ne comprend pas l'augmentation qui fait l'objet du décret 453 de 1893.

[b] Décret nº 447, du 3 octobre 1895, modifiant le decret nº 1449 de 1893 qui fixe les droits applicables au sel importé par les douanes de Buenaventura et de Tumaco. ("Diario Oficial," nº 9842, du 8 octobre 1895.)—Sont réduits à 10 centavos par 12½ kilogrammes les droits d'entrée applicables au sel importé par les douanes de Buenaventura et de Tumaco.

Cette réduction s'effectuera par dixièmes, à raison d'un dixième par mois, à partir du 2 janvier prochain, conformément aux stipulations de l'article 205 de la Constitution.

[c] Décret nº 299, du 12 mars 1901, établissant le régime applicable au sel. ("Diario Oficial," nº 11449, du 23 mars 1901.)—Art. 3. Le droit applicable dans les douanes de la République à l'importation du sel étranger sera de 4 pesos par 12 kilogrammes et demi.

Un décret du Pouvoir Exécutif pourra réduire le droit dont il s'agit dans les douanes de Buenaventura et de Tumaco.

Sont modifiés dans ce sens l'article 1er du décret nº 11 de 1901 et l'article 1er du Tarif des douanes.

[d] Cette taxe ne comprend pas l'augmentation sur le vin de Saint-Raphaël, qui fait l'objet du décret 453 de 1893.

[e] Décret nº 846, du 15 juillet 1901, établissant les droits d'importation applicables à l'alcool et à d'autres spiritueux. ("Diario Oficial," nº 11536, du 8 août 1901.)—ARTICLE UNIQUE.—A partir du jour où le présent décret sera parvenu à la connaissance des administrateurs respectifs des douanes de la République, l'alcool et les liqueurs ci-après dénommés acquitteront les droits de douane suivants:

Eau-de-vie, absinthe, alcool (absolu pur, purifié, rectifié, etc.), amers, brandy, cognac, crèmes, curaçao, chartreuse et autres pousse-café, genièvre, kirsch, rhum, whiskey et autres similaires	kilogramme	$2.00
Extraits de cognac, essences et alcool pour la fabrication des liqueurs	id	10.00

---

[a] En vertu d'une ordonnance ministérielle en date du 4 janvier 1899, la stearine rangée sous le nº 87 du tarif est assimilée à l'acide stéarique et suivra le régime de ce dernier produit tarifé, d'après le nº 90 du tarif, à raison de 1 centavo le kilogramme. ("Diario Oficial" nº 10861, du 16 janvier 1899.)

[b] I. Décret nº 438, du 28 septembre 1897, prohibant l'importation des allumettes, ainsi que des matières premières destinées à leur fabrication. ("Diario Oficial" nº 10461, du 5 octobre 1897.)—ARTICLE PREMIER. Est prohibée, à partir du 8 octobre 1897, l'importation dans le territoire de la République des allumettes de toute sorte et des matières premières ci-après dénommées, ainsi que des articles destinés à leur fabrication et à leur conditionnement, à savoir:

1º Phosphore ordinaire.
2º Phosphore rouge.
3º Bois débité ou bouts de bougie pour allumettes.
4º Boîtes en carton.
5º Carton préparé pour la fabrication des boîtes.

ART. 2. Les allumettes et les matières ci-dessus spécifiées importées après la date sus-indiquée seront considérées comme contrebande et confisquées conformément aux dispositions douanières, et la moitié de la valeur de la contrebande sera attribuée aux dénonciateurs ou à ceux qui auront fait la saisie, et l'autre moitié reviendra à l'adjudicataire du monopole de la fabrication et de la vente des allumettes.

II. Ordonnance ministérielle du 30 décembre 1898, autorisant l'importation des allumettes. ("Diario Oficial," nº 10857, du 11 janvier 1899.)—Sont autorisés la fabrication, l'importation et le commerce des allumettes, moyennant l'observation des lois en vigueur.

III. Ordonnance ministérielle du 18 janvier 1899, suspendant l'exécution de l'ordonnance du 30 décembre 1898 relative à l'importation des allumettes. ("Diario Oficial" du 24 janvier 1899.)—Sont suspendus les effets de l'Ordonnance ministérielle du 30 décembre 1898, autorisant la fabrication, l'importation et le commerce des allumettes.

[c] Par ordonnance du 18 octobre 1897, le carbure de calcium doit être rangé dans la troisième classe et l'iodolithe dans la quatrième classe du tarif, c'est-à-dire, respectivement, aux droits de 2½ et 5 centavos. ("Diario Oficial" nº 10510, du 11 décembre 1897.)

[d] Cette taxe ne comprend pas l'augmentation qui fait l'objet du décret 453 de 1893.

[a] Ordonnance du 23 février 1895, relative au régime applicable aux machetes (coutelas) et couteaux. ("Diario Oficial" nº 9706, du 28 février 1895.)—Pour la classification des couteaux et machetes de provenance étrangère, ainsi que pour ceux de ces articles, dont le dédouanement n'aurait pas encore été effectué, les douanes devront se conformer aux stipulations suivantes:

Les serpes (*calabozos*), faucilles (*agüinches*) et autres instruments tranchants pour le défrichement, ainsi que les machetes (coutelas) ou couteaux de chasse ne dépassant pas une longueur de 40 centimètres (40 pouces), seront rangés dans la 4ᵉ classe du tarif des douanes, au droit de 5 centavos par kilogramme. Les couteaux ou instruments tranchants employés dans les arts et métiers tels que couteaux pour relieurs et pour cordonniers, et ceux à l'usage des travaux des champs (autres que les instruments tranchants employés au défrichement et les couteaux de chasse ci-dessus dénommés) seront rangés dans la 6ᵉ classe, au droit de 20 centavos.

Les machetes et *peinillas* qui se portent avec ceinturon (autres que ceux employés dans l'armée), les poignards et tous autres objets similaires, seront considérés comme armes blanches et rangés dans la 14ᵉ classe au droit de $1 par kilogramme.

Les machetes, *peinillas* et sabres employés dans l'armée sont des armes de guerre et, comme telles, prohibés à l'importation.

Les couteaux ordinaires de table sont rangés dans la 8ᵉ classe et ceux avec manche en ivoire, nacre, plaqué et métal anglais sont compris dans la 14ᵉ classe.

Les couteaux et machetes non dénommés aux paragraphes ci-dessus sont compris dans la 8ᵉ classe. Si les manches, les fourreaux ou les autres parties des machetes ou couteaux, etc., étaient en argent ou en une matière autre que celle généralement employée à leur fabrication, et s'il arrivait, que, en raison de leur poids ou d'autres circonstances, ces parties eussent été plus fortement taxées, étant importées séparément (ordonnance du 10 février 1887, "Diario Oficial" nº 6958), les machetes ou couteaux dont il s'agit suivront, pour leur tarification, le régime applicable à cette dernière matière.

[b] Ordonnance du 10 mai 1895, complémentaire à la disposition relative aux machetes ou couteaux de chasse, ("Diario Oficial" nº 9753, du 17 mai 1895.)—La loi nº 129 de 1888, qui, dans la tarification des machetes ou couteaux de chasse, a établi pour cet article une longueur ne dépassant pas 20 pouces, a entendu s'en référer à la mesure anglaise ainsi dénommée, qui est celle généralement désignée dans les catalogues de modèles publiés par les maisons qui fabriquent ceux de ces articles qui s'importent ordinairement dans le pays. Cette mesure est, d'ailleurs, celle dont on se sert dans les commandes et dans les factures commerciales et que l'on emploie communément dans les achats et ventes effectués sur les marchés du pays.

En conséquence, pour la perception des droits d'importation, les douanes rangeront dans la 4ᵉ classe du tarif les machetes ou couteaux de chasse dont la lame ne mesure pas plus de 0.508 mètre de longueur, équivalant à 20 pouces anglais.

246	Bagages, jusqu'à concurrence de 500 kilogrammes, des ministres et agents diplomatiques de la République retournant dans leur pays, pourvu qu'ils les apportent avec eux et qu'ils déclarent sur l'honneur qu'ils n'importent pas dans ces bagages des articles destinés à la vente (Loi 36 de 1886)	(a)
247	Meubles usagés importés par les envoyés extraordinaires et les ministres plénipotentiaires de Colombie à leur retour dans la République (Loi 129 de 1888)	0.01
248	Produits naturels de l'Équateur, des États-Unis de Vénézuéla, du Pérou et des autres nations auxquelles il est où il sera accordé par traité la franchise avec clauses de réciprocité	(a)
249	Bagages des passagers jusqu'à 150 kilogrammes par personne, si les effets sont incontestablement destinés à leur usage et s'ils sont présentés en douane par eux-mêmes et au moment de leur arrivée sur le territoire national. L'excédent en poids qui ne serait pas accompagné de la facture suivra le régime des marchandises le plus fortement taxées[b]	(a)
250	Tout ouvrier ou cultivateur venant travailler dans le pays a le droit, en plus de la franchise pour ses bagages, d'importer en exemption de droits les outils que le Gouvernement jugera nécessaires à sa profession, jusqu'à concurrence de 100 kilogrammes (loi 65 de 1887[c]	(a)
251	Tous articles non dénommés au tarif	1.00
	OBSERVATION.—Les différentes dénominations du présent tarif comportent donc une classe exempte et 14 classes taxées respectivement à 1, 2½, 5, 10, 20, 30, 40, 50, 60, 70, 80, 90, 100 et 120 centavos et sont diteer 1re, 2e, 3e, etc., classes.[d] Le Ministre des Finances dressera et publiera un résumé du tarif qui sera divisé en classes.	

---

[a] Exempts.

[b] On entend par bagages les objets qu'un voyageur apporte avec lui sur le navire même qui l'a transporté et qui paraissent destinés à son usage personnel, tels que: vêtements, chaussure, montre, lit, selle, armes et instruments servant à sa profession.

La franchise établie en faveur des immigrants comprend, en plus de celle accordée à leurs bagages, les effets usagés tels que, leur mobilier et les outils et autres instruments de leur métier, mais ne saurait s'étendre aux articles pouvant être mis en vente. (Art. 131 du Code fiscal.)

Pour bénéficier de cette dernière franchise, les intéressés devront se conformer aux prescriptions des articles 132 et 133 du Code fiscal.

[c] Pour bénéficier de cette franchise, les intéressés devront se conformer aux prescriptions du décret nº 523 de 1887. ("Diario Oficial," nº 7135.)

[d] Il y a lieu d'ajouter à ces classes celles relatives à la taxe afférente au sel et au tabac (Lois 36 de 1886 et 85 de 1892).

Sont maintenues dans la loi douanière toutes les dispositions encore en vigueur relatives aux merchandises dont l'importation est prohibée, soit par certains bureaux de douane, soit par tous les bureaux de la République.

Est absolument prohibée l'importation des cannes, parapluies, etc., à épée, poignard ou arme quelconque cachée.

Est également prohibée, excepté pour le Gouvernement, l'importation de—

Canons et mitrailleuses de toute sorte, rifles, carabines et autres armes de précision;

Épées de toute sorte, sabres et lances de cavalerie;

Capsules, balles, obus et autres projectiles pour les armes à feu ci-dessus;

Rifles, fusils, mousquetons, carabines et autres armes de guerre, c'est-à-dire qui ne seraient pas spécialement et nécessairement propres à la chasse;

Gibernes, baudriers et tous autres objets destinés à l'équipement des soldats;

Et en général, tout engin, appareil ou objet qui, n'étant pas apparemment destiné à la défense personnelle, pourrait, par sa nature et sa destination, être considéré comme propre à la guerre, à l'armement et à l'équipement de la troupe.

Est interdite l'importation de la fausse monnaie et de la monnaie étrangère d'un titre inférieur à 900 millièmes et du matériel pour la fabrication de la monnaie.

La prohibition s'étend également à la monnaie nationale quelconque et quel qu'en soit le métal (à l'exception de celle en or et en argent à 900 millièmes) et aux coupures préparées (*esqueletos*) pour billets de la banque nationale (lois 36 de 1886 et 107 de 1887). Toutefois, en vertu de la loi 41 de 1887, le Gouvernement peut autoriser "l'importation par les douanes de la république de toute monnaie ayant cours, si elle est au titre de 835 millièmes."

Est également interdit le transit à travers le territoire national de la fausse monnaie et du matériel pour sa fabrication, des armes et munitions dont l'importation est prohibée et de la nitro-glycérine.

DROITS APPLICABLES AU TABAC.

I. *Loi nº 72, du 16 novembre 1894, abrogeant la loi nº 85 de 1892 et établissant des droits sur le tabac.*

["Diario Oficial" nº 9652, du 12 décembre 1894.]

ART. 1er. Le tabac importé dans le pays acquittera les droits ci-après:

		P. C.
Cigares	kilogr..	4
Cigarettes	id....	3
Tabac haché et tabac autre de toute sorte	id....	2

Toutefois, le Gouvernement est autorisé à se réserver, dans le cas où il le jugerait convenable, le droit d'importer et de fabriquer des cigarettes pendant une période de six ans à partir du jour où la présente loi sera sanctionnée. En conséquence, il pourra aliéner le revenu résultant de ce monopole. Dans ce cas, l'adjudication devra se faire aux enchères publiques, conformément aux formalités du code fiscal sur l'affermage du revenu et après avoir été préalablement annoncée au moins 180 jours d'avance.

A l'occasion de l'adjudication dont il s'agit, comme pour les adjudications des revenus, il ne sera pas perçu de pour cent.

A l'expiration du délai d'affermage, les existences en cigarettes et en matières premières destinées à leur fabrication seront assujetties au payement d'un impôt égal au droit d'importation ci-dessus mentionné.

ART. 2. La culture et l'exportation du tabac du pays est complètement libre; elle n'est assujettie qu'à un impôt de consommation qui ne pourra pas dépasser 1 peso 50 centavos par 12½ kilogrammes pour les cigares et le tabac en feuilles de première qualité, et en proportion pour les qualités inférieures. Dans chaque département, l'assemblée devra régler la taxe de la façon qu'elle jugera le plus convenable, suivant les circonstances et en se basant sur l'état de l'industrie locale. En conséquence, l'impôt pourra être appliqué soit au tabac destiné à la vente, soit au tabac soumis à une fabrication ou préparation quelconque, soit aux fabriques, magasins, boutiques ou débits de ce produit.

ART. 3. Du produit net de l'impôt de consommation sur le tabac du pays, 60 pour cent seront attribués au département et 40 pour cent aux municipalités.

Le montant des droits de douane établis en vertu de la présente loi et applicables aux cigarettes provenant de l'étranger sera perçu au profit du Trésor.

ART. 4. Le prélèvement de l'impôt de consommation sur le tabac du pays, établi en vertu de la présente loi, sera attribué par adjudication, et les adjudications auront lieu dans chaque district.

Dans le cas où les adjudications n'auraient pu s'effectuer, les départements se chargeront de l'administration de ce revenu, conformément aux ordonnances sur la matière.

Art. 5. Est abrogée la loi nº 85, du 10 décembre 1892, relative à l'impôt de consommation sur le tabac.

II. *Décret nº 594, du 12 décembre 1899, établissant les droits applicables à l'importation du tabac de toute sorte et du papier à cigarettes.*

["Diario Oficial" nº 11179, du 2 janvier 1900.]

Article unique. A partir de la date de l'entrée en vigueur de l'article 1er du décret nº 559, du 20 novembre dernier ("Diario Oficial" nº 11154), relatif à la suppression du monopole des cigarettes, le tabac et le papier à cigarettes seront assujettis aux droits suivants:

		P. C.
Cigares	kilogr.	5.00
Cigarettes	id.	5.00
Tabac haché ou autre	id.	4.50
Papier à cigarettes	id.	.50

III. *Décret nº 400 du 9 avril 1901, relatif au régime applicable à l'importation du tabac et du papier à cigarettes.*

["Diario Oficial" du 18 avril 1901.]

Article premier. Le tabac sous ses différentes formes et les matières premières nécessaires à la fabrication des cigarettes acquitteront en douane les droits établis comme ci-après et ne seront plus assujettis au droits additionnels qui leur étaient applicables antérieurement à la date du présent décret:

		P. C.
Cigares	kilogr.	5.00
Cigarettes	id.	5.00
Tabac à cigarettes	id.	3.00
Tabac autre, non dénommé	id.	4.50
Papier spécial à cigarettes	id.	0.50

Le papier timbré pour le conditionnement des paquets de cigarettes sera assimilé aux étiquettes et, comme tel, rangé dans la classe VI du tarif en vigueur.

Art. 2. Est interprété et modifié dans la forme établie ci-dessus le décret nº 594 du 12 décembre 1899, et les modifications décrétées seront applicables dès qu'elles auront été portées à la connaissance des douanes de la République.

TABLEAU RÉCAPITULATIF DU TARIF PAR CLASSES.

Le tarif se subdivise en classes suivant les droits applicables aux marchandises, ainsi qu'il est dit ci-après:

1re classe.—Marchandises exemptes de droits.
2e classe.—Marchandises acquittant 1 cent. par kilogramme.
3e classe.—Marchandises acquittant 2½ cent. par kilogramme.
4e classe.—Marchandises acquittant 5 cent. par kilogramme.
5e classe.—Marchandises acquittant 10 cent. par kilogramme.
6e classe.—Marshandises acquittant 20 cent. par kilogramme.
7e classe.—Marchandises acquittant 30 cent. par kilogramme.
8e classe.—Marchandises acquittant 40 cent. par kilogramme.
9e classe.—Marchandises acquittant 50 cent. par kilogramme.
10e classe.—Marchandises acquittant 60 cent. par kilogramme.
11e classe.—Marchandises acquittant 70 cent. par kilogramme.
12e classe.—Marchandises acquittant 80 cent. par kilogramme.
13e classe.—Marchandises acquittant 90 cent. par kilogramme.
14e classe.—Marchandises 100 cent. par kilogramme.
15e classe.—Marchandises acquittant [a]120 cent. par kilogramme.

A cette énumération il y a lieu d'ajouter la taxe du sel qui est de 4 pesos par 12½ kilogrammes et celle du tabac qui suit le régime établi par la législation en vigueur.

Les droits ci-dessus mentionnés sont assujettis aux réductions et à la surtaxe établies en tête du tarif.

---

[a] Non compris l'augmentation stipulée dans le décret nº 453 de 1893.

A. DISPOSITIONS DOUANIÈRES PORTANT MAJORATION OU RÉDUCTION DANS LA PERCEPTION DES DROITS ET FAISANT L'OBJET DE DIFFÉRENTS RENVOIS MENTIONNÉS DANS LE TARIF.

I. *Décret nº 453 du 10 février 1893.*

Le Vice-Président de la République, chargé du Pouvoir Exécutif, en vertu de l'article 5 de la loi 93 de 1892 et du dernier article de la loi 109 de la même année ("Diario Oficial" 9020 et 9034), décrète:

ARTICLE PREMIER. Les droits d'importation qui, d'après le tarif douanier, sont applicables aux marchandises ci-après dénommées subiront mensuellement une augmentation à partir du 16 mars jusqu'au 16 décembre de la présente année, époque à laquelle l'augmentation sera totale et définitive.

Cette augmentation sera appliquée dans la proportion suivante et par kilogramme.

Cinq centavos pour le brandy, le rhum, le whiskey, le genièvre, le rossolis et les liquides concentrés pour la fabrication de ces boissons; pour les vins compris dans la 8ᵉ classe du tarif (40 centavos) et pour les marchandise de la 15ᵉ classe (1 peso 20.)

Un centavo pour toutes les spécialités pharmaceutiques, telles que: vins, sirops, pillules, pommades, elixirs, dragées etc., et tous les médicaments brevetés.

ART. 2. L'augmentation visée à l'article ci-dessus ne devra pas bénéficier des réductions consenties en faveur des douanes de Buenaventura et de Tumaco par la loi 10 de 1888 et qui ne sont applicables qu'au tarif en vigueur à cette époque, et ne devra pas être assujettie à la surtaxe de 25 pour cent établie par les lois 88 de 1886 et 99 de 1888.

ART. 3. Cette augmentation sera liquidée séparément des droits du tarif et sera partagée en deux parties égales, dont l'une sera attribuée à la banque nationale, aussitôt après la perception.

ART. 4. Le présent décret ne pourra être rapporté ou modifié que par une loi, conformément aux prescriptions de la loi 109 de 1892, ci-dessus mentionnée.

Bogota, le 10 février 1893.

Le Ministre des Finances. M. A. CARO.

PEDRO BRAVO.

II. *Circulaire nº 24810, du 25 janvier 1895.*

["Diario Oficial" nº 9695, du 1ᵉʳ février 1895.]

En vertu de la présente circulaire, l'augmentation totale des droits applicables à certaines marchandises stipulée par le décret nº 453, du 10 février 1893, subira chaque mois une diminution d'un dixième, à partir du 20 février prochain.

La même diminution successive sera appliquée à partir du 21 février prochain aux droits sur le tabac augmentés par l'ordonnance du 9 mars 1893, jusqu'à ce qu'on ait atteint les droits établis par l'article 1ᵉʳ de la loi nº 72 de 1894; sont exceptés les cigarettes et le tabac haché, dont l'importation est interdite aux particuliers, l'État s'étant réservé le monopole pour leur fabrication et leur importation.

III. *Loi nº 160 du 28 décembre 1896, augmentant les droits de douane à l'importation*

["Diario Oficial" du 12 janvier 1897, nº 10233.]

ARTICLE PREMIER. Les droits d'importation perçus dans les douanes de la République et applicables aux articles rangés dans les classes 2 à 13 inclusivement sont augmentés de 20 pour cent, et ceux applicables aux articles rangés dans les classes 14 et 15 du tarif en vigueur sont augmentés de 50 pour cent.

ART. 2. Une 16ᵉ classe du tarif est établie; les marchandises ci-après dénommées faisant partie de cette classe acquitteront 3 pesos par kilogramme.

Armes blanches, armes à feu ou autres armes, à l'exception des fusils de chasse.

Brocarts et autres tissus en or, argent ou autres métaux, ainsi que les fils des mêmes matières.

Articles de parfumerie et de toilette, tels que: essences, crèmes et savons parfumés.

Or et argent sous toute forme autre qu'en monnaies et en barres.

Pierres précieuses et cartes à jouer.

ART. 3. L'augmentation qui fait l'objet de l'article 1ᵉʳ de la présente loi sera prélevée sur les droits tels qu'ils ont été établis par la loi 36 de 1886, et conformément aux stipulations de l'article 205 de la Constitution.[a]

---

[a] D'après l'art. 205 de la Constitution, toute augmentation ou diminution de droits ne peut s'effectuer que par dixièmes et seulement trois mois après la promulgation de la loi.

Art. 4. Sont exemptés de l'augmentation visée par l'article 1^er^.

Le charbon minéral et les produits importés pour la fabrication de la glace, qui n'acquitteront que ½ centavo par kilogramme.

Les creusets pour fonderies.

Les presses et machines à imprimer.

Le papier d'imprimerie non collé.

Les rails et le matériel fixe de voies ferrées publiques ou particulières, non admis en franchise.

Les bâtiments montés ou non, ainsi que leurs machines.

Les cotonnades bleues et blanches ou écrues avec parties blanches, non ouvrées, non cousues ni brodées, telles que celles connues sous le nom de *bogotanas*, calicot, *liencillos*, madapolam, tissus dits *bramantes*, *drills*, indiennes (*zarazas*) et autres analogues.

Paragrphe.—Les dispositions de la présente loi ne modifient pas l'ordonnance du Ministère des Finances en date du 6 juillet 1895 relative aux classes.

Art. 5.—Le Gouvernement est autorisé à ranger sous une même classe du tarif des douanes les articles similaires dénommés dans différentes classes.

Art. 6. Le service postal étant à la charge de l'Union postale universelle, le droit de tonnage établi par l'article 192 du code fiscal sera perçu à nouveau par les douanes compétentes, à raison de 1 peso 50 centavos par tonne et conformément aux stipulations dudit article.

Paragraphe.—En conséquence, le Gouvernement ne tiendra pas compte des conventions relatives au transport de la correspondance et dès lors de l'exemption des droits de tonnage qui font l'objet des articles 11 et 22 da la loi 109 de 1880, qui sont abrogés.

Art. 7. Lorsque dans les concessions de franchises douanières établies dans la loi ou stipulées dans des contrats conclus avec le Gouvernement en faveur d'entreprises de chemin de fer ou de navigation, de fabriques, etc., les articles exempts de droits ne sont pas spécialement dénommés, mais désignés seulement sous le nom de matériaux et accessoires pour lesdites entreprises, ces franchises ne s'appliqueront qu'aux articles suivants: machines et leurs pièces de rechange, rails, clous, outils, matériel roulant et accessoires de télégraphe. Les autres marchandises seront soumises au payement des droits d'importation, suivant la classe du tarif dans laquelle elles sont rangées.

Art. 8. Le Gouvernement est autorisé à établir un droit qui ne pourra dépasser 2 pesos sur les colis postaux. Ce droit sera perçu proportionnellement au poids et dans la mesure fixée par les conventions sur la matière.

Art. 9. Les marchandises importées dans les bagages des voyageurs suivront le régime de la 16^e^ classe, alors même que ces bagages pèseraient moins de 150 kilogrammes.

Paragraphe.—Tout artisan ou agriculteur venant travailler dans le pays est autorisé à importer en franchise de droits, en plus de ses bagages, jusqu'à 100 kilogrammes d'objets, ainsi que les outils jugés nécessaires à sa profession.

Art. 10. Le Pouvoir Exécutif est autorisé, dans l'intérêt du fisc et s'il le juge opportun, à diminuer ou à abroger l'impôt établi en vertu de la présente loi sur les marchandises importées par la douane de Tumaco.

Art. 11. A partir du 1^er^ janvier 1897, la valeur des différentes espèces de papier timbré et de timbres de l'Etat sera fixée comme ci-après.

1^re^ classe	$0.30
2^e^ classe	1.00
3^e^ classe	2.00

Paragraphe.—Le Gouvernement adoptera les mesures opportunes pour que le papier timbré et les timbres ne puissent être employés sans une contremarque spéciale mentionnant la nouvelle valeur.

IV.—*Décision ministérielle, en date du 6 février 1897, rectifiant une omission relevée dans le texte de la loi nº 160 du 28 décembre 1896.*

("Diario Oficial" du 9 février 1897, nº 10257.)

Par suite d'une omission relevée dans le texte de la loi nº 160 du 28 décembre 1896, publiée dans le "Diario Oficial" du 12 janvier 1897, nº 10233[a], ladite loi doit être complétée comme suit:

Le paragraphe unique à l'article 4 aura la teneur suivante:

"Paragraphe.—Les dispositions de la présente loi ne modifient pas l'ordonnance du Ministère des Finances, en date du 6 juillet 1895, relative au régime applicable d'après le tarif à l'importation des articles destinés à l'entreprise d'électricité à laquelle cette ordonnance se rapporte, lesdits articles étant en outre exemptés de la surtaxe établie en vertu de la présente loi."

---

[a] Voir la loi nº 160, III.

V. *Circulaire du Ministère des Finances du 27 février 1897, nº 27829, relative à l'application de la loi nº 160 du 28 décembre 1896.*

["Diario Oficial" du 27 février 1899, nº 10273.]

L'augmentation et la diminution des droits d'importation visés par les articles 1, 2, 3 et 4 de la loi nº 160 de 1896[a] commenceront à être appliquées le 19 avril 1897, conformément aux articles 205 de la Constitution et 61, 62, 64 et 65 de la loi nº 149 de 1888.

L'augmentation dont il s'agit sera calculée sur les droits établis par la loi nº 36 de 1886 sans tenir compte des modifications qu'elle a subies, et la somme ainsi obtenue sera ajoutée aux droits tels qu'ils doivent être perçus actuellement d'après ladite loi nº 36 avec les modifications qui y ont été apportées postérieurement et en observant les stipulations de l'article 4 de la loi nº 160 susmentionnée.

A ce total devra être ajoutée la surtaxe de 25% établie en vertu de l'article 1er de la loi nº 88 de 1886 et de l'article 1er de la loi nº 185 de 1896.

VI. *Décret nº 140, du 13 avril 1897, relatif aux droits d'importation à percevoir à Tumaco.*

["Diario Oficial" du 15 avril 1897, nº 10313.]

En vertu d'un décret du 13 avril 1897, pris aux termes de l'article 10 de la loi nº 160 de 1896, on percevra dans la douane de Tumaco les droits actuellement en vigueur jusqu'à ce que le Pouvoir Exécutif n'ait décidé d'appliquer dans ce port la totalité ou une partie de l'impôt établi en vertu de la loi nº 160 susmentionnée.

VII. *Circulaire du 3 mai 1897, relative à l'application de la surtaxe de 25 pour cent établie par la loi nº 160 de 1896.*

["Diario Oficial" du 17 mai 1897, nº 10340.]

Les douanes perçoivent sur les marchandises importées dans le pays, en plus des droits d'importation proprement dits revenant au Trésor et établis dans le tarif, une taxe de 25 pour cent à calculer sur les liquidations en douane desdits droits, taxe revenant aux Départements et qui est remise directement et sous la stricte responsabilité des administrateurs des douanes aux employés supérieurs des finances desdits Départements.

Les droits susmentionnés ont été primitivement fixés dans le tarif, et c'est sur ces droits et sans tenir compte des modifications qui y ont été apportées par les lois et les décrets rendus en vertu d'autorisations accordées au Gouvernement, qu'on a décidé de calcular les surtaxes établies dans les articles 1, 3 et 4 de la loi nº 160 de 1896, conformément aux stipulations de l'article 3. Toutefois, comme le 25 pour cent additionnel ne peut pas être calculé sur les droits primitivement fixés, parce que la loi nº 88 de 1886 qui l'établit dit textuellement à l'article 1er que ce 25 pour cent devra être calculé sur les liquidations, il faut nécessairement en conclure que la surtaxe dont il s'agit doit s'appliquer non pas aux droits en vigueur au moment où elle a été décrétée, mais bien aux droits en vigueur au moment où il sera procédé aux liquidations, et actuellement ces droits sont ceux primitivement fixés par la loi nº 36 de 1886 augmentés ou diminués conformément aux différentes lois qui l'ont modifiée.

VIII. *Décret nº 506 du 1er mai 1901, relatif à la perception des droits dans la douane de Cucuta.*

["Diario Oficial" du 21 mai 1901, nº 11488.]

ARTICLE 1er. Dès que le présent décret sera parvenu à la connaissance de l'Administrateur Trésorier de la douane de Cucuta, la perception des droits d'importation dans cette douane s'effectuera d'après les bases du décret nº 507 du 1er mai 1901 comme ci-après: 50 pour cent en monnaie d'argent au titre de 0.835 et 50 pour cent en papier monnaie.

* * * * * * *

---

[a] Voir la loi nº 160, III.

Art. 4. Sont abrogés les décrets et autres dispositions émanant des chefs civils et militaires du Département de Santander sur le mode de prélever les droits d'importation dans la douane de Cucuta et sur le taux de cette perception.

IX. *Décret nº 507 du 1er mai 1901, portant augmentation des droits applicables aux marchandises étrangères importées dans les douanes de la République.*

["Diario Oficial" du 21 mai 1901, nº 11488.]

Article 1er. A partir du jour où le présent décret sera parvenu à la connaissance des administrateurs des douanes de la République, il sera prélevé, à l'importation des articles frappés d'un droit par les lois et tarifs en vigueur, une taxe double de celle actuellement perçue.

Art. 2. Le Ministère des finances procèdera immédiatement à l'établissement d'un nouveau tarif des douanes dans lequel les marchandises seront imposées conformément au présent décret, sous réserve d'adopter les modifications que l'expérience et l'avis des principaux centres de commerce auront suggéré, ainsi que les réformes nécessaires au développement des industries nationales susceptibles de faciliter au commerce et aux administrations publiques chargées de la perception de cet impôt leur méthode de compatibilité et de liquidation.

Art. 3. Dès que le tarif dont il s'agit aura été établi et approuvé par décret, le prélèvement des droits d'importation s'effectuera conformément audit tarif à partir de la date fixée par le décret qui l'approuve.

X. *Décret nº 1016 du 16 août 1901, frappant d'une surtaxe de 10 pour cent tout compte de liquidation de droits à l'importation qui ne serait pas soldé dans le délai de huit jours.*

["Diario Oficial" du 23 août 1901.]

Article unique. Tout compte relatif à des droits d'importation dont le montant n'aura pas été payé dans le délai de huit jours, fixé par l'article 146 du Code fiscal, sera frappé d'une surtaxe de 10 pour cent qui sera prélevée comme contribution de guerre, sans préjudice des intérêts dus sur le principal et le montant de la surtaxe dont il s'agit.

B. DISPOSITIONS RELATIVES AU PAIEMENT DES DROITS DE DOUANE ET DE PORT.

I. *Circulaire nº 346, du 20 décembre 1900, relative au paiement des droits de douane.*

["Diario Oficial" du 5 février 1901, nº 11412.]

Un décret du Pouvoir Exécutif stipule que 20 pour cent des droits d'importation et d'exportation devront être payés au comptant pour être affectés aux dépenses des bureaux de douane et des postes douaniers qui en dépendent, et que le reste devra être représenté en traites à quinze jours de vue à l'ordre de la Trésorerie générale.

II. *Décret nº 370 du 1er avril 1901, relatif au paiement des droits de port.*

["Diario Oficial" du 22 avril 1901, nº 11468.]

Article premier. A partir du 15 mai 1901 les droits de port applicables aux navires arrivant en Colombie seront acquittés en espèces en or du pays de provenance des navires. Sont exceptés de cette règle les droits de phare lorsque les phares ne sont pas la propriété exclusive de l'État, et que le montant de leurs recettes ne doit pas revenir au Trésor. En pareil cas, ces droits continueront à être perçus suivant le mode fixé par le décret nº 62 du 18 janvier 1901 ("Diario Oficial" nº 11403) et il en sera de même pour les droits de port si, en vertu de contrats passés avec les concessionnaires ou aux termes d'une loi spéciale, ces droits doivent être acquittés en monnaie courante.

Art. 2. Les droits de port, faisant l'objet de l'exception visée à l'article ci-dessus, pourront être perçus en or lorsque les concessionnaires de phares se seront obligés dans les contrats qu'ils auront passé avec l'Etat à verser dans les caisses du Trésor le 50 pour cent du produit net du revenu de leur exploitation et à faire abandon au profit de l'État de la propriété des phares à l'expiration de leur privilège ou après une période convenue ou lorsque les concessionnaires d'autres privilèges les autorisant à prélever des droits, tels que droits de quais, etc., se seront également obligés à consentir au profit de l'État des clauses avantageuses analogues à celles résultant de la concession des phares.

DROITS D'EXPORTATION.

I. *Décret nº 63, du 18 janvier 1901, modifiant l'article 1er de la loi nº 777 du 11 juin 1900 qui établit des droits à l'exportation de certaines marchandises.*

["Diario Oficial" du 22 janvier 1901, nº 11403.]

ARTICLE 1er. A partir du 1er mars prochain, seront tarifées comme ci-après les marchandises qui de la République seront exportées vers des marchés étrangers:

ART. 2. Café sans pellicules (*pilado*)	quintal	$3. 00
Café en parchemin	id	2. 50
Caoutchouc	id	5. 00
Cuirs de bœuf	id	3. 00
Peaux de chèvre et analogues	quintal	4. 00

de cèdre, de *galiavo*, d'acajou et tous autres bois de construction	1,000 pieds carrés	5. 00
Cocos	mille	5. 00
Bœufs	tête	20. 00

L'or, le platine et l'argent en barres contrôlées acquitteront 2 pour cent de leur valeur d'après le certificat délivré après fusion et essai. Ce paiement s'effectuera en papier monnaie au cours du change à la date de l'exportation.

L'or en poudre, le platine, l'argent non contrôlé et l'or et le platine en articles de bijouterie, en espèces monnayées ou autrement manufacturés acquitteront 2 pour cent en papier monnaie, ainsi qu'il a été dit ci-dessus, du montant de la somme pour laquelle ils ont été assurés.

A défaut de certificats de contrôle ou de polices d'assurance, l'or acquittera 20 centavos par gramme, le platine 15 centavos, l'argent 10 centavos et le minerai brut 20 pesos la tonne.

Les articles non dénommés, déclarés pour l'exportation, seront évalués par le personnel de la vérification de la douane de sortie sous le contrôle de l'administrateur et seront assujettis au paiement en papier-monnaie du 2 pour cent de leur évaluation.

ART. 3. A l'occasion de toute exportation par les ports de la République, les intéressés devront faire leur déclaration à l'administration de la douane compétente, dans la forme et dans les délais généralement adoptés à l'importation; en outre ils devront se conformer aux règles établies par le décret nº 789 du 2 juillet 1900, relatif à la perception des droits d'exportation.

ART. 4. Les droits d'exportation établis en vertu du présent décret seront prélevés aussi longtemps que l'ordre public sera troublé, et lorsque les troubles auront cessé, et à moins que le Congrès n'en décide autrement, ils continueront à être perçus pour être exclusivement affectés à l'amortissement du papier-monnaie jusqu'à ce qu'il n'en existe plus.

ART. 5. * * *

II. *Décret nº 205, du 15 février 1901, modifiant le décret nº 63, de la même année, établissant des droits à l'exportation de certaines marchandises.*

["Diario Oficial" du 21 février 1901, nº 11424.]

ARTICLE UNIQUE. Est réduit à un peso le kilogramme le droit applicable dans les ports de la République à l'exportation des orchidées.

III. *Décret nº 368 du 1er avril 1901, relatif à l'exportation du bétail de l'espèce bovine.*

["Diario Oficial" du 25 avril 1901, nº 11471.]

ARTICLE PREMIER. Est approuvé le décret relatif à l'exportation du bétail de l'espèce bovine, rendu le 26 janvier 1901 par le Chef civil et militaire du Département de Bolivar dont la teneur suit:

"ARTICLE PREMIER. Est prohibée l'exportation du bétail de l'espèce bovine.

"ART. 2. Quiconque aura mis à la disposition de l'Intendant général à titre de prêt sans intérêt la somme à convenir avec le Chef civil et militaire ou avec le Secrétaire des Finances sera autorisé à exporter du bétail de l'espèce bovine moyennant le paiement d'un droit de 60 pesos par tête de bétail.

"ART. 3. L'amortissement de l'avance faite s'effectuera au moyen de la perception du droit sus-indiqué et dès que la somme aura été remboursée le prêteur ne pourra plus exporter du bétail.

ART. 4. * * *"

ART. 2. Dès que le présent décret sera parvenu à la connaissance du Chef civil et militaire du département de Bolivar et des Administrateurs des douanes, et tant que le Congrès n'en aura pas autrement ordonné, il sera perçu 20 pesos en or par tête de bétail de l'espèce bovine exporté.

ART. 3. Les exportateurs qui auront passé des contrats aux termes du décret ci-dessus approuvé du Chef civil et militaire du département de Bolivar pourront continuer leurs opérations d'exportations mais ils devront acquitter la taxe stipulée à l'article 2 ci-dessus. Dans ce cas il sera tenu compte des sommes prêtées au Gouvernement, et ces avances, faites en papier-monnaie, seront converties en espèces en or, au change du jour sur le marché de la résidence de la douane à la date de l'exportation.

ART. 4. Si les exportateurs, qui auront consenti des prêts, ne voulaient pas continuer leurs opérations sous le régime de la nouvelle taxe établie, ils seraient immédiatement remboursés de leurs avances avec intérêt légal pour le solde qui leur serait dû.

ART. 5. Si, en exécution du décret nº 63 du 18 janvier courant, des exportations de bétail ont été effectuées à la taxe de 20 pesos papier-monnaie par tête, les exportateurs prêteurs qui auront exporté du bétail pendant la même période, c'est-à-dire du 1^er^ mars courant jusqu'à la date de l'entrée en vigueur du présent décret et, par conséquent, de la perception en or qu'il stipule, et qui auront payé 60 pesos en papier-monnaie aux termes de leur contrat, ne seront redevables que du droit de 20 pesos comme les autres exportateurs, et la différence de 40 pesos par tête sera imputée sur le solde que leur doit le Gouvernement. Ce solde devra être affecté au paiment des droits applicables aux exportations qu'ils feront dans la suite ou bien il leur sera restitué conformément aux prescriptions de l'article précédent.

IV. *Décret nº 495, du 30 avril 1901, relatif à la perception en or des droits applicables à l'exportation.*

["Diario Oficial," 21 mai 1901, nº 11488.]

ART. 1^er^. A partir de la date où le présent décret sera parvenu à la connaissance des Administrateurs des Douanes de la République, les droits d'exportation faisant l'objet des décrets nºs 777, 63 et 421, respectivement en date du 11 juin 1900, 18 janvier et 12 avril 1901, seront perçus en or conformément au tableau ci-après:

		Peso en or.
Café sans pellicules (*pilado*)	quintal	0.40
Café en parchemin	id	.30
Caoutchouc	id	.60
Peaux d'animaux de l'espèce bovine	quintal	.40
Peaux de chèvre et similaires	quintal	.50
Tagua ou ivoire végétal	id	.15

Orchidées	id	.10
Écaille	id	1.00
Baumes	quintal	.80
Bois:		
de fustet	id	.04
du Brésil ou de teinture	id	.06
de cèdre, de *galiavo*, d'acajou et tous autres bois de construction	1,000 pieds carrés	1.60
Cocos	mille	.50
Animaux de la race bovine	tête	20.00

L'or, le platine et l'argent en barres contrôlées acquitteront un droit de 3 pour cent de la valeur déterminée dans le certificat de fonte et d'essai.

L'or en poudre, le platine, l'argent non contrôlé, ainsi que l'or et le platine en articles de bijouterie, en espèces monnayées ou autrement manufacturés, acquitteront 3 pour cent de la valeur pour laquelle ils ont été assurés.

Le minerai d'or et d'argent acquittera 2 pour cent de la valeur pour laquelle il a été assuré.

A défaut de certificats de contrôle ou de polices d'assurance, l'or acquittera $0.03 par gramme, le platine $0.02, l'argent $0.01 et le minerai brut $4 par tonne.

Les articles non dénommés, déclarés pour l'exportation seront évalués par le personnel de la vérification de la douane compétente sous le contrôle de l'Administrateur et seront assujettis au paiement en or de 3 pour cent de leur valeur.

Art. 2. Le Gouvernement édictera, par l'intermédiaire du Ministre des finances, les mesures à adopter pour que la perception de la taxe sur l'exportation soit aisée et efficace, et pour que le produit de cet impôt rentre intégralement dans la caisse de la *Junta de amortización*, pour être affecté à l'amortissement du papier monnaie, ainsi que cela résulte des dispositions du décret nº 418 du 12 avril 1901, en se conformant, pour tout ce qui concerne le prélèvement de cet impôt, aux indications émanant de la *Junta* sus-mentionée.

Art. 3. Sont abrogés ou modifiés, au sens du présent décret, les décrets sus-mentionnés.

V. *Décret nº 454, du 11 octobre 1895, établissant les règles à observer pour la perception des droits de sortie applicables au café.*

["Diario Oficial" nº 9849, du 21 octobre 1895.]

Art. 1er. En plus des disposition en vigueur, relatives à l'exportation, on devra se conformer aux prescriptions qui font l'objet du présent décret.

Art. 2. Une fois que le permis de chargement, visé par les articles 200 et 201 du Code fiscal, aura été accordé, le chef de chaque poste douanier devra procéder à une visite spéciale du navire, afin de s'assurer qu'il ne renferme aucun article d'exportation. Pourront également prendre part à cette visite les employés dont il est question dans les articles 57 et 58 du Code, si l'administrateur le juge à propos.

Art. 3. En plus du manifeste général que le consignataire du navire doit présenter conformément à l'article 202, chaque exportateur de café devra remettre un manifeste particulier du produit qu'il embarque. Sur ce document, qui devra être rédigé dans la forme adoptée pour l'importation, sera annoté le procès-verbal de vérification et le bordereau de liquidation des droits.

Art. 4. Tous les manifestes d'exportation dont il s'agit seront présentés en quatre exemplaires au Directeur des postes de la résidence de la douane du point d'embarquement dans le délai que la douane aura fixé en délivrant le permis de chargement du navire. Les manifestes relatifs au café mentionneront celui qui est mondé ou sans pellicules et celui qui ne l'est pas. Immédiatement, ce fonctionnaire comparera entre eux tous les exemplaires de chaque manifeste et en adressera, sans retard, trois à la douane, et le quatrième sera réservé pour être transmis au Ministre des Finances par le premier courrier. La douane emploiera les exemplaires qui lui sont remis, ainsi qu'il est prescrit dans les règlements en viguer pour l'importation, et il sera procédé sans retard à la vérification des colis.

Art. 5. La vérification s'effectuera en ouvrant et en examinant, parmi les colis non manifestés comme contenant du café sans pellicules, ceux que la douane jugera opportun de reconnaître pour empêcher que le café ne passe sous le nom d'une autre marchandise ou que le café sans pellicule ne soit déclaré comme café avec pellicules, et en procédant à l'examen du poids de tous les colis de café.

Art. 6. Après la vérification du chargement, la douane dressera le bordereau des droits sur les trois exemplaires du manifeste qui lui ont été remis, en réclamera le montant et délivrera le permis d'embarquement au bas d'un des exemplaires qui sera restitué à l'exportateur, après que ce dernier aura acquitté les droits.

Si le chargement n'était pas assujetti à des droits, le permis d'embarquement sera délivré immédiatement après la verification.

Art. 7. Le permis dont il s'agit ne sera pas délivré, si l'exportateur ne garantit pas au préalable qu'il déposera dans le plus bref délai un exemplaire du connaissement des marchandises qu'il doit embarquer.

Art. 8. Sont applicables aux exportations: les dispositions du § 3 de l'article 325 du Code fiscal, relatives aux contraventions, et du § 9 du même article, relatives aux manifestes, ainsi que les peines que ces dispositions prescrivent et la procédure à suivre à l'occasion de leur application, aux termes des sections 3 et 4 du Chapitre 9, titre III, Livre 1er du Code fiscal.

Art. 9. Les réclamations relatives à des faits matériels seront tranchées conformément aux stipulations de l'article 13 de la loi nº 36 de 1886, relative aux importations. Pour les contestations sur des erreurs de chiffres dans les liquidations et pour les autres irrégularités portant sur des points de procédure administrative ou tous autres cas non prévus dans le présent décret, on s'en référera, en tant qu'il n'y aura pas d'incompatibilité, à la législation établie à l'article 143 et autres du Code fiscal, relative aux importations.

CONVENTION DE COMMERCE ET DE NAVIGATION ENTRE LA COLOMBIE ET LA FRANCE.

En vertu d'un arrangement signé à Bogota le 30 mai 1892 entre les Plénipotentiaires respectifs de la Colombie et de la France, les deux Hautes Parties contractantes se concèdent réciproquement le traitement de la nation la plus favorisée, en ce qui touche l'établissement des nationaux, ainsi qu'en matière de commerce et de navigation, tant pour l'importation, l'exportation et le transit et, en général, tout ce qui concerne les droits de douane et les opérations commerciales, que pour l'exercise du commerce ou des industries et pour le payement des taxes qui s'y rapportent.

Aux termes de l'article 2, ledit arrangement doit entrer en vigueur huit jours après l'échange des ratifications ([a]) et demeurer exécutoire jusqu'à l'expiration d'une année à partir du jour où l'une des Hautes Parties contractantes l'aura dénoncé.

LES RICHESSES NATURELLES ET LA SITUATION ÉCONOMIQUE.

Voici une traduction des principaux paragraphes d'une circulaire que le Gouvernement Colombien a adressée dernièrement à ses consuls à l'étranger, au sujet des richesses minérales du pays, de ses productions végétales et de sa situation économique.

On trouve en Colombie des gisements d'or, de platine, d'argent, de cuivre, de pétrole, de plomb, d'émeraudes, d'améthystes, de houille, de nitrate, de soufre, de mercure, de gypse, de salpêtre, d'alun, etc.

Dans les départements d'Antioquia, de Cauca, de Tolima, de Santander et de Panamá, surtout dans les trois premiers, l'or et l'argent aurifère existent en proportions énormes.

D'après Humboldt, le produit des mines de Colombie, pendant la période de 1537 à 1803, a été de 415,289 kilogrammes, d'une valeur de 275 millions de piastres. De son côté, le professeur allemand Sootbeer évalue la production en or de la Colombie, de 1537 à 1875, à 1,231,500 kilogrammes, représentant une valeur de 847,113,750 piastres.

D'autre part, le Dr. RESTREPO estime que la production totale, depuis la conquête jusqu'en 1886, peut se chiffrer par 672 millions de piastres, dont 639 millions d'or et 33 millions d'argent; 50 millions provenaient de l'or d'alluvion, le reste a été extrait de filons aurifères.

La production totale se répartit comme suit entre les divers départements: Antioquia, 250 millions; Cauca, 249; Panama, 94; Tolima, 54; Santander, 15; Bolivar, 7; Cundinamarca, 1.8; Magdalena, 1 million; Boyacá, 200,000 piastres.

Pendant le xix^{e} siècle (jusqu'en 1886) la production a été comme suit: 1887, 3 millions de piastres; 1888, 3 millions; 1889, 3,429,000; 1890, 3, 559,473; 1891, 3,472; 1892, 3,232,000 piastres.

Durant la même période, la production de l'argent a atteint 1,000,000 de piastres (valeur intrinsèque) en 1887; 1,000,000 en 1888; 612,000 en 1889; 830,000 en 1890; 1,298,000 en 1891; 1,806,000 piastres en 1892.

Une comparaison avec les autres pays de l'Amérique latine montre que la Colombie n'est dépassée que par le Brésil sous le rapport de la richesse aurifère. On a calculé, en effet, que la production totale de ces pays, jusqu'en 1848, année de la découverte de l'or en Californie, avait été la suivante: Brésil, 684,456,750 piastres; Colombie, 548,700,000; Bolivie, 183,303,000; Chili, 175,839,750; Mexique, 153,507,000; Pérou, 106,717,500 piastres.

Les richesses minérales sont distribuées comme suit dans les divers départements de la Colombie:

Le sol du département d'Antioquia est riche en minerais d'or dans toute son étendue. Ses montagnes renferment des filons aurifères en très grand nombre. Mais les bassins des rivières Porce et Nechi sont les plus riches en or.

Santa Rosa, établi sur des terrains coupés d'énormes ravins formés en exploitant ses mines, se trouve sur une montagne alluviale contenant l'or le plus fin. Dans les rues de Remedios, les crêtes de larges filons de quartz affleurent. Zaragoza, Zea, Cruces, Anori, Campamento, Yarumal, Angostura et Amalfi sont entourés de placers très riches qu'on exploite continuellement. Plus de la moitié de la production du département vient de cette région.

Dans le district de Titiribi, on rencontre les mines renommées de El Zacudo et Otramina, qui ont donné, durant les trente dernières années, des quantités considérables d'or et d'argent aurifère. A Nueva Caramenta, Andes et El Jardín, on a découvert récemment d'abondants et riches gisements; au Frontino, une compagnie anglaise exploite aussi des filons qui, à une certaine époque, furent très riches; il en est de même à Remedios et Ségovie. Dans le sud du département (Sonson, Pácora et Manizales) de nombreux travaux ont été entrepris; dans la province orientale on découvre chaque jour de riches alluvions.

La population de la province d'Antioquia n'a pas l'inconstance au travail de certaines autres régions de la Colombie et poursuit l'exploitation aurifère avec tenacité. Des 463,667 habitants qu'elle compte, 13,294 vivent exclusivement de l'industrie aurifère.

En 1886, l'impôt était payé par 1,009 mines en filon et 971 en alluvion. De 1886 à 1889, on a déclaré 3,900 nouvelles mines.

La province de Cauca est aussi riche que celle d'Antioquia, les régions du Chocó, Barbacoas et Supia principalement ayant donné et continuant à donner de grandes quantités d'or et d'argent aurifère. Les mines actuellement en exploitation dans les territoires de Supia, Río Sucio et Marmato sont très riches. Les principaux villages producteurs du Chocó sont: Novita, Tadó, San Pablo, Condoto, Sipi et Cajón dans le municipe de San Juan; Quipdó et Bagadó, Lloro, Negua et Bebara dans le municipe d'Atrato. Presque toutes les rivières de cette région charrient de l'or.

La production depuis 1800 a été de 42,000,000 de piastres pour le district de Chocó et de 35,000,000 de piastres pour le reste de la province.

Le département de Tolima contient de riches mines d'argent. Diverses compagnies étrangères exploitent ces mines et certaines d'entre elles, comme celle de Frías, par exemple, donnent un produit annuel de 800,000 piastres. Les mines de Santana, La Manta, Cristo de las Lajas, Malpaso et d'autres sont les plus connues.

Dans le département de Panamá, la région du Darien a été considérée, dès la conquête, comme riche en or. C'est là que se trouve la fameuse mine d'Espiritu Santo, qui donna pendant le premier quart du xviii^e^ siècle, de magnifiques résultats. Les travaux, abandonnés plus tard, ont été repris dans la dernière décade par The Darien Gold Mining Company, Limited, dont les actions ont atteint un prix très élevé, tant les résultats sont satisfaisants.

Quoique les historiens signalent de nombreuses mines dans le département de Bolívar, la quantité d'or qu'on en extrait aujourd'hui est de peu d'importance.

Les provinces de Cundinamarca et de Boyacá ne sont pas riches en mines d'or et d'argent. Il en est de même des provinces de Santander et de Magdalena.

La Colombie contient aussi d'importants gisements de platine. On rencontre ce métal en divers endroits, mais surtout au Chocó, dans les rivières San Juan, Iró, Opogadó, Tamana, et Condoto. A Condoto particulièrement, les placers sont très étendus. Cette grande richesse reste cependant presque inexploitée, quoique la production puisse atteindre de 16,000 à 20,000 kilogrammes, soit une valeur de 3,840,000 à 4,800,000 piastres.

Dans le département d'Antioquía, surtout dans les districts d'Amagá, Heliconia, Titiribi, et Puerto-Berrio (Nare), on trouve d'importants gisements de houille. Il en est de même sur les plateaux de Cundinamarca, dans la province de Cauca, près de Cali (sur 18 lieues du nord au sud), dans la région du golfe d'Urabá et dans celle de la Magdalena, près de la Sierra Nevada, ainsi que dans la Goajira.

Les mines d'émeraudes de Muzco sont les plus importantes du monde. Ces mines et celles de Coscuez et Somondoco, situées sur le territoire de Boyacá, sont réellement très riches. Exploitées dès la conquête, elles ont produit d'énormes quantités d'émeraudes et paraissent inépuisables, surtout celles de Muzco, que le gouvernement afferme à une compagnie d'exploitation. Les autres mines d'émeraudes sont sous le régime commun.

Le sel se trouve en abondance dans la Colombie. Les sources salines se rencontrent dans les départments d'Antioquía, Cauca et Tolima. Ces sources, lorsqu'elles sont en terres publiques, appartiennent à celui qui les découvre si elles ont moins de 5 degrés de saturation. Les salines maritimes sont affermées chaque année par le gouvernement. De vastes bancs de sel gemme existent dans la Boyacá et le Cundinamarca. Dans ce dernier département se trouve la riche mine de sel de Zipaquirá.

Le fer et le cuivre existent aussi en abondance en Colombie. On n'exploite en grand que le fer dans les mines d'Antioquía (Amaga) et de La Pradera (Cundinamarca). Il existe de riches mines de cuivre, encore inexploitées, dans les départements d'Antioquía, Boyacá, Cundinamarca et Magdalena.

On récolte en abondance dans le pays, le café (actuellement un des articles d'exportation les plus importants), le cacao, la canne à sucre, le tabac, le coton, la vanille, le riz, l'indigo, le maïs, les haricots, les bananes, le blé, les pommes de terre, le lin, les fruits, le quina, la salsepareille, l'ipécacuana, les plantes balsamiques et résineuses (copahu, tolu, térébenthine), la coca, le dividivi, le palo brésil, l'agave d'Amérique et le caoutchouc. On y trouve aussi des bois fins et de construction, comme l'acajou, le vogal, le cèdre, etc., et une grande variété de palmiers.

Comme on le sait, la plus grande partie du territoire de la République est encore formée de terres publiques, que le gouvernement colombien cède en propriété avec grande facilité.

Il existe en Colombie beaucoup de bœufs et de chevaux, généralement croisés avec les meilleures races d'Europe, plus diverses espèces de moutons, chèvres, mules et ânes. Dans les rivières, en trouve diverses espèces de tortues, sans compter la tortue carey, que l'on pêche sur les bancs de corail, et d'huîtres perlières, surtout à Panamá et Río Hacha.

Les principales industries du pays sont les mines, l'agriculture et le commerce.

Dans le Cundinamarca, l'agriculture s'est beaucoup développée et progresse rapidement. Les cultures y sont grandes et les races bovines nombreuses et abondantes. L'agriculture est la principale occupation dans le départment de Boyacá; il en est de même pour le département de Santander, qui exporte déjà une quantité considérable de café.

Dans le Tolima, on cultive le tabac sans compter l'élevage du bétail et l'exploitation des mines.

Dans les prairies du Río Cauca (département d'Antioquía), on engraisse le bétail; le café commence à y être productif.

Le Cauca, avec ses terres très fertiles, est propre à l'élevage et à l'agriculture. On en exporte du cacao, du café et du tabac.

Les départements de Bolívar et de Magdalena sont aussi exclusivement agricoles.

Le commerce extérieur se fait surtout avec l'Angleterre, la France, les Etats-Unis et l'Espagne et, en moindre proportion, avec l'Italie, la Belgique, les Antilles, le Vénézuéla et l'Equateur. On l'évalue à 50,000,000 de piastres annuellement, dont 30,000,000 à l'exportation et 20,000,000 à l'importation.

Les principaux articles d'importation sont les toiles, la quincaillerie, les machines, les objets de luxe, les livres, les drogues, la parfumerie, les liqueurs, la cristallerie, etc. Les exportations consistent surtout en or, argent, platine, émeraudes, caoutchouc, tabac, laine, bananes, bois de teinture, chapeaux de paille et diverses plantes.

Six cent trente kilomètres de chemins de fer sont actuellement en exploitation. Les lignes exploitées sont les suivantes: chemin de fer de Panamá, 75.64 kilomètres; ligne de Barranquilla à Puerto-Colombia, 27 kilomètres; ligne de Cartagena au port de Calamar sur le Río Magdalena, 105½ kilomètres; ligne d'Antioquía, de Puerto-Berrio à Providencia, 86 kilomètres; ligne de la Dorado, entre Arraucaplumas et La María (ports du Río Magdalena), 26½ kilomètres; ligne de Girardot à Anapocina, 60 kilomètres; ligne de La Sabana, de Bogotá à Facatativa, 40 kilomètres; ligne du Nord, de Bogotá à Zipaquirá, 50 kilomètres; ligne de Tolima, de Girardot à El Espinol, 6 kilomètres; ligne de Cauca, de Buenaventura à Sucre Nuevo (Río Dagua), 34.35 kilomètres; ligne de Santa-Marta au Río Sevilla, 65 kilomètres; le chemin de fer du Sud, de Bogotá à Tequendama, 21 kilomètres.

D'autres lignes sont projetées, entre autres de Medellín au Río Cauca.

Le réseau télégraphique est de 12,000 kilomètres. Le câble de Buenaventura met la Colombie en relations avec les Etats-Unis.

Les ports de Panamá, Colón et les autres ports de l'isthme sont libres.

Le budget pour 1901–2 comporte 28,983,540 piastres pour les recettes et 40,427,470 piastres pour les dépenses.

En 1898, la dette extérieure du pays était de 13,500,000 piastres or, alors que la dette intérieure s'élevait à 4,992,959 piastres en monnaie nationale.

AUGMENTATION DES DROITS DE DOUANE.

A partir du 1er juillet tous les droits perçus en Colombie à l'importation des marchandises ont été augmentés de 50 pour cent.

COSTA RICA

QUELQUES PALMIERS DE LA RÉPUBLIQUE.

M. Wolters, Chargé d'affaires de Belgique en Amérique Centrale, donne les détails suivants sur quelques palmiers qui croissent dans la République de Costa Rica.

Le cocotier, dit M. Wolters, est un palmier de fort bel aspect qui atteint une hauteur imposante. Le fruit, appelé, coco ou noix de coco, est intérressant à plusieurs points de vue. L'amande blanche intérieure est très alimentaire et l'eau dont elle est accompagnée constitue une boisson agréable. De l'amande mûre, on extrait une huile ou graisse qui fait l'objet d'un commerce important; elle sert à la fabrication d'un excellent savon blanc, qui mousse abondamment dans l'eau. Cette graisse a des propriétés assez analogues à celles du corozo, dont je parlerai plus loin.

Les tourteaux, résidus de l'extraction de l'huile, sont excellents pour l'alimentation du bétail. Ils ont la composition suivante: eau, 12.40 pour cent; matières azotées, 24.13 pour cent; matières grasses, 4.70 pour cent; autres matières organiques, 52.23 pour cent; matières minérales, 6.24 pour cent.

La bourre qui entoure les feuilles est un bon tissu avec lequel on confectionne des sortes de matelas servant à garantir les mulets employés pour les transports.

Le cocotier croît principalement dans les régions suivantes: Province de San José, canton d'Aserri; province d'Alajuela, cantons d'Aténas et de San Mateo; province de Guanacaste, canton de Bagaces; comarca de Puntarenas, cantons de Puntarenas, d'Esparta et de Golfo Dulce; comarca de Limon, canton de Limon.

On voit donc que les régions cotières de la République sont celles où l'on rencontre en plus grande abondance ce beau palmier. La température n'y est jamais inférieure à 20 degrés centigrade et l'altitude jamais supérieure à 400 mètres.

Un hectare peut contenir 225 arbres, qui donnent 900 kilomètres d'huile par an. L'arbre fleurit vers la quatrième année et est en pleine production à sept ans. Il ne demande d'autres soins de culture que la plantation et la récolte, et l'on peut faire des cultures intercalaires qui permettent d'attendre le produit du cocotier.

Les noix de coco ne figurent pas régulièrement à l'exportation et ce n'est d'ailleurs que dans ces dernières années qu'elles ont commencé à être demandées. Il n'existe pas de plantations spéciales de cocotiers et certains planteurs de bananes ont introduit ces palmiers dans leurs plantations plutôt pour orner leurs propriétés qu'en vue d'en retirer quelques bénéfices.

On rencontre le corozo principalement dans les provinces de San José (canton d'Aserri) et de Guanacaste (canton de Liberia) et dans les comarcas de Puntarenas (canton de Golfe Dulce) et de Limon (canton de Limon).

On n'a pas encore songé à exploiter sérieusement le fruit de ce végétal, qui sert uniquement à alimenter, avec sa partie charnue, quelques animaux sauvages; la graisse que son amande contient présente cependant un réel intérêt.

Le corozo qui croît dans l'Amérique centrale sur les côtes du Pacifique semble être d'une espèce différente de celle qui croît sur les côtes de l'Atlantique. Les fruits du corozo du Pacifique sont charnus, d'une couleur jaune-clair, agréables au goût, à chair huileuse et juteuse. Ceux provenant de l'Atlantique sont tous gros, n'ont pas de substance charnue, mais simplement un tissu membraneux adhérent au noyau intérieur. Dans l'espèce du Pacifique, ce noyau intérieur, ligneux, excessivement dur, contient une amande allongée, parfois double, à albumen blanc et huileux protégeant l'embryon. Le fruit entier pèse en moyenne 50 grammes, le fruit dépourvu de sa partie charnue 15 grammes et l'amande intérieure 2 ou 3 grammes, de telle sorte que 1 kilogramme de fruits secs donne de 133 à 200 grammes d'amandes. L'espèce de l'Atlantique contient une amande un peu plus grosse pesant de 5 à 6 grammes, et le poids moyen du fruit est de 60 à 65 grammes.

Le fruit du corozo a été étudié, au laboratoire central de Guatémala, par M. René Guérin, directeur de cet établissement. La partie charnue peut être facilement détruite avec une lessive de cendres. Le produit de cette opération pourrait être employé comme engrais, car il est à la fois riche en matières azotées et en potasse. Le concassage des noyaux pourrait se faire au moyen de forts cylindres. La graisse contenue dans l'amande s'extrait par pression à chaud ou bien par dissolution dans le sulfure de carbone.

M. René Guérin a trouvé que 10 kilogrammes de noix donnent 650 kilogrammes de graisse. Celle-ci a une couleur jaunâtre quand elle est fondue; elle blanchit en se solidifiant. Cette solidification se fait très lentement et, pendant qu'elle s'effectue, on voit apparaître des masses globuleuses cristallisées d'acide margarique et palmitique; 100 grammes de graisse donnent 325 grammes de savon très blanc et de très bonne qualité. Cette graisse, raffinée, pourrait sans doute servir aussi à l'alimentation.

Les feuilles du corozo donnent, par simple rapage et lavage, une fibre très fine et très résistante, qui pourrait trouver son emploi dans l'industrie des tissus.

Coyol.—Ce palmier produit un fruit assez analogue à celui du huiscoyol dont la graine contient une graisse qui pourrait être employée.

La stipe atteint jusqu'à 30 mètres de hauteur et fleurit vers la quatrième ou cinquième année. Les fibres textiles fournies par ce palmier sont constituées par les faisceaux fibro vasculaires de la stipe.

Le coyol se trouve principalement dans les parties suivantes du territoire costaricien: Province de San José, canton d'Aserri; province d'Alajuela, cantons de Grécia et d'Aténas; province de Huanacaste, cantons de Libéria et de Bagaces.

ÉTATS-UNIS.

COMMERCE AVEC L'AMÉRIQUE LATINE.

IMPORTATIONS ET EXPORTATIONS.

On trouvera à la page 786 le dernier rapport du commerce entre les États-Unis et l'Amérique Latine, extrait de la compilation faite par le Bureau des Statistiques du Ministère des Finances. Le rapport a trait au mois de juillet 1902 et donne un tableau comparatif de ce mois avec le mois correspondant de l'année 1901. Il donne aussi un tableau des sept mois finissant au mois de juillet en les comparant avec la période correspondante de l'année précédente. On sait que les chiffres des différents bureaux de douane montrant les importations et les exportations pour un mois quelconque ne sont reçus au Ministère des Finances que le 20 du mois suivant et qu'il faut un certain temps pour les compiler et les faire imprimer de sorte que les résultats pour le mois de juillet ne peuvent être publiés avant le mois de septembre.

PRODUCTION DU CUIVRE.

La "Geological Survey" (Bureau des Mines) des Etats-Unis estime que la quantité de cuivre disponible aux Etats-Unis au 1er janvier 1902 était d'au moins 300,000,000 livres, ce qui équivaut à la production de six mois.

La production du cuivre du monde entier s'est élevée à 511,803 tonnes, contre 487,206 tonnes en 1900, 463,693 tonnes en 1899 et 429,379 tonnes en 1898.

La production totale du cuivre aux Etats-Unis s'est élevée à 268,782 tonnes en 1901, contre 270,588 tonnes en 1900.

La valeur totale des exportations de cuivre des Etats-Unis en 1901 était de $36,071,448, contre $58,875,439 en 1900, $43,845,654 en 1899 et $35,545,251 en 1898. C'est l'Allemagne qui est de beaucoup le plus grand consommateur de cuivre provenant des Etats-Unis, car la plus grande partie de ce métal expédié en Hollande est destinée à l'Allemagne. D'un autre côté, une partie du cuivre à destination du Royaume-Uni est réexpédiée de là pour d'autres pays. On ne peut pas très bien suivre les détails de ce mouvement.

En 1901 on estimatit la consommation de cuivre aux Etats-Unis à 382,761,014 livres, contre 356,891,121 livres en 1900.

PRODUCTION MINÉRALE POUR L'ANNÉE 1901.

La "Geological Survey" des Etats-Unis a publié son sommaire statistique annuel sur les productions minérales des Etats-Unis pour l'année 1901. Ce rapport montre pour tout le pays un total général de $1,092,224,380, valeur des minéraux produits en 1901, contre $1,064,408,321 en 1900. Ces chiffres comprennent $566,351,096, valeur des productions minérales non-métalliques; $524,873,284, valeur des produits métalliques, et $1,000,000, valeur des produits minéraux non spécifiés, y compris le sable de construction, le sable de verre, le minerai de fer qu'on emploie comme castine dans la fonte du fer, le minerai d'étain, le nitrate de soude, le sulphide de soude et les argiles d'alun employés par les fabricants de papier.

Le tableau suivant montre les valeurs des différents produits énumérés:

Fonte de fer	$242,174,000
Argent	77,126,382
Or	80,218,800
Cuivre	86,629,266
Plomb	23,280,200
Zinc	11,265,760
Mercure	1,382,305
Aluminium	2,238,000
Antimoine	542,020
Nickel	3,551
Platine	13,000
Charbon bitumineux	236,201,899
Charbon anthracite de Pennsylvanie.	112,504,020
Gaz naturel	27,067,500
Pétrole	66,417,335
Terre à briques	13,800,000
Ciment	15,786,789
Pierre	55,615,926
Corindom et émeri	146,040
Grénat	158,100
Pierres à repasser	580,703
Tripoli	52,950
Meules à moulin	57,179
Pierres à huile, etc	158,300
Borax	1,012,118
Brôme	154,572
Spath-fluor	113,803
Gypse	1,577,493
Marne	$30,000
Roche de phosphate	5,316,403
Pyrite	1,024,449
Sel	6,617,449
Soufre	223,430
Barytes	157,844
Oxyde de cobalt	24,048
Couleurs minérales	789,962
Zinc blanc	3,111,120
Asbeste	13,498
Asphalte	655,335
Bauxite	79,914
Minerai de fer chromique	5,790
Argile (autre que l'argile à briques)	2,591,332
Feldspath	220,422
Talc fibreux	483,600
Silex	149,297
Terre à foulon	80,697
Graphite	167,714
Pierre calcaire	5,659,836
Magnésite	43,057
Minerai de manganèse	116,722
Mica	118,578
Eaux minérales	7,586,962
Monazite	59,262
Pierres précieuses	289,050
Rutile	5,710
Stéatite	424,888

GUATÉMALA.

EXEMPTIONS DOUANIÈRES À L'IMPORTATION.

Pendant deux années, à partir du 1er mai 1902, les marchandises suivantes sont exemptes de droit d'entrée, à leur importation dans la République de Guatémala: goudron, carbolin, tuyaux de fer, maisons en fer et en bois ou parties d'elles, ciment romain, tôle ondulée, solives et châssis de croisée en bois et en fer, blanc de plomb et matériel pour toiture de toute sorte.

LES PRODUITS AGRICOLES.

Les données suivantes ont été extraites d'un rapport récent de M. Eugène Boute, licencié en sciences commerciales et titulaire d'une bourse de voyage du Gouvernement Belge:

Parmi les produits agricoles du pays, il y a lieu de citer, en premier lieu, le café, dont la production atteint à peu près, dans les départements traversés par le chemin de fer du Nord, la dixième partie de la production totale. Le café de Alta et Baja Verapaz est un des meilleurs de la République; malgré la faiblesse des marchés, il réalise encore couramment 100 et 110 francs pour les premières qualités. L'exportation atteint environ 60,000 sacs et se fait par Livingston, en attendant l'achèvement du chemin de fer du Nord et des routes carrossables du Rancho vers le nord jusqu'à Coban. Par suite de la qualité des produits obtenus, cette culture est encore appelée à s'étendre et la plupart des plantations de cette région augmentent encore leurs semis.

La canne à sacre est surtout cultivée dans le Baja Verapaz, où la production atteint environ 35,000 quintaux et est principalement consacrée à l'industrie et à la consommation indigène. Il en est de même du maïs et du frijol (fève noire) qui sont les principaux aliments des Indiens.

Le tabac non plus n'est un article d'exportation, mais est susceptible de le devenir, surtout celui qui est cultivé dans les départements de Chiquimula et de Zacapa, dont la production dépasse 20,000 quintaux. Avec une bonne préparation et surtout plus de soins dans la culture, on pourrait produire dans ce district un excellent tabac pour la fabrication des cigares. On fait déjà beaucop de cigares à Zacapa.

Après le café et le tabac, il faut citer, en premier lieu comme produit d'avenir et de bon rapport, la banane, dont la culture fournit les ressources à presque toute la population de la terre chaude, le long de la côte entre Livingston, Santo Tomas, et le long de la ligne du chemin de fer de Puerto Barrios jusqu'à La Iguana, près du Motagua.

En 1901, il en a été exporté, selon les statistiques officielles, pour environ 60,000 dollars (or) des Etats-Unis. Le commerce se fait surtout avec la Nouvelle-Orléans, d'où partent continuellement de petits bateaux à vapeur qui vont chercher les régimes sur tous les points de la côte de l'Amérique Centrale.

Le cacao aussi commence à acquérir une certaine importance pour les départements de Zacapa, de Baja Verapaz et de Alta Verapaz; bien que la production atteigne à peine 10,000 kilogrammes, le nombre de plantations nouvelles a considérablement augmenté dans ces deux dernières années. Beaucoup de *finqueros*, ou planteurs, abandonnant le vieux système d'une culture unique pour faire des plantations mixtes, s'adonnent en même temps à l'élevage de bétail. De cette façon ils peuvent espérer que, lorsqu'une culture ne rapporte pas, pendant un certain temps, comme c'est le cas pour le café à présent, les autres donneront, et qu'ils suffiront ainsi à leurs besoins sans devoir s'endetter à l'étranger et engager leurs récoltes.

La culture du blé commence à être pratiquée dans le Département de Jalapa, dont le climat tempéré et la terre fertile favorisent on ne peut mieux cette production. Quand les voies de communication seront bien établies, il est assez probable qu'on pourra étendre cette culture de façon à ne plus devoir recourir aux importations de farine américaine.

Parmi les exploitations agricoles que l'achèvement du chemin de fer du Nord va rendre possibles et rémunératrices dans les districts traversés par cette voie ferrée, il y a lieu de citer d'abord la culture de la banane. En effet, cette culture n'exige pas autant de main-d'œuvre que les autres plantations tropicales et est aussi beaucoup moins coûteuse en fait d'outillage mécanique. La première mise de fonds est relativement minime; et en employant les premiers bénéfices pour l'extension de l'entreprise et la création d'autres cultures, on arriverait en peu d'années à monter une *finca* (ou plantation) mixte, c'est-à-dire, de bananes, café, cacao et bétail, en pleine production; de plus, cette entreprise serait à l'abri des pertes, parce qu'il faudrait pour cela une baisse générale des prix de tous les produits de la finca. Les quelques fincas mixtes qui existent sur la côte du Pacifique, et qui produisent généralement du café, du sucre et du bétail, sont, en ce moment de crise du café, les seules qui rapportent un certain bénéfice. C'est donc ce genre de fincas qui devrait être adopté, car, malgré les avantages et les facilités qu'offre la culture de la banane, une exploitation exclusive serait tout au moins imprudente. C'est d'ailleurs par là qu'il faut commencer, parce que cette culture occasionne le moins de frais et donne le plus prompt rendement.

Pour donner une idée des frais qu'occasionne une plantation de ce genre, on reproduit ci-dessous un devis de l'installation d'une finca de 150 manzanas[a] plantée de bananes. Ces frais sont indiqués en piastres-argent d'une valeur de 2 francs et ne comprennent pas la valeur du terrain. L'achat de celui-ci, s'l s'agit d'un endroit bien situé, près de la ligne du chemin de fer ou de la côte, ne dépassera pas 300 piastres-argent. L'acquisition d'un grand terrain d'au moins 30 caballerías,[b] nécessaire pour fonder une finca mixte d'étendue et de production normales, coûtera relativement beaucoup moins cher. C'est la raison pour laquelle le devis ci-dessous ne comprend pas le prix d'achat du terrain. Ce devis ne comporte non plus l'achat d'un bateau, nécessaire aux fincas de la côte, qui doivent transporter leurs produits aux ports de Livingston, de Santo-Tomás ou de Puerto Barrios. Le coût de ce bateau est d'environ 1,500 piastres-argent.

---

[a] La manzana=10,000 varas carrées. La vare=Om 835.

[b] La caballería=65 manzanas.

Les fincas situées le long ou près du chemin de fer doivent ajouter les frais de transport de leurs produits jusqu'au port d'embarquement. Les frais ci-dessous ont été calculés pour une plantation de 60,000 pieds à faire en deux ans; 50 manzanas avec 20,000 pieds la première année et 100 manzanas avec 40,000 pieds la deuxième année:

	Piastres-argent.
Défrichement	3, 750
Outillage	400
Plantation de 60,000 plants, à 1 piastre le cent	600
Transport de 60,000 plants (400 par manzana), à 1 piastre le cent	600
Chemins à faire dans la finca	1, 500
Charriage, 15 mules	2, 250
Premier nettoyage, à 12 piastres la manzana	1, 800
Deuxième nettoyage, à 6 piastres la manzana	900
Habitations des travailleurs, ranchos	1, 000
Avance aux travailleurs	1, 000
Faux frais	1, 000
Solde de l'administrateur	1, 200
Un pâturage (potrero)	500
Défrichements pour l'installation des ranchos	250
Bœufs	150
Pertes sur avances aux travailleurs	500
Sur un total de	17, 400

Ou 34,800 francs or au change de 2 francs par piastre.

Pour cette mise de fonds, il y aurait un rendement moyen de:

	Régimes.
1ère année 50 manzanas donneront	20, 000
2e année 50 manzanas donneront	40, 000
2e année 100 manzanas nouvelles donneront	40, 000
Soit sur une récolte, en deux ans, de	100, 000

La troisième année, la production diminuerait un peu et serait de 400 grands et beaux régimes par manzana, soit 60,000 régimes, dont la valeur dépendra surtout des soins que le cultivateur aura donné à son entreprise. Etant donné l'avenir du produit, dont le débouché principal est jusqu'ici les Etats-Unis du Nord, cette exploitation pourrait être doublée et donnerait proportionnellement un plus grand rendement, les frais étant moindres.

HAÏTI.

COMMERCE AVEC L'ANGLETERRE.

D'après un rapport fait récemment par le Consul-Général de Sa Majesté à Port-au-Prince, un commerce considérable et important en cotonnades, toiles de lin et quincaillerie se fait entre la République d'Haïti et la Grande-Bretagne. Comme il n'existe aucune communication directe entre les deux pays toutes les exportations d'Haïti pour l'Angleterre sont expédiées par voie de New York au moyen des trois lignes de vapeur faisant le service des ports haïtiens.

D'après l'"Exposé Général de la Situation" publié par le gouvernement haïtien pour l'année 1900, voici la valeur des importations ainsi que les pays d'origine:

	Or.
Etats-Unis	$3,401,257
France	437,057
Angleterre	422,983
Allemagne	192,843
Autres pays	260,984

Les exportations consistent principalement de café, de cacao et de bois de campêche. Ces produits trouvent leurs meilleurs débouchés en Allemagne et en France, surtout dans ce dernier pays par suite du traité de commerce conclu entre la France et Haïti en juillet 1900. On estime à $3,197,549 en or la valeur des exportations pour l'année 1900.

MEXIQUE.

BUDGET DES DÉPENSES POUR L'ANNÉE 1903.

Les prévisions du budget des dépenses pour l'année fiscale 1903, commençant au mois de juillet 1902 et finissant au mois de juin 1903, tel qu'il a été approuvé par le Congrès, s'élèvent à la somme de $65,429,880.64. Cette somme fait ressortir un excédent de $691,064.81 sur les estimations du Ministre Limantour et comprend les articles suivants:

Pouvoir Législatif	$1,146,888.80
Pouvoir Exécutif	304,159.51
Pouvoir Judiciaire	425,250.65
Ministère des Affaires Etrangères	720,941.30
Ministère de l'Intérieur	5,122,734.00
Ministère de la Justice	894,284.65
Ministère de l'Instruction Publique	2,646,335.30
Ministère de Fomento, des Colonies et de l'Industrie	1,097,266.31
Ministère des Postes et Travaux Publics	9,461,828.90
Ministère des Finances et du Crédit Public	7,103,512.35
Services administratifs	22,216,893.00
Dette Publique:	
Ministère de la Guerre et de la Marine	14,299,785.87
Total	65,429,880.64

Les prévisions de l'année fiscale de 1901–2 ont été de $62,275,101.83, ce qui fait ressortir un excédent de $3,154,778.81 sur les dépenses de l'année 1903.

OPÉRATIONS DE BANQUE.

L'état suivant présentant les opérations depuis 1865 jusqu'en avril 1902, montre l'accroissement des affaires traitées dans les banques du Mexique.

Les chiffres ci-dessous montrent la valeur des transactions faites dans les années indiquées:

1865	$1,000,000	1899	$210,295,000
1878	5,000,000	1900	259,264,000
1885	30,000,000	1901, 31 mars	262,057,253
1893	93,000,000	1901, 31 juillet	270,141,623
1898	116,198,000	1902, avril	312,526,167

D'après le "Mexican Herald," d'où l'on a extrait les chiffres ci-dessus, les chèques étaient inconnus au Mexique il y a vingt ans, tandis qu'à présent l'usage en est général. Il y a vingt-cinq banques autorisées par le Gouvernement dont le capital s'élève à la somme de $83,300,000. Les opérations de ces banques sont faites d'après les règlements du Gouvernement mexicain et avec les privilèges qui leur sont accordés.

PRODUCTION DU CUIVRE, PREMIER SEMESTRE DE 1902.

La production du cuivre au Mexique pendant le premier semestre de l'année fiscale 1902 (du mois de juillet au mois de décembre 1901) a été de 14,992 tonnes, d'une valeur de $4,611,809.73. En plus de cette quantité, on a exporté pendant la période citée, 5,434 tonnes de cuivre, évaluées à $1,480,012.85, soit un total de 20,426 tonnes, d'une valeur de $6,091,822.58. Dans le même semestre de l'année fiscale antérieure (1900–1901) l'industrie de l'exploitation de cuivre a été représentée par 14,455 tonnes, évaluées à $4,726,873.75, et 268 tonnes de minerai de cuivre, évaluées à $16,722, soit un tonnage total de 14,713 tonnes, d'une valeur totale de $4,743,645.75.

CRÉATION DE MAGASINS GÉNÉRAUX ET D'UNE EXPOSITION D'ÉCHANTILLONS À MEXICO.

Jusqu'au 1^er^ janvier dernier, les marchandises importées au Mexique devaient, dès qu'elles étaient débarquées, acquitter les droits de douane et être aussitôt prises en charge par l'acheteur, il n'existait pas d'entreprise d'entrepôts spéciaux ou de magasins généraux permettant à l'importateur de laisser sa marchandise en douane pour en prendre livraison au bout d'un certain temps au fur et à mesure de ses besoins.

Pour combler cette lacune, le Ministre des finances, par décret en date du 2 juillet 1901, a accordé à une société fondée sous le nom de "Almacenes generales de depósito de México y Vera-Cruz," le droit d'établir dans ces deux villes des magasins généraux.

Les bureaux de la compagnie à Mexico ont été inaugurés le 1^er^ janvier 1902, ceux de Vera-Cruz seront ouverts au public dans quelques semaines, dès que les entrepôts, construits sur les terrains gagnés sur la mer, seront terminés.

En dehors des opérations ordinaires de magasinage, la société en question pourra conserver pendant un an les marchandises qui lui seront adressées sans que celles-ci aient à payer aucun droit, émettre des certificats de dépôt, faire des prêts sur marchandise, émettre des bons hypothécaires garantis par ses immeubles, se charger pour le compte de ses clients de toutes opérations en douane, assurer contre l'incendie les marchandises déposées dans ses magasins, vendre à la commission ou aux enchères, passer des contrats avec les consignataires et les compagnies de transport, etc.

La société est, en outre, autorisée à établir des locaux spéciaux pour l'exhibition d'échantillons qui pourront rester exposés pendant deux ans sans payer de droits d'importation et moyennant seulement un tarif très réduit. Un immeuble a déjà été acquis à cet effet à Mexico dans une des rues les plus centrales de la ville. Les membres du conseil d'administration de la société anonyme des "Almacenes generales" comptent parmi les plus notables personnalités financières et commerciales du Mexique.

LE COMMERCE DES FILS DE FER POUR CLÔTURES.

Il résulte d'une communication de la légation de Belgique à Mexico, au "Bulletin Commercial," de Bruxelles, que, par suite des progrès de la colonisation et de création de nombreux ranchos, il se fait au Mexique une consommation considérable de clôtures métalliques. L'article connu sous le nom de ronce artificielle est surtout très demandé.

Pour obtenir des commandes, les tréfileries devraient se faire représenter sur place et envoyer à leurs agents des échantillons avec prix courants, etc. Elles trouveraient bientôt un débouché important sur le territoire de la République. Dans les Etats de Vera-Cruz et d'Oaxaca, le premier soin des propriétaires, après l'achat d'un terrain, est de le clôturer; les propriétés étant d'ordinaire d'une grande étendue, la consommation des fils de fer nécessaires atteint des chiffres fort élevés.

Il est à présumer également que, dans quelques années, toutes les compagnies exploitant des voies ferrées situées en terres chaudes seront forcées de renouveler leurs traverses, lesquelles ne résistent pas à plusieurs saisons de pluies consécutives. Comme le prix du bois, par suite du déboisement systématique et continuel, est destiné à s'élever de plus en plus, les compagnies finiront plus que probablement par adopter les traverses en acier.

CONSTRUCTION D'UN CHEMIN DE FER.

D'après un récent journal de commerce la Compagnie du Chemin de fer Central Mexicain vient d'acheter, pour la somme de 900,000 piastres or, la concession et la partie construite d'un chemin de fer appartenant à M. Honey, sujet britannique résidant à Mexico. Cette ligne doit relier Sandoval, sur la ligne de Vera-Cruz, au port de Tampico et aura des embranchements vers Mexico et Pachuca. La partie construite comprend 70 kilomètres de Sandoval à Acapulco et 30 kilomètres vers Trinidad.

La construction de la partie de la ligne située entre Sandoval et Lechería (71 kilomètres) va commencer incessamment et le travail sera poussé de façon à être terminé vers le 31 décembre prochain.

La ligne, qui aura environ 375 kilomètres de longueur, sera terminée jusqu'à Tampico vers le mois de décembre 1904.

Pour la partie non construite de la ligne, la Compagnie du Chemin de fer Central Mexicain, reçoit du gouvernement un subside de 6,500 piastres par kilomètre, payables en titres de 5 pour cent de la dette mexicaine recevables au pair.

Par cette transaction, la Compagnie obtient une voie de communication directe de Mexico à Tampico, et, de ce fait, ce dernier port ne sera guère plus éloigné de la capitale que celui de Vera-Cruz.

LE BOIS PRÉCIEUX.

Un récent journal de commerce fait connaître que plusieurs commerçants en bois fins de Houston, Texas, s'occupent en ce moment de la formation d'un syndicat au capital de deux millions de dollars or. Le syndicat achèterait au Mexique tous les bois précieux et de construction, non seulement pour en faire l'exportation, mais encore pour les utiliser dans le pays à la fabrication de meubles.

On sait que la plupart des meubles en usage dans le pays sont de fabrication européenne ou des Etats-Unis, bien que la matière première soit souvent mexicaine. Le syndicat se propose donc d'installer de grandes fabriques qui travailleront les bois du pays, alimenteront le marché mexicain et exporteront en Amérique du Sud et du Centre.

MESURES PROJETÉES POUR DÉVELOPPER LE COMMERCE.

On fait connaître que la Chambre de Commerce de Mexico a formé le projet d'envoyer à l'étranger une commission chargée d'étudier les conditions des principaux marchés européens en vue de développer les importations et les exportations au Mexique.

Cette proposition a été bien accueillie par les négociants de la capitale.

Dans le cas où l'appui et les subsides sollicités par la Chambre de Commerce lui seraient accordés, la commission se propose de visiter successivement les Etats-Unis, l'Allemagne, l'Angleterre, la Belgique et la France.

PARAGUAY.

SITUATION FINANCIÈRE ET ÉCONOMIQUE.

Selon les données publiées dans la "Review of the River Plate," pour le 7 juillet 1902, la dette intérieure de la République du Paraguay s'élevait, le 31 mai 1902, à $11,069,020, tandis que la dette extérieure se montait à $4,775,077; la première se composant d'obligations, de papier-monnaie et de billets du Trésor et l'autre d'emprunts réalisés en Angleterre en 1871 et 1872, évalués en or.

En 1901 les impôts publics ont atteint le chiffre de $11,412,747 en papier, équivalant à $1,342,676 en or. Pendant l'année les importations se sont élevées à $3,003,657 en or et les exportations à $2,529,306 en or. Les principaux articles d'exportation sont les suivants: cuirs salés, 3,696,116 kilogrammes, contre 3,953,250 pour l'année antérieure; cuirs séchés, 2,228,667 kilogrammes, contre 3,146,112 kilogrammes en 1900; billes de bois dur, 90,036 kilogrammes; billes de quebracho, 354,144 kilogrammes; tabac, 1,425,012 kilogrammes; yerba maté, 7,099,744 kilogrammes et yerba maté en poudre, 384,000 kilogrammes; tous les articles nommés en dernier lieu, à l'exception des billes de quebracho, accusent une diminution, en comparaison de l'année antérieure.

D'après les derniers renseignements fournis par le Bureau des Statistiques, il y a dans le pays 2,298 maisons d'affaires formant ensemble un capital de $66,673,000 et 1,094 établissements industriels capitalisés à $135,348,066. A la fin de l'année 1900, le bétail sur pied s'élevait à 2,743,665 têtes de bêtes à corne d'une valeur de $100,286,835.

PÉROU.

DÉBOUCHÉ POUR MACHINES ET OUTILS.

Le Ministère des Affaires Etrangères d'Angleterre a reçu du Consul-Général anglais à Callao, un rapport sur les conditions de la vente des machines agricoles et minières dans la République du Pérou. Le rapport fait connaître qu'à l'exception des charrues, on ne fabrique que très peu de machines agricoles dans le pays. Celles dont on se sert dans l'intérieur sont faites ordinairement par les forgerons du pays et sont on ne peut plus primitives. Sur la côte, on a planté la canne à sucre, le riz, le coton, le maïs, les haricots, etc. Les machines et instruments nécessaires à leur culture sont importés. On importe aussi un grand nombre de machines employées pour broyer le sucre ainsi que des alambics, mais on en fabrique aussi à Lima et à Callao.

On importe les machines à vapeur et les chaudières du Royaume-Uni, des Etats-Unis, de la France et de l'Allemagne. Celles qui ont une force de plus de 25 chevaux sont importées d'Angleterre, mais celles d'un type plus petit sont fournies presqu'entièrement par les Etats-

Unis. On importe principalement des Etats-Unis les machines foulantes de plusieurs types et la plupart des batteuses mécaniques à vapeur, ainsi que les moulins à moudre le maïs. Les moissonneuses, les faucheuses et les charrues sont principalement de fabrique américaine, tandis que les appareils de distillation et les machines à moudre la canne sont principalement de fabrique anglaise; bien qu'il y ait une compagnie française, une allemande et une nord-américaine faisant aussi le commerce de ces machines. On importe aussi des Etats-Unis de grandes quantités d'huile lubrifiante.

PROGRÈS DE L'ÉLECTRICITÉ.

Dans un rapport adressé au Ministère des Affaires Etrangères d'Angleterre (No. 2,807 des séries annuelles), le Consul-Général anglais à Callao constate que l'emploi de l'électricité pour l'éclairage augmente rapidement au Pérou. La ville de Lima est entièrement éclairée à l'électricité et plusieurs maisons particulières de la ville emploient aussi ce mode d'éclairage. Trois compagnies fournissent l'électricité à la ville.

Arequipa est éclairé aussi en grande partie à l'électricité et il y a des compagnies en formation pour installer ce même mode d'éclairage à Callao, Trujillo et Chiclayo. La plus grande partie de l'installation provient des Etats-Unis. Les machines anglaises de ce type sont pour ainsi dire inconnues dans le pays. On a essayé les dynamos et les moteurs de fabrique allemande, mais on les a trouvés trop compliqués.

Des lignes téléphoniques existent dans les Départements de Lima, Puira, La Libertad, Arequipa et Ica, la longueur totale des fils s'élève à plus de 3,000 milles. Il y a eu dernièrement un grand nombre de demandes pour obtenir l'autorisation de faire de nouvelles installations. La plupart des appareils téléphoniques employés sont importés de la Suède.

EFFORTS DU GOUVERNEMENT POUR ENGAGER LES IMMIGRANTS À S'ÉTABLIR DANS LE PAYS.

Le Gouvernement péruvien, désirant attirer l'émigration européenne sur son territoire, vient de faire paraître en espagnol, en italien et en français pour le faire distribuer en Europe, un manuel à l'usage des immigrants dans lequel il fait ressortir les avantages qui leur sont offerts. Le centre de la République depuis le 11^{e} degré de latitude jusqu'au 4^{e} degré 30 est traversé par des fleuves navigables et c'est cette région centrale qui convient le mieux à la colonisation. Ceci s'applique d'une manière toute spéciale à la région traversée par la route centrale d'Oroya (relié à Lima par une ligne ferrée de 206 kilomètres de longueur) à Port Bermudez sur le fleuve Pichis, soit une distance de 338 kilomètres. En vertu d'une loi décrétée en décembre 1898, on peut acheter des terres dans les montagnes au prix de 5 sols l'hectare ou les louer à raison de 1 sol l'hectare ou encore on peut obtenir gratis des lots ne dépassant pas deux hectares à condition seulement de cultiver la terre. En vertu d'une autre loi on peut acheter du terrain sur la côte à condition de le drainer. Les terrains montagneux sont couverts de forêts d'arbres à caoutchouc, d'arbres résineux et à bois dur; et quand on défriche le terrain on peut cultiver le cacao, le café, la canne à sucre, le coca, etc. Le Gouvernement réserve annuellement la somme de 90,000 sols pour l'entretien de la route centrale et pour encourager la colonisation de la région qu'elle traverse.

La loi de décembre 1898 ne se borne pas à autoriser la vente des terrains, mais elle permet aussi en certains districts de louer des groupes de 150 arbres à caoutchouc à 20 sous le groupe par an ou l'hectare planté des mêmes arbres au même prix; ainsi que de louer un certain nombre d'hectares couverts d'arbres à caoutchouc pour une période de 10 ans. Mais il est défendu au concessionnaire de couper ou de détruire les arbres et il doit s'engager à en vendre la gomme au Gouvernement à raison de 2 sols les 46 kilos.

SAINT-DOMINGUE.

COMMERCE ET PRODUCTIONS EN 1901.

Les informations suivantes ont été extraites d'un rapport récent du Consul de Belgique à Saint-Domingue.

Durant l'année 1901, la République de Saint-Domingue a importé pour 2,986,921 piastres de marchandises diverses, tandis que l'exportation des produits du pays a atteint une valeur de 5,224,043 piastres.

Ces chiffres se répartissent comme suit entre les divers ports de la République:

Ports.	Importations.	Exportations.
Saint-Domingue	$747,883	$686,475
San Pablo de Macoris	658,933	1,901,022
Puerto Plata	851,665	1,190,164
Samaná	95,591	142,166
Sánchez	466,439	819,714
Azua	84,775	344,898
Barahona	6,567	32,430
Monte Cristi	75,068	107,174
Total	2,986,921	5,224,043

Les principaux produits exportés ont été les suivants: sucre (100,084,850 livres); cacao (11,001,800 livres); café (381,450 livres); tabac (11,252,800 livres); cire (289,200 livres); divi-divi (4,460,600 livres); bois de campêche (4,678,150 livres); bois de guayacan (13,460,000 livres); bois de mora (350.300 livres); acajou (296,700 pieds); bois d'espinillo (56,100 pieds); bois de cèdre (74,243 pieds); bois de bera (80,900 pieds); peaux de bœuf 221,000 pièces); peaux de chèvre (7,281 douzaines); cornes de bœuf (61,325 livres); miel (340,250 gallons); écorces d'orange (2,750 livres); bœufs (111,800 têtes).

Les recettes des douanes ont atteint, en 1901, le montant total de 1,876,145 piastres.

La production agricole n'a guère progressé en 1901, et les chiffres de l'exportation accùsent même une certaine diminution, par suite, probablement, de la baisse subie par certains produits sur les marchés étrangers.

En présence des mauvais résultats obtenus dans ces derniers temps, de nombreux planteurs de canne à sucre étudient la possibilité d'entredrendre d'autres cultures donnant des bénéfices plus élevés, tels que, par exemple, la cabuya, le maguey et le coton. Dans le district de Monte Cristi, on a déjà installé une machine pour la décortication de la cabuya et du maguey et on prévoit que cette enterprise donnera de très bons résultats.

Dans le district de Barahona, on a commencé à cultiver le caféier sur une assez grande échelle et il paraîtrait que des capitalistes ont également l'intention d'établir de grandes plantations de café dans cette partie de la république. Il serait question, paraît-il, d'acheter des machines perfectionnées pour le nettoyage et la préparation du café, afin d'obtenir des prix supérieurs à ceux qui sont cotés actuellement pour certains cafés dominicains.

Diverses concessions de chemins de fer ont été accordées dans la République de Saint-Domingue en 1901.

Les concessionnaires de la ligne de Moca à la Vega ont obtenu une prorogation du délai qui leur était accordé pour commencer les travaux.

La municipalité de Seybo, qui avait obtenu l'autorisation de construire un chemin de fer de cette localité à la Romana a cédé sa concession à un capitaliste étranger, lequel a déjà entamé les travaux de construction.

Dernièrement, le Congrès a accordé la concession de la construction d'une voie ferrée de Saint-Domingue à San Cristóbal, avec prolongement facultatif vers Bani et le port de Las Calderas. Les travaux de cette ligne sont également commencés.

Une autre concession a également été accordée pour la construction d'une voie ferrée dans le district de Monte Cristi.

Selon toute probabilité, ces diverses lignes contribueront beaucoup au développement économique des districts qu'elles traverseront et où l'agriculture languit actuellement par suite du manque de moyens de communication.

Il y a lieu de signaler également que le Congrès national a décrété que 30 pour cent des recettes du port de Romana seront employés pour favoriser l'immigration dans le pays.

URUGUAY.

COMMERCE EXTÉRIEUR PENDANT LE PREMIER TRIMESTRE DE L'ANNÉE 1902.

Le Bureau des Statistiques de la Douane à Montévidéo vient de publier l'état présentant le commerce extérieur de la République pendant le premier trimestre de l'année 1902; nous y avons ajouté, pour servir de comparaison, les chiffres afférents à la même période de l'année antérieure, sans compter les centimes.

	1901.	1902.
EXPORTATION.		
Bétail sur pied	$157,829	$149,435
Produits des abattoirs	9,205,228	10,321,663
Produits ruraux	45,419	702,254
Autres produits	149,796	140,935
Articles divers	3,427	1,167
Approvisionnements pour les navires	35,300	30,923
Total	9,656,999	11,346,377
IMPORTATION.		
Boissons en général	595,402	515,397
Denrées et comestibles. céréales et épices	1,348,619	1,262,055
Tabac et cigares	79,907	43,951
Textiles	1,150,308	1,194,645
Vêtements confectionnés	319,331	289,927
Matière première et machines	2,285,681	1,905,421
Divers	612,445	587,826
Bétail sur pied	167,027	31,766
Total	6,558,720	5,830,988

Les tableaux suivants donnent les totaux des importations et exportations pour le premier trimestre des cinq dernières années:

	Importation.	Exportation.	Total du commerce.
Premier trimestre:			
1898	$6,438,175	$11,361,506	$17,799,681
1899	5,994,577	12,710,155	18,704,732
1900	6,210,926	6,210,926	15,560,243
1901	6,558,720	9,656,999	16,215,719
1902	5,830,988	11,346,377	17,177,365

En comparant l'année 1902 avec celle de 1901 il ressort une augmentation de $1,589,378 dans les exportations du premier trimestre et une diminution de $727,732 dans les importations, soit une augmentation nette de $961,646 dans le commerce total. L'exportation, ainsi qu'on avait prévu, accuse une amélioration importante, mais en ce qui concerne l'importation, les chiffres sont loin d'être satisfaisants.

PRODUCTION GÉNÉRALE DU FER ET DE L'ACIER.

Le "Commercial Intelligence" de Londres, dans un rapport étendu au sujet de la production de la fonte de fer, fait connaître qu'en 1901 la production totale du monde entier s'est élevée à 40,408,000 tonnes. Voici les noms des différentes contrées ainsi que les quantités qu'elles ont produites: Etats-Unis, 15,878,000 tonnes; Royaume-Uni, 7,750,000 tonnes; Allemagne, 7,663,000 tonnes; Russie, 3,100,000 tonnes; France, 2,362,000 tonnes; autres pays du monde 3,655,000 tonnes. En comparant la production de 1901 avec celle de la moyenne annuelle pour la période des cinq dernières années (1896–1900), les Etats-Unis ont augmenté leur production de fer et d'acier, de 1,464,000 tonnes à

15,878,000 tonnes, soit une augmentation de 985 pour cent; le Royaume-Uni de 5,133,000 tonnes à 7,750,000 tonnes, soit une augmentation de 51 pour cent; l'Allemagne de 1,226,000 tonnes à 7,663,000 tonnes, soit une augmentation de 525 pour cent, et le monde entier, à l'exception des pays mentionnés, de 2,710,000 tonnes à 9,117,000 tonnes, soit une augmentation de 236 pour cent.

La chose la plus remarquable dans cet accroissement général, dit l'auteur précité, est, d'un côté, la marche en avant et énorme des Etats-Unis dans la proportion produite par le monde entier, et de l'autre cette décadence rapide dans la position tenue jusqu'alors par la Grand-Bretagne. Il y a trente-cinq ans, le Royaume-Uni fournissait, pour ainsi dire, la moitié de la production totale de la fonte de fer et la production des Etats-Unis n'atteignait qu'un septième du total; tandis qu'en 1901, les Etats-Unis occupaient la première place par rapport à la production totale, fournissant, à proprement parler, quatre-dixièmes, quand l'Angleterre et l'Allemagne ne fournissaient chacun que deux-dixièmes. De 1866 à 1870, la consommation pour le monde entier s'est élevée à 17 livres par tête. En 1901 elle a atteint 57 livres, et cette année les Etats-Unis en ont consommé 455 livres par tête et le Royaume-Uni 350 livres.

RÉGIME APPLIQUÉ DANS L'AMÉRIQUE DU CENTRE ET DU SUD AUX VOYAGEURS DE COMMERCE ET AUX ÉCHANTILLONS QUI LES ACCOMPAGNENT.

Les voyageurs de commerce ne sont pas soumis dans les républiques de l'Amérique Centrale au paiement d'une patente. Ils n'ont pas de formalité à remplir lors de leur entrée dans ces pays; toutefois, il est à recommander qu'ils soient munis d'un document établissant leur nationalité.

Les échantillons sont admis, d'une façon générale, moyennant dépôt d'une somme qui équivaut au montant des droits de douane et qui est restituée à la sortie.

Costa Rica.—Les échantillons doivent être déclarés à l'entrée; il en est dressé une liste complète et détaillée. L'intéressé est tenu de déposer le montant des droits de douane et d'acquitter les droits pour le môle et le théâtre. La réexportation doit s'effectuer dans les soixante jours. Passé ce délai, la somme remise en garantie des droits de douane n'est plus restituée. Les droits pour le môle et le théâtre restent en tous cas acquis au trésor.

Les échantillons, dont la liste a été dressée à l'entrée, doivent être réexportés au complet. S'il en manque une partie, la totalité des droits déposés devient la propriété du trésor.

L'importation des armes à feu autres que les révolvers et fusils à pistons est interdite.

Guatémala.—Il y a prohibition pour les armes et munitions de guerre. Pour les autres armes et munitions, une autorisation spéciale est nécessaire.

Honduras.—Les échantillons de toute espèce sont admis sans aucune restriction.

Nicaragua.—Les voyageurs de commerce qui arrivent avec des échantillons, tels que armes de chasse, révolvers ou munitions, obtiennent facilement la permission de les introduire en faisant établir une "police de douane" garantie par un agent ou commerçant connu. Au départ des voyageurs, la police est acquittée sur présentation des objets qui y sont mentionnés et sur paiement des droits pour ceux qui manqueraient ou seraient vendus.

Salvador.—En vertu de l'article 353 du tarif douanier, les échantillons de marchandises sans valeur, en morceaux ou objets hors d'usage, sont soumis au paiement d'un droit d'entree de 1 centavo par kilogramme.

L'importation des révolvers et pistolets, d'un calibre inférieur à .44 est admise; les cartouches ne peuvent être introduites dans le pays sans l'autorisation du ministère des finances. Les balles ou plombs de chasse paient, à l'entrée, un droit de 8 centavos par kilogramme.

République Argentine.—Il n'existe pas, dans la République Argentine, de législation uniforme concernant les voyageurs de commerce. Chacune des provinces détermine les conditions dans lesquelles lesdits voyageurs sont admis à exercer leurs professions. Presque partout, les voyageurs de commerce porteurs d'échantillons sont soumis au paiement d'une taxe. Celle-ci varie suivant les provinces, et suivant le genre d'articles présentés, entre 50 et 400 piastres papier. Dans certains cas même, le prix de la licence atteint un chiffre beaucoup plus élevé.

Les licences sont délivrées dans la capitale de chaque province pour une période d'un an finissant le 31 décembre. Elles doivent être sollicitées "personnellement" par le voyageur de commerce auprès de l'autorité locale, sous peine d'amende. Aucun document n'est exigé à l'appui de ces demandes; on conseille, toutefois, à l'intéressé de se munir d'une pièce de nature à établir son identité.

Les échantillons sans valeur sont admis en franchise dans la République; ceux qui représentent une valeur marchande peuvent également entrer librement moyennant le dépôt d'un cautionnement et à condition qu'ils soient réexportés dans le délai de quatre-vingt-dix jours. Ce délai peut être renouvelé avec l'autorisation du ministère des finances.

Les compagnies de chemins de fer de la République Argentine accordent aux voyageurs de commerce le transport gratuit de 50 kilogrammes de bagages.

République de Bolivie.—Les voyageurs de commerce, sont, en général, soumis au paiement d'une patente dans les villes de la Bolivie; cette patente varie dans de fortes proportions suivant les villes et le genre de commerce.

Il est à conseiller auxdits voyageurs de se munir de certificats établissant leur identité.

Les échantillons qui accompagnent les voyageurs de commerce acquittent les droits afférents aux marchandises qu'ils représentent.

Brésil.—Les voyageurs de commerce ne doivent être porteurs, au Brésil, d'aucune pièce spéciale; ils n'ont pas de formalités spéciales à remplir lors de leur entrée dans le pays.

Ils sont soumis dans presque tous les Etats formant la fédération et dans les principales villes, au paiement de patentes variant de 200 milreis à 1 conto de reis.

Voici la liste des Etats et des villes qui exigent des patentes:

		Prix de la patente.
Manáos (Etat d'Amazonas)	milreis..	600
Belem (Etat de Para)	do....	1,000
San Luiz (Etat de Maranhão)	do....	200
Fortaleza (Etat de Céara)	do....	450
Parahyba du Nord (Etat de Rio Grande du Nord)	do....	200
Pernambuco	do....	400
Bahia	do....	400
Maceio (Etat de l'Alagoas)	do....	300
Rio de Janeiro	do....	200
Saint Paul (Etat de São Paulo)	do....	400
Santos (Etat de São Paulo)	do....	200
Campinas (Etat de São Paulo)	do....	200
Curityba (Etat de Parana)	do....	1,000
Rio Grande do Sul (Etat de Rio Grande do Sul)	do....	300
Pelotas (Etat de Rio Grande do Sul)	do....	300
Porto Alegre (Etat de Rio Grande do Sul)	do....	600

Ces différentes taxes sont valables pour une année. Les échantillons sans valeur sont admis en franchise; les autres sont frappés d'un droit de douane de 50 pour cent ad valorem.

Les échantillons doivent être accompagnés d'une facture consulaire lorsqu'ils sont expédiés comme marchandise. Si, au contraire, le voyageur les embarque avec lui comme bagages personnels, il doit avoir soin de remettre au commandant du navire un état indiquant le poids et le contenu de chacun des colis.

Pour se rendre d'un port du Brésil à un autre, il est préférable de se servir des bateaux nationaux, il faut alors prendre la précaution de faire dresser par un agent en douane un document constatant que les échantillons ont déjà acquitté des droits de douane.

Il existe des dispositions restrictives en ce qui concerne l'importation des armes à feu et des munitions.

Chili.—Les voyageurs de commerce ne sont pas soumis à un régime spécial dans la République du Chili. Ils n'ont pas à payer de patente et n'ont à remplir aucune formalité particulière lors de leur entrée dans le pays.

Les échantillons sont soumis à leur entrée dans le pays au paiement d'un droit de "movilización" de 70 centavos à 1 piastre par kilogramme brut. Les échantillons sans valeur marchande et ceux qui sont détériorés de façon à ne pouvoir être vendus, n'ont pas de droits de douane à payer. Les autres sont admis en franchise temporaire des droits d'entrée, mais, pour pourvoir bénéficier de cette franchise, ils doivent être réexportés dans le délai de six mois et dans les mêmes caisses qui ont servi pour l'importation.

L'admission temporaire d'un assortiment de marchandises est accordée aux mêmes conditions que celle des échantillons.

La poudre (excepté la poudre destinée aux mines, les armes blanches, les armes à feu et les munitions de guerre ne peuvent être importées que par le port de Valparaiso et sur l'autorisation spéciale de l'intendant de la province.

Paraguay.—Aux termes de la loi du 28 novembre 1898, les voyageurs de commerce qui voyagent dans la République du Paraguay, avec ou sans échantillons, sont assujettis au paiement d'une patente fixe, personnelle et intransférable de 500 piastres fortes par semestre. Ce paiement doit être effectué entre les mains de la municipalité de l'Assomption.

L'Administration des douanes exige des voyageurs de commerce ou commissionnaires, important des échantillons pouvant être réalisés comme marchandises, une caution garantissant le montant des droits à payer pour ces articles en cas de vente. Cette caution est restituée si les échantillons ne sont pas vendus et sont réexportés.

Uruguay.—Les voyageurs de commerce qui se rendent dans l'Uruguay sont tenus, avant de commencer leurs opérations, d'adresser à la Direction des impôts directs, une demande écrite sur papier timbré de 3e classe (50 centavos or) tendant à obtenir la délivrance de la patente requise, demande à laquelle doit être joint le montant de la somme à acquitter.

Le coût de la patente, laquelle est valable du 1er janvier au 31 décembre, est de 100 piastres or.

Il est recommandé aux voyageurs de commerce de se munir d'un passeport délivré par les autorités de leur pays.

Les échantillons sans valeur entrent librement dans la République. Les autres paient les droits afférents aux articles qu'ils représentent, et ces droits ne sont jamais remboursés.

L'importation des armes et des munitions de guerre est subordonnée à l'autorisation du Ministère de la guerre et de la marine.

Mexique.—Il n'existe pas aux Etats-Unis du Mexique de législation uniforme concernant les voyageurs de commerce; chacun des Etats détermine les conditions dans lesquelles lesdits voyageurs sont admis à exercer leur profession.

Dans certains Etats, les voyageurs de commerce n'ont à payer aucune taxe; dans d'autres, ils sont soumis au paiement d'un impôt qui varie entre 1 et 200 piastres par mois, mais qui n'est généralement applicable que quand le voyageur fait des affaires avec les particuliers. Presque partout, les commis voyàgeurs ont à faire une déclaration à l'autorité locale avant de commencer leurs opérations. Les échantillons n'ayant pas de valeur marchande entrent librement au Mexique. Si le voyageur a l'intention de réexporter ses échantillons, il doit en faire la déclaration à la douane en vue d'obtenir la franchise temporaire pour les échantillons passibles de droits et, en ce cas, il est tenu de déposer un cautionnement égal au double du montant des droits d'entrée. Ce cautionnement est acquis au trésor lorsque, à l'expiration du délai de six mois, les échantillons ne sont pas réexportés.

Dans l'éventualité où le voyageur de commerce désirerait sortir du Mexique par un autre point que celui par lequel il est entré, il devra adresser au Ministère des finances une demande en vue de faire contrôler par la douane de sortie l'exportation des échantillons enregistrés par la douane d'entrée.

BIBLIOGRAPHIE.

Les livres et les brochures qui seront envoyés au Bureau des Républiques Américaines, et qui contiendront des sujets ou matières traitant des pays de l'Union Internationale des Républiques Américaines, seront mentionnés dans le Bulletin Mensuel sous le titre "Bibliographie."

La Bibliothèque de Colomb vient de recevoir de l'imprimerie Saalfield de Akron, Ohio, la nouvelle édition de "L'Amérique du Sud: sociale, industrielle et politique," par FRANK G. CARPENTER. L'auteur explique que ce volume renferme le compte-rendu d'une expédition de journalistes dans l'Amérique du Sud à la recherche de renseignements pouvant être utiles au commerçant américain et au lecteur en général.

L'itinéraire du voyage de M. CARPENTER comprenait l'isthme de Panama, la Colombie, l'Equateur, le Pérou, la Bolivie, le Chili, la République Argentine, le Paraguay, l'Uruguay, le Brésil, les Guayanes, le Vénézuéla et le Bassin de l'Orénoque. Il décrit la vie commerciale et sociale des villes, les principales industries, fait ressortir les traits caractéristiques des habitants et discute les ressources et les entreprises possibles des différents pays.

Le livre ne donne pas de statistiques, mais il est intéressant et amusant. De plus il contient de nombreuses illustrations.

"W. B." ERECT FORM CORSET

ES EL ÚNICO ENTERAMENTE CORRECTO.

En la Exposición Pan-Americana le fué concedido el premio más alto. Sigue fielmente los perfiles naturales del cuerpo, y no comprime el busto. Toda la fuerza que se necesite para encintarlo se ejerçe en él sobre los músculos fuertes y vigorosos de las caderas y de la espalda, y así es que con su uso se hace resaltar de la manera más admirable, como es esencial para las exigencias de la presente moda, el bien redondeado busto y las caderas. Hay un modelo especial para cada forma de cuerpo.

Para obtener catálogos, listas de precios, y cualesquiera otros informes, debe dirigirse quien los desee á

RATES OF POSTAGE FROM THE UNITED STATES TO LATIN-AMERICAN COUNTRIES.

The rates of postage from the United States to all foreign countries and colonies (except Canada, Mexico and Cuba) are as follows:

		Cents.
Letters, per 15 grams (½ ounce)		5
Single postal cards, each		2
Double postal cards, each		4
Newspapers and other printed matter, per 2 ounces		1
Commercial papers	Packets not in excess of 10 ounces	5
	Packets in excess of 10 ounces, for each 2 ounces or fraction thereof	1
Samples of merchandise	Packets not in excess of 4 ounces	2
	Packets in excess of 4 ounces, for each 2 ounces or fraction thereof	1
Registration fee on letters and other articles		8

Ordinary letters for any foreign country (except Canada, Mexico, and Cuba) must be forwarded, whether any postage is prepaid on them or not. All other mailable matter must be prepaid, at least partially.

Matter mailed in the United States addressed to Mexico is subject to the same postage rates and conditions as it would be if it were addressed for delivery in the United States, except that articles of miscellaneous merchandise (fourth-class matter), not sent as *bona fide* trade samples, should be sent by "Parcels Post;" and that the following articles are *absolutely excluded* from the mails without regard to the amount of postage prepaid or the manner in which they are wrapped:

All sealed packages, other than letters in their usual and ordinary form; *all* packages (including packages of second-class matter) which weigh more than 4 pounds 6 ounces, except such as are sent by "Parcels Post;" publications which violate any copyright law of Mexico.

Single volumes of printed books *in unsealed packages* are transmissible to Mexico in the regular mails without limit as to weight.

Unsealed packages of mailable merchandise may be sent by "Parcels Post" to Bolivia, British Guiana, British Honduras, Chile, Colombia, Costa Rica, Guatemala, Honduras, Mexico, Nicaragua, Salvador, and Venezuela, at the rates named on page xv.

PROHIBITED ARTICLES TO ALL FOREIGN COUNTRIES.

Poisons, explosives, and inflammable articles, live or dead animals, insects (especially the Colorado beetle), reptiles, fruits or vegetable matter liable to decomposition, and substances exhaling a bad odor, excluded from transmission in domestic mails as being in themselves, either from their form or nature, liable to destroy, deface, or otherwise injure the contents of the mail bags, or the persons of those engaged in the postal service; also obscene, lewd, or lascivious books, pamphlets, etc., and letters and circulars concerning lotteries, so-called gift concerts, etc. (also excluded from domestic mails); postal cards or letters addressed to go around the world; letters or packages (except those to Mexico) containing gold or silver substances, jewelry or precious articles; any packet whatever containing articles liable to customs duties in the countries addressed (except Cuba and Mexico); articles other than letters which are not prepaid at least partly; articles other than letters or postal cards containing writing in the nature of personal correspondence, unless fully prepaid at the rate of letter postage; articles of a nature likely to soil or injure the correspondence; packets of commercial papers and prints of all kinds, the weight of which exceeds 2 kilograms (4 pounds 6 ounces), or the size 18 inches in any direction, except *rolls* of prints, which may measure 30 inches in length by 4 inches in diameter; postal cards not of United States origin and United States postal cards of the largest ("C") size (except as letters), and except also the reply halves of double postal cards received from foreign countries.

There is, moreover, reserved to the Government of every country of the Postal Union the right to refuse to convey over its territory, or to deliver, as well, articles liable to the reduced rate in regard to which the laws, ordinances, or decrees which regulate the conditions of their publication or of their circulation in that country have not been complied with.

☞Full and complete information relative to all regulations can be obtained from the United States Postal Guide.

UNITED STATES CONSULATES.

Frequent application is made to the Bureau for the address of United States Consuls in the South and Central American Republics. Those desiring to correspond with any Consul can do so by addressing "The United States Consulate" at the point named. Letters thus addressed must be delivered to the proper person. It must be understood, however, that it is not the duty of Consuls to devote their time to private business, and that all such letters may properly be treated as personal, and any labor involved may be subject to charge therefor.

The following is a list of United States Consulates in the different Republics:

ARGENTINE REPUBLIC—
- Buenos Ayres.
- Cordoba.
- Rosario.

BOLIVIA—
- La Paz.

BRAZIL—
- Bahia.
- Para.
- Pernambuco.
- Rio de Janeiro.
- Santos.

MONTHLY BULLETIN

OF THE

INTERNATIONAL BUREAU OF THE AMERICAN REPUBLICS,

International Union of American Republics.

VOL. XIII. OCTOBER, 1902. No. 4.

RESULTS OF THE SECOND INTERNATIONAL CONFERENCE OF AMERICAN STATES AT MEXICO.

The Second International Conference of American States, which was held in the City of Mexico from the 22d of October, 1901, to the 22d of January, 1902, left as a monument of its work twenty-three instruments, divided as follows:

Six "conventions"—One relative to the exchange of official, scientific, literary, and industrial publications; one on literary and artistic copyrights; one for the formation of codes on public and private international law; one on the practice of learned professions; one relative to the rights of aliens; and one, which was signed only by the Argentine Republic, Bolivia, Colombia, Ecuador, Paraguay, Peru, and Uruguay, for the convening of a geographical congress at Rio de Janeiro;

Four "treaties"—One on patents of invention, industrial drawings and models, and trade-marks; one for the extradition of criminals and for protection against anarchism; one for the arbitration of pecuniary claims; and one on compulsory arbitration, which was signed only by the Argentine Republic, Bolivia, the Dominican Republic, Guatemala, Salvador, Paraguay, Peru, and Uruguay;

One "protocol" of adherence to the conventions of The Hague, signed by Guatemala, Mexico, Haiti, Peru, the United States of America, Uruguay, the Argentine Republic, Costa Rica, Honduras, Nicaragua, Paraguay, Bolivia, the Dominican Republic, Colombia, and Salvador;

Eight "resolutions"—One on the Pan-American Railway; one on the holding of a customs congress; one on sources of production and statistics; one on measures tending to facilitate international commerce; one for the reorganization of the International Bureau of the American Republics; one concerning international sanitary police; one on future American conferences; and one relative to the meeting of a congress for the study of the production and consumption of coffee;

Three "recommendations"—One for the establishment of a pan-American bank; one on the creation of an international archæological commission; and one for the adoption of measures relating to the Philadelphia Commercial Museum;

One "proposition" for the obtaining of a subscription of 210,000 francs for a complete edition of the dictionary of construction of the Spanish language by Don RUFINO J. CUERVO.

The foregoing agreements have up to the present time been approved by the Governments of the two following countries:

1. Guatemala by law No. 523, promulgated on the 24th of April, 1902, and approved by the President on the following day. The approval is absolute, and covers the twenty-three instruments, authorizing the President to pay the expenses required for the execution of this law.

2. El Salvador by law of May 16, 1902, approved by the President on the 19th of the same month. This law gives absolute approval to twenty of the agreements made. No mention is made in it of the treaty on compulsory arbitration, the protocol of adherence to the conventions of The Hague, or the convention for the convening of a geographical congress at Rio de Janeiro.

CONFERENCE FOR THE STUDY OF THE PRODUCTION, DISTRIBUTION, AND CONSUMPTION OF COFFEE.

In conformity with the recommendation made on January 29, 1902, by the Second International Conference of American States, held in the City of Mexico, and, as previously announced in issues of the MONTHLY BULLETIN, the Commission having for its object a study of the production, distribution, and consumption of coffee, the investigation of the causes which at the present time are producing the crisis through which that great industry is passing, and to propose practical means to prevent or abate the same, assembled in the city of New York on October 1, 1902. The sessions were held in the Coffee Exchange Building and promise abundant and satisfactory results to the Governments interested in this important matter.

The various coffee-producing countries of Central and South America, the United States, and Mexico were represented in the conference by eighteen delegates, as follows:

Brazil, Señor Don J. F. DE ASSIS BRASIL.

Costa Rica, Señor Don J. B. CALVO and Señor M. GONZALEZ.

Dominican Republic, MM. F. LEONTE VÁZQUEZ and J. A. DE ARANJO É VASCONCELLOS.

El Salvador, Señor E. SCHERNIKOW.

Ecuador, Señor Don L. F. CARBO.

Guatemala, Señor Don A. LAZO ARRIAGA.

Honduras, Señor Don N. BOLET PERAZA.

Mexico, Señor Don J. F. GODOY.

Nicaragua, Señores CORRY M. STADDEN and D. ROMÁN.

United States, Messrs. PERCY B. O'SULLIVAN and T. R. DAWLEY, Jr.

Porto Rico, Señor A. MARIANI.

Uruguay, Señor Don L. A. DE HERRERA.

Venezuela, Señores F. DE LA MADRIZ and ANTONIO E. DELFINO.

The session of October 1 was devoted to organization and the appointing of committees to carry on the future work, the meeting being presided over by Mr. PERCY B. O'SULLIVAN, of the New York Coffee Exchange, who made an address of welcome. This was responded to on behalf of the visiting delegates by Señor Don ANTONIO LAZO ARRIAGA, Minister of Guatemala in the United States. The election of officers for the conduct of the sessions of the Conference resulted in the choice of Mr. P. B. O'SULLIVAN as President; Señor Don J. F. DE ASSIS BRASIL, the Brazilian delegate, First Vice-President; Señor Don ANTONIO LAZO ARRIAGA, the Guatemalan delegate, Second Vice-President, and Señor Don NICOLAS VELOZ GOITICOA, of Venezuela, Secretary-General, the latter being Secretary of the International Bureau of the American Republics. As Director *ad interim* of the Bureau and in accordance with a resolution of the aforementioned Conference, as well as by order of the President of the Governing Board of said Bureau, he attended the meetings of the Commission for the purpose of aiding them in their deliberations.

Mr. O'SULLIVAN, who is also President of the Coffee Exchange of New York, on calling the meeting to order, made the following address:

"I thought it would not be fitting, speaking not as a delegate to this Conference, but as a representative of the Exchange, that I should let the occasion pass without a word of welcome to you from the Exchange. The Exchange has come to be within the last few years probably the largest in the world dealing in coffee. As you all know, New York is becoming a very large market, to so great an extent, in fact, that I may say in safety it is the largest single distributing port for coffee in the world to-day.

"I feel that to you gentlemen coming here, representing the coffee interest of all South America, on behalf of the Exchange as its President, I should say that we are very glad—very honored—that you should accept the hospitality we are able to extend to you for the purposes of this meeting.

"Of course, you can readily understand that the interest which the coffee trade in the United States would feel in a Conference of this kind is naturally somewhat different from the interest which you, as representing the producing countries, would feel. At the same time, while questions of increase or decrease of production do not affect us directly, I may say, to paraphrase the words of a Latin writer, 'We are all coffee men; anything that concerns coffee, we feel is not strange to us.' We feel all Americans. Anything that binds you closer to us we look upon with favor. We felt a great desire for this Conference. We are all sister Republics—Mexico, Central America, extending down to Argentina. It is the desire of the coffee trade as policy, and of the United States Government, that we be brought into closer union. Anything as among independent nations of a political nature is out of the question, although politically we should have the good feeling implied in the name of America.

"I wish to say on behalf of the Exchange that we are very glad to see you here. Any courtesies in the power of the Exchange we should consider it a privilege to extend to you. To that end the Superintendent will give to the members, after the session, a card of privileges which will admit them to the floor of the Exchange. At any time when the Congress is not in session, or they desire, they may go to the floor and obtain news of the coffee market. Anything the staff can do or that I can do for the Congress or for the individual members will gladly be done.

"Gentlemen, we welcome you to New York, and to the rooms of the Coffee Exchange of the City of New York."

Mr. Lazo Arriaga, delegate from Guatemala, commissioned to respond to this, in the name of the Latin American delegates, made the following address:

"Mr. Chairman: On me has fallen the honor of answering the beautiful words of welcome to the delegates of the American Congress to this practical and interesting Conference on Coffee. It is due to some trouble about trains that my distinguished colleague, the Minister from Brazil, who would have answered more adequately, is absent.

"In the name of the members and representatives of Latin-American countries meeting here to-day I must thank you and the Coffee Exchange for your kind words of welcome to us, for your kind offer of the facilities (which are very great) of the Coffee Exchange of New York, the most important in the world.

"You mention one point in which I am sorry to say I am not in accord with you—you will pardon me for it. It will be a pleasure for me to be in accord with all your ideas, because I have no doubt all you suggest will be very important and very valuable to this Conference. You said that the interests of the United States in this Conference are perhaps somewhat different from those of the producing countries. I hope you will find out here that our interests are the same; there is no difference between them. All that the United States can do in this matter will be to its advantage, as it will be to ours. If it prove so we will be very glad of such a happy result.

"In the name of my colleagues, I thank you and the Coffee Exchange for your kind welcome and its hospitality."

At the second meeting of the Conference, held on October 3, it was decided that in order to facilitate the work under consideration a number of committees should be appointed, the personnel of which is as follows:

Committee on Production.—F. DE LA MADRIZ, Venezuela; J. A. DE ARAUJO E VASCONCELLOS, Dominican Republic, and ANTONIO MARIANI, Porto Rico.

Committee on Distribution.—J. B. CALVO, Costa Rica; ANTONIO E. DELFINO, Venezuela, and CORRY M. STADDEN, Nicaragua.

Committee on Consumption.—MANUEL GONZALEZ, Costa Rica; N. BOLET PERAZA, Honduras, and E. SCHERNIKOW, El Salvador.

Committee on the Causes of the Crisis and Practical Means to Decrease or Prevent it.—J. F. DE ASSIS BRASIL, Brazil; A. LAZO ARRIAGA, Guatemala; F. LEONTE VÁZQUEZ, Dominican Republic, and D. ROMÁN, Nicaragua.

Committee on Future Conferences.—L. A. DE HERRERA, Uruguay; J. F. GODOY, Mexico, and T. R. DAWLEY, jr., United States.

At the second meeting Señor Don JOAQUÍN BERNARDO CALVO, delegate for Costa Rica, in his own name and in behalf of his colleague, Señor Don M. GONZÁLEZ, delegate for the same Republic, submitted to the consideration of the Conference, as a result of studies made in his country by a commission of experts, the following paper:

"SUGGESTIONS.

"*Elimination of Coffee of Inferior Grades.*

"As the greatest portion of the coffee exported by Costa Rica is of high grade, the Costa Rican interests would not be injured, but rather benefited, by the elimination from the market of all the coffee of inferior grades. But we think, nevertheless, that such elimination is undesirable and should be averted—

"First. Because it would entail the stopping of coffee raising in the localities where the quality of the grain is by nature inferior; and

"Second. Because it would do injury to the largest class of consumers, the masses of the people, soldiers, sailors, etc., of each country, who can not use better grades. Coffee in this case would become a luxury, and our best efforts ought to be made precisely in an opposite direction, as the extension of its use would bring the best commercial results.

"The elimination of the inferior grades would, therefore, be *contra producentem* as regards the purpose of this conference.

"*Practical Means of Enlarging the Consumption.*

"The following measures, among others of first importance, commend themselves to our consideration:

"I. To burden with heavy municipal taxes the sale of adulterated coffee, or to forbid it absolutely under adequate penalties.

"The fact is noticed in about four-fifths of the coffee-consuming countries, that the people who purchase this grain by retail can not have it in its pure state, but mixed with other substances, which not only spoil its flavor but render it unhealthful. There are localities in which the roasted meals of corn, barley, and peas are sold as coffee, and others can be cited where the greed of gain of the dealers makes them go to the extreme of mixing the article with brick dust and other mineral substances.

"Pure coffee, well roasted and well prepared, commends itself at once to the consumer's taste, and readily becomes a necessity. We must endeavor by all means to secure this result if we wish the consumption to be increased at a rate perhaps greater than that of the production.

"II. To have the Governments make regulations which will cause the use of coffee to be imperative in their respective armies and navies as an adequate stimulant intended to counteract the fatigues of the service and the effects of excessive heat.

"III. To make medical propaganda in favor of coffee as a most efficient remedy against the abuse of alcohol. This would aid most powerfully the noble efforts of the Government and of the temperance societies to crush alcoholism.

"The effects of caffeine on the nervous system are generally considered as producing immediate relief of the harm done by alcohol. In Costa Rica, at least, nobody seems to be ignorant of this system of treatment. The very first thing which is thought of in dealing with an intoxicated man is to make him drink a good dose of black, strong coffee, which soon will restore him to the use of his mental powers. The proper presentation of this aspect of the question, showing upon well-recognized medical authority the efficiency of coffee as a remedy against intoxication, would give impulse to the consumption of the grain and furnish strong ground to forbid its adulteration.

"IV. To endeavor to obtain the abolishment or a reduction to the lowest possible rate of the import duties on coffee established by some governments, and as a consequence thereof to endeavor to obtain the abolishment also, or reduction to the lowest possible rate, of all municipal taxes on the same. The hygienical and therapeutical conditions of coffee entitle it to be deemed a necessity, and to appear therefore very properly in the free list of the tariffs. No effort will be necessary to prove this fact. The antiquated idea that coffee is a drug or a luxury has been exploded long ago and is discredited nowadays. A drug store is precisly the place in which less coffee is sold; and the low prices for which it has been sold during the last five years shows at once without difficulty that it can reach all homes and be consumed by all. No import duties on coffee could now be justifiable, unless if levied by coffee-producing countries as a measure of protection of their own article. Spain, for instance, has no reason at present, as she has no coffee-producing colonies, to maintain any longer her tariff on coffee. There are some other nations which find themselves in this respect in a similar predicament, and our endeavors must be, in all cases, to work for the elimination of coffee from all tariffs, and try to make it free.

"V. To establish with proper funds, at the expense pro rata of the coffee-producing countries, in the countries where the consumption is small public coffeehouses, where ample opportunities should be afforded to taste and appreciate good coffee. Whenever something of this kind has been done, the beneficial results thereof have soon been felt. In the exhibitions at Chicago, Atlanta, Buffalo, Paris, etc., some coffee growers resorted to this method to make their coffee known, and the result in all cases, without a single exception, was always favorable. Experience teaches us that we have to travel this road, without reluctance or hesitation, but we must travel it intelligently. We must widen the scope of the experiments. We must not fail to reach any locality where the consumption is small, and the use of coffee must be made known even in those places where the acquaintance with it does not as yet exist. Russia, Sweden, Norway, Denmark, a great part of Germany, and some other countries are still, as coffee markets, unexplored ground. An effort must be made to reach them. In the coffeehouses, or centers of propaganda, which are herein suggested, essences of coffee conveniently prepared for immediate use must be placed on exhibition and sold. The best accepted methods for roasting and making the infusion must also be explained and practically taught. In this way the use of adulterated coffee, which is so harmful to the trade, will be finally stopped.

"VI. To conclude treaties of commerce whereby the coffee industry should be encouraged and protected: This suggestion is so important and the ground which it covers so vast that we content ourselves for the moment with placing it before the conference for its proper discussion.

"VII. To sell coffee at public auction.

"Private sales as are now made in the United States offer great disadvantages which will be difficult to remedy. The sales are made without any kind of sufficient control or inspection, and the coffee grower has to rely implicitly upon the good faith of his agent, who, although in most cases honest, is at times not unfrequently unfaithful, and turns, for his own benefit, into a deceiver of his employer. A double wrong is in this way perpetrated, because in the first place the coffee grower is deprived of what lawfully belongs to him, and because in the second place a sentiment of distrust as to the goodness of the market is naturally spread among the other coffee growers, thus affecting considerably and very unfavorably the exportation of the next crop.

"No great effort will be necessary to show all the advantages to be derived from the system herein suggested of sales at auction.

"FEDERICO TINOCO.
"JAIME CARRANZA.
"MANUEL MONTEALEGRE.
"JUAN FRANCISCO ECHEVERRÍA.
"MANUEL GONZALEZ.
"JOSÉ DURÁN.
"MARIANO CARAZO."

At the third meeting of the Commission, on October 8, the following business was transacted:

Among the reports submitted for future discussion was the report of the Committee on Consumption, who presented three recommendations, which are as follows:

First. Recommending to all the Governments of producing and consuming countries the compulsory use of pure coffee in the armies and navies.

Second. Recommending to the Governments and countries which produce coffee that they establish, as soon as possible, in countries in which coffee is not now consumed, places for the demonstration of pure coffee.

Third. That coffee producing and consuming countries may prohibit the sale of adulterated coffee and of substitutes bearing the name of coffee, and in case this prohibition can not be enforced that a heavy duty be imposed on such articles.

The Committee on the Causes of the Crisis submitted a report, of which the following is the resolution recommended:

"The International Conference for the Protection of the Coffee Industry recommends to the producing countries the adoption of differential tariffs for the collection of import duties, applicable to manufactured articles and staples of the consuming nations, proportionately to the tax charged upon imported coffee."

The delegation from Venezuela asked that the delegates present, as soon as possible, their written reports, as suggested by Mr. LAZO ARRIAGA, in the recommendation adopted by the governing board of the International Union of the American Republics, so that the Committee on Consumption may present a report covering all the points in regard to the progress attained from the agricultural standpoint.

A general outline of the proposed work of the Commission covers the following details:

Production: Including statistics and data concerning lands, their average production, duration of a plantation, crops, machinery used; class of workmen; social and ethnological facts concerning laborers, their wages and mode of life; administration of plantations; favorable or unfavorable conditions likely to affect coffee production in the future, and such causes and results in the past.

Distribution: Means and cost of transportation from plantation to ports, and thence to coffee-consuming countries; drawbacks, facilities, middlemen; duties, municipal or national, levied on coffee, etc.

Consumption: Measures to increase it, suppression of monopolies, commercial treaties, etc. Special conditions of coffee in various markets, methods of commercial grading, what grades are most popular, different methods of making coffee marketable, conditions affecting consumption in each principal market, sanitary laws and their effect on coffee consumption, rival beverages, etc.

Overproduction: Possible means to avoid it; could inferior grades be eliminated, and if desirable, how?

At the fourth regular meeting of the Commission, on October 10, the report of the Committee on Consumption, which was submitted at the last meeting, came up for discussion. This report contains three important recommendations, which have already been published in these columns.

These recommendations were discussed at length, and Señor J. F. de ASSIS BRASIL offered the following amendment to the third recommendation:

"To warmly recommend to the producing countries the prohibition of the exportation of coffee below type No. 9 of the New York Coffee Exchange, and to the consuming countries the passing of laws placing coffee below that standard on the same footing with adulterated coffee."

In support of the first recommendation, Señor M. GONZALEZ stated that the object in endeavoring to influence the use of pure coffee in the armies and navies of the world at large was because of the fact that it is a stimulant and a preservative against weakness and can be partaken of in tropical climates with satisfactory results, all of which should make it invaluable to these branches of the Government. This refers only to pure coffee.

In regard to the second recommendation, Señor GONZALEZ said that he believed it would not be a difficult matter to induce people to acquire a liking for the pure coffee, even in countries where coffee is not now consumed.

Señor ANTONIO E. DELFINO said, with reference to the amendment to the third recommendation, that it would be well for the delegates to know exactly the type represented by No. 9, and it was decided that at the next meeting samples of this type would be submitted for the information of the delegates.

The next point which came up for discussion was the resolution contained in the report of the Committee on Causes of the Crisis, recommending to the producing countries the adoption of differential tariffs for the collection of import duties, applicable to manufactured articles and staples of the consuming nations, proportionately to the tax charged upon imported coffee.

Señor J. F. GODOY proposed that the three recommendations of the Committee on Consumption with the amendment thereto and the last-mentioned resolution should be laid over for consideration at a future meeting.

After some discussion it was decided to hold no further meetings until Thursday, October 16, in order to give all the delegations and committees an opportunity to present full reports, so framed that they may be ready for immediate discussion and action.

There was a very full attendance at this meeting and the delegates evinced more interest in the proceedings by reason of the fact that the committees are now getting to the root of the subjects under discussion, and it is believed that within a very few sessions something definite can be arrived at and the final recommendations adopted by the Commission for transmission to the different Governments by the respective delegates.

CENTRAL AMERICAN TRIBUNAL OF ARBITRATION.

In the March number of the BULLETIN of the present year, pages 565 of the English part and 712 of the Spanish, the full text of the Convention of Peace and Compulsory Arbitration, concluded at Corinto on January 20, 1902, by the Governments of Nicaragua, Salvador, Honduras, and Costa Rica, was published.

In pursuance of that convention, the respective Governments have taken the necessary steps for the establishment of the tribunal which is to take cognizance of the cases which may occur, and in this respect the following correspondence will prove of interest:

OCTOBER 2, 1902.

The ACTING DIRECTOR OF THE BUREAU OF AMERICAN REPUBLICS.

SIR: I inclose herewith for your information an extract from a dispatch from the United States minister at San José, Costa Rica, reporting the proximate organization at that place of the Central American Court of Arbitration, and giving the names of the arbitrators.

I am, sir, your obedient servant,

ALVEY A. ADEE,
Acting Secretary.

No. 763.] LEGATION OF THE UNITED STATES OF AMERICA,
San José, Costa Rica, September 20, 1902.

HON. ALVEY A. ADEE,
Acting Secretary of State, Washington, D. C.

SIR: I have the honor to advise arrival at this Capital of the Commissioners from the Republics of Honduras and Nicaragua to formally open the Court of Arbitration provided for by the compact of Corinto on January 20, 1902, and which formed the subject of my No. 686, dated February 9, 1902. The Commissioners, so far as known at present, are as follows: Señor JOSÉ LEONARD, Honduras; Señor JULIAN IRIAS, Nicaragua; Señor OCTAVIO BEECHE, Costa Rica, and Señor SALVADOR GALLEGOS, Salvador; the latter is now en route. I am informed by the members of the Commission that the President of Guatemala agreed to join the international compact when visited by ex-President IGLESIAS last year, but the appointment of a Guatemala Commissioner has not yet been advised, and for this the Court is waiting, but will proceed without the representation of that Republic, if necessary.

The personnel of the Commission impresses me very favorably, and there is a legitimate cause for congratulation in the purpose it has in view, peace being the great desideratum of Central America. * * * Should anything of further interest develop in the action of the Arbitration Court I shall not fail to promptly advise the Department of State.

With assurances of my highest consideration, I beg to remain, sir, your most obedient servant,

WILLIAM LAWRENCE MERRY,
United States Minister.

THE WORLD'S FAIR AT ST. LOUIS.

Interesting ceremonies connected with the Louisiana Purchase Exposition, which is to be held in St. Louis, Mo., commencing May 1, 1904, took place on September 30 and October 1 and 2 last. The occasion was the allotting of the sites for the United States Government Building and other State buildings. Representatives from the various Departments of the Government of the United States and one from the International Bureau of the American Republics were present, and Governors or their representatives from twenty-six States of the American Union participated in the ceremonies.

The locations for the buildings of the foreign States have been duly selected and will be officially allotted at some future time. A number of the principal buildings of the Exposition are well under way, and at the present time the completion of the Exposition, by the time of its opening, is well assured. The grounds contain nearly 1,200 acres, the largest space which has ever been given to expositions of this character. The official dedication will take place on April 30, 1903, the anniversary of the Louisiana Purchase, but the Fair will not open until one year thereafter.

ARGENTINE REPUBLIC.

PRODUCTION OF CORN.

The Bureau of Statistics of the Department of Agriculture has published data showing the area planted in Indian corn throughout the Republic and the probable production of this cereal in the Argentine in 1901–2, a recapitulation of which is as follows:

Provinces.	Area.	Production.
	Hectares.	*Tons.*
Buenos Ayres	681,217	1,360,271
Santa Fe	442,367	479,720
Entre Rios	81,198	2,418
Córdoba	35,072	31,344
Corrientes	37,305	7,461
Santiago del Estero	12,152	36,456
San Luis	13,210	20,805
Tucumán	21,328	31,197
Mendoza	7,941	14,905
San Juan	4,921	10,740
La Rioja	16,533	49,599
Catamarca	6,618	7,272
Salta	20,000	40,000
Jujuy	1,530	6,120
TERRITORIES.		
Chaco	4,410	8,802
Formosa	524	1,048
Misiones	9,579	10,547
Neuquen	100	400
Pampa Central	9,800	15,060
	1,405,806	2,134,165

These figures show that the largest production will be in the province of Buenos Ayres, the area under cultivation in that province amounting to 681,217 hectares. The province of Santa Fe occupies the second place in importance, with 442,367 hectares, but there, as in the other provinces, the crop has been a partial failure.

The exportation this year has commenced with high prices, $4.30 to $4.40 (national currency) per 100 kilograms having been obtained for yellow corn and $4.60 (national currency) for white corn delivered at the wharf. Owing to the damp weather, consumers have paid for yellow corn in a moist condition $3.80 to $4.20 (national currency) and $4 to $4.40 (national currency) per 100 kilograms for white corn. Owing to the drought in Australia, some shipments of dry yellow corn have been made from the ports of Rosario and Buenos Ayres to that country.

COMMERCE WITH PARAGUAY IN 1900.

The "Revista Mensual de la Cámara Mercantil," of Buenos Ayres, has published an article showing that the importations into the Argentine Republic from the Republic of Paraguay in 1900 amounted to $1,860,948, and consisted of the following articles:

	Value in gold.		Value in gold.
Cattle	$10,770	Paraguayan tea	$904,513
Cedar	207,209	Tobacco	72,249
Ironwood	11,521	Miscellaneous	587,760
Ironwood posts	42,887		
Oranges	24,039	Total	1,860,948

MEAT INDUSTRY.

PACKING HOUSES OF BUENOS AYRES.

Magdalena:	
Juan Terrarosa & Sons	$49,000
Roca Bros. & Murzi	47,600
J. B. Repetto & Sons	29,000
Tuyú	17,500
La Plata:	
Danery	5,800
Rocca Bros. & Murzy	21,000
Total	169,900

PACKING HOUSES OF ENTRE RIOS.

Concordia:	
Soulez	$20,800
Freitas	20,000
Colón	13,200
Concepción	18,500
Gualeguaychú	10,200
Gualeguay: M. & E. Berisso	17,000
Santa Elena	48,800
San Javier	52,900
Total	201,400

FINANCIAL SITUATION.

According to the last message of President Roca, the financial situation of the Republic in 1901 was very satisfactory, the Government receipts having exceeded the amount of the estimated expenses.

The receipts were $38,244,638 in gold and $62,341,306 in paper currency.

The expenses, which resulted in less than the estimated amount, were $23,835,847 in gold, and $91,160,225 in paper currency.

On December 31, 1901, the consolidated interior debt amounted to $17,863,000 in gold and $83,610,983 in paper currency. The foreign debt amounted to $386,451,295 in gold, but the sum of $46,000,000 out of this total is due by some individual Provinces or States of the nation.

The economical situation is satisfactory. The immigration in 1901 exceeded the emigration to the amount of 48,000 persons.

NEW MINISTRY.

Under date of September 29, 1902, the Department of State of the United States transmitted to the International Bureau of the American Republics the following record of the personnel of the Argentine

President's cabinet, as forwarded to the Department by the United States Minister at Buenos Ayres:

Minister of the Interior, Dr. JOAQUIN V. GONZALES.
Minister of Foreign Relations and Worship, Dr. LUIS M. DRAGO.
Minister of Hacienda, Señor MARCO AVELLANEDA.
Minister of Justice and Public Instruction, Dr. JUAN R. FERNANDEZ.
Minister of War, Col. PABLO RICCHERI.
Minister of Marine, Capt. ONOFRE BETBEDER.
Minister of Public Works, Dr. EMILIO CIVIT.
Minister of Agriculture, Dr. WENCESLAO ESCALANTE.

CONSTRUCTION OF GRAIN ELEVATORS.

The Buenos Ayres and Rosario and Central Argentine Railway companies have commenced the construction of their grain elevators on the east side of Dock 2 in the port of Buenos Ayres. The excavations for receiving the huge masses of concrete for the foundations are already made, there being about 500 workmen employed at the present time.

One of the elevators, 240 meters long by 15 wide, will be situated 47 meters from the dock side, and will have a capacity for 25,000 tons of grain. This will be connected with another depot of 38 meters, divided into 100 equal divisions for the distribution and classification of the cereals, and capable of holding 20,000 tons of grain. The other three depots will be built nearer to the dock and will be 120 meters long by 15 wide each, and will be provided with three elevators and three towers, at a height of 40 meters from the dock level. In the largest building there will be seven elevators. In this latter deposit and in the three smallest there will be seven railway lines, and between these and the dock side will be two more lines for the general service of the dock. When finished, these elevators will be capable of loading at one time, eight steamers of 3,000 tons each. The machinery will be operated by electricity, which will be produced by means of a gas plant. The cost of construction and equipment is estimated at $1,500,000 gold.

REPORT OF THE EAST ARGENTINE RAILWAY.

The report of the East Argentine Railway for the year ending December 31, 1901, shows a total expenditure for the year of £1,109,803, while the receipts were £1,135,786, as follows: Ordinary stock, £668,000; 4 per cent first-mortgage debenture stock, £437,500; premiums, £5,445; revenue applied to cost of steamers and expenditure in excess of capital, £24,841.

The accounts for the year, as compared with the preceding twelve months, show the following returns: Gross revenue, £39,745 for 1901; £48,185 in 1900; expenditures, £32,395 in 1901 and £39,815 in 1900, with a profit of £7,350 in 1901 against £8,370 in 1900. The workings of the steamboats, included in the above figures, show receipts of £6,380 and expenses of £6,378. The profit and loss account, after charging £5,000 to permanent way renewal and £2,000 to passenger stock renewal, shows a credit balance of £11,333. This amount, with the £587 brought from 1900, and after deducting £388 toward writing off extensions and additions in 1897–1901, gives an available total balance of £11,532. Out of this sum the board proposes a distribution at the rate of 1¾ per cent for 1901 on the ordinary stock, leaving a balance of £499to carry forward.

The number of passengers carried during the year was 27,707; merchandise transported, 51,796 tons; horned cattle carried, 13,236; number of train miles run, 142,700; and the length of line in operation, 99 miles.

Included in the report is a reference to a branch line now under construction by the Entre Rios Railway Company, to connect the systems at Villaguay and Concordia, the effect of which will bring the East Argentine system into communication with the entire province of Entre Rios and with the River Paraná.

WHEAT EXPORTS.

The press of Buenos Ayres says that, according to exportation statistics, the shipments of wheat from the Argentine Republic during the last three years were as follows:

	Tons.
1900	2,042,367
1901	972,514
1902 (estimated)	700,000

The average price obtained at the ports of the Republic for the wheat exported in 1900 was 50 *pesos* a ton; in 1901 and 1902, 65 *pesos* a ton; so that the total value of the wheat exported in 1900 was 102,118,350 *pesos;* in 1901, 63,215,410 *pesos;* and in 1902, 45,500,000 *pesos* (estimated).

THE CATTLE INDUSTRY.

[From the Monthly Review of the Chamber of Commerce, Buenos Ayres.]

The cattle industry has developed to such an extent in the Argentine Republic during the last few years, and so marked has been the improvement of the breeds, that a review of the subject presents a highly interesting question. Argentine statistics for 1889 place the number of head of cattle in the country at 21,963,930, valued at 289.252,696 *pesos*, divided into the following classes:

Classification.	Number of head.	Value.
		Pesos.
Oxen	962,699	17,962,290
For breeding purposes	17,574,572	170,124,894
Mixed breeds	3,388,801	97,063,842
Thoroughbred	37,858	4,101,580

Thoroughbred cattle of the breed known as Durham have completely changed the economic phase of the cattle-raising industry in the Republic, and the problem of the exportation of meats presents itself in a different form from what it was before, giving to this commerce a colossal development and to the nation enormous wealth. According to Mr. LIX KLETT, the President of the Board of Trade at Buenos Ayres, in his book upon the production, commerce, finance, etc., of the Argentine Republic, the number of cattle in that country at the close of 1899 was 30,000,000, or an average of 6.38 head per inhabitant, as compared with an average of 0.4 head in Switzerland, 0.32 in Germany, 0.35 in France, and 0.28 in England. It is evident that the value of the cattle industry depends to a great extent upon the quality, weight, and manner of slaughtering the cattle, and the number of head existing in the country does not give an adequate idea of the wealth of the cattle industry of the nation.

In a relatively short time the Argentine Republic has increased its production of cattle about 33 per cent, and has, at the same time, and which is more important, improved the breeds. At the present time it is estimated that 50 per cent of the cattle of the country consists of improved stock or crosses therefrom, and that the percentage of native cattle is not greater than one-half. It is clear that improvement in the breeds has caused a notable increase in the weight of beeves, and the net increase in the production of jerked beef, for which purpose the poorest class of cattle is used, has been about 100 per cent during the last fifty years. The improved cattle have increased, as compared with the native stock, very notably, and the former are much more easily fattened, all of which is beneficial to the country and especially to the cattle industry.

It is this great improvement in the quality of Argentine cattle that permits that nation to-day to send to the markets of Europe, and especially to England, meat of good quality and in large quantities, and which has placed the Republic in the first rank among the cattle-producing countries of the world. It is estimated that the Argentine Republic can now supply to the slaughterhouses or for exportation on the hoof 5,000,000 or 6,000,000 head of cattle annually. The exportation of live cattle from the Argentine Republic in 1892 was 125,458 head, valued at 2,624,000 *pesos*, while in 1899 the number exported amounted to 312,150, valued at 6,824,000 *pesos*. Again, the exportation of frozen meats has recently acquired great importance, and this industry is being rapidly developed, the shipments having been increased from 5,182 quarters in 1889 to 67,088 quarters in 1898 and 490,375 quarters in 1901. The general exportation of cattle products in 1899 was valued at $115,547,000 gold, or more than 62 per cent of the total exports of the country.

BUDGET FOR FISCAL YEAR 1902-3.

On August 8, 1902, President ROCA submitted to the Congress the estimates of the receipts and expenditures for the fiscal year 1902-3.

The imports in 1901-2 amounted to $113,959,759, gold, while the exports rose to $167,716,102, gold. During the first six months of 1902 the imports were $51,243,230, gold, and the exports $105,203,781. The Department of Statistics estimates the exports for the year 1901-2 at $177,709,089, gold, or $10,000,000, gold, in excess of those of 1900-1901.

The foreign debt of the nation on December 31, 1901, was $386,451,295, gold. The internal consolidated debt on the same date was $89,610,983.56, national currency, and $17,863,000, gold. In addition to the foreign debt already mentioned, the Government owes European bankers £2,558,475.

On June 30, 1902, the Treasury notes in circulation amounted to $2,398,483, national currency and $12,162,982.24, gold.

The expenditures for the fiscal year 1902-3 are estimated at $29,496,172.45, gold, and $95,206,218.25, national currency. These expenditures, in detail, according to the estimate submitted by the Chief Executive to the Congress, are as follows:

	Expenditures.	
	Gold.	Paper.
Interior	....	$14,115,640
Congress	....	2,558,180
Foreign Affairs and Worship	$309,381	1,101,440
Finance	....	7,822,041
Public debt	24,753,297	12,059,899
Justice and Public Instruction	....	12,946,656
War Office	....	15,400,813
Marine	11,462	9,643,884
Agriculture	12,000	3,294,360
Public Works	500,000	10,708,025
Pensions, etc	....	5,555,280
Extraordinary	3,910,032	....

The expenditure stated in ordinary budget will be covered as follows:

	Expenditures.	
	Gold.	Paper.
Import dues, including 5 per cent and 2 per cent additional	$30,500,000	....
Export dues	2,800,000	....
Storage, etc	1,200,000	....
Light-houses, etc	210,000	....
Health visit	40,000	....
Ports, moles, and docks	950,000	....
Cranes, etc	220,000	....
Consular fees	150,000	....
Statistics, etc	300,000	....
Fines, etc	30,000	....
Interest of bonds	1,485,000	....
Province Buenos Ayres	1,537,650	....
Province Entre Rios	120,000	....
Province Santa Fe	220,457	....
Banco Nacional, Laws 3655 and 3750	348,232	....
Alcohol	....	$12,500,000
Tobacco	....	11,000,000

	Expenditures.	
	Gold.	Paper.
Native wines		$3,700,000
Sugar		3,000,000
Matches		2,100,000
Beer		1,300,000
Insurance		350,000
Playing cards		100,000
Manufactured beverages		50,000
City improvement works		5,500,000
Land tax		2,000,000
Licenses		2,000,000
Stamp tax		6,500,000
Port railway		180,000
Post-office		4,100,000
Telegraph		1,350,000
Yerbales		50,000
Sale and lease of lands		650,000
Fines, etc		500,000
Railways		4,100,000
Real estate and mortgage registry		70,000
Examination and matriculation fees		100,000
Interest bonds National Bank, Law 2782		420,000
Province Cordoba, Law 3800		200,000
Total	$40,111,339	61,820,000

To cover extraordinary budget the following is assigned: Five per cent additional on imports for one year, $3,910,032, gold.

Rates of 3 per cent interest and 10 per cent amortization per annum are fixed for service of bonds delivered to the Banco de la Nacion by the Banco Nacional in payment of judicial deposits, and 6 per cent interest and 2 per cent amortization on the bonds delivered by the Banco Nacional to the Caja Conversión in payment of popular loan.

Merchandise and products subject to import dues of 10 per cent or over will pay an additional duty of 2 per cent on their value.

In addition to the extra duty of 2 per cent specified above, all merchandise and products subject to import dues will pay a further additional duty of 5 per cent.

The Banco Nacional (in liquidation) will hand to the National Treasury in payment of deposits and in accordance with clause 2 of article 9 of the liquidation law (November 18, 1893) up to $5,000,000 in bonds of the said law in the same conditions and subject to an amortization of 10 per cent per annum.

The Executive is authorized to negotiate these bonds in order to attend to service of floating debt.

The Executive is authorized to exempt from export duty, during 1903, by-products of *saladeros* and manufactories of meat extract.

During year 1903, article 1 of the law regulating university funds of the capital is suspended, and the receipts will be applied to payment of salaries, etc., of said university.

During year 1903, 5 per cent of the salaries of all civil employees of the administration and of pensioners, as well as of schoolmasters and pensioners, will continue to be deducted. Until such time as the Montepio civil law be voted, the discount on above salaries will be deposited in Banco de la Nacion.

The gold taxes will be payable in gold or its equivalent in paper.

Civil employees with a minimum of ten years' service who may lose their posts under this budget will receive a indemnification of two months' salary.

DATA CONCERNING BUENOS AYRES.

The "Anuario Estadística Municipal" (Annual of Municipal Statistics) for 1901, published by the municipality of Buenos Ayres, shows that the consumption of mutton in the capital of the Republic in 1901, as compared with 1900, decreased to the extent of 25,000 wethers and lambs, while the consumption of beeves and yearlings during the same period increased 2,733 head. Estimating the average weight of beeves, yearlings, and calves at 174 kilograms, that of wethers and lambs at 12 kilograms, and that of hogs at 150 kilograms, makes the total consumption of meat by the 850,000 inhabitants of the capital in 1901 amount to 138,828,606 kilograms, or an average for each inhabitant per annum of 163 kilograms.

The flour consumed in Buenos Ayres in 1901 rose to 46,271,675 kilograms, or 1,748,063 kilograms in excess of that used in 1900. The average consumption of flour per capita in the capital of the Republic in 1901 was 54 kilograms.

Buenos Ayres has 11 street car lines, with a trackage of 450 kilometers. The motive power for 8 of these tramways is supplied by horses and mules, 3 of the lines only being operated by electric power. In 1901 there were 895 street-railway coaches in daily use in the capital. These coaches made 3,814,266 trips during the year and transported 125,525,224 passengers. The gross receipts from the street railways of Buenos Ayres in 1901 were about $3,000,000, national currency, or more than 6,000,000 *francs*. In 1900 the tramways transported 122,886,803 passengers. The increase in the number of passengers carried in 1901, as compared with 1900, was 2,638,421, or a gain of about 2 per cent.

The railways centering in Buenos Ayres and penetrating into the interior of the country transported in 1901, within the boundaries of the city, 12,578,976 passengers, being a slight increase over the number carried in 1900.

The operations of the Board of Trade of Buenos Ayres in 1901 rose to $1,003,000,000, national currency, $934,000,000 of which were in metals ($401,000,000 gold), $15,000,000 in mortgages, $33,000,000 in bonds and securities, $17,000,000 in shares and stocks of corporations, and $2,000,000 in banking.

Primary education in Buenos Ayres is under the direction of a National Board of Education, which has practically the free control of the public schools and enjoys an income of its own. The matriculates in the different grades in 1901 numbered 69,958.

The lighting of the city is done in part by the municipality and in part by private companies. The average number of gas lamps in use by the city is 13,028. Besides this there are 1,896 electric lamps in use in different parts of the city, and 382 electric lights employed in lighting the port. In addition to the electric lights and gas lamps the city used 8,540 kerosene street lamps for lighting purposes. For the lighting of the city the municipality paid, in 1901, $1,284,169, national currency, for illumination with gas and kerosene; and $1,664,442, national currency, for electric lights used in the public service; making a total of $2,948,611, national currency, expended in lighting the city of Buenos Ayres by the municipality in 1901.

BOLIVIA.

MESSAGE OF PRESIDENT PANDO.

On August 10, 1902, President Pando delivered an interesting message to the Bolivian Congress, convened in regular session at La Paz, an extract of which is as follows;

"The Pan-American conference held in the City of Mexico to consider matters that interest each and every one of the nations of the Continent, closed its session with a vote of adhesion to The Hague peace conference which establishes rules governing international arbitration. In that illustrious body there was also initiated the plan for the holding of two special congresses to consider matters relating to customs affairs and fluvial navigation, the first to be convened in New York and the second in Rio Janeiro in January, 1903. Bolivia is interested in participating in these gatherings in order to define and consolidate her rights respecting the free transit of her commerce and the free navigation of the rivers which, originating within her boundaries, empty into the Atlantic.

"The Argentine-Chilean agreements upon arbitration and the limitation of armaments constitute a peaceful solution of questions, inspired by reasons of a superior order, which protect the welfare and progress of the interested nations. Bolivia, as a Republic adjoining the Argentine Republic and Chile, is sensible of the hopes that are founded on that desirable solution—a solution that is destined to indicate a fixed and sure course to be observed in international politics relating to the interests and destiny of this part of America.

"We have closed the boundary question with the Argentine Republic at an opportune time, and the Mixed Boundary Commission in charge of the survey of the dividing line is now on the ground.

"The Department of State will submit to you the arbitration treaty celebrated with the Argentine Republic, the object of which has been to create, by means of special treaties, a South American public law upon the subject, in order to eliminate as far as possible from international questions the odious appeal to force.

"The geographic location of the true source of the Yavary River having been determined by new and minute astronomical investigation, I can assure you that there is now no boundary question pending with Brazil, since it will be possible, at any moment, to correctly calculate in all of its extent the position of the geodetic line that runs between the said point of the Yavary and the Medara rivers. Nevertheless, in order to facilitate the demarcation of the frontier of the north, plans and works looking to that end will be undertaken.

"The Executive is carefully considering the bases and conditions of peace with Chile, for the purpose of being able to act intelligently when the occasion arrives, and in order to save the country from the conditions of the Tregua agreement, which can not be longer maintained without interrupting the progress of the nation.

"Important occurrences, such as those that have created the new Argentine-Chilean situation, may bring their influence to bear on Bolivia and enable an understanding to be arrived at out of the different opinions now held by the Bolivian and Chilean nations, in such a way that all differences may be settled by treaty agreements.

"The relations with Peru remain peaceful and undisturbed. The mission confided to Señor Osmay y Pardo, the Peruvian Minister, is being performed in such a manner that indications point to the initiation of negotiations for the settlement of the boundary question between the two countries. The Bolivian Government recognizes the necessity for an early settlement of this delicate question, and will do everything in its power to aid the representative of Peru to arrive at a mutually satisfactory understanding regarding this important matter.

"The Peruvian legation at Washington is performing its mission in a satisfactory manner. Its presence in the United States at the present time is absolutely necessary owing to important dealings with the colonization company recently formed for the development of the territory of Acre.

"The Post-Office Department has merited the especial attention of the Government, due to the great development that branch of the public service has attained in the Republic, as well as to the strict observance of the rules and regulations of the Universal Postal Union, of which Bolivia forms a part. The international money order convention with the United States is now in operation.

"With the exception of the Department of Beni, all the principal centers of the Republic are connected by telegraph, and new lines are being constructed in various parts of the country.

"The foreign commerce of the nation continues to show a satisfactory increase. The importations in 1901 amounted to 16,953,223.75 *bolivianos* ($6,476,131.47) or an increase of 3,609,109.28 *bolivianos*

($1,378,679.74). The exports in 1901 amounted to 35,657,689.96 *bolivianos* ($13,621,237.56).

"Work on the railroad from Guaqui to La Paz continues to progress. Grading has been completed to kilometer 65 and the track has been laid as far as kilometer 54, at which point a bridge is being erected over the Colorado river. Arrangements made with the Peruvian Corporation, Limited, enable the Government to liquidate old accounts due for material, coal, and freight, and to complete the construction to Altos.

"Definite plans for the survey of the Argentine-Bolivian Railway have been completed, and it is calculated that within a period of two years the railroad will have been constructed from Jujuy to Quiaca. A French company proposes to build a railroad from Viacha to Oruro and another line from Oruro to Cochabamba.

"The Government is giving considerable attention to the question of immigration, and to the colonization of its rich and extensive territory.

"The National Congress, after mature deliberation, approved the contract celebrated with a syndicate of Anglo-American capitalists for the administration of a part of the Territory of Colonias. Brazil, alleging damages and dangers that have not been set forth in a concrete manner, has opposed by indirect means the fulfillment of this contract. In the meanwhile the Government is convinced that it has acted correctly in this affair, and within the scope of its authority as a sovereign nation. Its first and principal object was to promote, subject to the principles of universal legislation, the organization of a corporation capable of developing those desert and unhealthy territories, and for the purpose of establishing a stable and just government for the benefit of the inhabitants of the same, without the participation of any foreign government in the plan, as has been falsely asserted, and without the preconceived intention of establishing only an American company. The syndicate to which I have just referred has deposited a guaranty of £5,000, and has a period of one year in which to form a company. The means and efforts used by the Government of Brazil to oppose this enterprise are sufficient in themselves to prove the industrial importance of the company now being formed.

"I conclude, Honorable Senators and Deputies, with the wish that wisdom may guide your labors, and that in the delicate situation through which the country is now passing, calmness, study, and independence of thought upon questions of personal or party interest may prevail."

FOREIGN COMMERCE IN 1901.

The Consul-General of Bolivia, at New York, has furnished the MONTHLY BULLETIN some valuable statistics concerning the foreign commerce of the Republic in 1901. The importations during that period were made up of 58,000,140 kilograms of merchandise valued at 16,953,233 *bolivianos* ($6,476,135). The customs duties collected on these goods by the Bolivian Government amounted to 5,422,687 *bolivianos* ($2,071,084), and the cost of transportation of the merchandise into the interior of the country is estimated at 5,000,000 *bolivianos* ($1,910,000), so that the total value of the goods imported delivered in the stores and warehouses of the importing merchants amounted to 27,374,910 *bolivianos* ($10,457,219), as is shown in detail in the following table:

	Value.	
	Bolivianos.	*Gold.*
Invoiced value of the importations	16,953,233	$6,476,135
Customs duties collected by Bolivian Government	5,421,687	2,071,084
Estimated cost of transportation to the interior	5,000,000	1,910,000
Total value of imports	27,374,910	10,457,219

The exports from Bolivia in 1901 consisted of 110,763,320 kilograms of domestic products, valued at 37,578,210.97 *bolivianos* ($14,354,876.59), composed of the following items:

	Weight.	Value.	
	Kilograms.	*Bolivianos.*	*Gold.*
Mineral products	105,615,971	26,855,425.76	$10,258,772.64
Agricultural products	4,413,883	9,688,512.82	3,701,011.90
Manufactured products	161,072	535,937.46	204,728.11
Stock products	443,574	373,502.85	142,678.09
Sundry products	128,823	124,832.08	47,685.85
Total	110,763,323	37,578,210.97	14,354,876.59

An analysis of the mineral, agricultural, and manufactured products, respectively, is shown in the following tables:

	Weight.	Value.	
MINERAL PRODUCTS.	*Kilograms.*	*Bolivianos.*	*Gold.*
Silver	75,649,644	14,566,660.66	$5,564,464.37
Tin	21,915,907	9,380,714.00	3,583,432.75
Bismuth	1,059,129	1,463,088.43	558,899.78
Copper	3,049,850	1,112,598.90	425,012.78
Lead, antimony, gold, cobalt, zinc	3,941,441	332,363.77	126,962.96
	105,615,971	26,855,425.76	10,258,772.64
AGRICULTURAL PRODUCTS.			
Crude rubber	3,465,063	9,151,823.61	3,495,996.62
Coca	255,718	259,513.50	99,134.16
Peruvian bark	315,163	137,554.24	52,545.72
Coffee	212,358	110,263.89	42,120.80
Cacao, tobacco, etc	165,581	29,384.58	11,224.91
	4,413,883	9,688,539.82	3,701,022.21
MANUFACTURED PRODUCTS.			
Stamped silver	28,434	411,831.00	157,319.44
Sundry articles	132,638	124,106.46	47,408.67
	161,072	535,937.46	204,728.11

THE RIVER SYSTEMS OF THE REPUBLIC.

A report made by Mr. EUGENE SEEGER, United States Consul-General at Rio de Janeiro, concerning the rich territories of eastern Bolivia and Peru, dwells especially on the natural highways of the two Republics mentioned, the navigable rivers eastward to the Atlantic Ocean being the Madre de Dios and Purus and the Beni, Mamore, and Madeira, tributaries to the Amazon River. Mr. SEEGER states that by building a canal uniting the Madre de Dios with the Acre River, an uninterrupted waterway could be established between that part of eastern Peru in which lie the settlements of Cuzco, Urco, and Quiquijama and the mouth of the Amazon River. The feasibility of this work has been amply demonstrated at an estimated cost of about $150,000. Another strategic point of great importance in this river system is the Madeira Falls, which are the only obstacle to navigation between the Atlantic coast and the largest and richest part of the Bolivian Republic. Efforts heretofore made to do away with this obstruction or to get around it have proven inadequate or impracticable.

An expert report published in 1869 demonstrated that, by improving the channel along the rapids and falls and by constructing a series of locks and small canals, uninterrupted navigation could be established, the cost of which should be about $500,000. Dr. SOUTO MAIOR, who has secured from the Brazilian Government, for a period of twenty-five years the exclusive control of the navigation of the Madeira from Santo Antonio to the mouth of the Beni River, is desirous of interesting United States engineers and capitalists in the enterprise. He believes that a reasonable interest on the capital invested might be obtained and that subsidies and various desirable privileges could be secured from the Governments interested. Navigation on the Amazon is free up to Tabatinga (the Brazilian town on the Peruvian border) and on its affluent, the Madeira, up to the first of the falls (Santo Antonio), from there to the Bolivian frontier Dr. SOUTO MAIOR has exclusive control, and in Bolivia navigation is unrestricted everywhere.

Consul-General SEEGER transmits also a sketch of the Madeira River and Falls which is filed in the Bureau of Foreign Commerce, United States Department of State, where it may be consulted by interested persons. To the Madeira River system, the following navigable streams belong: The Mamore River (with its principal affluents, Chapore, Guapahy, and Sicuri), connecting the Bolivian provinces of Chicasaca, Cochabamba, Santa Cruz, and Beni with the Amazon; the Beni River, connecting the La Paz region with the same waterway; the Madre de Dios River, connecting the north of Bolivia and the city of Cuzo, in Peru, with the Madeira River; the Guapore, which constitutes the eastern boundary of Bolivia and connects the Matto Grosso region of Brazil and the Paraguay River system with the Amazon. These four affluents of the Madeira present opportunity for uninterrupted navigation by means of steam launches of from 30 to 50 tons burden for more than 5,000 kilometers (3,107 miles), in a territory that has about 1,800,000 inhabitants and commands a very considerable trade. Following are some of the distances in the navigation of the Madeira River system:

	Kilometers.	Miles.
From the Santo Antonio Falls to the mouth of the Beni	357=	221.8
From the Santo Antonio Falls to the Guapore Mirim (the last of the six falls and rapids on the Bolivian border)	425=	264
From the Santo Antonio to the mouth of the Madeira	901=	559.8
From the Santo Antonio to Manaos	1,141=	709
From the Santo Antonio to the city of Para (Belem)	2,400=	1,491.3
From the Santo Antonio to Exaltacion (center of Bolivia)	1,024=	636.3
From the mouth of the Beni to Huachi (Bolivia)	1,500=	932
From the town of Matto Grosso to the mouth of the Madeira (via Guapore)	2,000=	1,242.8
From the Guajara Mirim Fall to Guapahy (Bolivia)	1,500=	932

The following table shows the distances from Santo Antonio to the several falls of the Madeira River; also the length of navigable channels between the different cataracts:

Falls on rapids of the Madeira.	Distance from Santo Antonio.		Length of navigable channels between the different falls.	
	Kilometers.	*Miles.*	*Kilometers.*	*Miles.*
Santo Antonio Falls to—				
Salto Theotonio	11	6.8	11	6.8
Caldeiras de Inferno	112	69.6	101	62.7
Girao	126	78.2	12	7.4
Paredao	207	128.6	79	49
Pederneiras	230	142.9	29	18
Araras	306	190	76	47.2
Ribeirão	332	206.3	26	16.1
Madeira	357	221.8	20	12.4

On the Bolivian side there are six more rapids and falls within a distance of 67 kilometers (41.6 miles).

The principal products of the parts of Bolivia and Peru affected by the project of direct communication with the Atlantic Ocean are rubber, cacao, nuts, quinine, wheat, corn, coffee, cotton, sugar, grapes, leather, meat products, and minerals, such as gold, silver, copper, and lead. Live stock, which costs in eastern Bolivia 5 bolivianos ($2.04) a head, could be readily sold at 200 to 250 bolivianos ($81.60 to $102) a head in the rubber districts on the Acre, Upper Madeira, and Upper Purus. The quantity of timber and the variety of valuable cabinet woods in these regions are extraordinary, the only drawback to the opening up of this vast and rich section being in the unsanitary conditions which prevail in some of the districts through which the waterways lead. These, however, could be largely overcome by the adoption of precautionary hygienic measures and through the medium of a good commissary department for the rubber camps and various companies engaged in the development of the region. The possibilities of the import trade in the territories along the Upper Amazonas, the Madeira, Purus, Acre, Beni, Mamore, and Guapore, in eastern Bolivia and eastern Peru, may be said to be unlimited when markets are opened for their products.

BRAZIL.

COFFEE CROP.

The Consul-General of the United States at Rio de Janeiro has reported to the Secretary of State of the United States as follows:

"I give below the authentic figures of coffee production for the harvest year closed on June 30, 1902. They are in bags of 60 kilograms (132 pounds):

"Received in the port of Rio	4, 971, 686
"Received in the port of Santos	10, 149, 327
"Total in the two ports	15, 121, 013

"The receipts of the other ports (Victoria, Bahia, Pernambuco, etc.) will be sufficient to make up a total of 16,000,000 bags.

"The present harvest, the marketing of which commenced on July 1 of this year, may be estimated at 10,000,000 bags.

"Coffee is now the subject of very active speculation, and prices, low as they are, are to a great extent upheld by speculators. The visible supplies in Europe as well as in the United States are more than sufficient to cover a year's consumption. If the new crop (the harvest of 1903), which will be in bloom about the end of October, and then be susceptible of estimates, should turn out, as it is likely, to be a good one, a considerable decrease in the prices seems inevitable. This would naturally bring about a decrease in exchange and in the irredeemable Brazilian paper currency."

CONVENTION OF SUGAR PRODUCERS.

Pursuant to a call issued by the National Society of Agriculture at Rio de Janeiro, delegates assembled there on June 25, 1902, to take part in the first sugar producers' convention of Brazil.

Delegates were present from all the sugar-producing States—Sao Paulo, Rio de Janeiro, Pernambuco, Bahia, Parahiba, Alagoas, Sergipe, Rio Grande do Norte, and Maranhão. They were not sent according to any basis of apportionment, but were designated by the various agricultural and commercial societies, municipalities, State governments, groups of cane raisers, and sugar producers.

The national society had planned an elaborate programme, to include the discussion of such subjects as symptoms of the sugar crisis, its causes and remedy; condition and preparation of the soil, and qualities of cane cultivated; methods of culture; methods of sugar making; production; foreign trade; internal trade, and means of enlarging it; production and consumption of alcohol, its industrial application for light and heat, its use as fuel for large factories; use of sugar cane for feeding stock.

The subjects were not assigned to delegates, but it was left to the individuals to take whatever part they might wish; and instead of discussing the points outlined on the programme, the convention virtually narrowed down to considering various plans which were proposed to better the condition of those engaged in sugar production. These plans included federal loans to planters; abolition of tax for foreign export, and payment of bounty for sugar so sent; a consumption tax on all sugars, the revenue so derived to reimburse the States for the export taxes removed and the bounty established; the storing of sugar by the Government, and the sale of same without the intervention of the middleman, etc.

COMMERCE DURING FIRST ELEVEN MONTHS OF 1901.

The value of the imports of the Republic for the first eleven months of 1901 was as follows:

Country of origin—	
Argentine Republic	$55,621,447
Austria-Hungary	6,881,531
Belgium	8,332,494
France	29,451,091
Germany	34,577,073
Great Britain and possessions	26,800,131
Holland	2,198,165
Italy	$14,239,019
Portugal	24,501,915
Spain	2,305,972
Sweden and Norway	4,326,271
Switzerland	2,551,082
United States	44,817,830
Uruguay	23,826,366
Other countries	3,621,240

The following table shows the exports by countries:

Destination—	
Africa	$5,654,245
Argentine Republic	18,058,415
Austria-Hungary	21,666,966
Belgium	17,324,014

STATE OF SANTA CATHARINA.

The State of Santa Catharina extends from 26° to 29° south latitude and from longitude 5° to 11° west of Rio de Janeiro. The climate is very mild, the thermometer ranging between 10° and 30° C.

The State has a total area of 74,156 square kilometers and a population of 300,000, a third of which consists of Italian and German colonists.

At present there is only one railway in the State, the Dona Theresa Christina, which has a total length of 116.62 kilometers, extending from the port of Laguna southward to the coal deposits in the valley of the Tubarão River. The Brazilian Government proposes to lease the road to a private company. These coal deposits were mined for a short time, but their exploitation had to be abandoned owing to the financial difficulties of the railroad company; it is probable, however, that after the road has been leased the mining of these deposits will be resumed.

The agricultural and cattle-raising industries are well developed in this State. All the products of torrid and temperate zones may be cultivated here.

The principal exports of the State are: coffee, mandioca flour, corn, bananas, hog products, hides, skins, and butter. Fish, particularly the crustacea, abound in the waters along the coast, but this industry is confined to supplying the local markets. Any company having a fleet of small vessels fitted up with cold-storage plants which should engage in this industry would find it very profitable, as there is a ready market for fish in the cities of the river Plate, which is only 700 miles from this port. Whale fishing is another industry which could be carried on with profit, as the coast is annually visited by shoals of whales which at stated periods migrate from north to south, and vice versa. During the colonial period of Brazil, whale fishing was carried on extensively in this State, as evidences of this industry may still be seen here.

The land is very rolling and generally covered by dense forests. There is an abundant rainfall and numerous waterfalls for motive power and for irrigation purposes. There is a good water power in the vicinity of Florianopolis, where a company is about to install waterworks, sewers, electric light, etc.

The governor of the State is LAURO SEVERIANO MULLER, who was inaugurated on the 28th of September, 1902.

BUDGET FOR THE FISCAL YEAR 1903.

The revenues of the Government for the fiscal year 1903 are estimated at 43,123,942 milreis, gold, and 255,543,000 milreis, paper, and will be derived from the following sources:

	Gold.	Paper.
	Milreis.	*Milreis.*
Import duties	33,000,000	130,050,000
Customs fees	120,000	10,000
Additional duties		90,000
Internal revenue	34,413,666	204,218,000
Excise taxes		32,690,000
Extraordinary taxes	180,275	
Leasing of Government railways		350,000
Payments on Government loans, including amounts received on indebtedness of banks		600,000

	Gold.	Paper.
	Milreis.	*Milreis.*
Other extraordinary revenue collected by the Treasury	....	1,200,000
Duty of 5 per cent gold, on all articles imported for consumption	8,250,000	....
Payment in gold for lease of Government railways	110,000	....
Extraordinary revenue in gold	10,000	....
Lease of Government railways	160,000	....
Statistical tax	....	270,000
Sales of public lands and utilities	....	200,000
Surplus	....	5,000,000
Fund for the construction of improvement works in the ports of the Union	....	2,530,000
Total estimated receipts	43,123,942	255,543,000

The expenditures of the Government for 1903 are estimated at 42,593,070 milreis, gold, and 238,489,192 milreis, paper, and are distributed as follows:

	Gold.	Paper.
	Milreis.	*Milreis.*
Department of Foreign Relations	889,500	726,920
Department of Interior	....	16,209,881
Department of Navy	....	24,646,425
Department of War	....	46,292,812
Department of Public Communications and Works	4,812,025	66,773,487
Department of Finance	36,891,545	83,839,665
Total estimated expenditures	42,593,070	238,489,192

CHILE.

TREATY WITH THE UNITED STATES OF AMERICA FOR THE EXTRADITION OF CRIMINALS.

Signed at Santiago April 17, 1900.

Ratifications exchanged at Washington May 27, 1902.

The United States of America and the Republic of Chile, being desirous to confirm their friendly relations and to promote the cause of justice, have resolved to conclude a treaty for the extradition of fugitives from justice between the United States of America and the Republic of Chile, and have appointed for that purpose the following plenipotentiaries:

The President of the United States of America, HENRY L. WILSON, Envoy Extraordinary and Minister Plenipotentiary of the United States in Chile, and the President of Chile, Señor Don RAFAEL ERRÁZURIZ URMENETA, Minister of Foreign Relations of Chile.

Who, after having communicated to each other their respective full powers, found in good and due form, have agreed upon and concluded the following articles:

ARTICLE I.

The Government of the United States and the Government of Chile mutually agree to deliver up persons who, having been charged with or convicted of any of the crimes and offenses specified in the following article, committed within the jurisdiction of one of the contracting parties, shall seek an asylum or be found within the territories of the other: Provided, that this shall only be done upon such evidence of criminality as, according to the laws of the place where the fugitive or person so charged shall be found, would justify his or her apprehension and commitment for trial if the crime or offense had been there committed.

Article II.

Extradition shall be granted for the following crimes and offenses:

1. Murder, comprehending assassination, parricide, infanticide, and poisoning; attempt to commit murder; manslaughter, when voluntary.

2. Arson.

3. Robbery, defined to be the act of feloniously and forcibly taking from the person of another money, goods, documents, or other property by violence or putting him in fear; burglary.

4. Forgery, or the utterance of forged papers; the forgery or falsification of official acts of Government, of public authorities, or of courts of justice, or the utterance of the thing forged or falsified.

5. The counterfeiting, falsifying, or altering of money, whether coin or paper, or of instruments of debt created by national, State, provincial, or municipal governments, or of coupons thereof, or of bank notes or the utterance or circulation of the same; or the counterfeiting, falsifying, or altering of seals of state.

6. Embezzlement by public officers; embezzlement by persons hired or salaried, to the detriment of their employers; where in either class of cases the embezzlement exceeds the sum of two hundred dollars; larceny.

7. Fraud or breach of trust by a bailee, banker, agent, factor, trustee, or other person acting in a fiduciary capacity, or director or member or officer of any company, when such act is made criminal by the laws of both countries and the amount of money or the value of the property misappropriated is not less than two hundred dollars.

8. Perjury; subornation of perjury.

9. Rape; abduction; kidnapping.

10. Willful and unlawful destruction or obstruction of railroads which endangers human life.

11. Crimes committed at sea.

(a) Piracy, by statute or by the laws of nations.

(b) Revolt, or conspiracy to revolt, by two or more persons on board a ship on the high seas against the authority of the master.

(c) Wrongfully sinking or destroying a vessel at sea, or attempting to do so

(d) Assaults on board a ship on the high seas with intent to do grievous bodily harm.

12. Crimes and offenses against the laws of both countries for the suppression of slavery and slave trading.

Extradition is also to take place for participation in any of the crimes and offenses mentioned in this treaty, provided such participation may be punished in the United States as a felony, and in the Republic of Chile by imprisonment at hard labor.

Article III.

Requisitions for the surrender of fugitives from justice shall be made by the diplomatic agents of the contracting parties, or in the absence of these from the country or its seat of government may be made by the superior consular officers.

If the person whose extradition is requested shall have been convicted of a crime or offense, a duly authenticated copy of the sentence of the court in which he was convicted, or if the fugitive is merely charged with crime, a duly authenticated copy of the warrant of arrest in the country where the crime has been committed, and of the depositions or other evidence upon which such warrant was issued shall be produced.

The extradition of fugitives under the provisions of this treaty shall be carried out in the United States and in the Republic of Chile, repectively, in conformity with the laws regulating extradition for the time being in force in the State on which the demand for surrender is made.

Article IV.

Where the arrest and detention of a fugitive are desired on telegraphic or other information in advance of the presentation of formal proofs, the proper course in the United States shall be to apply to a judge or other magistrate authorized to issue warrants of arrest in extradition cases and present a complaint on oath, as provided by the statutes of the United States.

When, under the provisions of this article, the arrest and detention of a fugitive are desired in the Republic of Chile, the proper course shall be to apply to the Foreign Office, which will immediately cause the necessary steps to be taken in order to secure the provisional arrest or detention of the fugitive.

The provisional detention of a fugitive shall cease and the prisoner be released if a formal requisition for his surrender, accompanied by the necessary evidence of his criminality, has not been produced under the stipulations of this treaty within two months from the date of his provisional arrest or detention.

ARTICLE V.

Neither of the contracting parties shall be bound to deliver up its own citizens or subjects under the stipulations of this treaty.

ARTICLE VI.

A fugitive criminal shall not be surrendered if the offense in respect of which his surrender is demanded be of a political character, or if he proves that the requisition for his surrender has in fact been made with a view to try or punish him for an offense of a political character.

No person surrendered by either of the high contracting parties to the other shall be triable or tried or be punished for any political crime or offense, or for any act connected therewith, committed previously to his extradition.

If any question shall arise as to whether a case comes within the provisions of this article, the decision of the authorities of the Government on which the demand for surrender is made or which may have granted the extradition shall be final.

ARTICLE VII.

Extradition shall not be granted, in pursuance of the provisions of this treaty, if legal proceedings or the enforcement of the penalty for the act committed by the person claimed has become barred by limitation according to the laws of the country to which the requisition is addressed.

ARTICLE VIII.

No person surrendered by either of the high contracting parties to the other shall, without his consent, freely granted and publicly declared by him, be triable or tried or be punished for any crime or offense committed prior to his extradition, other than that for which he was delivered up, until he shall have had an opportunity of returning to the country from which he was surrendered.

ARTICLE IX.

All articles seized which are in the possession of the person to be surrendered at the time of his apprehension, whether being the proceeds of the crime or offense charged, or being material as evidence in making proof of the crime or offense, shall, so far as practicable and in conformity with the laws of the respective countries, be given up when the extradition takes place. Nevertheless, the rights of third parties with regard to such articles shall be duly respected.

ARTICLE X.

If the individual claimed by one of the high contracting parties, in pursuance of the present treaty, shall also be claimed by one or several other powers on account of crimes or offenses committed within their respective jurisdictions, his extradition shall be granted to the State whose demand is first received: *Provided*, That the Government from which extradition is sought is not bound by treaty to give preference otherwise.

ARTICLE XI.

The expenses incurred in the arrest, detention, examination, and delivery of fugitives under this Treaty shall be borne by the State in whose name the extradition is sought: *Provided*, That the demanding government shall not be compelled to bear any expense for the services of such public officers of the government from which extradition is sought as receive a fixed salary: *And provided*, That the charge for the services of such public officers as receive only fees or perquisites shall not exceed their customary fees for the acts or services performed by them had such acts or services been performed in ordinary criminal proceedings under the laws of the country of which they are officers.

ARTICLE XII.

The present treaty shall take effect on the thirtieth day after the date of the exchange of ratifications, and shall not operate retroactively.

The ratifications of the present treaty shall be exchanged at Washington as soon as possible, and it shall remain in force for a period of six months after either of the contracting governments shall have given notice of a purpose to terminate it.

In witness whereof, the respective plenipotentiaries have signed the above articles, both in the English and Spanish languages, and have hereunto affixed their seals.

Done in duplicate, at the city of Santiago, this 17th day of April, 1900.

HENRY L. WILSON. [SEAL.]
R. ERRÁZURIZ URMENETA. [SEAL.]

THE MINERAL INDUSTRY OF THE REPUBLIC.

The "Engineering and Mining Journal" of September 27, 1902, commenting on the mineral wealth of the Republic states that there are few South American Republics that can equal Chile in the importance of their mining industries. In nitrate of soda, Chile leads the world, no other country producing this valuable mineral in commercial quantities. The industry is in the hands of a combination of producers, and centers in the northern provinces extending from Jazpampa to Lagunas and thence from Tocapilla to Taltal, the most important fields being in the province of Tarapaca.

Metal mining is growing, though the depreciation in the market prices of silver and copper has interfered with production in the past year. Chile is the second largest silver mining country in South America. The principal mines are located in the district of Caracoles, 150 miles inland from Antofagasta. Operations are carried on by the leasing system, the lessees paying the owner of the property a royalty of 15 to 30 per cent upon the net value after deducting the mining expenses. Extensive silver-lead smelting works are at Antofagasta, one being the suburb Bella Vista, owned by the Antofagasta Smelting Company, and the other at Playa Blanca, owned by the Compañía de minas de Huanchaca. American and French capitalists are interested in the Huanchaca Company.

Copper mining is largely centered in the provinces of Coquimbo and Atacama, where British capital is heavily invested. Chile is the third largest copper producer in the world. In northern Chile, notably in the province of Antofagasta, extensive deposits of calcium borate are being worked by the Borax Consolidated—British corporation—which has obtained control of the leading properties. Manganese mines are being worked in Coquimbo and Atacama, and the annual exports are between 20,000 and 25,000 tons. The ore averages 50 per cent manganese and contains about 10 per cent silica and something less than 0.1 per cent phosphorous.

REPORT ON THE NATIONAL FINANCES.

The Auditor-General of the Republic of Chile, in his report for the financial year 1901, states that on December 31, 1901, the national debt amounted to $302,672,280.91. Of this amount $227,234,400 (calculated at a valuation of 18d. each) corresponded to the foreign debt, and $75,437,880.91 (currency) to the internal debt. The foreign debt was made up of the following:

1885, loan	$9, 274, 666. 67
1886, loan	70, 352, 000. 00
1887, loan	13, 651, 333. 33
1889, loan	19, 024, 533. 33
1892, loan	22, 517, 333. 34
1892, international loan	1, 769, 333. 33
1893, loan	27, 820, 000. 00
1895, loan	25, 489, 333. 33
1896, loan, Coquimbo Railway	3, 397, 866. 67
1896, loan	51, 650, 666. 67
1894, Peñuelas waterworks loan	2, 257, 333. 33

The internal debt was made up as follows:

Municipal debts	$1,122,232.28
Redeemed annuities	21,365,298.57
3 per cent debt	1,972,420.06
Paper money, law of July 31, 1898	50,000,000.00
Balance of previous issues	973,930.00
Treasury bills, law of May 13, 1893	3,900.00

On December 31, 1900, the national debt stood at $305,568,888.17, so that a reduction of $2,896,607.26 was effected in 1901. In the estimates for 1901 there figured an item of £973,455, or $12,979,436 (18d.) for the service of the foreign debt and the following sums were expended:

	£	s.	d.
Interest	802,365	5	0
Real value of amortization	162,587	13	6
Advertising, commissions, etc	7,298	15	0
Total	972,251	13	6

With the above-mentioned sum of £162,587 13s. 6d., bonds of the value of £188,100 pounds were redeemed, whereby a saving of £25,512 6s. 6d., equal to $340,164 (18d.) was effected. The original amount of the outstanding loans was £18,569,500, which had been reduced by the end of 1901 by £1,526,920 at a cost to Chile of £1,375,702 17s.

The prices of Chilean bonds were affected in 1898 and in 1901 by the questions with the Argentine Republics, but they still maintained a good position in the London market.

The following statement shows the yearly service of the foreign debt from the date of its issue till the end of last year:

Years.	Interest.			Effective amortization.			Total.		
	£	s.	d.	£	s.	d.	£	s.	d.
1885	12,133	10	0				12,133	10	0
1886	36,353	5	0	4,068	10	0	40,421	15	0
1887	332,723	5	0	34,944	0	0	367,667	5	0
1888	357,120	0	0	42,520	15	0	399,640	15	0
1889	355,225	10	0	43,600	0	0	398,825	10	0
1890	422,667	5	0	53,987	0	0	476,654	5	0
1891	420,178	6	0	56,983	12	6	477,161	18	6
1892	439,866	9	0	59,932	0	0	499,798	9	0
1893	541,374	7	0	76,040	10	0	617,414	17	0
1894	548,322	0	0	80,726	2	6	629,048	2	9
1895	566,939	12	0	86,824	12	6	653,764	4	6
1896	741,831	3	0	104,506	15	0	846,337	18	0
1897	836,316	0	0	130,844	15	0	967,260	15	0
1898	828,049	11	0	138,358	0	0	966,407	11	0
1899	814,332	13	0	145,093	0	0	959,425	13	0

1901	802,365	5	6	162,587	13	6	964,952	19	0
	8,868,136	14	6	1,375,702	17	0	10,243,839	11	6

COLOMBIA.

TARIFF MODIFICATIONS.

As first supplement to No. 90 (second edition), the "International Customs Journal" publishes the following modification of the tariff of Colombia.

Decree No. 722 of May 1, 1901, modifying the export duties.

["Diario Oficial" of May 13, 1902.]

* * * * * * *

Art. 6. Duties established by Decree No. 495 of April 30, 1901,[a] shall be collected as hereafter:

Gold, silver, and platinum in stamped bars shall pay a duty of 5 per cent on the value determined by the certificate of fusion and assay.

Gold dust, platinum, and silver, unassayed, as well as gold and platinum manufactured into jewelry, coin or otherwise, shall pay 5 per cent on the insurance value thereof.

Gold and silver ore shall pay 3 per cent of the insurance value thereof.

In default of assay certificate or insurance policy, gold shall pay $0.05; platinum, $0.04; silver, $0.02 per gramme, and the crude ore, $5 per ton.

Art. 7. The taxes and duties mentioned in the present decree shall be paid to the respective departmental administrations of finance or to the general treasury of the Republic. The first annuity shall be payable on the 1st of June of this year.

Art. 8. This decree modifies * * * article 2 of decree 495 of April 30, 1901, and repeals all legal provisions inconsistent therewith.

COSTA RICA.

THE GOLD MINES OF COSTA RICA,

By Milton Franklin Reitz.

Through the courtesy of "The Engineering and Mining Journal," of New York, the Bulletin is enabled to print, in English and in Spanish, an exhaustive paper on "The Gold Mines of Costa Rica," by Mr. Milton Franklin Reitz, which the valuable scientific periodical above named published in its edition of August 16 of the present year:

"Like the mines of every other part of the world, something has been said and written of those in this Republic. All connected with the mining industry know the nature and effect of such writings. It is a well-known fact that the press throughout the States has given space to reviews of this sort relative to all known mining districts, the authenticity of which has not always been without question. These articles in many instances have been produced by special reporters, who have spent limited time in their preparation, with the prime purpose of obtaining readable matter, and with the result that facts have been sacrificed to give due credit to the legends and traditions met with in all mining communities.

---

[a] See No. 90, second edition, p. 24.

"The object of this article is to give a correct idea of the conservative possibilities, if not probabilities, of the mining industry in Costa Rica. The writer has spent two years immediately connected with the mines of the country, and has personally visited the more important properties here mentioned. Physical conditions noted are given from personal knowledge, and are corroborated by reports made at various times by eminent engineers. Statistical facts observed are taken from original mint returns, assay certificates, and bills of sale now in the files of the owners of the mines. As there is probably no better way of judging the future than by the past, I have thought it of interest to give some history, especially with reference to the mines of the Aguacate Mountain, for which I am indebted to Don FRANCISCO MARIA YGLESIAS, who, with his father before him, have been associated with these properties for more than eighty years. It was the gold of Monte Aguacate which infused the first symptoms of vitality into Costa Rican commerce.

"COSTA RICA.

"The name, meaning 'rich coast,' was given to the country by the first Spanish explorers in 1512, when they were attracted by the many golden images worn by the native Indians. Many of these gold idols, dug from old burying grounds, are found in the collections made by the pioneers. The collection at the National Museum is valued at about $50,000. Events subsequent to those early times show the name is an appropriate one.

"The Republic has an area of 34,000 square miles, and the population, according to the census of 1901, was 311,444. The ports of entry—Puerto Limon, on the Atlantic, and Puntarenas, on the Pacific—lie on the tenth parallel, which crosses the higher-developed section, the central part of the Republic. These ports have excellent landing and shipping facilities, and are both connected with the interior by railway.

"The laws of the country governing mining are liberal and ample. Mining machinery and supplies are admitted free of duty, and full protection is accorded the business. Many of the leading business men of the Republic are financially interested in the mines. The attitude of the Government has long been especially friendly, and the present Administration hopes to see the mining business develop into a chief industry. The peaceful character of the people and the stability of the Government are facts worthy of particular mention in this connection.

"ECONOMIC CONDITIONS AFFECTING MINING.

"*Climate.*—The climate in all localities where mines are now being worked and in all places where work is contemplated is healthful and pleasant. The general elevation of the mines is about 1,800 feet. Observations taken at this elevation at the Aguacate mines indicate the average temperature at 72° F. The temperature varies but little during all the year.

"*Water.*—This important element is well provided, and the supply of pure water is sufficient for all purposes. The mountain streams afford ample power and are numerous in the mining districts, so that immediate or transmissible power is available at moderate expense.

"*Timber.*—The native woods are well adapted to mining purposes, and abound in sufficient quantity in most localities to supply this demand for many years. The timber requirements can in most of the mines be reduced to less than past consumption by employing modern methods. Cheap power and labor being available, good lumber is produced at moderate cost.

"*Labor.*—The native labor is good, cheap, and steady. The miners are hard working and intelligent. The maximum price paid to drill men is 3 colonies, or $1.35 gold, per day, and ordinary labor is secured at half this price.

"As a summary of these facts, it is conservative to say that all economic conditions are favorable to profitable operations.

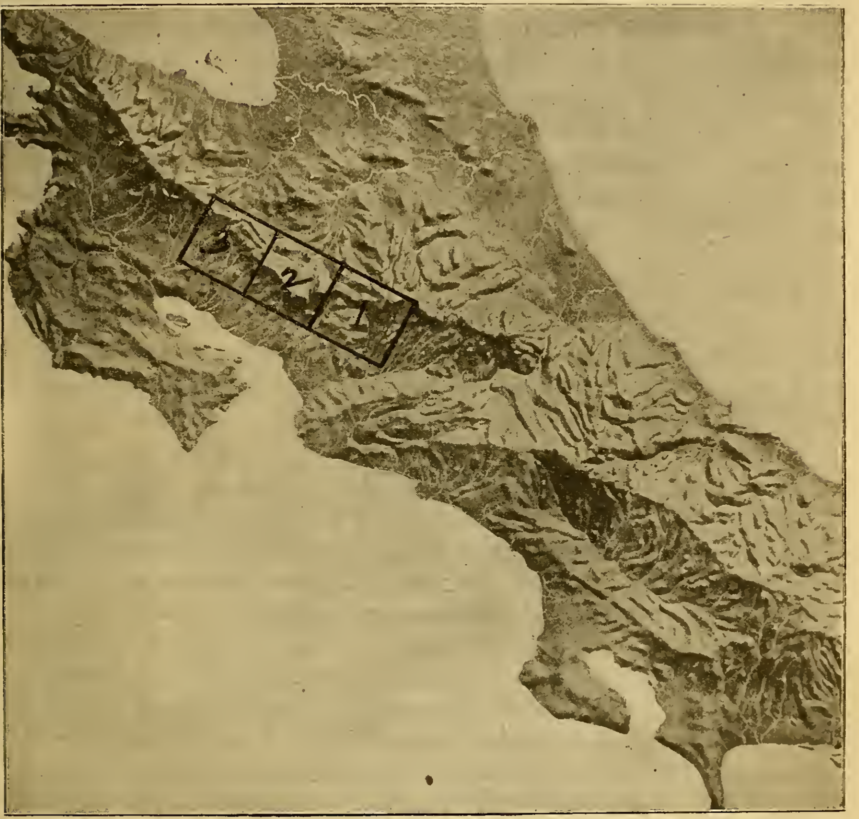
"GEOLOGY AND MINERALOGY.

"To treat this subject briefly, suffice it to say that the following conditions will apply with little variation to all of the localities mentioned.

"The country rock is of igneous origin; diorite and the porphyries are the more common. Large black bowlders conspicuously mark many localities. It was due to this fact that Los Quemados (which means 'the burned'), a village in the interior, was so named. The ores bearing the precious metals usually occur in fissure veins, and the gangue consists principally of quartz, clay talc, and porphyry. The values are largely held by crystalline quartz, which occurs in all its varieties, from the pure white and barren to the highly mineralized, carrying sulphides of the base metals in varying proportions and in rarer cases manganese, arsenic, and antimony. Ores presenting highly refractory features are rare. The remaining gangue often carries gold which has been freed from the quartz by aqueous agencies, to which the oxidation of the base metals and the crumbling of the quartz was probably due. The percentage of silver values in the auriferous ores I have examined is comparatively small, but it is said there are some rich silver ores.

"HISTORY.

"Lost and perilous expeditions, intrigues, persecutions, and other causes, especially the marine disaster suffered by the governor of Costa Rica, JUAN VAZQUEZ DE CORONADO, occasioned much delay in the development of the first mineral discoveries. This was retarded also by frequent invasions by the Talamancas and other Indian tribes. During two centuries prior to 1815 but four mineral denouncements are of record, and but two of these are located.



Mining districts of Costa Rica. 1. Monte de Aguacate. 2. Monte de Oro. 3. Abangares District.

"The first discovery affecting the principal mines known to-day was made in the district of Aguacate Mountain (then called El Torroto) by the Spanish Bishop GARCIA, bishop of Costa Rica and Nicaragua, while crossing the mountain over the old trail which connected Cartago, the destiny of the bishop on this journey, with other important provinces within his dominion. The principal residence of the bishop was then in Nicaragua, and a visit from him to Costa Rica was a notable event. In this particular instance more than thirty years had elapsed since the visit of his predecessor, Bishop TRISTAN; hence, in order to show their appreciation of the event, the Costa Ricans sent a delegation of prominent citizens to accompany him from Esparta to Cartago.

"On their way through the Aguacate Mountains the bishop, who had some knowledge of ores, observed the outcropping of a vein over which they passed, and suggested the probability of gold and silver veins existing in the locality. This discovery was made on the main ledge of the mine, afterwards denounced as the Sacra Familia. The place is still marked by a surface-working, made in the discovery days. A Spanish gentleman, Don SANTOS LOMBARDO, of Cartago, a member of the delegation, took some samples to Cartago, had them assayed, and found them to be rich in gold. Returning in company with two friends, one of whom was Don RAFAEL GALLEGOS, second president of Costa Rica, they denounced the mine under the name Sacra Familia (Holy Family). These first and the many subsequent discoveries caused much excitement in Costa Rica and prospecting was actively entered into.

"GOLD-MINING ZONE.

"The gold-mining zone of Costa Rica lies on the Pacific slope, and comprises three different districts, viz, the mines of Aguacate Mountain, Monte de Oro district, and the Abangares district, the locations of which may be seen on the accompanying map.

"*The mines of the Aguacate district.*—The position, past importance, and promised future of these extensive properties suggest them for first mention. This district consists of five distinct mines or groups, viz, the Aguacate mines, the Sacra Familia, Los Castros, Quebrada Honde, and El Porvenir. They are situated in the mining district of the Aguacate Mountain, in the Province of Alajuela. The mountain is in latitude 10° 12′ 30″ north and in longitude 84° 28′ 30″ west of Greenwich. The Pacific Railway, now being completed to connect the capital (San José) with the Pacific coast, passes within 2 miles of the mines, at the Rio Concepcion. The national cart road, connecting these points, passes the entrance to the mines at the post-office Desmonte, which is about 30 miles from the Pacific port and 35 miles from San José.

"*The main lode.*—According to a report made by an eminent engineer of San Francisco, 'the vein is an exceedingly powerful one and possesses all of the characteristics of great strength and permanency. It is undoubtedly a true fissure vein. The width is from 15 to 150 feet.

Very few of the workings show both walls, although some crosscuts are in vein matter from the foot wall, a distance of from 25 to 30 feet. At one point in the San Rafael level, a crosscut near the bonanza El Balsa shows the foot wall at 8 feet, while at a lower tunnel a cut shows it to be 40 feet wide. On the national cart road a cutting exhibits a width of 150 feet. There are two parallel veins in what is known as the Oreamunos portion of the lode, one called Veta Colorado and the other Veta Blanco, the former being next to the foot wall and the latter toward the hanging wall. These are considered separate and distinct veins, but are unquestionably component parts of the lode. In the works of the tunnels driven, many feeders have been encountered which unite with the main lode. All indicate that this is the mother lode of its district. The ore varies in value, according to the locality in which it occurs. In the bonanzas it ranges from $75 to $5,000 per ton. In order to ascertain the value of the lode large samples of from 100 to 300 pounds each were carefully taken, reduced, and assayed in duplicate, giving an average of $25.82.'

"*La Minita.*—This is a separate and strong vein. It was discovered and denounced in 1832. Considerable wealth was taken from the surface ores of this vein through the crude methods employed in the early times. This vein joins the main lode in the Los Castros property. The assays made from the vein indicate values of $25 to $30 per ton.

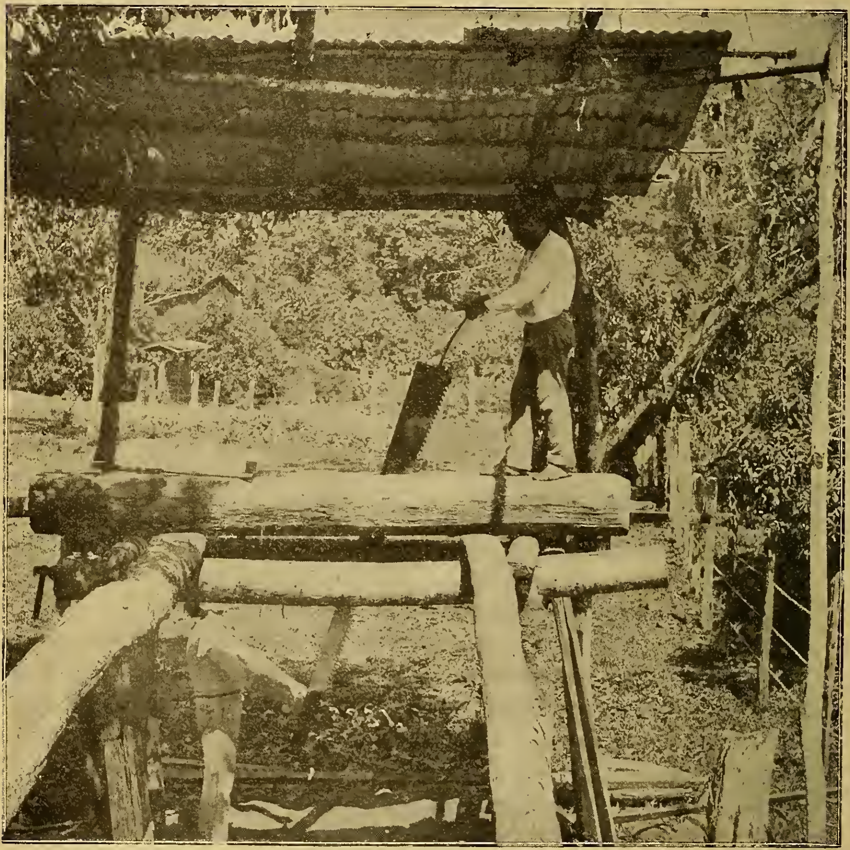
"*San Miguel.*—This was another early discovery denounced in 1826, and was profitably worked until after 1862. Assays made from these ores run from $15 to $70 per ton.

"Of the thirteen bonanzas discovered in this immediate district, five were found in the Aguacate mines—Guapinol, El Balsa, La Cigueña, El Fuego, and Don Eusebio.

"*Guapinol.*—This was one of the early discoveries, made in 1823. A native while resting in the shade of a guapinol tree noticed the peculiar appearance of the outcrop. He showed it to a man named Oreamunos, who panned it and found it rich in gold. The discoverer was dismissed with a small present, and Oreamunos, with his two brothers, denounced the property, calling it 'La Mina del Pilar,' after the holy virgin Pilar, the patroness of Zaragoagoza in Spain, although it has always borne the popular name Los Oreamunos. It is estimated by well-informed authorities that the Oreamunos family took from this bonanza the sum of $1,000,000.

"*El Balsa.*—This early discovery, which proved to be rich, was denounced as the Mina de San Rafael on the Oreamunos lode. In the year 1825 a lessee made a handsome fortune by treating the ore in an arrastra constructed on the Rio Grande, 10 miles distant, to which point the ore was transported in ox carts. It was at these works that he, with the permission of the Government, made the first Costa Rican gold coin. The assay office of the Swiss-American Bank of San Francisco, California, certified to assays made of ores from this bonanza of values ranging from $600 to $4,000.

"*La Cigueña.*—This superficial work yielded as much ore as El Balsa. The last work done there was in 1875. The sum of $21,000 is said to have been realized from 11 feet of ore taken from this place. The ore was treated at a place called La Union, on the Rio del Quebrada Honde, by an arrastra and a stamp mill of primitive pattern, the ruins of which may yet be seen. From the poorest kind of amalgamation they realized $84 per ton. That these ores were rich is indicated by tests I made from what remains of the old tailings dumps, which show the presence of free gold and amalgam, and values from $35 to $80 per ton.



Preparing mine timbers in Costa Rica.

"*El Fuego.*—This bonanza was discovered between the Guapinol and La Cigueña and, like them, was but a surface working. The proposition of draining this work was at the time of abandonment considered too great an undertaking. Authorities familiar with this mine estimated the ore then in sight to be at least 1,000 tons and valued at $300,000. One shipment of 52 tons, made by the Aguacate Company to the Royal Saxony Smelting Works, near Freiburg, Germany, in 1874, was bought on the basis of $181.27 gold and $21.03 silver per ton, a total value of $202.30 per ton.

"*Don Eusebio.*—This bonanza is a part of the San Rafael property. It was discovered while drifting a tunnel to reach El Balsa. A large quantity of rich ore was mined here. I have not ascertained the value of its production. Several drifts were made in this working which are of value, as they show the continuity of some important veins of the locality.

"Quite a number of shipments were made by the company in 1893 and 1894 from these various mines to London. The lots shipped ranged from half a ton to 30 tons. The lowest price received was £19 6s., or $95, per ton for a lot of 30 tons. One lot shipped in March, 1894, was bought at £1,900, or $9,500, per ton, ten times the value of lowest price.

"These were the last shipments made, and there has been no work of production since that time. The total output of the Aguacate mines has been estimated to exceed $5,500,000. That this is conservative is proved by the marked influence which the opening of these mines had upon the general industry of the country. Until that time the country was exceedingly poor and commerce hardly existed. The circulation of this money, however, facilitated the importation of foreign manufactures necessary to develop the agricultural and other resources of the country.

"*Sacra Familia mines.*—The scene of the first discovery in the Aguacate district, as before noted, was on the main lode of this important group, which is situated north and west of and adjoining the Aguacate properties. Numerous workings of a superficial nature are yet discernible where the lode has been attacked. No work of extent has been done in recent years. The last productive operations, as far as I can learn, were in 1884. For several years previous to this time a 10-stamp mill was operated during the wet season. Five tons was the maximum daily capacity. The ores milled were taken from workings known as Cardinilla, Potrero Alto, and Sobre Cañon de San Francisco, and were hauled to the mill by ox-cart. But a small percentage of the value was recovered in this mill, perhaps wholly due to improper management. I assayed some samples last November, taken from the old tailings dump, which gave values from $12 to $33 per ton gold. Crude and wasteful as were these operations, it is stated by a good authority that the saving was so great at times that it was considered necessary to clean the plates two or three times a day. Considering the quantity treated, such conditions are only conceivable when very rich ore is supplied.

"At another point on the Rio Quebrada Honde are the ruins of an arrastra and mill of ancient make. The date of operations here I have not learned. Some of these old remnants are interesting. The wooden parts have entirely decayed and washed away. An old shaft or two and some stamp heads, which evidently worked on wooden stems, remain to tell the story. I sampled and assayed some sands which I supposed were tailings of these old works which ran as high as $79 gold per ton. These ores probably came from the bonanzas found soon after the first discoveries, a number of the workings of which may yet be recognized, though in bad condition. It is conservatively estimated that these properties have produced upward of $1,000,000 American gold.

"Among interesting historical facts relative to these mines I learned that Mr. RICHARD TREVITHICK, the immortalized English inventor, who was then in Peru, upon hearing of the rich finds in Costa Rica, came to this district in 1824, and for about two years explored and worked some of the Sacra Familia mines. He became convinced of the opportunities presented there, sailed for England, and organized the Anglo-Costa Rica Mining Company, which worked the mines with limited capital and little success, attributed to bad management.

"Another interesting work was done by a Cornishman named PHILLIPS and a Costa Rican named MOYA, who worked some of these mines from 1837 to 1844. PHILLIPS is said to have located a very rich bonanza. He concealed the fact and tried to get title to the property, but the owners were made suspicious by his anxiety and refused to accept the propositions he made. He then completely obstructed the tunnel which lead to the deposit, a distance of perhaps 200 feet, filling it with the rock he had excavated, and caved in the entrance, leaving only such marks as he himself could recognize. He then left the country with the intent, it is thought, of returning with sufficient funds to acquire the mine. Nothing was known of his plans for many years, until some natives who assisted him in the work disclosed the secret. It was not until in November, 1901, that this old working was relocated, and it is now being reopened with much interest.

"*Los Castros.*—The first discoveries and denouncements in this group, which joins the Aguacate properties on the north and east, were made in 1822 by the brothers NICHOLAS and PIO CASTRO. The vein is a continuation and the same as the Oreamunos and San Rafael. The lode displays the characteristics of three subveins, called Veta Colorado, Veta Negra, and Veta Blanca. Samples taken from crosscuts of veins assay from $28 to $45. Several fortunes are said to have been taken from the surface workings of these mines, known as the bonanzas Don Ricardo, El Manto, El Pochote, Don Antonio Pinto, Lacre, Sequiera, and Don José Antonio Castro. The last named is said to have produced $15,000 in a single day.

"*El Porvenir.*—This mine is situated west of the Aguacate mines, on the Rio Machuca, a short distance north of San Mateo. The property has been sufficiently prospected to prove the existence of some attractive veins. The veins consist of the main ledge, which courses the center the full length of the property at an angle of about 30° east of north, and several subsidiary veins which unite with it. This mine has been the resource of many natives living in that vicinity for many years, who have worked the surface ores with molinettes and arrastras, nothing more modern having been attempted. It is known that they made good wages with the gold pan. One good authority told me of an instance when one ounce and a half of gold was obtained from a hat full of ore found in this mine. A bonanza was found some years ago in a working called Guatuso, from which it is estimated that $30,000 was realized by amalgamation in an arrastra. Assays I have made of samples taken in these old workings indicate that considerable rich ore remains yet in place. I made a great many assays from different places about this mine, ranging from $10 to $2,000 per ton, and believe that after sufficient development is done an abundant supply of ore, ranging from $15 to $25, can be obtained. A larger percentage of the values in these ores is free and amalgamatable, and the values remaining I believe can be recovered with cyanide.

Ross placer mine, near San José, Costa Rica.

"The natural conditions at this mine are especially favorable, affording ample power and convenient mill site near the entrance of the main tunnel, which will begin at the south end of the claim on the main ledge and at a low level. This tunnel with appurtenant upraises and crosscuts is now contracted, and the ore will be blocked out before a plant for treating the ore is constructed. This mine is the property of the Rio Grande Gold Mining Company.

"*Quebrada Honde mine.*—This property joins the claims of the Sacra Familia mines on the west, on the Rio Quebrada Honde, and is one of the oldest worked mines in the district. It is said that a great many men were employed here at one time working the ores in a series of arrastras on the river. There has been no production for many years, probably not since 1857. The property consists of three principal veins and numerous feeder veins. The deepest shaft in this district was sunk on this property and was less than 400 feet deep. Many of the old workings are now inaccessible.

"The mine is prettily located, and the site, which was at one time densely inhabited, is covered with large trees and other rank vegetation. There remains the ruins of molinettes, arrastras, and a 10-stamp mill of early pattern, the date of operation and production of which I have not learned. The ores treated by these crude methods are said to have yielded immense profits, and best authorities estimate that the mine has produced upward of $1,000,000. So far as a general removal of ore is concerned, the property is practically virgin. The principal veins vary in width from 3 to 20 feet, carrying values averaging $8 per ton and upwards.

"The production up to date of the mines of the Aguacate district is estimated to exceed $7,000,000 gold, and has probably reached the sum of $10,000,000. Considering that this sum has been produced by the crudest mining and metallurgical methods, the reward which would follow the proper application of capital sufficient to operate on a large and modern scale seems surmisable. All of the known ore bodies are so situated as to permit the development of the three principal groups of the district by one great tunnel with convenient drifts, the courses of which could be directed so as to cut the veins at great depth and give backs extending far below the deepest workings so far made, and who can know the new and possibly richer deposits such a work would disclose? The work done has been sufficient to prove the presence of many veins and deposits which warrant mining and treatment if but half of the values are recovered. There is no reason for a belief that these deposits do not continue to great depth, and the deepest workings indicate that they do. The ores become slightly refractory and the values in silver increase with the gold values constant as depth increases. It is believed that proper treatment will result in saving from 85 to 90 per cent of the values in these ores.

"MONTE DE ORO DISTRICT.

"*Trinidad mine.*—This property is owned by an English company, though Mr. Minor C. Keith, an American, is said to hold the majority of stock. The property includes some large veins of low-grade ore, $6 to $10 per ton. Operations were suspended about ten years ago, owing to the heavy loss in tailings. Plain amalgamation was used, with the result that two-thirds of the values were lost. No expensive experimental work has been done to properly test the ores, but it is believed that they will cyanide to at least 85 per cent. Some rumors have recently been afloat that Mr. Keith would soon reopen the mine at new and lower levels.

"*La Union.*—This property is owned by the Union Mining Company, of San Francisco. It has in the past been unsuccessfully worked. A 20-stamp mill was operated without a profitable recovery. No other treatment than amalgamation has been applied, with a consequent loss, it is stated, of about 60 per cent of the values, which averaged from $5 to $8 per ton. Three years ago a chlorination plant was constructed, but for some unaccountable reason a single charge was never chlorinated. Fifteen months ago a serious cave-in occurred, and for the following ten months the property remained idle. A recent effort to reopen the mine by two lessees seems to have been unsuccessful. At present the former superintendent, Mr. John W. Kerr, is reported to be operating the mill with a view to recovering the free gold from some of the better ore remaining in the stopes.

"*Macacona mine.*—This mine was worked about thirty years ago by a native company with small capital and inferior appliances. Nevertheless, it is recorded that good dividends were earned. The mine was operated through a shaft, and with depth the difficulty on account of water increased. The mine was closed down for some years. Several years ago the property was acquired by R. A. Crespi & Co., who have added a hoisting, pumping, and drilling plant with a view to the better development of the property. The pay portion of the ledge is narrow, but runs, it is stated, about $90 per ton. Treated on a large scale, the owners believe the entire vein will pay a good profit.

"*Thayer Mining and Milling Company.*—This company owns and operates the mines locally known as the Bella Vista and the Montezuma. They are situated near the village of Miramar, in the district of Puntarenas, about 15 miles from the Pacific port. These properties have been undergoing active development for the past six years. The ore bodies excavated and exposed during this time indicate an abundance of ore, ranging in value from $5 to $10 per ton. The situation here will permit mining large quantities of ore of this class above water level.

"The ore is being treated in two 20-stamp mills, where from 45 to 50 per cent of the values are obtained by amalgamation. The tailings from the plates are passed over Wilfley concentrators. The tailings from these and the concentrates are separately treated with cyanide, which, with the saving on the plates, gives a total saving of from 85 to 90 per cent. The present capacity is 100 tons per day. The company contemplates doubling this capacity during this year, which will materially increase the output with but a slight proportionate increase in operating expense. A waterway is being constructed to supply additional power for the enlarged plant, uniting part of the Rio Barranca with the Rio Rhin, which has up to this time furnished all the power used. According to recent reports from these mines, there is now sufficient ore blocked out to supply eighty stamps for at least two years.

"Statements made by able engineers from the United States who have examined these mines indicate a bright future, and warrant more extensive operation. Mr. A. F. Holden, of Cleveland, Ohio, says in his report: 'The development on the lower levels of the property indicates a permanency to the ore chutes and a strength to the veins that promise an attractive future for the whole property. The mining and milling advantages at the Thayer mines are excellent. I believe the cheap labor, the freedom from import duties on all mining materials, and the natural advantages of the location should reduce the cost of operation to the minimum.'

"Mr. Henry C. Holthoff, of Milwaukee, Wis., who examined the property, and Mr. E. C. Small, of Salt Lake City, a metallurgist of considerable experience, who spent six weeks at the mines, also made favorable reports.

"The present output of the Thayer Company's mines is from $8,000 to $10,000 American gold per month.

"THE MINES OF THE ABANGAREZ DISTRICT.

"This district is situated near the north end of the Gulf of Nicoya. It comprises about 150 square miles of mineral property. It is owned chiefly by the Abangarez Gold Fields, Limited; Las Cañas Syndicate; Guanacaste Syndicate, and R. A. Crespi & Co.

"*Albangarez Gold Fields, Limited.*—This company, owning 30 square miles of this district, has been prospecting and developing for the past four or five years. The country rock is generally porphyritic. The quartz occurs in a mass of porphyry, but it is possible in some instances that the lodes may prove to be contact veins between dike intrusions and the older rock. Some of the veins belong to the gash type, and the probabilities are that these will feather out at depth; others, again, are of great strength, notably the Tres Hermanos, a powerful vein of from 6 to 20 feet in width, and the Big Gilo, 6 to 12 feet in width. Such lodes may be classed as fissure veins, for their length and strength are such as to warrant the assumption that they penetrate to great depth. The ore of the Tres Hermanos veins assays $8 per ton and the Big Gilo $25 per ton. This information is given on the authority of the Messrs. John Taylor & Sons, of London, who examined these mines in 1897.

"Eleven distinct veins are now in process of development, and the company is erecting a 40-stamp mill of 900-pound stamps, with a 300-horsepower electrical transmission plant, which will be at work by August of this year. A development mill, which has been in operation for some time, is handling 500 tons per month, worth $17 per ton. By amalgamation and cyaniding 90 per cent of the values is being procured. The success upon which this company is apparently just entering is largely due or attributable, first, to the ability and persistence bestowed upon the early development of the properties by Mr. A. R. Crespi, and, second, to the skill of Mr. C. H. Colburn, the present engineer and manager.

Remains of old Arrastra at El Provenir.

"*Boston Mines Company.*—This subsidiary company to the Abangarez Gold Fields, Limited, is operating the Tres Amigos Mine, and is now erecting a 10-stamp heavy battery, with cyanide annex. A 3-stamp prospecting mill has been at work for the past twelve months on this property crushing ore averaging $30 per ton and extracting about 60 per cent by amalgamation.

"*Las Cañas Syndicate.*—This corporation owns 27 properties, one of which is a vein known as the Esperanza, which is 70 feet from wall to wall and carries an average of $10 per ton. There are several feeders or gash veins running into the main ledge carrying higher values. The ore is suitable for economic milling, and water power is practically unlimited.

"*Guanacaste Syndicate.*—This syndicate owns 30,000 acres of mineral land, which embraces some large ledges that are now being prospected and developed. Among others there are: The Gier vein, 60 feet wide, assaying $8 per ton; the Oracu small, $60 per ton. The ores are similar to those of the Abangarez Syndicate in character, and it is believed are adaptable to the same treatment—amalgamation and cyaniding. It is understood that this syndicate later proposes to form one or more companies for development and operating purposes.

"Las Cañas and Guanacaste Syndicate properties are controlled by Messrs. R. A. Crespi & Co. No machinery has as yet been erected, but these gentlemen have a force of prospectors and surveyors at work.

"Since the report of Messrs. Taylor & Sons was made several large veins have been located and are now being thoroughly prospected. The values held by the main or fissure ledges seem to be well maintained at depth. In the Abangarez property a vein carrying $24.72 per ton in its surface workings is found to carry $40 per ton at 300 feet below. The surface was recently opened.

"*Conclusion.*—The opinion is prevalent here among many of the best business men of the Republic that in the business of gold mining Costa Rica is about to put her best foot forward. Among mining men, those best informed believe that within ten or fifteen years the mining business will be the chief industry of the Republic. Other industries of the country upon which the mining business somewhat depends are progressing favorably.

"No reference can be made to many other promising mineral properties without lengthening this article beyond reasonable bounds of space."

CUBA.

TOBACCO GROWING UNDER CHEESE CLOTH.

Under date of July 30, 1902, United States Minister H. G. SQUIERS, of Havana, informs the Department of State of the United States of a change in the tariff law, admitting cheese cloth into Cuba free of duty, in order to promote the "covered cultivation" of tobacco. He says:

"Under the old law this duty on cheese cloth was from 15 to 50 cents per kilogram (2.046 pounds), according to the number of threads, and the amount imported has been approximately $15,000 worth per annum, a little more than one-half coming from the United States and the remainder from England."

Minister SQUIERS incloses a translation of the President's message to Congress recommending that cheese cloth be admitted free of duty and setting forth his reasons for such action. The message is as follows:

"Several important agriculturists from Vuelta Abajo district—men engaged in tobacco raising—have waited upon the Secretary of Agriculture, Industries, and Commerce urging assistance in the cultivation of this plant by the system known as 'covered cultivation.' The trials which have been made of this system up to the present time, although on a small scale, have been so satisfactory that the petitioners propose to use the same over a very great extent of land.

"This system gave Sumatra such a preponderance that the value of the wrappers now imported into the United States from that island has reached, according to the petitioners, the respectable sum of $22,000,000. This system consists in placing a fabric known as cheese cloth at a certain height in the form of an awning to prevent the sun rays from wounding the plant with their intensity and the winds from swaying and breaking its leaves; to keep the earth fresh and, above all, prevent (what occurs to-day) the insects attacking the plants. If the butterflies which propagate these insects can not gain access to the plant it will not be possible for them to deposit the small eggs which, by the well-known metamorphosis, are transformed first into larvæ and then into caterpillar chrysalis. For the aforesaid purpose it is desired to import from foreign countries, before the 1st of August next, the necessary quantity of this fabric, and it is requested, as assistance from the States, that it be exempted from payment of import duties. The Executive is of the opinion that everything which tends to bringing Cuban agriculture out of its state of prostration is worthy of attention.

"With the solution of the economic problem of the 'covered cultivation,' it would be an easy matter for the island of Cuba to supply the American market with the wide, clear, and long wrappers which are in such demand in the United States and where considerable sums are annually spent for Sumatra tobacco because it possesses the aforesaid qualities. In conformity with the foregoing, the Executive has the honor to lay before Congress for its consideration and such decision as it may deem proper, the advisability of declaring as exempted from the payment of import duties the fabric known as 'cheese cloth,' which may be received in this island for the purpose mentioned, provided, however, that to prevent any kind of abuse and fraud said concession may be granted under the following condition: That the importations be made direct by each agriculturist without the intervention of third parties; that the said agriculturist be obliged to show, within a reasonable time and at the custom-house through which the entry may have been made, that the fabric has been used in its entirety in the cultivation of tobacco, a certificate issued by the municipal mayor of the district in which each farm may be situated to constitute satisfactory evidence thereof."

QUARANTINE SERVICE.

The Department of State of the United States published recently the text of two executive decrees reorganizing the quarantine service from Cuba, which have been transmitted from Havana by United States Minister SQUIERS. The Cuban Government claims, it is stated, that there is a saving of about $80,000 per year in the cost of administration brought about by the readjustment. Hereafter the quarantine service is to be known as the marine health service. The chief of the service is to be appointed by the President on the recommendation of the Secretary of Government. The latter official will appoint all other officers and employees of the service.

The decrees (translated) read:

DECREE NO. 97.

"By virtue of the authority given me by the constitution, and in conformity with the recommendation of the Secretary of Government, I have decreed the following:

"ARTICLE I. The service now known as quarantine service of the island of Cuba shall be called in the future the maritime health service of the Republic of Cuba.

"ART. II. The said service shall be reorganized in the following manner:

Maritime health service of the Republic of Cuba.

Description.	Salaries and other expenses.	
	Monthly.	Annually.
PORT OF HAVANA.		
Personnel:		
One first doctor	[a]$200.00	$2,400.00
One second doctor	166.66	2,000.00
One third doctor	150.00	1,800.00
One assistant	100.00	1,200.00
Two sanitary guards (at $40 each)	80.00	960.00
Office:		
One chief clerk	100.00	1,200.00
One clerk	50.00	600.00
One servant	25.00	300.00
Total	871.66	10,460.00
Material:		
Printing and office supplies (island)	100.00	1,200.00
One telephone	6.00	72.00
Coal	120.00	1,440.00
Laundry	10.00	120.00
Repairs and vessel careening (once only)		200.00
Disinfectant and drugs	50.00	600.00
Flags for the service throughout the island	25.00	300.00
Total	311.00	3,932.00
Launch Security:		
One engineer	75.00	900.00
One master	70.00	840.00
One sailor	30.00	360.00
One fireman	30.00	360.00
Total	205.00	2,460.00

[a] Values are expressed in Cuban currency. At present exchange, 1 peso is equivalent to about 60 cents United States gold.

Maritime health service of the Republic of Cuba—Continued.

Description.	Salaries and other expenses.	
	Monthly.	Annually.
PORT OF HAVANA—continued.		
Launch Waldo:		
One engineer	$75.00	$900.00
One master	50.00	600.00
One sailor	30.00	360.00
Total	155.00	1,860.00
Quarantine station at Mariel:		
One steward	70.00	840.00
One carpenter	40.00	480.00
One night watchman	35.00	420.00
One boatman	30.00	360.00
Unforeseen expenditures	35.00	420.00
Total	210.00	2,520.00
Total for port of Havana	....	21,232.00
PORT OF VERACRUZ.		
Personnel:		
One doctor	150.00	1,800.00
One clerk	50.00	600.00
Total	200.00	2,400.00
Supplies:		
Installation of office	....	100.00
Journeys and investigations	70.00	840.00
Printing and office supplies	30.00	360.00
Total	100.00	1,300.00
Total for port of Veracruz	....	3,700.00
PORT OF MATANZAS.		
Personnel:		
One doctor	125.00	1,500.00
One clerk	50.00	600.00
One servant	20.00	240.00
Total	195.00	2,340.00
Steam launch and plant:		
One engineer	70.00	840.00
One master	50.00	600.00
Two sailors (at $30 each)	60.00	720.00
Total	180.00	2,160.00
Supplies:		
Coal	25.00	300.00
Repairs and maintenance	25.00	300.00
Total	50.00	600.00

Maritime health service of the Republic of Cuba—Continued.

FOREIGN INSURANCE COMPANIES.

Foreign insurance corporations are permitted to transact business in Cuba in accordance with the laws of the place of organization, in so far as their capacity to make contracts is concerned, and in accordance with the provisions of the code of commerce relating to the establishment of their houses, their business transactions, and the jurisdiction of the courts. The preliminary requirements are:

1. Registration in the commercial registry, which consists in filing in the said office a statement showing (*a*) the corporate name or title; (*b*) the nature of the business proposed to be conducted; (*c*) the date when it proposes to commence operations; (*d*) its domicile, i. e., location of its principal office and branches; (*e*) a certified and duly authenticated copy of the charter or certificate of incorporation and the by-laws, with a certificate of the Cuban Consul, if any, or due proof that the corporation is incorporated according to the laws of the place of its establishment; (*f*) the general powers of the agents in charge of the branch office.

2. A deposit in cash or securities, after approval by the Secretary of Finance, in the treasury of the island, according to the following schedule: Life-insurance companies, $25,000; casualty, $25,000. When this deposit is made and approved, the fact is officially pub-

lished and the company is duly authorized to do business and thereafter pays no further license fees for that purpose, provided that the capital stock is issued abroad, but is liable to general taxes based upon the amount and nature of the business transacted.

CUSTOMS DUTIES ON LIVE STOCK.

The Department of State of the United States received from United States Minister H. G. SQUIERS, of Havana, under date of July 17, 1902, a translation of a message sent by President PALMA to the Cuban Congress regarding changes in customs duties on live stock and on barbed wire, as follows:

REPUBLIC OF CUBA,
Executive Mansion.

CONGRESS:

So imperious is the necessity of reestablishing the raising of live stock, the most natural and certain of all the resources of this country, that the Executive believes—and without prejudice to the direct aid which he proposes to ask of Congress for its encouragement and development—that private initiative should be stimulated by all possible means, furnishing it a way to enable it to contribute, under favorable circumstances, to the same end.

To demonstrate this necessity and the incalculable benefit which providing for it would bring to the country, the following considerations are, in the opinion of the Executive, sufficient:

(1) Of the 900,000 caballerias (30,000,000 acres) of which the land comprising the territory of this island is composed, 500,000 caballerias (16,600,000 acres) are at present uncultivated, for which reason they produce nothing. They are, however, adapted to the raising of cattle, and in them at least 4,000,000 head could be splendidly cared for at the rate of 8 per caballeria (33⅓ acres);

(2) Some 300,000 head being on an average the number consumed in the island in one year, when Cuba succeeds by the restocking of her cattle farms in producing the same, their value—reasonably estimated at $30[a] per head—would amount to $9,000,000, a sum which would remain in the country instead of going to the foreign lands from which such cattle are now obtained, and this aside from the $2,000,000 approximate value of the jerked beef at present consumed, aside from the value of the hides, which can be estimated at $1,500,000, and aside from the amount derived from cattle which could be exported to other countries from the surplus of Cuban stock; and

(3) Of the 400,000 head received throughout the island during the year, 200,000 should be sent to pasture before being slaughtered, according to reports from authentic sources. As lean cattle, in the

---

[a] The present value of the Cuban dollar, or *peso*, is about 60 cents in United States currency.

six months' pasture which it requires to fatten, should, according to the estimates of competent persons, yield a profit of at least $10 to the cattleman for the greater weight obtained, it results that if these 200,000 head are brought in lean to be sent to pasture instead of coming in fattened for immediate slaughter, their fattening in this country would yield $2,000,000, which would be distributed among the cattlemen and planters; or, that is to say, by receiving them fattened the country would not enjoy this considerable profit, but it would go to increase the treasure of a few merchants and of the foreign raisers. However, while we are arriving at this longed-for result—that is, of producing in Cuba the number of cattle required for its consumption—it becomes indispensable to enact efficacious provisions directed not alone to the reproduction of this cattle, but to causing that which is received from the exterior, in the meanwhile, to yield a profit to the country before its slaughter, instead of obtaining it solely—as to-day happens in the majority of cases—with reference to fattened cattle. The Executive is consequently of the opinion that the thing to do is to amend the present customs tariffs to attain the end in view, as a principal means for stimulating private initiative in this matter; the customs tariffs in force to-day tending more to favor speculators than to protect the raising of cattle in Cuba. Under these tariffs (class 10, group 1) the duties paid on live stock on its importation into this island are the following:[a]

Paragraph 181.		
Horses and mares:		
(*a*) Those exceeding the established height	each	$10
(*b*) All others	do	5
Paragraph 182.		
She mules	each	5
Paragraph 183.		
Asses	each	5
Paragraph 184.		
Cattle.		
(*a*) Oxen	each	2
(*b*) Cows	do	2
(*c*) Young oxen and cows	do	2
(*d*) Calves	do	1

In conformity with the foregoing, the Executive has the honor to submit to the consideration of Congress, for the decision it may desire to adopt, the following bases:

The following scale shall govern the collection of tariff duties on cattle imported into this island at any one of the ports of Havana, Matanzas, Cardenas, Sagua la Grande, Nuevitas, Gibara, Cienfuegos,

---

[a] Paid in United States gold or its equivalent.

Tunas de Zaza, Santa Cruz del Sur, Manzanillo, and Santiago de Cuba, the only ones equipped for the purpose. The following will enter free of tariff duties:

(1) Cows fit for breeding and heifers.

(2) Cows with their young, on foot.

(3) Bulls of the Jersey, Guernsey, Devon, Durham, Hereford, Porto Rico, and Argentine Republic breeds, provided the importer duly accredits their origin. states at the time of importation the ranch or farm to which they are destined, and guarantees that they will remain on the farm stated for the period of one year, under penalty of payment of the following duties:

If guaranty is not given, each will be assessed		$15.00
Yearling calves	each	1.00
Fat cattle, male, from Florida, fat to be understood as not exceeding 550 pounds (253 kilos) in weight	each	5.50
Fat cattle, male, from Honduras, fat to be understood as not exceeding 600 pounds (276 kilos) in weight	each	6.00
Fat cattle, male, from Mexico, fat to be understood as not exceeding 700 pounds (322 kilos) in weight	each	7.00
Fat cattle, male, from Venezuela and Colombia, or countries other than those mentioned, fat to be understood as not exceeding 800 pounds (368 kilos) in weight	each	8.00
Lean cattle, or those weighing less than the above-mentioned weights, according to their origin	each	2.00

No lean cattle shall be slaughtered before at least three months after their landing. For this purpose they shall be branded on entry into the ports of the island with an iron or brand showing that they are for pasture. Before any cattle which may carry the mark referred to are slaughtered, it shall be proven, in the manner which may be provided, that they have been in pasture for the period of three months mentioned. The slaughter of cows is prohibited, excepting those which may be useless for breeding, this to be properly proven. No new tax over those at present established, which might affect the consumption of cattle, shall in any form or for any purpose be collected during the period of three years. The present tariff is likewise amended with regard to horses and mules and the following rules established:

Stallions exceeding the height established (150 centimeters—59 inches—measured by rule) and he asses shall enter free of duty.

Mares exceeding the aforesaid height will pay	each	$4
Same of less height	do	7
Geldings exceeding the aforesaid height	do	15
Same of less height	do	5
Mules exceeding the established height	do	10
Same of less height	do	5

For the period of one year barbed wire and staples used in the construction of fences will be exempted from the payment of tariff duties.

The decision which Congress may adopt as a law will not take effect before ten days after its publication. The Government will issue the orders and instructions necessary for the enforcement of what Congress may resolve, in case the preceding bases are approved.

THE PRESIDENT.

HAVANA, *June 21, 1902.*

THE RAILROADS OF THE REPUBLIC.

The entire railroad system of the island of Cuba, according to statistics published in the Panama "Star and Herald," is valued at $70,000,000. The total length of the 124 lines included in this estimate is 2,000 miles. Only seventeen of these lines are for general and public use, the remainder being built for the transportation of sugar cane to the grinding mills. A new line now in process of construction by Sir WILLIAM VAN HORNE and his associates of the Cuban Central Railway, connecting at Santa Clara with the line from Havana to Cienfuegos, will revolutionize the island's railroad system, open communication with Nipe, the best harbor on the whole Cuban coast line, and prepare for profitable cultivation an area estimated at 10,000,000 acres, or about one-third of the total area of the island. Nipe is only sixty hours from New York by fairly fast steaming. Trains from inland points connecting with the steamers which will touch there will bring down to the coast fresh vegetables, strawberries, and other small fruits.

The rates for railroad travel range from 12 cents a mile for first-class passengers to 5 cents for second-class transportation, and freight rates are correspondingly high.

ECONOMIC CONDITIONS.

An interesting mail report has been received at the Department of State of the United States from United States Minister SQUIERS, at Havana, dated August 30, which covers a variety of important happenings in the island of Cuba. The Minister states that the House of Representatives has passed a measure increasing the duty paid by coffee from $12.15 to $20 per 100 kilograms. The measure, he says, is intended for protection of the coffee growers of Santiago Province.

Cuba has been recognized by the Republic of Bolivia, communication to that effect having been received at Havana from the Bolivian Minister for Foreign Affairs. Autograph letters of recognition of the Cuban Republic have been received from the Emperor of Austria, the King of Greece, and the President of Brazil.

An important portion of the Minister's report is a statement showing the receipts and expenditures of the Cuban Government from August 1 to August 28, 1902. The receipts for this period are set down as $1,013,317.01, the expenditures as $1,240,446.42, deficit of $227,129.41.

On July 31, however, the amount on hand was $1,061,156.82, and that (left over) amount, together with the receipts during August, gives a balance of $834,027.41 in favor of the Cuban treasury.

Mr. Squiers states that the effort of the Cuban Government to have the Spanish Government officially take up the "Isabel coins" (fractional coins which are in circulation in Cuba) were futile. The Spanish Bank, however, he says, announced that the coins would be received from September 1 to 25, 1902, at a 3 per cent discount.

The Minister reports that the strike of the stevedores, lightermen, and draymen has been satisfactorily terminated through mutual concessions, and that the men are back at work.

REGISTRATION OF AMERICAN TRADE-MARKS AND PATENTS.

Legation of Cuba,
Washington, D. C., July 5, 1902.

Excellency: In pursuance of instructions from my Government, I have the honor to transmit to Your Excellency the communication addressed to the Department of State by the Department of Agriculture, Commerce, and Industry, under date of June 21 last, as follows:

"Sir: I have on this day directed the announcement of the following decision: The military government of the United States in this island having come to an end, and the circulars, Nos. 12 and 21, respectively, dated April 11 and June 1, 1899, issued by the Division of Customs and Insular Affairs of the War Department of Washington, in respect to the registration of American trade-marks and patents, having in consequence become void and null by virtue of their text itself, since these circulars were issued for the territories subject to the military government of the military forces of the United States, I have decided that patents and trade-marks of all description, printed matter, titles, and labels, duly registered in the Patent Office of the United States, for whose protection in this island application shall hereafter be made, from this date, by filing the same, shall be registered in the department of which I have charge, if admissible, upon observing the procedure followed for the registration of those of other countries, and upon the payment of $35 currency for patents and of $12.50 currency for trade-marks, prints, etc.; that is to say, the same fees as are paid by the other foreign and national marks and patents, in lieu of the 1 *peso*, currency, indicated with regard to the American, in said circular No. 21."

I avail myself of this opportunity, etc.

Gonzalo de Quesada.

Hon. John Hay,
Secretary of State of the United States.

COTTON GOODS TRADE.

Under date of August 12, 1902, United States Minister H. G. Squiers, of Havana, sends the following suggestions:

American manufacturers have either not studied or not heeded certain indispensable requirements to gain and retain the cotton-goods trade in Cuba. They rely mainly on the export commission houses in New York engaged in Spanish-American trade to secure business for them here. Once in a while they send one of their representatives to Cuba to work up trade, and he is generally one who does not speak Spanish, and must therefore transact his business through interpreters.

The following requirements are noted: Special and careful packing, giving exact and minute details of goods in the invoices or on a separate memorandum attached to invoices. This should specify marks and number of packages and gross and net weights. The net weight of each separate class of goods contained in a single case should be specified; how each is packed, whether without wrapper or with paper wrappers or pasteboard boxes, and the net weight with and without wrappers or pasteboards; the total number of pieces of each class or quality; the total number of yards; price per yard; width; whether white, crude, printed, or manufactured with dyed yarns, and whether mixed with wool, silk, or linen.

On the foregoing data depends the tariff classification; for this reason the statement is essential to the merchant here, as it remarkably facilitates his customs declarations.

European houses are liberal in the matter of credits, and it should be observed that failures are rare among the textile importers of Havana.

The British have the largest part of the cotton-goods trade. Spain and the United States are close rivals, Spain surpassing the United States in some lines, notably in knitted hosiery and underwear. Spain does a thrifty trade with Cuba in wines, of which the United States might secure a share for its Californian products if they were properly introduced. Spain also ships a considerable quantity of hams and sausages to this market. Too much importance can not be attached to labeling and advertising goods in the Spanish language, this being vital to their ready purchase and popularity.

DOMINICAN REPUBLIC.

TARIFF MODIFICATIONS.

Under date of June, 1902, the "International Customs Journal" publishes fourth supplement to No. 5 (second edition) of the tariff law of the Dominican Republic, as follows:

Law dated April 17, 1902, repealing the law of June 26, 1901, and modifying certain import duties.

["Gaceta Oficial," No. 1414, of April 19, 1902.]

ARTICLE 1. The law of June 26, 1901,[a] is repealed.

ART. 2. The duties applicable to the following products are doubled: Spirits, brandy, beer, liqueurs, and wines of all kinds.

ART. 3. The duties applicable to the following goods are modified as below:

Vermicelli or alimentary pastes	quintal	$4.00
Matches in boxes of 60 matches	gross	1.00
Petroleum	gallon	.15
Candles, stearine	quintal	8.00
Cotton tissues, white, madapolam, nankeen (blanquin), "bogotana," common, having in width:		
Up to 24–25 inches	yard	.05
Up to 30 inches	do	.06
Up to 36 inches	do	.07
Of a larger width (for every 5 inches 1 *centavo* additional).		
Cotton tissues, unbleached, or domestic cloth called liencillo, having in width:		
Up to 24–25 inches	yard	.05
Up to 30 inches	do	.06
Up to 36 inches	do	.07
Of a larger width (for every 5 inches 1 *centavo* additional).		
Cotton tissues, unbleached, with weft (tremado), having in width:		
Up to 24–25 inches	do	.06
Up to 30 inches	do	.07
Up to 36 inches	do	.08
Hempen sandals (alpargatas)	dozen	1.50
Buttons of bone, wood, or composition	gross	1.00
Buttons of porcelain, small, for shirts	large gross	.75
Buttons of mother-of-pearl, average or large	do	3.00
Pipes of faience, wood, or porcelain	dozen	1.00
Knives, hunting, pointed or not, assorted	do	1.00
Drills, American, blue or other colors, called denims, Pearl River, and similar, Amoskeag and similar tissues of 30 inches in width	yard	.10
Drills, cotton, white or colored, up to 30 inches in width	do	.10
Lawns, cotton, white or colored, called Victoria and Obispo, fine	do	.10
Half fine	do	.06
Common	do	.04

---

[a] See second supplement to No. 5 (second edition), II.

Thread:		
On bobbins of 300 yards	gross	$3.00
On bobbins of 200 yards	do	2.00
On bobbins of 100 yards	do	1.50
Striped cotton tissues measuring in width:		
Up to 24–25 inches	yard	.06
Up to 30 inches	do	.07
Up to 36 inches	do	.08
Cambric muslin, colored, common, called prusiana, measuring in width:		
Up to 24–25 inches	yard	.06
Up to 28–29 inches	do	.07
Up to 31–32 inches	do	.08
Up to 35–36 inches	do	.09
Muslin of cotton, common, measuring in width:		
Up to 24–25 inches	do	.06
Up to 28–29 inches	do	.07
Up to 31–32 inches	do	.08
Up to 35–36 inches	do	.09
Hats of felt or cloth:		
Fine	dozen	12.00
Half fine	do	8.00
Common	do	5.00

Children's hats shall pay half the duty according to kind.

ART. 4. Cod-liver oil and preparations thereof are to be admitted free of duty.

ART. 5. The following articles shall pay a fixed rate of duty:

Rice	quintal	$1.00
Condensed milk	do	5.00
Common soap	do	.55

ART. 6. This law, transmitted to the Executive power in accordance with the Constitution, shall be applicable thirty days after the date of its publication in the case of imports from Europe, and twenty days after such publication as to goods of other origin.

COMMERCE AND PRODUCTION IN 1901.

According to a recent report of the Belgian Consul at Santo Domingo, the imports of various merchandise into this Republic amounted in 1901 to 2,986,921 *pesos*, while the exports of the products of the country reached a value of 5,224,043 *pesos*.

These figures are distributed as follows among the various ports of the Republic:

Ports.	Imports.	Exports.	Ports.	Imports.	Exports.
	Pesos.	*Pesos.*		*Pesos.*	*Pesos.*
Santo Domingo	747,883	686,475	Azua	84,775	344,898
San P. de Macoris	658,933	1,901,022	Barahona	6,567	32,430
Puerto Plata	851,665	1,190,164	Monte Cristi	75,068	107,174
Samaná	95,591	142,166			
Sanchez	466,439	819,714	Total	2,986,921	5,224,043

The principal products exported were the following: Sugar (100,084,850 pounds); cacao (11,001,800 pounds); coffee (381,450 pounds); tobacco (11,252,800 pounds); wax (289,200 pounds); dividivi (4,460,600 pounds); campeachy wood (4,678,150 pounds); guayacan wood (13,460,000 pounds); mora wood (350,300 pounds); mahogany (296,700 feet); espinillo wood (56,100 feet); cedar wood (74,243 feet); bera wood (80,900 feet); oxhides (221,000 pieces); goatskins (7,281 dozens); ox horns (61,325 pounds); honey (340,250 gallons); orange peel (2,750 pounds); oxen (111,800 head).

The customs receipts for 1901 reached the total amount of 1,876,145 *pesos.*

The agricultural production advanced but little in 1901 and the export figures show a certain decrease, owing probably to the fall in price of certain products on the foreign markets.

In view of the bad results obtained in recent years, many planters are considering the advisability of undertaking other cultures giving greater profits, such as, for example, cabuya, maguey, and cotton. In the district of Monte Cristi machinery for the decortication of cabuya and maguey has already been put in place, and it is expected that this enterprise will give very good results. In the district of Barahona the cultivation of coffee is being commenced on a large scale, and some capitalists are also intending to establish large coffee plantations in this part of the Republic. The purchase of improved machinery for cleaning and preparing coffee, so as to obtain higher prices than those now quoted for certain Dominican coffees, is also under consideration.

Various railroad concessions were granted in the Republic of Santo Domingo in 1901. The concessionnaires of the line from Moca to La Vega have obtained an extension of the time within which they were to begin work.

The municipality of Seybo, which had obtained the authorization to build a railroad from this locality to La Romana, has transferred its concession to a foreign capitalist, who has already begun work. Congress recently granted the concession for the construction of a railroad from Santo Domingo to San Cristobal with permission to extend it toward Bani and the port of Las Calderas. Work on this line has also been begun.

Another concession has also been granted for the construction of a railroad in the district of Monte Cristi. These various lines will, in all probability, contribute greatly to the economic development of the districts which they cross and where agriculture is now being neglected on account of the lack of means of communication.

It is also to be remarked that Congress has decreed that 30 per cent of the port dues at Romana will be used for encouraging immigration into the country.

GUATEMALA.

CONVENTION BETWEEN THE UNITED STATES AND GUATEMALA RELATING TO THE TENURE AND DISPOSITION OF REAL AND PERSONAL PROPERTY.

Signed at Guatemala August 27, 1901.

Ratifications exchanged at Guatemala September 16, 1902.

The United States of America and the Republic of Guatemala, desiring to improve the condition of the citizens of each of the respective countries in relation to the tenure and disposition of real and personal property situated or being within the territories of the other, as well as to authorize the representation of deceased persons by the consuls of their respective nations in the settlement of estates, have resolved to conclude a convention for those purposes, and have named as their plenipotentiaries:

The President of the United States of America, the Honorable W. Godfrey Hunter, Envoy Extraordinary and Minister Plenipotentiary of the United States of America in Guatemala; and

The President of Guatemala, the Licentiate Juan Barrios M., Secretary of State in the Department of Foreign Affairs,

Who, having exchanged their said full powers, found in due and proper form, have agreed to and signed the following articles:

Article I.

Where on the death of any person holding real property (or property not personal), within the territories of one of the contracting parties, such real property would, by the laws of the land, pass to a citizen of the other, were he not disqualified by the laws of the country where such real property is situated, such citizen shall be allowed a term of three years in which to sell the same, this term to be reasonably prolonged if circumstances render it necessary, and to withdraw the proceeds thereof, without restraint or interference, and exempt from any succession, probate, or administrative duties or charges other than those which may be imposed in like cases upon the citizens of the country from which said proceeds may be drawn.

Article II.

The citizens of each of the contracting parties shall have full power to dispose of their personal property within the territories of the other, by testament, donation, or otherwise; and their heirs, legatees, and donees, being citizens of the other contracting party, whether resident or nonresident, shall succeed to their said personal property, and may take possession thereof, either by themselves or by others acting for them, and dispose of the same at their pleasure, paying such duties only as the citizens of the country where the property lies shall be liable to pay in like cases.

Article III.

In case of the death of any citizen of the United States of America in Guatemala, or any citizen of Guatemala in the United States, without having in the country of his decease any known heirs or testamentary executors by him appointed, the competent local authorities shall at once inform the nearest consular officer of the Nation to which the deceased person belonged of the circumstance, in order that the necessary information may be immediately forwarded to persons interested.

The said consular officer shall have the right to appear personally or by delegate in all proceedings on behalf of the absent heirs or creditors, until they are otherwise represented.

Article IV.

The present convention shall come into effect ten days after the day upon which the ratifications are exchanged, and shall remain in force for ten years after such exchange. In case neither of the contracting parties shall have given notice to the other twelve months before the expiration of the said period of ten years of the intention to terminate the present convention, it shall remain in force until the expiration of one year from the day on which either of the high contracting parties shall have given such notice.

Article V.

The present convention shall be duly ratified by the President of the United States by and with the approval of the Senate thereof, and by the President of Guatemala by and with the approval of the National Legislative Assembly thereof, and the ratifications shall be exchanged in Washington or in Guatemala.

In faith whereof we, the respective plenipotentiaries, have signed this treaty and have hereunto affixed our seals.

Done in duplicate at Guatemala this twenty-seventh day of August, one thousand nine hundred and one.

W. Godfrey Hunter. [seal.]

TARIFF MODIFICATIONS.

The decree dated April 25, 1902, and published by the "International Customs Journal" as fifteenth supplement, No. 109, modifies the customs tariff of Guatemala as follows.

Decree dated April 25, 1902, establishing surtaxes and exemptions on importation of certain goods.

[El Guatemalteco of May 3, 1902.]

Article 1. During a period of five years from May 1 next, the finance offices will collect the following surtaxes:

1. Ten *centavos* per bottle of brandy of legal capacity and strength on clearance from warehouse for consumption.

* * * * * * *

3. Twenty per cent on the duties applicable on importation of wines, beers, and liqueurs of foreign origin.

* * * * * * *

5. Ten per cent, payable in gold, on import duties applicable to raw or manufactured tobacco of foreign origin.

* * * * * * *

Art. 8. During a period of two years importation of the following articles will be exempt from all fiscal or municipal taxes: Tar and carboline; galvanized-iron pipes; wooden or iron houses, complete or not; Roman cement; galvanized-iron sheets for roofing purposes; iron and wooden posts and their accessories; wooden and iron doors and windows; white paints ground in oil, and roofing tiles of any material.

AGRICULTURAL DEVELOPMENT.

According to a report by His Majesty's Consul at Guatemala for the year 1901, the Government report issued by the Agricultural Board of Guatemala states that considerable progress has been made in the acclimatization and cultivation of various new products in the Republic. To this end there have been imported from abroad the seeds of cotton and tobacco, maize from Chalco and Tezcoco, Australian oak and other timber. The seeds have been distributed among the agriculturists of the different zones so that experiments might be made. The Agricultural Board has had leaflets drawn up on such products as are new to the country and distributed among all agricultural classes, so that the most modern and scientific rules as to planting, etc., might be observed when making experiments.

There has been a great impulse given to the production of such grains and vegetables as are largely consumed in the country, and increasing attention is being paid to the cultivation of maize, beans, potatoes, and wheat, for all of which remunerative prices have been obtained. Vegetable and dairy farms are proving profitable in the high-lying districts and in the neighborhood of the larger towns, and many small proprietors are turning their attention to such industries.

THE PORTS OF THE REPUBLIC.

The first statistics concerning shipping at the various Guatemalan ports were published in 1899, it being demonstrated therein that the port of San Jose, on the Pacific coast, is by far the most important in the commercial life of the Republic. In 1900 the entries at this port numbered 249, the number of passengers landed being 2,665, while the number of bales or packages unloaded is quoted as reaching a total of 248,296.

Puerto Barrios, on the Atlantic coast, comes second in importance, not on account of the volume of its trade so much as on account of its being the port for the arrival and departure of the European mails and the quickest route to the United States. It is also the terminus of the Northern Railway, which is to join the Central Railway at some future time, and thus connect the Atlantic and Pacific coasts. It is also the center of the Guatemala banana export trade. For all general purposes the two ports of Puerto Barrios and Livingston may be considered as one, as they lie very close together, and are connected by a service of small steamers.

SCHEDULE OF CONSULAR FEES.

On and after November 1, 1902, according to the terms of an Executive decree dated September 1 last, and published in "El Guatemalteco" of September 6, Consuls of the Republic of Guatemala will charge consular fees in conformity with the following schedule:

For certifying invoices the values of which do not exceed $100	$3.50
For certifying invoices of more than $100 and less than $500	5.00
For certifying invoices of more than $500 and less than $1,000	7.00
For certifying invoices of more than $1,000 and less than $3,000	8.00
For certifying invoices of more than $3,000 and less than $6,000	10.00

For certifying invoices in excess of $6,000 a fee of $10 will be collected, together with an additional charge of $1 for each $1,000 in excess of the $6,000 mentioned.

The foregoing schedule takes the place of that established by article 69 of the Consular Regulations now in force.

HONDURAS.

TARIFF MODIFICATIONS.

In June, 1902, the "International Customs Journal" published the following modification of the tariff law of Honduras as first supplement to No. 81:

I. Decree of March 5, 1902, establishing the régime applicable to printing paper.

[La Gaceta, No. 2166, of March 22, 1902.]

ARTICLE 1. Printing paper imported direct by printing-office proprietors or by newspaper editors shall be exempt from fiscal duty of every description, as established in virtue of article 3 of the Press Law.

Art. 2. Printing-office proprietors and newspaper editors shall present to the Minister of Finance or customs administrators the original invoices, and on production of this evidence the duty-free import permits shall be issued to them.

II. Decree of March 5, 1902, establishing the régime applicable to galvanized-iron plates and pipes and also to rain-water tanks of iron and wood.

[La Gaceta, No. 2168, of March 31, 1902.]

Sole article. Importation through the ports of the Republic of galvanized-iron plates and pipes and also rain-water tanks of iron or wood' shall be exempt from fiscal and municipal duties of every description during a period of five years.

Articles imported in virtue of the present decree shall not be liable to warehouse rent during one month from date of landing.

III. Decree of March 1, 1902, relative to the importation of alcohol.

[La Gaceta No. 2168, of March 31, 1902.]

Article 1. No. 60 of the customs tariff shall read as follows:

"There shall be charged 2 pesos for every half kilogram of imported alcohol. Proprietors of pharmacies may import each year 30 gallons of alcohol for exclusive use of their establishment, and this alcohol shall be charged as medicine, if found chemically pure."

Art. 2. If they import more than 30 gallons they shall pay 2 pesos for every half kilogram in excess of said quantity.

Art. 3. In order to benefit of the régime referred to, the proprietors of pharmacies shall apply to the minister of finance and substantiate their application by producing the corresponding invoices for the alcohol to be imported.

BANANA PRODUCTION.

During the month of July, 180,000 bunches of bananas were shipped from this consular district to New Orleans and Mobile.

In addition, some 100,000 bunches were paid for and destroyed by the contractors, which, together with the fruit lost by noncontractors for lack of a purchaser, would make over 300,000 bunches of bananas produced in one month in the Department of the Cortés.

The payment for and destruction of fruit here leads to the belief that there is now an overproduction, though it is alleged that the contractors' wish was to limit the importations into the United States and thereby keep up prices.

Taking into consideration the new plantations which will come into production next year, the month of July, 1903, should show an exportation of 500,000 bunches of bananas from this district—that is, if purchasers can be secured for all the fruit grown.

INDUSTRIAL COMPANY AT CEIBA.

United States manufacturers of electric supplies and of material for waterworks may find an opening to sell their goods to the industrial company recently organized at Ceiba. The capital of this company (about $10,000) is entirely paid in, and as much more money as may be necessary will, it is said, be subscribed.

BANK OF HONDURAS.

The balance of the Bank of Honduras, at Tegucigalpa, corresponding to the first half of 1902, shows that the capital of that institution was, on June 30 last, 600,000 *pesos*. The gross profits of the bank during the half year mentioned were $40,823.06 silver, the expenses being $12,011.99 silver, which leaves a net profit of $28,811.07 silver. The bank had on hand at that time $130,297.17 silver coin, and bank bills in circulation to the amount of 60,242 *pesos*. The total operations of the bank during the six months referred to were $1,219,081 silver.

MEXICO.

MESSAGE OF PRESIDENT DIAZ.

On September 16, 1902, President DIAZ inaugurated the first period of sessions of the Twenty-first Congress of the United Mexican States, at which time he delivered an interesting message, an extract of which is as follows:

"Our relations with all civilized nations are, without exception, those of peace and harmony, and those which we cultivate with some foreign governments, through the instrumentality of diplomatic representatives, may be characterized as particularly cordial.

"The first contentious international case, in which the contending parties are Mexico and the United States of America, has by mutual consent just been submitted to the permanent abitration court instituted at The Hague by virtue of the conference called, and justly called, the Peace Conference. The case in question grows out of a claim presented by the Catholic Church of Upper California against the Mexican Republic and upheld by the Government of the United States, looking to the payment of interest on a fund which was created in the colonial epoch for the benefit of the missions in that former portion of our territory.

"Originally the fund in question was intrusted to the Jesuits for their California missions, but, as a consequence of the royal order which expelled the Jesuits from Spanish territory in 1768, the property constituting the fund passed to the Crown of Spain, which intrusted its administration to a royal commission in whose hands it was at the time when our independence was consummated.

"The National Government continued to administer the fund, which was destined for the reduction of the barbarous Indians and their conversion to Christianity, and though in 1836 it caused the fund to be placed at the disposal of the bishop of California to be administered by him, that arrangement was canceled by decree of February 8, 1842, and the administration of the fund reverted to the Mexican Government to be employed by that Government in such form and manner as it might determine compatibly with the original intention of the founders.

"When, in 1848, Upper California was segregated from the Mexican Federation, the Mexican Government, taking its stand principally on article 14 of the peace treaty with the United States, concluded in that same year, which pronounced as ended and canceled all debts and claims which citizens of the United States might allege against Mexico, considered itself released from all liability toward the representatives of the church in California, who, if they believed they had any claim to urge, ought to have urged it against the government to which the sovereignty of Upper California, with all its correlative rights and obligations, had passed.

"Not convinced by the considerations to which I have alluded, the church in question, notwithstanding its lack of competency, went before the joint claims commission which was held at Washington under the convention of July 4, 1868, demanding payment of interest up to the date of the claim. Owing to a lack of agreement between the commissioners the case was submitted to the arbiter or referee, who, believing he had found grounds for such action, sentenced us to pay a certain sum.

"The Mexican Government, notwithstanding that it considered the sentence unjust, paid the interest assessed against it.

"On the strength of that decision the California church has since claimed that the Republic ought to continue paying interest on the fund and its claims were presented through the diplomatic channel. After an exchange of notes between the representative of the United States and the minister of foreign relations and seeing that no agreement was reached (we on our side maintaining that the arbitral decision of 1875 did not include subsequent interest and that there is no ground for claiming that interest or for regarding the principal itself as still subsistent), it was decided, with that spirit of conciliatoriness which befits friendly nations, to submit the case to the Hague court for adjudication. With this end in view a protocol binding both parties was signed at Washington on May 22 last, fixing the basis for the action of the court, and that protocol, as you will remember, received the approval of the Mexican senate.

"I have to add that, in accordance with the stipulations of the agreement in question, both Governments in due course appointed their respective arbitrators, who met on the 1st instant at The Hague, and the arbitrators in turn appointed a fifth arbitrator or referee to decide in case of disagreement.

"The Mexican Government confides in the acknowledged integrity and high character of the juries who constitute the respected tribunal and once more engages itself to comply with the definite sentence uttered in this matter.

"As you are well aware, the Government of the new Republic of Cuba was inaugurated on May 20 last. The proximity of the island and the natural feelings of fellowship which we have always entertained toward it, led the Executive to recognize immediately the new political régime organized there and to establish in the new Republic a legation at the head of which was placed a person of proven merit.

"Our relations with the several republics of South America having been amplified as a natural consequence of the conference recently held here, it has been deemed expedient to enlarge the diplomatic representation of Mexico in those nations. With that end in view, one legation has been accredited to the republics situated on the Atlantic coast and another to those situated on the Pacific coast.

"A medical commission sent, after due permission had been sought, by the Government of the United States, is at present at Veracruz for the purpose of continuing the studies begun last year at Havana with regard to yellow fever and its origin.

"As a consequence of one of the resolutions approved by the Second International American Conference, which assembled in the City of Mexico last year, the Government of the United States has convoked the First International Sanitary Conference, which will meet in Washington in December next. The Executive will in due time appoint the delegates who are to represent Mexico in that convention, of which the principal object is to study port and frontier quarantines and the sanitation of maritime cities, in order to avoid the propagation of epidemic diseases.

"During this year and the beginning of next international congresses will be held both in the United States and Europe, in which Mexico will figure, especially in the Congress of Americanists to be held next month at New York, and of which the vestiges of our ancient civilizations will constitute one of the chief themes. A commission of learned men has already been appointed, who will present papers deserving the full attention of that noted assembly.

"The mining industry continues to develop in a conspicuous manner, as is demonstrated by the 1,770 title deeds issued during the last half year, covering an area of 31,500 hectares. Of these title deeds 1,583 appertain to the precious metals and 187 to common metals.

"Contracts have been entered into for the establishment of metallurgical works in the States of Sonora and San Luis Potosi.

"Permits have been issued to bore for oil in the Federal district, the territory of Lower California and the States of Oaxaca and Yucatan.

"During the brief period embraced by this report the increase in the extent of our railways in kilometers was 405, whereof 143 kilometers have to be credited to the Veracruz and Pacific and the remainder to the other national railway lines. The total length of the latter is 15,169 kilometers, which, with 1,966 kilometers of railways in the States and 307 kilometers of private branches, give a grand total of 17,442 kilometers.

"On the National Railway of the Isthmus of Tehuantepec the ties have been renewed on 190 kilometers and the ballasting on 130 kilometers, the permanent bridges at Jumuapa, Sarabia, and Tehuantepec have been erected; the passenger station at Salina Cruz, the shops at Rincon Antonio, the power station, the machine shops, and 115 dwellings for employees, artisans, and peons have been completed. Moreover, 12 Baldwin locomotives, 60 box cars, 75 gondolas, 25 flat cars, and 5 coaches for passengers, mail, and express have been added to the rolling stock.

"On the Mexican National Railway work has been commenced in shortening the main line and changing it over to the standard gauge.

"The Coahuila and Pacific has completed its line from Saltillo to Torreon and opened it for business.

"On the road from Tula to Ciudad Victoria the various sections under construction have been connected, and the wagon road of the Sierra Victoria is now continuous, only a small section remaining to be finished off."

FOREIGN TRADE IN 1902.

The latest statistics of the foreign trade of the Republic of Mexico for the fiscal year ending June 30, 1902, give a total import valuation of $51,448,343.74 gold as compared with $53,123,953.39 in 1901. There was thus a decrease of $1,675,699.65 in 1902 as compared with the preceding year.

The exports of Mexican produce during the year amounted in value to $138,454,435.30 Mexican currency, as against $132,454,680.73 in 1901, an advance of $5,999,804.57 being thus shown.

At the average rate of exchange in the fiscal year 1900–1901 the imports of that year, $53,123,953.39 in gold, represent $108,209,830.08 in Mexican silver currency, while the decreased imports of 1901–2, $51,448,343.74 in gold, at the average rate of exchange for the latter year, represent $115,980,991.85 in Mexican silver currency. The balance of trade for 1902 is thus shown to have amounted to $22,473,443.45 silver in favor of the Republic as compared with a trade balance of $24,244,850.65 silver for the preceding year.

NEW FOOD PLANTS IN YUCATAN.

The United States Consul, EDWARD H. THOMPSON, at Progreso, gives an interesting report on new food plants in Yucatan, in which he says the arbitrators in turn appointed a fifth arbitrator or referee to decide in case of disagreement.

"The Mexican Government confides in the acknowledged integrity and high character of the juries who constitute the respected tribunal and once more engages itself to comply with the definite sentence uttered in this matter.

"As you are well aware, the Government of the new Republic of Cuba was inaugurated on May 20 last. The proximity of the island and the natural feelings of fellowship which we have always entertained toward it, led the Executive to recognize immediately the new political régime organized there and to establish in the new Republic a legation at the head of which was placed a person of proven merit.

"Our relations with the several republics of South America having been amplified as a natural consequence of the conference recently held here, it has been deemed expedient to enlarge the diplomatic representation of Mexico in those nations. With that end in view, one legation has been accredited to the republics situated on the Atlantic coast and another to those situated on the Pacific coast.

"A medical commission sent, after due permission had been sought, by the Government of the United States, is at present at Veracruz for the purpose of continuing the studies begun last year at Havana with regard to yellow fever and its origin.

"As a consequence of one of the resolutions approved by the Second International American Conference, which assembled in the City of Mexico last year, the Government of the United States has convoked the First International Sanitary Conference, which will meet in Washington in December next. The Executive will in due time appoint the delegates who are to represent Mexico in that convention, of which the principal object is to study port and frontier quarantines and the sanitation of maritime cities, in order to avoid the propagation of epidemic diseases.

"During this year and the beginning of next international congresses will be held both in the United States and Europe, in which Mexico will figure, especially in the Congress of Americanists to be held next month at New York, and of which the vestiges of our ancient civilizations will constitute one of the chief themes. A commission of learned men has already been appointed, who will present papers deserving the full attention of that noted assembly.

"The mining industry continues to develop in a conspicuous manner, as is demonstrated by the 1,770 title deeds issued during the last half year, covering an area of 31,500 hectares. Of these title deeds 1,583 appertain to the precious metals and 187 to common metals.

"Contracts have been entered into for the establishment of metallurgical works in the States of Sonora and San Luis Potosi.

"The Coahuila and Pacific has completed its line from Saltillo to Torreon and opened it for business.

"On the road from Tula to Ciudad Victoria the various sections under construction have been connected, and the wagon road of the Sierra Victoria is now continuous, only a small section remaining to be finished off."

FOREIGN TRADE IN 1902.

The latest statistics of the foreign trade of the Republic of Mexico for the fiscal year ending June 30, 1902, give a total import valuation of $51,448,343.74 gold as compared with $53,123,953.39 in 1901. There was thus a decrease of $1,675,699.65 in 1902 as compared with the preceding year.

The exports of Mexican produce during the year amounted in value to $138,454,435.30 Mexican currency, as against $132,454,680.73 in 1901, an advance of $5,999,804.57 being thus shown.

At the average rate of exchange in the fiscal year 1900–1901 the imports of that year, $53,123,953.39 in gold, represent $108,209,830.08 in Mexican silver currency, while the decreased imports of 1901–2, $51,448,343.74 in gold, at the average rate of exchange for the latter year, represent $115,980,991.85 in Mexican silver currency. The balance of trade for 1902 is thus shown to have amounted to $22,473,443.45 silver in favor of the Republic as compared with a trade balance of $24,244,850.65 silver for the preceding year.

NEW FOOD PLANTS IN YUCATAN.

The United States Consul, EDWARD H. THOMPSON, at Progreso, gives an interesting report on new food plants in Yucatan, in which he says that the gardens and fields of Yucatan are filled with succulent vegetables and odorous herbs unknown to the outer world. In the cultivated fields, at the proper seasons, are grown classes of Indian corn, brans, squashes, and tubers for which there is no other name than the local, for the reason that they are not known in this country.

The forests and jungles contain fruits that, excellent in their wild state, could be made delicious by scientific care and cultivation. There are half a score of wild fruits that offer more promising results than did the bitter wild almond, the progenitor of the peach.

The most important of the large cereals is the maize of the Mexicans, the Indian corn of the Americans, and the *ixim* of the Mayas of Yucatan. Like several other vegetable products, its origin as a cultivated plant is enveloped in obscurity, the wild plant from which it was evolved not yet having been identified. The mother plant was probably a grass, and the new grain spread to all sections, each one giving it certain characteristics until the varieties grown in the north hardly seem related to those of the southern lands.

Yucatan has six varieties of this grain, and the Maya Indian reverently speaks of it as the "grace of God."

The large-stalked, large-grained class, known to the natives as xnuc nal (pronounced shnook nál), is the most prominent and has by far the greater acreage devoted to its cultivation on the peninsula (Yucatan). It is planted in May, is fully matured in January, and then is left to harden and season until gathered as needed. This class most nearly resembles our Indian corn. It has both the white and yellow grains. Under the haphazard methods of the native Indians, the corn produces in the limestone soil of Yucatan from 20 to 30 bushels to the acre. Under favorable conditions this yield is often doubled.

The "xmehenal" (shmehenál) is a small, quick-growing variety, about the size of pop corn. The plants are rarely 4 feet high, and the natives have a saying that the cock can pick the flowers of true xmehenal without stepping off the ground. One variety matures within sixty days of its planting, and the second needs but fifteen days more.

The xmehenal xtup (shtoop), planted in May, can be gathered in July, and while the production per acre does not quite reach the figures of the xnuc nal, it has greater capacity of resisting the extremes of heat and dryness.

The natives of Yucatan prefer the native corn to that imported from the United States, and will cheerfully pay the higher price demanded in times of scarcity. They state that the method of kiln drying in this country injures the grain. They allow the grain to harden and dry slowly in the ear upon the stalk.

The plant, or rather the running vine, known as the macal box (makal bosh), produces a tuberous root of great nutritive value. Entire families have lived upon this root for weeks at a time and were healthy and well nourished. This plant is very productive. About the middle of May the green shoots first appear above the earth. They grow rapidly and in November are ready to be dug. The tuber is about the size of a large Irish potato and is of a purplish color, like a certain class of sweet potato. It can be cooked in the same way as the sweet potato. The plant is hardy. A long drought may cause the vine to wither, but with the slightest rain it springs up anew. The roots left in the ground as too small for food propagate the plant, and each year the yield increases. It seems to be a kind of native yam; it grows in almost any kind of moderately rich soil, and when cultivated intelligently should be of certain value as a food plant. The xmakin macal (shmakeén makál), like the macal box, appears in May and is gathered in November, but it yields only one or two tubers to the plant. These, however, are of large size, resembling enormous Irish potatoes. The interior is white and seems to be nearly pure starch. It is planted in the same way as potatoes. The plants grow close together, and the yield per acre should be phenomenal, so far as weight of product is concerned.

Xmehen chi-can (shmehen chi kan) seems to be a kind of artichoke, weighing when mature about a pound. The plants are running vines, rarely more than a yard long. An acre will yield an immense crop under favorable conditions. The plant, sown in August, can be gathered in November.

Xnuc chi-can is a larger root, weighing when mature about 3 pounds. It is a hardy plant and produces well. Both of these roots are eaten roasted or boiled, and even raw.

PROMOTION OF EXPORT TRADE.

The Bureau of Foreign Commerce of the Department of State of the United States received from the United States Consul at Veracruz, under date of September 6, 1902, a newspaper clipping which contains some valuable information in regard to promotion of export trade in this Republic, and which is as follows:

"The Mexican Commercial Commission will depart during the coming week on its long journey through the republics of South and Central America. The samples which the Commissioners will take with them include—

"Sacks, binding twine, cordage, matting, etc., made from henequen fiber; silk, cotton, and linen rebozos from Leon, State of Guanajuato; silk handmade rebozos from the town of Santa Maria, State of San Luis Potosi, said to be the finest in the country; hosiery and underwear of cotton flannel from Mexico City, Celaya, etc.; also sewing thread put up to resemble the product of the Scotch mills; colored cotton braid for shoe tags and similar purposes, manufactured in Mexico City.

"The array of cotton goods is really remarkable. All the chief factories at Puebla, Mexico City, Orizaba, etc., contribute, and the samples sent by each are substantially the same, though, in general, each of the factories is also represented by a given specialty. The goods include mantas, bleached and unbleached; drills, damasks (alimaniscos) for tablecloths, etc.; percales and prints in every style, some of the patterns being very tasteful; dress goods with silk finish; dress goods with velvet finish; men's suitings, almost undistinguishable from woolen goods; muslins, checks, twills, bombazines, organdies, vichy cloth, cotton flannel; also cotton handkerchiefs, towels, yarns, etc. There are further sent crackers and Italian pastes; cigars and cigarettes; woolen suitings and other woolen goods; silk rebozos, silk thread, etc.; and an exquisite variety of drawn work from Aguas Calientes; shoes manufactured in Mexico City, Leon, and Saltillo; charro hats; steel rails from the newly started steel foundry of Monterey; whisky and other spirits; cotton hosiery from Guadalajara, Jalisco; all kinds of soap and perfumes from Guadalajara, and beer from the brewery at Orizaba.

"The Commissioners undertake their journey in a strictly official capacity. They will carry with them the Government's credentials, and the Government is paying the bulk of the expenses, though the manufacturers concerned are also contributing a small share.

"The itinerary of the commissioners will take them first to Washington and New York. At New York the commissioners will receive their cases of samples and from that port will sail for Europe. The first South American country visited will be Brazil, which will be reached in October, one of the healthier months of the year. After the commissioners have left Brazil they will visit Uruguay, the Argentine Republic, Chile, Bolivia, Peru, Ecuador, Colombia, Venezuela, Costa Rica, Nicaragua, Honduras, Salvador, and Guatemala.

"They will be absent from eight to ten months. The mission of this commission is to study the markets of South and Central America, or to seek an outlet for the surplus production of Mexico, particularly her cotton goods, in those markets.

"One of the essential features to be discussed will be means of communication. It is well known that, at the same price, some of these cotton goods are equal to any manufactured in England, Germany, United States, or France. Therefore, the question of selling them in the markets of South or Central America, in competition with the goods received from the countries which have been mentioned, resolves itself largely into a problem of carrying facilities. This being so, one of the duties of the commissioners will be not only to investigate the possibility of utilizing existing navigation routes, but to take up with the several Governments the project of establishing new, direct, and mutually subsidized steamship lines between Mexico and other Latin-American ports.

"In this connection, of course, it is important to ascertain the prospect for return cargoes, or, in other words, to determine not only what articles Mexico can sell to the other Latin-American countries, but also what articles those countries can sell to Mexico."

NEW STEAMSHIP LINES TO THE UNITED STATES.

According to the United States Consul, W. W. CANADA, at Veracruz, a concession has been granted to JOSÉ GABRIEL ESCALANTE, of Progreso, Yucatan, by the Mexican Government, for the establishing of a line of steamers, to be called the "Yucatan Steamship Line," to ply between Progreso and New York, with the privilege of calling at Veracruz, Tampico, Galveston, New Orleans, and Mobile. The concessionary is authorized to organize a company and the vessels employed must be owned by the concessionary or the company, or chartered for at least six months at a time. The Mexican mail will be carried free of charge, in compensation for which the vessels will be entered and cleared at any time, day or night, except national holidays. The owners of this line are authorized to have their own coaling depots, either on land or on pontoons, in the ports where their vessels touch. It is expressly stipulated that the concessionary or the members of the company shall be considered Mexican, and shall be subject to Mexican laws only. The term of this agreement is for three years.

Another agreement recently entered into by the Mexican Government was with the Tabasco-Chiapas Trading and Transportation Company of Frontera, Tabasco, for the establishment of steam navigation between Mexican Gulf ports and one or more American ports, Europe, and South America, and also in the coastwise trade between Mexican ports. Vessels must be owned by the company, or, if chartered, the contract must be for not less than six months. Mexican mail will be carried free of charge, in compensation for which the company will enjoy certain privileges, such as the entering and clearing of their vessels at any time, day or night, except national holidays; reduction of 30 to 35 per cent in tonnage dues, etc.; and in compensation for the usual privileges reserved by the Government, the vessels of this company will pay only 50 per cent of the charges of the health officer; the stock of the company will be exempt from all Federal taxes except such as are required in the way of revenue stamps; and all vessels belonging to this company under the Mexican flag will enjoy the same privileges as any other Mexican vessels. The company is authorized to employ foreigners as masters and chief engineers on the vessels, whenever it is impossible to fill the posts with Mexicans, provided such officers will pass an examination and be qualified under Mexican law. The company may establish its own coaling depots, on land or on pontoons, and repair shops at such port or ports as may be found necessary and convenient, and make contracts with established steamship lines or new ones to promote direct interoceanic traffic, and with railroads for direct transportation to all parts of the Republic.

CUSTOM-HOUSE IN YUCATAN.

The custom-house heretofore located at Puerto Morelos has been removed to "La Bahia de la Ascension"—places on the east coast of Yucatan—where it was opened August 1, 1902. At Cozumel, on the island of Cozumel, a branch of the above-mentioned custom-house was also established on the same date. The jurisdiction of the custom-house at Progreso has been extended to a point situated at 87° 32″ longitude west of Greenwich, on the north coast of the peninsula of Yucatan. From this point to Cape Kuche, the district is under the jurisdiction of the custom-house at Bahia de la Ascension, and the rest of the east coast is under the jurisdiction of the custom-house of Chetumal.

FINANCIAL AND ECONOMIC NOTES.

During the ten fiscal years which commenced July 1, 1892, and terminated June 30, 1902, the Department of Fomento issued 17,929 titles to mines of all classes, covering 215,973 hectares, or 529,670 acres. In the year 1892–93 the number of titles issued was 417, in 1899–1900 the number reached 2,184, in 1900–1901 it was 2,339, and in 1901–2 it reached 3,607. This report indicates the advancement in the mining interests of the Republic, notably in the last three years.

According to statistics recently issued by the Mexican Government it appears that during twenty-four years, up to and including the fiscal year 1900–1901, Mexico's output of silver had a value of $1,094,623,182, while that of gold totaled $67,117,277.

According to a report of United States Consul-General Barlow, the amount of United States capital invested in Mexico is $750,000,000, Mexican currency. Of this sum $200,000,000 were invested between January and May of the current year. After the United States, the order of foreign investments in the Republic, according to the value, is as follows: Spain, Great Britain, France, Germany, Belgium, Italy, and Switzerland.

THE EXPLOITATION OF OIL IN TABASCO.

The presence of oil in Mexico of a high grade, both for fuel and illumination, and in paying quantities, has been demonstrated as an assured fact, and the development of this industry, which promises to become one of the greatest in the Republic, is only a question of time. One of the greatest impulses to this branch of enterprise is to be found in the recent organization of the Tabasco Oil and Exploration Company, capitalized at $100,000 (Mexican silver). This company was organized as a "Sociedad Anómina," under the laws of the Republic, and owns leases for about 7,000 acres of land in the State of Tabasco, which has oil indications and oil springs in all sections. In the vicinity of the company's land is one well 575 feet deep and yielding 2,000 gallons per day, the oil being of a very fine fuel variety and also available for lubricating purposes. It is the purpose of the present company to form yet another, with $1,000,000 (gold) capital, to which 1,000 acres of land will be leased, the revenue resulting therefrom to be used for developing purposes.

The policy of the company as set forth by the "Mexican Herald" of September 24, 1902, is as follows:

First. Close the contract with parties resident in Tabasco who promise to take a lease of 500 acres of land and in payment of same agree to put down a well at their expense until they strike oil stratum, going as deep as 2,000 feet if necessary, all expenses therefor to be for their account, for which they receive 51 per cent interest on the aforesaid tract.

Second. Use the money that will be paid into the company by the sale of 200 shares for the purpose of developing another tract of land, or putting a well down on another tract of land, establishing a lubricating-oil plant, and shipping oil to Yucatan, where coal sells at $30 per ton, it being the plan to supply fuel oil in the place of coal, starting in where coal is most expensive. When they have oil enough to more than supply the demand in Yucatan, they will then ship to Veracruz and the City of Mexico.

One-fifth of the stock—namely, 200 shares—has been devoted to the treasury, the proceeds of which are to be devoted to the development and organization of other companies.

PARTICIPATION IN THE LOUISIANA PURCHASE EXPOSITION.

The Republic of Mexico has taken active steps toward the arrangements for the part she is to take in the fair to be held in St. Louis in 1904, commemorative of the Louisiana purchase. The chief of the commission appointed to exploit the enterprise is ALBINO R. NUNCIO, other officers being MANUEL DE LAS PIEDRAS FERNANDEZ, assistant chief of the commission; JESUS M. NUNCIO, traveling representative; B. VERGARA, chief of the manufacturing department; LUIS SALAZAR, electricity and transportation; ROMULO ESCOBAR, agriculture, horticulture, forestry, fishing, and hunting, and EDUARDO MARTINEZ BACA, mines and mining.

It is expected that measures will be taken up within the near future toward arranging for the Mexican exhibit, and it is predicted that Mexico will be better represented at St. Louis than at any previous international exposition.

STEEL FOUNDRY AT MONTEREY.

A steel foundry has been established in the State of Nuevo Leon, at Monterey, employing 3,000 operatives and requiring 7,000 horsepower for the propelling of the powerful machinery. The company controlling the enterprise possesses various mines in the Carrizal Mountains of Nuevo Leon, in Monclova, Coahuila, and in Parral, Chihuahua. Those of Carrizal are already opened upon a grand scale, and explorations of others will soon be commenced. They are situated some distance from the foundry, but they have cable lines according to Bleichart's system, with a capacity to transport 1,200 tons in ten hours. In three hours after being mined the steel is in the workshops of the company, at a cost of $3.50 per ton. The furnace for melting the mineral has a capacity of 182,000 metric tons of iron ingots a year. The small furnaces known as the open-hearth system can produce 325 tons daily, the product being appropriate for steel rails, girders, and all uses requiring great strength. The company has the necessary plans for the erection of another plant after the Bessemer system, on which they will soon begin work.

The production of the foundry for the past six months with its present capacity is estimated as follows:

	Tons.
Steel girders, etc	120,000
Iron rods	10,000
Iron ingots	12,000
Cast iron	8,000
Total	150,000

The equipment includes the most complete machinery, and the amount of coal and coke consumed is about 280,000 tons a year.

BORDER TRAFFIC WITH THE UNITED STATES.

The Treasury Department of Mexico has issued a statement of the traffic between the United States and the Republic of Mexico for the three years ended June 30, last. This official report shows that during the fiscal year 1898–99, the number of freight cars which entered Mexico through the frontier towns of Juarez, Porfirio Diaz, Nuevo Laredo, and Nogales was 32,305, carrying 467,839 tons of merchandise. The number of freight cars which entered the United States from Mexico during that year was 15,506, carrying 288,412 tons of merchandise. The total traffic movement both ways for the year was 47,811 freight cars, with 756,251 tons of freight, which paid $5,295,071 duties.

During the fiscal year 1899–1900, the number of freight cars entering Mexico from the United States was 47,592, carrying 645,953 tons of freight. The number of cars entering the United States from Mexico during the same year was 24,471, carrying 242,550 tons of freight. The total movement both ways for the year was 72,063 cars, carrying 888,503 tons of freight, which paid $6,580,519 duties.

During the fiscal year 1900–1901, the number of cars that entered Mexico from the United States was 38,629, carrying 635,540 tons of freight. The number of cars that entered the United States from Mexico during the same period was 20,368, carrying 223,720 tons of freight. The total movement both ways for the year was 58.997 cars, carrying 759,360 tons of freight, upon which duties to the amount of $6,587,470 were paid.

The tonnage at the several border points was distributed as follows: Juarez, 54,874 cars, with 896,680 tons of freight; Porfirio Diaz, 61,727 cars, with 681,900 tons of freight; Nuevo Laredo, 51,356 cars, with 681,578 tons of freight; Nogales, 10,914 cars, with 144,026 tons of freight.

THE MEAT-PACKING INDUSTRY.

Contracts have been let and arrangements perfected for the establishment in Mexico of a huge packing house, designed to furnish the City of Mexico and the Southwestern cities of the United States with fresh meat. It is also purposed, as the business broadens, to enter into direct competition with the packers of the latter country. The site of the new industry is 300 miles west of the City of Mexico and in the midst of the best cattle country of the Republic, with a natural water power of 170 feet fall to take the place of fuel. The plant will have at the outset a capacity of 500 head each of cattle, hogs, sheep, and goats, and will be enlarged as fast as the trade warrants. It is on the Mexican National road, and a special line will run out to the works for the transport of the products. It is further purposed to erect a refrigerating plant and put on a line of refrigerator cars for the shipment of meats to the United States. In addition to the meat-packing industry, oleomargarine, lard, and canned goods will be included in the work of the establishment. A United States firm has received the contract for the construction of the buildings, which will cost $500,000, and the work will begin immediately, so that the new enterprise may be thoroughly under way by January 1, 1903.

MISCELLANEOUS NOTES.

The licensed cement factory of the City of Mexico, says a recent French journal of commerce, has made great improvements in its buildings with a view to meet the growing demands for this article. The production of the factory has doubled within two years and the competition resulting from this has affected the importation of foreign cements. However, the demand for cement at the present time is so large in Mexico that the manufacturers need feel no alarm for the future trade in this article.

An article of Mexican production which has lately become an item of export is cheese, there being a growing demand for the Mexican variety on the island of Cuba.

The Consul-General of Mexico in Canada, resident in Montreal, has obtained from the Canadian government a reduction of the customs charges on coffee imported into the Dominion from Mexico.

PARAGUAY.

TARIFF MODIFICATIONS.

Modifications of the general expenditure estimate for the fiscal year 1902 and of the valuation tariff now in force are embodied in the second supplement to No. 123 (second edition) of the International Customs Journal under date of June, 1902:

I. Law of January 10, 1902, approving the general expenditure estimate for the fiscal year 1902 with certain modifications.

[Diario Oficial, No. 387, of January 21, 1902.]

ARTICLE 1. The general expenditure estimate for the fiscal year 1902 shall, subject to the following modifications, be the same as for 1901, and is to be applicable from and after the month of February, 1902.

* * * * * * *

ART. 2. The heading relating to the budget expenditure shall be covered by the amount of such taxes in force as are not applied to any object in virtue of special laws and by means of the following fresh duties, which shall be applicable from and after the date of promulgation of the present law:

(1) An additional export duty at the rate of 25 *centavos* leviable in gold on exportation of every oxhide.

(2) An additional charge for manual labor ("eslingage") at the rate of 3 *centavos* in gold per 10 kilograms of yerba mate and of 4 *centavos* in gold per 10 kilograms of yerba "mborobiré," when exported.

(3) A surtax of 100 per cent upon the duties charged on comestibles and beverages of foreign origin according to the law of September 24, 1899.

(4) Exported oranges shall be subject to an inclusive duty at the rate of 10 *centavos* per 1,000.

ART. 3. The budget law of 1901 shall be applicable during the month of January.

* * * * * * *

II. Decree dated April 3, 1902, modifying the valuations of wine and other beverages, appearing in the valuation tariff in force.

[Diario Oficial, No. 448, of April 9, 1902.]

ARTICLE 1. The valuation tariff in force is amended as below.

No.		Valuation in gold.
	BEVERAGES.	
	Liqueurs of all kinds up to 50° in strength:	*Pesos.*
247	In bottles of 1 liter capacity ... per dozen..	12.00
248	In casks or demijohns ... per liter..	.70
	Wines:	
	Champagne, in bottles of a capacity not exeeeding 1 liter per doz ...	9.00
	Other, in general, including sparkling wines, in bottles of a capacity not exceeding 1 liter ... per doz..	8.00
	Port, Sherry, Madeira, Rhine, Chateau Margaux, Chateau Lafitte, Chateau Yquem, Burgundy and other fine wines in casks or demijohns ... per liter..	.50
	Muscatel, Marsala, Nébiolo, Barolo, Sauterne, Moselle, and sweet and desert wines and other half-fine wines ... per liter..	.15
	Carlon, Priorato, dry ordinary claret and Burgundy, common Moselle, Barbera, and other common wines, in casks or demijohns, up to 15° in strength and containing 45 per cent of dry extract, ascertained by evaporation at a temperature of 100° centigrade, including reducing sugar ... per liter..	.10

NOTE.—In case the dry extract exceeds in quantity the above-mentioned rate, same shall pay 1 centavo for every extra 5 grams or fraction thereof per liter.

Should the wines and other beverages be of greater strength than the valuation assigned thereto, they shall pay 1 centavo for every extra degree or fraction thereof per liter.

LACE MANUFACTURING.

The art of making lace by hand is well developed in Paraguay. It was taught the natives two hundred years ago by the missionaries, and has been transmitted from generation to generation till it is now quite general throughout the Republic. Some towns are devoted to making a certain kind of lace. In one town of 8,000 or 9,000 inhabitants, almost all the women and children, and many of the men, make lace collarettes, handkerchiefs, and ladies' ties. Another town makes lace embroidery, and others drawn-thread work, such as centerpieces, tray mats, tea cloths, doilies, etc. The designs used in making the lace are taken from the curious webs of the semitropical spiders that are so numerous here. On this account it is called "ñanduti," an Indian name which means spider web. This industry may be of service to American trade. There is scarcely a dealer in Paraguay who would not purchase American goods if it were not so difficult to get a draft on the United States. This is due to the fact that nearly all the exports go to Europe. Some of the principal lace makers here, however, have agreed to give the benefit of all their drafts on the United States for the facilitation of trade, if American importers and dealers in handmade lace and drawn-thread work should take up their product.

CATTLE INDUSTRY.

The following information has been received by the Bureau of Foreign Commerce from United States Consul J. N. Ruffin, of Asuncion, under date of May 31, 1902, in answer to the many inquiries received from persons interested in cattle industry in this country:

EXTRACT FROM LETTER OF MANUEL DOMINGUEZ TO MR. RUFFIN.

In reply to your request for information desired by various persons in the United States in regard to obtaining land in the country for the cultivation of products and the raising of cattle, it gives me pleasure to communicate that this Government, taking into consideration the importance of the enterprise, is disposed to accord all the facilities possible. The Department of State has made investigation of the matter, and has to say that it has at its disposal the following lands north of Asuncion:

(1) Forty leagues in the Department of Horqueta, near Villa Conception, serving in part for cattle raising and in part for agriculture.

(2) Eight leagues in the Department of San Pedro, 3 leagues from the Paraguay River and on the River Jejui, which empties into the same. It is settled by people of various nations, whose rights are included in the land mentioned.

(3) Eighteen leagues in the Department of Villa Del Rosaria, about the same distance from the Paraguay River.

(4) Fifty leagues in the Departments of Ajos, Mbocayaty, and Caaguazu, on the Tebicuary River, which also empties into the Paraguay River.

In the Department of Asuncion there do not exist any public lands, but the Government can expropriate land. The interested parties should determine the extent of the products desired to be cultivated, or the importance of the beef establishment which they propose to erect, and they can without difficulty procure the lands which they may need.

To the north as well as to the south of the capital, there exist various cattle ranches where interested parties would find a sufficient quantity of animals for the establishment of a beef-extract factory.

The price of the best land for cattle raising south of Asuncion may be valued at about $3,000 gold a square league and about $2,000 gold near the river.

There is one dried-beef establishment on the northern frontier on the Paraguay River which is prosperous, although it is remote from Asuncion and from the ports of the River Plata.

I annex copy of a law respecting beef establishments. I shall be pleased to transmit any other information desired upon this matter.

[Translation of law giving concessions to beef establishments.]

ARTICLE 1. There are granted to enterprises for preserving as well as making extract of beef the following exemptions and privileges up to December 31, 1910: First, free introduction of all machinery and other elements necessary for the buildings and installations, materials for packing their products, common salt, and the chemical substances necessary; second, exemption from export duties on all the products and by-products of the industry.

ART. 2. The concessionnaires should comply with the procedures established by the law and the custom-house regulations for import and export.

ART. 3. The executive power will determine the minimum number of animals to be killed annually in the establishment, to give effect to this concession.

ART. 4. If the establishment ceases to work during twelve consecutive months, it will lose its concessionary right, except in case of force majeure.

ART. 5. The Executive will appoint an inspector to examine the products while they are being prepared in the establishment; his monthly salary will be $50 gold, to be paid by the concession establishment.

ART. 6. The Executive will limit annually, in proportion to the importance of the beef establishments, the quantity of effects to be entered free from import duties.

ART. 7. The establishments will pay to the State 50 per cent of the tax on each hide exported or for each animal killed.

ART. 8. If the establishment is of a modern system, with refrigerating appliances, it will pay only 10 cents gold for each animal.

ART. 9. All articles of merchandise which the concessionnaires import or export in contravention of this law will be confiscated and the concession declared void.

ART. 10. The beef establishments must have their legal domicile in the Republic and keep their accounts in the language of the country (Spanish).

LETTER FROM ANGLO-PARAGUAYAN LAND COMPANY TO MR. RUFFIN.

In answer to your query of the 23d instant, relative to our lands on the River Paraguay, I beg to inform you that we own some 120 leagues, more or less, answering to the above conditions. These lands are in three lots, viz:

Block B (area 59 leagues 1,554 squares), situated in front of Ita pucu-mi, with frontage on River Paraguay of 6 leagues. It contains first-class grazing land and is well watered. There is also a large number of quebracho trees and black palms. The quebracho has been worked for the last five years under royalty, but the contract expires next month. Five square leagues of grazing land are also rented for the next three years. This block is really one of the finest in the Paraguayan Chaco. Our price is £250 ($1,216) per league, or, say, $75,000 gold for the whole property. The company would probably not sell less than 10 leagues of this or any of their Chaco lots.

In Block C, we have still 10 square leagues to sell, but as several parties are proposing to purchase, further description is useless.

Block D contains 54 odd leagues, and lies a little north of Villa Conception. It is first-class grazing land, with a frontage on River Paraguay of 5½ leagues. Our price is £275 ($1,338) per league, and we could arrange easy terms of payment, extending over four years, if land were mortgaged in our favor and reasonable interest paid.

I am sure my board would welcome any proposition for the erection of a modern meat-extract factory, but with regard to cattle I am unable to say. My company's address is Dashwood House, 9 New Broad street, London, E. C.

Our lands have first-class titles, having been ceded to the foreign bondholders by the Paraguayan Government in payment for coupons of the external debt.

As you know, there is a good demand for Chaco lands, so that the above are not likely to be in the market for any length of time.

APPROXIMATE COST OF A MEAT ESTABLISHMENT, AND OTHER DATA.

10 leagues of grazing land, at $1,250 per league	$12, 500
House for the owner or superintendent	1, 200
Houses for workmen	300
Sheds (one large and one small)	200
2 artesian wells	150
2 cattle yards	200
2 small cattle yards	80
Fencing wire	2, 000
7 acres of land for gardening, etc	130
Various plantations	100
4,000 cows, from 3 to 8 years old, at $7 each	28, 000

400 bulls, from 3 to 4 years old, at $8 each	$3,200
1,000 oxen, 3 years old (to fatten), at $8 each	8,000
150 horses (including colts and studs)	3,000
300 sheep, at $1 each	300
20 working oxen, at $10 each	200
2 bullock carts	150
Sundries	200
Saddles, lassos, etc	200
1 overseer, at $7 gold per month, per year	84
6 cowboys, at $3.50 gold per month, per year	252
2 boys, at $2 gold per month	48
2 cooks, at $2 gold per month	48
1 washerwoman, at $2 gold per month	24
1 shepherd boy, at $2 gold per month	24
1 farmer, at $5 gold per month	60
Cost of living for all employed	360
Various expenses	60
Total cost of a well-organized ranch	61,070

NOTES.

Cattle can be purchased in Matto Grosso, in Brazil, at the northern boundary of Paraguay, large and small together, for about $5 gold apiece. Cattle for killing purposes cost as follows; Fat cows, $8 to $8.50 each; fat heifers from 3½ to 4 years old, $9 to $9.50 each. By buying a drove of 20,000 or 30,000 head of Brazilian cattle, many fat heifers may be obtained at $8 each.

A heifer of 3½ or 4 years old yields the following: A salted hide from 30 to 32 kilograms (66 to 70 pounds) in weight brings about $5 gold; tallow and grease sell in Buenos Ayres for $2 gold; fresh meat, 300 to 350 pounds, salted, brings in Buenos Ayres $7.50 gold; tongue, bones, hair, etc., 50 cents—making a total of $15 per heifer.

The general expenses for fuel, tins, pipes, labor, and freight to Buenos Ayres are calculated at $3 to $4 gold, thus making the total cost of preparing animal and shipping it about $12.50 gold, leaving a gain on each animal of from $2 to $2.50 gold. Thus, an establishment killing 20,000 head per season makes from $40,000 to $50,000.

Bricks (2 by 5 by 11) cost here $5.50 gold per 1,000, and a suitable building could be erected for $100,000 gold.

The cattle are fattest in the summer and autumn, and refrigerating machinery is necessary for boiled and corned beef. Paraguay is so thinly populated that it will be a century before it is short of pastures for breeding cattle.

PERU.

SUGAR PRODUCERS.

Port.	Name of estate.	Owner.
Supe	Huayto	Canevaro & Co.
	Paramonga	Sociedad Agrícola de Paramonga.

EXHIBIT OF ALCOHOL APPLIANCES AT LIMA.

Consul C. V. HERDLISKA, of Callao, under date of August 22, 1902, says he has been officially advised by the executive committee of the International Exhibition of Industrial Appliances of Alcohol, to be held in Lima, that the Government of Peru has postponed the inauguration of the exhibition, which had been fixed for the 1st of November, 1902, until the 1st of January, 1903. The particulars of this exhibition were reported to the Department by Vice-Consul JOSEPH C. CREE under date of April 16, 1902.

UNITED STATES.

TRADE WITH LATIN AMERICA.

STATEMENT OF IMPORTS AND EXPORTS.

Following is the latest statement, from figures compiled by the Bureau of Statistics, United States Treasury Department, showing the value of the trade between the United States and Latin-American countries. The report is for the month of August, 1902, with a comparative statement for the corresponding month of the previous year; also for the eight months ending August, 1902, as compared with the same period of 1901. It should be explained that the figures from the various custom-houses showing imports and exports for any one month are not received at the Treasury Department until about the 20th of the following month, and some time is necessarily consumed in compilation and printing, so that returns for the month of August, for example, are not published until some time in October.

Reports furnished by the Mexican Consul at Nogales, Arizona, show that the imports into Mexico through the port of Nogales during July, 1902, amounted to $119,510, consisting of the following merchandise:

Amimal products	$10,888
Arms and explosives	5,091
Beverages	1,742
Chemical products	14,597
Machinery, and parts thereof	13,184
Mineral products	23,379
Paper and paper products	3,625
Textile products	18,203
Vegetable products	16,395
Vehicles	5,891
Sundries	6,515
Total	119,510

This merchandise originated in the following countries:

Austria	$417
Belgium	15
England	14,669
France	6,185
Germany	6,543
Japan	60
United States	91,621
Total	119,510

The duties collected by the Mexican Government on the goods mentioned amounted to $55,329.23 Mexican silver.

The exports from Mexico to the United States through the port of Nogales in July, 1902, amounted to $922,350 Mexican silver, and consisted of the following products:

Articles.		Quantity.	Value, Mexican silver.
Copper bullion	pounds..	5,364,388	$643,732

The items include breadstuffs, cattle and hogs, provisions, cotton, and mineral oils, and the value of exports of all these items since January 1 shows a decrease of $126,468,681, comparing with the corresponding eight months in 1901. Each of these items shows a decrease, but breadstuffs contribute $84,256,028 of the total decrease, due in very great measure to the failure of the 1901 corn crop.

The month of August closes the cotton year in trade figures and the Department of Statistics has adopted the trade division, its export figures in this direction covering the twelve months ending with August. These indicate an outward cotton movement in volume nearly 100,000 bales ahead of 1901, but the value is $33,000,000 smaller as a result of a decline of 1 cent per pound in the average export price of the product. Notwithstanding this decline in price, cotton is easily again in the front rank of domestic products exported, having a total of $135,000,000 for the eight months ending with August, with breadstuffs second best with a total of $108,000,000.

The decrease in breadstuffs, as already noted, was due very directly to the failure of the 1901 corn crop, the total value of corn shipped during the entire eight months being but $4,440,319, comparing with $43,050,354 the corresponding months last year. In quantities the corresponding figures are 6,462,561 bushels this year and 90,616,944 bushels last.

Wheat also contributes a large part of the decrease in breadstuffs during the eight months under consideration, a partial explanation being that wheat, during the closing months of last year, was rushed forward as the result of the corn shortage, and the foreign demand to that extent became oversupplied.

The movement of oats likewise shows a sharp decline for the eight months in value to $1,400,899 from $7,517,402.

Exports of all kinds in August aggregated $94,682,178, a gain of 6.6 per cent over July, but a decrease of 12 per cent from August a year ago, and 8.6 per cent from August, 1900. The decrease in breadstuffs exports from August a year ago is 33 per cent; in live animals, 38 per cent; in provisions, 28 per cent; in cotton, 10 per cent, and in oils, 13 per cent. The decrease in all preliminary exports is 27 per cent, against which there was a gain in other exports of 7.8 per cent, leaving the net decrease in all exports from a year ago 12 per cent, as above shown.

The feature in import trade in August was the continuance of the gain shown in the inward movement over 1902 and preceding years. The gain as compared with August last year was entirely in dutiable imports, free-of-duty materials falling off slightly. Imports as a whole are the heaviest reported in August for at least six years past, aggregating $78,675.31, a gain of 7.6 per cent over August a year ago and of 27 per cent over August, 1900. An example of the growth in import trade from the low point in recent years is afforded by the fact that imports in August, 1902, were just about double those of August, 1896.

For the two-thirds of the year which has elapsed it is found imports aggregate $614,165,387, the largest total on record for that period and 6 per cent larger than a year ago. It is an interesting fact that, while imports are the best on record, exports have fallen off largely from their best, and are now 12 per cent behind last year, 10 per cent less than in 1900, and only 3.6 per cent larger than in 1899. American consumption, stimulated by the past years of prosperity, is evidently running in excess of American supply in many lines, and foreign aid in supplying this enlarged demand is being increasingly invoked.

THE COTTON CROP OF 1901-2.

The full report of Secretary Hester, of the New Orleans Cotton Exchange, on the cotton crop of 1901–2 gives some interesting statistics of the movement of the South's great staple in the season just ended. The commercial crop—that is, the amount which came into sight and passed into consumption at home or abroad during the year, specifically the port receipts, overland shipments, and Southern consumption—was 10,680,680 bales, a gain of 297,000 bales over the preceding year. The value of the crop was, however, not so great, being only $438,014,687, as against a value of $494,567,549 in 1900–1901, a decrease of 11.3 per cent in value on a 3 per cent increase in quantity. Following will be found the estimated commercial crops of the past four seasons, with the aggregate value thereof and the average price per pound realized:

Years.	Bales.	Value.	Price per pound.
			Cents.
1901-2	10,680,680	$438,014,687	$8\frac{1}{16}$
1900-1901	10,383,422	494,567,549	$9\frac{1}{2}$
1899-1900	9,436,416	363,784,820	$7\frac{2}{3}$
1898-99	11,274,840	282,722,987	$4\frac{9}{16}$

The price realized was about 1¼ cents lower than in the preceding season, but was over 3 cents per pound higher than in the low-price and large-crop year 1898–99. The actual crop of the year—that is, the amount actually grown in the United States in 1901—is estimated by Mr. HESTER at 10,552,000 bales. In view of the very general dissent from the Agricultural Department's reports of condition of the crop now growing, it is worth noting that in December last year the Government estimate of the crop of last season was 9,674,000 bales, which points to the interesting fact that the Government's estimate last season was below the actual outturn by 8.3 per cent.

The increase in the total yield over the preceding season is found to have occurred in the Atlantic and Eastern Gulf States, which showed a gain of 17 per cent, while that of Texas (including Indian Territory) fell off 21 per cent. The loss in Texas and Indian Territory is placed at 816,000 bales, while that of the rest of the belt increased 1,114,000 bales. It is worth noting that Indian Territory raised 369,894 bales, Oklahoma 130,812 bales, and Missouri 31,412 bales, a total of 532,118 bales, or 20 per cent more than the preceding season and double that of the crop of 1899–1900. Texas (including Indian Territory, but not Oklahoma) is credited with shipping 2,993,000 bales, against 3,809,000 bales the year before; Georgia shipped 1,525,000 bales, against 1,295,000 bales in 1900–1901; Mississippi, 1,375,000 bales, against 950,000 bales, and Alabama, 1,200,000 bales, against 1,000,000 bales in 1900–1901. Every State except Texas, in fact, is credited with a larger production than in the preceding season.

American cotton consumption was never so large as in the season just closed. Mr. HESTER estimates the Northern mill takings at 2,050,000 bales, against 2,025,000 bales in 1900–1901; the supply was 2,173,000 bales and the stock at the close of the season was 123,000 bales, or about the same as a year ago. The Southern takings were 1,938,000 bales, against 1,621,000 bales in the preceding season, making the total American (United States) consumption 3,988,000 bales, against 3,646,000 bales the season preceding. In addition, there were used 180,802 bales (American weight) of foreign cotton, mostly Egyptian, largely consumed by Northern mills. The coming season six Southern mills, with

57,000 spindles, will use foreign cotton. Adding the domestic and foreign cotton, a total American consumption of 4,169,547 bales is reached, against 3,698,442 bales last season. The progress of the Southern mills is best shown by the following table of Northern and Southern mill takings and of total crop since the year 1890:

Year ending August 31—	Northern mills.	Southern mills.	Total.	Total crop.
	Bales.	*Bales.*	*Bales.*	*Bales.*
1890	1,799,258	546,894	2,346,152	7,311,392
1891	2,027,362	604,661	2,632,023	8,652,597
1892	2,190,766	686,080	2,876,846	9,035,379
1893	1,687,286	743,848	2,431,134	6,700,365
1894	1,601,173	718,515	2,319,688	7,549,817
1895	2,083,839	862,838	2,946,677	9,901,251
1896	1,600,271	904,701	2,504,972	7,157,346
1897	1,804,680	1,042,671	2,847,351	8,757,964
1898	2,211,740	1,231,841	3,443,581	11,199,994
1899	2,190,095	1,399,399	3,589,494	11,274,840
1900	2,068,300	1,597,112	2,665,412	9,436,416
1901	1,967,570	1,620,931	3,588,501	10,383,442
1902	2,050,774	1,937,971	3,988,745	10,680,680

In 1890 the Southern mills took 7 per cent of the total crop and 23 per cent of the American takings. Now they take 18 per cent of the total crop and 48.5 per cent of the American takings.

Taking the visible supply of American cotton at 925,000 bales at the beginning of the season and adding the amount brought into sight, a total world's supply of 11,537,000 bales is reached. Of this 2,051,000 bales went to Northern mills, 1,938,000 were used South, 122,000 bales went to Canada, 33,000 bales to Mexico, 169,000 bales to Japan and China, 6,441,000 bales to Europe, and 5,000 bales were burned. The visible supply at the end of the season was 778,000 bales, against 925,000 bales the preceding year. The total mill stocks of American are placed at 580,000 bales, making the visible and invisible supply of American 1,358,000 bales, against 1,421,000 bales the year before, while the total supply of all kinds is 2,057,000 bales, against 2,163,000 bales the year before. The world's consumption of American cotton is estimated by Mr. HESTER at 10,670,000 bales in 1901–2, against 10,171,000 bales in 1900–1901 and 10,995,000 bales in 1899–1900. It would seem evident from these figures that a crop at least equal to last year's will be absolutely necessary if the present supplies of cotton are to be kept unimpaired.

FINANCIAL STATEMENT FOR SEPTEMBER, 1902.

The monthly statement of the public debt issued from the Treasury Department for September, 1902, shows that at the close of business on September 30, the debt, less cash in the Treasury, amounted to $957,415,887, which is a decrease of $10,675,434 as compared with September 1. The debt is recapitulated as follows: Interest-bearing debt, $931,070,340; debt on which interest has ceased since maturity,

$1,254,860; debt bearing no interest, $396,342,081; total, $1,328,669,281. This amount, however, does not include $855,899,089 in certificates and Treasury notes outstanding, which are offset by an equal amount of cash on hand held for their redemption. The cash in the Treasury is classified as follows:

Gold reserve fund	$150,000,000
Trust funds	855,899,089
General fund	175,598,261
In national-bank depositories	309,530,459
Total	1,491,027,809

Against which there are demand liabilities outstanding amounting to $944,176,154, which leaves a cash balance on hand of $371,253,394.

The monthly coinage statement issued by the Director of the Mint shows that during September, 1902, the total coinage executed at the mints of the United States was $6,762,115, as follows: Gold, $3,560,860; silver, $2,831,165; minor coins, $370,090.

The quarterly estimate of the value of foreign coins, issued by the Director of the Mint, shows that during the quarter ended September 30, 1902, the market value of silver has increased $0.0017 per fine ounce. The value of foreign silver coins has increased accordingly.

STATISTICS OF RAILWAYS IN THE UNITED STATES FOR THE YEAR ENDING JUNE 30, 1901.

Mileage.—On June 30, 1901, the total single-track railway mileage in the United States was 197,237 miles, this mileage having increased during the year 3,891 miles. This increase is greater than that for any other year since 1893, excepting 1900, when it was 4,051 miles. The 16 States and Territories for which an increase in mileage in excess of 100 miles is shown are as follows: Alabama, Colorado, Georgia, Illinois, Indiana, Iowa, Louisiana, Minnesota, Mississippi, Pennsylvania, South Carolina, South Dakota, Texas, West Virginia, Indian Territory, and Oklahoma. Including tracks of all kinds, the aggregate railway mileage was 265,366.29 miles, which was classified as follows: Single track, 195,570 miles; second track, 12,845 miles; third track, 1,153 miles; fourth track, 876.13 miles, and yard track and sidings, 54,919.86 miles. From these figures it is noted that there was an increase of 6,581.99 miles in the aggregate length of all tracks, of which 2,766.84 miles, or 42.03 per cent, were due to the increase in track and sidings. The number of the railway corporations included in the report was 2,057.

Equipment.—On June 30, 1901, there were 39,584 locomotives in the service of the railways, which was 1,921 more than were in use the preceding year. Of the total number 10,184 are classed as passenger locomotives, 22,839 as freight locomotives, 5,959 as switching locomotives, the remainder, 602, not being classified. The total number of cars of all classes in the service of the railways on the date stated was 1,550,833, there having been an increase of 99,995 in rolling stock of this class. Of the total number of cars, 35,969 are assigned to the passenger service, 1,464,328 to the freight service, and 50,536 to the immediate service of the railways. These figures, however, do not include cars owned by private companies and firms that are used by railways, as no returns for them are made to the Commission.

It appears that the railways of the United States used on an average 202 locomotives and 7,926 cars per 1,000 miles of line; that 59,631 passengers were carried and 1,704,005 passenger-miles accomplished per passenger locomotive, and that 47,692 tons of freight were carried and 6,439,736 ton-miles accomplished per freight locomotive. Embracing in the term "equipment" both locomotives and cars, it is noted that the total equipment of railways at the end of the year was 1,590,417. Of this number 1,164,048 were fitted with train brakes, the increase in this item being 158,319, and 1,549,840 were fitted with automatic couplers, the increase being 145,708. Nearly all locomotives and cars in the passenger service were fitted with train brakes, and of 10,184 locomotives assigned to that service 8,370 were fitted with automatic couplers. Practically all passenger cars were fitted with automatic couplers. Regarding freight equipment, it is observed that nearly all freight locomotives were equipped with train brakes and 89 per cent of them with automatic couplers. Of 1,464,328 cars in the freight service, 1,071,758 were fitted with train brakes and 1,434,075 with automatic couplers.

Employees.—The number of persons in the employment of the railways of the United States as reported for June 30, 1901, was 1,071,169, or an average of 548 employees per 100 miles of line. As compared with June 30, 1900, the number of employees increased 53,516, or 19 per 100 miles of line. The classification of these employees shows that 45,292 were enginmen, 47,166 firemen, 33,092 conductors, and 84,493 other trainmen. There were 47,576 switchmen, flagmen, and watchmen. Omitting 3,107 employees not assigned to any of the four general divisions of employment, it appears that the services of 38,816 employees were required for general administration, 343,717 for maintenance of way and structures, 206,418 for maintenance of equipment, and 479,111 for conducting transportation. The amount paid in salaries and wages to employees during the year ending June 30, 1901, it is seen, was $610,713,701, which was $33,448,860 in excess of what was paid during 1900. The compensation of the railway employees for 1901 is equivalent to 59.27 per cent of the operating expenses of the railway companies and 38.44 per cent of their gross earnings.

Capitalization and valuation.—The amount of railway capital outstanding on June 30, 1901, was $11,688,177,991. This amount, on a mileage basis, represents a capitalization of $61,528 per mile of line. Of the total capital stated, $4,806,597,104 existed in the form of stock, of which $4,475,439,721 was common stock and $1,331,157,383 preferred stock. The amount which existed in the form of funded debt was $5,881,580,887. The amount of capital stock paying no dividends was $2,829,021,925, or 48.73 per cent of the total amount outstanding. Omitting equipment trust obligations, the amount of funded debt which paid no interest was $361,905,203. Of the stock paying dividends 8.82 per cent of the total amount outstanding paid from 1 to 4 per cent; 13.37 per cent paid from 4 to 5 per cent; 10.47 per cent paid from 5 to 6 per cent; 8.71 per cent paid from 6 to 7 per cent, and 6.67 per cent paid from 7 to 8 per cent. The amount of dividends declared during the year was $156,735,784, which is equivalent to a dividend of 5.26 per cent on the amount of stock on which some dividend was declared. The amount of dividends declared in 1900 was $139,597,972.

Public service.—The number of passengers carried during the year ending June 30, 1901, as shown by the annual reports of railways, was 607,278,121, showing an increase for the year of 30,412,891. The number of passengers carried 1 mile—that is, passenger mileage—was 17,353,588,444, there being an increase in this item of 1,314,581,227. There was an increase in the density of passenger traffic, as the number of passengers carried 1 mile per mile of line in 1901 was 89,721, and in 1900, 83,295. The number of tons of freight carried during the year was 1,089,226,440, a decrease of 12,453,798 being shown. The number of tons of freight carried 1 mile—that is, ton mileage—was 147,077,136,040. The increase in the number of tons carried 1 mile was 5,477,978,770. The number of tons carried 1 mile per mile of line was 760,414. These figures show an increase in the density of freight traffic of 25,048 tons carried 1 mile per mile of line. The average revenue per passenger per mile for the year ending June 30, 1901, was 2.013 cents. For the preceding year it was 2.003 cents. The revenue per ton of freight per mile was 0.750 cent, while for 1900 it was 0.729 cent. An increase in earnings per train mile appears for both passenger and freight trains. The average cost of running a train 1 mile also increased. The percentage of operating expenses to earnings was 64.86 per cent.

Earnings and expenses.—For the year ending June 30, 1901, the gross earnings from the operation of the railways in the United States arising from the operation of 195,570.92 miles of line were $1,588,526,037, being $101,481,223 more than for the fiscal year 1900. The operating expenses were $1,030,397,270, having increased in comparison with the year preceding $68,968,759. Gross earnings were in detail as follows: Passenger revenue, $351,356,265—increase, as compared with the preceding year, $27,640,626; mail, $38,453,602—increase, $701,128; express, $31,121,613—increase, $2,705,463; other earnings from passenger service, $8,202,982—increase, $41,960; freight revenue, $1,118,543,014—increase, $69,286,691; other earnings from freight service, $4,065,457—increase, $719,545; other earnings from operation, including unclassified items, $36,783,104—increase, $385,810. Gross earnings from operation per mile of line were $401 more than for the year ending June 30, 1900, being $8,123.

The operating expenses of the railways already stated were distributed among the four general divisions as follows: Maintenance of way and structures, $231,056,602—increase, $19,836,081; maintenance of equipment, $190,299,560—increase, $9,125,680; conducting transportation, $565,265,789—increase, $36,149,463; general expenses, $42,566,553—increase, $3,237,788; undistributed, $1,208,766. The operating expenses amounted to $5,269 per mile of line, or $276 more than for the year immediately preceding.

The income from operation, or the net earnings, was $558,128,767, this item showing an increase as compared with the previous year of $32,512,463. The average amount of net earnings per mile of line for the year ending June 30, 1901, was $2,854, and for 1900, $2,729. The amount of income received from sources other than operation was $179,746,449. Included in this amount are the following items: Income from lease of road, $111,637,907; dividends on stocks owned, $28,822,788; interest on bonds owned, $12,055,312, and miscellaneous income, $27,230,442. The total income of the railways, $737,875,215—that is, the income from operation, increased by income from other sources, is the item from which fixed charges and analogous items are deducted in order to ascertain the amount available for dividends. The total deductions of this character amounted to $496,363,898, leaving $241,511,317 as the net income for the year available for dividends or surplus.

The amount of dividends declared during the year (including $10,752 other payments from net income) was $156,746,536, leaving as the surplus from the operations of the year ending June 30, 1901, $84,764,781. The surplus for the year 1900 was $87,657,933. In the amount stated for deductions from income, $496,363,898, are embraced the following items: Salaries and maintenance of organization, $532,209; interest accrued on funded debt, $262,094,838; interest on current liabilities, $5,526,572; rents paid for lease of road, $112,644,822; taxes, $50,944,372; permanent improvements charged to income account, $31,939,761; other deductions, $32,681,234.

Railway accidents.—The total number of casualties to persons on account of railway accidents, as shown for the year ending June 30, 1901, was 61,794, the number of persons killed having been 8,455 and the number injured 53,339. Of railway employees, 2,675 were killed and 41,142 were injured. These casualties were distributed among three general classes of employees, as follows: Trainmen, 1,537 killed, 16,715 injured; switchmen, flagmen, and watchmen, 175 killed, 1,190 injured; other employees, 963 killed, 23,237 injured. The casualties to employees resulting from coupling and uncoupling cars were, killed, 198; injured, 2,768. The corresponding figures for the year 1900 were, killed, 282; injured, 5,229. The casualties connected with coupling and uncoupling cars are assigned as follows: Trainmen, killed, 163; injured, 2,377; switchmen, flagmen, and watchmen, killed, 25; injured, 284; other employees, killed, 10; injured, 107. The casualties due to falling from trains, locomotives, or cars in motion were, trainmen, killed, 376; injured, 3,147; switchmen, flagmen, and watchmen, killed, 26; injured, 222; other employees, killed, 61; injured, 452. The casualties due to jumping on or off locomotives or cars in motion were, trainmen, killed, 65; injured, 1,983; switchmen, flagmen, and watchmen, killed, 11; injured, 144; other employees, killed, 60; injured, 423. The casualties to the same three classes of employees from collisions and derailments were, trainmen, killed, 464; injured, 2,508; switchmen, flagmen, and watchmen, killed, 11; injured, 81; other employees, killed, 60; injured, 566.

The number of passengers killed during the year was 282 and the number injured 4,988. The corresponding figures for the previous year were 249 killed and 4,128 injured. As a result of collisions and derailments 110 passengers were killed and 2,208 injured. The total number of persons other than employees and passengers killed was 5,498; injured, 7,200. These figures include casualties to persons classified as trespassers, of whom 4,601 were killed and 4,858 were injured. The total number of casualities to persons other than employees from being struck by trains, locomotives, or cars was 4,135 killed and 3,995 injured. Casualties of this class occurred as follows: At highway crossings—passengers killed, 2; injured, 11; other persons killed, 828; injured, 1,343. At stations—passengers killed, 21, injured, 344; other persons killed, 378; injured, 553; and at other points along track—passengers killed, 6; injured, 27; other persons killed, 2,899; injured, 1,717. The summaries giving the ratio of casualties show that 1 out of every 400 employees was killed and 1 out of every 26 employees was injured. With reference to trainmen—including in this term enginemen, firemen, conductors, and other trainmen—it is shown that 1 was killed for every 136 employed and 1 was injured for every 13 employed. One passenger was killed for every 2,153,469 carried and 1 injured for every 121,748 carried. Ratios based upon the number of miles traveled, however, show that 61,537,548 passenger miles were accomplished for each passenger killed and 3,479,067 passenger miles accomplished for each passenger injured. The corresponding figures in these latter ratios for the year ending June 30, 1900, were 64,412,684 and 3,885,418 passenger miles for each passenger killed and each passenger injured, respectively.

RECOGNITION OF LATIN-AMERICAN CONSULAR OFFICERS.

The following Latin-American consular officers have been recognized by the Government of the United States:

FREDERICK HARNWELL, Consul of Bolivia at Chicago.

JOHN L. BORRAS, Vice-Consul of Brazil at Pensacola, Florida.

LOUIS CHABLE, Vice-Consul of Costa Rica at New York.

JOAQUIN A. VARGAS, Vice-Consul of Mexico at Chicago.

J. EUGENIO MEDINA, Consul-General of the Dominican Republic at San Juan, for Porto Rico.

ENRIQUE RUSSELL, Vice-Consul of the Dominican Republic at Mayaguez, Porto Rico.

CARLOS BARRET, Consul of Paraguay at Norfolk, for Norfolk and Newport News, Virginia.

M. D. HOGE, Vice-Consul of Paraguay at Richmond, Virginia.

OTON GRIMMER, Honorary Consul of Venezuela at New Orleans, Louisiana.

MARIANO VELOSO DEL ROSARIO, Consul of Venezuela at Cebu, Porto Rico.

RESULTS OF THE FUEL-OIL TESTS.

On September 5, 1902, the Navy Department of the United States published the report of Lieut. WARD WINCHELL, U. S. Navy, the expert detailed by the Department to investigate and report upon the efficiency and installation of the oil-fuel system as fitted to the Oceanic Steamship Company's steamer *Mariposa*. The gross displacement of the *Mariposa* is 3,160 tons. The average horsepower developed was about 2,481. The average distance made each day by the ship was 354 knots, giving a mean speed of 13.53 knots an hour. There was consumed each day about 278 barrels of oil, which gave an average consumption of 3,720 pounds per hour.

It practically required 1½ pounds of oil per hour to secure a horsepower, and while this result has been secured on shore in highly efficient engines the consumption is practically 50 per cent less in weight of combustible than would be required of coal. The ship required 262 hours to make the voyage from San Francisco to Tahiti, while only 260 hours were occupied in the return trip.

By the use of oil as fuel the complement of the ship was reduced from 81 to 55, thus decreasing the force in the engine room from 36 to 20 men. The crude oil was atomized by means of an air compressor, which had a capacity of a thousand cubic feet of air per minute compressed to 30 pounds. The *Mariposa* has 18 furnaces in her boilers, only 12 of them being used. Two burners were installed in each furnace, although all the burners were not in use except at short intervals when the engines were run at full power.

The engineer experts at the Navy Department are most interested in the fact that careful inspection does not show any effect of the flame on any part of the boilers. Upon reaching Tahiti, after the run, the tubes were swept by scrapers and all the refuse collected barely filled two ash buckets, and some of this came from coal which had been used on one of the preliminary trials. The speed secured on the return trip was much higher than that attained when outward bound, due to the fact that the firemen had become more accustomed to manipulating the burners. The company had taken measures to arrange the burners so that steam could be used as the atomizing agent in case the compressor became impaired. On one or two instances during the voyage the compressor needed overhauling and the oil was sprayed by steam while these repairs were being made.

WHEAT FOR THE MANUFACTURE OF MACARONI.

In the issue of the MONTHLY BULLETIN for June, 1901, reference was made to the intention of the Agricultural Department of the United States to develop the growing of that species of wheat known as "macaroni wheat," and experiments were made looking to the discovery of the sections most suited to that particular culture. As a result of the impetus given to the industry, the chief cerealist of the Department states that in the present year over 1,000,000 bushels of this wheat were produced in the United States, and that present indications point to a crop of not less than 5,000,000 bushels for the coming year. The crop of 1902 was twenty times as great as that of the preceding year, and, notwithstanding the enormous increase in the acreage devoted to its culture, it will be some time before enough is raised to supply home consumption. As the returns for the fiscal year 1902 show imports of macaroni to the amount of 20,000,000 pounds, it is estimated that at least four or five years must elapse before sufficient macaroni wheat will be grown to permit of exporting it.

The grade of this wheat raised in the United States is as good as the foreign article, the Department having obtained the original grain from eastern Russia, while a few varieties were imported from Siberia and Algeria. The profit on this wheat is based on the greater yield to the acre, as the price per bushel is about the same as the standard wheat. During the past three years from 20 to 25 bushels to the acre has been the average yield, the grain being twice as big as the standard varieties and the number of stalks to the plant being greatly augmented.

An important item in regard to this wheat variety is that it can be grown in localities where flour wheat will not flourish. It needs very little moisture and thrives best in dry climates. North and South Dakota are the chief producing States, and it is being introduced in the dry sections of Texas with success. It is the hardest known wheat variety and requires special machinery for grinding it.

EXPORTS OF TOBACCO TO EUROPE FOR THE FISCAL YEARS 1897-1901.

URUGUAY.

SANITARY WORKS AT MONTEVIDEO.

The Government of Uruguay has issued, through its Ministry of Public Works, a call for tenders for the construction of sanitary works in the Port of Montevideo. The works to be constructed consist of the following:

(*a*) A tunnel, in rock, of 1,278 meters in length, 3.65 meters in height, and 3 meters in breadth.

(*b*) A main collector sewer of 1,157.60 meters plus 1,283.30 meters long, in oviform section 1.80 meters and 1.70 meters in height, respectively, in earthen subsoil.

(*c*) A secondary collector 2,016 meters long, of oviform section, varying from 1.70 meters, 1.25 meters, and 0.98 meters in height, partly in rock and partly in earth.

(*d*) The auxiliary collectors, inspection chambers, etc.

The plans, calculated cost, and sheet of conditions can be obtained in Montevideo on application direct by letter to the "Ministerio de Fomento" and through the various legations of the Republic established abroad. Tenders will be opened in Montevideo on Monday, December 15 next, at 3 p. m., at the office of the Minister of Public Works, in the presence of such bidders as may attend.

The Government reserves to itself the right to reject all or any tender and to accept the one it judges most convenient.

VENEZUELA.

NEW TARIFF LAW.

[In force since July 1, 1902.]

The Congress of the United States of Venezuela decrees:

ARTICLE 1. Foreign merchandise imported through the custom-houses of the Republic shall be distributed into nine classes, as follows:

Class No. 1, paying 5 céntimos of bolívar per kilogram.
Class No. 2, paying 10 céntimos of bolívar per kilogram.
Class No. 3, paying 25 céntimos of bolívar per kilogram.
Class No. 4, paying 75 céntimos of bolívar per kilogram.
Class No. 5, paying 1.25 bolívares per kilogram.
Class No. 6, paying 2.50 bolívares per kilogram.
Class No. 7, paying 5 bolívares per kilogram.
Class No. 8, paying 10 bolívares per kilogram.
Class No. 9, paying 20 bolívares per kilogram.

Paragraph I.—Class No. 1, paying 5 céntimos of bolívar per kilogram.

1. Apparatus and machinery for generating steam by means of petroleum residues.
2. Apparatus and machinery for lighting with gas and electricity.
3. Hatching apparatus.
4. Fire engines.
5. Calcium carburet.
6. Hydrographic and navigation charts.
7. Carriages, accessories, and materials intended exclusively for railroads.
8. Wood ashes, residues of pressed grapes, guano, and every other substance, vegetable, mineral, or artificial, used as fertilizers and not included in any other class.
9. Roman cement.
10. Tileston roofing cement.
11. Springs, axletrees, rims, and boards for carts and carriages to be constructed in the country.
12. Geographical or astronomical globes, atlases, and printed or lithographed maps and topographical plans of all classes.
13. Rennet.
14. Eggs.
15. Native iron and scrap iron in pieces, both for smelting purposes.
16. Books printed, unbound or bound in paper, treating of science, arts, and trades, catalogues, newspapers, and writing samples for primary schools.
17. Wood prepared for shipbuilding, logs of pine, pitch pine for masts and square or round beams of pitch pine, oak or other common wood not specified exceeding 25 centimeters intended to be sawn into planks, beams, or into any other form.
18. Machines and apparatus for electrical telegraph.
19. Steam motors of all kinds and all the appurtenances thereto.
20. Windmills and all the appurtenances thereto.
21. Unmanufactured gold and silver.
22. Unmanufactured platinum or white gold.
23. Living plants of all kinds; herbariums or collections of dry plants other than medicinal.
24. Bridges with their chains, floors, and other accessories when intended for public use or agricultural purposes; otherwise they pay duty on the materials of which they are composed.
25. Clocks for public use if not imported by order of the National Government.

26. Seeds, if not alimentary, for sowing purposes.

27. When empty, ordinary glass bottles are imported in boxes, to be afterwards used to carry the same number of bottles when filled, the bottles and the boxes shall pay the respective duty to which they are liable under this law.

28. Articles in which goods exempt from duty or burdened with lower duties are imported, such as trunks, carpetbags, portmanteaus, or cloths which are not thereby deteriorated in value, shall be weighed apart and shall pay the duty of the class to which they respectively belong.

Class II.—Duty 10 centimes of a bolivar (1.93 cents) per kilogram.

29. Sulphuric acid and liquefied carbonic-acid gas.

30. Bran, wheat, corn, linseed, oats, barley, and other cereals and cakes of the same for cattle fodder.

31. Fishhooks and iron wire, galvanized or otherwise, not wrought.

32. Almagra, ocher, chalk, Spanish white, clay, *caput mortum*, and all earths for building purposes not specified.

33. Mineral or vegetable tar, asphalt, raw petroleum, and bitumens of all kinds except blacking.

34. Hoops of iron or wood for casks, barrels, and sieves.

35. Mineral waters.

36. Rice in the grain and oats.

37. Iron bars (as tools).

38. Common bottles of ordinary black or white glass for bottling liquors, aërated waters, and sterilized milk, and empty demijohns and square bottles of similar glass, generally used for importing gin.

39. Hydraulic pumps and their pipes, valves, and other accessories.

40. Boats and lighters, whole or in detached pieces, and the ores and sails for the same.

41. Tar, pitch or rosin.

42. Hydraulic lime, common lime, and all other similar materials for building purposes not elsewhere mentioned.

43. Parings and wastes of skins and dried sheep intestines, such as are used by sausage makers.

44. Hemp or tow, raw or twisted for calking; tarred tow and cotton wastes for cleaning machines.

45. Conduits or pipes of iron or lead, and the joints or connections for said pipes.

46. Cardboard in the paste and the filtering material used in breweries.

47. Waterproof cardboard for roofing and other purposes.

48. Carts and wagons.

49. Wheelbarrows and fire ladders:

50. Barley in the grain.

51. Rye and wheat in the grain.

52. Coaches, chaises, gigs, omnibuses, phaëtons, and all kinds of vehicles not otherwise mentioned.

53. Bark of oak, yew, and other trees, used in tanning, and bone ashes.

54. Flour of barley, chick-pease, "DuBarry's Revalenta," and any flour not otherwise mentioned.

55. Ice imported into ports where ice factories established with permission of the Government are running.

56. Iron in bars, round or square, in plates or sheets, intended to make boilers or tanks.

57. Bricks for polishing knives.

58. Bricks, even if fireproof, slabs and tiles of baked clay, jaspar wood, or any

other material for pavements not exceeding 60 centimeters; tiles of clay or slate, and all kinds of common unwrought stone.

59. Firewood and charcoal in pieces.

60. Common wood such as planks, beams, and joists of pitch pine, and other wood, not planed, tongued, or grooved, less than 25 centimeters in thickness and pine wood not specified, of whatever dimensions.

61. Maize in the grain.

62. Apples, grapes, pears, and all other fresh fruits.

63. Machinery, tanks of galvanized iron, and apparatus not specified in Class I, the total weight of which exceeds 1,000 kilograms, and ice boxes.

64. Music in sheets or book form.

65. Manioc.

66. Manila paper, and dried grass, not medicinal, such as hay and other similar, to be used as fodder for animals.

67. Pitch, common, white, black, or yellow.

68. Logwood, guaiacum, Brazil wood, mulberry wood, rose, sandalwood, and others similar, in shavings.

69. Slates for roofs.

70. Slates for billiard tables.

71. Slates with or without frames, slate books and pencils.

72. Pine resins and all other resins, not medicinal.

73. Wheels for carriages, carts, and wagons, iron axle boxes for the same, and steel wheels fitted on steel axles.

74. Epsom salts.

75. Glauber's salts and silicate of soda.

76. Sienna and black earths for cleaning purposes.

77. Tombstones or sepulchers, of marble, granite, or any other material.

78. Shingles.

79. Chalk, white, in sticks or powder, and marble and glass powder.

80. Gypsum in pieces or powder, and gypsum for casting.

Class III.—Duty 25 centimes of a bolivar (4.8 cents) per kilogram.

81. Olive oil and its imitations, and cotton-seed oil.

82. Kerosene oil, colza oil, bone oil, and so-called "esperma de cristal" oil, for machines.

83. Stearic and oleic acids; stearin, pure, unworked, and stearin mixed with paraffin, known as trade stearin.

84. Acetic, hydrochloric, or muriatic acids; boric acid and borax.

85. Nitric acid or aqua fortis.

86. Aerated waters and lemonades.

87. Steel, bronze, brass, pewter, copper, tin, pure or alloyed, lead, nickel, and zinc, in ingots, bars, rods, or plates, whether perforated or not.

88. Orange-flower water.

89. Spirits of turpentine.

90. Knitting needles of steel, wood, bone, caoutchouc, or other similar material.

91. Cotton.

92. Spike lavender.

93. Alum in lumps.

94. English yellow or chromate of lead, minium litharge, mineral manganese, white lead and carbonate of lead, asbestine.

95. Stuffed animals.

96. Advertisements of medicinal or other industrial products, in the shape of almanacs.

97. Apparatus for filtering water; telephonic apparatus and adjuncts, as transmitters, plugs, ringing keys, carbons, and covered copper wire.

98. Harness and horse collars for use with all kinds of coaches, calashes, "quitrins," omnibuses, phaetons, and all kinds of cars, wagons, and carts.

99. Ground rice, sago, salep, tapioca, and crushed maize.

100. Brown sugar, and the burnt sugar used by brewers.

101. Sulphur, flowers or paste of.

102. Scales, Roman balances with their weights, except those of copper or in which copper predominates.

103. "Barba de palo," and Spanish rush fiber.

104. Barrels, pipes, and hogsheads, put together or not, and staves imported separately.

105. Wimbles and augers for perforating stones and trunks.

106. Pottery, glazed or not, in any form not otherwise mentioned.

107. Zinc, white and white bole.

108. Canes, reeds, rushes, palm, straw, not otherwise mentioned, and ozier, not worked, for the manufacture of brooms.

109. Sporting shots and bullets.

110. Cables, rigging and cordage.

111. Bowls for tobacco pipes and common clay and faïence pipes not combined with any other material.

112. Cannon of all kinds.

113. Beans of all kinds, chick-pease, lentils, Spanish beans, and all kinds of pulse, garden produce, and alimentary roots, unprepared.

114. Cloth, unbleached and coarse cloth called "coleta," unbleached No. 3, common packing cloth, generally employed for cacao and coffee sacks and for packing, the color of which, naturally dark, has not been changed by a preparation intended to bleach them, even when with colored stripes and checks.

115. Charcoal in powder, boneblack, and lampblack.

116. Meat, salted in brine, or smoked hams or shoulders not in tins, bacon and tongues, with the exception of jerked meat "tasajo," the importation of which is prohibited.

117. Packing cloth lined with paper, fine pasteboard or thick office paper for visiting cards and other purposes, including waterproof paper for presses.

118. Chloride of lime and cyanide of potash.

119. Sieves of iron wire.

120. Hair grass and similar vegetable fibers.

121. Wax for shoemakers.

122. Beer and cider.

123. Creoline and all disinfectants, liquid or in powder.

124. Copper—old and scrap.

125. Portable kitchens of iron or other metals.

126. Hearses, including the lanterns, feathers, plumes, and all other accessories thereto, even when subject separately to higher duties, provided they be imported together with the hearses in the same or in another package.

127. Chalk—white or red, in lumps or in powder.

128. Crucibles of all kinds.

129. Pickles in vinegar, except olives and capers.

130. Juniper berries.

131. Emery in lumps or in powder.

132. Esparto—raw.

133. Fuses and quick matches for mines and the lubricating tow for putting together machinery.

134. Copper scupper nails.

135. Fountains or basins of iron, marble, or any other material, and statues, busts, vases, and urns, of marble, alabaster, granite, or other similar stones.

136. Sago flour.

137. Biscuits of all kinds without any sugar.

138. Fluid gas and orozus.

139. Gum arabic.

140. Wheat flour and semoline prepared for making vermicelli, crushed wheat, and oatmeal.

141. Tools and instruments, such as hammers, sledge hammers, hatchets, capstans, forges, bellows of all kinds, cranes, "mollejones," large screws for blacksmiths, bickerns, anvils, and other similar tools and instruments.

142. Manufactures of iron: Wire and wire netting for mattresses; anchors and chains for vessels; safes; mortars; furniture; copying presses and machines for stamping paper; nails; tacks; hobnails; rivets, and scupper nails; buildings not erected, or separate parts thereof, such as balconies, doors, balustrades, gratings, columns, roofs, even when imported separately; statues, urns, flowerpots, busts, and all other similar ornaments for houses and gardens; weights for scales; flatirons; posts for fences; stoves; boilers; "budares" kettles; broilers; pots; frying pans, and other household utensils, tinned or not, with the exception of similar articles of sheet iron and tin plate, which pay duty according to Class IV. Galvanized iron nails and washers are also included in this third class.

143. Tinned plate and sheets of tinned paper used for lining trunks.

144. Bones, horns, and hoofs not manufactured.

145. Cotton, Holland cloth, blue.

146. Toys of all kinds and of whatever material, including marbles.

147. Printed books, unbound or bound in paper, not comprised in Class I, pamphlets, copy books, and books intended for primary instruction, imported simply stitched or bound in cloth.

148. Sandpaper on paper or linen.

149. Linseed or linseed meal and colza seed.

150. Flax, raw.

151. Earthenware, common and faïence, glazed or not, in articles of all forms, not mentioned in other classes.

152. Walnut wood.

153. Wood, fine, for musical instruments, cabinetwork, etc.

154. Wood in fine sheets for veneering.

155. Wood, sawn, planed, or dovetailed.

156. Lard and butter.

157. Machines, reservoirs of galvanized iron, and apparatus not otherwise mentioned and not exceeding 1,000 kilograms in weight. When machines are imported with extra pieces, which taken separately are subject to a higher duty, the whole will be dutiable as machines when such pieces arrive in the same package.

158. Mills of all kinds not specified in Class I.

159. Ore of iron, copper, and tin, black lead, and asbestos.

160. Potatoes of all classes and sizes.

161. Paper of all kinds, not otherwise mentioned, and serpentines or paper ribbons, perforated paper, white or colored, used in carnival sports, white tissue paper in sheets 49 centimeters long by 36 wide, used to make press copy books.

162. Fish, pressed, salted, or smoked, not in tins.

163. Lithographic stones, pumice stones, stones of all kinds, and forms for grinding or whetting, fireproof stones for blast furnaces, filtering and other similar stones.

164. Colors, common, prepared in oil.

165. Pianos, even silent.

166. Saltpeter, niter, and common or calcined potash.

167. Leeches.

168. Sardines, pressed in oil with tomatoes or prepared in any other manner.

169. Tallow, prepared for the manufacture of stearin candles or stearin.

170. Soda, common or calcined.

171. Carbonate of soda, crystallized.

172. Sulphate of iron or green copperas.

173. Sulphate of copper or bluestone.

174. Iron-wire netting, not otherwise mentioned, and wire hooks.

175. Turpentine, common or of Venice, and paste or extract of logwood.

176. Poison, for preserving skins.

177. Glass plates not silvered, white or colored.

178. Vinegar, common and empyreumatic, and brandy from the residues of pressed grapes.

179. Wines of all kinds in casks, pipes, or barrels, except when medicinal.

180. Coffee winnowers.

181. Sumac, powdered or not.

Class IV.—Duty 75 centimes of a bolivar (14.46 cents) per kilogram.

182. Linseed oil.

183. Fish oil, other than cod, and cotton-seed oil, sésame oil, and almond oil.

184. Palm oil and painters' or sicative oil.

185. Olives, capers of all kinds.

186. Oil and vinegar cruets and castors, not having any part of gold or silver, which come under Class VIII, or those of German silver, of gilt or silvered, which are comprised in Class VI.

187. Steel, iron, copper, brass, tin, tin plate, bell metal, bronze, lead, pewter, zinc, and nickel, however manufactured, not otherwise mentioned, whether polished, varnished, stained, or bronzed or not, and furnaces for the manufacture of sugar.

188. Metallic wire manufactured in frames for wigs, bird cages, racks for clothes or hats, and other similar articles, also frames for parasols and umbrellas.

189. Almonds, hazelnuts, nuts, peanuts, chestnuts, and all other dried fruits with shells, not specified.

190. Stills and all similar apparatus.

191. Siegert's bitters.

192. Beneseed, canary seed, and millet.

193. Aniseed, canary seed, Ceylon and Chinese cinnamon, garlic, cumin, origan, pepper, and other kinds of spices, for seasoning.

194. Chandeliers, globes, shades, candelabra, candlesticks, beacons, street lamps, lamps, lanterns, hanging lamps, etc., except those ornamented with gold or silver which are included in Class VIII, and those of German silver or gilt or silvered which are taxed according to Class VI. Accessories thereof imported with the above-mentioned articles shall pay duty according to the class to which they belong.

195. Christmas trees.

196. Jet, not manufactured.

197. Sugar, white or refined.

198. Scales, Roman balances and copper weights or in which copper predominates, including weights even of iron when imported together with the scales.

199. Wooden troughs or buckets, and tubs.

200. Billiard-table cushions, and bands or belts of coarse oilcloth for steam engines.

201. Bagatelle tables with all their accessories.

202. Felt for hats, not fulled, hair for hats, paper wrappers, leather hatbands, linings, plushes, peaks for capes and kepis, ribbon of silk or cotton when it comes in pieces of not more than 80 millimeters in width, and other articles used exclu-

sively in the manufacture of hats, such as oilcloth prepared with gum-lac dissolved in alcohol, employed in the manufacture of black felt hats, and solutions of said gum in alcohol, and wool, or silk cord used in the same manufacture.

203. Shoe blacking and bituminous oil for blacking and softening harness.

204. Billiard tables with all their accessories, including the balls and cloth covers when imported together with the tables.

205. Armenian and lees of oil and lard and all other fatty substances.

206. Boxes of wood, even imported in pieces, *i. e.*, in boards for making same, and china water-closets, with their metal connections and other appurtenances.

207. Baskets, large or small, hand baskets, small carriages for children, and other articles of osier and wickerwork, including children's carriages, whatever may be the material from which made; cotton canvas covered with paper, for the manufacture of envelopes, and tissue coated with sulphate of copper.

208. Pasteboard manufactured or prepared for boxes, large and small, or in any other form, excepting for toys, masks, and playing cards. Blank visiting cards of any size are also included in this class.

209. Barley, husked or ground.

210. Sneezeroot.

211. Capsules for bottles.

212. Brushes, common, horse brushes, and those of horn or whalebone, for scrubbing.

213. Wax, vegetable, black or yellow, unprepared.

214. Bristles, and horsehair, and haircloth, used for keeping clothing in shape.

215. Wooden horses, or carousels.

216. Glue, common, in paste or liquid, and collodion for photographers.

217. Linen, unbleached, and cloth called "coleta," unbleached, No. 2, coarse cloth of the same name as that comprised in No. 119 of Class III, but which has been more or less bleached, and also "cotonia."

218. Pointed knives, common, with or without sheaths, knives with handles of wood or other common material, for fishermen, large steel knives, and machetes, and knives used in the arts and trades.

219. Varnishes of all kinds.

220. Caoutchouc made into tube or pipes, and in sheets or bands for machine belting, and in the shape of washers and rings, with linen inside.

221. Oilcloth for floors, packing, and roofing.

222. Mirrors of all kinds and plate glass silvered.

223. Spermaceti and paraffin.

224. Sea foam, a substance used in the manufacture of bread and baking powders.

225. Mats, large and small, and matting for floors.

226. Table mats.

227. Figures, ornaments, and articles of all kinds used in putting up confectionery, also gilt paper bags or cornucopias, finished or partly finished, imported for the above purpose. Should the receptacles referred to be covered with silk or velvet, or ornamented with flowers or other articles liable to higher duties, they shall, unless completely filled with sweetmeats, be placed under Class VI as fancy articles.

228. Door mats not otherwise mentioned.

229. Dried fruits.

230. Fruits in brandy, sirup, or in their juice

231. Saddletrees.

232. Artificial flowers of porcelain.

233. Biscuits or crackers in the preparation of which sugar is employed.

234. Gasoline and benzine or naphtha.

235. Gelatin of all kinds.

236. Potato, maize, and rye flour.

237. Shoemakers' thread and hemp rope for halters with core of tow, and iron buckles, whether tin, nickel, or bronze plated, for harnesses.

238. Coarse thread of hemp, and twisted lines or twine of the same material, for fishing.

239. Twine or cord.

240. Tin plate or sheet iron manufactured into articles not specified and iron utensils for domestic use when they have lids or covers of tin or brass.

241. Incense.

242. Tools used in the arts and trades, with or without handles, such as pinchers, gravers, compasses, gimlets, trowels, chisels of all kinds for carpenters, levels, gauges, jack planes, awls, files, hammers, saws, tongs and pinchers, laths, and vises.

243. Colored chalk for tailors.

244. Sirups of all kinds other than medicinal, confectionery of all kinds, sugar candy, and flavored rice flour employed for sweets.

245. Sealing wax in cakes or sticks and well cement.

246. Raw wool and sailcloth of hemp or cotton, unbleached.

247. Condensed milk.

248. Books, printed and bound, except those mentioned in Class VIII.

249. Crockery, in imitation of porcelain.

250. Porcelain and china in any way not specified.

251. Hops.

252. Wood manufactured into articles not otherwise mentioned.

253. Manigraphs.

254. Furniture of iron and wood.

255. Marble, jasper, alabaster, granite, and other similar stones, wrought or polished in articles not otherwise mentioned.

256. Maizena.

257. Wicks and twists for lamps and chimney cleaners.

258. Mustard in the grain or in powder.

259. Furniture of common wood, osier and straw or cane.

260. Organs and all kinds of parts thereof imported separately.

261. Ostein and oleomargarine.

262. Wood in strips for making matches.

263. Wooden colts covered with flax.

264. Paste or mastic for polishing and that used for the tips of billiard cues.

265. Wall paper, including black and albuminated paper.

266. Composition imitating porcelain, marble, granite, or any fine stone, in all kinds of articles, except toys for children.

267. Paper for cigarettes not otherwise mentioned, even when bearing on it, printed or lithographed, the name of the manufacturer, or of the manufacture, for whose use it was made.

268. Flints, touchstones, polishing and similar stones not included in the other classes.

269. Hides, neither tanned nor prepared.

270. Shovels made altogether of wood.

271. Solders.

272. Leather tips for billiard cues.

273. Cheese of all kinds.

274. Sacks—empty, of canvas, unbleached, and thick linen or other similar fabrics.

275. Sausages, hams in cans, fish in cans, alimentary preserves, mushrooms, dried or in sauce; lacteous flour and all other similar foods, prepared or not prepared, not included in the preceding classes, such as Buitoni's agglutinated paste.

276. Sauces of all kinds and pickles in mustard.

277. Tallow—raw, rendered or pressed, and ordinary fats of all kinds for making soap.

278. Siphons and machines for aerated waters.

279. Sole leather, dyed or not, unmanufactured, and hempen soles for sandals.

280. Piano stools of whatever material.

281. Talc in sheets or in powder.

282. Horsehair or bristles for fishing rods.

283. Meat covers of wire gauze.

284. Stoppers with heads of metal, glass, crystal, or porcelain.

285. Fabrics of cotton, hemp, esparto or flax for floor coverings, even when mixed with a small quantity of wool, and haircloth for furniture.

286. Canvas prepared for oil paintings and stumps for drawing.

287. Cloth—common, of hemp, flax, or cotton,. for furniture, in bands, or any other form, and cotton dishcloths for domestic use and straw ribbon for packing.

288. Wooden heels, shod or not with copper or iron.

289. Strips of tinned stuff or paper for shoemakers of 1 centimeter in width and 12 centimeters in length.

290. Bootjacks and corkscrews.

291. Chalk in sticks, lumps, or other form for billiard rooms.

292. Shades and blinds for doors and windows.

293. Firecrackers, called "triquitraques," and the fuses for rockets.

294. Rubber tubes and hose and bands for machinery.

295. Sails of coarse twilled cloth for vessels.

296. Tallow candles.

297. Bicycles, or velocipedes.

298. Glass and crystal, manufactured, in any form not elsewhere mentioned.

299. Wines of whatever description, when imported in demijohns or bottles, excepting medicinal wines.

300. Articles of gypsum of all kinds, excepting toys.

Class V.—Duty 1.25 bolivars (24 cents) per kilogram.

301. Cod-liver oil, tartago oil, medicinal oils, and all other oils not specified.

302. Perfumed oils and soaps.

303. Arsenic.

304. Tartaric acid in powder.

305. Liquid ammonia.

306. Toilet waters and hair wash such as "florilina" and the like, and waters for cleaning metals.

307. Spirits of all kinds, brandy or cognac and its essences, absinth, gin and its essences up to 22° Cartier; above 22° they shall pay proportionally; bitters not otherwise specified, such as the elixir bitter of coca, are included in this class.

308. Peeled almonds.

309. Apparatus for measuring hats.

310. Photographic apparatus and implements used for making same, not included in other classes.

311. Shapes of gummed stuff for hats and caps.

312. Rings and buckles covered with leather.

313. Strops and fine stones for sharpening razors and razor paste.

314. Saffron.

315. Quicksilver.

316. Trunks, traveling sacks, bags, valises, and portmanteaus of all kinds.

317. Skins for carrying wine and purses and small bags of oilcloth for grain samples.

318. Trusses, bandages, bougies or probes, supporters, lint, strainers or filters, sucking bottles and nipples, cupping glasses, anodyne necklaces, spatulas, lancets, retorts, clysters, syringes of all kinds, and siphons not otherwise mentioned.

319. "Bramante," "brin" ticks, drills, domestic cloth, "liencillo," "platilla," "warandol" or Irish linen, and all other unbleached similar cloths even if they have colored lines or flowers, and Holland linen, black or blue.

320. Paint brushes of all kinds.

321. Hat cases of leather.

322. Almanacs of all kinds.

323. Camera obscure or camera lucid, for drawing or photography, and other similar apparatus.

324. Cotton canvas for embroidering, and canvas of unbleached thread similar to the light tissues used for mosquito nets.

325. Capsules, sacks or bags of paper, of all kinds and sizes, with or without inscriptions, for pharmaceutical purposes.

326. Tortoise shell, crude.

327. Homespun linen, white "coleta," "lienzo de rosa," camel's back, cotton cretonne, and linen unbleached German cretonne, Nos. 9, 10, and 11, striped or checked crehuela, colored or not, and all other similar cloth not mentioned in other classes.

328. Sieves of copper wire, of leather, wood, or horsehair.

329. Brushes for the teeth, hair, and clothes, and all others, except those included in the fourth class.

330. White wax, pure or mixed, not wrought, and mineral wax.

331. Bristles for shoemakers.

332. Fish glue and liquid glue for shoemakers.

333. Colors and paints not otherwise mentioned, such as bluing, ultramarine, and "kalsomine" earth of several colors, and paints prepared with oil to be used for enamel.

334. Cork in sheets, stoppers, and in any other shape.

335. Shoe strings, ordinary cotton braids for sandals, and all other linen or cotton shoe strings and cord, twisted or untwisted, provided that they consist of ten or more threads.

336. Amethyst quartz.

337. Cubebs.

338. Penknives, razors, scissors, and "jackknives," table knives and forks, except those which have gilt or silver handles, which belong to the VIII Class, and those gilt or silvered, which are included in Class VI.

339. Cords and "entorchados."

340. Beer, concentrated or pectonized.

341. Sassafras and all other medicinal barks.

342. Cotton drills, white or colored, and cotton flannel, white or colored; also cotton drill called "casinette," and cotton batiste and the fulled cloth used for towels, bath or hand.

343. Drugs, medicines, and chemical products not otherwise mentioned; also all vermifuges or medicinal articles or substances, such as bicarbonate of soda, beef wine, Bisteri cinchona wine, cardamom seeds and plants, and all patent medicines, drugs, and chemical products not specified elsewhere, and dynamite.

344. Oilcloth of all kinds not otherwise mentioned, except those used for flooring, packing, or roofing, included in Class IV.

345. Cotton buckram.

346. Brooms, large and small, and horsehair brooms.

347. Essences and extracts of all kinds not otherwise mentioned.

348. Sponges.

349. Stereoscopes, cosmoramas, dioramas, panoramas, magic lanterns, phonographs, graphophones, and other similar apparatus.

350. Paper lanterns, paper collars, fronts, and cuffs, including those lined with cloth, and manufactured paper not otherwise mentioned.

351. Foils, masks, breastplates, and fencing gloves.

352. Matches of all kinds, not specified, and match stuff in paste.

353. Photographs.

354. Cotton blankets.

355. Woolen blankets, white or with colored fringes, and dark blankets of the material called "cabrin."

356. Gum lac, copal, and all kinds of gums and resins not otherwise mentioned.

357. Horsehair gloves, and fencing gloves.

358. Glycerin.

359. Ordinary sewing thread, untwisted thread for embroidering, and thread of one end for weaving.

360. Loadstone.

361. Images and statues other than those of gold or silver, and mechanical manikins of life size.

362. Musical instruments and boxes, and all accessories thereof, excepting organs and pianos.

363. Surgical, dental, anatomical, mathematical, and other scientific instruments not elsewhere mentioned.

364. Soap, white, marbled, called "Castille" or "Marseilles."

365. Soap, common, soap in powder, and rock salt for animals.

366. Sets of chessmen, draughts, dominos, roulette, and similar games, and playing cards of all sorts.

367. Pictures and engravings on paper.

368. Blank books, crayons and charcoal pencils for drawing, notebooks and portfolios, lithographed receipt and check books, pencils of all kinds, except slate pencils, rubber erasers, seals and stamps for letters, writing ink and ink powder, paper cutters, pencil cases, sealing wax and wafers, sand, steel pens, penholders, inkstands, and all other stationery articles, with the exception of envelopes and articles containing gold and silver.

369. Books containing gold or silver leaf, whether real or imitation, for gilding or silvering; bronze in powder and books for bronzing.

370. Liquor stands, empty or with liquor.

371. "Liencillo," "brin," and domestic cloth, bleached or unbleached, linen or cotton.

372. Iron filings.

373. Striped cloth, "arabias," ginghams of linen or cotton, common, that is, such as have only thirteen strands in the warp or woof of each square of 5 millimeters.

374. Wooden battens, moldings, and cornices, painted, varnished, gilt or silvered, and wooden curtain loop holders.

375. Colored cotton duck, and linen, cotton, or woolen straps, from 7 to 15 centimeters wide, for saddle girths and upper girths.

376. Liqueurs, or cordials, such as cherry cordial, creams of vanilla, cocoa, and the like.

377. Madapolan, Hollands, Brittany, domestic, sheeting, Irish, white or colored, cretonne, "elefante," "platilla," "liencillo," Rouen, calico, "savage" of cotton, and other similar white cotton goods.

378. Picture frames of any material, with or without glasses, pictures, plates, or engravings.

379. Masks of all kinds.

380. Macaroni, "tallarines," vermicelli, and other similar soup pastes.

381. Tape measures of leather, linen, or paper, with or without cases.

382. Furniture of fine wood, such as rosewood, mahogany, and walnut, and that with backs and seats upholstered with horsehair, wool, cotton, or silk, furniture of common gilt wood and coffins of all sorts.

383. Gallnuts, nutmegs, and mace.

384. Screens of paper, metal, or tissue.

385. Gum pastilles or drops.

386. Perfumery of all kinds, and perfumed books of "papier poudré."

387. Parchment and imitations of the same, in articles not otherwise mentioned; cloth only used for bookbinding, and waterproof cloth of caoutchouc and cotton used for blankets and winter overcoats, and cotton felt for lithographic machines.

388. Aerometers of all kinds and alcoholometers.

389. Paintings, chromos, drawings, and portraits on canvas, wood, paper, stone, or other materials; lithographed advertisements applied on cardboard and cards with colored landscapes or figures, used in baptismal festivities.

390. Tissue paper and writing paper when bearing something printed, even if imported for private use.

391. Bottle and glass stands.

392. Gunpowder.

393. Tobacco, cut for cigarettes. This article shall pay the additional duty of 2 bolivars per kilo.

394. Tannin.

395. Tea and vanilla.

396. Indian ink, hair dyes, and all other inks not specified.

397. Candles of spermaceti, paraffin, composition, or stearin, and twisted wicks for the same.

398. Dowlas warandol, unbleached, of linen or cotton, even with colored stripes or flowers, also that with a lead-gray or light-yellow ground.

399. Tinder boxes and flints or wicks for tinder boxes.

Class VI.—Duty 2.50 bolivars (48.2 cents) per kilogram.

400. Bugles and beads of glass, porcelain, steel, wood, or of any other material excepting gold and silver; coffin ornaments; fancy articles of glass or porcelain mounted in gilt or silvered metal; artificial plants of caoutchouc, paper, or tissue, representing palms, begonias, and large leaves; and sweetmeat boxes covered with silk or velvet, or ornamented with flowers or other articles liable to higher duties than those levied under Class IV.

401. Steel hoops for crinolines or bustles, covered or not with tissue.

402. Damasks, drills, Brittany cloth, unbleached cloth, "bramante," ticks, dowlas, excepting unbleached German dowlas Nos. 9, 10, and 11, specified in Class V, "estopilla," "estrepe," "garantido," Irish linen, "florete," "platilla," Rouen, calico, white or dyed dowlas, warandol of linen, pure or mixed with cotton, and any other similar goods of linen or linen mixed with cotton.

403. Pins, needles, eyelets, hooks and eyes, clasps for clothes and shoes, zinc clasps for shoes, buckles for hats, waistcoats, trousers, and shoes, except those of gold or silver.

404. Carpets in the piece or rugs.

405. Undershirts, scarfs, bonnets, socks, drawers, trousers, stockings, and underwaists, of cotton, knitted, and like tissues. Undershirts with collars and cuffs, or fitted for same, shall pay 50 per cent additional.

406. Field glasses, spectacles, opera glasses, telescopes, eyeglasses, lenses, microscopes, except those of gold or silver, including glasses and lens, etc., imported separately.

407. Whalebone and its imitations.

408. Chamois and tanned skins, not manufactured, except the white or colored sole leather, which belongs to Class IV.

409. Barometers, hygrometers, chronometers, thermometers, sextants, octants, and other similar instruments, and compasses of all classes.

410. Canes, whips, and slung shots, with the exception of sword sticks or sticks containing a mechanism for firing, which are included in Class VII.

411. Buttons of all kinds, excepting those of silk, silver, or gold.

412. Baize and ratteens, in piece or plaids, and blankets made of these materials.

413. Bowls for pipes, cigar holders and pipes, of amber, porcelain, and any other material except those of gold or silver and those mentioned in Class III.

414. Shaving boxes with accessories, work and traveling cases.

415. Shells, loose, or made up into ornaments.

416. Pocketbooks, cigar and cigarette cases, cardcases, purses, tobacco pouches, spectacle cases, match boxes, albums, not covered with velvet, nor gilt nor silvered, and all other similar articles except those which have gold or silver.

417. Wax, manufactured into articles of all kinds, except toys.

418. Counterpanes, sheets, plaids, hammocks, table covers, of linen or cotton.

419. Elastic for shoes.

420. Coral in articles of all kinds, except when set in gold or silver.

421. Funeral wreaths and other funeral articles.

422. Thin cord, white, linen or cotton, twisted or untwisted, of less than ten threads, and also twisted linen in the shape of cord, such as binding or sail thread, which can not, on account of its elasticity, be assimilated to cord or be used in the manufacture of hand or machine made fabrics.

423. Crinolines, bustles, and similar articles, and caoutchouc dress shields covered or not, used inside of ladies' clothing.

424. Knives and forks with German or white metal, or silvered or gilt handles.

425. Mattresses, pillows, paillasses, and cushions, except those of silk; feathers for stuffing them, and woven-wire mattresses.

426. Cotton ropes for hammocks.

427. Damasks, "coqui," bombazine, "bordon," padding, ticking, "mahon," nankeen, light nankeen, "estrepe," quilting, sateen, "tangep," or stiff muslin, of cotton, white or colored, and other similar cotton tissues not mentioned in the other classes.

428. Thimbles, not of gold or silver, and artificial teeth and eyes.

429. Skirts, petticoats, dressing gowns, nightdresses, and dresses of cotton, made up or in patterns, and cotton goods in patterns for petticoats, with or without embroidered bands.

430. Articles of German or white metal or its imitations, such as trays, dishes, curbs, bits, muzzles, spurs, stirrups, hinges, buckles, chandeliers, lamps, candelabra, and other similar articles.

431. Articles of iron and other similar metals, gilt or silvered, with the exception of stationery, which shall always be included in Class V, even when gilt or silvered.

432. Yarns, worsted, raw, and of goats' hair.

433. Cases containing small articles of steel, copper, or other metals, for embroidering, cleaning the teeth and nails, and for drawings and paintings.

434. Brooms and brushes of palms, rushes, or other vegetable fibers.

435. Felt in pieces for saddle cloths.

436. Blankets or quilts of pure wool, or wool mixed with cotton, and with ground of one or more colors, and counterpanes, of wool, or wool mixed with cotton, also colored.

437. Goods for slippers, excepting of silk.

438. Elastic for shoes.

439. Gutta-percha, manufactured or not, and rubber shoes.

440. Imitation gold or silver thread, thin wire, spangles, tinsel, leaf, foil, galloons, trimmings, small wares, and other articles of imitation gold or silver, for embroidering or sewing.

441. Bone, ivory, mother-of-pearl, real and imitation jet, real and imitation tortoise shell, caoutchouc, india rubber, sheets of celluloid, horn and talc, manufactured in articles of all kinds not otherwise mentioned, with the exception of children's toys comprised in Class III, and those combined with gold and silver, which are included in Class VIII.

442. Table cloths, towels, and napkins of all classes.

443. Sheeting of pure linen or of linen mixed with cotton.

444. Clock and watch hands, keys, springs, spirals, and other parts of watch and clock movements, excepting those of gold and silver.

445. Wicks and cotton slightly spun for wicks.

446. Cotton handkerchiefs, when not more than one meter long.

447. Paper, gilt or silvered, paper stamped in relief, and colored paper for artificial flowers.

448. Umbrellas, sunshades, and parasols, of wool, linen, or cotton.

449. Imitation pearls and stones, not set, or set in any metal except gold or silver.

450. Rice and other toilet powder, such as Persian shell calcined. Powder puffs also belong to this class.

451. White metal or German silver, in articles of all kinds not specified.

452. Goose quills prepared as toothpicks.

453. Feather dusters.

454. Imitation jewelry.

455. Table or wall clocks, alarm clocks, water clocks, hourglasses, and all other clocks, except tower clocks imported by the Federal Government for public use, belonging to other classes.

456. Hats, caps, hat frames and bonnets, of straw, or its imitations, not trimmed.

457. Patent leather, not manufactured.

458. Chewing tobacco, in paste or twisted, and cigarette paper whether in bobbins or in the form of Egyptian cigars.

459. "Dowlas," warandol, white or of linen, or of linen mixed with cotton.

460. Chintz, nainsook, calicoes, cretonnes, carlancanes, paper cambrics, fine French striped cloth, and other fine tissues, which have more than thirteen threads in the woof in a square of 5 millimeters, poplins, "malvinas," Japanese cloth, lustrines, colored percales, and any other cotton cloths, colored, similar to the above, and not otherwise mentioned under different classes, such as cotton merinos and colored canton flannel.

Class VII.—Duty 5 bolivars (96.5 cents) per kilogram.

461. Fans of all kinds.

462. Opera cloaks, of wool, or wool mixed with cotton.

463. Undershirts, of wool, or wool mixed with cotton.

464. Sword sticks and sticks with a mechanism for firing.

465. Purses of linen or cotton.

466. Stockings, socks, fringes, tassels, laces, ribbons, bands, tapes, trimmings, plushes, caps, mantles, capes, waistbands, bows, epaulettes, list shoes, gloves of wool or of wool mixed with cotton.

467. Boots and shoes only cut out or without soles, and rugs of sheepskins.

468. Woven uppers for sandals.

469. Rugs, carpets, and all other articles of crochet, except those of silk.

470. Chasubles, corporal cases, altar cloths, bands, dalmatics, stoles, maniples, chalice covers, and other ecclesiastic vestments and church ornaments.

471. Curtains, hangings, and mosquito nets, of linen or cotton.

472. Lace, embroidered bands, edgings, ribbons, borders, epaulettes, tassels, cords, fringes, scarfs, braids, gloves, and trimmings of linen or cotton.

473. Swords, sabers, daggers, fine hunting knives, blunderbusses, pistols, revolvers, guns, muskets, rifles, carbines, and other arms for artillery and infantry, including projectiles, percussion caps, gunlocks, cartridges, loaded or empty, and everything relating to side or fire arms, and compressed-air guns for target practice.

474. Pyrotechnic or Bengal lights.

475. Fireworks.

476. Back cloth for horses, all kinds.

477. Stockings of linen, or of linen mixed with cotton, and those of Scotch twisted yarn.

478. Shot bags, powderflasks, cap boxes, and game bags.

479. Muslins, crépons of cotton, colored, lawn, cotton gauze, called "rengue," barege, grenadine, organdy, zephyr, very fine linen cloth, called "clairn dulce," "sueño" tarlatan, "imité," batiste of Holland, cotton batiste, white or colored, plain, worked, transparent, or embroidered, in pieces or patterns for dresses, and all other tissues similar to the above and not included in other classes.

480. Muslins and batistes of linen, or of linen mixed with other materials, unbleached or colored, in pieces or patterns for clothes.

481. Cotton velvet, cotton plush and imitation velvet, in pieces or ribbons.

482. Fine and common woolen cloth, cassimere, bassinette, muslin, satin, knitted goods, flannel, "lanilla," bombazine, alpaca, crape, merino, serge, lasting, damask, and all other tissues of wool or of wool mixed with cotton, not mentioned in other classes, unless made up into wearing apparel, which would bring them under Class IX.

483. Shawls, foulards, and scarfs, large and small, of muslin, lawn, knitted goods, or other fine cotton tissues, and tissues made of ramié, or of cotton mixed with this fiber.

484. Handkerchiefs, shawls, table covers, of wool, or of wool mixed with cotton, neither ornamented nor embroidered with silk.

485. Umbrellas, sunshades, and parasols of silk, or of silk mixed with wool or cotton.

486. Skins, tanned, manufactured in any shape, not mentioned in other classes.

487. Guipure or tulle, of cotton or pita, and crape bands for hats.

488. Saddles, headpieces, gun cases and pistol holsters, reins, girths, cruppers, and sheepskin horse covers of all kinds.

489. Tobacco leaf, and tobacco stalks.

Class VIII.—Duty 10 bolivars ($1.93) per kilogram.

490. Ornaments and nets for headdress of all kinds.

491. Human hair and its imitations, worked or not.

492. Shirts, made up, of cotton, without any part of linen.

493. Cigarettes, of paper or maize leaf.

494. Neckties, cotton, haircloth, or wool.

495. Suspenders, corsets, corset covers, garters of all kinds.

496. Skirts, petticoats, nightdresses, pillowcases, dresses, of linen or linen mixed with cotton, except those of batiste or "clarin" lawn, of linen or linen mixed with wool, which belong to Class IX.

497. Flowers and fruits, artificial, not otherwise mentioned, and materials for making flowers, with the exception of colored paper, comprised in Class VI.

498. Skin gloves, with the exception of fencing gloves, belonging to Class V.

499. Dutch batiste, light tissue "clarin," knitted goods, zephyr, lawn, tarlatan, muslin, and all other fine linen or cotton tissues made up into articles such as frills, ruches, infant capes, skirts, cuffs, chemisettes, and other similar articles and adornments not mentioned in other classes.

500. Books and albums bound in velvet, silk, mother-of-pearl, tortoise shell, ivory, Russian leather, with ornaments gilt or silvered.

501. Handkerchiefs of linen or linen mixed with cotton.

502. Book covers imported separately, and removable book covers.

503. Feathers for hats and bonnets, and other similar uses, and hearse plumes, imported separately from the hearses.

504. Cloths or tissues of all kinds, mixed or embroidered with gold or silver, real or imitation, except ecclesiastical articles and ornaments which belong to Class VII.

505. Cloths or tissues, woolen or of wool mixed with cotton, prepared for mosquito nets, hangings, curtains, or other articles not enumerated.

506. Tobacco manufactured and prepared in whatever form, not specified. Cigarettes with tobacco wrapping.

Class IX.—Duty 20 bolivars ($3.86) per hectogram.

507. Shirts made up of linen and of wool, and those of cotton mixed with linen, pants, jackets, blouses, vests, drawers, paletots, sacks, coats, and any other piece of clothing made up of linen or cotton, for men, not specified.

508. Collars, bosoms, and cuffs made up of linen or cotton, for men and women.

509. Bag nets (chinchorros) of all kinds.

510. Placards, show cards, and handbills printed or lithographed.

511. Cigarette wrappers.

512. Shoes and boots of all classes, and tanned skins made up in shoes.

513. Skirts, petticoats, nightgowns, pillow cases, and dresses of baptiste or clarin lawn, linen, or of linen mixed with cotton.

514. Labels of all kinds, printed or lithographed, which are not attached to any article, and printed visiting cards, with or without colored designs.

515. Jewels, pearls, precious stones, and fine jewelry, and articles wholly or in part of gold and silver, watches of any material, empty watch cases, and jewelry cases, even if imported separately.

516. Cloths ("paño" and "pañete"), cassimer, satin, knitted goods, flannel, "alepin," alpaca, "cambrón," serge, "cúbica," damask of wool, or of wool mixed with cotton, made up in men's clothing.

517. Silk, pure or mixed with other materials, and tissues of other materials mixed with silk.

518. Envelopes of all kinds, finished or only cut out.

519. Hats, bonnets, "pavas," and caps trimmed for women and children.

520. Hats of black silk plush, with high crowns, and similar hats of any material, including opera hats, hats simply cut out, hats of fulled felt, and all other kinds of hats, wholly or partially finished, excepting those of straw or their imitations.

521. Advertisement cards (large), printed or lithographed.

522. Tarlatan, silk, wool, batiste of Holland, light tissue "clarin," zephyr, lawn, muslin, and all other tissues of linen or cotton, made up into ladies' wearing apparel.

523. Men's clothing of wool, linen, or cotton, with the exception of that mentioned in other classes.

Art. 2. The customs duties established by this tariff shall be levied on the gross weight.

Art. 3. The following articles shall be admitted free from duty:

1. Articles imported by order of the Federal Government.

2. Live animals, with the exception of leeches.

3. Personal effects brought by foreign public ministers, or by the diplomatic agents of the Republic on their return to Venezuela.

4. Baggage brought by passengers, with the exception of those articles which have not been used, or of pieces of furniture, which shall pay duty according to its class,

even if used, subject, however, to a rebate proportionate to the deterioration resulting from use.

The duty to be levied on unused articles coming with passengers' baggage shall be increased by 20 per cent, and if the articles come from the Antilles they shall pay 30 per cent additional.

5. Ice imported into localities where no ice factories authorized by the Government have been established, or where the established ones are not in operation; coal; coal used to produce the arc electrical light, acetylene gas, and trisulphite of lime.

6. Fruits and natural products of Colombia imported through the Colombian frontier, provided that fruits and natural products of Venezuela when similarly imported into Colombia are granted the same benefit.

7. Samples of tissues in small strips, not exceeding 25 kilograms in weight, and also of wall paper, not exceeding 50 centimeters in length, or of other articles which, owing to their size or other circumstances, can not be offered for sale.

8. Legal gold coin.

9. Frames ("almas"), bottoms, or boilers of iron, gridirons, roasters ("tambores"), and rollers for pressing cane ("trapiches"), and the axles, frames, and pieces thereof.

10. Plows and plowshares, hoes, spades, sickles, billhooks, and scythes, weeding hooks, hatchets, shovels, picks, "tasies," and cutlasses with or without wooden handles, and matchets for lopping.

11. Barbed wire for fences, and also hooks for fastening the same, as shown in the illustration accompanying the decree of June 13, 1894.

12. Printing presses and typographical accessories, such as type, lines, printing ink, including inks for lithographing, and white printing paper, neither glued nor gummed, and also paper paste for making stereotype plates, and alloy of lead and aluminium employed for stereotype printing.

13. Machinery for use in agriculture, mines, weaving, sawmills, and foundries, not otherwise mentioned, and extra pieces for repairing sugar mills ("trapiches") and other agricultural machinery.

Art. 4. The importation of the following articles is forbidden:

1. Cocoanut oil.
2. Starch.
3. Indigo.
4. Cacao.
5. Coffee.
6. Molasses and honey.
7. Salted jerked meat ("tasajo").
8. Salt.
9. Sarsaparilla root.
10. Silver, nickel, and copper coins.
11. Apparatus for coining money, unless imported by the National Government.

Sole paragraph.—Should the Executive power deem it expedient to authorize the importation, through the custom-houses of the Republic, of any prohibited article, it shall fix the duty to be levied on such article, and report to Congress at its first session.

Art. 5. The Executive Power may totally or partially prohibit the importation of any kinds of tissue, ready-made wearing apparel, hats, bonnets, and caps, and debar entry thereof through the custom-houses of the Republic, if the industries and manufactories in districts producing goods of the above description have, in importance and development, reached a sufficient degree to meet the demands of consumption, provided that purchasers do no suffer in consequence of such prohibition.

Art. 6. For the importation of dutiable firearms through the custom-houses of the Republic, as well as of powder, shot, cartridges, caps, primers, flints, saltpeter, and all other explosive materials not mentioned in the present law, a special permission or order from the General Government is necessary.

Sole paragraph.—Arms of precision and all war articles exclusively intended for the arsenals can only be imported by the National Government.

ART. 7. For all articles mentioned in the tariff the material from which they are made will not be considered, the class under which placed being solely taken into account. Hence, trusses, syringes, clyster pumps, toys, masks, spectacles, portfolios, cardcases, and all other articles mentioned, shall pay the duty of the class to which they belong, whatever be the material from which manufactured, except when they are partially made of gold or silver, in which case they are comprised in Class VIII.

ART. 8. Packages containing samples of tissue in small pieces or samples of wall paper weighing more than 25 kilograms shall, for the weight exceeding 25 kilograms, pay the duty stipulated in Class III.

ART. 9. When goods or products subject to import duties are imported, such goods being unknown in the country and not specified in the tariff nor in the latest resolutions of the Ministry of Finance, the importers can state this fact in their manifests and address a petition to the Government, accompanied by a sample of the goods or products, to permit the proper denomination or classification thereof. The respective custom-house shall report upon this petition.

ART. 10. Machines, tools, and other mining apparatus can enjoy the exemption from import duties but once for each mining company, and the extra parts imported to replace the same shall not enjoy this exemption.

ART. 11. The custom-houses shall not, without previous order from the Secretary of the Treasury, authorize the importation free of duty of those articles entitled to this privilege only by virtue of existing contracts or special laws.

ART. 12. Unused foreign articles brought by passengers with their baggage shall pay, in addition to the regular duty, a surtax of 20 per cent thereon.

ART. 13. The Executive Power is authorized to increase, decrease, or abolish any of the duties of the present tariff leviable on alimentary products of primary necessity, subject, however, to reporting to Congress the measures which it deems proper to take.

ART. 14. Should articles be imported in separate parts, whether in one or more packages, the duty thereon shall be the same as if they were imported in the whole.

ART. 15. The law of October 10, 1900, and all former Executive orders on this subject are hereby repealed.

Given at the Federal Legislative Palace, Caracas, May 10, 1902.

Approved May 19, 1902.

MODIFICATION OF THE TARIFF.

The "Venezuelan Herald" of August 11, 1902, contains the following modification of the new tariff of the Republic:

[United States of Venezuela—Ministry of Finance and Public Credit—Department of Customs and Salt—Caracas, July 29, 1902.]

Resolved, In exercise of the authority conferred upon the Executive Power by Article 13 of the Import Tariff Law to diminish any classification under said tariff when unforeseen circumstances should render any such alteration necessary, the Second Vice-President, in exercise of the National Executive, has resolved:

That from and after this date, on the importation through the customs of the Republic of the hereinafter-mentioned articles, they shall be placed on the eighth class of the tariff; that is to say:

Ready-made linen and woolen shirts and those of cotton which have any part of linen, trousers, jackets, blouses, vests, drawers, coats, sacks, frock coats, and all articles of men's clothing made of linen or cotton and not included in other classes.

Collars, false bosoms, and cuffs of linen or cotton, for men and women.

Fishing nets of all kinds.

Petticoats, underskirts, pillowcases, chemises of Dutch batiste or linen clarin, or mixed with cotton.

Jewels, pearls, fine stones and gems, and articles entirely or partly of gold, watches of whatever material they may be, empty watch and jewel boxes, although imported apart.

Silk, whether pure or mixed with any other material, and silk or other clothes which contain silk.

To be communicated to the customs of the Republic for uniformity in classification and to be published.

THE SALT INDUSTRY OF THE REPUBLIC.

During the year 1901, the amount of salt exported from the mines of Zulia, Republic of Venezuela, amounted to 3,363,500 kilograms, the revenue to the nations resulting from export duties amounting to 978,537.62 bolivares. In the quantity exported must be included 598,000 kilograms sent to the Government of Tachira, the duty on which represented 169,935 bolivares.

The report of the Chamber of Commerce of Maracaibo, from which the above figures are reproduced in the "Venezuelan Herald" of August 11, further states that the salt from the mines of Coche is white and firm and that large quantities are distributed throughout the various States of the Republic. White salt is also obtained from the island of San Carlos. The yellow salt is consumed in considerable quantities in the Andes States, the only consumption of the white variety in that section being in the salting factories in the State of Zulia.

The salt for export is generally packed in gunny sacks and then in packages of 105 pounds gross weight, and the ships which take the cargoes to the ports on the coast of Lake Maracaibo and its tributary rivers take it on board at the very places where it is mined. That used in the State of Zulia is packed in sacks of 125 pounds net, and is brought to Maracaibo in schooners. It is then distributed to all the State of Tachira and a part of the Department of Santander, in the Republic of Colombia, where salt of other classes finds no market. The salt industry has suffered considerably since the imposition of heavy duties on the commodity.

PEARL FISHERIES CONCESSION.

The Minister of Fomento of the United States of Venezuela, thereto authorized by the Federal Executive and in execution of the resolution passed this day, of the one part, and of the other, Mr. NEMECIO COATS, attorney of Mr. MARCUS GRUMBERG, of Paris, cessionary of Mr. SEBASTIAN CIPRIANI of the contract entered into by the latter with the National Government of the 17th of July, 1900, have agreed as follows:

ARTICLE 1. MARCUS GRUMBERG undertakes:

1. To pay to the National Government as 10 per cent due to it under article 2 of the said contract 2,000 *bolivares* monthly as industrial license and 50 *bolivares* on each kilogram of pearls exported. The first of these sums shall be paid only in the months in which GRUMBERG carries on the fishing by virtue of his contract.

2. To pay to the National Government 10 per cent on the gross sales which he has made up to this date of pearls fished in execution of this contract.

3. Not to institute any claim whatsoever for the time during which the contract was suspended nor for any other cause transpired before this date; and

4. Not to use drags or other like apparatus for the purpose of fishing pearls, but shall use for the taking of the mother-of-pearl only diving bells and other submarine apparatus which will not destroy the oyster beds.

ART. 2. The Federal Executive accepts the conditions of this contract in their entirety.

Made in duplicate at Caracas this 4th day of July, 1902, year 92 of the Independence and 44 of the Federation.

ARNALDO MORALES.
NEMECIO COATS.

TRADE WITH THE UNITED STATES.

For the first eleven months of the fiscal year ending June 30, 1902, the imports received from the United States by Venezuela aggregated $2,648,307, as compared with the corresponding period of 1901. Exports from Venezuela to the ports of the United States for the same eleven months' period amounted to $5,913,225, as against $6,034,556 for the corresponding months of the preceding year. From these figures it appears that Venezuela exports nearly double the value of goods received from the United States.

THE WORLD'S WHEAT CROP.

The world's wheat crop is a large one. The Liverpool "Corn Trade News" says it is almost the largest ever raised. Their latest estimate, in quarters of 8 bushels each, of the crop in America and Europe compares as follows with recent seasons:

	1902.	1901.	1898.
	Quarters.	*Quarters.*	*Quarters.*
France	42,000,000	38,000,000	45,600,000
Russia	52,000,000	50,000,000	50,800,000
Austria-Hungary	26,000,000	22,000,000	23,400,000
Italy	14,500,000	15,700,000	16,700,000
Germany	17,000,000	11,500,000	16,500,000
Spain	14,000,000	14,500,000	13,600,000
Portugal	1,200,000	1,200,000	1,100,000
Roumania	10,500,000	8,800,000	7,100,000
Bulgaria	3,600,000	3,300,000	4,000,000
United Kingdom	6,500,000	6,700,000	9,300,000
Belgium	1,600,000	1,500,000	2,100,000
Tolal, chief countries of Europe	188,900,000	173,200,000	190,200,000
United States of America	85,000,000	94,000,000	89,100,000
Canada	11,000,000	10,500,000	8,200,000
North America	96,000,000	104,500,000	97,300,000
Total, Europe and North America	284,900,000	277,700,000	287,500,000

This makes the total 57,000,000 bushels more than last year. It places the United States crop at 680,000,000 bushels. This is more than than the Government, but somewhat less than the extreme private guesses.

The official figures of the Indian wheat crop for 1902 show a total yield of 244,335,328 bushels of 60 pounds, as against 252,286,760 bushels in 1901. The 1902 crop is about equal to the average of the years from 1896 to 1900—224,018,928 bushels—but is smaller than the ten-year average 1891–1900, which was 243,559,792 bushels. The above averages include all of the famine years 1896–1900. The exports of wheat from India for the seven years ended on March 31, 1902, are stated in bushels as follows:

1895–96	18,672,117
1896–97	3,566,379
1897–98	4,466,187
1898–99	36,438,267
1899–1900	18,114,283
1900–1901	93,371
1901–2	13,667,397

THE PRODUCTION OF ASPHALT.

The production of asphaltum and bituminous rock, according to Dr. JOSEPH STRUTHERS, in "Mineral Resources of the United States," amounted, in 1901, to 63,134 short tons, valued at $555,335, as compared with 54,389 short tons, valued at $415,959, in 1900, and with

75,085 short tons, valued at $553,904, in 1899. The production in 1901 increased 8,745 tons in quantity and $139,377 in value over the production of 1900, but the production in 1900 and 1901, both in quantity and in value, was the smallest in the last seven years. The production of liquid asphaltum or maltha, all of which was derived from California, increased from 1,254 short tons, valued at $28,064, in 1900, to 2,600 tons, valued at $49,850, in 1901. The imports of asphaltum amounted to 154,729 long tons, valued at $596,847, in 1901, as compared with 106,162 long tons, valued at $363,291, in 1900. Noticeable features of the importation are the comparatively large imports from Italy—12,941 tons as against nothing in 1900—and the continued largely increased imports from Trinidad and Venezuela in 1901.

The imports from Trinidad increased from 93,687 long tons in 1900 to 115,584 long tons in 1901, about 23 per cent, and the imports from Venezuela amounted to 18,605 long tons, as against 11,579 tons in 1900, an increase of 7,026 tons, or 60 per cent. The total imports from Trinidad and Venezuela in 1901 amounted to 134,189 long tons, as against 105,266 tons in 1900. The chief source of the importation of asphaltum in the United States is the wonderful lake of pitch filling the crater of an extinct volcano on the island of Trinidad, off the coast of Venezuela. In addition, imports are made from Bermudez, Venezuela; bituminous limestones are imported from Neufchatel and Val de Travers, in Switzerland, and from Seysel, in France, while small quantities are imported from Germany, Cuba, Mexico, and other countries. The production of asphaltum in the principal producing countries in 1900 was valued as follows, respectively: United States, $415,958; Trinidad, $855,744; Germany, $160,000; France, $383,428; Italy, $292,287; Austria-Hungary, $70,603. The production of Russia in 1899, the last year reported, was valued at $170,300.

TRADE OPPORTUNITIES IN LATIN AMERICA.

The combination of various electrical plants is projected in Rio Janeiro, the changes following which will call for an expenditure of several millions of dollars. It is proposed to erect a plant of no less than 40,000 horsepower capacity.

A project is on foot with a view to the consolidation of three fair-sized Mexican llectric lighting plants, the extension of same and the building of another. The principal plant is located in the city of Tampico and is owned by the Tampico Electric Light Company. Its present capacity is about 500 horsepower. There are 150 arc and 3,000 incandescent lamps. The equipment was mostly furnished by the General Electric Company. Another plant is situated in the city of Victoria, and furnishes energy for 50 arc and 1,500 incandescent lights. Its horsepower is 250. The two first mentioned plants are operated by steam and the Linares one is both water and steam. It is proposed to rebuild and considerably extend these plants and to construct a water-power plant of 200 horsepower capacity (1,500 incandescent lights) for supplying the city of Montemorelos with power for lighting purposes.

A project is under way with a view to the conversion of the two principal horse tramways in the city of Monterey and the building of a new electric line. The existing lines are each about 12 miles in length. The new system, for the construction of which an American engineering and contracting firm of Monterey has secured the concession, will be about 20 miles long.

In a dispatch from United States Minister SQUIERS, at Havana, Cuba, dated September 2, the Department of State of the United States, is informed that a proposed law extends for one year the period during which certain railway materials and sugar machinery and agricultural implements may be imported at a rebate of 50 per cent, but Mr. SQUIERS adds that he thinks the Cuban Congress will have little inclination to take up the proposed law for immediate consideration on account of the great amount of work already before it.

Mexican advices state that the Mexican Dynamite and Explosives Company, which holds a concession from the Government and is operated by French capital, has entered into a contract for the construction of a factory at Tinaja, in the district of Mapimi, State of Durango. The contract calls for the construction to begin as soon as the rainy season terminates, the plans for the various buildings being now ready. American machinery will be purchased to serve as equipment in the new plant.

The Chilean Government has opened a competition for designs for the new postage stamps which it intends to issue shortly. The drawings must reach Santiago the 15th of next November at the latest.

The Rio Blanco Cotton Mills, located in the State of Veracruz, Mexico, have been almost entirely destroyed by fire. Nearly $200,000 worth of new machinery will have to be purchased.

A factory is to be constructed in Cordoba, Mexico, for the manufacture of alcohol and wines from fruit, a large quantity of which is said to be literally wasted every year around that city and thrown away.

Mexican advices state that in Ameca, State of Jalisco, local parties are about to build a factory for the purpose of making alcohol from the mesquite plant, which is reported to grow in very large quantities in the western part of the State.

Arrangements have been made in Merida, Yucatan, for the establishment of the first cotton mills in that part of the world. The machinery will be bought in the United States. The supply of cotton will be drawn from New Orleans and Mobile.

The Yaqui Copper Company, whose offices are at 377, 379 Broadway, New York City, is about to let a contract for the erection of a 1,000-ton smelter at Campo, Sante Nino, in the State of Sonora, Mexico. Eventually the plant will be increased for the purpose of handling 5,000 tons of ore daily. The contract now under consideration will entail an expenditure of some $400,000.

The city of Santos, Brazil, is to have an electric traction system which will be operated with American equipment. The initial length of the road will be about 10 miles. The power-house equipment will consist of two General Electric generators of 200 kilowatts capacity each, direct connected to 300-horsepower engines. The car bodies will be built in Brazil because of the cheapness of wood in that part of the world.

The Minister of the Department of Communications and Public Works of Brazil, recently called for proposals for the navigation of the Parnahyba River. The specifications call for two round trips monthly from Therezina to the port of Tutoya on the north and as far as Floriano on the south, the vessels calling at the following places: União, Curralinho, Buqueirão, Repartição, Santa Quiteria, Porto Alegre, Parnahyba, Araiozes, Amarante, Belém, Castelhanos, Miguel Alves, Marroás, Barra do Longá, S. Francisco, and Grajahú.

BOOK NOTES.

Books and pamphlets sent to the Bureau of the American Republics, and containing subject-matter bearing upon the countries of the International Union of American Republics, will be treated under this caption in the Monthly Bulletin.

The Marine-Hospital Service of the United States has issued an interesting bulletin by Dr. H. R. CARTER on the transmission of yellow fever by the mosquito, known scientifically as *Stegomyia fasciata.* The conclusion reached by Dr. CARTER is that this insect is the only means of the spread of the disease. He argues most convincingly in the support of his theory by eliminating other causes of infection, and shows that the facts all point to the mosquito as the host that carries the micro-organism which produces the disease. Dr. CARTER makes the statement that for twenty years prior to 1899, baggage from Veracruz, Havana, and Santiago de Cuba, arriving at New York was entered without disinfection. The amount from Havana and Veracruz was large, and much came from houses infected with yellow fever and much was not clean. All of this baggage was opened at the custom-house at New York and handled in hotels there and in Saratoga, and no yellow fever was reported among the customs inspectors in New York or at the hotels during the time. The baggage going from the same Cuban ports to Spain for the last thirty years has been enormous; much of it must have been foul. Some of this traffic goes to the Mediterranean ports of Spain-Valencia, Malaga and Barcelona, etc., which at times, in 1870 and before, have been "infectible places," yet no yellow fever has been reported in that peninsula since the epidemic of 1870. This baggage, Dr. CARTER estimates, represented at least 300,000 persons, who could in years of epidemic and with lax methods of inspection have all been pronounced immune to fever. In addition, from 175,000 to 200,000 persons, troops and families, returned from Cuba to the United States at the end of the Spanish-American war with baggage and equipment, and no yellow fever resulted therefrom. The possible changes in the micro-organism, after being taken up by the mosquito, are discussed, and the deduction is made that the disease is not in nature propagated by material conveyed directly from the sick to the well; that some material after leaving the body of the patient undergoes some change outside of his body and after this change produces yellow fever in one susceptible to that disease. This change which takes place outside the body of the sick man involves no change in the organism itself. Another hypothesis is that a change of the micro-organism itself takes place, it undergoing development outside of the human body into some stage different from that in which it leaves the body. This last has been the theory accepted by most of the writers who have considered this subject, but there is no analogy with the propagation of any other disease. In support of the belief that yellow fever is conveyed in nature only by a host, and doubtless a mosquito host, Dr. CARTER cites (1) the analogy of other diseases conveyed by insect hosts; (2) that all facts observed about the propagation of yellow fever agree with the necessary deductions of this theory, and (3) no other theory explains all the facts observed of its propagation.

The United States Department of Agriculture in Section of Foreign Markets has published a remarkably interesting Bulletin, No. 28, dealing with the "Sources of the Agricultural Imports of the United States," covering the five-year period 1897–1901. For 1901, the agricultural imports are stated to have had a total valuation of $392,000,000, Brazil furnishing the preponderating quantity, to the value of $53,000,000. Coffee was, of course, the principal factor in this trade, though sugar, hides, skins, and cocoa were also leading items. Cuba ranked second only to Brazil in 1901, showing a total of $39,000,000 for the value of agricultural products sent to the United States. Sugar was of prime importance, followed by tobacco, molasses, fruits, nuts, and cocoa. Countries furnishing over $10,000,000 worth of agricultural productions were as follows: Brazil, Cuba, the United Kingdom, Germany, Japan, France, the Dutch East Indies, Italy, the Chinese Empire, Mexico, the British West Indies, and the Netherlands. For the five-year period covered by the report, the annual average contributed by the various countries of the Western Continent to the agricultural import value of the United States was as follows: Brazil, $47,452,213; Cuba, $23,410,223; Mexico, $15,515,934; Argentine Republic, $7,728,584; Venezuela, $6,967,035; Peru, $1,544,421; Santo Domingo, $2,883,818; Guatemala, $2,278,427; Costa Rica, $3,068,644; Colombia, $3,861,179; Uruguay, $2,033,769; Nicaragua, $778,369; Honduras, $820,468; Salvador, $900,402; Ecuador, $666,994; Haiti, $653,778; Chile, $261,651; Paraguay, $380. The Bulletin furnishes in detail the sources and valuations of the twelve leading items of agricultural import, extensive tabular statements being included for the purpose.

A valuable and interesting article entitled "The United States in Latin America" forms one of the features of the "World Work" for September, the ground being taken by the writer, Mr. WILLIAM BULFIN, that at no time have conditions been more propitious than the present for the cultivation of close fraternal relations between the various countries of the Western Hemisphere. These relations should have their foundation in extended and mutually advantageous commercial intercourse, the possibilities of which are very clearly demonstrated in the article in reference. Surprise is expressed that so many important men in the United States should give scant attention to Latin America, while they eagerly discuss the future of American enterprise in China. It is not astonishing that they should turn their attention to the splendid possibilities of the valley of the Yangtse Kiang, but that should not prevent the exploitation of the valleys of the Orinoco, of the Amazon and its branches, of the River Plate and its mighty tributary streams, and of the Rio Negro. The Orinoco flows through some of the most fertile regions of the world. The teeming heart of the South American continent can be reached by the basin of the Amazon or by the basin of the Plate, and the pine forests of the southern Andes can be reached by the Rio Negro and its tributary, the Limay. The resources of the Argentine Republic, of Bolivia, Paraguay, and Brazil are held up as examples of industrial development, and business men and capitalists are urged to extend their acquaintance with their next-door neighbors that mutual benefits may accrue. The article is profusely illustrated with very fine examples of the lithographer's art.

The Columbus Memorial Library is in receipt of two interesting volumes of historical data, biography, and reminiscences by GABRIEL

René-Moreno, published in Santiago, Chili, entitled "Últimos Dias Coloniales en el Alto Perú" (Last Colonial Days in Upper Peru). One of these is a narrative of the history of Peru covering the period of time intervening between the years 1807–8, and is a vivid word picture of the conditions existing in that country during those stormy and unsettled days, when the nation was rent by discord from without and within, and when the edifice of state was tottering upon the insecure foundations of political strife and internecine war, destined to fall and, for a time, to be consumed in part, but out of which, in all its majesty, was to rise the Republic as it is to-day, the Peru of the present time—grand, noble, and progressive, a lasting monument to the wisdom of republican institutions, and a star of hope to all the loyal inhabitants of that favored land, who can look back with pride to the ancient civilization of the Incas, skilled to an extraordinary extent in many of the useful arts, and whose kingly palaces were lined with gold. The author gives beautiful glimpses of Peru as she was at the coming of the Spaniards, reflecting philosophically here and there throughout the work upon the changes wrought upon the country and the people by the remorseless hand of time. An immense quantity of rare and valuable historical information relating to this epoch has been collated and conveniently arranged by the author in these useful compilations for consultation and reference. The book is interspersed with numerous drawings and photographic views illustrating the principal cities, public gardens, and buildings of that day, with descriptions so natural, lifelike, and true that the reader is fascinated, as it were, with the same, as well as with the tactful and charming manner in which the author records the history of those memorable days. The second book takes up the story and continues it through the years 1808–9, describing and commenting upon the exciting events of that never-to-be-forgotten period, so vital to the future welfare of the Republic, and bringing to light within its pages a number of highly interesting and important historical documents that, in the language of the author, are presented to the public for the first time. Every page of these valuable works bears evidence of the author's profound knowledge of the subject—a knowledge acquired at the expense of many years of patient industry and untiring investigation, all of which he has used in a masterful manner for the instruction and entertainment of those who may wish to acquaint themselves with the history of Upper Peru prior to and during the years 1807–1809.

"Catalogue de la Bibliothèque de la Commission Centrale de Statistique" (Catalogue of the Library of the Central Commission of Statistics). The Columbus Memorial Library has recently received through the State Department of the United States the Catalogue of the Library of the Central Commission of Statistics of Belgium. This Library is especially devoted, as its name would indicate, to works on subjects relating to statistics and political economy. It receives statistical publications from all civilized countries in exchange for the Belgian official publications and buys the most noted works relating to statistics or social science which appear in Belgium or elsewhere. In this catalogue are applied the methods advocated by the International Bibliographical Institute, to whose collaboration is due the indexing of the notices. The notice of each work, written in the original language, includes a complete bibliographical description, name and surname of the author, date of publication, title and subtitle, place of publication, editor's name, size, and number of pages. Each notice bears, besides, a classifying number taken from the numbering given to the subjects in the indexes of the International Institute of Bibliography (decimal classification). The order of arranging the notices in this catalogue is the same as for these classified numbers. The typographical disposition of each notice bears, on separate lines, the necessary indexes, such as the name of the author, the classifying number, and the date of the publications. Several notices are devoted to works covering diverse subjects and are indexed under the different headings contained in the books. A methodical and alphabetical index of the subjects and an index of the authors' names complete the catalogue. The methodical index of the subjects is arranged in the order of the classified numbers and refers to the page numbers; the alphabetical index of the subjects contains the principal titles of the works owned by the Library; the index of the authors' names is alphabetical and refers to the page numbers. The method followed is such that the catalogue can be used not only in book form, but also for arranging catalogues on library index cards and to increase bibliographical repertories. The notice of each work, being complete in itself, can be cut out and pasted on the index card. By using several volumes, several catalogues could be arranged, indexed according to the different bases, one by the authors' names (alphabetical index); the other methodical by subjects (indexed according to the classified numbers); a third according to the countries to which the works relate (geographical index, according to the classified numbers). The catalogues on library index cards are destined to become more and more general. The additions to the Library of Statistics may result in successive supplements, which, after having been cut out, can be incorporated in their exact place in the catalogue. The unity of the catalogue and its completeness will thus be maintained from day to day.

Nicolas Anrique and Ignacio Silva have compiled and published in Santiago, Chile, an interesting volume of some 700 octavo pages entitled "Ensayo de Una Bibliografía Histórica y Geográfica de Chile" (Catalogue of Historical Bibliography and Geography of Chile). The primary object of the distinguished authors of this work was to present it to the International Congress of Historical Science and Geography at Rome. The book is divided into two parts. The first of these parts treats of historical matters relating to the Republic, and contains a complete list and short description of all the works that have been published on this subject, not only in the Spanish language, but also in other languages, and is of great value to anyone interested in the investigation of the history of Chile from the earliest times to the present day. The second part of the compilation is devoted to the physical characteristics and geography of the Republic. One of the most interesting features of this portion of the work is a valuable description, comprising some 50 pages, in the nature of an introduction, regarding the territory, extension, and surface of the country, and embracing its principal mountain ranges, rivers, and ports, after which follows an exhaustive catalogue of all the principal works written upon and in connection with this interesting and important subject.

The International Bureau of the American Republics has just issued a book upon the Republic of Paraguay, being the second edition of the same work published by the Bureau a number of years ago. The present edition has been revised and enlarged by Señor JOSÉ SEGUNDO DECOUD, Honorary Corresponding Member of the International Union of the American Republics. A chapter on the native races of the Republic, by Dr. J. HAMPDEN PORTER, forms a feature of the work, which is also profusely illustrated. Twenty chapters, covering the topography, national history, constitution, commercial and financial status, and economic conditions, form the body of the book, and it is further valuable through its nine appendixes and a map drawn by Dr. E. DE BOURGADE. Copies of the "Handbook of Paraguay" may be had on application to the International Bureau of the American Republics, No. 2 Jackson place, Washington, D. C.

A report on the manufacture of locomotives in the United States forms the subject-matter of Bulletin 243, issued by the Census Bureau of the United States, and shows a capital of $40,813,793 invested in such industry in the 28 works covered by the report. This sum represents the value of land, buildings, machinery, tools, implements, and live capital utilized, but does not include the capital stock of any of the manufacturing corporations engaged. The value of the products is returned as $35,209,048, to produce which involved an outlay of $10,899,614 for wages, $1,369,341 for miscellaneous expenses (including rent, taxes, etc.), and $20,174,395 for materials used, mill supplies, freight, and fuel. These statistics are for the census year 1900, and as United States locomotives have found their way to all parts of the world, and have demonstrated their superiority over every type of foreign locomotive, details concerning their construction and distribution are naturally of interest.

In Census Bulletin No. 245, electrical apparatus and supplies are treated of as one of the national industrial developments of the United States. It is the first official publication in which an attempt has been made to reach a definite idea of the extent of such manufacture, and covers in its details all branches of electro-chemistry and electro-metallurgy. It is noted that virtually the whole of the copper-refining industry of the United States is a branch of electrical manufacture. The production of copper in the United States was 275,000 metric tons in 1900. According to the best authorities, in 1899 no less than 198,600 short tons were produced electrolytically, and this process is now applied to practically all the copper of the country except a part of the Lake Superior ore. The number of establishments devoted to the manufacture of electric supplies in the census year 1900 was 580, with a capital invested of $83,130,943, and a total output. including custom work and repairing, of $91,348,889.

"The Indians of Cuba" is the title of the initial article of the Bulletin of the Free Museum of Science and Art of the University of Pennsylvania, for May, 1902, the article being written by Mr. STEWART CULIN, as the result of personal ethnological research in the island. Although several scattered settlements of "Indios" were encountered in the writer's trip over the island, the Spanish habits and language had been so engrafted on the aboriginal inhabitants that the lines of distinction were very faint. El Caney was one of the principal Indian towns in the old days, but at present the small town of Yateras, northwest of Guantanamo, forms the center of the Indian population. These people have black hair, light-brown complexions, and pleasing, regular features. Their families are large, in some houses three generations being found. The Indian village of Yara was also visited, and interesting notes made of the prehistoric objects of interest encountered.

The "Engineering Magazine" for August contains in the form of an editorial review a summary of the conditions which influenced the choice of the Panama route as the site of the future isthmian canal, under the title "The common sense of the isthmian-canal decision" quotes the various articles and writers appearing from time to time in that magazine in support of the selected route. The first article on the subject was the contribution of Hon. WARNER MILLER in the issue for March, 1893, and later opinions were embodied in papers by Mr. C. B. GOING, Prof. L. M. HAUPT, Mr. W. HENRY HUNTER, Mr. CHARLES PAINE, Mr. GEORGE A. BURT, General ABBOT, and Mr. JOHN GEORGE LEIGH. These individual opinions were supplemented from time to time by editorial reviews of the various reports made by different canal commissions, all tending to establish the wisdom of selecting the Panama route for the great interoceanic waterway of the future.

"Modern Mexico" for October contains the first installment of an article on "Cortez in Mexico" by Mrs. J. K. HUDSON. It is illustrated with a portrait of the conqueror, together with Mexican scenes with which his name is inseparably linked. Another timely article is on "Mexico's active volcano, Colima," which has been giving the settlers in its neighborhood much alarm since the eruption of Mont Pelée. Mr. JOHN HUBERT CORNWYN writes of "The Corner of Mexico" and Mr. A. A. TOWLE of "A Pilgrimage to El Desierto." Mr. JOHN D. BRANDON contributes an article on "Papantla," a curious little tropical town given over to the vanilla industry and peopled by a tribe of Indians differing from all others found in the Republic. All of these articles are illustrated.

An interesting and useful biographical and bibliographical work, containing more than 350 octavo pages, entitled "Bolivia and the Argentine—Biographic and Bibliographic Sketches," has recently been published (printing house of Cervantes, Santiago, Chile, 1901) by GABRIEL RENÉ-MORENO. The first 20 pages of the book are devoted to an able essay on the present and future of the city of Buenos Ayres, followed by a chapter containing an exhaustive dissertation upon the revolution in Upper Peru in 1809, a subject which the distinguished author treats with detail and judgment and in a lucid and entertaining manner. After this introduction, as it were, the author proceeds to discuss, in his usual good style and taste, the following interesting subjects so intimately interwoven in a number of the important epochs of the history of the country: Lives of Benjamín Vicuña Mackenna, Nicomedes Antelo, Dr. Juan José Segovia, Angel Justiano Carranza, and Juan Ramón Muños Cabrera.

One of the most valuable historical works that have recently been received in the Columbus Library is entitled "Historical and Bibliographical Sketches of Bolivia and Peru," by GABRIEL RENÉ-MORENO. The history of these two countries during the stormy times of the revolution is ably reviewed and much interesting historical data presented, some of which appears in print for the first time. The work is of great interest to the student of Bolivian and Peruvian history, and is written in a clear, concise, and forceful manner.

BOLETÍN MENSUAL

DE LA

OFICINA INTERNACIONAL DE LAS REPÚBLICAS AMERICANAS,

Unión Internacional de Repúblicas Americanas.

VOL. XIII. OCTUBRE, 1902. No. 4.

LOS ACUERDOS DE LA CONFERENCIA INTERNACIONAL EN MÉXICO.

La Segunda Conferencia Internacional Americana celebrada en la capital de México, del 22 de octubre de 1901 al 22 de enero de 1902, cerró sus sesiones dejando como monumentos de sus trabajos veinte y tres instrumentos, distribuidos en la forma que sigue:

Seis "convenciones," una sobre canje de publicaciones oficiales, científicas, literarias é industriales; otra para la protección de las obras literarias y artísticas; otra para la formación de los Códigos de Derecho Internacional público y privado de América; otra sobre el ejercicio de profesiones liberales; otra relativa á los derechos de extranjería; y otra (en que sólo fueron partes la República Argentina, Bolivia, Colombia, Ecuador, Paraguay, Perú y Uruguay) para la reunión de un Congreso Geográfico en Río de Janeiro.

Cuatro "tratados," uno sobre patentes de invención, dibujos y modelos industriales y marcas de comercio y de fábrica; otro de extradición y protección contra el anarquismo; otro sobre reclamaciones por daños y perjuicios pecuniarios; y otro de arbitraje obligatorio, en que sólo fueron firmantes la República Argentina, Bolivia, la República Dominicana, Guatemala, El Salvador, México, Paraguay, Perú y Uruguay.

Un "protocolo" de adhesión á las convenciones de La Haya, suscrito por Guatemala, México, Haití, El Perú, los Estados Unidos de América, Uruguay, la República Argentina, Costa Rica, Honduras, Nicaragua, Paraguay, Bolivia, la República Dominicana, Colombia y El Salvador.

Ocho "resoluciones," una con respecto al ferrocarril pan-americano; otra para la reunión de un Congreso aduanero; otra relativa al estudio de las fuentes de producción y estadística; otra dictando medidas para facilitar el comercio internacional; otra sobre reorganización de la Oficina Internacional de las Repúblicas Americanas; otra sobre policía sanitaria; otra sobre futuras conferencias internacionales americanas; y otra para la reunión de una Comisión encargada de estudiar la producción y el consumo del café.

Tres "recomendaciones," una para el establecimiento de un Banco Pan-Americano; otra sobre la creación deuna Comisión Arqueológica internacional; y otra en favor del Museo Comercial de Filadelfia.

Y una "proposición" para que los Gobiernos de las Repúblicas americanas suscriban doscientos diez mil francos para la edición completa del "Diccionario de construcción y régimen de la lengua castellana," de Don Rufino J. Cuervo.

Los anteriores acuerdos han sido hasta la fecha aprobados en conjunto, directa y expresamente, por sólo dos de los respectivos Gobiernos, en el orden que sigue:

1. Por el de Guatemala, por Decreto Legislativo, nº. 523, expedido el 24 de abril de 1902, y sancionado por el Presidente el 25 del mismo mes y año. La aprobación es absoluta y abraza los veinte y tres instrumentos, autorizando al Poder Ejecutivo para hacer los gastos que se requieran.

2. Por el del Salvador, por Decreto Legislativo expedido el 16 de mayo de 1902 y sancionado por el Presidente el 19 del mismo mes y año. Esta Ley aprueba en absoluto veinte de los acuerdos de la conferencia, omitiendo hacer mención del tratado de arbitraje obligatorio, del protocolo de adhesión á las convenciones de La Haya, y de la convención para la reunión de un Congreso Geográfico en Río de Janeiro.

COMISIÓN PARA EL ESTUDIO DE LA PRODUCCIÓN, DISTRIBUCIÓN Y CONSUMO DEL CAFÉ.

El 1º del corriente mes de octubre se reunió en la ciudad de Nueva York, según se había anunciado en los anteriores números del Boletín, la Comisión mandada organizar en 29 de enero último por la Segunda Conferencia Internacional Americana celebrada en la capital de México.

Esta Comisión tiene por objeto estudiar la producción, distribución y consumo del café, investigar las causas que han dado origen á la crisis por que esta grande industria está actualmente pasando, y proponer medios prácticos que remedien dicha crisis permanente ó temporalmente.

Las sesiones se celebran en el edificio de la Bolsa del Café (Coffee Exchange), y todo promete que se conseguirán los resultados á que aspiraron los Gobiernos cuando determinaron reunirse para tratar de este importante asunto.

Están representadas en esta Conferencia las naciones siguientes: Brasil, Costa Rica, la República Dominicana, Ecuador, los Estados Unidos de América, Guatemala, Honduras, México, Nicaragua, el Salvador, Uruguay y Venezuela. De las naciones productoras de café sólo dejan de tener representación Colombia, Cuba y Haití.

Los delegados que representan las naciones antes nombradas son los siguientes:

Señor Don J. F. de Assis Brasil, por el Brasil.

Señores Don Joaquín Bernardo Calvo y Don Manuel González, por Costa Rica.

Señores Don F. Leonte Vázquez y Don I. A. de Araujo e Vasconcellos, por la República Dominicana.

Señor Don Luis Felipe Carbo, por Ecuador.

Señores Don Percy B. O'Sullivan, Don J. R. Dawley, jr., y Don A. A. Mariani, por los Estados Unidos de América. El último Señor es delegado especial de Puerto Rico.

Señor Don Antonio Lazo Arriaga, por Guatemala.

Señor Don Nicanor Bolet Peraza, por Honduras.

Señor Don José F. Godoy, por México.

Señores Don Corry M. Stadden y Don D. Román, por Nicaragua.

Señor Don E. Schernicow, por el Salvador.

Señor Don L. A. de Herrera, por Uruguay.

Señores Don F. de la Madriz y Don Antonio E. Delfino, por Venezuela.

El Señor Don Percy B. O'Sullivan, delegado por los Estados Unidos de América, fué elegido Presidente de la Conferencia.

El nombramiento de Primer Vicepresidente recayó en el Señor Don J. F. de Assis Brasil, delegado por el Brasil; y el de Segundo Vicepresidente en el Señor Don Antonio Lazo Arriaga, delegado por Guatemala.

El Señor Don Nicolás Veloz Goiticoa, Secretario de la Oficina Internacional de las Repúblicas Americanas, que como Director interino de la misma, en cumplimiento de la resolución antes citada de la Conferencia Internacional Americana de México, y por orden del Presidente del Consejo Directivo de la misma Oficina, acudió á prestar á la Comisión el auxilio que necesitase, fué nombrado para desempeñar su Secretaría general.

El Señor O'Sullivan, que es también Presidente de la Bolsa de Café de la ciudad de Nueva York, pronunció al inaugurar las sesiones el siguiente discurso:

'Señores Delegados: Hablando, no como Delegado para esta Conferencia, sino como representante de la Bolsa del Café, me ha parecido oportuno valerme de tan propicia ocasión para dirigiros una palabra de bienvenida. La institución que represento se ha convertido, en los últimos años, en quizás la mayor del mundo en su género; y New York, como vosotros todos sabeis, se está transformando en un mercado extentísimo. Hoy, por hoy, no temo decir, que, es el que más trafica en café en el mundo entero.

"Vosotros, Señores, venís en representación de los intereses del café de toda la América Central y del Sur, y yo no puedo menos que expresaros, en nombre de la Bolsa, y en el mío, como su Presidente, cuan grato, cuan honroso, es para nosotros, el que os hayáis dignado aceptar la hospitalidad que nos ha sido permitido ofreceros para los nobles fines de esta reunión.

"Fácil y naturalmente comprenderéis que el interés que tiene el comercio del café en los Estados Unidos en una Conferencia de esta índole, difiere un tanto del interés que vosotros tenéis, como representantes de los países productores. Pero por otra parte, si es cierto que las cuestiones de aumento ó disminución de la producción, no nos afectan directamente, yo diría, perifraseando las palabras de un autor latino, que 'Todos somos cafeteros, y que nada que concierna al café puede sernos desconocido.' Todos los hombres de América somos hombres de corazón. Cualquier cosa que os ligue más estrechamente con nosotros merece nuestra simpatía. Deseábamos vivamente la celebración de esta Conferencia, pues todas las Repúblicas, desde México y la América Central hasta la Argentina son naciones hermanas. Tanto el gremio del café, en su política comercial, como el Gobierno de los Estados Unidos desean ver estrecharse nuestra unión. Bajo el punto de vista de naciones independientes, la política no entra para nada en nuestras consideraciones, si bien por otra parte políticamente debe siempre reinar entre nosotros el espíritu de fraternidad que el solo nombre de América implica.

"Deseo decir, en nombre de la Bolsa, que nos complace sobremanera vuestra presencia, y que nos halagará poder tributaros cuantas atenciones estén á nuestro alcance. Con tal fin, é inmediatamente después de la sesión, el Encargado principal del edificio obsequiará á cada miembro con una tarjeta, que les dará, entre otros privilegios, el de visitar la Bolsa, cuando gusten y de adquirir las noticias que deseen sobre el mercado de café. Todo cuando el personal de la Bolsa, ó yo mismo, podamos hacer por el Congreso, ó los delegados individualmente, será hecho con la mayor satisfacción.

"Señores, sed bienvenidos á las Salas de la Bolsa del Café de la ciudad de Nueva York."

Á este discurso contestó, por encargo de sus colegas el Señor Don ANTONIO LAZO ARRIAGA, Delegado por Guatemala, lo que signe:

"Señor PRESIDENTE: En mí ha recaído la honra de contestar á las elocuentes palabras de bienvenida que os habeis servido dirigir á los Delegados del Congreso Americano, que celebran esta interesante cuan práctica Conferencia sobre el café. Debido á contratiempos en el servicio ferroviario no se encuentra presente mi distinguido colega el Ministro del Brasil, quien os hubiera contestado de una manera, sin duda, más adecuada.

"En nombre de los miembros y representantes de las naciones latino-americanas reunidas aquí hoy, cumplo el deber de daros las gracias, así como á la Bolsa del Café, por vuestras benévolas palabras de bienvenida, por vuestro amable ofrecimiento de otorgarnos los apreciables privilegios revestidos en la Bolsa del Café de Nueva York, la más importante del mundo, y que nos consta ser muy grande.

"Mencionáis un punto, Señor, en el cual siento decir que no estoy de acuerdo con vuestras ideas, y perdonadme la franqueza. Siempre me complacerá estar de acuerdo con vuestros pensamientos, porque no dudo que todas vuestras indicaciones serán muy importantes y muy valiosas para esta Conferencia. Decíais que los intereses de los Estados Unidos en esta Conferencia sean, quizá, algo diferentes de los de los países productores. Espero que descubriréis aquí que nuestros intereses son los mismos. No existe diferencia entre ellos. Todo cuanto los Estados Unidos puedan hacer en este asunto redundará en su propia ventaja, como redundará en la nuestra. Si así fuere, yo me regocijaré de tan feliz resultado.

"En nombre de mis colegas, os doy las gracias, á vos y á la Bolsa del Café por vuestra benévola acogida y vuestra hospitalidad."

La segunda reunión de la Conferencia se celebró el 3 de octubre, y en ella se organizaron las siguientes Comisiones:

Comisión de producción.—Señores Don F. DE LA MADRIZ, Don J. A. DE ARAUJO É VASCONCELLOS, y Don ANTONIO MARIANI.

Comisión de distribución.—Señores Don JOAQUÍN BERNARDO CALVO, Don ANTONIO E. DELFINO, y Don CORRY M. STADDEN.

Comisión de consumo.—Señores Don MANUEL GONZÁLEZ, Don NICANOR BOLET PERAZA, y Don E. SCHERNICOW.

Comisión para estudiar las causas de la crisis y los medios prácticos de remediarla ó disminuirla.—Señores Don J. N. DE ASSIS BRASIL, Don ANTONIO LAZO ARRIAGA, Don F. LEONTE VÁSQUEZ y Don D. ROMÁN.

Comisión de Conferencias futuras.—Señores Don L. A. DE HERRERA, Don JOSÉ F. GODOY, y Don J. R. DAWLEY.

El programa de la Comisión de producción comprende entre otras cosas lo siguiente: Reunión de datos estadísticos concernientes al particular encomendado á su estudio; reunión de datos y noticias sobre las tierras en que crece el cafeto, y su producción por término medio; estudios sobre los cafetales, su gobierno duración de los plantíos, cosechas, y maquinaria en uso; los trabajadores que se emplean, sus condiciones de raza y posición social, sus jornales, método de vida; y las condiciones favorables ó adversas que han influido en el pasado y pueden influir en el futuro en la producción del café.

El programa para la Comisión de distribución abraza el estudio de los medios de transporte del café, desde los cafetales hasta los puertos de mar, y desde éstos hasta sus respectivos destinos en el extranjero las tarifas de fletes, las primas de que se disfrute, las facilidades que haya para el tráfico, los agentes intermediarios que se necesiten, los derechos é impuestos de toda clase que graven el café, etc.

En el programa de la Comisión de consumo está comprendido el estudio de las condiciones especiales en que se encuentra el café en los distintos mercados; cuáles son los métodos usados para determinar las calidades; cuáles de éstas gozan de mayor popularidad; qué sistemas pueden emplearse para abrir mercados al café; qué circunstancias afectan el consumo de este artículo en cada uno de los principales mercados; cuál efecto puede tener la legislación sanitaria en el consumo del café, y de las otras bebidas que con él rivalicen, etc.

Al considerar la producción excesiva, si existiere, habrá que discurrir por qué medios podrá evitarse; y si deben, ó no, eliminarse las calidades inferiores, y cómo y de qué manera.

Al considerar el consumo del café habrá que averiguar si hay modo de aumentarlo y por qué medios, y qué es lo que debe hacerce para suprimir monopolios, celebrar tratados de comercio, etc.

En esta sesión segunda, el Señor Don JOAQUÍN BERNARDO CALVO, Delegado de Costa Rica, por sí y en nombre de su colega el Señor Don MANUEL GONZÁLEZ, Delegado de la misma República, sometió á la consideración de la Conferencia, como resultado de los estudios hechos en su país por una comisión de expertos, el documento que sigue:

"INDICACIONES.

"*Eliminación de las clases inferiores de café.*

"Puesto que la mayor suma de café exportado por Costa Rica es de clase fina, nada convendría mejor á nuestros intereses que la eliminación de las clases inferiores, pero la creemos impracticable: 1°. Porque ella tendría como consecuencia la supresión de cultivos en varias regiones en donde la calidad natural del grano es inferior. 2°. Porque es justamente de esas clases que se provee la clase pobre, los ejércitos, la marina y demás consumidores que forman la gran mayoría en todos los países consumidores. Quedaría reducido el café á la condición de artículo de lujo, que es justamente la tendencia que hay que combatir, pues indudablemente es de la popularización del consumo que el grano alcanzará los mejores resultados. La supresión de las clases inferiores, sería por lo tanto, contraproducente al primordial objeto de la Conferencia.

"*Medios prácticos de ensanchar el consumo.*

"Entre los principales, se pueden estudiar los siguientes:

1. Gravar con impuestos municipales, crecidos, la venta del café adulterado ó prohibir por completo esa venta por medio de penas.

"Ocurre en las cuatro quintas partes de los países de consumo, que el consumidor no obtiene al detal el grano puro, sino mezclado con sustancias extrañas que le hacen perder no sólo sus condiciones de sabor y aroma, sino que hasta convierten la bebida en un brevaje malsano que nada tiene que ver con el café. Lugares hay en que se hace pasar por café á las harinas tostadas de maíz, de cebada y de garbanzos y otros en que la codicia de los revendedores llega al extremo de mezclar á escasas porciones del grano, polvos de ladrillo y residuos de otras sustancias minerales. El café puro, bien tostado y de buena preparación, se abre campo desde la primera degustación, llegando en poco tiempo á convertirse en una necesidad: es á ese resultado al que debe propenderse á todo trance, si se quiere que el consumo aumente en proporción tal vez mayor que la producción.

"2. Conseguir de los Gobiernos el establecimiento del uso reglamentario del café en el ejército y armada, como bebida estimulante propia para resistir las fatigas del servicio y como una de las sustancias de inmensos beneficios para contrarrestar los efectos de los grandes calores.

"3. Hacer propaganda médica del café como uno de los agentes más eficaces contra el alcoholismo. Problema es este de altísima importancia que tienen en solución los gobiernos del mundo entero; y los esfuerzos civilizadores de las sociedades de temperancia se verían secundados ventajosamente por el uso de café. Los efectos de la cafeina sobre el sistema nervioso, son considerados como de inmediato buen resultado para desvanecer los causados por el alcohol. En Costa Rica, nadie ignora ese sistema curativo, y en lo que primero se piensa al ver á un individuo ebrio, es en proporcionarle una dosis de café negro y fuerte, que en poco rato le volverá al uso de sus facultades mentales embotadas por el alcohol. Esa sola propiedad del café, constatada por autoridades médicas reconocidas, bastaría para dar gran crédito á su consumo y sería razon de gran peso para prohibir la adulteración del grano.

"4. Supresión ó rebaja considerable de los derechos aduaneros de importación que varios países consumidores tienen establecidos en sus tarifas; como consecuencia, supresión ó rebaja considerable de los impuestos municipales. El café, dadas sus condiciones higiénicas y terapéuticas, se puede considerar como un artículo de necesidad, de los que favorece el sistema de libre importación. No es preciso hacer un gran esfuerzo para convencerse de ello: la preocupación anticuada de juzgar al café como artículo de lujo ó como droga está desacreditada por la práctica; es en las boticas en donde menos se expende el grano y su bajo precio alcanzado en los últimos cinco años, demuestra que está en condiciones de llegar á todos los hogares, al alcance de todas las fortunas. No sería posible cohonestar hoy una imposición aduanera sino por los países productores, como medida proteccionista. España, por ejemplo, no tiene razón alguna que aducir para sostener por más tiempo su tarifa á ese respecto, puesto que ha perdido sus colonias productoras de ese grano. En iguales ó parecidas condiciones se encuentran otras naciones y debe propenderse á la eliminación de sus tarifas é impuestos sobre el café.

"5. Establecimiento de degustaciones de café puro en los países de poco consumo, con fondos y elementos proporcionados á prorrata por los países productores. Cada vez que se ha llevado á la práctica ese sistema, el resultado inmediato no ha tardado en hacerse sentir. En las Exposiciones de Chicago, Atlanta, Buffalo, París, etc., algunos productores han situado degustaciones para dar á conocer su producto, y no ha fallado una sola vez el buen resultado. La práctica enseña, pues, que es un camino que debe seguirse sin vacilaciones; pero ensanchando sus efectos, yendo á buscar los centros de poco consumo y haciendo conocer la bebida por los que apenas si tienen noticia de ella. Rusia, Suecia y Noruega, Dinamarca, gran parte de Alemania, etc., son campos inexplotados por la industria cafetera, á los cuales habrá que dirigirse en busca de nuevos mercados. En esas degustaciones ó centros de propaganda es preciso poner á la venta esencias preparadas de uso inmediato y enseñar prácticamente los sistemas de torrefacción y destilación que dan los mejores resultados, con lo cual se evitará para el porvenir el uso de adulteraciones nocivas al crédito del artículo.

"6. Tratados de comercio encaminados á proteger la industria del café. Tan extensa como importante es esta sugestión, que nos contentaremos con enunciarla como base de discusión.

"7. Venta del café en pública subasta. Las ventas que se efectúan de mano á mano, como en los Estados Unidos, tienen grandes desventajas que será difícil poner en evidencia. No existe control ó inspección oficial alguna en las operaciones, y el productor está en la necesidad de atenerse únicamente á la buena fe de su agente, que si bien en la mayor parte de los casos es honrado, ocurre y no con poca frecuencia, que se convierte en simple explotador de su comitente á quien engaña, haciendo un doble perjuicio, pues no solo le despoja de un bien que le pertence, sino que lleva al ánimo de los demás productores una natural desconfianza con respecto á la bondad del mercado, lo que ejerce nociva influencia en el monto de la exportación subsiguiente. Sin gran esfuerzo podrá llegarse á mayores conclusiones que ponen de manifiesto la bondad del sistema de ventas en asta pública.

"FEDERICO TINOCO.
"JAIME CARRANZA.
"MANUEL MONTEALEGRE.
"JUAN FRANCISCO ECHEVERRÍA.
"MANUEL GONZALEZ.
"JOSÉ DURÁN.
"MARIANO CARAZO."

La tercera sesión se efectuó el día 8, y en ella se dió cuenta con un Informe de la Comisión de Consumo, y otro de la nombrada para investigar las causas de la crisis por que pasa en el día la industria del café.

En el primero se someten las recomendaciones que siguen:

Primera. Que se solicite de todos los Gobiernos la adopción de medidas para hacer obligatorio el uso de café puro en sus ejércitos y armadas.

Segunda. Que se solicite de los Gobiernos de los países productores de café, que funden, tan pronto como sea posible, en los países y localidades donde ahora no se consume café, establecimientos destinados á hacerlo conocer.

Tercera. Que se solicite de todos los Gobiernos la prohibición de la venta del café adulterado y de los substitutos del café que se venden bajo su nombre; y que en caso de que la prohibición no pueda hacerse se impongan fuertes derechos sobre esos artículos.

En el segundo Informe se recomienda que los países productores del café establezcan en sus respectivos Aranceles de Aduanas derechos diferenciales sobre las mercancías procedentes de países consumidores, en proporción á los impuestos con que estos graven la importación del café.

La cuarta sesión tuvo lugar el día 10 de octubre, y en ella continuó la discusión de los Informes presentados.

TRIBUNAL CENTROAMERICANO DE ARBITRAJE.

En el número del BOLETÍN correspondiente al mes de marzo de este año, página 712 de la sección en castellano, y página 565 de la sección en inglés, se publicó el texto íntegro del Tratado de Paz y Arbitraje obligatorio celebrado en Corinto, en 20 de enero de 1902, entre los Gobiernos de Nicaragua, El Salvador, Honduras, y Costa Rica.

En ejecución de lo acordado en aquel instrumento se dispuso lo necesario por los respectivos Gobiernos para la constitución del Tribunal que ha de conocer de los asuntos que ocurran, y á este respecto es interesante consignar lo que aparece de la siguiente correspondencia:

DEPARTAMENTO DE ESTADO,
Wáshington, octubre 2 de 1902.

Señor DIRECTOR INTERINO DE LA OFICINA DE LAS REPÚBLICAS AMERICANAS.

MUY SEÑOR MÍO: Para conocimiento de V. acompaño un extracto de un despacho del Ministro de los Estados Unidos en San José de Costa Rica, en que se da cuenta de la próxima organización en aquella capital del Tribunal Centroamericano de Arbitraje y de los nombres de los Arbitradores.

Soy de V. atento servidor,

ALVEY A. ADEE,
Secretario Interino.

No. 763.] LEGACIÓN DE LOS ESTADOS UNIDOS DE AMÉRICA,
San José, Costa Rica, setiembre 20 de 1902.

Al Honorable Señor ALVEY A. ADEE,
Secretario de Estado, Interino, Wáshington, D. C.

MUY SEÑOR MÍO: Tengo el honor de informar á V. que han llegado á esta capital los Arbitradores nombrados por las Repúblicas de Honduras y Nicaragua para inaugurar formalmente el Tribunal de Arbitraje que se ordenó establecer por la Convención de Corinto de 20 de enero de 1902.

Los Arbitradores hasta ahora nombrados son: el Señor Don JOSÉ LEONARD, por Honduras; el Señor Don JULIÁN IRIAS, por Nicaragua; el Señor Don OCTAVIO BEECHE, por Costa Rica; y el Señor Don SALVADOR GALLEGOS, por El Salvador. El último está en camino para esta ciudad.

Según mis informes el Presidente de Guatemala convino con el Presidente IGLESIAS de Costa Rica, en la visita que éste le hizo el año pasado, en adherirse á la convención citada, pero hasta la fecha no está nombrado el Arbitrador guatemalteco. El Tribunal esperará por él; pero si fuere necesario procederá sin su presencia.

Hay razon legítima para felicitarse por el establecimiento de este Tribunal y por el fin y objeto que se propone realizar. El personal que lo compone me ha causado una impresión muy favorable. No hay duda de que la preservación de la paz es el gran *desideratum* de Centro América. * * * Si algo más de interés ocurriere en relación con este asunto, no dejaré de ponerlo prontamente en conocimiento del Departamento de Estado.

Con seguridades de mi más alta consideración, etc.

WILLIAM LAWRENCE MERRY,
Ministro de los Estados Unidos.

LA EXPOSICIÓN DE ST. LOUIS.

La determinación definitiva de las localidades en que han de levantarse el edificio del Gobierno de los Estados Unidos, y otros de los varios Estados, en los terrenos de la Exposición Universal con que ha de celebrarse en St. Louis, Missouri, desde 1° de mayo en adelante, el centenario de la compra de la Luisiana, empezó á hacerse prácticamente el 30 de setiembre último, y continuó hasta terminarse el 1º y 2 del corriente octubre, dándose á este acto la debida solemnidad.

Concurrieron á las ceremonias representantes varios de los diferentes Departamentos del Gobierno de los Estados Unidos, uno de la Oficina Internacional de las Repúblicas Americanas, y algunos Gobernadores de los Estados que forman la Unión.

Los locales que han de ocupar los edificios de Gobiernos extranjeros se determinarán más adelante.

Está ya bastante adelantada la construcción de muchos edificios, y puede darse por seguro que todos estarán terminados para cuando se abra la Exposición.

Los terrenos ocupan cosa de 1,200 acres, que es el espacio mayor consagrado hasta ahora á celebraciones de esta género. La dedicación oficial se efectuará el 30 de abril de 1903, en que se cumplen realmente cien años desde la adquisición de la Luisiana; pero la Exposición no se abrirá hasta un año más tarde.

REPÚBLICA ARGENTINA.

COSECHA DE MAÍZ.

La División de estadística agrícola del Ministerio de Agricultura ha publicado la estadística de la extensión sembrada con maíz y su producción probable en el territorio de la República en el año agrícola de 1901–02.

El resumen general ofrece el siguiente resultado:

Provincias.	Hectáreas sembradas.	Producción en toneladas.	Provincias.	Hectáreas sembradas.	Producción en toneladas.
Buenos Aires	681, 217	1, 360, 271	Salta	20, 000	40, 000
Santa Fe	442, 367	479, 720	Jujuy	1, 530	6, 120
Entre Ríos	81, 198	2, 418			
Córdoba	35, 072	31, 344	TERRITORIOS.		
Corrientes	37, 305	7, 461			
Santiago del Estero	12, 152	36, 456	Chaco	4, 410	8, 802
San Luis	13, 210	20, 805	Formosa	524	1, 048
Tucumán	21, 328	31, 197	Misiones	9, 579	10, 547
Mendoza	7, 941	14, 905	Neuquén	100	400
San Juan	4, 921	10, 740	Pampa Central	9, 800	15, 060
La Rioja	16, 533	49, 599			
Catamarca	6, 618	7, 272	Total	1, 405, 805	2, 134, 165

Por las cifras estadísticas de las hectáreas sembradas resulta que la cosecha principal será la de la provincia de Buenos Aires que figura con 681,217 hectáreas, ocupando el segundo puesto Santa Fe, con 442,367, pero en dicha provincia como en las demás la cosecha ha sido deficiente.

Se ha iniciado la exportación de este año á precios elevados pagándose de $4.30 hasta $4.40, moneda nacional, los 100 kilos por el amarillo y hasta $4.60, moneda nacional, por el morocho puesto en la dársena.

Como el tiempo ha continuado húmedo el consumo ha pagado por el maíz en malas condiciones en el Mercado Once de Septiembre de $3.80 á $4.20, moneda nacional, el amarillo húmedo, y de $4 á $4.40, moneda nacional, el morocho. Debido á la seca en Australia se han efectuado algunos embarques de maíz amarillo seco en el puerto de Rosario y en el de Buenos Aires con destino á aquel pais.

COMERCIO CON PARAGUAY EN 1900.

Según un artículo publicado en la "Revista Mensual de la Cámara Mercantil" de Buenos Aires, se han importado en la República Argentina los siguientes frutos del Paraguay en el año de 1900:

	Valor oro.
Animales bovinos	$10, 770
Naranjas	24, 039
Yerba ruborobiré	811, 664
Yerba molida	92, 849
Tabaco	72, 249
Cedro	207, 209
Postes de quebracho	42, 887
Quebracho	11, 521
Varios	587, 760
Total	1, 860, 948

INDUSTRIA DE LA CARNE.

Número de animales sacrificados.

SALADEROS DE BUENOS AIRES.

Magdalena:	
Juan Terrarosa é Hijos	49, 000
Roca Hnos. y Murzi	47, 600
J. B. Repetto é Hijos	29, 000
Tuyú	17, 500
La Plata:	
Danery	5, 800
Roca Hnos. y Murzi	21, 000
Total	169, 900

SALADEROS DE ENTRE RÍOS.

Concordia:	
Soulez	20, 800
Freitas	20, 000
Colón	13, 200
Concepción	18, 500
Gualeguaychú	10, 200
Gualeguay: M. y E. Berisso	17, 000
Santa Elena	48, 800
San Javier	52, 900
Total	201, 400

SITUACIÓN FINANCIERA.

Según el reciente Mensaje del presidente Roca, el ejercicio de 1901 ha sido muy favorable y los ingresos percibidos han superado á lo calculado en el presupuesto.

Los ingresos han sido de 38,244,638 pesos oro y de 62,341,306 papel.

Los gastos han sido inferiores á los previstos, elevándose á 23,835,847 pesos oro y á 91,160,225 papel, ó sean 2,139,321 pesos oro y 1,306,380 papel menos que la cifra inscrita en el presupuesto.

En 31 de diciembre de 1901, la deuda consolidada interior era de 83,610,983 pesos papel y 17,863,000 de oro, y la exterior se elevaba á 386,451,295 pesos oro, aunque es inferior á esta cifra por comprenderse en ella 46,000,000, cuyo servicio se rinde por varias provincias.

La situación económica es bastante satisfactoria; las emigraciones no han aumentado, y las inmigraciones han excedido á las emigraciones en 48,000 personas durante todo el año de 1901.

PRODUCCIÓN DE TRIGO.

"La Prensa" de Buenos Aires dice que, según las estadísticas exactas de la exportación, los embarques de trigo en los últimos tres años arrojan las siguientes cantidades:

	Toneladas.
1900	2,042,367
1901	972,514
1902	700,000

En término medio general, el trigo exportado en 1900 se vendió en los puertos á 50 pesos la tonelada; el de 1901 y 1902 á 65 pesos la tonelada; de manera que el valor de la exportación de 1900 alcanzó á 102,118,350 pesos; el de 1901 á 63,215,410 pesos, y el de 1902 á 45,500,000 pesos.

PRESUPUESTO DE 1903.

El día 8 de agosto de 1902 el Presidente Roca envió al Congreso el proyecto de gastos y recursos para el año de 1903.

Comparadas con las del año actual, las cifras del presupuesto de 1903 marcan una disminución de $4,117,020.48 oro y 7,412,407.53 papel, en la siguiente forma:

	Oro.	Moneda nacional.
Interior	....	493,841.84
Relaciones Exteriores y Culto	77,760.00	250,000.00
Hacienda	2,453,290.81	69,491.01
Justicia é Instrucción Pública	....	166,244.00
Guerra	....	3,200,767.68
Marina	....	2,299,400.00
Obras Públicas	1,585,969.67	932,663.00
Totales	4,117,020.48	7,412,407.53

El proyecto de ley para el presupuesto calcula los recursos para 1903, y dice:

Artículo 1°. El presupuesto general de gastos de la administración para el ejercicio de 1903 queda fijado en $29,496,172.45 oro y $95,206,218.25 moneda nacional, distribuidos en los siguientes anexos:

	Pesos oro.	Pesos papel.
A—Congreso		2,558,180.00
B—Interior		14,115,640.00
C—Relaciones exteriores y culto	309,381.20	1,101,440.00
D—Hacienda		7,822,041.00
Deuda pública	24,753,296.85	12,059,899.93
E—Justicia é instrucción pública		12,946,655.24
F—Guerra		15,400,813.08
G—Marina	11,462.40	9,643,884.00
H—Agricultura	12,000.00	3,294,360.00
I—Obras públicas	500,000.00	10,708,025.00
J—Pensiones, jubilaciones y retiros		5,555,280.00
K—Extraordinario	3,910,032.00	

Art. 2°. Los gastos establecidos en el presupuesto ordinario serán cubiertos con los siguientes recursos:

	Pesos oro.	Pesos papel.
Importación y adicional, incluyente el 5 por ciento y el 2 por ciento	30,500,000	
Exportación	2,800,000	
Almacenaje y eslingaje	1,200,000	
Faros y valizas	210,000	
Visita de sanidad	40,000	
Puertos, muelles y diques	950,000	
Guinches	220,000	
Derechos consulares	150,000	
Estadística y sellos	300,000	
Eventuales y multas	30,000	
Venta y amortización de títulos	1,485,000	
Provincia de Buenos Aires, servicio de su deuda	1,537,650	
Provincia de Entre Rios, servicio de su deuda	120,000	
Provincia de Santa Fé, servicio de su deuda	220,457	
Banco Nacional, leyes 3655 y 3750	348,232	
Alcoholes		12,500,000
Tabacos		11,000,000
Vinos naturales		3,700,000
Azúcar		3,000,000
Fósforos		2,100,000
Cerveza		1,300,000
Seguros		350,000
Naipes		100,000
Bebidas artificiales		50,000
Obras de salubridad		5,500,000
Contribución territorial		2,000,000
Patentes		2,000,000
Papel sellado		6,500,000
Tracción		180,000
Correos		4,100,000
Telégrafos		1,350,000
Yerbales		50,000
Venta y arrendamiento de tierras		650,000
Eventuales y multas		500,000
Ferrocarriles		4,100,000
Registro de propiedades, hipotecas é inhibiciones		70,000
Derecho de matrículas y exámenes		100,000
Venta de títulos, Banco Nacional, ley 2782		420,000
Provincia de Córdoba, ley 3800		200,000
	40,111,339	61,820,000

Art. 3°. Destínase para cubrir el presupuesto extraordinario en cumplimiento del artículo 2° de la ley número 4056, de 13 enero de 1902, el siguiente recurso: 5 por ciento del impuesto adicional á la importación durante un año, ley número 3871, de 4 de noviembre de 1899, $3,910,032 oro.

Art. 4°. Fíjase en 3 por ciento de interés y 10 por ciento de amortización anual el servicio de los títulos entregados al Banco de la Nación por el Banco Nacional en pago de los depositos judiciales; y en 6 por ciento de interés y 2 por ciento de amortización anual el servicio de los títulos entregados por el Banco Nacional á la caja de conversión en pago del empréstito popular.

Art. 5°. Las mercaderías y productos sujetos al pago de derechos de importación por la ley de aduanas, que estén gravados con un impuesto de 10 por ciento ó más, abonarán además un impuesto del 2 por ciento sobre el valor.

Art. 6°. Además del impuesto adicional de 2 por ciento establecido en el artículo 5° anterior de esta ley, todas las mercaderías y productos sujetos al pago de derechos de importación por la ley de aduanas, pagarán un impuesto adicional de 5 por ciento.

Art. 7°. El Banco Nacional en liquidación entregará á la Tesorería General, en pago de depósitos de la misma y de acuerdo con el inciso 2°, artículo 9° de la ley de liquidación (número 3037 de 18 noviembre de 1893) hasta $5,000,000, moneda nacional, en títulos de los creados por el artículo 5° de dicha ley, en las mismas condiciones establecidas en el citado artículo y siguiente, debiendo reducirse la amortización á 10 por ciento anual.

Art. 8°. Autorízase al Poder Ejecutivo para negociar dichos títulos, y con su producto y en su límite atender las deudas exigible y flotantes.

Art. 9°. Queda autorizado el Poder Ejecutivo para exonerar de impuestos de exportación durante el año 1903 á los subproductos de los saladeros y fábricas de extractos de carne.

Art. 10°. Suspéndese durante el año 1903 la disposición del artículo 1° de la ley número 3551 sobre fondos universitarios de la capital, y destínase el producido de los ingresos al pago de los sueldos y gastos de la misma Universidad.

Art. 11°. Durante el año 1903 se continuará deduciendo el 5 por ciento del sueldo de todos los empleados civiles de la administración y de los jubilados, comprendiéndose los maestros y jubilados del Consejo Nacional de Educación.

Mientras no se dicte la ley de montepío civil y no se reforme la ley número 1909, se depositará en el Banco de la Nación el descuento que corresponda á los empleados civiles y jubilados de la administración y se agregará á su fondo de jubilaciones el correspondiente á los empleados, maestros y jubilados del Consejo Nacional de Educación, salvo lo dispuesto en la ley número 4052.

Art. 12°. Los recursos en oro que se refiere el artículo 2° serán pagados en oro efectivo ó en moneda de curso legal al tipo de cotización, quedando derogada toda disposición en contrario.

Art. 13°. Los empleados civiles con diez años de servicios como minimum, que por este presupuesto quedaren cesantes, recibirán por una vez la gratificación de dos meses de sueldo.

DATOS RELATIVOS Á LA CAPITAL.

El "Anuario Estadístico Municipal" correspondiente á 1901, que publica la Municipalidad de Buenos Aires, contiene los siguientes datos:

"Las cifras sobre la alimentación pública acusan para 1901 una variación poco sensible con respecto el año anterior, en el consumo de los principales artículos, porque si bien es cierto que hay 25,000 carneros y corderos menos, en cambio resultan 2,733 vacas y novillos más.

"Reduciendo ahora al peso los principales artículos de la alimentación y estimando en 174 kilgramos el peso medio de la parte utilizable para el consumo, de una vaca, novilla, ternera, etc.; el de los carneros y corderos en 12, y el de los cerdos en 150, se encuentra un total de 138,828,606 kilogramos de carne, consumidos en un año por 850,000 habitantes, lo que arroja para cada uno de estos una proporción de 163 kilogramos.

"De esa manera, si se parte de esta nueva base, y se acepta, además, para los carneros el peso de 20 kilogramos y para los corderos el de 8, se llega á encontrar una suma de 158,308,848 kilogramos de carne, lo que arroja una proporción por habitante de 186 kilogramos.

"La harina consumida por la población pesó 46,271,675 kilogramos, guarismo que es superior al de 1900 en 1,748,063.

"La proporción por habitante es de 54 kilogramos para todo el año.

"Existen once empresas de viabilidad, de las cuales ocho son con tracción de sangre y tres con tracción eléctrica, con una extensión de 450 kilómetros 431 metros.

"Estas empresas, con 895 coches en servicio diariamente, transportaron en 1901, en 3,814,266 viajes, 125,525,224 pasajeros.

"Todo este extraordinario movimiento dió un producido bruto de casi 3 millones de pesos.

"El año de 1900 las mismas compañías transportaron 122,886,803 viajeros. El aumento, pues, fué sólo de 2,638,421 pasajeros en un año, ó sea un 2 por ciento.

"Los ferrocarriles que tienen su punto de arranque de Buenos Aires, para internarse en las más lejanas regiones del país, transportaron en 1901, dentro de las estaciones del municipio, 12,578,976 pasajeros. Hay también aquí un pequeño aumento, porque en 1900 la cifra fué de 11,347,861.

"Durante el mismo año, 3,045 propiedades, con una superficie de 5,173,228 metros cuadrados, fueron hipotecadas, por un valor de 29,943,000 pesos papel.

"Este guarismo es inferior al de 1900 en 1,273,000 pesos.

"Las operaciones efectuadas en la Bolsa de Comercio durante el año de 1901 subieron á 1,003 millones de pesos papel, de las cuales 934 millones fueron sobre metálico (401 millones de pesos oro), 15 millones sobre títulos hipotecarios, 33 millones sobre fondos y títulos públicos, 17 millones sobre acciones y obligaciones de otras sociedades, y 2 millones sobre bancos.

"Si se comparan las operaciones de 1901 con las de 1900, se encuentra que las primeras superaron á las segundas en 168,727,840 pesos papel; y que casi exclusivamente este aumento fué producido por las transacciones sobre el oro.

"La educación primaria está en Buenos Aires á cargo de un consejo nacional de educación, el cual goza, por la ley, de una relativa autonomía y cuenta con rentas propias.

"Los alumnos matriculados en los diversos grados, en 1901, llegaban á 69,958.

"La instrucción secundaria se da en el Colegio Nacional de acuerdo con los programas aprobados por el Gobierno general, y el número de los matriculados sumaba 1,718.

"Existen también diversos institutos, en los que se da instrucción normal y comercial, en los que se inscribieron 2,713 alumnos.

"La instrucción superior, que también está á cargo del Gobierno general, es dirijida por cuatro facultades, á saber: de derecho y ciencias sociales, de medicina, de ciencias exactas y de filosofía y letras.

"La primera tuvo 1,098 matriculados; la segunda, 1,795; la tercera, 264, y la cuarta, 55.

"El servicio público de iluminación de la ciudad se hace, en parte por la autoridad municipal y en parte por empresas particulares, las cuales reciben de aquella una renumeración.

"En todas las calles del municipio se encienden, término medio, 13,028 faroles de gas, fuera de 1,896 lámparas eléctricas, de diversa potencia, distribuidas en diferentes barrios del municipio y de 382 colocadas en el puerto.

"Además del gas y de la luz eléctrica, la Municipalidad tuvo encendidos 8,540 faroles de kerosene.

"Tanto para el servicio de iluminación á gas, cuanto para el de kerosene, el tesoro de la comuna desembolsó 1,284,169 pesos; y si á esto se agrega 1,664,442 pagados á las compañías que hacen el servicio de alumbrado eléctrico público, se tiene una suma total de 2,948,611 pesos."

EL GANADO ARGENTINO.

[De la "Revista Mensual de la Cámara Mercantil."]

Es tal el incremento que ha tomado la ganadería en la República Argentina, y tal el progreso efectuado en la mejora de las razas en los últimos años, que su estudio resulta interesantísimo.

La estadística argentina de 1889 supone para toda la nación 21,963,930 cabezas de ganado vacuno diverso, que representa un valor de 289,252,606 pesos. Esta riqueza se descompone del modo siguiente:

	Cabezas.	Valor.
		Pesos.
Animales de trabajo (bueyes)	962,699	17,962,290
Animales de cria	17,574,572	170,124,894
Animales de raza cruzada	3,388,801	97,063,842
Animales de raza pura	37,858	4,101,580

El ganado de raza pura, Durham, casi en su totalidad, ha transformado por completo el modo de ser económico de la explotación ganadera, y ha planteado el problema de la exportación de carnes bajo otra forma distinta de lo que se hacía antes, dando á este comercio un colosal desarrollo y á la nación una prodigiosa riqueza.

Según el ilustrado Presidente de la Cámara Mercantil de Buenos Aires, Señor Lix Klett, (Estudios sobre producción, comercio, finanzas é intereses generales de la República Argentina) la población bovina de aquella nación á fin de 1899 era de 30 millones de cabezas, lo cual da la prodigiosa proporción de 6.38 cabezas por habitante. Esta proporción de los animales vacunos por habitante es de 0.4 en Suiza, 0.32 en Alemania, 0.35 en Francia y 0.28 en Inglaterra.

Es evidente que el valor de la producción económica de una población bovina depende en gran parte de la calidad, peso de los animales, modo como son explotados, etc., y el número de cabezas no basta para dar una idea neta de la riqueza pecuaria de la nación.

Se ve, pues, que la República Argentina ha aumentado en un período relativamente corto casi en una tercera parte su ganado vacuno, y á este progreso del número de animales acompaña, lo que es tanto ó más importante, la transformación y perfección de las razas. Hoy se supone que el 50 por ciento de este contingente de animales se compone de razas mejoradas modernas ó sus cruces, y que el ganado criollo no figura más que por la mitad.

Claro está que la perfección del ganado ha traído un aumento notable en el peso de las reses, y el rendimiento de carne neta que han ganado es casi el 100 por ciento en los últimos cincuenta años; esto en lo que se refiere á la producción del tasajo, para lo cual se emplean los peores animales. El nuevo ganado ha aumentado con relación al antiguo en una proporción notable de precocidad y la facilidad de engordar, que se traduce por una renovación más frecuente de las reses y un beneficio más notable de la industria pecuaria.

La transformación profunda efectuada en el ganado argentino permite hoy á esa nación enviar á los mercados de Europa, á Inglaterra sobre todo, carne de buena calidad por cantidad notable, y figura en el primer puesto entre los países productores de carne.

Hoy se supone que la ganadería vacuna argentina puede poner anualmente á la disposición de sus mataderos ó por la exportación en pie 5 ó 6 millones de cabezas. Lo cierto es que las exportaciones en pie de bovinos, que sumaban 125,458 unidades, de un valor de 2,624,000 pesos en 1892, pasan á 312,150 unidades, que valían 6,824,000 pesos en 1899. Por otra parte, la exportación de carne vacuna congelada ha llegado á adquirir últimamente una enorme importancia y está llamada á continuar un rápido desenvolvimiento; en 1899 empezó esta exportación con 5,182 cuartos de buey, para alcanzar 67,088 cuartos de buey en 1898 y 490,375 en 1901.

La exportación general de productos de la ganadería alcanzó en 1899 $115,547,000 oro, ó sea más de 62 por ciento de la exportación total.

BOLIVIA.

MENSAJE DEL PRESIDENTE DE LA REPÚBLICA AL CONGRESO NACIONAL, AGOSTO 10 DE 1902.

Al inaugurarse las sesiones ordinarias de la legislatura de 1902, en medio de la perfecta tranquilidad en el orden interno, de que goza la República, doy cumplimiento al precepto constitucional que me manda informaros de la marcha que ha seguido la administración pública en el año trascurrido.

* * * * * * *

El Congreso Americano reunido en la ciudad de México, para considerar asuntos que interesan á todas y cada una de las naciones del continente, ha cerrado sus sesiones con un voto de adhesión á la Convención de La Haya, que establece reglas para el arbitraje internacional.

En el seno de esta ilustrada corporación se ha iniciado también la reunión de dos Congresos especiales, que se ocuparán de asuntos aduaneros y de navegación fluvial, debiendo reunirse el primero en Nueva York y el segundo en Río Janeiro, en enero de 1903. A Bolivia le interesa concurrir á ellos para definir y consolidar sus derechos sobre libertad de tránsito para su comercio y la libre navegación de los ríos, que de su territorio descienden al Atlántico.

Los arreglos argentino-chilenos sobre arbitraje y limitación de armamentos constituyen una solución de paz, inspirada en razones de un orden superior, que consultan el bienestar y el progreso de las naciones que los han pactado. Bolivia, como nación limítrofe con aquellas, no es extraña á las esperanzas que se fundan en esa trascendental solución, la que está llamada á señalar rumbos fijos y seguros á la política internacional de esta parte de la América que tiene relación con sus propios intereses y destino.

En hora oportuna hemos cerrado el debate de fronteras con la República Argentina, y, al presente, se halla ya sobre el terreno la Comisión mixta de límites encargada del trazo de la línea divisoria.

Os será sometido por la Secretaría de Estado, el Tratado de arbitraje celebrado con la República Argentina, cuyo objeto previsto ha sido el de crear, por medio de tratados particulares, el Derecho público sud-americano, sobre la materia, á fin de alejar en lo posible, de los diferendos internacionales, el odioso imperio de la fuerza.

Determinada por nuevas y prolijas observaciones astronómicas la situación geográfica de la verdadera naciente del río Yavary, puedo afirmaros que no queda pendiente cuestión de límites con los Estados Unidos del Brasil, pues en cualquier momento será posible calcular en toda su extensión y con exactitud el curso de la línea geodésica que corre entre el citado punto del río Yavary y el hito ó marca del río Medara.

No obstante para facilitar la demarcación de la frontera del norte, han de proseguirse en su oportunidad los estudios y trabajos que tienden á ese fin.

* * * * * * *

El Ejecutivo estudia con todo cuidado las bases y condiciones de la paz con Chile, á fin de proceder sin perplejidad, llegada que sea la ocasión, y salvar al país de las estipulaciones del Pacto de Tregua, que no pueden mantenerse más tiempo sin detener el progreso de la Nación.

Los acontecimientos de trascendencia, como los que han creado la nueva situación argentino-chilena, pueden traer su influjo á Bolivia y producir el acuerdo de las opiniones divergentes para facilitar la solución que se impone.

Inspirado mi Gobierno en razones de innegable conveniencia nacional, buscará en la esfera de sus atribuciones aquella solución, para presentaros un Tratado de paz, que ha de ser considerado, no lo dudo, con independencia, madurez y patriotismo por el Congreso Nacional.

Las relaciones mantenidas con el Gobierno del Perú se desenvuelven sin tropiezo, guiadas por sentimientos cordiales y de perfecta reciprocidad.

La misión confiada al Señor OSMAY Y PARDO, Ministro del Perú, propende á iniciar gestiones sobre la mejor forma de resolver las cuestiones de límites que están pendientes. El Gobierno reconoce la necesidad y conveniencia de resolver de inmediato este delicado asunto y facilitará de su parte, al diplomático peruano, los medios de llenar satisfactoriamente su cometido. De este modo cesarán las frecuentes protestas y reclamaciones que sin fundamento manifiesto se producen con ocasión de los actos de soberanía que Bolivia ejerce sobre su Territorio Nacional de Colonias.

Còn satisfacción ha recibido el Gobierno al Enviado Extraordinario y Ministro Plenipotenciario del Imperio Alemán, Señor MICHAELLES, cuya presencia en Bolivia manifiesta el deseo expresado por S. M. el Emperador de Alemania de cultivar con nuestro país relaciones que favorezcan los intereses de ambos pueblos.

La Legación de Bolivia en Wáshington llena satisfactoriamente su misión, siendo su presencia en los Estados Unidos indispensable en este momento, en que organiza la Compañía que ha de encargarse de la administración fiscal del Territorio del Acre, para informar al Gobierno de los elementos que lleguen á constituirla.

* * * * * * *

El importante servicio de Correos ha merecido atención preferente de parte del Gobierno, por el notable desarrollo que ha adquirido en la República.

La Dirección General del ramo, procura cuidadosamente que Bolivia cumpla los compromisos acordados con la Unión Postal Universal, de que forma parte.

Promulgadas como leyes del Estado, las convenciones sobre giros internacionales y encomiendas celebradas con los Estados Unidos de Norte América, se ha procurado su inmediata ejecución, y al efecto, se ha expedido el decreto de 8 de abril último, que reglamenta el servicio de giros, autorizándose á la Dirección General para dictar las medidas complementarias del caso. Las mencionadas convenciones se hallan en plena vigencia.

En el régimen interno se han dado varias disposiciones, impuestas por las necesidades del buen servicio público y por los adelantos que el ramo de Correos ha alcanzado en otros países. Con el propósito de acelerar y aún de garantizar mejor, el despacho de la correspondencia, se ha dictado el decreto de 5 de febrero, en el que, conforme á los usos generales de otras Naciones, se han suprimido las listas de correos, sustituyéndolas con otras seguridades, detalladas en la reglamentación. La práctica demostrará las ventajas ó inconvenientes de este ensayo.

En consideración á la importancia que adquiere el Puerto de Guaqui, punto de arranque del Ferrocarril á esta ciudad, se ha establecido en él una Subadministración de Correos rentada.

Con objeto de salvar las dificultades que se ofrecen para el transporte de la correspondencia entre los Puertos de Mapiri y Rurrenabaque, independientemente de la vía de Caupolicán, cuya deficiencia es notoria, se ha aceptado la propuesta de los Señores GAZZANIGA, ARAMAYO Y CA. para el servicio del correo fluvial entre los puertos mencionados.

Con excepción del Departamento del Beni, todos los centros principales de la República, se hallan comunicados por líneas telegráficas, y se procede en la actualidad á la reconstrucción y prolongación de algunas de ellas, tales como las de Potosí á Uyuni, Cochabamba á Santa Cruz, Potosí á La Quiaca, Colquechaca á Sucre y otras. Se está colocando un doble alambre conductor, en la línea de Oruro á esta ciudad.

* * * * * * *

Nuestro comercio exterior continúa satisfactorio y en aumento, como lo manifiesta la cifra que la Estadística señala en el año anterior. Las importaciones alcanzan á Bs. 16,953,223.75, tomando en este cálculo, como base, los avalúos del Arancel vigente. Hemos tenido, pues, un aumento de Bs. 3,609,109.28, sobre el año de 1900. Las exportaciones alcanzaron en 1901 á Bs. 35,657,689.96, lo que representa un considerable saldo á favor nuestro en la balanza comercial.

Nada es más perjudicial para el bienestar de los pueblos y la seguridad del comercio, que las continuas fluctuaciones que ocasiona el alza y baja de la moneda de plata.

Todos los pueblos civilizados, con pocas excepciones, han adoptado el patrón de oro.

Es, por lo tanto, de conveniencia inaplazable preparar entre nosotros la implantación de un sistema monetario que, por la fijeza de su valor, evite las pérdidas é incertidumbres á que está sujeta nuestra moneda. Recomiendo muy eficazmente á vuestra atención las medidas que por el Ministerio respectivo se os proponen, al objeto de llegar á la definitiva adopción del patrón de oro, como base de nuestro medio circulante.

* * * * * * *

Ferrocarril de Antofagasta á Oruro.—En respeto á leyes y contratos preexistentes, se ha consolidado la propiedad de esta empresa sobre los *terrenos fiscales* que ocupa, debiendo sujetarse á la Ley general, respecto á los terrenos municipales, de particulares y de comunidad. Se dictó la resolución respectiva en vista del informe técnico del Señor Weir que hizo la comprobación del terreno abarcado por la vía férrea.

Ferrocarril de Guaqui á La Paz.—El estado de los trabajos es satisfactorio. Los terraplenes alcanzan al kilómetro 65 y la enrieladura al kilómetro 54, punto en el que se construye un puente sobre el río Colorado. Es seguro que el 10 de septiembre estará el ferrocarril en el río de Viacha y á principios de octubre seguirá el enrielado hacia la ceja del Alto.

Por un arreglo con la "Peruvian Corporation Limited," contamos con las facilidades para el pago de cuentas atrasadas por valor de materiales, carbón y fletes á los ferrocarriles del Sur del Perú y con el capital suficiente para la terminación de la obra hasta el Alto. Para el reembolso de esos anticipos, entregaremos £1,500 por mes en el primer semestre del año entrante, £2,000 mensuales en el segundo semestre y toda la renta de alcoholes aguardientes y gomas del Departamento en el primer semestre de 1904. Además y para facilitar el establecimiento del tráfico por la nueva vía de Guaqui, entregaremos á la "Peruvian Corporation," por el término aproximado de quince meses, la administración del ferrocarril, pues cuenta aquella asociación, para el objeto indicado, con los ferrocarriles del Sur del Perú y los vapores del Lago Titicaca.

Con rentas que deben percibirse en tres años, se ejecutará la obra en poco más de año y medio. Natural es, por consiguiente, como estaba previsto desde la iniciación de los trabajos, que fuera necesario adquirir anticipos de fondos, los que se han obtenido en condiciones bastante favorables.

En diciembre estará el ferrocarril en la ceja del Alto quedando por ejecutarse solamente trabajos de secundaria importancia, como son estaciones, paraderos, provisión de agua, fortificación de la vía, etc.

En octubre se completarán los estudios de la vía que descienda á la ciudad, por el Ingeniero Director Sr. MARIANO BUSTAMANTE y B.

Ferrocarril Argentino-Boliviano.—Se hallan terminados los estudios y el trazo definitivo entre la Quiaca y Tupiza. El Gobierno Argentino tiene resuelta la construcción de este ferrocarril y en octubre del corriente año se decidirá cual propuesta de las que deben presentar las compañías constructoras será la aceptada. Se calcula en dos años el tiempo en que el ferrocarril de Jujuy llegará á La Quiaca. Ligados á la Argentina por vínculos de carácter permanente, vemos con el mayor interés la continuación de esta importante obra, llamada á favorecer nuestro intercambio comercial y más directamente, los intereses de los departamentos del Sur de Bolivia.

Para la prosecución de los trabajos en territorio boliviano, hemos autorizado al Ministro de Bolivia en la Argentina, á celebrar acuerdos con el empresario que obtenga la concesión de la obra hasta La Quiaca, á fin de que ella quede bajo una dirección única.

También se practicarán estudios al norte de Tupiza, al efecto de reconocer la vía más ventajosa, bajo el punto de vista de las dificultades que se hayan de superar y del costo de las prolongaciones al interior.

Otros ferrocarriles.—Se practican por la sociedad "L'Africaine" los estudios y exploraciones á que la obligan las concesiones otorgadas en su favor por la anterior legislatura.

Se ha propuesto, por una sociedad de ingenieros franceses, la construcción de un ferrocarril de Viacha á Oruro y de otro de Oruro á Cochabamba. El Gobierno juzgando aceptables dichas propuestas, las ha sometido á la tramitación prescrita por nuestras leyes, debiendo tenerse en cuenta que las propuestas han sido presentadas de conformidad con las indicaciones del recordado Señor WEIR, jefe del Cuerpo Nacional de Ingenieros y con el proyecto de Ley de Ferrocarriles formulado por el mismo jefe.

* * * * * * *

El ramo de Colonización toma cada día mayor incremento.

La inspección que se practica en las Colonias del Chaco boliviano manifiesta, desde luego, cuánta es la atención que hay que prestarles, para su conveniente organización, cuyo objeto debe ser el de avanzar sobre el desierto, favoreciendo la creación de centros agrícolas é industriales.

Las fronteras de Chiquitos y del río Iténes demandan igual, sino mayor atención. Y las de Caupolicán y Territorio de Colonias, por el Oeste, requieren guarniciones permanentes, para detener la aproximación cada vez más audaz de las tribus de salvages, para la seguridad de las poblaciones que allí existen.

Si á esto se agrega la complicada administración del Territorio Nacional de Colonias, se puede ver que las iniciativas del Ejecutivo referentes á la creación de una Secretaría especial de Colonización fueron fundadas y merecen discutirse.

La representación nacional después de madura deliberación, aprobó el contrato celebrado con un sindicato de capitalistas anglo-americanos, para la administración de una parte del Territorio de Colonias. El Brasil, alegando daños y peligros que no han sido expuestos de un modo concreto, se ha opuesto por medios indirectos á su ejecución. Entre tanto, el Gobierno tiene la convicción de haber procedido en este asunto correctamente y dentro del ejercicio de la Soberanía Boliviana. Su primer y principal objeto fué el de promover, con sujeción á la legislación universal, la organización de una sociedad anónima capaz de fomentar el desarrollo de aquellos territorios desiertos y mortíferos, y de establecer una administración regular y justa en beneficio de los mismos pobladores, sin que en estos propósitos hubiese tenido participación ningún gobierno extranjero, como se ha afirmado falsamente, ni hubiese mediado el fin preconcebido de fundar precisamente una compañía americana.

El sindicato á que me referí antes, ha depositado la garantía de £5,000 y tiene el plazo de un año para formar aquella compañía.

Los recursos y esfuerzos desplegados por el Gobierno del Brasil para oponerse á este negocio, son bastantes, por sí sólos, para probar la importancia industrial de la compañía en organización.

Reflexionando con patriotismo y meditación vereis, si dentro de nuestros derechos y pactos vigentes, son atendibles las insinuaciones de la Cancillería de Río Janeiro, acerca de la rescisión del contrato de administración fiscal del Territorio del Acre, aprobado por la legislatura anterior.

Dejo así, llenado el compromiso de informaros de esta insinuación.

Concluyo, Honorables Senadores y Diputados, deseando que el acierto guíe vuestras labores y que en la delicada situación por la que atraviesa la Patria, prevalezcan la serenidad, el estudio y la independencia de criterio sobre las corrientes que origina el interés personal ó de partido, corrientes ciegas y destructoras que se han cruzado en nuestro desgraciado suelo por tres cuartos de siglo, sin producir más fruto que el agotamiento estéril de las fuerzas activas de la Nación.

COMERCIO EXTRANJERO EN 1901.

El Señor Don Gerardo Zalles, Cónsul General de Bolivia en Nueva York, ha proporcionado al Boletin Mensual los siguientes datos relativos al comercio extranjero de Bolivia durante el año de 1901. Las importaciones durante el período á que se hace referencia han alcanzado á la suma de 16,953,233 bolivianos, con un peso de 58,000,140 kilos, habiendo producido un rendimiento aduanero de 5,421,687 bolivianos, á lo que habrá que añadir otra suma igual por los gastos de transporte á las diferentes plazas del interior de la República en la forma siguiente:

	Bolivianos.
Por valor de las importaciones	16, 953, 233
Por derechos de aduana	5, 421, 677
Por gastos de transporte (valor calculado)	5, 000. 000
Valor total de las importaciones	27, 374, 910

Las exportaciones llegan á la suma de 37,578,210.97 bolivianos, y con un peso de 110,763,323 kilogramos que se descomponen de la manera siguiente:

	Kilogramos.	Valores.
		Bolivianos.
Minería	105, 615, 971	26, 855, 425. 76

BRASIL.

COSECHA DEL CAFÉ.

El Cónsul General de los Estados Unidos de América en Río de Janeiro informó al Señor Secretario de Estado de los mismos lo que se pone á continuación:

"Las cifras auténticas que representan la cosecha del café en el año que terminó el 30 de junio de 1902 son como sigue:

	Sacos.
Café recibido en Río de Janeiro	4,971,686
Café recibido en Santos	10,149,327
Total en ambos puertos	15,121,013

"Lo recibido en los otros puertos, á saber: Victoria, Bahía, Pernambuco, etc., es bastante para completar un total de 16,000,000 de sacos. (Cada saco tiene 60 kilogramos, ó 132 libras.)

"La cosecha actual, que empezó á llegar al mercado en 1° de julio del corriente año, puede calcularse en 10,000,000 de sacos.

"Los 'osos,' por supuesto, enviarán circulares por todas partes, manifestando que la cosecha será mucho menor. Los 'toros,' por su parte, se mostrarán también enérgicos en probar lo contrario.

"En el momento actual no hay todavía datos ciertos, en cuya autenticidad pueda descansarse.

"La especulación con respecto al café es en el día muy activa, y los precios, aunque bajos, están mantenidos por especuladores. La provisión visible, hecha en Europa y en los Estados Unidos, es más que suficiente para cubrir el consumo de un año. Si la nueva cosecha, que se recogerá en 1903, pues los cafetos estarán en flor á fines de octubre, en cuya época podrán hacerse cálculos fundados, resulta abundante, habrá indisputablemente una baja en los precios, lo que producirá como consecuencia una baja en el cambio, y en el papel moneda irredimible."

CONVENCIÓN DE PRODUCTORES DE AZÚCAR.

Según informe consular publicado por el Departamento de Estado en Washingtón, se celebró en Río de Janeiro, en 25 de junio último, en respuesta á un llamamiento de la Sociedad Nacional de Agricultura del Brasil una Convención de fabricantes de azúcar, en que estuvieron representados los Estados de Sao Paulo, Río de Janeiro, Pernambuco, Bahía, Parahiba, Alagoas, Sergipe, Río Grande do Norte y Maranhao, que son todos productores de aquel artículo.

No sabemos todavía cual ha sido el resultado práctico de esa importante reunión; pero sí se sabe que el programa de los trabajos es bastante extenso, y que el tratamiento de los asuntos se ha dejado, con el objeto de obtener mejores resultados, á la iniciativa personal de los delegados.

Entre los asuntos que deben estudiarse están los síntomas de una crisis azucarera, las causas á que esta se deba y el remedio que pueda aplicársele; la naturaleza y preparación del suelo, y cualidades de la caña que se cultiva; los métodos de cultivo; los de fabricación de la azúcar; la producción de este artículo; el comercio extranjero; el comercio interior y los medios de ensancharlo; la producción y consumo del alcohol, sus aplicaciones industriales para la producción de luz y de calórico, y su uso como combustible en los grandes establecimientos, y el uso de la caña como forrage.

Cada delegado pudo escoger el asunto, que mejor le agradó, ó en que tenía mayores conocimientos; y según dice el Informe Consular, de que se toma este extracto, los trabajos se encaminaron, como era natural, en el sentido de mejorar la condición de los hacendados. A ese efecto se incluyeron en las discusiones, un proyecto de préstamos de dinero hechos por el Gobierno federal á los hacendados, la proposición de que se supriman los derechos de exportación, el proyecto de establecer una prima en favor de la azúcar nacional pagadera por el Gobierno, la imposición de un derecho de consumo sobre todos los azúcares, á fin de reembolsar al Gobierno lo que perdiese por la abolición de los derechos de exportación y el pago de las primas, el plan de que la azúcar se almacene por cuenta del Gobierno, y que las ventas se hagan directamente sin la intervención de terceras personas, etc.

CULTIVO DEL CAFÉ.

[Informe del Cónsul del Perú en Southampton, publicado por orden del Ministerio de Relaciones Exteriores de aquella República, en Julio de 1902.]

El Brasil es preeminentemente el país productor del café. De Cayena se introdujo la planta al Pará en el año de 1727.

Aunque el café crece en casi todas partes del país, su cultivo se ha limitado á una zona comparativamente pequeña, que comprende los siguientes Estados: Espíritu Santo, Minas Geraes, Río de Janeiro y

San Pablo. También se produce en otros Estados; pero en pequeñas cantidades.

En Río de Janeiro el suelo está bastante agotado. São Pablo es, pues, el gran centro de producción de la planta.

Brasil da más del 60 por ciento del consumo del café en el mundo.

En 1890 produjo el Brasil 490,000 toneladas; Centro América y México, 80,000; Java y Sumatra, 60,000; Haití y Santo Domingo, 43,000; Cuba y Puerto Rico 35,000; la India 30,000; Africa 20,000; y los demás países 100,000 toneladas.

En 1898 se estimó la producción del café en el Brasil en 1,533,840,000 libras ó sea 11,620,000 sacos.

El total de producción del café en toda la América fué en ese mismo año 1,960,619,288 libras.

Asia y Africa produjeron también en 1898, 145,464,000 libras ó 1,102,000 sacos.

Según un Informe de la Oficina de las Repúblicas americanas, para que prospere el árbol del café se requieren tierras nuevas, no cultivadas, laderas de cerros ó tierras elevadas. Estas tierras se limpian de sus árboles y arbustos y en su lugar se plantan los arbolitos del café de un año de edad. El promedio es de 400 plantas en cada acre. La planta no comienza á producir hasta la edad de 4 años, alcanzando su máximum de producción entre los 6 y 20 años de edad; después de esta época disminuye su productibilidad. Cuando los árboles llegan á la edad de 35 á 40 años, es, generalmente, necesario renovar la plantación.

El árbol del café alcanza una altura media de 10 pies y en su parte superior el diámetro es de 5 pies. Florece y da cosechas dos veces por año; pero la más importante es á principios de abril ó mayo, continuando hasta noviembre. Los únicos fertilizantes que se usan son las hojas del árbol del café, la cáscara de las bayas y yerbas inútiles; puesto que es necesario conservar la plantación libre de toda materia extraña. El árbol debe estar bien protejido de los vientos fríos. Su peor enemigo son las heladas, que algunas veces causan que los árboles dejen de producir por algún número de años.

Para preparar el café para el mercado, y después de la maceración en agua, se separa la pulpa exterior con una máquina llamada despulpadora. Esta máquina quita la pulpa, y las bayas pasan con el agua á otra batea cercana; en donde lavándolas se separa completamente a pulpa que se la lleva el agua y los granos del café; se hunden al fondo y de allí pasan á un colador y escurriéndose el agua quedan los granos listos para el procedimiento de secarlos.

Dos métodos de secar hay en uso en el Brasil. El procedimiento antiguo consiste en esparcir los granos sobre un piso cubierto con cemento, llamado terreiro, en donde se les deja á secar al sol. Para esta operación se requieren dos meses y hay que rastrillar y remover los granos durante el día; por la noche ó cuando va á llover se les recoce en montones, cubriéndolos. En muchas de las grandes plantaciones se emplea con más satisfacción el procedimiento moderno de secar á vapor, y se seca en unas cuantas horas con gran economía de trabajo. Bajo este sistema, la operación de secar es más uniforme y con ningún peligro de daño por lluvias repentinas y se ejecuta poniendo los granos en grandes cacerolas ó pailas de poco fondo, calentadas por debajo con serpentinas.

El café después de secarse permanece aún encerrado en su pergamino y película, encontrándose en condición más quebradiza.

La maquinaria necesaria para quitar este pergamino y película es algo complicada y costosa. El siguiente es su procedimiento: En huchas, se saca el café de la habitación de secar al ventilador, en donde se le limpia de los desperdicios, polvo, etc., con cernidores y abanicos. Del ventilador se lleva el café al descascarador.

Para cuya operación los granos y los hollejos se conducen por un tubo al segundo ventilador en donde cirniéndose es expelen los hollejos por medio de abanicos y los granos pasan por medio de un elevador al separador. Este se compone de cilindros huecos de cobre, taladrados de agujeros de diferentes formas y tamaños. Se conservan estos cilindros constantemente en rotación y pasando los granos de café á través de los agujeros, caen dentro de huchas ó vasijas separadas, quedando así escogidas según su tamaño y forma.

Así queda el café mecánicamente clasificado para enviarse á los mercados en donde se vende como de "Moka" el de granos redondos y pequeños y el de granos chatos y grandes como de "Java."

Cualquiera pequeña porción de pergamino que les quedase se quita con el bruñidor. Finalmente, después de pasar por estas series de máquinas se escoje el café, cuidadosamente, con la mano, y se ensaca.

Como indicación de la extensión del cultivo del café en el Brasil el Secretario de Agricultura del Departamento de Sao Pablo ha citado los siguientes datos:

"Hay en Sao Pablo 15,075 plantaciones, de las cuales 11,234 tienen más de 50,000 árboles; 1,844 poseen de 50,000 á 100,000; 999 entre 100,000 y 200,000; 597 de 200,000 á 500,000 árboles. En estas plantaciones hay 1,793 máquinas para limpiar el café; de las cuales 1,243 se trabajan á vapor y 460 con agua.

"Se dice que en Minas Gerães hay 2,739 plantaciones de café; 1,234 con menos de 50,000 árboles de café cada una, 844 con más de 100,000 y 64 con más de 500,000 árboles cada una. De estas plantaciones 500 hacen uso de fuerza de agua y 1,243 de vapor."

Los plantadores en el Brasil se quejan de que únicamente las clases inferiores de su café son conocidas en el extranjero en su propia calidad y mérito; pues las clases mejores se venden disfrazadas como de "Moka," "Java," "Martinica," etc.

Se dice también que este medio ilegítimo de comercio está estimulado por los embarques de café del Brasil efectuados á Egipto de varias partes de Europa, pasando de allí á Arabia, vía Aden y Jeddah, para que se acondicione á la manera de Moka, de donde se vuelve á embarcar para Siria y otras partes ó regresa á Egipto como verdadero café de Moka.

La producción total de café en el Brasil ascendió á 4,622,000 sacos en 1889–1890, subió en 1894–1895 á 6,977,000 sacos y en 1899-1900 dió 11,000,000 de sacos.

El saco contiene cerca de 132 libras de café.

NOTAS SOBRE EL ÁRBOL GOMERO DENOMINADO "BALATA," Y SOBRE LAS COSECHAS DE NUECES Y CACAO EN 1902.

Según informes enviados al Departamento de Estado en Wáshington, por Mr. K. K. Kenneday, Cónsul de los Estados Unidos en Pará, y hechos públicos en los "Advance Sheets of Consular Reports," el árbol denominado "balata," que abunda en el Brasil, puede hacerse de gran valor comercial por la goma que produce. En opinión del Cónsul una nueva y floreciente industria se introducirá en el Brasil, explotando la savia de estos árboles para la fabricación de guta-percha.

El mismo Cónsul suministra inseresantes noticias sobre las cosechas de nueces y cacao, en el Brasil, en 1902.

Los dos Informes se encontrarán en la parte inglesa.

COLOMBIA.

MODIFICACIÓN DE ARANCEL DE ADUANAS.

Decreto nº 722 de 1º de mayo de 1902, relativo á derechos de exportación.

["Diario Oficial" de 13 de mayo de 1902, nº 11671.]

* * * * * * *

Art. 6. Los derechos que se señalan por el decreto nº 495 de 30 de abril de 1901, se pagarán en la forma siguiente:

Por el oro, la plata, y la platina en barras ensayadas, el 5 por ciento del valor del certificado de fundición y ensaye.

Por el oro en polvo, la platina, y la plata no ensayada, y por el oro y la platina en alhajas, acuñados en monedas ó en otra forma no especificada, el 5 por ciento del valor del aseguro.

Por el mineral de oro y plata, el 3 por ciento del valor del aseguro.

Faltando los documentos de ensaye y aseguro, el oro pagará $0.05 por cada gramo; la platina, $0.04; la plata, $0.02, y el mineral en bruto, $5 por tonelada.

Art. 7. Los impuestos y derechos de que trata este decreto deberán pagarse en las administraciones departamentales de hacienda respectivas ó en la tesorería general de la República, debiendo comenzar á contarse la primera anualidad el día 1° de junio del corriente año.

Art. 8. Quedan reformados * * * el artículo 2 del decreto nº 495 de 30 de abril de 1901, y derogadas todas las disposiciones legales contrarias á este decreto.

* * * * * * *

COSTA RICA.

Merced á la cortesía de los Señores editores de la publicación científica que ve la luz en Nueva York con el título de "The Engineering and Mining Journal," puede el Boletín reproducir en inglés, y dar en castellano, en esta sección, el notable artículo que sigue, y apareció en el número del citado periódico correspondiente al 16 de agosto del presente año.

LAS MINAS DE ORO DE COSTA RICA.

[Por Milton Franklin Reitz.]

De las minas de Costa Rica como de las de las otras naciones del mundo, algo se ha dicho y escrito en este país. Todos los que tienen algo que ver con la industria minera saben bien cuales son la naturaleza y los efectos de estas publicaciones. Es un hecho bien conocido que la prensa ha publicado más de un artículo relativo á distritos mineros, y que no siempre ha sido posible poner confianza en lo que ella ha dicho. Estos trabajos son debidos muchas veces á una clase determinada de escritores para los periódicos, que no tienen sino muy poco tiempo para preparar sus escritos, y que sólo aspiran á hacer algo que pueda leerse con agrado. El resultado es muchas veces el sacrificio de la verdad de los hechos, y una indebida preferencia á las tradiciones y legendas que abundan en todas las comunidades mineras.

El objeto de este artículo es dar correcta idea, en sentido serio y conservador, de las posibilidades, si no probabilidades, que están en reserva para la industria minera en Costa Rica. El autor ha pasado dos años en aquel país, ocupado siempre en el ramo de minas, y ha visitado personalmente los establecimientos de esta clase más importantes de que ha hecho mención en su trabajo. Todo lo relativo al aspecto físico de esta industria es el resultado de la observación personal del autor, comprobado por lo que han dicho en diferentes ocasiones muy eminentes ingenieros. Los datos estadísticos se han tomado de asientos originales hechos en los libros de las Casas de Moneda, de certificados también originales de los ensayes hechos, y de cuentas de venta que se hallan en poder de los propietarios de las minas. Y como en toda probabilidad el estudio del pasado es el mejor modo de prepararse para juzgar del futuro, he creído que sería importante tratar algo de la historia de las minas en Costa Rica, especialmente de las llamadas del Aguacate, debiendo manifestar que para esto me ha ayudado mucho Don FRANCISCO MARÍA IGLESIAS, que en unión de su padre en épocas anteriores, y luego solo, ha estado por larguísimo tiempo en íntimo contacto con las minas últimamente nombradas.

En realidad fué el oro de la montaña del Aguacate el que infundió en el comercio de Costa Rica los primeros síntomas de vitalidad.

El nombre de Costa Rica que dieron al país en 1512 los primeros exploradores españoles se debió á los numerosos objetos de oro, en forma de imágenes de idolos, etc., que usaban los indígenas. Muchos de estos artículos desenterrados de antiguos cementerios se conservan en los museos. La colección del Museo Nacional está valuada en $50,000. Subsecuentes acontecimientos han demostrado que el nombre puesto entonces á esta porción de Centro América se sumamente propio.

La República tiene una superficie de 34,000 millas cuadradas, y una población, según el censo de 1901, de 311,444 habitantes. Sus puertos habilitados son Puerto Limón, en el Atlántico, y Punta Arenas, en el Pacífico, ambos sobre el paralelo de 10 grados de latitud norte, que cruza la porción central del país, que es la que está mejor desenvuelta. Los dos puertos se comunican fácilmente con el interior por medio de un ferrocarril, y ofrecen excelentes comodidades para el embarque y desembarque de las mercancías.

Las leyes de minería del país son liberales y sencillas. La maquinaria de que se hace, ó necesita hacerse, uso en las minas, y los abastecimientos de todas clases para las mismas, se admiten libres de derechos. Amplia protección se concede á los que se dedican á este negocio, y en él están interesados pecuniariamente multitud de capitalistas. La actitud de los Gobiernos respecto de esta industria ha sido siempre especialmente amistosa, y la del que hoy se encuentra á la cabeza del país abriga la esperanza de que el ramo de minas se desarrolle hasta el extremo de convertirse en una industria principal. El carácter pacífico del pueblo y la estabilidad del gobierno son hechos que merecen particular mención al tratar de este asunto.

El clima de todas las localidades en que hasta ahora se han hecho, ó se trata de hacer, trabajos de minería, es sano y agradable. La altura general es de cerca de 1,800 pies. Las observaciones que se han tomado á esta elevación en las minas del Aguacate indican una temperatura media de 72 grados Fahrenheit. Esta temperatura varía muy poco durante todo el año.

El agua, que en materias de minería es un artículo de tanta importancia, es pura y abundante hasta el extremo de satisfacer cumplidamente las necesidades del caso. Los arroyos y ríos que descienden de las montañas, y son numerosos en varios distritos minerales, pueden utilizarse con gran ventaja, y á poco costo, para poner en movimiento la maquinaria empleada.

Las maderas del país son también muy adecuadas para los trabajos de explotación, y puntos hay en que su abundancia es verdaderamente extraordinaria. Los métodos modernos han reducido, por otra parte, en gran manera el uso de la madera.

El trabajo suministrado por la gente del país es bueno, barato, y constante. Los mineros son activos é inteligentes. El máximum pagado á los operarios que hacen las excavaciones es $1.35 en oro por día. El que se paga á los trabajadores ordinarios viene á ser la mitad.

Puede decirse, en resumen, sin incurrir en ninguna especie de exageración, que todas las condiciones económicas son favorables para hacer productiva esta industria.

GEOLOGÍA Y MINERALOGÍA.

Á fin de no dar á este particular una indebida extensión, bastará decir que con poca diferencia reinan en todas las localidades mineras las condiciones siguientes.

Las rocas son de origen ígneo, abundando entre ellas la diorita y los pórfiros. Grandes peñascos negros marcan de un modo muy conspicuo algunas localidades. Fué por causa de esto que el pueblo de Los Quemados recibió su nombre. Los minerales que contienen metales preciosos se encuentran en vetas formadas en las grietas ó hendiduras del terreno, consistiendo las gangas generalmente en cuarzo, talco arcilloso, y pórfiro. La porción valiosa se halla las más veces encerrada en cuarzo cristalino, que se presenta en todas sus variedades, desde el blanco y sin mezcla hasta el más altamente mineralizado. En las mezclas predominan por lo común los sulfuros de metales no preciosos, y hay algunos casos aunque raros en que se encuentran los sulfuros de manganeso, arsénico y antimonio.

Son raros los minerales que se distingan por cualidades refractarias altamente marcadas.

La ganga libre contiene á menudo una cantidad de oro, que por la acción de las aguas ha sido separada del cuarzo. Á esas aguas se debió probablemente en esos casos la oxidación de los metales no preciosos, y el desmoronamiento del cuarzo.

El tanto por ciento de plata en los minerales auríferos que he examinado por mí mismo es comparativamente corto; pero se dice que hay algunos en que es muy grande.

HISTORIA.

El desenvolvimiento de la industria minera se demoró mucho en sus primeros tiempos, por razón de haberse perdido algunas de las expediciones exploradoras, y del peligro que á todas acompañaba, agregándose á esto persecuciones, intrigas y otras causas, y especialmente el desastre marítimo de JUAN VÁZQUEZ DE CORONADO, Gobernador de Costa Rica.

Más tarde las frecuentes invasiones de los indios Talamancas y los de otras tribus vinieron á impedir todo progreso. El resultado fué que en los dos siglos anteriores á 1815 no hubo más que cuatro denuncios de minas, y que de ellos no hubo más que dos que fuesen deslindados.

El primer descubrimiento relativo á las principales minas que se conocen en el día fué el efectuado por el Obispo de Costa Rica y Nicaragua, Señor García, al cruzar por la montaña del Aguacate en dirección á Cartago.

La visita de este Prelado, cuya residencia oficial estaba en Nicaragua, fué un acontecimiento notable. El pueblo de Costa Rica lo recibió con grandes honores, é hizo que una delegación de ciudadanos de nombradía lo acompañasen desde Esparta hasta Cartago. En este viaje al atravesar la localidad arriba mencionada, que entonces se llamaba Torroto, el Obispo, que tenía algún conocimiento de estas materias, observó que el camino sobre que iban marchando era la cresta de una veta, ó filón, que indicaba la existencia probable de oro ó plata en aquella localidad.

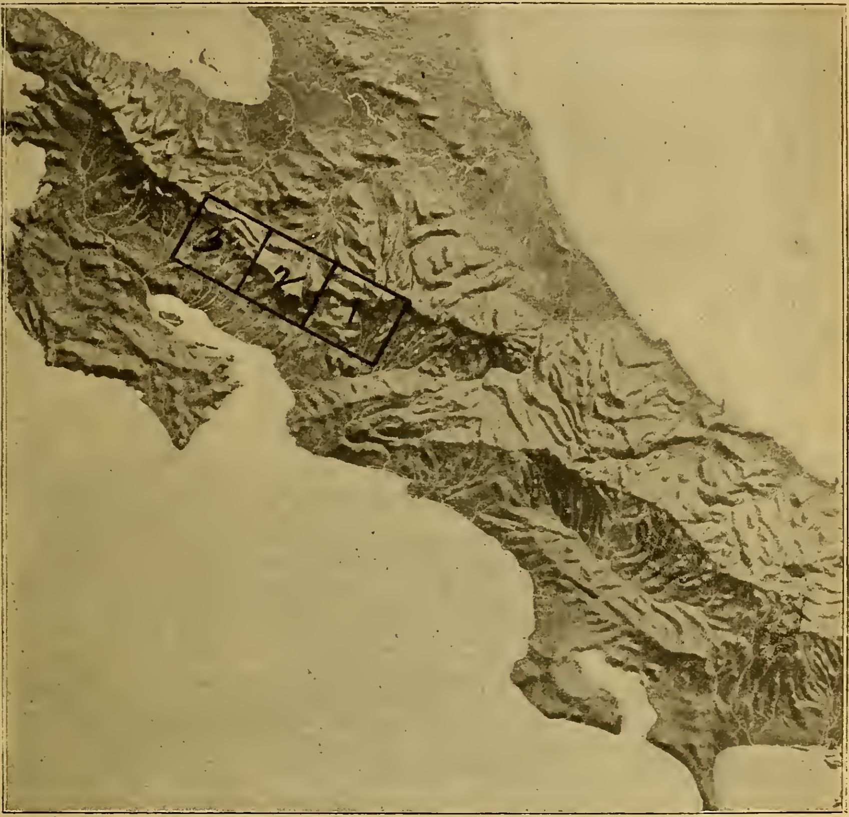
El descubrimiento del primer metal se hizo en la capa ó porción principal de la mina, que fué luego denunciada con el nombre de "La Sacra Familia," cuyo lugar está todavía marcado por un trabajo superficial hecho en aquellos días. Don Santos Lombardo, español, vecino de Cartago, y miembro de la delegación que acompañaba al Prelado, tomó varias muestras del mineral y las llevó á su domicilio, donde las hizo examinar, encontrándose que contenían mucho oro. Á su regreso, que efectuó en compañía de dos amigos, uno de ellos Don Rafael Gallegos, segundo Presidente de Costa Rica, se hizo por los tres el denuncio de la mina bajo el nombre antes indicado. El resultado de este y otros descubrimientos posteriores excitaron en alto grado el interés público, é hicieron que se entrase activamente en investigaciones mineras.

LA ZONA DE LAS MINAS DE ORO.

L zona de las minas de oro en Costa Rica está situada en el lado del Pacífico, y comprende tres diferentes distritos. El primero es el denominado, de las minas de la montaña del Aguacate; el segundo, el "de Monte de Oro;" y el tercero, el Distrito de Abangarez. Su situación respectiva aparece en la lámina nº. 1.

Distrito del Aguacate.—La posición de estas extensas minas, la importancia que en un tiempo tuvieron, y la brillantez del futuro que les espera, justifica que se las coloque en primer término. El distrito se compone de cinco grupos de minas, perfectamente distinguidos los unos de los otros, á saber: Las minas del Aguacate, las de La Sacra Familia, las de Los Castros, las de Quebrada Honda, y las de El Porvenir. Están todas en la Provincia de Alajuela, en el terreno á que da nombre la montaña del Aguacate, situada á los 10° 12′ 30″ de latitud

Norte y 84° 28′ 30″ de longitud Oeste de Greenwich. El Ferrocarril del Pacífico, que está concluyéndose, y que reunirá la capital (San José) con aquel Oceano, pasa á 2 millas de las minas, por un lugar situado sobre el río Concepción. La carretera nacional que reune los lugares citados pasa por frente de la entrada á las minas en el punto llamado Desmonte, que está á 30 millas del Pacífico y á 35 de San José.



Distritos minerales de Costa Rica. 1, Monte de Aguacate; 2, Monte de Oro; 3, Distrito de Abangares.

La veta ó filón principal en las minas propiamente llamadas del Aguacate es, según informa un eminente ingeniero de San Francisco, "extraordinariamente poderosa, y con todas las señales características de conservar permanentemente su gran fuerza." El mismo perito agrega: "Este filón pertenece indudablemente á la clase de los formados en las grietas ó hendiduras del terreno. Su anchura es de 15 á 150 pies. Muy pocas de las obras hechas alcanzan á ambas paredes, pero hay cortes transversales dentro del cuerpo de la veta, que arrancan desde la espalda de ésta y recorren un trayecto de 25 á 30 pies. En un punto, en la galería horizontal de San Rafael, hay un corte transverso cerca de la bonanza El Balsa que muestra que la espalda de la veta está á 8 pies. Una galería cavada más abajo muestra que dicha espalda es de 40 pies de ancho. Un corte practicado á lo largo de la carretera nacional muestra que el ancho de la veta es allí de 150 pies."

En la porción principal del filón, ó sea la llamada de Oreamunos, hay dos vetas paralelas, que se denominan respectivamente "Veta Colorada" y "Veta Blanca." La primera de ellas está inmediata á la espalda de la mina mientras que la segunda marcha en dirección hacia la cubierta. Á una y otras se las considera como vetas separadas y distintas entre sí, pero es incuestionable que las dos constituyen el mismo yacimiento. En las excavaciones hechas se han encontrado muchos filones secundarios que las reunen con el depósito principal. Todo indica que de éste provienen todos los del distrito.

El mineral aquí encontrado varía de valor según las localidades. En las bonanzas corre entre un mínimo de $75 y un máximum de $5,000 por tonelada. En el yacimiento principal se determinó el valor de los minerales escogiendo con cuidado grandes muestras de 100 á 300 libras de peso cada una, reduciéndolas y sometiéndolas á ensaye, por duplicado. Se obtuvo de este modo un valor medio de $25.82.

La Minita.—La propiedad que lleva este nombre, descubierta y denunciada en 1832, es una veta fuerte y separada de las demás. De su superficie se sacaron en tiempos antiguos, á pesar de los crudos métodos que entonces se empleaban, considerables riquezas. Su reunión con el yacimiento principal se efectúa en la propiedad llamada de "Los Castros." Los ensayes hechos con el mineral de "La Minita" le dan por valor de $25 á $30 por tonelada.

San Miguel.—La veta de este nombre, descubierta y denunciada en 1826, se trabajó con provecho hasta 1862. El valor de estos minerales, según los ensayes, es de $15 á $70 por tonelada.

De las trece bonanzas descubiertas en estas localidades, cinco corresponden al distrito de las minas del Aguacate, y se conocen con los siguientes nombres: "Guapinol," "El Balsa," "La Cigüeña," "El Fuego," y "Don Eusebio."

Guapinol.—Esta bonanza fué descubierta en 1823. Un natural del país, que estaba descansando á la sombra de un árbol que llaman allí "guapinol," observó con sorpresa el peculiar aspecto del suelo. Dió conocimienlo de ello á un individuo llamado OREAMUNOS, el cual, después de examinarlo debidamente, lo encontró rico en oro. OREAMUNOS se desembarazó del descubridor pagándole una pequeña cantidad de dinero, y en unión de sus dos hermanos hizo el denuncio de la mina, á que dió el nombre de "La Mina del Pilar," en honor de Nuestra Señora del Pilar, patrona de Zaragoza, en España. El pueblo le ha conservado, sin embargo, su denominación usual de "Los Oreamunos," en recuerdo de los descubridores. Según noticias adquiridas de personas bien informadas, la familia de OREAMUNOS ha realizado de esta bonanza 1,000,000 de pesos.

El Balsa.—La mina que lleva este nombre fué denunciada con el de "San Rafael," y su descubrimiento fué poco más ó menos contemporáneo con el de la que acaba de mencionarse. En 1825 un arrendatario de esta propiedad hizo una fortuna beneficiando el mineral en un "arrastre" construido á orillas del río Grande, á cosa de 10 millas de distancia, al que se transportaba el mineral en carretas tiradas por bueyes. Allí fué donde con permiso del Gobierno se acuñó por primera vez la moneda de oro de Costa Rica. La Oficina de Ensaye del Banco titulado "Swiss-American Bank of San Francisco, Cal.," ha certificado valores del mineral de esta bonanza, que varían de $600 hasta $4.000 por tonelada.

La Cigüeña.—Trabajos practicados con minerales tomados en la superficie de esta propiedad han dado un rendimiento igual al obtenido con minerales de El Balsa; pero de 1875 para acá, nada parece haberse hecho. Se dice que de una porción de la veta, que medía 11 pies, se realizaron una vez $21,000, beneficiando el mineral en un "arrastre," situado en La Unión, á orillas del río de Quebrada Honda, donde también estaba establecido un molino, ó máquina de trituración, cuyas ruinas todavia pueden verse. De las más pobres amalgamaciones llegaron á obtenerse hasta $84 por tonelada. Los experimentos que he hecho yo mismo con residuos encontrados en escoriales antiguos en esta propiedad, en los que he hallado oro libre, y amalgamado, con valores de $35 á $80 por tonelada, patentizan cuan grande debió haber sido la riqueza de esta bonanza.

El Fuego.—La bonanza de este nombre, situada entre las del Guapinol y de La Cigüeña, es como ellas de explotación superficial. Antes de abandonar esta mina hubo el proyecto de desaguarla, pero el trabajo necesario para ello se consideró excesivo. Personas inteligentes, familiarizadas con todo lo relativo á esta bonanza, estimaron que el mineral que se hallaba entonces á la vista pesaba por lo menos 1,000 toneladas, y estaba valuado en $300,000. Una partida de 52 toneladas de este mineral, embarcada en 1874 por la Compañía del Aguacate con destino á los talleres de fundición denominados "Royal Saxony Smelting Works," de cerca de Freiburg, en Alemania, se vendió al tipo de $181.27 por tonelada para el oro, y de $21.03 por tonelada para la plata, siendo el valor total $202.30 por tonelada.

Don Eusebio.—Esta bonanza es parte de la propiedad de San Rafael, y fué descubierta cuando se estaba haciendo un socavón para llegar á El Balsa. De allí se sacó una cantidad considerable de rico mineral. No he podido determinar exactamente el valor de su producción. Las excavaciones hechas han resultado de importancia, porque demuestran la continuidad de algunas vetas.

Un buen número de embarques de minerales extraídos de todas estas propiedades se hizo en 1893 y 1894 por la Compañía antes nombrada, con destino á Londres. Las partidas embarcadas variaron en peso, desde un mínimum de media tonelada hasta un máximum de 30. El precio más bajo que alcanzaron fué de $95, por tonelada, en un lote que pesaba treinta.

Estos embarques fueron los últimos hechos, y de entonces para acá no ha habido producción. El rendimiento total de las minas del Aguacate ha sido calculado en algo más de $5,500,000; y este es, sin duda, un cálculo moderado, como lo demuestra la marcada influencia que el beneficio de estas minas ejerció en la industria general del país. Antes de esa explotación el país era pobre, y apenas tenía comercio; pero la circulación de dinero que aquella industria trajo consigo facilitó los negocios, y permitió que se importasen del extranjero los artículos necesarios para el desarrollo de la agricultura y demás recursos del país.

Preparando maderaje para minas en Costa Rica.

Las minas de La Sacra Familia.—Como se ha dicho antes, el primer descubrimiento minero en el Distrito del Aguacate se efectuó en el yacimiento principal del importante grupo que lo constituye, situado al norte y al oeste de las propiedades del Aguacate, y contiguo á las mismas. Numerosos trabajos de explotación de la superficie pueden todavía descubrirse, especialmente en los casos en que el yacimiento principal ha sido atacado. Ninguno de importancia, que yo sepa, se ha llevado á cabo en los últimos años. El último de que tengo noticias es de 1884. Por muchos años antes de esa fecha se beneficiaba el mineral con un molino de trituración, que trabajaba en la estación de las lluvias, y cuya capacidad máxima era 5 toneladas por día. Allí se conducía el mineral en carretas tiradas por bueyes, que lo llevaban desde los puntos llamados Cardinilla, Potrero Alto, y Sobre Cañon de San Francisco. Pero tal vez debido á la imperfección de los métodos empleados, el resultado obtenido era muy deficiente. En ensayes hechos por mí en noviembre último con muestras tomadas de antiguos escoriales he encontrado desde $12 hasta $33 de oro por tonelada.

Se sabe por otra parte, con bastante certeza, que á pesar de la deficiencia de la maquinaria trituradora, y del grande desperdicio que por consecuencia de ello debía experimentarse, la cantidad de materia fina que quedaba adherida á las mazas de los molinos era tan grande, que había que rasparlas ó lavarlas, dos ó tres veces al día. Considerando la cantidad de material beneficiado, esto sólo es concebible cuando es muy rico el mineral molido.

En otro punto, sobre las márgenes del río Quebrada Honda están las ruinas de un "arrastre" y molino, de hechura antigua; pero no he podido descubrir la fecha en que trabajaban. Algunas de estas ruinas son interesantes. Todo el obraje de madera se pudrió hace tiempo, y se lo llevaron las agüas. Uno ó dos ejes y las cabezas de algunos pisones, que sin duda tuvieron cabos de madera, han quedado para contar lo que pasó. Algunas arenas que recogí en aquel lugar y que examiné con cuidado me dieron un resultado tan alto como $79 de oro por tonelada. Este mineral procedía probablemente de las bonanzas que se encontraron después de los primeros descubrimientos, cuyo laboreo he podido reconocer, aunque imperfectamente, en muchas localidades. No es aventurado calcular que estas propiedades han producido más de un millón de pesos en oro americano.

Entre varios interesantes hechos históricos relativos á estas minas referiré el de que Mr. Richard Trevithick, súbdito británico, que se inmortalizó por sus inventos, y se hallaba en el Perú cuando se hicieron en Costa Rica los descubrimientos de que se trata, se puso en marcha para este último país tan luego como supo de éllos, y explotó por cerca de dos años, de 1824 á 1826, algunas de las minas del grupo de La Sacra Familia, quedando tan convencido de las grandes oportunidades que ofrecía este negocio, que se embarcó para Inglaterra donde organizó la Compañía denominada "Anglo-Costa Rica Mining Company." Esta no tuvo en verdad mucho éxito, pero el mal resultado se debió á lo limitado del capital de la empresa, y á mala administración.

De 1837 á 1846 un Señor PHILLIPS, natural de Cornwall, y un Señor MOYA, natural de Costa Rica, hicieron interesantes trabajos en estas minas. Se dice que Señor PHILLIPS encontró una bonanza muy rica, y que entró en negociaciones con los dueños, para comprar las minas, ocultándoles lo que habia descubierto. Pero los dueños hubieron de sospechar algo por virtud de la ansiedad que el Sr. PHILLIPS había mostrado, y se negaron á aceptar sus proposiciones. El Sr. PHILLIPS obstruyó, entonces, por completo el socavón que conducía al depósito, por distancia quizás de 200 pies, llenándolo con las piedras y material extraido, y destruyó todo vestigio de la entrada, dejando, sin embargo, algunas señales que sólo él pudiera reconocer. Hecho esto se fué de Costa Rica con la intención, según se cree, de reunir el capital necesario para poder, á su regreso, comprar la mina.

Nada se supo de sus planes por espacio de muchos años, pero andando el tiempo algunos de los operarios nativos del país que le habían ayudado á cegar la mina, descubrieron el secreto. Hasta noviembre de 1901 no se consiguió, sin embargo, encontrar la entrada del socavón, y ahora se está trabajando con mucho interés en remover sus obstrucciones y dejarlo abierto.

Los Castros.—Los primeros descubrimientos y denuncios de estas minas, que lindan por el norte y por el este con las del Aguacate, fueron hechos en 1822 por Don NICOLÁS y Don PIO DE CASTRO, que eran hermanos. La veta es una continuación de las de los Oreamunos y San Rafael. El yacimiento principal exhibe las señales características de tres subvetas á que se han dado los nombres de "Veta Colorada," "Veta Negra," y "Veta Blanca," de las cuales se han sacado muestras que rinden, según ensaye, de $28 á $45 por tonelada. Muchas fortunas se han hecho, según dice la voz pública, con labores superficiales en las bonanzas denominadas "Don Ricardo," "El Manto," "El Pochote," "Don Antonio Pinto," "Lacre," "Zequeira," y "Don José Antonio Castro." La última se dice haber producido hasta $15,000 en sólo un día.

El Porvenir.—Esta mina está situada al oeste de las del Aguacate, sobre el Río Machuca, y á corta distancia y hacia el norte de San Mateo. Los trabajos hechos son suficientes para demostrar la existencia de algunas vetas de bastante riqueza. Estas son de dos clases, una principal que corre por el centro de la propiedad, y á lo largo de ella en toda su extensión, en un ángulo de cerca de 30° al este, y otras secundarias que se reunen con la principal. Esta mina ha sido fuente de sustento por muchos años para los habitantes de la localidad, que han beneficiado los minerales de la superficie con "molinetes" y "arrastres," sin que nada más moderno haya sido intentado. Es sabido que hasta con la simple batea los jornales eran crecidos. Una persona bien enterada me refirió un caso en que se había obtenido onza y media de oro, llenando un sombrero con este mineral y agitándolo como se hace en las bateas.

Hace unos cuantos años se encontró una bonanza en una labor llamada "Guatuso," estimándose que rindió $60,000 por el método de amalgamación en un "arrastre." Los ensayes que he practicado con muestras de estas antiguas labores, indican que todavía quedan allí, en considerable cantidad, minerales muy ricos. Tomando aquellas muestras en lugares distintos, pero sin salir de las mismas minas, he obtenido resultados que varían desde $10 hasta $2,000 por tonelada, y yo creo que si la exploración se hace debidamente, podrá encontrarse una abundante provisión de mineral, que rinda de $15 á $25 por tonelada. Una gran porción de sus elementos preciosos está libre y es amalgable; la que queda en combinación me parece que podría beneficiarse usando el cianuro.

Restos de un antiguo arrastre en El Provenir.

Las condiciones naturales de esta mina son particularmente favorables, y permiten no sólo el uso de una gran potencia mecánica, sino también que se establezca el molino en inmediata proximidad á la entrada del socavón, pues hay sitio á propósito para ello. El socavón empezará en el extremo sud de la propiedad, sobre la cresta principal y á un nivel bajo. Está ya contratada esta obra, y el mineral será extraido antes de que construya la planta donde ha de ser beneficiado. La mina pertenece á una Compañía que se denomina "Rio Grande Gold Mining Company."

Mina de Quebrada Honda.—Esta propiedad linda hacia el oeste, sobre el río de Quebrada Honda, con las minas de La Sacra Familia, y es una de las más antiguas que se han trabajado en el distrito. Se dice que en un tiempo hubo en ella un gran número de trabajadores que beneficiaban el mineral en una serie de "arrastres" á la orilla del río. Por muchos años, sin embargo, especialmente de 1857 para acá, esta mina no ha dado producción.

La propiedad consta de tres vetas principales y varias secundarias. El pozo de esta mina, de cerca de 400 pies, es el mas profundo que se excavó en el distrito. Muchas de las antiguas labores son ahora inaccesibles.

La mina está situada en una bonita localidad, que en un tiempo tenía muchos habitantes. Hoy todo está cubierto de árboles y arbustos de toda clase. Allí se encuentran todavía las ruinas de los molinetes, arrastres, y molino de trituración, este último de hechura antigua. No he podido determinar las fechas en que trabajaba este establecimiento. Se dice que el mineral beneficiado allí rendía, á pesar de lo primitivo de los métodos, inmensas ganancias. Personas bien enteradas aseguran que la producción excedió de un millón de pesos. Puede decirse que prácticamente no se ha tocado todavía el mineral que encierra esta propiedad. La anchura de sus principales vetas varía de tres á veinte piés, y el mineral que suministran puede rendir, por término medio, á razón de $8 y más por tonelada.

La producción de las minas del distrito del Aguacate se calcula haber sido, hasta la fecha, de más de $7,000,000. Es probable, sin embargo, que haya llegado á $10,000,000. Considerando que esta suma se ha obtenido empleando métodos y procedimientos deficientes, es natural creer que de la aplicación del capital necesario y del uso de los métodos modernos resultarán pingües ganancias. Todos los depósitos de mineral conocidos hasta ahora están situados de tal modo que permiten el desenvolvimiento de los tres grupos principales del distrito, por medio de un gran socavón, con las necesarias galerías laterales por cuyo medio se llegue á cortar las vetas á una gran profundidad, dándoles una espalda mucho más baja que la que allí haya existido hasta ahora.

Nadie puede decir, tampoco, si de estos trabajos no resultará el descubrimiento de nuevos depósitos, que sean tal vez más ricos. Es un hecho que hay allí muchas vetas y depósitos que justificarían la labor minera, aún en caso de que no se consiga más que la mitad de la riqueza allí encerrada. No hay razón alguna para creer que estos depósitos no alcanzan á gran profundidad, lo que por otra parte está indicado por las excavaciones más hondas que hasta ahora se han hecho. Á medida que se aumenta la profundidad el mineral se va haciendo ligeramente refractario, y mientras que la proporción del oro permanece constante, la de la plata aumenta. Hay fundamento para creer que con el propio tratamiento se podrá obtener de este mineral hasta el 85 ó 90 por ciento de metales preciosos.

DISTRITO DE MONTE DE ORO.

La Mina de la Trinidad.—Esta mina pertenece á una Compañía inglesa en la que, sin embargo, según se dice, un ciudadano americano llamado Mr. MINOR C. KEITH es poseedor de la mayoría de las acciones. Esta propiedad comprende varias vetas de gran tamaño y de mineral no muy rico, que rinde de $6 á $10 por tonelada. Hace como diez años que se suspendieron los trabajos en estas minas por razón de lo mucho que se perdía en sus "polvillos." El procedimiento que se usaba era el de simple amalgamación, y de él resultaba una pérdida de los dos tercios del metal precioso. No se han hecho experimentos en bastante gran escala para determinar la calidad de estos minerales, pero se cree que empleando los métodos del cianuro podrá obtenerse un 85 por ciento, cuando menos. Se ha dicho recientemente que Mr. KEITH se propone empezar de nuevo el laboreo de estas minas, haciendo las excavaciones por lugares nuevos y á nivel más bajo.

Mina de La Unión.—Esta mina es propiedad de una Compañía de San Francisco, denominada "Union Mining Company." Los trabajos que se hicieron en ella en tiempos pasados no tuvieron buen éxito. Había allí un molino triturador con veinte mazos ó pisones, pero el procedimiento empleado para beneficiar el mineral fué siempre el de amalgamación, y hubo una pérdida, según se dice, de un 60 por ciento del valor, ó sea de $5 á $8 por tonelada. Tres años después se estableció una planta de cloruración, pero por razones desconocidas nunca se cloruró ni una sola carga. Hace cosa de quince meses ocurrió allí un serio hundimiento, y los trabajos quedaron interrumpidos. Dos arrendatarios han hecho recientemente algún esfuerzo para continuarlos, pero á lo que parece no han tenido buen éxito. En la actualidad, un Señor llamado Mr. JOHN W. KERR, que fué administrador de la mina, está haciendo, según se dice, algunos trabajos para extraer el oro libre de algunos de los mejores minerales que quedaron en los escalones ó pilares.

La Mina Macacona.—Esta mina fué explotada hace cerca de treinta años por una Compañía del país que tenía poco capital y una maquinaria muy inferior. Se dice, sin embargo, que realizó buenos dividendos. Para explotarla se abrió un pozo, pero mientras más se ahondaba éste más aumentaban las dificultades por razón del agua que se hallaba. Por algunos años la mina quedó cerrada. Después la adquirió la sociedad de R. A. CRESPI y COMPA., que ha introducido allí algunas mejoras y llevado alguna maquinaria para perfeccionar la explotación. La parte utilizable del filón es angosta, pero da mineral cuyo rendimiento, segun se dice, alcanza á $90 por tonelada. Los dueños creen que, trabajando debidamente esta propiedad, dará pingües ganancias.

La Compañía llamada "Thayer Mining and Milling Company."—Esta compañía es propietaria de las minas conocidas con los nombres de "Bella Vista" y "Montezuma," sitas en la vecindad del pueblo de Miramar, distrito de Punta Arenas, á cosa de quince millas del puerto de este nombre, en la costa del Pacífico. Trabajos muy activos se ha estado haciendo en estas minas en los últimos seis años, y los minerales beneficiados en ellas han rendido de $5 á $10 por tonelada. La situación topográfica permite que se puedan extraer grandes cantidades de mineral á niveles más altos que el del agua.

Dos molinos que allí se emplean tienen veinte mazos ó pisones cada uno, y del 45 al 80 por ciento del metal precioso se obtiene por amalgamación. Los polvillos son tratados á su vez por el cianuro, y de este modo se consigue obtener de 85 á 90 por ciento. No hay medios de explotar al presente más de cien toneladas diarias, pero los propietarios esperan que este año podrán trabajar con el doble. Se está construyendo una acequia para unir el Río Barranca con el Rio Rhin, aumentando así la potencia hidráulica que hasta ahora fué sólo suministrada por el último. Según los últimos informes hay ya suficiente cantidad de mineral para dar trabajo á ochenta mazos ó pisones durante dos años.

Manifestaciones hechas por distinguidos ingenieros de los Estados Unidos que han examinado estas minas indican que hay para ellas un porvenir brillante, y que su explotación en mayor escala está justificada. Mr. A. F. Holden, de Cleveland, Ohio, dice en su Informe: "El desenvolvimiento en las capas inferiores de esta propiedad indica que las venas paralelas, tienen tanta permanencia, y las vetas tanta fuerza, que no puede dejarse de esperar un porvenir lisonjero. Todo allí es ventajoso para la explotación. Lo barato de los jornales, la importación libre de dereches de todo el material minero, y las ventajas naturales de la localidad, hacen que el costo de aquella se reduzca al minimum."

Los informes de Mr. Henry C. Holthoff, de Milwaukee, Wis., que examinó estas minas, y de Mr. E. C. Small, de Salt Lake City, que es un metalúrgico de gran experiencia, y pasó en ellas seis semanas, han sido también muy favorables.

El rendimiento actual de las Minas de la Compañía Thayer es de $8,000 á $10,000, en oro americano, por mes.

DISTRITO DE ABANGAREZ.

Este distrito está situado cerca del extremo norte del Golfo de Nicoya, y comprende cerca de 150 millas cuadradas de propiedades mineras. En casi su totalidad pertenecen estas á las corporaciones denominadas "Abangarez Gold Fields, Limited," "Sindicato de Las Cañas," "Sindicato de Guanacaste" y "R. A. Crespi y Compª."

Compañía de minas de oro de Abangarez, Limitada.—Esta Compañía posee en este distrito una superficie de 30 millas cuadradas, y ha estado haciendo cateos y trabajos preliminares por el espacio de cuatro ó cinco años. Las rocas de la localidad son porfíricas por regla general. El cuarzo se encuentra en masas de pórfiro; pero en algunos casos el depósito mineral está en forma de vetas que ponen en contacto estas masas con las antiguas rocas. Algunas de estas vetas son más ó menos imperfectas, y se pierden á poca distancia. Pero hay otras que tienen gran consistencia, como, por ejemplo, las llamadas "Tres Hermanos," y "Gran Gilo," que son de una anchura de 6 á 20 pies la primera y de 6 á 12 pies la segunda. Por sus dimensiones y su fuerza se debe entender que estas vetas penetran hasta una gran profundidad.

Placer de Ross cerca de San José, Costa Rica.

El mineral de las vetas "Tres Hermanos" y "Gran Gilo" rinde á razón de $8 por tonelada el primero y $25 por tonelada el segundo. Así lo declara el testimonio de los Señores John Taylor & Sons de Londres, que examinaron estas minas en 1897.

Hay hoy en vía de explotación once vetas distintas, y la Compañía está erigiendo un molino triturador con 40 mazos ó pisones de 900 libras cada uno, con una fuerza eléctrica de 300 caballos. El molino con que se ha estado trabajando hasta ahora beneficia 500 toneladas por mes, que rinden á razón de $17 por tonelada. Por los métodos de amalgamación y cianuración se está obteniendo el 90 por ciento del metal precioso. El buen éxito que hasta ahora ha coronado los esfuerzos de esta Compañía se debe atribuir en gran parte á la pericia y perseverancia demostradas por Mr. R. A. CRESPI en el tratamiento anterior de estas propiedades, y á la habilidad de Mr. C. H. COLBURN, el presente ingeniero y administrador de las minas.

Compañía de minas bostonesa.—Esta es una Compañía dependiente, ó' subsidiaria, de la de Abangarez, que está explotando la mina "Tres Amigos," en la que está erigiendo una batería trituradora de diez pisones, con una planta anexa para el uso del cianuro. Un molino de tres pisones ha estado en operación por doce meses triturando el mineral, con un rendimiento de $30 por tonelada, y extrayendo el 60 por ciento del metal precioso por el método de amalgamación.

Sindicato de Las Cañas.—Esta corporación posee 30,000 acres de tierra mineral, en que hay varias crestas en que se están haciendo actualmente trabajos de reconocimiento. Entre las vetas mas notables puedan citarse la llamada "Veta Lier," de 60 pies de anchura, cuyo mineral rinde $8 por tonelada, y la "Veta Oracu" que es pequeña, pero cuyo mineral rinde $60 por tonelada. Esta mineral es semejante en carácter al de las minas del Sindicato de Abangarez, y se cree que admite el mismo tratamiento que se emplee con el de estas, es decir, la amalgamación y la cianaración. Se tiene entendido que este sindicato se propone formar una ó más compañías para el conveniente desarrollo de estas explotaciones.

Las propiedades del Sindicato de Las Cañas y Guanacaste están á cargo y bajo la dirección de los Señores R. A. CRESPI Y COMA. No se ha puesto en ellas todavía ninguna maquinaria; pero hay un cuerpo de ingenieros que está haciendo los debidos reconocimientos.

Después del informe de los Señores TAYLOR & SONS de Londres se han localizado varias otras vetas de gran tamaño, que se están estudiando con mucho esmero. La proporción de metal precioso que tiene el mineral de la superficie parece continuar, siendo la misma ó mayor en el que yace á gran profundidad. En la propiedad de Abangarez una veta que rendía $24.72 por tonelada en la superficie ha llegado á producir hasta $40 por tonelada con mineral sacado á profundidad de 300 pies.

CONCLUSIÓN.

La opinión que prevalece en Costa Rica entre los hombres de negocios es que la explotación de las minas de oro del país está en camino de ser muy floreciente. Personas entendidas en minería están persuadidas de que en cosa de 10 ó 15 años esta industria será la principal del país. Todas las demás ocupaciones que están relacionadas con la explotación de minas están progresando favorablemente.

No puede hacerse referencia á otras muchas exploraciones mineras, porque sería necesario para ello dar á este artículo proporciones que son indebidas.

DECRETO SOBRE MINAS.

El Congreso Constitucional de la República de Costa Rica, deseando facilitar é impulsar la industria minera en Costa Rica, y mientras se dicta una nueva ley de Minería de acuerdo con los adelantos y experiencias de más de medio siglo, y con las exigencias de esta importante industria, decreta:

Artículo 1°. En las medidas de las pertenencias mineras se tendrán presentes las disposiciones siguientes:

1ª. Toda propiedad minera será limitada en cada extremo de su longitud por un plano vertical y perpendicular á la proyección que la dirección ó rumbo general de la veta forma con el plano del horizonte.

2ª. Toda propiedad minera será limitada en su latitud ó anchura, llamada cuadra, por dos planos indefinidos paralelos á la inclinación ó recuesto de la veta, que seguirán constantemente las ondulaciones de ésta á ochenta y cuatro metros á un lado y otro de la línea que marca la intersección de la veta con el plano del horizonte.

Art. 2°. En virtud de lo dispuesto en el artículo 1° el propietario de cualquiera pertenencia minera podrá dentro de los límites establecidos, trabajar su veta á cualquiera profundidad siguiendo su dirección, inclinación y variaciones en todo el curso de ella.

Art. 3°. Lo dispuesto en los artículos anteriores se observará en las medidas pendientes, en las que en adelante se practiquen, y en aquellas verificadas anteriormente á estas disposiciones, siempre que no haya perjuicio de tercero.

Art. 4°. Quedan así modificados en lo conducente los artículos contenidos en la sección quinta de los Ordenanzas de Minería de 26 de junio de 1830 y vigentes en sus demás disposiciones.

Al Poder Ejecutivo.

Dado en el Salón de Sesiones del Congreso, Palacio Nacional, San José, á los trienta y un días del mes de julio de mil novecientos dos.

Francisco M. Iglesias,
Presidente.

Carlos Sáenz,
1er. Secretario.

Pedro Zumbado,
2º Secretario.

San José, á primero de agosto de mil novecientos dos.

Ejecútese.

Ascensión Esquivel,
El Secretario de Estado en los Despachos de Hacienda y Comercio.
Cleto González Víquez.

CUBA.

REGISTRO DE PATENTES Y MARCAS DE FÁBRICA AMERICANAS.

Legación de Cuba,
Washington, D. C., 5 de julio de 1902.

Excelencia: Cumpliendo instrucciones de mi Gobierno tengo el honor de transmitir á V. E. la comunicación que la Secretaría de Agricultura, Comercio é Industria envió á la Secretaría de Estado con fecha 21 del pasado junio que dice así:

"Señor: Con esta fecha he dictado la siguiente resolución: Habiendo cesado en esta isla el Gobierno Militar de los Estados Unidos, en cuya virtud han quedado sin valor ni efecto, de acuerdo con el texto expreso de las mismas, las circulares Nos. 12 y 21, fecha 11 de abril y 1° de junio de 1899, respectivamente, expedidas por la División de Aduanas y Asuntos Insulares del Departamento de la Guerra de Washington sobre inscripción de marcas y patentes americanas, puesto que dichas circulares fueron dictadas para los territorios sujetos al Gobierno Militar por las fuerzas militares de los Estados Unidos; he resuelto que las patentes y marcas de todas clases, impresos, rótulos y etiquetas, debidamente registradas en la Oficina de Patentes de los Estados Unidos, cuyo depósito en esta isla, para su protección en la misma, se solicite en lo sucesivo á partir de la presente fecha, sean inscriptas en la Secretaría de mi cargo, si hubiere lugar á ello, mediante los procedimientos que se siguen para el registro de las de otros países y el pago de $35 currency por las patentes, y $12.50 currency por las marcas, impresos, etc., ó sean los mismos derechos que satisfacen todas las demás extranjeras y las nacionales, en lugar de un peso currency, que señala la citada circular No. 21, respecto á las americanas."

Aprovecho esta ocasión para reiterar á V. E. la seguridad de mi más alta y distinguida consideración.

Gonzalo de Quesada.

Á S. E. el Hon. John Hay,
Secretario de Estado de los Estados Unidos.

RELACIONES COMERCIALES CON MÉXICO.

En nota dirigida por el Señor Secretario de Relaciones Exteriores de México al Señor Secretario de Hacienda de la misma República, transmitida por este á la Cámara de Comercio de la capital mexicana, se dice lo que sigue:

El Consulado general de la República en la Habana, en su reseña comercial correspondiente al año 1901, dice á esta Secretaría, entre otras cosas, lo siguiente:

"De acuerdo con las repetidas conferencias que hemos tenido con relación á las industrias nacionales, conviene llamar la atención de la Secretaría de Relaciones Exteriores, para que ésta á su vez se sirva trasladarlo á la de Hacienda y Crédito Público, acerca de la importancia de que por las Cámaras de Comercia de la República se estudie el medio de aumentar la exportación de ciertas manufacturas susceptibles de competir con las que aquí se importan de Europa y Estados Unidos, y que por su gran consumo podrían dar pingües resultados á nuestros productores. Son dignos de mencionarse, en primer término, los tejidos de algodón en las clases de telas, camisetas y medias de bajo precio, que por la baratura de la mano de obra pueden convenir á este mercado. Para conseguir la exportación á Cuba de estos productos, sería preciso que aquí hubiese agentes viajeros conocedores de la plaza y con muestrarios completos de la fabricación nacional, puesto que está demostrado que los llamados "museos comerciales" no dan el resultado apetecido, por estar acostumbrados los importadores á que se les lleven los muestrarios á sus casas. Esto no obstante, si el Gobierno creyera conveniente utilizar alguno de los salones de esta oficina para Museo comercial, excusado es decir que el personal del Consulado tomaría el asunto con el mayor empeño en pro del buen resultado de la idea.

"Otro medio práctico para hacer propaganda de las industrias nacionales, sería que los fabricantes nombrasen aquí un centro representativo, que directamente se entendiese con ellos, y propendiese al mayor auge de nuestra exportación. Ahora bien, para que las fábricas se den cuenta de la clase, dibujo, peso y número de hilos de los tejidos que aquí tienen mayor consumo, este Consulado se ocupará en remitir á la mayor brevedad y con destino á las Cámaras de Comercio, muestras con relación del costo, flete, derechos y demás gastos, hasta su entrada al consumo.

"En la isla de Cuba se consumen, por término medio, 400,000 quintales de tasajo, que se vende á un precio aproximado de $8 á $10 quintal. Esta mercancía llega en barcos de vela procedentes de la Argentina y del Uruguay, y paga derechos de aduana mas ó menos crecidos. Teniendo nosotros riqueza excedente de ganadería, podría la República manufacturar gran parte de tasajo, con ventaja en los fletes por razón de la distancia, á cuyo efecto podrían informar los cónsules en la América del Sur sobre los procedimientos que allí se emplean para la confección del tasajo, artículo que llegaría á ser para nosotros una fuente de riqueza.

"Si se lleva á cabo el proyecto de aumento de la riqueza pecuaria presentado por la Secretaría de Agricultura de esta Isla, es evidente que dentro de dos ó tres años no habrá necesidad de importar aquí ganado, sin contar con que ya en estos potreros hay un excedente de 311,159 reses respecto á la importación de los dos últimos años. Si lográsemos exportar aquí tasajo, compensaríamos la baja que necesariamente ha de sufrir la exportación de ganado, puesto que el consumo del tasajo no es probable que disminuya sino mucho más tarde, cuando la riqueza pecuaria haya llegado á su completo desarrollo. Hay, además, en este país consumo considerable de artículos similares á los de nuestra producción, entre los cuales se deben mencionar los siguientes: harinas, sombreros de paja, deshilados de Silao, zapatos, pieles, muebles, tecalis, figuras de barro, lacas de Michoacán, cestos y canastos de mimbre y paja, cervezas, aguas minerales, chiles, frutas frescas bien acondicionadas en envases especiales, ajos, palo tintóreo, alfombras, etc.

"Dos artículos de gran consumo que hasta ahora se importan de los Estados Unidos, habiendo venido sólo algunas partidas de México, son gallinas y huevos. Estos últimos están desacreditándose cada vez más por su sabor desagradable que no tienen los que se exportan de México. Una caja de 30 docenas de huevos cuesta en los Estados Unidos $5.45 y paga $1.30 oro americano de derechos. Se vende aquí la caja á $8 en oro español. Las gallinas ó pollos de New Orleans se venden de $5.50 á $9 oro español, y los de Cuba de $1 á $1.60 el par. Estos artículos podrían exportarse por la República en gran escala. En cuanto á los garbanzos, frijoles y café, granos de considerable importación aquí, de procedencia nacional, debe aconsejarse á los exportadores que procuren envasarlos en mejores condiciones, en provecho propio, pues se quejan los receptores de que llegan muchos granos picados ó se pican en el depósito á consecuencia de venir mal acondicionados; y esto disminuye, como es lógico, el precio de venta y la demanda de los citados artículos.

"Una de las causas que hacen imposible la importación aquí de ciertos productos nacionales, es lo elevado de los fletes que cobran los ferrocarriles de la República hasta los puertos de embarque. Es de esperarse que la Comisión Mixta nombrada hace algún tiempo para el estudio de la rebaja prudencial de fletes, emita en breve un informe que dé por resultado la baja de aquellos para el mayor desenvolvimiento de nuestra exportación. La Cámara de Comercio de la Habana, la Lonja de Víveres, y gran número de importadores, han solicitado varias veces de este Consulado el conocimiento de la resolución en el importante asunto de los fletes, á lo cual esta Oficina, de acuerdo con el criterio y los informes de Ud., ha contestado que próximamente se concederá la resolución que seguramente ha de ser favorable al desarrollo de las relaciones comerciales entre ambos países. Coincidirá esto con la creación del Cuerpo Consular Cubano en nuestro país, que de seguro ha de ayudarnos en nuestras gestiones.

"Tengo la honra de transcribirlo á Ud., para los efectos á que hubiere lugar, manifestándole que ya se da traslado á la Secretaría de Comunicaciones en la parte relativa á los fletes que cobran los ferrocarriles de la República."

COMERCIO DE FRUTAS.

[De un Informe enviado á su Gobierno, agosto 14 de 1902, por el Cónsul de México en la Habana.]

Las frutas que en mayor cantidad se exportan de Cuba son la piña y el plátano. La exportación de esta última fruta se efectúa casi toda por el puerto de Baracoa y será objeto de un informe por separado que le he pedido á nuestro Vicecónsul en Santiago de Cuba. La piña se exporta en barriles y en cajas con hendeduras, para que en ellos penetre el aire. Estos envases se importan desarmados de los Estados Unidos y se arman aquí al envasar la piña. Los envases, puestos en almacén, con costo, derechos, fletes y demás gastos, salen á 40 centavos los barriles y á 20 centavos las cajas, oro español.

Los meses de abril, mayo y junio son los más propicios para la exportación de la piña, fruta que tiene gran demanda en todos los Estados Unidos.

Desde enero á abril se exportan de este puerto muchas cebollas en cajas semejantes á las de las piñas.

En esa misma época se embarcan también grandes cantidades de tomates, habichuelas, ajíes, quimbombó y otros productos, envasados en cestos importados vacíos de los Estados Unidos y que cuestan aquí á 20 centavos cada uno.

En febrero y marzo se embarcan papas; éstas se envasan en barriles usados, que cuestan á 20 centavos plata cada uno.

La exportación de naranjas tiene alguna importancia; se remiten en cajas importadas, envueltas una á una en papel de china; los envases cuestan 20 centavos, cada uno, puestos aquí.

Hay otras muchas frutas, legumbres, hortalizas y tubérculos que se exportan en muy pequeña escala y no merecen por ello especial mención.

Las exportaciones se hacen á los puertos más importantes de los Estados Unidos y en mayor escala á Nueva York y Nueva Orleans.

El término medio del flete es de 35 centavos oro americano las cajas y canastos y de 65 á 80 centavos los barriles.

Todos los frutos exportados se envían *en comisión* á los Estados Unidos á respetables casas comisionistas que, una vez realizadas las mercancías, rinden á los remitentes sus cuentas de venta.

HABANA, *31 de agosto de 1902.*

SERVICIO DE CUARENTENAS.

El Ministro de los Estados Unidos de América en la Habana ha remitido al Departamento de Estado en Wáshington, y este ha publicado en 16 de septiembre uútlimo en sus "Advance Sheets of Consular Reports," una traducción al inglés de los decretos nº. 97 y nº. 100 de la República de Cuba, expedidos uno y otro el 4 de agosto último, reorganizando el servicio de cuarentena, que en lo adelante se llamará de Sanidad marítima.

COMERCIO DE GÉNEROS DE ALGODÓN.

El Ministro de los Estados Unidos de América en la Habana llama la atención de los exportadores de su país, por medio de un despacho publicado por el Departamento de Estado en Wáshington, el 4 de setiembre último, á la necesidad de llenar ciertos requisitos que explica para asegurar en favor suyo la preferencia en aquel mercado. Son substancialmente los mismos que repetidas veces se han hecho conocer por los que saben del asunto y tienen interés en que se extiendan y estrechen las relaciones mercantiles entre los Estados Unidos de América y las Repúblicas hispano-americanas, Haití y el Brasil.

DISPOSICIONES ADUANERAS.

Se han dictado recientemente por el Señor Administrador de la Aduana de la Habana las siguientes importantes disposiciones.

Envases exteriores.—Que el tejido y papeles gruesos ó hules, que envuelven las mercancías contenidas en los bultos llamados *fardos*, se consideren, por todo su peso, como envase exterior de la mercancía contenida, aforándose ésta según la Regla 9 de la Disposición tercera.

Diferencias en los pesos netos.—Que las diferencias en los pesos netos, que no excedan del 15 por ciento, no serán penables, si ocurrieren tales diferencias de buena fe, pero que se impondrá penalidad en todos los casos por cualesquier diferencias menores de 15 por ciento, si proceden de hacer la declaración de los pesos netos, sin incluir en el peso de la mercancía el de las envolturas, cintas y cartones, según está dispuesto.

Tejidos cilindrados.—Que los que han sido aforados con un recargo de 30 por ciento, se han rectificado, por sus partidas de lisos y llanos, á los cuales no corresponde ningún recargo, según el Arancel.

Pañuelos cortados.—Se dispuso que no se les imponga el 80 por ciento de recargo que dispone la letra D de las Notas segundas de las Clases IV y V, supuesto que ni tienen dobladillo, ni son prendas confeccionadas, á medio concluir ó hilvanadas.

Almacenajes.—Que el período de cinco días libres de almacenaje, que disfrutan las mercancías situadas en los Almacenes de la Aduana, por ser insuficientes en el mayor número de los casos para todas las formalidades del despacho, se amplíe á ocho días, y que ninguna hoja se pondrá al pago después de la *una de la tarde*, á fin de que no se le imponga al comerciante el día de almacenaje por no haber satisfecho los derechos de las mercancías el mismo día de puestas al pago las hojas.

Aforos y protestas.—Que tanto el Vista del despacho como el Jefe de la Sección de Vistas, están en el deber de comunicar á los interesados, después de haber efectuado los reconocimientos y aforos, la opinión que les merecen las partidas, pesos y valores declarados, á fin de que en tiempo puedan los comerciantes ó sus agentes tomar las muestras y las notas necesarias para efectuar las protestas con la necesaria antelación.

CHILE.

TRATADO CON LOS ESTADOS UNIDOS DE AMÉRICA PARA LA EXTRADICIÓN DE CRIMINALES.

Concluido en Santiago el 17 de april de 1900.
Ratificaciones canjeadas en Washingtón el 27 de mayo de 1902.

La República de Chile y los Estados Unidos de América, deseando confirmar sus amistosas relaciones y promover la causa de la justicia, han resuelto celebrar un tratado para la extradición de los prófugos de la justicia entre los Estados Unidos de América y la República de Chile, y han nombrado al efecto los siguientes Plenipotenciarios:

El Presidente de los Estados Unidos de América, al Señor HENRY L. WILSON, Enviado Estraordinario y Ministro Plenipotenciario de los Estados Unidos en Chile, y el Presidente de la República de Chile, al Señor Don RAFAEL ERRÁZURIZ URMENETA, Ministro de Relaciones Esteriores de Chile:

Quienes, después de comunicarse sus respectivos plenos poderes, que encontraron en buena y debida forma, han acordado y concluido los artículos siguientes:

ARTÍCULO I.

El Gobierno de los Estados Unidos y el Gobierno de Chile convienen en entregarse mútuamente las personas que, habiendo sido acusadas ó condenadas por alguno de los crimenes ó delitos especificados en el artículo siguiente y cometidos dentro de la jurisdicción de una de las Partes Contratantes, busquen asilo ó se encuentren en los territorios de la otra; siempre que ello se haga sólo en virtud de pruebas tales de culpabilidad que, según las leyes del lugar donde el prófugo ó la persona acusada se encuentre, habría habido mérito para su aprehensión y enjuiciamento, si allí se hubiera cometido el crimen ó delito.

Artículo II.

Se concederá la extradición por los siguientes crímenes y delitos:

1. Homicido, comprendiendo el asesinato, parricidio, infanticidio y envenenamiento; tentativa de homicidio, homicidio impremeditado pero voluntario.

2. Incendio.

3. Robo, definido como acto de quitar maliciosa y forzadamente dinero, bienes, documentos ú otra propiedad á otra persona, con violencia ó intimidación en ella; robo con fuerza en las cosas.

4. Falsificación ó circulación de papeles falsificados; imitación ó falsificación de documentos oficiales del Gobierno, de las autoridades públicas ó de los tribunales de justicia, ó la circulación de la cosa imitada ó falsificada.

5. El delito de contrahacer, falsificar ó alterar monedas, sea de metal ó papel, de instrumentos de crédito creados por el Gobierno nacional, por el de un Estado, provincia ó municipalidad, ó de sus cupones, ó de billetes de banco, ó la emisión ó circulación de los mismos; ó el delito de contrahacer, falsificar ó alterar sellos del Estado.

6. Malversación cometida por empleados públicos; malversación cometida por personas contratadas ó asalariadas, en detrimento de sus patrones; siempre que en una y otra clase de casos la malversación exceda de la suma de doscientos pesos de 48 peniques; hurto.

7. Fraude ó abuso de confianza de un depositario, banquero, agente, factor, tenedor de bienes ú otra persona que obre en carácter fiduciario, ó de un director, miembro ó empleado de una compañía, cuando las leyes de ambos países declaran criminoso semejante acto y el dinero ó el valor de los bienes defraudados no es inferior á doscientos pesos de cuarenta y ocho peniques.

8. Perjurio; instigación á perjurar.

9. Violación; rapto; sustracción de personas.

10. Destrucción ú obstrucción voluntaria é ilegal de ferrocarriles, poniendo en peligro la vida de personas.

11. Delitos cometidos en el mar.

(*a*) Piratería, según la ley ó el Derecho Internacional.

(*b*) Motín, ó conspiración para amotinarse de dos ó mas personas á bordo de un buque en alta mar contra la autoridad del capitán.

(*c*) Sumersión ó destrucción dolosa de un buque en el mar, ó tentativa de hacerlo.

(*d*) Atentados á bordo de un buque en alta mar con el propósito de causar daño corporal grave.

12. Crímenes y delitos contra las leyes de ambos países relativas á la supresión de la esclavitud y á la trata de esclavos.

También habrá lugar á la extradición por la participación en cualquiera de los crímenes y delitos mencionados en este Tratado, siempre que dicha participación sea castigada, en los Estados Unidos como una felonía, y en la República de Chile con presidio ú otras penas mayores.

ARTÍCULO III.

La demanda de entrega de prófugos de la justicia, se hará por los agentes diplomáticos de las Partes Contratantes, ó si estuvieren ausentes del país ó de la residencia del Gobierno, podrán hacerla los funcionarios consulares superiores.

Si la persona cuya extradición se solicita hubiere sido condenada por el crimen ó delito, se exhibirá una copia debidamente autenticada de la sentencia del tribunal que lo haya condenado, ó, si el prófugo estuviere simplemente acusado del crimen, se exhibirá una copia debidamente autenticada de la órden de arresto expedida en el país donde se ha cometido el crimen, y de las declaraciones ú otras pruebas que han dado mérito á dicha orden.

La extradición de prófugos en virtud de las disposiciones de este Tratado, se efectuará en los Estados Unidos y la República de Chile, respectivamente, de acuerdo con las leyes que sobre extradición estuvieren entónces vijentes en el Estado á quien se dirija la solicitud de entrega.

ARTÍCULO IV.

Si el arresto y detención de un prófugo se desearen por parte telegráfico ó de otro modo anticipándose á la presentación de las pruebas formales, la vía adecuada en los Estados Unidos consistirá en dirijirse á un juez ú otro magistrado autorizado para librar órdenes de arresto, en causas de extradición, y, en presentar una querella bajo de juramento, segun lo disponen las leyes de los Estados Unidos.

Cuando, en virtud de las prescripciones de este artículo, el arresto y detención de un prófugo se desearen en la República de Chile, la vía adecuada cosistirá en dirijirse al Ministerio de Relaciones Esteriores, el cual dispondrá inmediatamente que se den los pasos necesarios para asegurar el arresto ó detención provisional del prófugo.

La detención provisional del prófugo cesará y el preso será puesto en libertad si dentro de dos meses contados desde la fecha de su arresto ó detención provisionales, no se hubiere formalizado, según las estipulaciones de este Tratado, la reclamación de su entrega acompañada de las pruebas necesarias de su culpabilidad.

ARTÍCULO V.

Ninguna de las Partes Contratantes estará obligada á entregar á sus propios ciudadanos en virtud de las estipulaciones de este Tratado.

Artículo VI.

No será entregado el criminal fujitivo si el delito con respecto al cual se solicita su entrega, es de carácter político, ó si prueba que la reclamación de su entrega se ha formulado en realidad con el objeto de enjuiciarlo ó castigarlo por un delito de carácter político.

Ninguna persona entregada por una de las Altas Partes Contratantes á la otra, podrá ser acusada ó enjuiciada ó castigada por algún crimen ó delito político ó por algun acto relacionado con ellos, cometido con anterioridad á su estradición.

Dado que surjiere cualquiera cuestión acerca de si un caso cae bajo las disposiciones de este artículo, será definitiva la decisión que adopten las autoridades del Gobierno á quien se ha dirijida la solicitud de entrega ó que haya concedido la extradición.

Artículo VII.

No se concederá la extradición en conformidad á las disposiciones de este Tratado, si los procedimientos legales ó la aplicación de la pena correspondiente al hecho cometido por la persona reclamada, hubieren quedado excluidos por prescripción, de acuerdo con las leyes del país á que se ha dirijido el reclamo.

Artículo VIII.

Niguna persona entregada por una de las Partes Contratantes á la otra podrá, sin el consentimiento prestado por ella libre y públicamente, ser acusada ó enjuiciada ó castigada por otro crimen ó delito cometido antes de su extradición que aquel por el cual ha sido entregada, hasta tanto que no haya tenido oportunidad para regresar al país de que ha sido extraida.

Artículo IX.

Todos los objetos secuestrados que al tiempo de la aprehensión se hallaren en poder de la persona reclamada, ya sean fruto del crimen ó delito imputados, ó piezas que puedan servir de prueba del crimen ó delito, deberán, en cuanto fuere practicable y con arreglo á las leyes de los respectivos países, entregarse al tener lugar la extradición. Sin embargo se respetarán debidamente los derechos de terceros en orden á esos objetos.

Artículo X.

Si el individuo reclamado por una de las Altas Partes Contratantes en conformidad al presente Tratado, fuere reclamado también por una ó varias otras Potencias en razon de crímenes ó delitos cometidos dentro de sus respectivas jurisdicciones, su extradición se concederá al

Estado cuya solicitud se haya recibido primero, siempre que el Gobierno de quien se solicite la extradición no esté sujeto por tratado á dar preferencia á otro.

ARTÍCULO XI.

Los gastos ocasionados por el arresto, detención, examen y entrega de los prófugos en virtud de este Tratado, serán de cargo del Estado en cuyo nombre se pida la extradición; siendo entendido que el Gobierno solicitante no estará obligado á hacer ningún desembolso por servicios de los empleados públicos del Gobierno á quien se pida la extradición, que perciben sueldo fijo; y bien entendido que el gravamen por los servicios de los empleados públicos que sólo perciben derechos ó emolumentos, no excederá del de sus aranceles acostumbrados en los actos ó servicios ejecutados por ellos como si dichos actos ó servicios lo hubieran sido en procedimientos criminales ordinarios á virtud de las leyes del país del cual son empleados.

ARTÍCULO XII.

El presente Tratado empezará á rejir el trijésimo día después de la fecha en que se hayan canjeado las ratificaciones, y no tendrá efecto retroactivo.

Las ratificaciones del presente Tratado se canjearán en Washington tan pronto como sea posible, y éste permanecerá en vigor hasta seis meses después que cualquiera de los Gobiernos contratantes haya notificado al otro su intención de ponerle término.

En fe de lo cual los respectivos Plenipotenciarios han firmado los artículos precedentes en los idiomas inglés y español, y puesto al pie sus sellos.

Hecho por duplicado en la ciudad de Santiago, á los 17 días de abril de 1900.

HENRY L. WILSON.
R. ERRÁZURIZ URMENETA.

REPÚBLICA DOMINICANA.

MODIFICACIONES AL ARANCEL DE ADUANAS.

[Decreto de 17 de abril de 1902.]

ARTÍCULO 1°. Queda derogado el decreto del Congreso Nacional de fecha 26 de junio de 1901.

Art. 6°. El presente decreto será enviado al Poder Ejecutivo para los fines constitucionales, y comenzará á regir treinta días después de su publicación para los buques procedentes de Europa y veinte días para los de cualquiera otra procedencia.

ECUADOR.

TRATADO CON FRANCIA SOBRE MARCAS DE FÁBRICA.

El Presidente de la República del Ecuador y el Presidente de la República Francesa, igualmente animados del deseo de adoptar, de común acuerdo, las medidas que han juzgado más á propósito para garantizar recíprocamente la propiedad industrial, han resuelto celebrar al efecto, en provecho de ambas naciones, un Convenio especial, y han nombrado por sus Plenipotenciarios, á saber:

El Presidente de la República del Ecuador, al Sr. D. José Peralta, Ministro de Estado en el Despacho de Relaciones Exteriores;

El Presidente de la República Francesa, al Sr. D. J. Hipólito Frandin, Cónsul General, Encargado de Negocios de Francia en el Ecuador, Caballero de la Legión de Honor, etc.

Los cuales, después de haberse comunicado sus plenos poderes, reconocidos en buena y debida forma, han convenido en las disposiciones siguientes:

Artículo 1.

Los ecuatorianos en Francia y los franceses en el Ecuador gozarán de la misma protección que los nacionales en lo relativo á las marcas de fábrica y de comercio, á saber: los diversos signos que sirven para distinguir los productos de una industria ó los objetos de comercio, tales como el nombre bajo una forma especial, las señales, timbres, sellos, relieves, viñetas, emblemas, membretes, sobre ó empaques, etc., así como para los nombres comerciales, los de fábrica y la razón social.

ARTÍCULO 2.

Para asegurarse la protección garantizada en el artículo anterior, los pretendientes de uno ú otro Estado deberán cumplir las condiciones y formalidades prescritas por las leyes y reglamentos del otro.

ARTÍCULO 3.

Las marcas de fábrica ó de comercio á las que se aplica la presente Convención son aquellas que, en ambos países, pertenecen legítimamente á los industriales ó negociantes que las emplean, es decir, que el carácter de una marca ecuatoriana debe ser apreciado, en Francia, según las leyes del Ecuador, y, recíprocamente, el carácter de una marca francesa debe ser juzgado en el Ecuador, según las leyes de Francia.

Queda entendido, por supuesto, que cada uno de los dos Estados se reserva el derecho de rehusar el depósito y de prohibir el uso de cualquier marca que, por su naturaleza, fuere contraria al orden público ó á las buenas costumbres.

ARTÍCULO 4.

Cualquier producto que vaya con falsa indicación de procedencia, y en la cual uno de los dos Estados contratantes, ó cualquier lugar situado en uno de ellos, estuviese indicado, directa ó indirectamente, como país ó lugar de origen, será comisado en el acto de la importación, en cada uno de dichos Estados.

El comiso podrá también verificarse en el Estado en que se haya puesto la falsa indicación de procedencia, ó en aquel en que se hubiere introducido un producto marcado con tal falsa indicación.

Si la legislación de uno de los dos Estados no admite el comiso en el acto de la importación, dicho comiso será reemplazado con la prohibición de importación.

Si la legislación de uno de los dos Estados no admite el comiso en lo interior, ésta será reemplazado por las acciones y medios que asegura la ley de este Estado al Ministerio público ó á los nacionales, en caso de falsificación de sellos, timbres ó marcas.

ARTÍCULO 5.

El comiso se efectuará á petición, sea del Ministerio público, sea de una parte interesada, individuo ó sociedad, conforme á la legislación de cada Estado.

Será reputado como parte interesada todo fabricante, comerciante ó productor comprometido en la fabricación, comercio ó producción del artículo, y establecido en la ciudad, localidad, región ó país falsamente indicado como lugar de procedencia.

Las autoridades no estarán obligadas á proceder al comiso en caso de tránsito.

ARTÍCULO 6.

Las presentes disposiciones no obstan á que el vendedor indique su nombre ó sus señas sobre los productos que provienen de un país distinto del de la venta; pero, en este caso, las señas ó el nombre han de ir acompañados de la indicación precisa y en caracteres aparentes del país ó lugar de fabricación ó de producción.

ARTÍCULO 7.

Corresponde á los tribunales de cada país el decidir cuáles son las denominaciones que por causa de su carácter genérico, no estén incluidas en las disposiciones de la presente Convención, sin que las denominaciones regionales de procedencia de los productos vinícolas, estén, no obstante, comprendidas en la reserva dictada por este artículo.

ARTÍCULO 8.

El presente Convenio estará en vigor durante cinco años, que comenzarán á correr á los dos meses de firmarse. Sin embargo, si un año antes de expirar este plazo, ninguna de las dos Partes Contratantes anunciare á la otra, mediante declaración oficial, su intención de hacer cesar sus efectos, dicho Convenio continuará aún siendo obligatorio durante un año después de los cinco, y así en lo sucesivo, de año en año, permanecerá en vigor por todo el tiempo en que no se haya hecho la notificación previa.

ARTÍCULO 9.

El presente Convenio será ratificado, y se canjearán las ratificaciones tan pronto como sea posible.

En fe de lo cual, han refrendado los respectivos Plenipotenciarios el presente Convenio, y lo han sellado con sus propios sellos.

Hecho en Quito, el diez y siete de marzo de mil novecientos.

ESTADOS UNIDOS.

COMERCIO CON LA AMÉRICA LATINA.

IMPORTACIONES Y EXPORTACIONES.

En la página 1078 aparece la última relación del comercio entre los Estados Unidos y la América latina, tomada de la compilación hecha por la Oficina de Estadística del Departamento de Hacienda de los Estados Unidos. Estos datos se refieren al valor del comercio arriba mencionado. La estadística corresponde al mes de agosto de 1902, comparada con la del mes correspondiente del año anterior, y también comprende los datos referentes á los ocho meses que terminaron en julio de 1902, comparados con igual período de 1901. Debe explicarse que la estadística de las importaciones y exportaciones de las diversas aduanas referente á un mes cualquiera, no se recibe en el Departamento de Hacienda hasta el 20 del próximo mes, necesitándose algún tiempo para su compilación é impresión, de suerte que los datos estadísticos correspondientes al mes de agosto, por ejemplo, no se publican sino en octubre.

GUATEMALA.

DECRETO DE 16 DE MAYO DE 1902, RELATIVO AL 30 POR CIENTO DE LOS DERECHOS DE IMPORTACIÓN QUE DEBE PAGARSE EN ORO.

["El Guatemalteco" de 19 de mayo de 1902, nº. 28.]

Artículo 1°. El treinta por ciento en oro que, según el Decreto Gubernativo número 585, debe pagarse por cuenta del total de los derechos que por importación de mercaderías se causen, desde el primero de junio de este año, se recaudará en moneda de oro americano precisamente, ó en giros equivalentes y aceptables, representativos de dicha moneda.

Art. 2°. Se exceptúan del artículo anterior:

La hilaza de algodón para tejidos.

Los instrumentos de labranza aplicables á la agricultura.

La harina, el trigo y la carne salada, artículos que continuarán pagando los derechos de importación conforme al Decreto Gubernativo número 585.

CONVENCIÓN ENTRE GUATEMALA Y LOS ESTADOS UNIDOS DE AMÉRICA SOBRE POSESIÓN Y TRANSFERENCIA DE BIENES RAÍCES.

Firmado en Guatemala, agosto 27 de 1901.

Ratificaciones canjeadas, setiembre 16 de 1902.

Los Estados Unidos de América y la República de Guatemala deseando mejorar la situación de los ciudadanos de los respectivos países con referencia á la posesión y disposición de la propiedad inmueble y personal, situada ó estante dentro de los territorios de la otra, como también autorizar la representación de personas fallecidas, por medio de los Cónsules de sus respectivas naciones, en el arreglo de testamentarías, han resuelto concluir una convención para esos objetos, y han nombrado por sus Plenipotenciarios:

El Presidente de los Estados Unidos de América al Honorable Señor Don W. Godfrey Hunter, Enviado Extraordinario y Ministro Plenipotenciario de los Estados Unidos de América en Guatemala, y El Presidente de Guatemala al Señor Licenciado Don Juan Barrios M., Secretario de Estado y del Despacho de Relaciones Exteriores;

Quienes, habiendo canjeado sus dichos plenos poderes, hallados en buena y debida forma, han convenido en los artículos siguientes que han firmado:

Artículo I.

Cuando á la muerte de cualquier persona que tuviere bienes inmuebles (ó propiedades no personales) dentro de los territorios de una de las Partes Contratantes, dicha propiedad inmueble, por las leyes del país, pasare á un ciudadano de la otra, si no estuviere él inhabilitado por las leyes del país en donde está situada dicha propiedad inmueble, á ese ciudadano se les concederá un término de tres años para venderla, debiendo prolongarse razonablemente este término, si las circunstancias lo hicieren necesario, y sacar el producido de la venta, sin restricciones ó intervención, y libre de cualesquiera derechos ó gabelas por sucesión, homologación ó administrativos, distintos de los que, en iguales casos, estén impuestos á los ciudadanos del país de donde han de sacarse dichos producidos.

Artículo II.

Los ciudadanos de cada una de las Partes Contratantes tendrán plena facultad para disponer de sus propiedades personales que estén dentro de los territorios de la otra, por testamento, donación ó de cualquier otro modo; y sus herederos, legatarios y donatarios que sean ciudadanos de la otra Parte Contratante, ya residentes, ya no residentes, sucederán á sus dichas propiedades personales, y pueden tomar posesión de ellas, ya sea por sí mismos, ya sea por medio de otros que obren á su nombre, y dispondrán de ellas á su placer, pagando únicamente los derechos que los ciudadanos del país en donde esté la propiedad, estén obligados á pagar en casos iguales.

Artículo III.

En caso de muerte de cualquier ciudadano de los Estados Unidos de América en Guatemala, ó de cualquier ciudadano de Guatemala en los Estados Unidos, sin tener en el país en que falleció herederos conocidos, ó ejecutores testamentarios, nombrados por él, las autoridades locales competentes, inmediatamente, informarán al más inmediato funcionario consular de la Nación á que perteneció la persona difunta, de lo ocurrido, á fin de que se dirija inmediatamente el necesario informe á las personas interesadas.

El dicho funcionario consular tendrá el derecho de comparecer personalmente ó por delegado, en todas las tramitaciones, á nombre de los herederos ó acreedores ausentes, hasta que éstos estén representados de cualquier otra manera.

Artículo IV.

La presente convención se pondrá en vigor diez días después de aquel en que se canjeen las ratificaciones, y quedará en vigor por diez años después del canje. En el caso de que ninguna de las Partes Contratantes dé noticia á la otra, doce meses antes de que expire el dicho período de diez años, de la intención de poner fin á la presente Convención, ésta continuará en vigor hasta que expire un año á contar desde el día en que una ú otra de las Altas Partes Contratantes haya dado dicho aviso.

Artículo V.

La presente convención será ratificada en debida forma por el Presidente de los Estados Unidos mediante la aprobación de su Senado, y por el Presidente de Guatemala, mediante la aprobación de la Asamblea Nacional Legislativa; y las ratificaciones serán canjeadas en Wáshington ó en Guatemala.

En fé de lo cual, nosotros los respectivos Plenipotenciarios, hemos firmado este Tratado y puesto en él nuestros sellos.

Hecho por duplicado en la ciudad de Guatemala, hoy veintisiete de agosto de mil novecientos uno.

[L. S.] Juan Barrios M.
[L. S.] W. Godfrey Hunter.

MODIFICACIÓN DE LA TARIFA CONSULAR.

PALACIO DEL PODER EJECUTIVO,
Guatemala, 1° de septiembre de 1902.

El Presidente Constitucional de la República, acuerda:

Que desde el día 1° de noviembre próximo venidero, los Señores Cónsules acreditados fuera de la República, se atengan, para el cobro de derechos consulares por legalizaciones de facturas, á la tarifa siguiente:

	De derecho.
Por legalización de facturas, cuyo valor llegue á $100	$3.50
Por las que excedan de $100 hasta $500	5.00
Por las que excedan de $500 hasta $1, 000	7.00
Por las que excedan de $1, 000 hasta $3, 000	8.00
Por las que excedan de $3, 000 hasta $6, 000	10.00

Los Cónsules cobrarán, por cada millar adicional $1 de derechos.

La tarifa anterior sustituye á la que establece el artículo 69 del Reglamento Consular vigente.

Comuníquese:

ESTRADA C.

JUAN BARRIOS M.,
Secretario de Estado y del Despacho de Relaciones Exteriores.

HONDURAS.

I. Decreto de 5 de marzo de 1902, estableciendo el régimen aplicable al papel de imprenta.

[Gaceta de 22 de marzo de 1902, nº 2166.]

ARTÍCULO 1°. El papel de imprenta que se introduzca directamente por los dueños de imprentas ó por empresas periodísticas, no pagará ningún impuesto fiscal, de conformidad con el artículo 3° de la Ley Constitutiva de Imprenta.

ART. 2°. Los dueños de imprentas, ó los editores de periódicos, presentarán al Ministerio de Hacienda, ó á los Administradores de Aduanas, las facturas originales, para que se les extienda la orden correspondiente.

II. Decreto de 5 de marzo de 1902, estableciendo el régimen aplicable á las planchas y tubos de hierro galvanizados y á los tanques de hierro y de madera para recoger aguas lluvias.

[Gaceta de 31 de marzo de 1902, nº 2168.]

ARTÍCULO ÚNICO. Se declara libre de derechos é impuestos fiscales y municipales, por el término de cinco años, la introducción por los puertos de la República de planchas y tubos de hierro galvanizados, y de tanques de hierro y de madera para recoger aguas lluvias.

Los objetos importados según esta ley, no pagarán impuesto de bodegaje durante un mes, que se contará desde el día de su desembarque.

III. Decreto de 1º de marzo de 1902, relativo á la importación del alcohol.

[Gaceta de 31 de marzo de 1902, nº 2168.]

Artículo 1º. El número 60 de la Tarifa Aduanera vigente se leerá en los términos siguientes: "Por cada medio kilo de alcohol que se introduzca, se pagarán dos pesos. Los dueños de farmacias quedan con derecho para introducir treinta galones anuales para el uso exclusivo de su establecimiento, aforándoseles como medicinas, pero debiendo ser el alcohol químicamente puro."

Art. 2º. El exceso de treinta galones introducidos por los dueños de farmacias, pagará dos pesos por cada medio kilo.

Art. 3º. Los dueños de farmacias pedirán al Ministerio de Hacienda, exhibiendo las correspondientes facturas, la orden respectiva para que se afore el alcohol por ellos pedido como queda establecido.

EL BANCO DE HONDURAS.

El Banco de Honduras fué fundado el 1º de octubre de 1880, y su estado actual es próspero, según se ve por el balance correspondiente al primer semestre del año en curso.

Su capital asciende á $600,000, y sus entradas en el período mencionado fueron de $40,823.06; sus salidas $12,011.99; y su utilidad neta $28,811.07.

Al terminar el semestre el Banco contaba en metálico con $130,297.12 y sus billetes en circulación representaban un valor de $60,242. El total de su movimiento fué de $1,219,081.

MÉXICO.

INFORME LEÍDO POR EL SEÑOR PRESIDENTE DE LA REPÚBLICA AL ABRIRSE EL PRIMER PERÍODO DE SESIONES DEL 21º CONGRESO DE LA UNIÓN, EL 16 DE SEPTIEMBRE DE 1902.

Señores Diputados y Senadores: * * *

Nuestras relaciones con todos los pueblos civilizados son, sin excepción alguna, de paz y buena inteligencia, y las que cultivamos con algunos Gobiernos extranjeros, por medio de representantes diplomáticos, pueden calificarse de particularmente amistosas.

Por mutuo consentimiento acaba de someterse al Tribunal Permanente de Arbitraje instituido en La Haya, á virtud de la Conferencia justamente llamada de la Paz, el primer caso internacional contencioso; siendo las partes contendientes México y los Estados Unidos de América. Proviene este caso de una reclamación entablada por la

Iglesia católica de la Alta California contra la República mexicana y sostenida por el Gobierno de los Estados Unidos, demandando el pago de ciertos intereses de un fondo que, en la época colonial, fué instituido para las misiones en aquella antigua parte de nuestro territorio.

Primitivamente este fondo fué confiado á los Jesuitas para sus misiones en las Californias; más, en virtud de la real orden que los expulsó de los dominios españoles en 1768, los bienes que lo constituían pasaron á la Corona de España, la que encomendó su administración á una Comisión Real, en cuya guarda se encontraban cuando se consumó nuestra independencia.

El gobierno nacional siguió siendo administrador de aquel fondo, destinado á la reducción de los indios bárbaros y su conversión al cristianismo, y aunque en 1836 mandó ponerlo á disposición del obispo de las Californias para que lo administrara, esta disposición quedó derogada por decreto del 8 de febrero de 1842, y pasó de nuevo la administración de dicho fondo al Gobierno mexicano, á efecto de que invirtiese sus productos en la forma y términos que él mismo dispusiera, de conformidad con el objeto primordial de los fondadores.

Segregada la Alta California, en 1848, de la federación mexicana, y apoyado principalmente en el artículo catorce del tratado de paz con los Estados Unidos, del mismo año, que declaró fenecidos y cancelados todos los créditos y reclamaciones que pudieran alegar los ciudadanos de los Estados Unidos contra México, el Gobierno mexicano se consideró libre de todo compromiso con los representantes de la Iglesia de California, quienes, si con algún derecho se creían para reclamar, debieron hacerlo al Gobierno á cuya soberanía había pasado la Alta California con todos los derechos y obligaciones anexos.

No satisfecha la referida Iglesia con las razones á que aludo, ocurrió, no obstante su incompetencia, á la Comisión Mixta de Reclamaciones establecida en Wáshington á virtud de la convención del 4 de julio de 1868, pidiendo el pago de réditos hasta la fecha de la reclamación. Por falta de acuerdo entre los comisionados, el caso fué sometido á árbitro ó tercero en discordia, quien, creyendo encontrar motivos para ello, nos condenó al pago de cierta suma.

El Gobierno mexicano, sin embargo de estimar injusta esa sentencia, cubrió el importe de los réditos á que fué condenado.

Fundada en aquella decisión, la Iglesia de California ha pretendido posteriormente que la República siga pagando los réditos del fondo, y sus gestiones fueron presentadas por la vía diplomática. Después de algunas notas cambiadas entre el representante de los Estados Unidos y el Secretario de Relaciones Exteriores, no llegándose á un acuerdo, porque de nuestra parte se ha sostenido que el laudo de 1875 no comprendió los réditos posteriores, ni hay fundamento para exigirlos ó para considerar subsistente el capital, se estipuló, con el espíritu de conciliación propio de naciones amigas, someter el caso á la decisión del tribunal de La Haya. Al efecto, se firmó en Wáshington un protocolo de compromiso el 22 de mayo último, fijando las bases para el funcionamiento de ese tribunal, protocolo que, según recordaréis, obtuvo la aprobación del Senado mexicano.

Debo agregar que, de conformidad con las bases del mencionado compromiso, ambos Gobiernos nombraron á tiempo sus respectivos árbitros, quienes se reunieron el día 1° del corriente en la ciudad de La Haya y á su vez eligieron al superárbitro que debe fallar en caso de desacuerdo.

El Gobierno mexicano confía en la muy reconocida honorabilidad y altas prendas de los jurisconsultos que componen tan respetable tribunal, y de nuevo ofrece acatar el fallo definitivo que se pronuncie en el asunto.

Como bien lo sabéis, el 20 de mayo último se inauguró el Gobierno de la nueva República de Cuba. La proximidad de esta isla y las naturales simpatías que siempre nos ha inspirado, determinaron al Ejecutivo á reconocer desde luego el nuevo régimen político organizado en ella y á establecer allí una legación, que fué confiada á persona de reconocido mérito.

* * * * * * *

Ensanchadas nuestras relaciones con las diversas Repúblicas de la América del Sur, como natural resultado de la Conferencia que aquí se celebró recientemente, se ha creído oportuno aumentar la representación diplomática de México en aquellas naciones, y al efecto se ha establecido una legación acreditada en las Repúblicas que miran al Atlántico y otra en las que se hallan del lado del Pacífico.

* * * * * * *

En el puerto de Veracruz se encuentra actualmente una Comisión de médicos enviada por el Gobierno de los Estados Unidos después de haber solicitado el permiso correspondiente, con objeto de continuar los estudios, comenzados en la Habana el año anterior, acerca de la fiebre amarilla y su origen.

* * * * * * *

Como consecuencia de una de las resoluciones aprobadas por la Segunda Conferencia Internacional Americana reunida en México el año próximo pasado, el Gobierno de los Estados Unidos ha convocado la primera Convención Sanitaria Internacional que ha de reunirse en Wáshington en Diciembre próximo. El Ejecutivo designará en su oportunidad el personal que ha de llevar la representación de México en aquella Convención, cuyo principal objeto es el estudio de las cuarentenas en los puertos y fronteras y el del saneamiento de las ciudades marítimas, para evitar la propagación de enfermedades epidémicas.

* * * * * * *

En este mismo año y en los comienzos del próximo, se celebrarán en los Estados Unidos y en Europa Congresos internacionales en que México debe figurar, sobre todo en el Congreso de americanistas que se verificará en el mes próximo en Nueva York; en él los vestigios de nuestras antiguas civilizaciones tienen que ser tema de los más importantes estudios. Ya se ha diputado una comisión de peritos que comunicará á aquella ilustre asamblea trabajos dignos de toda atención.

* * * * * * *

La minería sigue desarrollándose de una manera ostensible, como lo demuestra el número de un mil setecientos setenta títulos expedidos en el último semestre, que amparan una superficie de cerca de treinta y un mil quinientas hectáreas. De estos títulos, corresponden un mil quinientos ochenta y tres á metales preciosos y ciento ochenta y siete á metales comunes.

Se han celebrado contratos para el establecimiento de haciendas metalúrgicas en los Estados de Sonora y San Luis Potosí.

Se han expedido patentes de permiso para la exploración de zonas petrolíferas en el Distrito Federal, Territorio de la Baja California y Estados de Oaxaca y Yucatán.

* * * * * * *

En el corto período que abraza este informe, el aumento de kilómetros en los ferrocarriles es de cuatrocientos cinco, de los cuales corresponden ciento cuarenta y tres al Ferrocarril de Veracruz al Pacífico y el resto á las demás líneas férreas nacionales; teniendo todas un desarrollo de quince mil ciento sesenta y nueve kilómetros, los que, aumentados con mil novecientos sesenta y seis construidos en los Estados y trescientos siete de ramales particulares, dan un total de diez y siete mil cuatrocientos cuarenta y dos kilómetros.

En el Ferrocarril Nacional del Istmo de Tehuantepec, se han repuesto los durmientes en ciento noventa kilómetros y el balaste en ciento treinta, y se han construido trescientas cincuenta alcantarillas; colocado rieles de ochenta libras en sesenta kilómetros y concluído los puentes permanentes de Jumuapa, Sarabia y Tehuantepec, la estación de pasajeros de Salina Cruz, talleres en Rincón Antonio, casa de fuerza motriz, talleres de maquinaria y ciento quince casas para empleados, artesanos y peones. Además, se han puesto en servicio doce locomotoras Baldwin, sesenta furgones setenta y cinco góndolas, veinticinco plataformas y cinco coches para pasajeros, correo y express.

En el Ferrocarril Nacional de México han comenzado las obras que tienen por objeto acortar la extensión de su línea troncal y convertirla en vía ancha.

El Ferrocarril de Coahuila y Pacífico ha terminado su línea desde Saltillo á Torreón é inaugurado su tráfico.

En el camino de Tula á Ciudad Victoria han quedado conectados todos los tramos en construcción, y es ya continua la carretera de Sierra Victoria, faltando sólo perfeccionar un pequeño tramo.

PARAGUAY.

DECRETO DE 3 DE ABRIL DE 1902 MODIFICANDO LA ACTUAL TARIFA DE AVALÚOS CON RESPECTO Á VINOS Y OTRAS BEBIDAS.

[Diario oficial de 9 de abril de 1902, No. 448.]

Artículo 1°. Queda modificada la actual tarifa de avalúos como sigue:

No.		Avalúo oro.
	SECCIÓN BEBIDAS.	
	Licores embotellados en general:	
247	Hasta 50° centesimales por litro docena	$12.00
248	En cascos ó damajuanas hasta 50° centesimales litro	.70
	Vinos:	
	Champagne en botellas no mayores de un litro docena	9.00
	Otros Vinos en general inclusive los espumantes en botellas no mayores de un litro docena	8.00
	Vinos de Oporto, Jerez, Madeira, Rhin, Château Margaux, Château Lafitte, Château Yquem, Borgoña y demás finos, en cascos ó damajuanas litro	.50
	Vino Moscato, Marsala, Nebiolo, Barolo, Sauternes, Mosela y los dulces y de postre y demás regulares litro	.15
	Vino Carlón, priorato, secos Burdeos y Borgoña ordinarios, Mosela ordinario, Barbera y demás comunes, en cascos ó damajuanas, de no más de 15° centesimales de fuerza alcohólica y 45 por ciento de extracto seco determinado por la vaporización á la temperatura de 100° centesimales, incluyendo el azúcar reductor litro	.10

Nota.—Cuando el extracto seco pase del límite arriba fijado, pagará un centavo por cada cinco gramos ó fracción de exceso y por litro.

Cuando estos vinos y demás bebidas vengan con mayor graduación alcohólica que la establecida, pagarán un centavo por cada grado ó fracción de exceso y por litro.

INMIGRACIÓN Y COLONIZACIÓN.

En la "Memoria del Departamento de Relaciones Exteriores" de la República, presentada al Congreso Nacional el 20 de junio último, y publicada en el "Diario Oficial de Asunción" el 5 de julio siguiente, se encuentran los siguientes párrafos:

"Las diversas instrucciones expedidas en circulares varias sobre *inmigración y reimpatriación*, han sido reunidas en un resumen impreso para facilitar su inteligencia y cumplimiento.

"El número de pasajes acordados en esta virtud, durante el período de esta memoria, es el que expresa el siguiente cuadro demostrativo:

Inmigración		683
Reimpatriación		162
Internación		37
Servicios varios		43
Suma		925
Primera clase		53
Segunda clase (enteros)	753	
Tercera clase (medios)	119	
		872
Suma		925

"En igual período del año administrativo anterior, ha sido de 272, lo que arroja un aumento de 658 en el actual. Es de advertir no obstante que esta cifra es la de los pasajes solicitados y expedidos, pero no todos éstos han sido usados, sea porque los solicitantes encontraron otro destino, ó por circunstancias diversas.

"'La inmigración que se continúa recibiendo, según se expresaba en el último mensaje (1° de abril de 1902), aunque reducida todavía en su cantidad por circunstancias múltiples y de carácter general, es sin embargo por su calidad la que conviene á nuestro país, por tratarse de elementos que en su totalidad vienen llamados por personas ó familias ya establecidas aquí al amparo de sus ventajas y de sus instituciones liberales.

"En efecto, la inmigración que llega al país, es de carácter absolutamente voluntario y estable, pues ella ya no regresa, y por el contrario, no tarda en asimilarse y en convertirse pronto en un elemento eficaz de atracción y de propaganda, por su concurso espontáneo y en virtud de las facilidades positivas que la inducen á radicarse en nuestro suelo. No hay duda de que el Paraguay es un país inmigratorio excepcionalmente favorable tanto por sus riquezas naturales cuanto por las excelentes condiciones de su población y de su clima, y á medida que se normalicen en él las transacciones económicas y se disipen los numerosos errores de que en general son víctimas los países sudamericanos ante el concepto, no siempre justiciero, de los pueblos del viejo continente, ha de ir recibiendo y asimilando progresivamente el contingente fecundo de la inmigración y del capital."

TONELAJE DE LOS BUQUES CARGADOS Y EN LASTRE LLEGADOS Á LA REPÚBLICA EN 1899 Y 1900.

	1899.	1900.
	Toneladas.	*Toneladas.*
Cargados	681,797	804,412
En lastre	1,173,277	1,635,783
Total	1,855,074	2,440,195

El movimiento total, entradas y salidas, para 1900, en toda la República fué 4,295,269 toneladas, de las que correspondieron al puerto de Asunción, 2,347,173 toneladas.

PERÚ.

SITUACIÓN ECONÓMICA Y COMERCIAL.

[De un informe enviado á su Gobierno por el Cónsul General de México en Lima, publicado oficialmente en julio de 1902.]

Concluyó aquí el primer año del siglo actual con la baja de los precios en los principales artículos de exportación como son el azúcar, el algodón y el cobre. Felizmente la baja de éste último no podrá ser sino momentánea, dadas las múltiples aplicaciones que da hoy la industria á este metal, cuya importancia crece de día en día.

En la actualidad este país se encuentra al punto de alcanzar un éxito sorprendente respecto del cobre, pues propiedades de enorme valor han sido descubiertas en el Cerro del Pasco, en el centro mismo de los Andes, impulsadas por fuertes capitales, en su mayor parte norteamericanos. Con motivo de facilitar la explotación de estas minas, se trata de la construcción de ochenta millas de vía férrea desde el punto terminal del Ferrocarril Central, que facilitará la conducción de los metales al puerto de Callao para su embarque. La falta de medios de transporte hace hoy difícil la conducción de los metales á la costa; pero con la construcción de la línea en proyecto, puede asegurarse que el Perú llegará á ser uno de los mayores productores de cobre.

El algodón aunque sufre sus alternativas, debido á su excelente calidad es muy apreciado y tiene gran aceptación en los mercados europeos.

No sucede lo mismo con el azúcar, que es su principal y su más importante artículo de exportación. Sabido es que la baja grande y sostenida del azúcar ha causado una completa revolución en el mundo mercantil, como era natural, desde que es un artículo de universal consumo y de universal producción. Este acontecimiento imprevisto es de funestos resultados para el Perú, pues tiene que producir forzosamente, grave trastorno en el movimiento de su comercio general.

Los intereses comprometidos en la industria azucarera en este país son sin embargo de tal magnitud, que se hacen los mayores esfuerzos para mejorar ó salvar la situación nivelando la producción con la demanda, aminorando el costo de producción, procurando obtener transporte más barato, y buscando nuevos mercados para la venta.

El comercio general de la República alcanzó en el último año fiscal, la suma de soles 68,151,502 descompuesta como sigue:

	Soles.
Exportación	44,979,996
Importación	23,171,506
La exportación de minerales fué de	16,950,558

Los artículos que especialmente contribuyeron al aumento de la exportación en ese año, fueron, el azúcar, el algodón, la cocaína, los cueros, las lanas, los minerales, el arroz, la coca y el alcohol. Las Aduanas todas produjeron 6,822,401 soles.

La amonedación de oro nacional llegó á la cantidad de 81,225 libras peruanas.

El Presupuesto general de ingresos de la nación ascendió á 13,239,810 soles.

PATRÓN DE ORO.

Por ley promulgada el 14 de diciembre último, se ha declarado que la unidad monetaria de la República es la libra peruana de oro. Las principales disposiciones de esa ley son: Que las monedas de plata y de cobre acuñadas conforme á las leyes de 14 de febrero de 1863 y 30 de diciembre de 1872 y existentes en el país, serán únicamente fraccionarias de la libra, en la relación de 10 soles por libra; que sólo la moneda de oro podrá tener poder cancelatorio ilimitado, no estando nadie obligado á recibir más de 100 soles en moneda de plata, ni más de diez centavos en moneda de cobre; que queda prohibida la introducción de toda moneda de plata ó de cobre; que las libras ó medias libras inglesas tendrán curso legal, como si fueran peruanas; que las obligaciones contraídas en soles de plata, antes de esta ley, podrán ser canceladas en esa moneda, hasta dos años después, pasado dicho plazo, deberán cancelarse en oro; y que el Poder Ejecutivo proceda á desmonetizar, á su juicio, hasta un millón de soles de plata, convirtiendo su valor en libras de oro peruanas.

El oro efectivamente comenzó á circular en Lima con alguna facilidad (en su mayor parte libras esterlinas inglesas); pero al poco tiempo comenzó á escasear hasta casi desaparecer, debido esto probablemente, á que los especuladores lo retenían guardado, ó que salía del país en pago de retornos para las importaciones. Esto causó como era natural bastantes dificultades en las transacciones.

Se creyó luego que promulgada la ley estableciendo definitivamente el patrón de oro, y desmonetizando la mayor cantidad de plata posible, se conseguiría restablecer la situación, conservando siempre la estabilidad en la equivalencia de 10 á 1 entre el oro y la plata, y el cambio de 24 peniques.

Restablecida la circulación del oro, se mueve éste nuevamente, aunque no con la abundancia y facilidad deseable.

ESTANCO DE LA SAL.

En cuplimiento de una ley, se ha expedido un Decreto gubernativo que establece el estanco de la exportación é importación de la sal, y un impuesto de cinco centavos por kilogramo de la destinada al uso doméstico y de un centavo de la que se aplique á usos industriales. Esta ley se dictó con el fin de arbitrar recursos para completar la suma que debe servir al rescate de las provincias de Tacna y Arica retenidas por Chile como en rehenes, después de la última guerra con ese país.

Según datos estadísticos oficiales, los productos de este ramo ascendieron en el último quinquenio á 2,120,862 soles.

Con el fin de garantizar la buena administración y recaudación de este impuesto, se ha expedido últimamente un decreto autorizando la formación de una Sociedad con el nombre de Compañía Salinera del Perú.

SOCIEDAD RECAUDADORA DE IMPUESTOS FISCALES.

Facultado el Poder Ejecutivo para las disposiciones necesarias á la mejor recaudación de los impuestos fiscales de consumo, al opio, tabacos, alcoholes y timbres, se expidió un decreto por el cual se creó una Sociedad Anónima, encargada de recaudar por cuenta del Estado, los ingresos fiscales provenientes de dichos ramos.

Anteriormente estas recaudaciones se hacían por el sistema de remates. La nueva organización ha producido muy satisfactorios resultados, habiendo producido en el último período de dos años, la suma de 7,345,693 soles.

DEUDA PÚBLICA.

La Deuda Pública del Perú está reducida hoy solamente á la interna, pues que la externa fué totalmente cancelada, á mérito del contrato de 9 de enero de 1890, celebrado con los tenedores de los bonos peruanos.

En junio de 1889 se expidió una ley, con el fin de consolidar toda la deuda interna. Para el servicio de esta deuda, la ley aplicó la renta del impuesto al consumo sobre los alcoholes, y el 5 por ciento de los derechos de aduanas.

El monto total de la deuda interna reconocida fué de 41,359,000 soles. Esta suma está hoy reducida en más de un 30 por ciento.

Con motivo de los interesantes estudios que se hacen hoy en Europa para dar al alcohol las diferentes aplicaciones á la fuerza motriz, al alumbrado y á la calefacción, tendrá lugar en Lima una Exposición de todas las máquinas y aparatos destinados á estos fines. Siendo este país productor de alcohol, tiene naturalmente gran interés en las nuevas aplicaciones de esta substancia.

La industria agrícola y pecuaria algo ha avanzado en los últimos años. Actualmente está en vía de organización una Escuela Técnica de Agricultura, con cuyo objeto se han hecho venir de Bélgica profesores agrónomos competentes.

Se encuentran en ejecución algunas importantes obras de irrigación que sin duda prepararán el terreno para la inmigración, de la que tanto necesita este país para impulsar y desarrollar sus grandes riquezas latentes.

Por grandes que sean los esfuerzos que se hagan para desarrollar las relaciones comerciales entre dos países, todos escollarán si no se cuenta con fáciles vías de comunicación y cómodos transportes. Esto es el caso hoy entre México y el Perú, y la situación subsistirá mientras no se pongan expeditos los puertos del Pacífico de México, para el comercio general de este lado del Continente.

¡Cuántos artículos nobles podrían entrar en el intercambio! Así el Perú mandaría á México sus buenos azúcares, sus algodones, su arroz, sus vinos y licores, su petróleo, sus finas lanas, etc.; en retorno traería de allá, el trigo, los buenos tabacos, las excelentes maderas, los tejidos de lana, las vainillas, el buen cacao, etc.

El día en que los puertos de Acapulco y Salina Cruz estén unidos por la vía férrea, con el corazón de México, estamos seguros de que se desarrollará una espontánea y constante corriente comercial de gran consideración con este país y con toda esta costa occidental de Sud-América. Muy conveniente y muy satisfactorio será esto para México, pues que nada es más laudable que ensanchar el comercio á nuevos mercados, abrir otros campos de actividad, y crear más fáciles condiciones de vida para los pueblos.

URUGUAY.

DATOS SOBRE EL CAFÉ.

Ministerio de Relaciones Exteriores,
Sección de Agricultura,
Montevideo, julio 5 de 1902.

Señor Director: No siendo nuestro clima apropiado al cultivo del café (*Coffea arabica*), ni existiendo plantío alguno de esa rubiacea en el país, porque sólo se desarrolla bien y produce en los climas tropicales, los datos que se pueden suministrar á ese respecto no pueden ser sino relativos á ese comercio y consumo en el país, ilustrados con algunas consideraciones estadísticas, con los cuales difícilmente se puede hacer un informe luminoso, como sería el caso si ese cultivo se efectuara en el país, pues habría entonces elementos suficientes para tratar científicamente todo lo concerniente á su producción, relacionando las variedades de café á los terrenos, al clima y condiciones locales de explotación. Me limitaré, por lo tanto, á consignar aquellos referentes á nuestro comercio y consumo que, por otra parte, parecen fueran los que se solicitan únicamente en el presente informe. La estadística de importación del café desde 1890 hasta 1901, que en detalle trascribo á continuación, indica pequeñas oscilaciones en cuanto á las cantidades importadas anualmente y se puede considerar que el término medio de 1,046,296 kilos de los doce años á que me refiero, como una cifra que expresa nuestro consumo normal, pues las variantes no obedecen á una causa determinada.

Importación de café.

Años.	Cantidades.	Valores.	Años.	Cantidades.	Valores.
	Kilos.			*Kilos.*	
1890	994,147	$237,716	1896	1,153,928	$276,943
1891	1,035,433	248,222	1897	958,228	229,975
1892	788,696	189,098	1898	1,005,327	241,278
1893	914,593	219,501	1899	1,153,341	276,806
1894	982,117	236,269	1900	1,004,057	240,973
1895	1,100,261	263,809	1901	1,453,955	348,949

Nuestra Dirección de Aduanas no hace distinción entre las diferentes clases de café para la percepción del impuesto: hay un solo rubro, una tarifa única de avalúo para café en grano crudo; pues no se introduce ni tostado ni molido y paga de derechos á razón de un peso cada 10 kilos. Nuestras casas mayoristas no hacen clasificación especial para la venta; lo reciben clasificado y así lo venden á las minoristas. El café procedente de Río de Janeiro viene en sacos de 60 kilos y el de Santa Catalina en sacos de 75 kilos. La mayoría de las clases de café introducidas al país, proceden del Brasil, siendo también éstas las de mayor consumo, especialmente los de calidad intermediaria; las superiores y las inferiores tienen poca demanda. El orden de preferencia podría establecerse del modo siguiente: Santa Catalina, Río de Janeiro y Bahía, en las especiales; Caracolillo, Lavado, Moka y de Puerto Rico tienen poco consumo por su precio muy elevado. Nuestro comercio interno ha establecido los siguientes precios en la última quincena de junio que varían poco en el curso del año:

Clases.	Por 10 kilos despachado.	Por 10 kilos en depósito.
Caracolillo	$3.60	$2.60 á $2.50
Lavado	3.60	2.60 á 2.40
Río de Janeiro	2.65	1.65 á 1.60
Santa Catalina	2.60	1.60 á 1.55
Bahía	2.65	1.60 á 1.70
Moka	7.80	6.80

Las bebidas rivales del café son, en primer término, la yerba mate (*Ilex paraguayensis*) que excluye el uso del café en casi toda la campaña y en la mayoría de los pueblos del interior de la República; el té que se consume también en crecidas proporciones; la cerveza en el verano, pues se nota en esa estación una disminución en la venta del café. No existen leyes sanitarias relativas al café, sólo se exigió el cambio de envase cuando se desarrolló la peste bubónica en el Brasil, pero fué una medida transitoria. Es cuanto puedo informar.

VENEZUELA.

NUEVO ARANCEL DE ADUANAS.

[En observancia desde el 1º de julio de 1902.]

El Congreso de los Estados Unidos de Venezuela decreta:

Artículo 1º. Las mercaderías procedentes del extranjero que se introduzcan po las Aduanas de la República se dividen en nueve clases, á saber:

1ª clase pagará por kilogramo 5 céntimos de bolívar.
2ª clase pagará por kilogramo 10 céntimos de bolívar.
3ª clase pagará por kilogramo 25 céntimos de bolívar.
4ª clase pagará por kilogramo 75 céntimos de bolívar.
5ª clase pagará por kilogramo B 1.25.
6ª clase pagará por kilogramo B 2.50.
7ª clase pagará por kilogramo 5 bolívares.
8ª clase pagará por kilogramo 10 bolívares.
9ª clase pagará por kilogramo 20 bolívares.

Párrafo primero. Corresponden á la primera clase, 5 céntimos de Bolívar el kilo.

A.

1. Aparatos y máquinas para generar vapor del residuo del petróleo.
2. Aparatos y máquinas para producir el alumbrado por gas ó por la electricidad.
3. Aparatos para incubar huevos.

B.

4. Bombas para incendio.

C.

5. Carburo de calcio.
6. Cartas hidrográficas y de navegación.
7. Carruajes, utensilios y materiales destinados exclusivamente para caminos de hierro.
8. Cenizas de madera, orujo de uvas, guano y toda otra sustancia vegetal, mineral, animal ó artificial que sirva para abonar la tierra y que no esté comprendida en otra clase.
9. Cimento romano.
10. Cimento Tilestoniete para techos.

E.

11. Ejes, resortes, llantas y planchas para coches, carros, carretas, carretillas y zorras que hayan de construirse en el país.
12. Esferas, ó globos celestes ó terrestres, los atlas, los mapas y los planos topográficos de todas clases litografiados ó impresos.
13. Extracto de cuajo.

H.

14. Huevos de aves.
15. Hierro nativo y el hierro viejo en piezas, propios ambos para fundición.

L.

16. Libros impresos en pliegos ó á la rústica que traten de ciencias, artes y oficios, catálogos, periódicos y muestras de escrituras propias para las escuelas de primeras letras.

M.

17. Maderas aparejadas á la construcción naval y las trozas y piezas redondas de pino ó pitche-pine propias para los mástiles y también las cuadradas ó redondas de pitche-pine de más de 0.25 metro, de espesor, roble ú otras maderas ordinarias no especificadas, propias para ser aserradas en tablas, cuartones ó cualquiera otra forma.
18. Máquinas y aparatos para telégrafos eléctricos.
19. Motores de vapor de cualquiera clase, con todos sus accesorios.
20. Molinos de viento con todos sus accesorios.

O.

21. Oro y plata sin manufacturar.

P.

22. Platino ú oro blanco sin manufacturar.
23. Plantas vivas de todas clases, los herbarios ó colecciones de plantas secas que no sean medicinales.
24. Puentes con sus cadenas, pisos y demás adherentes, cuando sean para uso público ó empresas agrícolas, pues de lo contrario pagarán el derecho correspondiente á las materias de que se compongan.

R.

25. Relojes para uso público que no sean importados por el Gobierno Nacional.

S.

26. Semillas para sembrar que no sean alimenticias.

27. Cuando se introduzcan botellas vacías de vidrio ordinario en cajas que hayan de servir para trasportar el mismo número de botellas que contienen, después de llenas pagarán las botellas y las cajas separadamente el derecho que tienen señalado en esta ley.

28. Los objetos en que se introduzcan los artículos libres, ó de clases inferiores como baúles, sacos de noche, carteras, mantas ó telas que no desmejoren su precio ordinario, se pesarán por separado y pagarán el derecho que á cada uno corresponda.

Párrafo segundo.—Corresponden á la segunda clase, diez céntimos de bolívar el kilo.

A.

29. Acido sulfúrico y gas ácido carbónico líquido.

30. Afrecho de trigo, de maíz, de linaza, de avena, de centeno y de cualesquiera otros cereales, y las tortas de los mismos afrechos para alimentos de animales.

31. Anzuelos y alambre de hierro galvanizado ó sin galvanizar no manufacturado.

32. Almagre, greda, ocre, blanco de España, arcilla, caput-mortum y toda tierra para edificios, no especificada.

33. Alquitrán mineral ó vegetal, asfalto, petróleo bruto y betunes de todas clases, excepto el de calzado.

34. Arcos ó flejes de hierro ó de madera para pipas, bocoyes, barriles y cedazos.

35. Aguas minerales.

36. Arroz en grano y avena.

B.

37. Barras de hierro (como herramienta).

38. Botellas comunes de vidrio ordinario, negro ó claro, para envasar licores, aguas gaseosas y leche esterilizada, las damezanas ó garrafones vacíos, los frascos cuadrangulares del mismo vidrio ordinario y las canecas en que viene ordinariamente la ginebra.

39. Bombas hidráulicas con sus respectivos tubos, válvulas y demás piezas accesorias.

40. Botes y lanchas armadas ó en piezas y los remos, y velas para estas embarcaciones pequeñas.

41. Brea rubia ó negra.

C.

42. Cal hidráulica, cal común y cualquier otro material semejante de construcción, no incluído en otras clases.

43. Carnaza, desperdicios ó garras de cuero y las tripas secas que emplean las salchicherías.

44. Cáñamo ó estopa en rama ó torcida para calafatear ó estopar, la estopa embreada y los desperdicios de algodón para limpiar máquinas.

45. Cañerías ó conductos de hierro ó de plomo para cañerías y los codos y conexiones para dichos tubos.

46. Cartón en pasta y la masa filtrante que usan las fábricas de cerveza.

47. Cartón impermeable para techar edificios y otros usos.

48. Carros y carretas.

49. Carretillas de mano y escaleras de incendio para bomberos.

50. Cebada en concha.

51. Centeno y trigo en grano.

52. Coches, calesas, quitrines, ómnibus, faetones y toda clase de carruajes no comprendidos en otras clases.

53. Corteza de encina, de roble ó de otros árboles que se emplean en las curtidurías y las cenizas de hueso.

H.

54. Harina de cebada, de garbanzos ó sea revaleciere de Barry, y cualquiera otra harina no especificada en otras clases.

55. Hielo que se introduzca por los puertos, donde hayan establecidas, con autorización del Gobierno, máquinas para producirlo, que funcionen.

56. Hierro redondo ó cuadrado, en platina, en planchas ó en láminas de hierro bruto negro que se emplean para hacer calderas y estanques.

L.

57. Ladrillos para limpiar cubiertos.

58. Ladrillos aunque sean refractarios y las lozas ó baldosas de barro cocido, de mármol, de jaspe, de madera y de cualquiera otra materia para pisos, siempre que no excedan de sesenta centímetros; las tejas de barro ó de pizarra y las piedras ordinarias brutas de todas clases.

59. Leña y carbón vegetal en pedazos.

M.

60. Maderas ordinarias como tablas, vigas y cuartones de pitch-pine ó cualquiera otra sin cepillar ni machihembrar menores de 0.25 metro de espesor y las de pino no especificadas, cualquiera que sean sus dimensiones.

61. Maíz en grano.

62. Manzanas, uvas, peras y cualquiera otra fruta fresca.

63. Máquinas, estanques de hierro galvanizado y aparatos no especificados en la primera clase, cuyo peso total exceda de mil kilogramos y los refrigeradores para conservar el hielo.

64. Música escrita en pliegos, cuadernos ó en media pasta.

65. Mañoco.

P.

66. Papel de estraza, y la paja ó sea yerba seca, que no sean medicinales, como el heno y otras semejantes, propias para alimento de animales.

67. Pez común; blanca, negra ó rubia.

68. Palo de campeche, guayacán, brasilete, mora, sandalino rosado y cualquier otro semejante, en rasura.

69. Pizarras para techos.

70. Pizarras para mesas de billar.

71. Pizarras con marcos ó sin ellos, y los libros y lápices de pizarra.

R.

72. Resina de pino y cualquiera otra que no sea medicinal.

73. Ruedas para coches, carros y carretas, las bocinas de hierro para dichos vehículos, y las ruedas de acero montadas sobre ejes de acero.

S.

74. Sal de Epsom.

75. Sal de Glauber y el silicato de soda.

T.

76. Tierra de siena y tierra negra para limpiar.

77. Túmulos ó sepulcros de mármol, de granito ó de cualquiera otra materia.

78. Teja-mani.

79. Tiza ó greda blanca en pedazos ó en polvo y también los polvos de mármol y de vidrio.

Y.

80. Yeso en piedra, ó en polvo y el yeso mate.

Párrafo tercero.—Corresponden á la tercera clase, veinticinco céntimos de bolívar el kilo:

A.

81. Aceite de oliva y sus imitaciones y el de semillas de algodón.

82. Aceite de kerosene, de colza, el de hueso y el de esperma de cristal, que se emplean en las máquinas.

83. Ácido esteárico y oleico; estearina pura sin manufacturar, y también la mezclada con parafina, conocida con el nombre de estearina comercial.

84. Ácido acético, hidroclórico ó muriático, el ácido bórico y bórax.

85. Ácido nítrico ó agua fuerte.

86. Aguas y limonadas gaseosas.

87. Acero, bronce, latón ó azofar, peltre, cobre, estaño puro ó ligado, plomo, níquel y zinc en pasta ó en bruto, en barras, en cabillas, en rasuras ó láminas, estén ó no estas últimas taladradas ó agujeradas.

88. Agua de azahares.

89. Aguarrás ó espíritu de trementina.

90. Agujas para tejer, de acero, madera, hueso, caucho ó de cualquiera otra materia semejante.

91. Algodón.

92. Alhucema ó espliego.

93. Alumbre crudo ó en piedra.

94. Amarillo inglés ó cromato de plomo, azarcón ó minio, litargirio y manganeso mineral, el albayalde ó carbonato de plomo y la asbestina.

95. Animales disecados.

96. Anuncios de productos medicinales ó de otras industrias, en formas de almanaques.

97. Aparatos ó filtradores de agua y los aparatos telefónicos con las partes adherentes á dichos aparatos, como conmutadores, clavijas, manubrios, carbones y el alambre de cobre forrado para teléfonos.

98. Arneses y colleras, para coches de todas clases y para calesas, quitrines, ómnibus, faetones y toda clase de carrujes, carros y carretas.

99. Arroz molido, sagú, sulú, tapioca y el maíz pilado.

100. Azúcar moscabado ó prieto, y el azúcar quemado ó granulado que se emplea en la fabricación de cerveza.

101. Azufre en flor ó en pasta.

B.

102. Balanzas y romanas, con sus pesas, excepto las de cobre, ó que tengan la mayor parte de este metal.

103. Barba de palo, y la fibra especie de esparto.

104. Barriles, pipas y bocoyes armados y sin armar, y las duelas, cuando vengan por separado.

105. Barrenas y taladros para perforar piedras ó troncos.

106. Barro vidriado ó sin vidriar en cualquiera forma no especificado en otras clases.

107. Blanco de zinc y bolo blanco.

108. Bejuco, junco ó junquillo, enea, palmas, paja no especificada, mimbre sin manufacturar y la espiga de trébol para hacer escobas.

109. Balas, municiones y perdigones.

C.

110. Cables, jarcias y cordelería ó mecate.

111. Cachimbas, boquillas y pipas de barro ó de loza ordinaria, sin ninguna otra materia.

112. Cañones de guerra de cualquier materia que sean.

113. Caráotas, frijoles, garbanzos, lentejas, habichuelas y toda clase de legumbres, hortaliza y raíces alimenticias, ó comestibles sin preparar.

114. Crudo ó cañamazo y coleta cruda número tres, telas crudas ordinarias que regularmente se emplean para hacer sacos de cacao y de café, y para enfardelar mercancías, cuyo color naturalmente oscuro no ha sido alterado por las preparaciones propias para blanquearlo, aunque tengan listas ó cuadros de color.

115. Carbón vegetal en polvo, carbón animal, y negro humo.

116. Carne salada, salpresa ó ahumada, jamones y paletas que no vengan en latas, el tocino y las lenguas ahumadas ó saladas, excepto la carne salada en tasajo, que es de prohibida importación.

117. Cañamazo empapelado para enfardelar, cartón fino ó papel grueso para escritorio, para tarjetas y para cualquier otro uso, incluyendo en esta clasificación el papel impermeable para prensas.

118. Cloruro de cal y cianuro de potasio.

119. Cedazos de alambre de hierro.

120. Cerda vegetal y sus similares.

121. Cerote para zapateros.

122. Cerveza simple y sidra.

123. Creolina y todos los desinfectantes líquidos ó en polvo.

124. Cobre viejo en piezas inutilizadas.

125. Cocinas portátiles de hierro ú otro metal.

126. Coches fúnebres, inclusos los vidrios, plumeros ó penachos, y cualquier otro artículo perteneciente al coche, aunque sea de los que separadamente pagan más derecho, siempre que vengan con el coche, en el mismo ó en otro bulto.

127. Creta blanca ó roja en piedra ó en polvo.

128. Crisoles de todas clases.

E.

129. Encurtidos en vinagre, con excepción de las aceitunas, alcaparras y alcaparrones.

130. Enebrina ó semilla de enebro.

131. Esmeril en piedra ó en polvo.

132. Esparto en rama.

133. Espoletas y mechas para la explotación de minas, y la estopa lubricante para la unión de marquinarias.

134. Estoperoles de cobre.

F.

135. Fuentes ó pilas de hierro, mármol ó cualquiera otra materia, y las estatuas, bustos, jarrones y floreros de mármol, alabastro, granito ó cualquiera otra piedra semejante.

136. Flor de sagú.

G.

137. Galletas de todas clases, sin mezcla de dulce.
138. Gas fluído y el orozuz.
139. Goma arábiga.

H.

140. Harina de trigo y sémola quebrantada para hacer fideos, el trigo quebrantado y la harina de avena.

141. Herramientas é instrumentos, como mazos, mandarrias, hachuelas, cabrestantes, fraguas, fuelles de todas clases, gatos para levantar pesos, mollejones, tornillos grandes para herreros y bigornias, yunques y toda otra herramienta ó instrumentos semejantes á los indicados.

142. Hierro manufacturado en alambre y en tela de alambre, que sirven de fondo á las camas, en anclas y cadenas para buques; en cajas para guardar dinero; en morteros ó almireces; en muebles; en prensas para copiar cartas y timbrar papel; en clavos, tachuelas, brocas, remaches y estoperoles; en edificios desarmados ó en partes de ellos, como balcones, puertas, balaustres, rejas, columnas, techos, aunque vengan separadamente; en estatuas, jarrones, floreros, bustos ó cualquier otro adorno semejante para casas y jardines; en pesas para pesar; en planchas para aplanchar; en postes para empalizadas; en alcayatas con argollas ó sin ellas; en tambores ó calvoyas; en anafes, budares, calderas, parrillas, ollas, sartenes, tostadores y cualquiera otra pieza para el servicio doméstico, estén ó no estañadas, y tengan ó no baño de loza, excepto el latón de hierro ú hojalata en las mismas piezas que corresponden á la 4ª. clase. Los clavos de hierro galvanizados con arandelas también de hierro galvanizado, corresponden á esta 3ª. clase.

143. Hojalata sin manufacturar y las láminas de lata papel que se emplean para forrar baúles.

144. Hueso, cuerno y pezuña, sin manufacturar.

145. Holandilla azul de algodón.

J.

146. Juguetes de todas clases para niños, de cualquiera materia que sean y también las metras.

L.

147. Libros impresos, en pliegos ó á la rústica, no comprendidos en la primera clase, folletos, cuadernos de instrucción primaria que vengan en la misma forma ó en media pasta.

148. Lija con base de género ó de papel.

149. Linaza en grano ó molida y las semillas de colsa.

150. Lino en rama.

151. Loza ordinaria y loza de barro vidriada ó sin vidriar, en cualquier forma, no especificada en otras clases.

M.

152. Madera de nogal.
153. Madera fina para construir instrumentos de música, ebanistería, etc.
154. Madera en hojas ó sean chapas para enchapar muebles.
155. Maderas aserradas, cepilladas ó machihembreadas.
156. Manteca de puerco y mantequilla.

157. Máquinas, estanques de hierro galvanizado y aparatos no comprendidos en las clases anteriores, cuyo peso no exceda de mil kilogramos; advirtiéndose que cuando con las máquinas vengan artículos anexos á ellas para repuestos y que separadamente paguen más derechos, se aforará el todo como máquinas, si vienen en el mismo bulto.

158. Molinos y molinetes no comprendidos en la primera clase.

159. Mineral de hierro, cobre, estaño, el lápiz plomo ó mina de plomo y amianto y asfeto.

P.

160. Papas de todas clases y tamaños.

161. Papel de cualquier clase no especificado, las serpentinas ó cintas de papel, papel picado, blanco ó de color que se emplea en el juego de carnaval y el papel de seda blanco en hojas que estén dentro de las dimensiones de 49 centímetros de largo por 36 de ancho que se emplea para la fabricación de libros de copiar.

162. Pescado salpreso, salado ó ahumado que no venga en lata.

163. Piedras para litografiar, piedra pómez, piedras de todas clases y en cualquier forma para moler ó amolar; las refractarias para hornos de fundición, las de destilar y cualesquiera otras semejantes á las indicadas.

164. Pinturas ordinarias preparadas en aceite.

165. Pianos aunque sean mudos.

S.

166. Salitre, sal de nitro y la potasa común y la calcinada.

167. Sanguijuelas.

168. Sardinas prensadas, en aceite, en tomate, ó en cualquiera otra forma.

169. Sebo preparado para bujías esteáricas ó estearina.

170. Soda ó sosa común ó calcinada.

171. Soda ó sosa carbónica cristalizada.

172. Sulfato de hierro ó caparrosa.

173. Sulfato de cobre ó piedra lipes.

T.

174. Telas ó tejidos de alambre de hierro no comprendidos en otras clases y los flejes de alambre.

175. Trementina común de Venecia y la pasta y el extracto de campeche.

V.

176. Veneno para preservar pieles.

177. Vidrios ó cristales planos sin azogar, blancos ó de color.

178. Vinagre común y vinagre empireumático y el orujo de uvas en aguardiente.

179. Vinos de todas clases, en pipas, barriles y barricas, excepto los medicinales.

180. Venteadores de café.

Z.

181. Zumaque en polvo ó en ramo.

Párrafo cuarto.—Corresponden á la cuarta clase, 75 céntimos de bolívar el kilo:

A.

182. Aceite de linaza.

183. Aceite de pescado que no sea de bacalao, aceite de ajonjolí, de sésamo, y de almendras.

184. Aceite de palma y aceite secante ó líquido para pintores.

185. Aceitunas, alcaparras ó alcaparrones.

186. Aceiteras, tallerés, angarillas ó aguaderas y portavinajeras, excepto las que tengan oro ó plata, que corresponden á la octava clase y las de plata alemana ó doradas y plateadas, que corresponden á la sexta.

187. Acero, hierro, cobre, latón ó azófar, estaño, hojalata, metal campanil, bronce, plomo, peltre, zinc, aluminio y nikel manufacturado en cualquiera forma, no comprendida en otras clases, estén ó no pulidos, charolados, estañados ó bronceados, y los hornos para fabricar azúcar.

188. Alambre manufacturado en armaduras para pelucas, en jaulas para pájaros, en armadores ó perchas para vestidos y para sombreros ú otros aparatos semejantes, y también las armaduras de paraguas ó quitasoles.

189. Almendras, avellanas, nueces, maní, castañas, y cualquiera otra fruta seca con cáscara, no especificada.

190. Alambiques y todo otro aparato semejante.

191. Amargo de Siegert.

192. Ajonjolí, alpiste y mijo.

193. Anís en grano, alcarabea, canela, canelón, ajos, cebollas, cominos, clavos, orégano, pimienta y demás especies que sirven para sazonar y condimentar los alimentos.

194. Arañas, bombas, briseras, candelabros, candeleros, fanales, faroles, girándulas, lámparas, linternas, palmatorias, guardabrisas y quinqués, con excepción de los que tengan algo de oro ó plata, que corresponden á la octava clase, y los de plata alemana ó dorados ó plateados que corresponden á la sexta clase, debiendo aforarse en la clase á que corresponden los artículos expresados, todo lo que sea anexo á dichos artículos cuando vengan juntamente con ellos.

195. Árboles llamados de Navidad.

196. Azabache en bruto.

197. Azúcar blanco ó refinado.

B.

198. Balanzas, romanas y pesas de cobre ó que tengan la mayor parte de este metal, inclusive las pesas aunque sean de hierro, si vienen junto con las balanzas y pesos.

199. Baldes, tinas y tobos de madera.

200. Bandas de billar y las bandas ó fajas de telas gruesas enceradas para correas de volantes en los motores de vapor.

201. Bagatelas con todos sus accesorios (juego).

202. Bastisajes ó sean sombreros de fieltro para sombreros sin fular, pelos para sombreros, estuches de papel, cueritos, forros, felpas, viseras para cachuchas y morriones, las cintas de seda ó de algodón, cuando vengan cortadas en pedazos que no excedan de 0,80 m. de largo y todo otro artículo que solo se use en la fabricación de sombreros, como la tela barnizada con goma laca disuelta en alcohol, que se emplea en la fabricación de sombreros de pelo negro y el espíritu alcohólico preparado con la misma gema y los cordones de lana ó de seda de 0,80 m. de largo que también se emplean en dicha fabricación.

203. Betún y crema para calzado y el aceite bituminoso para ennegrecer y suavizar arneses.

204. Billares con todos sus accesorios inclusas las bolas y el paño correspondiente á toda mesa de billar, cuando venga juntamente con los billares.

205. Borra de aceite, de manteca y de cualquiera otra materia grasosa y el bolo arménico.

C.

206. Cajas de maderas, aunque vengan desarmadas ó sean en tablitas para hacerlas y los excusados de loza con sus conexiones de metal y demás accesorios.

207. Canastos, canastillos, cestas, cochecitos para niños y cualesquiera otras piezas de mimbre ó junco, quedando incluidos en esta clasificación los cochecitos para niños, de cualquiera materia que sean, el cañamazo de algodón empapelado para fabricación de sobres y el que se trae con baño de sulfato de cobre.

208. Cartón manufacturado ó preparado para cajas y cajitas ó en cualquiera otra forma, excepto en juguetes para niños, en máscaras y en barajas ó naipes. Las tarjetas en blanco de todos tamaños corresponden á esta cuarta clase.

209. Cebada mondada ó molida.

210. Cebadilla.

211. Cápsulas para cubrir las tapas de botellas.

212. Cepillos ordinarios ó bruzas para bestias y los de cuerno ó ballena para lavar pisos.

213. Cera negra ó amarilla vejetal sin labrar.

214. Cerda ó crin y las telas de cerda que se usan para ahormar vestidos de hombres.

215. Circo de caballitos ó carrousels.

216. Cola ordinaria en pasta ó líquida y colodión para fotografiar.

217. Crudo y coleta cruda número 2, tela ordinaria del mismo nombre que las comprendidas en el número 119 de la tercera clase, pero que ya ha sido más ó menos blanqueada y también la cotonía.

218. Cuchillos de punta ordinarios, con vainas ó sin éllas; los de mango de madera ú otra materia ordinaria para pescadores; los cuchillos grandes y machetes de acero de monte y en general los cuchillos que se emplean para artes y oficios.

219. Charoles y barnices de todas clases.

220. Caucho manufacturado en tubos ó conductos; y en láminas ó bandas para correaje de maquinarias y las arandelas ó anillos de caucho con alma de género.

E.

221. Encerado ó hule para cubrir el piso, para enfardelar y para techos.

222. Espejos de todas clases, armados ó desarmados y lunas azogadas.

223. Esperma de ballena y parafina.

224. Espuma de mar, sustancia que se aplica á la elaboración del pan y los polvos para hornear.

225. Estera, esterilla ó petates para pisos.

226. Esterillas y felpudos de mecates, pintados para mesas.

F.

227. Figuras, adornos y envases para dulce de cualquiera clase que sean, así como los cartuchos de papel dorado, hechos ó á medio hacer, que se traen con el mismo objeto. Cuando los envases para dulces vengan forrados con seda ó terciopelo ó adornados con flores ú otros artículos de clases superiores á éstas, se aforarán en la 6ª clase, como artículos de fantasía.

228. Felpudos ó limpia piés no especificados.

229. Frutas pasadas.

230. Frutas en aguardiente, en almíbar ó en su jugo.

231. Fustes ó armaduras para monturas.

232. Flores artificiales de porcelana.

G.

233. Galletas que tengan mezcla de dulce.

234. Gasolina, bencina ó nafta.

235. Gelatina de todas clases.

H.

236. Harina de papas, de maíz y de centeno.

237. Hilaza ó hilo para zapateros, las cuerdas de cáñamo para riendas con alma de estopa y las hebillas de hierro para uso de los talabarteros, ya sean estañadas, niqueladas ó bronceadas.

238. Hilo grueso de cáñamo ó de pita y los guarales ó cordeles de la misma materia que se emplean en el ramo de pesquería.

239. Hilo acarreto.

240. Hojalata y latón de hierro manufacturado en cualquiera forma no especificada y las piezas de hierro para uso doméstico cuando vengan con tapa de hojalata ó latón.

I.

241. Incienso.

242. Instrumentos para artes y oficios con cabos ó sin ellos, como alicates, buriles, compases, barrenas, cucharas de albañil, escopla, formones y niveles, gurbias, garlopas, azuelas, gullames, leznas, limas, martillos, sierras, serruchos, tenazas y tenacillas, tornos y tornillos de banco.

J.

243. Jabón de piedra, llamado de sastre.

244. Jarabes de todas clases excepto los medicinales, los dulces de todas clases, el azúcar cande y la fécula de arroz aromatizada que se emplea en la fabricación de dulces.

L.

245. Lacre en panes ó en barretas ó zulacre.

246. Lana en bruto y la lona y la loneta cruda de lino ó de algodón.

247. Leche condensada.

248. Libros impresos empastados, con excepción de los mencionados en la octava clase.

249. Loza, imitación de porcelana.

250. Loza de porcelana y de china, en cualquier forma no especificada.

251. Lúpulo y flor de cerveza.

M.

252. Madera manufacturada en cualquier forma, no comprendida en otras clases.

253. Manígrafos.

254. Muebles de hierro y madera.

255. Mármol, jaspe, alabastro, granito y toda otra piedra semejante, labrada ó pulida en cualquier forma no mencionada en otras clases.

256. Maicena.

257. Mechas y torcidos para lámparas y los limpiadores de tubos.

258. Mostaza en grano ó molida.

259. Muebles de madera común, de mimbre, de paja ó junco.

O.

260. Organos ó cualquiera de sus aparatos cuando vengan por separado.

261. Osteina y la oleomargarina.

P.

262. Palitos para hacer fósforos.

263. Pasadores de madera tejidos con hilo de lino.

264. Pasta ó mastic para lustrar y también el que sirve para los tacos de billar.

265. Papel pintado para tapicería, incluso el negro y el papel albuminado.

266. Pasta imitando porcelana, mármol, granito ú otra piedra fina en cualquier forma manufacturada, excepto en juguetes para niños.

267. Papel para cigarrillos no especificados, aun cuando traiga impreso ó litografiado el nombre del fabricante ó de la fábrica para quien viene destinado.

268. Piedras de chispa, piedras de toque ó de pulir ú otras semejantes, no incluídas en otras clases.

269 Pieles sin curtir, no manufacturadas.

270. Palas cuando sean todas de madera.

271. Preparación para soldaduras.
272. Puntas de zuela para tacos de billar.

Q.

273. Quesos de todas clases.

S.

274. Sacos vacíos de cañamazo, de coleta, de crudo ó de otra tela semejante.

275. Salchichones, chorizos, jamones en latas, pescado en lata, conservas alimenticias, hongos secos ó en salsa, harina lacteada y todo otro alimento preparado ó sin prepararse, no incluídos en las clases anteriores, como la pasta glutinada de Buitoni y la fosfatina.

276. Salsas de todas clases y encurtidos en mostaza.
277. Sebo en rama, en pasta ó prensado, y toda grasa ordinaria para hacer jabón.
278. Sifones y máquinas para aguas gaseosas.
279. Suela colorada ó blanca no manufacturada y la suela cáñamo para alpargatas.

T.

280. Taburetes para piano de cualquiera materia que sean.
281. Talco en hoja ó en polvo.
282. Tanza ó hilo de cerda para pescar.
283. Tapaderas de alambre para las viandas.
284. Tapas con coronillas de metal, vidrio, cristal ó porcelana.

285. Telas ó tejidos de algodón, cañamazo, esparto ó lino, para cubrir el suelo, aunque tenga alguna mezcla de lana, y las telas de cerda para forrar muebles.

286. Telas preparadas para retratos y pinturas al óleo y también el esfumino para dibujo.

287. Telas y tejidos ordinarios de cañamazo, lino ó algodón para muebles, manufacturados en cinchones ó en cualquiera otra forma; las rodillas de algodón para uso doméstico, y la cinta de paja para empaquetar.

288. Tacones de madera, con ó sin casquillos de cobre ó hierro.

289. Tiras de género ó de papel estañado para el calzado, de un centímetro de ancho y doce de largo.

290. Tirabotas y tirabuzones.
291. Tiza en panes, en tablitas ó en otra forma para uso en los billares.
292. Trasparentes y celosías para puertas y ventanas.
293. Triquitraques y los fulminantes para cosacos ó tiritos.

294. Tubos ó conductos de goma y las bandas de goma para correajes de maquinarias.

V.

295. Velas de lona, loneta y cotonía para embarcaciones.
296. Velas de sebo.
297. Velocípedos ó bicicletas.

298. Vidrio, cristal manufacturado en cualquier forma, no comprendido en otras clases.

299. Vino cualquiera que sea su clase si se importa en garrafones ó botellas, excepto los medicinales.

Y.

300. Yeso manufacturado en cualquier forma, excepto en juguetes para niños.

Párrafo quinto.—Corresponden á la quinta clase, un bolívar veinticinco céntimos el kilo.

A.

301. Aceite de bacalao, de tártago, los medicinales y cualquiera otro no especificado.

302. Aceites y jabones perfumados.

303. Arsénico.

304. Acido tartárico en polvo.

305. Amoniaco líquido.

306. Aguas de olor para el tocador y para lavar el pelo, como la floridana y otras semejantes, y las aguas para limpiar metales.

307. Aguardiente de todas clases, el brandy ó cognac y sus esencias, el ajenjo, la ginebra y sus esencias hasta 22° Cartier; pasando de este grado se hará la liquidación proporcionalmente. Quedan también incluídos en esta clase los amargos no especificados, como el elíxir amargo de coca.

308. Almendras mondadas.

309. Aparatos ó conformadores para medidas de sombreros.

310. Aparatos de fotografía y los útiles que se emplean para hacerlos, no comprendidos en otras clases.

311. Armaduras ó formas de tela engomada para sombreros, gorras y cachuchas.

312. Argollas ó hebillas forradas en cuero ó zuela.

313. Asentadores de navajas, piedras finas para amolar navajas y también la pasta para afilarlas.

314. Azafrán.

315. Azogue ó mercurio vivo.

B.

316. Baúles, sacos de noche, bolsas y maletas de todas clases para viajes.

317. Botas para cargar vinos, y las bolsas y saquitos de género encerado para remitir muestras de granos al exterior.

318. Bragueros, candelillas ó sondas, suspensorios, hilas para heridas, mangas ó filtros, pesoneras y teteros ó biberones, picos de teteros, mamaderas, émbolos, ventosas, collares anodinos, espátulas, lancetas, retortas, clisobombas, geringas de todas clases y sifones no especificados.

319. Bramante, brin, cotí, dril, doméstico, liencillo, platilla, warandol ó irlanda cruda de lino ó de algodón y toda otra tela cruda semejante, debiendo aforarse en esta clase cualquiera de estas telas aunque tengan listas ó flores de color, siempre que el fondo sea crudo; y la holandilla de hilo, negra ó azul.

320. Brochas y pinceles de todas clases.

C.

321. Cajas de suela para sombreros.

322. Calendarios de todas clases.

323. Cámaras claras ú oscuras para dibujos ó fotografías, y demás aparatos semejantes.

324. Cañamazo de algodón para bordar y el de hilo crudo, similar al punto ordinario que se emplea para mosquiteros.

325. Cápsulas, bolsas ó sacos de papel de cualquier clase y tamaño que sean, para uso de boticarios, estén ó no rotulados.

326. Carey sin manufacturar.

327. Caserillo, coleta blanca, lienzo de rosa, lomo de camello, crea de algodón y la de hilo llamada crea cruda alemana, números 9, 10 y 11; la crehuela rayada ó de cuadros pintada ó sin pintar y toda otra tela semejante á las expresadas, no incluidas en las clases anteriores.

328. Cedazos de alambre de cobre, de cuero, de madera ó de cerda.

329. Cepillos para dientes, el pelo, la ropa, el calzado y para cualquier otro uso, excepto los comprendidos en la 4ª clase.

330. Cera blanca pura ó mezclada sin labrar y la cera mineral.

331. Cerda de jabalí para zapateros.

332. Cola de pescado y cola líquida para pegar zapatos.

333. Colores y pinturas no incluidos en clases anteriores, como azulillo ultramarino y el kalsomine, tierra de varios colores y la pintura preparada en aceite que sirve para esmalte.

334. Corcho en tablas, en tapones ó en cualquiera otra forma.

335. Cordonados para zapatos, las trenzas ordinarias de algodón para taloneras de alpargatas y los cordones y guarales de lino ó de algodón, ya sea que vengan retorcidos ó flojos según el uso á que se destinen siempre que contengan diez hilos ó más en su formación.

336. Cuarzo amatiste.

337. Cubeba.

338. Cortaplumas, navajas, tijeras, chambetas, cuchillos y tenedores, excepto los que tengan mangos de hojilla de oro ó plata que corresponden á la 8ª clase y los que lo tengan de plata alemana ó plateados ó dorados que corresponden á la 6ª clase.

339. Cuerdas y entorchados.

340. Cerveza concentrada ó pectonizada.

341. Corteza de sasafrás y toda otra corteza medicinal.

D.

342. Dril de algodón blanco y de color, el llamado dril casinete de algodón, la franela blanca de algodón, el batán de algodón y la tela felpuda blanca ó cruda que sirve para paños de baño, de mano ó toallas.

343. Drogas, medicinas y productos químicos no incluidos en las clases anteriores, lo mismo que todos los vermífugos y cualquier otro artículo de uso medicinal, como el bicarbonato de soda, el vino de buey, el vino quina Bisteri, la semilla de cardomomo y la planta que lo produce. Y las drogas, medicinas y productos químicos patentados, no comprendidos en otras clases, y la dinamita.

E.

344. Encerados ó hules de cualquier forma, menos los que se empleen para pavimentos, para enfardelar y para techos, incluidos en la 4ª clase.

345. Entretela de algodón.

346. Escobas, escobillas y escobillones de cerda.

347. Esencias y extractos de todas clases no especificados.

348. Esponjas.

349. Estereoscopios, cosmoramas, dioramas, panoramas, linternas mágicas, fonógrafos, grafófonos y todo otro aparato semejante.

F.

350. Farolillos de papel, cuellos, pecheras y puños de papel, inclusos los forrados en géneros y el papel manufacturado, no comprendido en otras clases.

351. Floretes, máscaras, petos y guantes para esgrima.

352. Fósforos de todas clases no especificados, y la pasta de fósforos.

353. Fotografías.

354. Frazadas de algodón.

355. Frazadas de lana blanca, ó con franjas de color y las oscuras de cabrín.

G.

356. Goma laca, resina de copal y toda clase de goma ó resina no especificada en otras clases.

357. Guantes de cerda y también los de esgrima.

358. Glicerina.

H.

359. Hilo común de coser, el hilo flojo para bordar, y el hilo flojo de una hebra simple, propio para tejidos mecánicos.

I.

360. Imán.

361. Imágenes y efigies, que no sean de oro ó plata y los maniquíes mecánicos de tamaño natural.

362. Instrumentos de música y las cajas de música ó cualquiera de sus partes ó accesorios, exceptuándose los órganos y los pianos.

363. Instrumentos de cirugía, de dentistas, y también los de anatomía, de matemáticas y otras ciencias, no incluídos en otras clases.

J.

364. Jabón blanco jaspeado, llamado de Castilla ó de Marsella.

365. Jabón común, polvos de jabón y sal de roca para las bestias.

366. Juegos de ajedrez, de damas, de dominó, de ruleta y otros semejantes, y también las barajas ó naipes de cualquiera clase.

L.

367. Láminas ó estampas de papel.

368. Libros ó libretines en blanco, creyones y carboncitos para dibujar, bultos y portafolios, libros de esqueletos litografiados para libranzas, lápices de todas clases, excepto los de pizarra, goma para borrar, sellos y timbres para cartas, tinta para escribir y polvo de tinta, cuchillos para papel, lapiceros, lacre, obleas, arenilla, plumas de acero, palilleros, tinteros y todo otro artículo de escritorio, con excepción de los sobres para cartas y de los artículos que tengan algo de oro ó plata.

369. Libritos con hojillas de oro ó plata finos ó falsos para dorar ó platear, el bronce en polvo y libritos para broncear.

370. Licoreras vacías ó con licor.

371. Liencillo, brín y doméstico, crudo ó de colores, de hilo ó de algodón.

372. Limadura de hierro.

373. Listados, arabias y guingas de lino ó de algodón ordinarios, entendiéndose como ordinarios los que sólo tengan hasta 13 hilos de urdimbre ó trama en un cuadrado de cinco milímetros.

374. Listones, cañuelas y cenefas ó molduras de madera, pintadas, barnizadas doradas ó plateadas y los alzapaños de madera, ó sean las abrasaderas ó perillas de madera que se usan para recoger las cortinas.

375. Loneta de algodón de color y las trenzas del tejido ordinario de lino, de algodón ó lana de 7 á 15 centímetros de ancho, para cinchas y sobrecinchas.

376. Licores dulces como chericordial, crema de vainilla, de cacao ó de otros semejantes.

M.

377. Madapolán, bretaña, doméstico, matrimonio de algodón, irlanda, crea, elefante, platilla, liencillo, simpático, savaje, holandilla blanca y cualquier otra tela blanca de algodón semejante á las anteriores.

378. Marcos ó cuadros de cualquiera materia que sean, con vidrios ó sin ellos, con estampas, retratos, efigies ó láminas ó sin ellas.

379. Máscaras ó caretas de todas clases.

380. Macarrones, tallarines, fideos, y cualquiera otra pasta de sopa semejante.

381. Medidas de cuero, de tela ó papel, sueltas ó en estuches.

382. Muebles de madera fina, como palisandro, caoba, palo de rosa y nogal; los que tengan forrado el espaldar ó asiento de cerda, lana, algodón ó seda; los de madera ordinaria que estén dorados, y las urnas funerarias de cualquiera clase que sean.

N.

383. Nuez de agallas, nuez-moscada y las flores de nuez moscada llamadas macis.

P.

384. Pantallas de metal, de papel ó de género.

385. Pastillas de goma de cualquiera clase que sean.

386. Perfumería de todas clases y los libros perfumados de Papier poudré.

418. Colchas, sábanas, mantas, hamacas, cobertores y carpetas para mesa, de lino ó de algodón.

419. Cintas de goma para calzado.

420. Coral en cualquiera forma, excepto cuando venga montado en oro ó plata.

421. Coronas fúnebres y otros adornos funerarios semejantes.

422. Cordón de lino ó de algodón blanco ó de color, retorcido ó flojo que tenga menos de diez hilos en su formación, así como también el hilo torcido en forma de cordón delgado como los llamados de cartas y de coser velas que por su flexibilidad no sea cordel y pueda aplicarse á los tejidos de mano ó en máquinas.

423. Crinolinas, polizones y toda clase de miriñaques y también los cauchos forrados ó sin forrar que se ponen en el interior de los trajes de señora.

424. Cuchillos y tenedores con mangos de plata alemana, ó metal blanco ó plateados ó dorados.

425. Colchones, jergones, almohadas y cojines que no sean de seda, las plumas de

aves para hacerlos, y la tela de alambre manufacturada en la misma forma de los jergones.

426. Cabulleras de algodón para hamacas.

D.

427. Damasco, coquí, bombasí, bordón colchado, cotí, alemanisco, mahón, nanquín, naquinete, estrepe, piqué, rasete, tangep ó lino engomado de algodón, blanco ó de colores, y cualquiera otra tela de algodón, semejante á las expresadas no comprendida en otras clases.

428. Dedales que no sean de oro y plata y los dientes y ojos artificiales.

E.

429. Enaguas, fustanes, dormilonas y túnicos de algodón hechos ó en cortes y las telas de algodón preparadas para enaguas con tiras bordadas ó sin éllas.

430. Efectos de plata alemana ó metal blanco y sus imitaciones, como bandejas azafates, frenos, bozales, espuelas, estribos charnelas, hebillas, arañas, lámparas, candelabros ú otros.

431. Efectos de hierro ú otros metales dorados ó plateados, no incluyéndose los artículos de escritorio que pagarán siempre como de quinta clase aunque estén dorados ó plateados.

432. Estambre en rama y pelo de cabra.

433. Estuches con piecesitas de acero, cobre ú otro metal para bordar, limpiar la dentadura ó las uñas y para dibujos y pinturas.

434. Escobas, escobillas y escobillones de palma, junco ú otra materia vegetal.

F.

435. Fieltro en piezas para gualdrapas.

436. Frazadas de lana ó lana mezclada con algodón, con fondos de color ó de diferentes colores, y las mantas ó cobertores para camas, de lana ó mezclada con algodón también de colores.

G.

437. Géneros ó tejidos para chinelas, excepto los de seda.

438. Goma ó cinta de goma para el calzado.

439. Gutapercha labrada ó sin labrar y los zapatos de goma.

H.

440. Hilo de oro ó de plata falsos, alambrillo, lentejuelas, relumbrón, oropel, hojillas, galones, pasamanería y cualquier otro artículo de oro ó plata falso para bordar ó coser.

441. Hueso, marfil, nácar, azabache y sus imitaciones, carey y sus imitaciones, caucho, goma elástica, láminas de celuloide, asta ó cuerno y talco, manufacturado en cualquiera forma, no especificada en otras clases, y exceptuando también los manufacturados en juguetes para niños que corresponden á la tercera clase y los que tengan algo de oro ó plata, que corresponden á la octava clase.

M.

442. Manteles, paños de mano y servilletas de todas clases.

443. Matrimonio de hilo ó mezclado con algodón.

444. Minuteros ó manecillas, llaves, muellecitos, resortes y otras piezas para el interior de relojes, que no sean de oro ó plata.

P.

445. Pábilo y algodón hilado flojo para pábilo.

446. Pañuelos de algodón, entendiéndose por pañuelo el que no pase de un metro de largo.

447. Papel dorado ó plateado, el estampado á manera de relieve y el pintado para hacer flores.

448. Paraguas, sombrillas y quitasoles, de lana, lino ó de algodón.

449. Perlas y piedras falsas sin montar, ó montadas en cualquier metal que no sea oro ó plata.

450. Polvos de arroz y otros semejantes para el tocador, como los de caracol de Persia calcinado. También corresponden á esta clase las motas de pluma para usar estos polvos.

451. Plata alemana en cualquiera forma no especificada.

452. Plumas de ganso preparadas para limpiar dientes.

453. Plumeros par limpiar.

454. Prendas falsas.

R.

455. Relojes de mesa ó pared, los llamados despertadores, los de agua ó arena y cualquiera otra clase de reloj, excepto los de faldriquera y los introducidos por el Gobierno Nacional para uso público, que están determinados en otras clases.

S. y T.

456. Sombreros, gorros, cascos y pavitas de paja y sus imitaciones, sin ningún adorno.

457. Suela charolada ó de patente no manufacturada.

458. Tabaco hueva, el torcido para mascar y el papel para cigarrillos en bobinas ó en forma de cigarrillos egipcios.

W.

459. Warandol blanco de lino ó mezclado con algodón.

Z.

460. Zarazas, nanzú, calicos, cretonas, carlancanes, brillantinas, listados que tengan más de trece hilos de urdimbre ó trama en un cuadrado de 5 milímetros, popelinas, malvinas, japonesas, lustrillos, percalas de color, y cualquiera otra tela de algodón de color semejante á las indicadas y no mencionada en otras clases, como el merino de algodón y la franela de algodón de color.

Párrafo séptimo.—Corresponden á la séptima clase, 5 bolívares el kilo:

A.

461 Abanicos de todas clases.

462. Abrigos ó sereneras de lana ó mezclada con algodón.

463. Almillas ó guarda camisas de lana ó mezclada con algodón.

B.

464. Bastones con estoque ó con mecanismo para disparar.

465. Bolsas para dinero, de lino ó de algodón.

C.

466. Calcetas, medias, fluecos, borlas, encajes, cintas, bandas, cordones, pasamanería, felpas, gorros, fajas, lazos, charreteras, escarpineas y guantes de lana, ó mezclados con algodón.

467. Calzado en cortes ó sin suela, que no sea de pieles y los felpudos de pieles de carnero.

468. Capelladas de alpargatas.

469. Carpetas, paños y cualquier otro artículo de tejido crochet, menos los de seda.

470. Casullas, bolsas para los corporales, manteles ó frontales, capas pluviales, dalmáticas, estolas, manípulos, paños para cubrir cálices, bandas y demás ornamentos para uso de los sacerdotes y de las iglesias.

F.

474. Fósforos de estrellitas ó fuegos de bengala.

475. Fuegos artificiales.

G.

476. Gualdrapas y sudaderos de todas clases.

M.

477. Medias de lino ó mezcladas con algodón y las de algodón torcido llamadas vulgarmente de hilo de Escocia.

478. Municioneras, polvoreras, pistoneras y bolsas ó sacos para cazadores.

479. Muselinas, crespó de algodón blanco y de color, linó, rengue, bareje, granadinas, organdia, céfiro clarín, dulcesueño, tarlatán, imité, holán batista, batistilla de algodón blanco ó de color, lisa, labrada, calada ó bordada en piezas ó en cortes para vestidos y cualquiera otra tela semejante á las anteriores no comprendida en otras clases.

480. Muselina y batista de lino ó mezclada, cruda ó de otro color, en piezas ó en cortes para vestidos.

P.

481. Pana, panilla, y felpa de algodón, imitación de terciopelo, en piezas ó en cinta.

482. Paño, pañete, casimir, casinete, muselina, raso, punto, franela, lanilla, alepín, alpaca, cambrón, merino, sarga, cúbica, damasco y cualquiera otra tela de lana ó mezclada con algodón, no mencionada en otra clase ó que esté confeccionada en vestidos, pues entonces corresponden á la novena clase.

483. Pañolones, chales, paños y pañoletas de muselina, linó, punto ú otra tela fina de algodón y las telas y tejidos de Ramié, aunque estén mezcladas con algodón.

484. Pañuelos, pañolones, chales, paños, carpetas para mesa, de lana ó mezcladas con algodón, sin adornos ó bordados de seda.

485. Paraguas, paraguitas, quitasoles ó sombrillas de seda ó mezcladas con lana ó algodón.

486. Pieles curtidas manufacturadas en cualquiera forma, no comprendidas en otras clases.

487. Punto ó tul de algodón ó pita y el luto elástico de crespó para sombreros.

S.

488. Sillas de montar, cabezadas, cañoneras ó pistoleras, riendas, cinchas, gruperas, pellones y zaleas de todas clases.

T.

489. Tabaco en rama y los tallos ó palitos de la hoja del tabaco.

Párrafo octavo.—Corresponden á la octava clase, diez bolívares el kilo.

A.

490. Adornos de cabeza y redecillas de todas clases.

C.

491. Cabello ó pelo humano y sus imitaciones, manufacturado ó no.

492. Camisas hechas de algodón sin nada de hilo.

493. Cigarrillos de papel ó de hoja de maíz.

494. Corbatas de algodón, cerda ó lana.

E.

495. Elásticas ó tirantes, corsés, cotillas, guarda-corsés y ligas de todas clases.

496. Enaguas, fustanes, dormilonas, fustansones, fundas de almohadas y túnicos de lino ó mezclado con algodón, excepto los de holán batista ó clarín de lino ó mezclado con algodón que corresponden á la novena clase.

F.

497. Flores y frutas artificiales, no especificadas en otras clases y los materiales para flores, exceptuando el papel pintado para flores comprendido en la 6ª clase.

G.

498. Guantes de piel exceptuando los de esgrima que pertenecen á la 5ª clase.

H.

499. Holán batista, clarín, punto, céfiro, lino, tarlatán, muselina ó cualesquiera otras telas finas de lino ó mezcladas con algodón, preparadas en golgueras, ruchas, gorras de niño, faldelines, manguillos, camisitas ú otras piezas ó adornos no incluidos en otras clases.

L.

500. Libros y albums, cuya pasta contenga terciopelo, seda, nacar, carey, marfil, cuero de Rusia ó filetes ó adornos dorados ó plateados.

P.

501. Pañuelos de lino ó mezclados con algodón.

502. Pastas para libros que vengan separadamente y las postizas para los mismos.

503. Plumas para adornos de sombreros y gorras y sus similares y también los plumeros para los coches fúnebres, cuando vengan separadamente de éstos.

T.

504. Telas ó tejidos de cualquiera materia que estén mezclados ó bordados con plata ú oro fino ó falso, excepto los ornamentos para las iglesias y para los sacerdotes, que corresponden á la 7ª clase.

505. Telas ó tejidos de lana ó mezclados con algodón preparados en mosquiteros, colgaduras, cortinas ú otras piezas que no estén determinadas en las clases anteriores.

506. Tabaco elaborado y preparado en cualquiera forma, no especificado. Corresponden á esta clase los cigarrillos con envoltura de tabaco.

Párrafo noveno.—Corresponden á la novena clase, veinte bolívares el kilo.

C.

507. Camisas hechas de lino y de lana y las de algodón que tengan algo de lino, los pantalones, chaquetas, blusas, chalecos, calzoncillos, paletós, sacos, levitas y cualquiera otra pieza de vestido, hecha de hilo ó de algodón, para hombres, no comprendidas en otras clases.

508. Cuellos, pecheras y puños de lino ó de algodón para hombres y mujeres.

509. Chinchorros de todas clases.

510. Carteles, cartelones y hojas volantes impresas ó litografiadas.

511. Cajetillas para cigarrillos.

512. Calzado hecho y las pieles curtidas preparadas en calzado.

E.

513. Enaguas, fustanes, fustansones, fundas de almohadas y túnicos de holán batista ó clarín de lino ó mezclado con algodón.

514. Etiquetas ó rótulos impresos ó litografiados que no vengan adheridos á ningún objeto y las tarjetas impresas para visitas, tengan ó no dibujos en colores.

J.

515. Joyas, perlas, alhajas, piedras y prendas finas y los artículos de oro ó plata ó los que tengan algo de estos metales, los relojes de faltriquera, de cualquiera materia que sean, las cajitas vacías preparadas para relojes y prendas finas, aunque vengan por separado.

P.

516. Paños, pañete, casimir, raso, punto, franela, alepín, alpaca, cambrón, sarga, cúbica y damasco de lana, ó mezclado con algodón, confeccionados en vestidos para hombres.

S.

517. Seda pura ó mezclada con otra materia y las telas ó tejidos de otras materias que estén mezcladas con seda.

518. Sobres y envelopes hechos ó á medio hacer, de todas clases.

519. Sombreros, gorras, pavas y cachuchas adornadas para señoras y niños.

520. Sombreros de felpa de seda negra, copa alta, llamados de pelo negro, y los demás sombreros de esta forma de cualquiera materia que sean, quedando comprendidos en esta clase, los de resorte, los sombreros en corte, los fieltros fulados y cualquiera otra clase de sombreros hechos ó á medio hacer, exceptuándose solamente los de paja y sus imitaciones.

T.

521. Tarjetas grandes impresas ó litografiadas.

522. Tarlatán, seda, lana, holán batista, clarín, céfiro, lino, muselina y cualquier otra tela de lino ó de algodón confeccionada en vestidos para señoras.

V.

523. Vestidos de lana, algodón ó lino para hombres, excepto los mencionados en otras clases.

Art. 2°. Es sobre el peso bruto que deben cobrarse los derechos establecidos en este arancel.

Art. 3°. Son artículos de libre importación:

1°. Los que se importen por orden del Gobierno Nacional.

2°. Los animales vivos excepto las sanguijuelas.

3°. Los efectos que traigan para su uso particular los ministros públicos extranjeros y los agentes diplomáticos de la República á su regreso á Venezuela.

4°. Los equipajes del uso de los pasajeros con exclusión de los efectos que no hayan sido usados y de los muebles, los cuales pagarán aún siendo usados según la clase á que correspondan con una rebaja proporcionada al desmérito que hayan sufrido con el uso.

Los derechos de los efectos no usados que se traen en los equipajes se recargarán con un 20 por ciento, si vienen de las Antillas, este recargo es además del 30 por ciento adicional.

5°. Hielo cuando se importe por los lugares donde no haya maquinarias establecidas, con autorización del Gobierno, para producirlo, ó cuando aún habiéndolas, no funcionen; el carbón mineral y el que sirve para producir la luz eléctrica de arco, el gas acetileno y el trisulfito de cal.

6°. Los frutos y producciones naturales de Colombia que se introduzcan por la frontera de aquel país, siempre que gocen de igual excepción en aquella República los frutos y producciones de Venezuela.

7°. Muestras de telas en pequeños pedazos, cuyo peso no exceda de 25 kilos y también de papel de tapicería, que no exceda de 0. 50 m. de longitud ó de otros objetos, siempre que por su dimensión ú otras circunstancias, no puedan ofrecerse en venta.

8°. Oro en moneda legítima.

9°. Almas, fondos ó calderas de hierro, parrillas, tambores y juegos de trapiche y los ejes, almas y demás piezas de que se compone.

10°. Arados y rejas de arados ó puyones, azadas, azadones, calabozos, chicuras, chicurones, escaldillas, hachas, palas de hierro, picos, tasies, podaderas con ó sin mango de madera y los machetes de rodar, ordinarios.

11°. Alambre propio para cercas con púas ó en la forma indicada en el cliché comprendido en la resolución de 13 de junio de 1894 y también las grapas con que se fija dicho alambre.

12°. Máquinas para imprenta y los útiles para darle forma á la impresión, como tipos, interlíneas, tinta preparada, inclusive las que emplean los litógrafos, el papel blanco de imprenta sin cola ó goma, y también el grueso para hacer matrices y el metal compuesto de plomo y aluminio que se emplea para imprimir, según el sistema de estereotipia.

13°. Máquinas propias para la agricultura y explotación de minas, telares, aserraderos y fundiciones no especificadas en otras clases y las piezas de respuesto que se introduzcan para los juegos de trapiche y para máquinas proprias para la agricultura.

Art. 4°. Son artículos de prohibida importación:

1°. El aceite de coco.

2°. El almidón.

3°. El añil.

4°. El cacao.

5°. El café.

6°. Las melazas ó miel de azúcar ó de abeja.

7°. La carne salada en tasajo.

8°. La sal.

9°. La raíz de zarzaparrilla.

10°. La moneda de plata, de níquel y de cobre.

11.° Los aparatos para fabricar moneda que no vengan por cuenta de la nación.

Párrafo único. Cuando el Poder Ejecutivo creyese necesario permitir que se introduzca por las Aduanas de la República, algún artículo de prohibida importación, fijará el derecho que deba pagar á su entrada dicho artículo y dará cuenta al Congreso en su próxima reunión.

Art. 5°. Podrá el Poder Ejecutivo prohibir la importación de todas ó algunas piezas de todo género de ropa hecha y de los sombreros de todas clases, gorras, pavitas y cachuchas, ordenadas por aquellas Aduanas de la República, en cuyas respectivas jurisdicciones adquieran las industrias ú oficios correspondientes, la extensión y desarrello necesario al abastecimiento del consumo sin perjuicio de los consumidores.

Art. 6°. Para la importación por las Aduanas de la República, de las armas de fuego gravadas con derechos y de la pólvora, la dinamita, plomo, cápsulas, fulminantes, piedras de chispa, y salitre y cualquiera otra materia explosiva no especificada en esta ley, se necesita permiso previo y orden del Gobierno Nacional.

Párrafo único. Las armas de precisión y todos los elementos de guerra, que sean exclusivamente para parques, solo pueden ser importados por el Gobierno Nacional.

Art. 7°. Cuando un artículo esté determinado, no se atenderá á la materia de que esté compuesto, sino á la clasificación que de él se haya hecho, v. g., los bragueros, geringas, clisobombas, juguetes para niños, máscaras, anteojos, tarjeteras, carteras y otros artículos especificados, pagan el derecho de la clase en que estén incluidos, de cualquiera materia de que están fabricados, excepto solamente cuando sean ó tengan algo de oro ó plata, pues entonces corresponden á la 8ª clase.

Art. 8°. Los bultos que contengan muestras de telas, en pequeños pedazos, y también los de muestras de papel de tapicería que pesen más de 25 kilogramos, pagarán sobre el exceso de 25 kilogramos el derecho de 3ª clase.

Art. 9°. Cuando se introduzcan mercancías ú otros artefactos sujetos al pago de derechos de importación que no sean conocidos en el país ó que no estén comprendidos en este Arancel, ni en resoluciones posteriores, del Ministerio de Hacienda, los introductores deben hacer constar esta circunstancia en sus manifiestos y ocurrir al Gobierno, por medio de una solicitud, informada por la Aduana respectiva, acompañando una muestra del artículo para que se le declare la denominación y clasificación que le corresponda.

Art. 10°. Las máquinas, enseres y demás utensilios para la explotación de minas, sólo están exentos de derechos de importación por una sola vez para cada compañía minera, y las piezas de repuesto que se introduzcan para reemplazar las que ya anteriormente se hayan importado libres, no gozarán de franquicia.

Art. 11°. No serán despachados por las Aduanas, sin previa orden del Ministro de Hacienda, los efectos que gocen de exención de derechos de importación, por virtud de contratos ó de leyes vigentes.

Art. 12°. Los efectos extranjeros no usados que importen en sus equipajes los pasajeros del exterior, deben pagar un 20 por ciento sobre el derecho que tienen señalados en este Arancel.

Art. 13°. Queda autorizado el Poder Ejecutivo para disminuir y suprimir algunos aforos de este Arancel cuando causas imprevistas hagan necesaria esta alteración, dando cuenta al Congreso de las medidas que dicte en tal sentido.

Art. 14°. Los artículos que se introduzcan desarmados, porque de ello sean susceptibles, en un solo bulto ó en bultos distintos, se aforarán en la clase á que corresponda el artículo no desarmado.

Art. 15°. Se deroga la Ley de 10 de octubre de 1900 y todas las Resoluciones Ejecutivas sobre la materia.

Dado en el Palacio Federal Legislativo en Caracas, á 10 de mayo de 1902, año 91° de la Independencia y 44° de la Federación.

Por el Presidente del Congreso:

El Primer Vicepresidente de la Cámara del Senado,

[L. S.] M. TAMAYO PÉREZ.

El Presidente de la Cámara de Diputados,

[L. S.] R. VILLANUEVA MATA.

El Secretario de la Cámara del Senado,

EZEQUIEL GARCÍA.

El Secretario de la Cámara de Diputados,

MARIANO ESPINAL.

Palacio Federal en Caracas, á 19 de mayo de 1902, año 91 de la Independencia y 44 de la Federación.

Ejecútese y cuídese de su ejecución.

[L. S.] CIPRIANO CASTRO.

Refrendado.

El Ministro de Hacienda y Crédito Público.

[L. S.] R. TELLO MENDOZA.

Ministerio de Hacienda y Crédito Público, Caracas: 20 de mayo de 1902.

Este Arancel se pondrá en ejecución desde el día 1° de julio próximo inclusive.

[L. S.] R. TELLO MENDOZA.

CAMBIOS AL ARANCEL.

El Poder Ejecutivo, con fecha 29 de agosto de 1902, ha promulgado el siguiente decreto: Resuelto:

En uso de la autorización que tiene el Poder Ejecutivo por el artículo 13° de la Ley de Arancel de Importación para disminuir algunos aforos, dicho arancel cuando causas imprevistas hagan necesarias esta alteración, el ciudadano Segundo Vicepresidente, Encargado del Ejecutivo Nacional, ha tenido á bien resolver:

Que á contar de esta fecha, cuando se introduzcan por las aduanas de la República, los artículos que á continuación se expresan, se aforen en la 8ª clase arancelaria, á saber:

Las camisas hechas de lino y de lana y las de algodón que tengan algo de lino, los pantalones, chaquetas, blusas, chalecos, calzoncillos, paletós, sacos, levitas y cualquiera otra pieza de vestido hecha de lino ó de algodón, para hombres no comprendida en otras clases.

Los cuellos, pecheras y puños de lino ó de algodón para hombres y mujeres.

Los chinchorros de todas clases.

Las enaguas, fustanes, fustansones, fundas de almohadas, túnicos de holán batista, ó clarín de lino, ó mezclados con algodón.

Las hoyas, perlas, alhajas, piedras y prendas finas, y los artículos de oro ó plata ó los que tengan algo de estos metales, los relojes de faltriquera de cualquiera material que sean, las cajitas vacías preparadas para relojes y prendas finas, aunque vengan por separado.

La seda pura ó mezclada con otra materia y las telas y tejidos de otras materias que estén mezcladas con seda.

Comuníquese á las Aduanas de la República para la uniformidad en el aforo, y publíquese.

Por el Ejecutivo Nacional.

R. TELLO MENDOZA.

PESCA DE PERLAS.

El Ministro de Fomento de los Estados Unidos de Venezuela suficientemente autorizado por el Ejecutivo Federal, y en cumplimiento de la Resolución dictada en esta misma fecha, por una parte, y por la otra el Señor NEMENCIO COATS, apoderado del Señor MARCUS GRÜMBERG, vecino de París y cesionario del Señor SEBASTIÁN CIPRIANI en el contrato que éste celebró con el Gobierno Nacional el 17 de julio de 1900, han convenidò en lo siguiente:

ARTÍCULO PRIMERO. MARCUS GRÜMBERG se compromete:

1°. Á pagar al Fisco Nacional como diez por ciento que le corresponde á éste por el articulo 2° del mencionado contrato, dos mil bolívares mensuales, como patente de industria, y cincuenta bolívares por cada kilogramo de perlas que exporte. La primera de estas sumas sólo se pagará en los meses en que GRÜMBERG ejerza la pesca en virtud de se contrato.

2°. Á pagar al Fisco Nacional el diez por ciento bruto de las ventas que ha hecho hasta esta fecha de las perlas pescadas en ejercicio del contrato.

3°. Á no intentar ninguna clase de reclamaciones por el tiempo en que el contrato ha estado en suspenso, ni por cualquier otro motivo que haya tenido lugar hasta esta fecha; y

4°. Á no emplear en la pesca arrastras y otros aparatos parecidos, pues sólo podrá emplear en la extracción de la madre-perla buzos y aparatos submarinos que no destruyan los ostiales.

ARTÍCULO SEGUNDO. El Ejecutivo Federal acepta en todas sus partes lo estipulado en este convenio.

Hechos dos de un tenor á un sólo efecto en Caracas á cuatro de julio de mil novecientos dos. Año 91° de la Independencia y 44° de la Federación.

ARNALDO MORALES.
NEMENCIO COATS.

BOLETIM MENSAL

DA

SECRETARIA INTERNACIONAL DAS REPUBLICAS AMERICANAS,

União Internacional das Republicas Americanas.

VOL. XIII. OUTUBRO DE 1902. No. 4.

COMMISSÃO PARA O ESTUDO DA PRODUCÇÃO, DISTRIBUIÇÃO E CONSUMO DO CAFÉ.

O 1° do corrente mez de outubro se reuniu na cidade de Nova York, segundo se tinha annunciado nos anteriores numeros do BOLETIM, a commissão mandada organizar em 29 de Janeiro ultimo pela Segunda Conferencia Internacional Americana celebrada na capital do Mexico.

Essa Commissão tem por objeto estudar a producção, distribuição e consumo do café, investigar as causas que têm dado origen á crise por que esta grande industria está actualmente passando, e propor meios praticos que remediem a dita crise permanente ou temporariamente.

As sessões se celebram no edificio da Bolsa do Café (Coffee Exchange) e tudo promette que se conseguirão os resultados a que aspiraram os governos quando determinaram reunir-se para tratar deste importante assumpto.

Estão representadas nesta Conferencia as nações seguintes: Brazil, Costa Rica, a Republica Dominicana, Equador, os Estados Unidos de America, Guatemala, Honduras, Mexico, Nicaragua, o Salvador, Uruguay e Venezuela. Das nações productoras de café só deixam de ter representação Colombia, Cuba e Haiti:

Os delegados que representam as nações acima mencionadas são os seguintes:

Senhor J. F. DE ASSIS-BRASIL, pelo Brazil.

Senhores JOAQUIN BERNARDO CALVO e M. GONZÁLEZ, por Costa Rica.

Senhores F. Leonte Vázquez e I. A. de Araujo y Vasconcellos, pela Republica Dominicana.

Senhor Luis Felipe Caro, por Equador.

Senhores Percy B. O'Sullivan, J. R. Dawley, Jr., e A. A. Mariani, pelos Estados Unidos de America. O ultimo senhor é delegado especial de Porto Rico.

Senhor Antonio Lazo Arriaga, por Guatemala.

Senhor Nicanor Bolet Peraza, por Honduras.

Senhor José F. Godoy, pelo Mexico.

Senhores Corry M. Stadden e D. Román, por Nicaragua.

Senhor E. Schernicow, pelo Salvador.

Senhor L. A. de Herrera, por Uruguay.

Senhores F. de la Madriz e Antonio E. Delfino, por Venezuela.

O Senhor Percy B. O'Sullivan, delegado pelos Estados Unidos de America, foi eleito Presidente da Conferencia.

O Senhor J. F. de Assis-Brasil, delegado pelo Brazil, foi nomeado primeiro vice-presidente, e o Senhor Antonio Lazo Arriaga, delegado por Guatemala, Segundo vice-presidente.

O Senhor Nicolas Veloz Goiticoa, Secretario da Secretaria Internacional das Republicas Americanas, que como Director Interino da mesma, em cumprimento da resolução supra citada da Conferencia Internacional Americana de Mexico, e por ordem do Presidente do Conselho Directivo da mesma Secretaria, acudiu a prestar á Commissão o auxilio que necessitasse, foi nomeado Secretario geral.

O Senhor O'Sullivan, que é tambem Presidente da Bolsa de Café da cidade de Nova York, pronunciou ao inaugurar as sessões o seguinte discurso:

"Senhores Delegados: Fallando, não como um dos Delegados que compõem esta Conferencia, mas como representante da Bolsa, me pareceu opportuno aproveitar-me de tão propicia occasião para dirigir-vos uma palavra de boavinda, em nome da Bolsa. Esta tem sido convertida, nos ultimos annos, em talvez a maior do mundo, tratando em café; e como vos todos sabeis, Nova York se está transformando em um grandissimo mercado, tão extenso, em realidade, que não teimo dizer della, que, como mercado individual, é hoje o porto que distribue mais café pelo mundo inteiro.

"Vos, Senhores, vindes em representação dos interesses do café em toda a America do Sul, e eu não posso menos que expressar-vos, em nome da Bolsa, e no meu proprio, como vosso Presidente, quão grato, quão honroso é para nós, que tenhais dignado acceitar a hospitalidade que nos foi permittido offerecer-vos para os nobres fins desta reunião.

"Facil e naturalmente comprehendereis que o interesse que tem o commercio do café nos Estados Unidos em uma Conferencia deste caracter, differe um tanto do interesse que vos tendes, como representantes dos paizes productores. Por outra parte, assim como as questões de augmento ou diminuição da producção, não nos affectam directamente, eu diria, periphraseando as palavras de um auctor latino, que 'nos todos somos cafeteiros, e nada que concirna ao café pode ser-nos desconhecido.'

"Nos somos homens de coração, todos os Americanos. Qualquer cousa que vos ligue mais estreitamente comnosco merece nossa sympathia. Desejavamos vivamente a celebração desta Conferencia, pois todas as Republicas somos irmãs, desde Mexico e a America Central até Argentina. Tanto o gremio do café, em sua politica commercial, como o Governo dos Estados Unidos desejam ver estreitar-se nossa união. Sob o ponto de vista de nações independentes, a politica não entra para nada em nossas considerações, si bem por outra parte politicamente deveria reinar entre nos o espirito de fraternidade que só o nome de America implica.

"Desejo dizer, em nome da Bolsa, que nos regosijamos com vossa presença entre nos, e que nos agradará poder extender-vos quantas attenções estejam ao nosso alcance. Com tal fim, e immediatamente depois da sessão, o encarregado principal obsequiará cada membro com uma tarjeta que lhes dará, entre outros privilegios, o de visitar a Bolsa mesma, e assim, não estando em sessão o Congresso, serão admittidos na Sala da Bolsa, e poderão obter noticias do mercado de café. Tudo quanto o pessoal pode fazer ou eu posso fazer pelo Congresso, ou membros individuaes delle, será feito com a maior satisfacção.

"Senhores, sois bemvindos em Nova York ás Salas da Bolsa do Café da cidade de Nova York."

A este discurso contestou, por encargo de seus collegas e em seu nome, o Senhor Antonio Lazo Arriaga, Delegado por Guatemala, com o seguinte discurso:

"Senhor Presidente: A mim cabe a honra de contestar as eloquentes palavras de boavinda que vos dignastes dirigir aos Delegados do Congresso Americano, que celebram esta interessante, quão pratica Conferencia sobre o café. Devido a contratempos no serviço ferro-viario não se acha presente o meu distincto collega o Ministro do Brazil, quem vos teria contestado de uma maneira, sem duvida, mais adequada.

"Em nome dos membros e representantes das nações latino-americanas reunidos aqui hoje, cumpro o dever de dar-vos as graças, assim como á Bolsa do Café, por vossas benevolas palavras de boavinda, por vosso amavel offerecimento de conceder-nos os apreciaveis privilegios revestidos na Bolsa do Café de Nova York, a mais importante do mundo, e que nos consta ser muito grande.

"Mencionais um ponto, senhor, no qual sinto dizer que não estou de accordo com vossas ideas, e desculpae-me a franqueza. Sempre me dará prazer estar de accordo com vossos pensamentos, porque não duvido que todas vossas indicações serão muito importantes e muito valiosas para esta Conferencia. Dissestes que os interesses dos Estados Unidos nesta Conferencia sejam, talvez, um pouco differentes dos dois paizes productores. Espero que descobrireis aqui que nossos interesses são os mesmos. Não existe differença entre elles. Tudo quanto os Estados Unidos possam fazer neste assumpto redundará em sua propria vantagem, como redundará na nossa. Si assim fôr, eu me regosijarei de tão feliz resultado.

"Em nome de meus collegas, agradeço vos e á Bolsa do Café por vosso benevolo acolhimento e vossa hospitalidade."

A segunda reunião da Conferencia effectuou-se no dia 3 de Outubro, e nella se organizaram as seguintes commissões:

Commissão de producção.—Senhores F. DE LA MADRIZ, J. A. DE ARAUJO É VASCONCELLOS, e ANTONIO MARIANI.

Commissão de distribuição.—Senhores JOAQUIN BERNARDO CALVO, ANTONIO E. DELFINO, e CORRY M. STADDEN.

Commissão de consumo.—Senhores MANUEL GONZÁLEZ, NICANOR BOLET PERAZA, e E. SCHERNICOW.

Commissão para estudar as causas da crise e os meios practicos de remedial-a ou diminuil-a.—Senhores J. F. DE ASSIS-BRASIL, ANTONIO LAZO ARRIAGA, F. LEMTE VÁSQUEZ, e D. ROMÁN.

Commissão de Conferencias futuras.—Senhores L. A. DE HERVERA, JOSÉ F. GODOY, e J. R. DAWLEY.

O programma da Commissão de produccçao comprehende entre outras cousas o seguinte: Organização de dados estatisticos sobre as terras em que cresce o cafeeiro e sua producção média; estudos sobre os cafezaes; seu governo, a duração das plantações; as colheitas, as machinas em uso, os trabalhadores que se empregam, suas condições de raça e posição social, seus salarios, seu methodo de vida e as condições favoraveis ou adversas que têm influido no passado e podem influir no futuro na producção do café.

O programma para a Commissão de distribuição abrange o estudo dos meios de transporte do café, e seu custo desde os cafezaes até os portos de mar, e desde estes até seus respectivos destinos no estrangeiro. Aqui entra o estudo dos premios, das facilidades para o trafico, os agentes intermediarios que se necessitem, os direitos e impostos de toda classe sobre o café, etc.

No programma da Commissão de consumo está comprehendido o estudo das condições especiaes em que se encontra o café nos grandes mercados; quaes são os methodos usados para determinar as qualidades; quaes destas gozam de maior popularidade; que systemas podem ser empregados para abrir mercados ao café; que circumstancias affectam o consumo deste artigo em cada um dos principaes mercados; que effeito pode ter a legislação sanitaria no consumo do café e das outras bebidas que com elle rivalizem, etc.

Ao considerar a producção excessiva, haverá que determinar por que meios poderá ser evitada; e si devem, ou não, eliminar as qualidades inferiores, e como e de que maneira.

Quanto ao consumo do café, haverá que averiguar si ha modo de augmental-o e por que meios e que é o que se deve fazer para supprimir monopolios, celebrar tratados de commercio, etc.

Nesta segunda sessão, o Senhor JOAQUIN BERNARDO CALVO, delegado por Costa Rica, em seu nome e no de seu collega o Senhor M. GONZALES, delegado pela mesma Republica, deu leitura a um documento preparado em seu paiz por uma commissão de peritos que diz como segue:

"INDICAÇÕES.

"*Eliminação das classes inferiores de café.*

"Ainda que a maior parte do café exportado por Costa Rica é de classe fina, nada conviria melhor a nossos interesses que a eliminação das classes inferiores, mas a cremos impracticavel: 1° porque ella teria como consequencia a suppressão de cultivos em varias regiões onde a qualidade natural do grão é inferior.

"2°. Porque é justamente dessas classes que se prové a classe pobre, os exercitos, a marinha e demais consumidores que formam a grande maioria em todos os paizes consumidores. Ficaria reduzido o café á condição de artigo de luxo, que é justamente a tendencia que ha que combater, pois indubitavelmente é da popularização do consumo que o grão alcançará os melhores resultados. A suppressão das classes inferiores seria, portanto, contraria ao objecto primordial da Conferencia.

"*Meios praticos de augmentar o consumo.*

"Entre os principaes, se podem estudar os seguintes:

"4°. Sujeitar a impostos municipaes, a venda do café adulterado ou prohibir por completo essa venda por meio de multas.

"Acontece nas quatro quintas partes dos paizes de consumo que o consumidor não obtem ao retalho o grão puro, mas misturado com substancias estranhas que lhe fazem perder não só suas condições de sabor e aroma, mas que até o convertem em uma bebida mal sã que nada tem que ver com o café. Logares ha em que se faz passar por café as farinhas torradas de milho, de cevada e de ervilhas e outros em que a cubiça dos vendedores chega ao extremo de misturar a escassas porções do grão, pós de ladrilho e residuos de outras substancias mineraes. O café puro, bem torrado e de boa preparação, é agradavel ao gosto do consumidor, chegando em pouco tempo a convertir-se em uma necessidade. Este é o resultado que devemos conseguir, si queremos que o consumo augmente em proporção talvez maior que a producção.

"2. Conseguir dos governos o estabelecimento do uso regulamentario do café no exercito e armada, como bebida estimulante propria para resistir as fadigas do serviço e como uma das substancias de immensos beneficios para oppor-se aos effeitos dos grandes calores.

"3. Fazer propaganda medica do café como um dos agentes mais efficazes contra o alcoolismo, problema de altissima importancia que têm em solução os governos do mundo inteiro, e os esforços civilizadores das sociedades de temperança se veriam secundados vantajosamente pelo uso do café. Os effeitos da cafeina sobre o systema nervoso, sao considerados como de immediato bom resultado para desvanecer os causados pelo alcool. Em Costa Rica, ninguem ignora esse systema curativo, e no que primeiro se pensa ao ver um individuo embriagado, é em proporcionar-lhe uma dose de café negro e forte que em pouco tempo terá o effeito de restituir-lhe o uso de suas faculdades mentaes embotadas pelo alcool. Só essa propriedade do café, demonstrada por auctoridades medicas reconhecidas, bastaria para dar grande credito a seu consumo e seria razão de grande peso para prohibir a adulteração do grão.

4. Suppressão ou reducção consideravel dos direitos aduaneiros de importação que varios paizes consumidores têm estabelecido em suas tarifas. Como consequencia, suppressão ou reducção consideravel dos impostos municipaes. O café, dadas suas condições hygienicas e therapeuticas, pode ser considerado como um artigo de necessidade, dos que favorece o systema de livre importação. Não é preciso fazer um grande esforço para convencer-se disto. A preoccupação antiga de julgar o café como artigo de luxo ou como droga, está desacreditada pela pratica; é nas pharmacias onde menos se vende o grão, e seu baixo preço alcançado nos ultimos cinco annos, demonstra que está em condições de chegar a todos os lares, ao alcance de todas as fortunas.

" Não seria possivel cohonestar hoje uma imposição aduaneira senão pelos paizes productores, como medida proteccionista. A Hespanha, por exemplo, não tem já razão alguma para manter por mais tempo sua tarifa a este respeito, posto que tem perdido suas colonias productoras desse grão. Em iguaes condições se encontram outras nações e é preciso que façam esforços para eliminar de suas tarifas os impostos sobre o café.

"5. Estabelecimento de casas para a venda de café puro nos paizes de pouco consumo, com fundos e elementos proporcionados a *pro rata* pelos paizes productores. Cada vez que se tem levado á pratica esse systema, o resultado immediato não tardou em fazer-se sentir. Nas exposições de Chicago, Atlanta, Buffalo, Paris, etc., alguns productores estabeleceram botequins de café para dar a conhecer seu producto e o resultado sempre foi muito satisfactorio. A pratica nos ensina que esse é o caminho que deve ser seguido sem vacillações. Deve-se buscar os centros de pouco consumo e fazer conhecer a bebida pelos que apenas têm noticia della. Russia, Suecia e Noruega, Dinamarca, grande parte da Allemanha, etc., são campos inexplorados como mercados para o café. Nestes centros de propaganda é preciso pôr á venda essencias preparadas de uso immediato e ensinar praticamente os systemas de torrefacção e destillação que dão os melhores resultados. Deste modo se evitará para o futuro o uso de adulterações nocivas ao credito do artigo.

"6. Tratados de commercio encaminhados para proteger a industria do café. Tão extensa como importante é esta suggestão que nos contentaremos com enuncial-a como base de discussão.

"7. Venda do café em hasta publica. As vendas que se effectuam de mão a mão, como nos Estados Unidos têm grandes desvantagens que será difficil pôr em evidencia. Não existe inspecção official alguma nas operações, e o productor está na necessidade de confiar unicamente na boa fê do seu agente, que si bem na maior parte dos casos é honesto, acontece e não com pouca frequencia, que se converte em simples explorador de seu commettente, quem engana, fazendo um dobre prejuizo, pois não sómente o despoja de um bem que lhe pertence, mas que leva ao animo dos demais productores uma natural desconfiança com respeito á bondade do mercado, o que exerce má influencia na exportação da colheita subsequente. Sem grande esforço poderá chegar-se a maiores conclusões que demonstram a conveniencia do systema de vendas em hasta publica.

"FEDERICO TINOCO.
"JAIME CARRANZA.
"MANUEL MONTEALEGRE.
"JUAN FRANCISCO ECHEVERRÍA.
"MANUEL GONZALEZ.
"JOSÉ DURÁN.
"MARIANO CARAZO."

A terceira sessão realizou-se no dia 8 de Outubro. Nella foram apresentados o relatorio da Commissão de consumo e o da commissão nomeada para investigar as causas da crise que actualmente atravessa a industria do café.

No primeiro relatorio se submettem as recommendações que seguem:

"1ª. Que se solicite de todos os governos a adopção de medidas para fazer obrigatorio o uso de café puro em seus exercitos e armadas.

2ª Que se solicite dos governos dos paizes productores de café, que fundem, tão prompto como fôr possivel, nos paizes e localidades onde agora não se consome o café, estabelecimentos destinados a fazel-o conhecer.

3ª Que se solicite de todos os governos a prohibição da venda do café adulterado e dos substitutos do café que se vendem sob seu nome; e que em caso de que a prohibição não possa fazer-se, se imponham fortes direitos sobre estes artigos.

No segundo relatorio se recommenda que os paizes productores do café estabeleçam em suas respectivas tarifas direitos differenciaes sobre as mercadorias procedentes de paizes consumidores, em proporção aos impostos a que alli está sujeita a importação do café.

BULLETIN MENSUEL

DU

BUREAU INTERNATIONAL DES RÉPUBLIQUES AMÉRICAINES,

Union Internationale des Républiques Américaines.

VOL. XIII. OCTOBRE 1902. No. 4.

CONFÉRENCE AYANT POUR BUT D'ÉTUDIER LA PRODUCTION, LA DISTRIBUTION ET LA CONSOMMATION DU CAFÉ.

La Conférence Internationale, convoquée pour étudier la production, la distribution et la consommation du café dans le monde entier, a tenu sa première séance le 1er octobre 1901, dans le Coffee Exchange Building à New-York. Cette Conférence, qui est sous les auspices du Bureau International des Républiques Américaines, est le résultat d'une des décisions prises à la Seconde Conférence Internationale des différentes contrées de l'Amérique qui a eu lieu au mois de novembre dernier dans la ville de Mexico.

Les différents pays de l'Amérique du Centre et du Sud qui produisent le café, les Etats-Unis et le Mexique sont représentés dans la Conférence par les 18 délégués suivants:

Brésil, Monsieur J. F. DE ASSIS BRASIL.

Costa Rica, MM. J. B. CALVO ET M. GONZALEZ.

République Dominicaine, MM. F. LEONTE VÁSQUEZ et J. A. DE ARANJO E VASCONCELLOS.

Salvador, Monsieur E. SCHERNIKOW.

Equateur, Monsieur L. F. CARBO.

Guatémala, Monsieur A. LAZO ARRIAGA.

Honduras, Monsieur N. BOLET PERAZA.

Mexique, Monsieur L. F. GODOY.

Nicaragua, MM. PERCY B. STADDEN et D. ROMÁN.

Etats-Unis, MM. PERCY B. O'SULLIVAN et T. R. DAWLEY, Jr.

Puerto Rico, Monsieur A. Mariani.

Uruguay, Monsieur L. A. de Herreira.

Vénézuéla, MM. F. de la Madriz et Antonio E. Delfino.

La réunion du 1er octobre a été consacrée à l'organisation et à la nomination de comités pour entreprendre les travaux futurs.

M. Percy B. O'Sullivan, de la Bourse de café de New-York, qui a présidé cette réunion, a prononcé le discours de bienvenue auquel Monsieur Lazo Arriaga, Ministre du Guatémala aux Etats-Unis, a répondu de la part des délégués.

On a procédé à l'élection des members du comité. Ont été élus: Président, Monsieur P. B. O'Sullivan; vice-Présidents, Monsieur J. F. de Assis Brasil, délégué du Brésil, et Monsieur Antonio Lazo Arriaga; Secrétaire Général, Monsieur Nicolas Veloz Goiticoa.

A la seconde réunion de la Conférence, qui a eu lieu le 3 octobre, on a décidé la nomination de plusieurs comités afin de faciliter le travail en cours.

Voici le personnel des comités:

Comité de la production.—F. de la Madriz, Vénézuéla; J. A. de Aranjo e Vasconcellos, République Dominicaine, et Antonio Mariani, Puerto Rico.

Comité de distribution.—J. B. Calvo, Costa Rica; Antonio E. Delfino, Vénézuéla, et Corry M. Stadden, Nicaragua.

Comité de consommation.—Manuel Gonzalez, Costa Rica; N. Bolet Peraza, Honduras, et E. E. Schernikow, Salvador.

Comité pour étudier les causes de la crise et trouver les moyens pratiques de la diminuer ou de l'empêcher.—J. F. de Assis Brasil, Brésil; A. Lazo Arriaga, Guatémala; F. Leonte Vásques, République Dominicaine, et D. Román, Nicaragua.

Comité de conférences futures.—L. A. de Herrera, Uruguay; J. F. Godoy, Mexique, et T. R. Dawley, Jr., Etats-Unis.

RÉPUBLIQUE ARGENTINE.

NOUVEAU MINISTÈRE.

Le Ministère des Affaires Etrangères des Etats-Unis a transmis au Bureau International des Républiques Américaines les noms des différents ministres composant le nouveau cabinet du Président de la République Argentine, tels qu'ils ont été envoyés au Ministère par le Ministre des Etats-Unis à Buenos Ayres:

Ministre de l'Intérieur, le Docteur Joaquin V. Gonzales;

Ministre des Relations Extérieures et du Culte, le Docteur Luis M. Drago;

Ministre de Hacienda, Señor Marco Avellaneda;

Ministre de la Justice et de l'Instruction Publique, le Docteur JUAN R. FERNANDEZ;
Ministre de la Guerre, le Colonel PABLE RICCHERI;
Ministre de la Marine, le Capitaine ONOFRE BATBEDER;
Ministre des Travaux Publics, le Docteur EMILIO CIVIT;
Ministre de l'Agriculture, le Docteur WENCESLAO ESCALANTE.

CHILI.

L'INDUSTRIE MINÉRALE DE LA RÉPUBLIQUE.

"L'Engineering and Mining Journal," du 27 Septembre 1902, fait connaître, dans un article au sujet de la richesse minérale du Chili, qu'il y a peu de Républiques sud-américaines pouvant égaler le Chili sous le rapport de l'importance de leurs industries minières. Dans la production du nitrate de soude, le Chili occupe la première place de tous les pays du monde, aucun autre pays ne produisant ce minerai précieux en quantités suffisantes pour le livrer au commerce. L'industrie est entre les mains d'un groupe de producteurs et se concentre dans les provinces du Nord, s'étendant depuis Jazpampa à Lagunas, et de là de Tocapilla à Tallal, les mines les plus importantes se trouvant dans la province de Tarapaca.

L'exploitation des métaux augmente, bien que la baisse dans les prix de l'argent et de cuivre sur le marché ait entravé la production de l'année passée. Le Chili occupe la seconde place parmi les pays producteurs d'argent de l'Amérique du Sud.

Les principales mines sont situées dans le district de Caracoles dans l'intérieur à 150 milles d'Antofagasta. Le système des bails est en usage, les locataires payent au propriétaire du terrain, une prime de 15 à 30 pour cent sur la valeur nette en déduisant les dépenses d'exploitation.

Il y a de grands établissements pour la fonte de l'argent et du plomb à Antofagasta, dont l'un, qui est situé dans le faubourg de Bella Vista, appartient à la fonderie de la Compagnie d'Antofagasta, et l'autre, se trouvant à Playa Blanca, appartient à la Compañía de minas de Huanchaca. Des capitalistes américains et français sont intéressés dans la Compagnie de Huanchaca.

Le plus grand centre de l'exploitation des mines de cuivre est situé dans les provinces de Coquimbo et d'Atacama, où les capitaux anglais placés dans ces mines sont considérables. Le Chili vient en troisième lieu parmi les pays producteurs du cuivre. Dans le nord du Chili, dans la province d'Antofagasta surtout, la Compagnie Borax Consolidated—corporation anglaise qui a obtenu les principales concessions—exploite des dépôts de borate de calcium d'une grande étendue.

On exploite des mines de manganèse dans les provinces de Coquimbo et d'Atacama, et les exportations annuelles atteignent le chiffre de 20,000 à 25,000 tonnes. Le mineral fournit en moyenne 50 pour cent de manganèse, et contient environ 10 pour cent de silice et à peine 0.1 pour cent de phosphore.

CONCOURS POUR NOUVEAUX TIMBRES-POSTE.

Le Gouvernement chilien a ouvert un concours pour le dessin des nouveaux timbres-poste qu'il se propose d'émettre prochainement.

Les projets devront parvenir à Santiago au plus tard le 15 novembre prochain.

COLOMBIE.

MODIFICATIONS DOUANIÈRES.

Décret No. 722 du 1er mai 1902, apportant des modifications aux droits d'exportation.

[Diario oficial du 13 mai 1902.]

* * * * * * *

Art. 6. Les droits établis dans le décret No. 495 du 30 avril 1901 seront perçus comme ci-après:

L'or, l'argent et le platine en barres contrôlées acquitteront un droit de 5 pour cent de la valeur déterminée dans le certificat de fonte et d'essai.

L'or en poudre, le platine et l'argent non contrôlés, ainsi que l'or et le platine en articles de bijouterie, espèces monnayées ou autrement manufacturés, acquitteront 5 pour cent de la valeur pour laquelle ils ont été assurés.

Le minerai d'or et d'argent acquittera 3 pour cent de la valeur pour laquelle il a été assuré.

A défaut de certificat de contrôle ou de police d'assurance, l'or acquittera $0.05, le platine $0.04, l'argent $0.02 par gramme et le minerai brut $5 par tonne.

Art. 7. Les impôts et droits visés par le présent décret devront être payés dans les administrations départementales des finances respectives ou à la trésorerie générale de la République. La première annuité devra être perçue le 1er juin de l'année courante.

Art. 8. Sont modifiés * * * l'article 2 du décret No. 495 du 30 avril 1901 et abrogées toutes dispositions legales contraires au présent décret.

* * * * * * *

CUBA.

CHEMINS DE FER DE LA RÉPUBLIQUE.

Tout le système des voies ferrées de l'île de Cuba, d'après les statistiques publiées dans le "Star et Herald" de Panama, est évalué à $70,000,000. La longueur totale des 124 lignes comprises dans cette estimation est de 2,000 milles. Dix-sept de ces lignes seulement sont ouvertes au trafic des voyageurs et des marchandises en général et le reste est exclusivement affecté au transport de la canne à sucre aux fabriques.

Sir **William Van Horne** et ses associés du chemin de fer central de Cuba ont entrepris la construction d'une ligne nouvelle qui mettra en communication Santa Clara avec la ligne de la Havane à Cienfuegos, changeant ainsi le système des chemins de fer de l'île, ouvrant des communications avec la ville de Nipe, le meilleur port du littoral cubain at préparant pour une culture lucrative une superficie de terrains évaluée à 10,000,000 d'acres, soit environ un tiers de la superficie totale de l'île.

On peut aller de Nipe à New-York en deux jours et demi par des vapeurs d'une vitesse moyenne. Les trains venant de l'intérieur, correspondant avec les vapeurs qui y feront escale, apporteront des légumes frais, des fraises et d'autres petits fruits.

Le prix des places dans les chemins de fer varie de 60 centimes par mille en première classe à 25 centimes en seconde classe et le tarif des marchandises est à l'avenant.

RÉPUBLIQUE DOMINICAINE.

MODIFICATIONS DOUANIÈRES.

Loi du 9 avril 1902, promulguée le 17 du même mois, abrogeant la loi du 26 juin 1901 et modifiant les droits applicables à certaines marchandises.

[Gaceta oficial du 19 avril 1902.]

Article 1er. Est abrogée la loi du 26 juin 1901.

Art. 2. Sont portés au double les droits applicables aux produits suivants: eaux-de-vie, brandy, bière, liqueurs et vins de toute sorte.

Art. 3. Sont modifiés comme ci-après les droits applicables aux marchandises suivantes:

		Pesos.
Vermicelles ou pâtes alimentaires	quintal	4.00
Allumettes en boîtes de 60 allumettes	grosse	1.00
Pétrole	gallon	.15
Bougies stéariques	quintal	8.00

		Pesos.
Tissu de coton blanc, madapolam, nankin (*blanquin*), toile de Bogota (*bogotana*), ordinaires, ayant en largeur:		
Jusqu'à 24–25 pouces	yard	.05
Jusqu'à 30 pouces	id	.06
Jusqu'à 36 pouces	id	.07
De plus grande largeur (un centavo d'augmentation par chaque 5 pouces).		
Tissu de coton jaune ou toile de ménage, écru, dit *liencillo*, ayant en largeur:		
Jusqu'à 24–25 pouces	yard	.05
Jusqu'à 30 pouces	id	.06
Jusqu'à 36 pouces	id	.07
De plus grande largeur (un *centavo* d'augmentation par chaque 5 pouces).		
Tissu de coton jaune, croisé, ayant en largeur:		
Jusqu'à 24–25 pouces	yard	.06
Jusqu'à 30 pouces	id	.07
Jusqu'à 36 pouces	id	.08
Espadrilles	douzaine	1.50
Boutons en os, bois ou composition	grosse	1.00
En porcelaine, petits, pour chemises	grande grosse	.75
En nacre, moyens et grands	id	3.00
Pipes en faïence, bois ou porcelaine	douzaine	1.00
Couteaux pour la campagne, avec ou sans pointe, de grandeurs assorties	id	1.00
Drill américain, bleu ou d'autres couleurs, connu sous le nom de *Denims*, *Pearl River* et analogues, *Amoskrag* et analogues, ayant en largeur 30 pouces	yard	.10
Drill de coton, blanc ou de couleur, ayant en largeur jusqu'à 30 pouces	id	.10
Linon de coton, blanc ou de couleur, dit *Victoria* et *Obispo*, fin	id	.10
Linon de coton, blanc ou de couleur, dit *Victoria* et *Obispo* demi-fin	id	.06
Linon de coton, blanc ou de couleur, dit *Victoria* et *Obispo*, ordinaire	id	.04
Fil en bobines:		
Mesurant 300 yards	grosse	3.00
Mesurant 200 yards	id	2.00
Mesurant 100 yards	id	1.50
Tissus à raies de coton, mesurant en largeur:		
Jusqu'à 24–25 pouces	yard	.06
Jusqu'à 30 pouces	id	.07
Jusqu'à 36 pouces	id	.08
Percale de couleur, ordinaire, dite *prusiana*, mesurant en largeur:		
Jusqu'à 24–25 pouces	id	.06
Jusqu'à 28–29 pouces	id	.07
Jusqu'à 31–32 pouces	id	.08
Jusqu'à 35–36 pouces	id	.09
Mousselines de coton, ordinaires, mesurant en largeur:		
Jusqu'à 24–25 pouces	id	.06
Jusqu'à 28–29 pouces	id	.07
Jusqu'à 31–32 pouces	id	.08

Les chapeaux d'enfants acquitteront la moitié du droit selon l'espèce.

Art. 4. Seront admises en franchise les huiles de foie de morue et leurs préparations.

Art. 5. Acquitteront un droit fixe les articles suivants:

		Pesos.
Riz	quintal	1.00
Lait condensé	id	5.00
Savon ordinaire	id	.55

Art. 6. La présente loi envoyée au Pouvoir Exécutif aux termes de la Constitution, sera applicable trente jours après la date de sa publication pour les provenances européennes et vingt jours après cette même date pour les autres provenances.

ÉTATS-UNIS.

COMMERCE AVEC L'AMÉRIQUE LATINE.

IMPORTATIONS ET EXPORTATIONS.

On trouvera à la page 1078 le dernier rapport du commerce entre les États-Unis et l'Amérique latine, extrait de la compilation faite par le Bureau des Statistiques du Ministère des Finances. Le rapport a trait au mois d'août 1902 et donne un tableau comparatif de ce mois avec le mois correspondant de l'année 1901. Il donne aussi un tableau des huit mois finissant au mois d'août en les comparant avec la période correspondante de l'année précédente. On sait que les chiffres des différents bureaux de douane montrant les importations et les exportations pour un mois quelconque ne sont reçus au Ministère des Finances que le 20 du mois suivant, et qu'il faut un certain temps pour les compiler et les faire imprimer de sorte que les résultats pour le mois d'août ne peuvent être publiés avant le mois d'octobre.

BLÉ POUR LA FABRICATION DE LA PÂTE DE MACARONI.

Dans le Bulletin Mensuel du mois de juin 1901, on a parlé de l'intention qu'avait le Ministre de l'Agriculture de développer la production du blé connu sous le nom de "blé pour le macaroni." Des essais ont été faits en vue de découvrir les régions qui conviennent le mieux à cette culture spéciale. D'après le Chef de Bureau des céréales on constate comme résultat de l'encouragement donnée à cette industrie, une production de plus de 1,000,000 de boisseaux de ce blé pour l'année actuelle indiquant une récolte de 5,000,000 de boisseaux au moins pour l'année prochaine. La récolte de 1902 a été 20 fois plus grande que celle de l'année précédente, et malgré l'augmentation énorme dans la superficie consacrée à sa culture il faudra encore quelque temps pour que la production suffise à la consommation nationale.

Selon les statistiques pour l°année fiscale de 1902, les importations de macaroni s'élèvent à 20,000,000 de livres, par conséquent on estime qu'il faudrait quatre ou cinq ans au moins avant que la production du blé pour le macaroni fût assez considérable pour permettre son exportation. La qualité de ce blé cultivé aux Etats-Unis égale celle du produit étranger, le Ministère ayant obtenu de la semence originaire de la Russie orientale; il a aussi importé quelques variétés de ce grain de la Sibérie et de l'Algérie. Les bénéfices résultant de la culture de ce blé proviennent de la plus grande production par acre, puisque les prix par boisseau sont à peu près les mêmes que pour le blé ordinaire. Pendant les trois dernières années la moyenne de la récolte s'est élevée de 20 à 25 boisseaux par acre, le grain étant deux fois plus gros que celui des autres principales variétés de blé et le nombre de tiges par plante étant de beaucoup plus grand.

Un fait important ayant rapport à ce genre de blé est qu'on peut le cultiver dans les régions où le blé destiné à faire de la farine ne croît pas avec succès.

Il n'exige que très peu d'humidité et c'est le climat sec qui lui convient le mieux. Les Etats du Dakota du Nord et du Dakota du Sud sont les principaux états producteurs, et on commence à le cultiver avec succès dans les régions sèches du Texas. Les grains de ce blé sont les plus durs de toutes les variétés et il faut des machines spéciales pour le moudre.

LES MOUSTIQUES COMME AGENTS DE TRANSMISSION DE LA FIÈVRE JAUNE.

Le service des hôpitaux de la Marine des Etats-Unis a publié un intéressant bulletin du docteur H. R. CARTER, au sujet de la transmission de la fièvre jaune par les mostiques, dont le nom scientifique est *Stegomyia fasciata.*

Le Docteur CARTER est arrivé à la conclusion que ces insectes sont les seuls agents de transmission de cette maladie. Il soutient sa théorie d'une manière convaincante en éliminant les autres causes de contagion et montre que tous les faits servent à prouver que les moustiques sont les seuls agents transmetteurs du micro-organisme qui produit la maladie.

Le docteur CARTER affirme que pendant vingt ans antérieurement à l'année 1899, les bagages venant de la Vera Cruz de la Havane et de Santiago de Cuba entraient à New-York sans être désinfectés. Il y avait beaucoup de bagages venant de la Havane et de la Vera Cruz et la majeure partie provenait de maisons infectées de la fièvre jaune et beaucoup d'autres n'etaient pas propres. Tous ces bagages ont été ouverts à la douane de New-York et transportés dans les hôtels de cette ville et de Saratoga et on n'a signalé aucun cas de fièvre jaune pendant cette période, soit parmi les inspecteurs de la douane de New-York, soit dans les hôtels.

Pendant les trente années, il y a eu une très grande quantité de ces bagages allant de ces mêmes ports cubains à destination de l'Espagne; et la plus grande partie de ces bagages devait être très sale. Une partie de ce trafic va aux ports méditerranéens de l'Espagne—Valence, Malaga, Barcelone, etc., qui, à certains intervalles en 1870 et dans les années antérieures, ont été des endroits susceptibles d'être infectés, cependant on n'a pas signalé aucun cas de fièvre jaune dans cette peninsule depuis l'épidémie de 1870. Ces bagages représentent, d'après l'estimation du docteur Carter, au moins 300,000 personnes qui pouvaient, dans les années de l'épidémie et avec des méthodes de surveillance peu sévères, être considérées comme exemptes de contagion. De plus, de 175,000 à 200,000 personnes, soldats ou autres, sont revenus de Cuba aux Etats-Unis à la fin de la guerre hispano-américaine avec des bagages et effets d'équipements, et aucun cas de fièvre jaune n'en est résulté.

Dans ce rapport on discute les changements possibles dans le micro-organisme après que les moustiques en ont été infectées, et on conclut que la maladie n'est pas propagée en nature par la matiére transmise directement du malade à la personne en bonne santé; mais que la matière, après avoir quitté le corps du malade, subit des changements en dehors de son corps et après ces différentes transformations il donne la fièvre jaune à une personne susceptible de l'attraper. Ce changement qui s'effectue en dehors du corps du malade n'entraîne aucun changement dans l'organisme lui-même. Il y a aussi une autre hypothèse, un changement peut se produire dans l'organisme même en se développant en dehors du corps humain dans un état différent de celui dans lequel il quitte le corps. Cette théorie a été acceptée par la plupart des écrivains qui ont étudiés ce sujet, mais il n'y a aucune analogie avec la propagation d'autres maladies.

Comme preuve à l'appui de sa théorie que la fièvre jaune se transmet seulement en nature par des agents qui sont certainement les moustiques le docteur Carter fait voir, 1° qu'il y a une grande analogie avec les autres maladies transmises au moyen des insectes; 2° que tous les faits observés au sujet de la propagation de la fièvre jaune s'accordent avec les déductions nécessaires à cette théorie, et 3° qu'aucune autre théorie ne peut expliquer tous les faits observés au sujet de sa propagation.

DÉVELOPPEMENT INDUSTRIEL PENDANT LE SIÈCLE DERNIER.

Sous le titre de "Progrès des Etats-Unis dans ses industries matérielles" le Bureau des Statistiques du Ministère des Finances vient de publier un ouvrage présentant les conditions des Etats-Unis tous les dix ans de 1800 à 1850 et tous les ans de 1850 à 1902. Cet ouvrage comprend une série de tableaux montrant la superficie, la population, la richesse, la dette, l'argent en circulation, les banques, les opérations de banques et les déposants, les fermes, les manufactures et leurs valeurs respectives, les recettes et dépenses, les importations, les exportations, les chemins de fer et leur trafic, l'industrie maritime et beaucoup d'autres renseignements se rapportant au développement national dans les années où le dénombrement a été fait depuis 1800 jusqu'en 1850 et enfin annuellement de 1850 jusqu'à 1902.

Les chiffres qu'on y voit, ayant trait à plus de 100 sujets, font ressortir un développement intéressant et même phénomenal dans certains cas, au sujet des industries, des finances, de la production et des transports du pays.

La superficie s'est élevée de 827,844 milles carrés en 1800 à 3,025,600 milles carrés en 1902, sans compter Alaska et les îles appartenant aux Etats-Unis. La population par mille carré, qui en 1810 était de 3.6, se trouvait de 26.1 en 1902, et ceci, malgré l'augmentation considérable de la superficie qui a eu lieu dans l'intervalle.

La richesse totale s'est accrue de $7,000,000,000 en 1850 à $94,000,000,000 (estimation) en 1900, et la richesse par tête de $307 en 1880 à $1,235 en 1900. Dans aucun cas il n'a pas eu de plus grandes fluctuations que dans la dette publique et l'intérêt demandé. En 1800 la dette publique était de $15 par tête; en 1840 elle était tombée à $0.21 par tête; en 1852 elle était de $2.67 par tête; en 1861, avant le commencement de la guerre, de $2.74, augmentant rapidement jusqu'au chiffre de $76.98 par tête en 1865; et alors tombant peu à peu après la guerre, à $38.27 en 1880, à $14.22 en 1890, à $12.64 en 1893, à $13.60 en 1896, et à $12.97 en 1902. L'argent en circulation, qui en 1860 s'élevait à $13.85 par tête, a atteint le chiffre de $20.57 pendant la période de papier-monnaie vers la fin de la guerre, mais il est retombé au-dessous de $20 jusqu'en 1881, où il a atteint le chiffre de $21.71 par tête. En 1892 on comptait $24.60 par tête; en 1896 $21.44; en 1900 $26.93, et en 1902 $28.40, le chiffre le plus élevé qu'on ait jamais obtenu.

Les fonds déposés dans les caisses d'épargne se sont élevés à $1,138,576 en 1820; à $2,973,304 en 1830; à $43,431,130 en 1850; à $149,277,504 en 1860; à $549,874,358 en 1870; à $819,106,973 en 1880; à $1,524,844,506 en 1890; à $1,810,597,023 en 1895 et à $2,597,094,580 en 1901.

La raison d'être des conditions financières dont nous venons de faire l'exposé—l'augmentation de la monnaie, les fonds déposés dans les banques, etc.,—se trouve dans d'autres tableaux montrant le développement des fermes, des manufactures et des nombreuses industries. Le nombre des fermes s'est augmenté de 1,449,073 en 1850, à 5,739,657 en 1900; la valeur des fermes et propriétés rurales de $4,000,000,000 en 1850, à $20,000,000,000 en 1890, et la valeur de leurs productions, qui n'a pas été évaluée jusqu'en 1870, s'est élevée pour cette dernière année de $1,958,000,000 à $3,764,000,000 en 1900. La valeur des animaux domestiques a augmenté de $544,000,000 en 1850 à $2,981,000,000 en 1900. La valeur des productions des industries manufacturières a passé de $1,000,000,000 en 1850 à $13,000,000,000 en 1900, tandis que le nombre des personnes qui y étaient employées s'est élevé de 1,000,000 à peine en 1850 à 6,750,000 en 1900.

Le tableau ci-dessous montre les chiffres pour quelques-unes des colonnes les plus importantes qui paraissent dans cet ouvrage pour les années 1890 et 1902:

	1890.	1902.
Dette publique, sans compter l'argent dans le Trésor	$890, 784, 370	$969, 457, 214
Argent en circulation	$1, 429, 251, 270	$2, 246, 529, 412
Liquidation des banques	$58, 845, 279, 505	$111, 190, 226, 021
Fonds déposés dans les caisses d'épargne	$1, 524, 844, 506	$2, 597, 094, 580
Fonds déposés dans les banques nationales	$1, 485, 095, 856	$2, 191, 690, 196
Nombre de fermes	4, 564, 641	5, 739, 657
Valeur des produits ruraux	$2, 460, 107, 454	$3, 764, 177, 706
Valeur des animaux domestiques	$2, 418, 766, 028	$2, 981, 054, 115
Charbon produit, tonnes	140, 866, 931	261, 677, 961
Acier produit, tonnes	4, 277, 071	13, 473, 595
Industries manufacturières.		
Moyenne du nombre de personnes employées	4, 712, 622	5, 719, 137
Gages payés	$2, 283, 216, 529	$2, 735, 430, 848
Valeur des productions	$5, 369, 579, 191	$13, 039, 279, 566
L'industrie du fer et de l'acier.		
Gages payés	$95, 736, 192	$134, 739, 004
Valeur des productions	$478, 687, 519	$835, 759, 034
Chemins de fer en exploitation, (milles)	166, 654	201, 839
Marchandises transportées par mille, (tonnes)	520, 439, 082	584, 695, 935
Prix par tonne, par mille	$0. 93	$0. 75

RÉSULTATS DES EXPÉRIENCES FAITES DANS L'EMPLOI DE L'HUILE COMME COMBUSTIBLE.

Le Ministère de la Marine a publié le 5 septembre 1902, le rapport de Monsieur WARD WINCHELL, Lieutenant de Marine et expert nommé par le Ministre pour faire des recherches sur l'efficacité et l'installation du système employant l'huile comme combustible dans le navire à vapeur *Mariposa* de la Compagnie de navigation "Oceanic." Le déplacement de ce vapeur est de 3,100 tonnes. La moyenne de la puissance développée à été de 2,431 chevaux. La moyenne de la distance couverte par le vapeur a été de 354 nœuds par jour, ce qui donne une vitesse moyenne de 13.53 nœuds par heure.

La consommation journalière de l'huile a atteint 278 barils environ, soit une consommation moyenne de 3,720 livres par heure.

Il a fallu, pour ainsi dire, 1½ livres d'huile par heure pour assurer la force d'un cheval, et bien que ce résultat ait été obtenu sur terre dans des machines les plus perfectionées la consommation est de 50 pour cent de moins en poids de combustible qu'il n'en faudrait en utilisant du charbon. Le navire a mis 262 heures pour faire le voyage de San Francisco à Tahiti, tandis que pour le voyage du retour il n'a fallu que 260 heures. L'équipage du navire, par l'emploi de l'huile comme combustible, a été réduit de 81 à 55, diminuant ainsi de 36 à 20 le nombre des hommes employés dans la chambre de la machine. On a réduit l'huile crue en atomes au moyen d'un compresseur d'air, d'une capacité de mille pieds cubes d'air par minute, comprimés à 30 livres. Le *Mariposa* qui a 18 fourneaux dans ses chaudières en emploie seulement 12. On a installé deux becs dans chaque fourneau, bien qu'on ne se soit pas servi de tous les becs si ce n'est à de courts intervalles quand on a mis les machines sous toute pression.

Ce qui intéresse le plus les experts du génie au Ministère de la Marine, c'est, qu'après des recherches soigneuses, on ne trouve aucune trace de la flamme sur les chaudières. A l'arrivée à Tahiti, après le voyage, les tubes ont été balayés avec des racloirs et tous les débris ramassés ont rempli à peine deux seaux à cendres dont une partie provenant du charbon dont on s'était servi sur un des essais préliminaires.

La vitesse atteinte au retour a été plus élevée que celle obtenue à l'aller, ce qui est dû au fait que les chauffeurs comprenaient mieux le mécanisme des machines. La compagnie a pris des mesures pour arranger les becs de sorte qu'on puisse employer la vapeur comme agent pour réduire l'huile en atomes en cas que le compresseur se trouve endommagé. Une ou deux fois pendant le voyage on a dû réparer le compresseur et se servir de vapeur pour réduire l'huile en atomes pendant qu'on faisait les réparations.

GUATÉMALA.

LES PORTS DE LA RÉPUBLIQUE.

D'après les premières statistiques relatives au mouvement maritime des différents ports du Guatémala qui ont été publiées en 1899, on remarque que le port de San José, sur le littoral du Pacifique, est celui qui fait le plus de commerce dans le pays.

En 1900, 249 navires sont entrés dans ce port, 2,665 passagers y ont débarqué et le nombre de balles ou colis déchargés s'est élevé à 248,296.

Puerto Barrios sur l'Atlantique vient en second lieu; il est aussi le centre du commerce de l'exportation des bananes du Guatémala. Au point de vue général, on peut vraiment dire que les deux ports de Puerto Barrios et de Livingston ne font qu'un, car ils sont situés très près l'un de l'autre et sont reliés par un service de petits bateaux à vapeur.

MODIFICATIONS DOUANIÈRES.

Décret du 16 mai 1902, relatif au 30 pour cent en or à percevoir dans le paiement des droits d'importation.

["El Guatemalteco" du 19 mai 1902.]

Article 1er. Le trente pour cent en or à percevoir sur le montant total des droits d'importation dus, en vertu du Décret No. 585, sera prélevé à partir du 1er juin de la présente année. Il ne pourra être acquitté qu'en monnaie d'or américaine ou en son équivalent en traites négociables.

Art. 2. Ce mode de paiement n'est pas applicable:

Aux filés de coton pour la fabrication des tissus.

Aux instruments aratoires.

A la farine, au froment et à la viande salée.

Tous ces articles acquitteront comme par le passé les droits d'importation stipulés dans le Décret No. 585.

DÉVELOPPEMENT DE L'AGRICULTURE.

Le Consul anglais au Guatémala fait connaître que le gouvernement vient de faire publier par le Conseil agricole du Guatémala un rapport montrant les grands progrès réalisés dans l'acclimatation et la culture de divers produits nouveaux pendant l'année 1901. Dans ce but on a importé de l'étranger des graines de coton et de tabac, des maïs de Chalco et de Tezcoco, des chênes d'Australie et d'autres arbres fournissant le bois de charpente. On a distribué les graines et plantes entre les agriculteurs des différentes zones pour en faire l'essai. Le Conseil agricole a fait préparer des brochures sur les produits nouveaux et les a fait distribuer parmi toutes les classes agricoles afin de faire mettre en pratique dans les expériences les dernières méthodes d'après les règles de la science pour le plantage, etc.

On a donné une grande impulsion à la production des céréales et légumes qu'on consomme en grandes quantités dans le pays et on prête plus d'attention à la culture du maïs, des haricots, des pommes de terre et du blé pour lesquels on obtient de bons prix.

Les maraîchers et les laiteries font de grands bénéfices sur les hauteurs et dans le voisinage des grandes villes et beaucoup de petits propriétaires se livrent à ces industries.

RÉPUBLIQUE DE HONDURAS.

MODIFICATIONS DOUANIÈRES.

I. *Décret du 5 mars 1902, établissant le régime applicable au papier d'imprimerie.*

["La Gaceta" du 22 mars 1902.]

Article 1er. Le papier d'imprimerie importé directement par les propriétaires d'imprimeries ou par des éditeurs de journaux, ne sera assujetti à aucun impôt fiscal, ainsi que cela a été établi en vertu de l'article 3 de la loi sur la presse.

Art. 2. Les propriétaires d'imprimeries et les éditeurs de journaux, présenteront au Ministre des finances ou aux Administrateurs des douanes, les factures originales et, sur la production de ces pièces justificatives, les permis d'entrée en franchise leur seront délivrés.

II. *Décret du 5 mars 1902, fixant le régime applicable aux tôles et tuyaux en fer galvanisé, ainsi qu'aux réservoirs en fer et en bois destinés à recueillir les eaux de pluie.*

["La Gaceta" du 31 mars 1902.]

Article unique. Sera exempte de tous impôts fiscaux et municipaux, pendant une période de cinq années, l'importation par les ports de la République des tôles et tuyaux en fer galvanisé ainsi que des réservoirs en fer et en bois destinés à recueillir les eaux de pluie.

Les articles importés en vertu du présent décret ne payeront pas de droit de magasinage pendant un mois à partir du jour de leur débarquement.

III. *Décret du 1er mars 1902, sur l'importation de l'alcool.*

["La Gaceta" du 31 mars 1902.]

Article 1er. Au n° 60 du Tarif des douanes relatif aux droits applicables à l'alcool, à raison de 2 pesos par demi-kilogramme, on ajoutera l'observation suivante:

"Les propriétaires de pharmacies pourront importer par année 30 gallons d'alcool pour l'usage exclusif de leur établissement et cet alcool sera tarifé comme médicament, s'il est reconnu chimiquement pur."

Art. 2. S'ils importent plus de 30 gallons, ils payeront pour l'excédent 2 pesos par demi-kilogramme.

Art. 3. Pour bénéficier du régime dont il s'agit, les propriétaires de pharmacies devront s'adresser au Ministère des finances et produire à l'appui de leur demande les factures correspondantes de l'alcool à importer.

MEXIQUE.

COMMERCE DE LA FRONTIÈRE DU MEXIQUE AVEC LES ÉTATS-UNIS.

Le Ministère des Finances du Mexique a publié un rapport sur le trafic entre les Etats-Unis et la République du Mexique pendant les trois années finissant le 30 juin dernier. Ce rapport officiel fait connaître que pendant l'année fiscale 1898–99, 32,305 wagons de marchandises transportant 467,839 tonnes sont entrés au Mexique *via* Juarez, Porfirio Diaz, Nuevo Laredo et Nogales, villes situées sur la frontière du Mexique. Le nombre de wagons de marchandises venant du Mexique aux Etats-Unis pendant l'année s'est élevé à 15,506, transportant 288,412 tonnes de marchandise. Le total du mouvement commercial des Etats-Unis au Mexique et du Mexique aux Etats-Unis pour l'année s'est élevé à 47,811 wagons de marchandises, avec 756,251 tonnes, qui ont payé $5,295,071 de droits.

Pendant l'année fiscale 1899–1900, 47,692 wagons de marchandises transportant 645,953 tonnes sont entrés au Mexique venant des Etats-Unis.

Le nombre de wagons qui sont entrés aux Etats-Unis venant du Mexique pendant la même année s'est élevé à 24,471 transportant 242,550 tonnes de marchandises. Le mouvement total du commerce réciproque pour l'année s'est élevé à 72,063 wagons, transportant 888,503 tonnes de marchandises, qui ont payé $6,580,519 de droits. Pendant l'année fiscale 1900–1901, 38,629 wagons de marchandises transportant 635,540 tonnes de marchandises sont entrés au Mexique venant des Etats-Unis. Le nombre de wagons qui sont entrés aux Etats-Unis venant du Mexique pendant la même année s'est élevé à 20,368, transportant 223,720 tonnes de marchandises. Le mouvement total du commerce réciproque pour l'année s'est élevé à 58,987 wagons, transportant 759,360 tonnes de marchandises, qui ont payé $6,587,470 de droits.

Le tonnage de divers points de la frontière a été réparti de la manière suivante: Juarez, 54,874 wagons, transportant 896,680 tonnes de marchandises; Porfirio Diaz, 61,727 wagons, transportant 681,900 tonnes de marchandises; Nuevo Laredo, 51,356 wagons, transportant 681,678 tonnes de marchandises, et Nogales, 10,914 wagons, transportant 144,026 tonnes de marchandises.

PRODUCTION ET COMMERCE DU CIMENT.

D'après un récent journal de commerce français, la fabrique de ciment privilégiée de Mexico vient d'apporter des améliorations importantes à ses établissements, afin de pouvoir suffire aux demandes croissantes de cet article. La production de cette fabrique a doublé depuis deux ans et la concurrence qui en résulte affecte directement l'importation du ciment étranger.

Cependant les commandes de ciment sont encore actuellement si nombreuses et si considérables au Mexique, que les industriels n'ont pas lieu, pour le moment, d'envisager l'avenir de ce commerce avec inquiétude.

ABATTOIRS ET EXPÉDITIONS DE VIANDE.

Après avoir obtenu toutes les concessions nécessaires on a fait tous les arrangements pour l'établissement au Mexique d'un grand abattoir destiné à fournir de la viande fraîche à la ville de Mexico et aux villes du sud-ouest des Etats-Unis. On se propose aussi, à mesure que l'industrie s'augmentera, d'entrer en concurrence directe avec les expéditions de viande de ce dernier pays. Les bâtiments nécessaires à cette nouvelle industrie sont situés à 300 milles à l'ouest de la ville de Mexico et au centre de la contrée la plus propice à l'élevage des bestiaux, avec une chute d'eau naturelle de 170 pieds pour force motrice, afin de remplacer le combustible. Dès le début, l'établissement pourra contenir 500 bêtes à cornes, autant de porcs, de moutons et de chèvres et l'on l'agrandira à mesure que le trafic le demandera.

L'établissement est sur le chemin de fer national mexicain et un embranchement spécial ira aux usines pour transporter les produits. On propose en plus de bâtir une usine frigorifique et d'inaugurer une ligne de wagons frigorifiques pour le transport de viandes aux Etats-Unis. En plus de cette industrie, le travail de l'établissement comprendra la fabrique d'oléomargarine, de saindoux et des conserves.

On a accordé l'adjudication pour la construction des bâtiments qui doivent coûter $500,000 à une compagnie américaine et les travaux seront inaugurés immédiatement, afin que la nouvelle entreprise puisse être en pleine fonction le 1er janvier 1903.

PARAGUAY.

MODIFICATIONS DOUANIÈRES.

1. *Loi du 10 janvier 1902, portant approbation du Budget général des dépenses pour l'exercice 1902, avec les modifications qui y ont été apportées.*

[Diario oficial du 21 janvier 1902.]

ARTICLE 1er. Est rendu applicable, à partir du mois de février 1902, le Budget général des dépenses de l'année 1901 pour l'exercice 1902, avec les modifications suivantes:

* * * * * * *

ART. 2. Le chapitre des dépenses budgétaires sera couvert par le montant des impôts en vigueur auxquels il n'a pas été donné une affectation spéciale en vertu d'une loi et au moyen des nouveaux impôts suivants qui seront applicables à partir de la date de la promulgation de la présente loi:

1°. Droit additionnel de sortie, de 25 centavos en or, applicable à l'exportation de chaque peau de bœuf.

2°. Droit additionnel de manutention (*eslingage*), de 3 centavos en or, par 10 kilogrammes de maté moulu et de 4 centavos en or, par 10 kilogrammes de maté *Mhorobiré*, à leur exportation.

3° Cent pour cent de surtaxe sur les impôts frappant les comestibles et les boissons de provenance étrangère, en vertu de la loi du 24 septembre 1890.

4° L'exportation des oranges sera assujettie, pour tout impôt, à un droit de 10 *centavos* en or par mille.

ART. 3. Sera applicable pendant le mois de janvier la loi budgétaire de 1901.

* * * * * * *

II. *Décret du 3 avril 1902, modifiant dans le tarif d'évaluation en vigueur la valeur des vins et autres boissons.*

["Diario Oficial" du 9 avril 1902.]

ART. 1er. Est modifié comme ci-après le tarif des évaluations en vigueur:

No.	Boissons.	Évaluation en or.
		Pesos.
	Liqueurs de toute sorte titrant jusqu'à 50°:	
247	En bouteilles de la capacité d'un litre ..... douzaine..	12.00
248	En fûts ou dames-jeannes ..... litre..	.70
	Champagne, en bouteilles d'une capacité ne dépassant pas un litre ..... douzaine..	9.00
	Vins autres en général, y compris les vins mousseux, en bouteilles d'une capacité ne dépassant pas un litre ..... douzaine..	8.00
	Vins de Porto, Xérès, Madère, Rhin, Château Margaux, Château Lafitte, Château Yquem, Bourgogne, et autres vins fins, en fûts ou dames-jeannes ..... litre..	.50
	Vins de Muscat, Marsala, Nébiolo, Barolo, Sauterne, Moselle et vins doux et de dessert, et autres vins demi-fins ..... litre..	.15
	Vins Carlo, Priorato, secs de Bordeaux et de Bourgogne ordinaires, de Moselle ordinaire, Barbera et autres vins communs, en fûts ou dames-jeannes, ne titrant pas plus de 15° et contenant 45 pour cent d'extrait sec constaté au moyen de l'évaporation à la température de 100° centigrades, y compris le sucre réducteur ..... litre..	.10

NOTE.—Si l'extrait sec se trouve en quantité supérieure à celle indiquée ci-dessus, il acquittera 1 *centavo* par 5 grammes ou fraction trouvés en excédent et par litre.

Si les vins et autres boissons ont une teneur en alcool dépassant la graduation qui leur est assignée, ils acquitteront 1 *centavo* par degré ou fraction en excédent et par litre.

VÉNÉZUÉLA.

COMMERCE DES BOIS ET ÉCORCES TANNANTES À MARACAÏBO.

Un journal officiel de date récente publie les informations suivantes au sujet du commerce des bois et écorces tannantes à Maracaïbo:

Le bois qui fait l'objet des transactions les plus nombreuses est le "zapatero," qu'on exporte vers l'Europe et les Etats-Unis.

Pendant les deux dernières années, on a vendu à l'étranger 6,000 tonnes de ce bois, payé par les exportateurs à raison de 40 à 45 francs la tonne.

L'ébène, qui arrive en seconde ligne, n'a pas la finesse de couleur ni de contexture de celui d'Afrique. Il ne se vend qu'en Europe, où son débouché est d'ailleurs restreint. Un millier de tonnes ont été exportées cette année; les prix payés aux bûcherons ont été de 35 à 40 francs la tonne.

Le vera vénézuélien qui, pendant la guerre de Cuba, obtenait à Londres jusqu'à 125 francs la tonne, ne peut plus guère supporter la concurrence, depuis que la paix a été rétablie dans la Grande Antille.

Le cèdre est situé trop loin des ports d'embarquement pour être à même de lutter à l'étranger avec les bois d'autres provenances. Il se vend au Vénézuéla seulement, à La Guaira et Maracaïbo, en grumes de 18 sur 12 pouces, qui valent de 14 à 16 francs la mètre.

Aucun autre bois n'est exporté de la République.

Le dividivi pousse à l'état sauvage dans les plaines qui entourent le lac de Maracaïbo. La qualité et l'abondance de la récolte dépendent des pluies. L'an dernier, l'exportation s'est chiffrée par 4,000 tonnes, dont 300 de la Goajira. Le prix le plus élevé a été de 4.50 francs le quintal anglais (50⅘ kilogrammes), soit, avec les frais, 5.50 francs, franco à Maracaïbo. La récolte prochaine s'annonce mal et est estimée à peine à un millier de tonnes. D'après les prévisions, les prix ne changeront guère.

La rareté des voiliers en partance de Maracaïbo, directement vers l'Europe, fait le plus souvent diriger les bois en goëlettes sur Curaçao, où les vapeurs les embarquent. En conséquence les frêts établissent comme suit: de Maracaïbo à Curaçao, 19 à 21 francs la tonne; de Curaçao à Liverpool, 21 shillings la tonne; de Curaçao au Hâvre Hambourg, Amsterdam, etc., 24 à 25 shillings la tonne de 2,240 livres anglaises.

Certains voiliers prenant charge pour la Manche, option, ont obtenu jusqu'a 35 shillings la tonne.

COMMERCE DU DISTRICT DE CARACAS, 1901.

Le rapport sur le commerce du district consulaire anglais de Caracas pour l'année 1901, qui a été reçu le 6 juin 1902, au Ministère des

Affaires Etrangères du Royaume-Uni, embrasse les mouvements commerciaux des ports de La Guaira, de Puerto Cabello et de Maracaïbo.

Le commerce d'importation dans les districts de La Guaïra et de Puerto Cabello montre une augmentation légère pour le premier et une diminution prononcée pour le dernier pendant l'année 1901, tandis que les exportations des deux sections font voir une augmentation considérable comparée à l'année antérieure.

Dans le district de Maracaïbo il paraît que le commerce d'exportation a été meilleur qu'en 1900. On a extrait du rapport en question les détails suivants sur le commerce et les conditions générales du pays:

D'après les chiffres des statistiques publiées dans le Bulletin du mois d'avril 1902, on constate au port de La Guaïra une augmentation sur l'année 1900 dans les quantités de marchandises de toutes classes importées, spécialement dans les charbons, les comestibles et le ciment. Pour les comestibles l'augmentation dans les importations a eu lieu principalement dans les mois d'août et de septembre. Cette augmentation est due à la quantité énorme de maïs importé des Etats-Unis, par suite du décret publié en juillet qui permettait l'entrée, en franchise de droits, de maïs et de haricots pendant une période de deux mois. L'augmentation dans ces produits sur l'année précédente est de 2,835 tonnes. L'accroissement dans les importations de marchandises, s'élevant à 1,834 tonnes de plus sur l'année précédente, est dû à la mise en vigueur, à partir du mois de mai, d'un nouveau décret augmentant les droits d'importation de 12½ pour cent, et quelques-unes des maisons les plus importantes ont anticipé l'effet du décret en faisant de plus grands achats à l'étranger.

L'augmentation dans les recettes de charbon s'est élevée à 4,396 tonnes, et le nombre de navires engagés dans ce commerce a dépassé de 13 celui de l'année antérieure.

La récolte du café dans le district en question a été très mauvaise sous le rapport de la quantité, à cause des grandes sécheresses, et les exportations ont diminué de 3,010 tonnes en les comparant aux chiffres de l'année antérieure. On constate une diminution de 1,992 tonnes dans les expéditions de cacao. La diminution dans les exportations de cuirs a été de 32,469 cuirs, équivalant à 293 tonnes. On a expédié la plus grande partie du café à New-York, 40 pour cent de la production totale trouvant un débouché dans ce port, tandis que 20 pour cent ont été envoyés à Hambourg et le reste au Hâvre et à d'autres ports. C'est la France qui achète la plus grande quantité du cacao du Vénézuéla, et sur les 70,821 sacs expédiés à l'étranger 57,000 sacs environ ont été dirigés sur les trois ports du Hâvre, de Saint-Lazaire et de Bordeaux.

Les cuirs et peaux vont principalement à New-York où l'on en a expédié 76,000 sur un total de 84,000. Pendant toute l'année 1901, il y avait toujours dans le port de La Guaïra au moins un bâtiment de guerre étranger et souvent trois ou quatre à la fois, ce qui a donné beaucoup de commerce dans la ville, ces vaisseaux nécessitant de grandes quantités de viande fraîche, de volailles et de légumes. En spécialisant la position prise par le Gouvernement dans le commerce de ce port, le rapport fait connaître que la quantité totale des importations provenant de ce pays a accusé une augmentation de 3,264 tonnes, cette augmentation portant principalement sur le charbon.

Dans le rapport sur le district dont Puerto Cabello est le port d'entrée, on constate que les récoltes de second ordre ont souffert des sécheresses continuelles et on a importé de grandes quantités de grains dans le pays, le riz étant le principal article d'importation. Les chiffres ayant rapport au commerce avec l'Allemagne et la Hollande accusent une légère augmentation sur l'année dernière, tandis que le commerce avec les Etats-Unis—malgré les envois plus considérables de maïs et de haricots, sur lesquels on avait supprimé les droits pendant quelques temps—n'a pas atteint son chiffre ordinaire.

Voici les chiffres officiels des importations à Puerto Cabello pendant 1901:

Pays d'origine.	Valeur.		
	£	s.	d.
Royaume-Uni	64,320	3	5
Allemagne	63,476	11	3
Etats-Unis	51,506	0	1
France	34,629	1	0
Hollande	32,533	5	2
Italie	4,381	7	11
Espagne	3,432	3	1
Autres pays	607	8	9
	254,886	0	8

D'après ces chiffres, les importations au port accusent une diminution d'au moins 25 pour cent en les comparant avec ceux de l'année 1900 et de plus de 40 pour cent en les comparant avec ceux de l'année 1898.

Voici les chiffres des exportations:

Articles.	Quantité.	Articles.	Quantité.
	Tonnes.		*Tonnes.*
Café	9,281	Vieux métaux	61
Cacao	456	Quinquina	13
Cuirs	540	Bois de charpente	374
Peaux de daims	35	Dividivi	7
Peaux de chèvres	261	Coton	4
Copra	75	Semences	19

Le nombre des navires étrangers entrés et sortis pendant l'année a été de 317 vapeurs et 8 voiliers, les navires de nationalités norvégienne, française et hollandaise venant en premier lieu.

L'exportation de bestiaux de Puerto Cabello à l'île de Cuba a continué pendant l'année, et a atteint le chiffre élevé de 66,049 têtes, contre 18,774 en 1900 et 64,083 en 1899, provenant tout à la fois de Puerto Cabello et de Guatna.

Le rapport du district de Maracaïbo montre une condition plus satisfaisante sous le rapport du commerce qu'en 1900. Les exportations de presque tous les produits ont augmenté un peu, et les résultats des sept premiers mois de l'année ont été très satisfaisants.

L'état suivant montre la quantité des produits généraux exportés de Maracabïo pendant les années de 1901 et 1900:

Articles.	Quantités.		Articles.	Quantités.	
	1901.	1900.		1901.	1900.
	Tonnes.	*Tonnes.*		*Tonnes.*	*Tonnes.*
Café	25,626	20,829	Copahu	40¾	36½
Cacao	154	184	Fustock	6,272	5,421
Ecorce de quinquina	6¼	4	Dividivi	3,368	1,781
Cuirs	456	338	Cassonade	283	274
Peaux de chèvres	139	121	Vessies natatoires (de poissons)	36	43
Peaux de daims	7¾	4½			

TARIF D'IMPORTATION APPROUVÉ PAR LE CONGRÈS [illegible] 1902 ET ENTRÉ EN VIGUEUR LE 1er JUILLET DE L[illegible]ME ANNÉE.

[Gaceta oficial du 18 juin 1902.]

ARTICLE PREMIER. Les marchandises provenant de l'étranger et introduites par les douanes de la République se divisent en neuf classes, savoir:

1° Marchandises taxées à raison de 5 centimes de bolivar[a] par kilogramme.
2° Marchandises taxées à raison de 10 centimes de bolivar par kilogramme.
3° Marchandises taxées à raison de 25 centimes de bolivar par kilogramme.
4° Marchandises taxées à raison de 75 centimes de bolivar par kilogramme.
5° Marchandises taxées à raison de 1 bolivar 25 centimes par kilogramme.
6° Marchandises taxées à raison de 2 bolivars 50 centimes par kilogramme.
7° Marchandises taxées à raison de 5 bolivars par kilogramme.
8° Marchandises taxées à raison de 10 bolivars par kilogramme.
9° Marchandises taxées à raison de 20 bolivars par kilogramme.

SECTION 1.

Classe I.—Marchandises taxées à raison de 5 centimes de bolivar par kilogramme.

1. Appareils et machines destinés à fournir de la vapeur au moyen des résidus du pétrole.
2. Appareils et machines pour la production de l'éclairage au gaz ou à l'électricité.
3. Couveuses artificielles.
4. Pompes à incendie.
5. Carbure de calcium.
6. Cartes hydrographiques et marines.
7. Voitures, accessoires et matériaux, exclusivement destinés aux chemins de fer.
8. Cendre de bois, marc de raisin, guano et toute substance végétale, minérale, animale ou artificielle pouvant servir comme engrais et non dénommée dans le tarif.
9. Ciment romain.

---

[a] Le bolivar vaut 1 franc (valeur nominale) et se divise en 100 centimes. Pour les poids et mesures, le Vénézuéla a adopté le système métrique.

10. Ciment Tilestone pour toiture.

11. Essieux, ressorts, jantes et planches pour la construction dans le pays de chariots, de voitures, de charrettes et de brouettes.

12. Sphères ou globes célestes ou terrestres, atlas, cartes géographiques et plans topographiques de toute sorte, lithograpiés ou imprimés.

13. Présure.

14. Œufs.

15. Fer natif et vieux fer destinés à la fonte.

16. Livres imprimés, en feuilles ou brochés, traitant des sciences, des arts et des métiers; catalogues, journaux et modèles d'écriture à l'usage des écoles primaires.

17. Bois préparés pour constructions navales et morceaux ou pièces rondes de pin ou pitchpin pour mâts de navires, ainsi que poutres de pitchpin équarries ou rondes ayant plus de 25 centimètres d'épaisseur, chêne ou autres bois ordinaires, non dénommés, propres à être sciés en planches, madriers ou autrement.

18. Machines et appareils pour télégraphes électriques.

19. Moteurs à vapeur de toute sorte avec tous leurs accessoires.

20. Moulins à vent avec tous leurs accessoires.

21. Or et argent non ouvrés.

22. Platine non ouvré.

[illegible] lantes vivantes de toute espèce, herbiers ou collections de plantes sèches autres [illegible] icinales.

[illegible] s avec leurs chaînes, tabliers et autres accessoires, s'ils sont destinés à l'us [illegible] iblic ou à des entreprises agricoles; dans le cas contraire, ils suivront le régime de la matière qui les compose.

25. Horloges publiques non importées par le Gouvernement national.

26. Graines non comestibles pour ensemencer.

27. Les bouteilles en verre ordinaires, importées vides dans des caisses destinées à loger un même nombre de bouteilles remplies, seront taxées séparément des caisses et suivront le régime qui leur est applicable dans le présent traif.

28. Les contenants dans lesquels seront importées des marchandises admises en franchise ou d'une valeur inférieure à celle des contenants, tels que malles, sacs de nuit, porte-feuilles, couvertures ou tissus n'ayant pas perdu leur valeur intrinsèque, seront pesés séparément et acquitteront le droit respectif qui leur est applicable.

SECTION 2.

Classe II.—Marchandises taxées à raison de 10 centimes de bolivar par kilogramme.

29. Acide sulfurique et acide carbonique liquéfié.

30. Son de froment, de maïs, de graines de lin, d'avoine, d'orge et de toutes autres céréales, et tourteaux de son des mêmes matières pour l'alimentation du bétail.

31. Hameçons et fil de fer galvanisé ou non, non ouvré.

32. Almagre, craie, ocre, blanc d'Espagne, argile, caput mortuum et toutes terres pour construction non dénommées.

33. Goudron minéral ou végétal, asphalte, pétrole brut et bitumes de toute sorte.

34. Cercles de fer ou de bois, pour pipes, boucauts, barils et tamis.

35. Eaux minérales.

36. Riz en grains et avoine.

37. Barres en fer (outils).

38. Bouteilles ordinaires en verre commun noir ou blanc, pour liqueurs, eaux gazeuses et lait stérilisé; dames-jeannes ou boutillons vides, flacons carrés, également en verre ordinaire et cruchons dans lesquels on importe généralement le genièvre.

39. Pompes hydrauliques avec leurs tuyaux, soupapes et autres pièces accessoires.

40. Canots et chaloupes, montés ou en pièces séparées, ainsi que leurs avirons et voiles.

41. Brai jaune ou noir.

42. Chaux hydraulique, chaux ordinaire et tous autres matériaux de construction semblables, non dénommés.

43. Rognures, débris et déchets de peaux, ainsi que boyaux secs, employés pour la fabrication des saucisses.

44. Chanvre ou étoupe en masses ou tordue, pour calfater, étoupe goudronnée et déchets de coton pour nettoyer les machines.

45. Tuyaux ou conduits en fer ou en plomb, ainsi que leurs coudes et raccords.

46. Carton en pâte et carton à filtrer employé dans les brasseries.

47. Carton imperméable pour toiture ou autres usages.

48. Tombereaux et charrettes.

49. Voitures à bras et échelles à incendie à l'usage des pompiers.

50. Orge non mondé.

51. Seigle et froment en grains.

52. Voitures, calèches, coupés, omnibus, phaétons et toute espèce de véhicules non dénommés.

53. Écorce de chêne, de rouvre ou d'autres arbres, pour tanner, et cendres d'os.

54. Farine d'orge, de pois-chiches ou Revalescière du Barry et autres farines non dénommées.

55. Glace importée dans des ports où sont établies, moyennant autorisation du Gouvernement, des fabriques de glace en activité.

56. Fer rond ou carré, fer feuillard, plaques ou tôles de fer brut noir employé pour la fabrication des chaudières et des réservoirs.

57. Briques à nettoyer les couteaux.

58. Briques, même réfractaires, dalles ou carreaux en terre cuite, marbre, jaspe, bois ou toute autre matière, pour dallages, pourvu qu'ils n'aient pas plus de 60 centimètres; tuiles en terre ou en ardoise et pierres ordinaires brutes de toute sorte.

59. Bois à brûler et charbon de bois en morceaux.

60. Bois communs, tels que: planches, poutres et solives, de pitchpin ou de tous autres bois, ni rabotés ni bouvetés, ayant moins de 25 centimètres d'épaisseur, et pièces de bois de pin non dénommées, quelles que soient leurs dimensions.

61. Maïs en grains.

62. Pommes, raisins, poires et tous autres fruits frais.

63. Machines, réservoirs en fer galvanisé et appareils non dénommés dans la Classe I, dont le poids total dépasse 1,000 kilogrammes, ainsi que glacières.

64. Musique manuscrite, en feuilles, cahiers ou brochée.

65. Manioc.

66. Papier brouillard et paille ou herbes sèches non médicinales, telles que foin et similaires, pour nourrir les animaux.

67. Poix commune, blanche, noire ou jaune.

68. Bois de campêche, gaïac, brésillet, mûrier, santal rouge et autres bois semblables, en râpures.

69. Ardoises pour toiture.

70. Ardoises pour billards.

71. Ardoises encadrées ou non, livres et crayons d'ardoise.

72. Résine de pin et toutes autres résines non médicinales.

73. Roues pour voitures, chariots et charrettes, boîtes d'essieux en fer pour lesdits véhicules et roues en acier montées sur essieux en acier.

74. Sel d'Epsom.

75. Sel de Glauber et silicate de soude.

76. Terre de Sienne et terre noire à nettoyer.

77. Tombes et tombeaux, en marbre, granit ou toute autre matière.

78. Lattes en bois pour couvrir les toits (teja mani).

79. Craie blanche en morceaux ou en poudre et poudre de marbre et de verre.

80. Plâtre en morceaux ou en poudre et plâtre pour moulures.

Section 3.

Classe III.—Marchandises taxées à raison de 25 centimes de bolivar par kilogramme.

81. Huile d'olive et ses imitations et huile de graîne de coton.

82. Huile de kérosène, de colza et d'os et huile dite esperma de cristal, pour machines.

83. Acides stéarique et oléique, stéarine pure non ouvrée et stéarine mélangée avec de la paraffine, connue sous le nom de stéarine du commerce.

84. Acides acétique, chlorhydrique ou muriatique, et acide borique et borax.

85. Acide nitrique ou eau-forte.

86. Eaux et limonades gazeuses.

87. Acier, bronze, laiton, spéautre, cuivre, étain pur ou avec alliage, plomb, nickel et zinc en masses ou bruts, en barres, cubes, rognures ou feuilles percées ou ajourées, ou non.

88. Eau de fleurs d'oranger.

89. Eau-rase ou essence de térébenthine.

90. Aiguilles à tricoter, en acier, bois, os, caoutchouc ou autres matières similaires.

91. Coton.

92. Lavande.

93. Alun non calciné ou en morceaux.

94. Jaune anglais ou chromate de plomb, minium, litharge, manganèse minéral, céruse ou carbonate de plomb et asbestine.

95. Animaux empaillés.

96. Annonces sous forme d'almanachs, relatives à des produits médicinaux ou à d'autres industries.

97. Appareils ou filtres à eau et appareils téléphoniques avec leurs parties adhérentes, telles que commutateurs, chevilles, manivelles, charbons et fils de cuivre recouverts.

98. Harnais et colliers pour voitures de toute sorte et pour calèches, coupés, omnibus, phaétons et pour toute sorte de voitures, chariots et charrettes.

99. Riz moulu, sagou, salep, tapioca et maïs broyé.

100. Moscouade et sucre brûlé ou granulé employé dans la fabrication de la bière.

101. Fleur de soufre et soufre en canons.

102. Balances et romaines avec leurs poids, autres que celles en cuivre ou celles où le cuivre domine.

103. Laine de bois (barba de palo) et fibre semblable au sparte.

104. Bariles, pipes et beaucots, montés ou non, et douves importées séparément.

105. Barres à mines et tarières, pour perforer les pierres ou le bois.

106. Poterie vernissée ou non, sous toutes formes, non dénommée.

107. Blanc de zinc et bol blanc.

108. Lianes, joncs, massette, palmes, paille non dénommée, osier non ouvré et tiges de trêfle pour la fabrication des balais.

109. Balles, plomb de chasse et chevrotines.

110. Câbles, cordages et ficelle.

111. Fourneaux de pipes, fume-cigares et pipes en terre ou en faïence ordinaire, non combinés avec d'autres matières.

112. Pièces d'artillerie de toute matière.

113. Haricots de toute sorte, pois-chiches, lentilles, fèves et toute espèce de légumineuses, plantes potagères et racines alimentaires ou comestibles, non préparés.

114. Toile écrue ou grossière et toile dite coleta écrue du n° 3; toiles d'emballage ordinaires, généralement employées pour les sacs de cacao et de café et pour les embal-

lages, écrues, dont la couleur, naturellement foncée, n'a pas été modifiée par les préparations destinées à les blanchir, même lorsqu'elles ont des raies ou des carreaux de couleur.

115. Charbon de bois en poussière, charbon animal et noir de fumée.

116. Viande salée, en saumure ou fumée, jambons et jambonneaux non en boîtes, lard et langues fumées ou salées, à l'exception de la viande salée dite *tasajo* dont l'importation est prohibée.

117. Toile d'emballage doublée de papier, carton fin ou papier épais pour bureaux, pour cartes de visite et autres usages, y compris les papiers imperméables pour presses.

118. Chlorure de chaux et cyanure de potassium.

119. Tamis en fil de fer.

120. Crin végétal et similaires.

121. Poix pour cordonniers.

122. Bière ordinaire et cidre.

123. Créoline et tous désinfectants liquides ou en poudre.

124. Vieux cuivre en débris.

125. Cuisines portatives en fer ou en autre métal.

126. Corbillards, y compris les lanternes (vidrios), plumets ou panaches et tous autres articles accessoires de la voiture, quand même ils payeraient séparément un droit plus élevé, pourvu qu'ils arrivent avec le char, dans le même ou dans un autre colis.

127. Craie blanche ou rouge, en morceaux ou en poudre.

128. Creusets de toute sorte.

129. Conserves au vinaigre, autres que les olives et les câpres de toute sorte.

130. Baies de genièvre.

131. Émeri en morceaux ou en poudre.

132. Sparte brut.

133. Étoupilles et mèches pour mines, ainsi qu'étoupe lubrifiante pour machines.

134. Clous à maugère, en cuivre.

135. Fontaines ou bassins, en fer, en marbre ou en toute autre matière, et statues, bustes, vases, urnes, en marbre, albâtre, granit ou tout autre pierre semblable.

136. Fleur de sagou

137. Biscuits de toute sorte sans sucreries.

138. Gaz fluide (gaz fluido) et réglisse.

139. Gomme arabique.

140. Farine de froment et semoule préparée pour la fabrication des pâtes, ainsi que brisures de froment et farine d'avoine.

141. Outils et instruments, tels que marteaux, maillets de calfat, hachettes, cabestans, forges, soufflets de toute sorte, crics pour lever des charges, *molejones*, grandes vis pour forgerons, bigornes, enclumes et tous autres outils et instruments semblables.

142. Fer ouvré: fil de fer et toile métallique en fil de fer pour fonds de lit, ancres et chaînes pour navires, coffres-forts, mortiers, meubles, presses à copier et à timbrer le papier, clous, broquettes, caboches, rivets et clous à maugère; constructions démontées et leurs parties, telles que balcons, portes, balustres, grilles, colonnes, toits, mêmes importés séparément; statues, urnes, vases à fleurs, bustes et tous autres ornements de ce genre, pour maisons et jardins; poids pour balances, fers à repasser, poteaux pour clôtures, crochets avec ou sans anneaux, cylindres ou *calvoyas;* fourneaux ou réchauds, *budares*, chaudrons, grils, marmites, poêles à frire, brûloirs et autres ustensiles de ménage étamés ou non, émaillés ou non, excepté les mêmes objets en tôle de fer ou fer-blanc qui suivent le régime de la classe IV. Sont rangés dans la classe III les clous en fer galvanisé avec rondelles également en fer galvanisé.

143. Fer-blanc non ouvré et feuilles de fer-blanc mince servant à la garniture intérieure des malles.

144. Os, cornes et onglons bruts.

145. Hollandille bleue de coton.

146. Jouets d'enfants, de toute sorte et de n'importe quelle matière, y compris les billes (*metras*).

147. Livres imprimés, en feuilles ou brochés, non compris dans la classe I; brochures, cahiers destinés à l'instruction primaire, importés comme ci-dessus ou en demi-reliure (*media pasta*).

148. Émeri sur toile ou sur papier.

149. Graines ou farine de lin et graines de colza.

150. Lin brut.

151. Faïence commune et poterie vernissée ou non, en objets de toute forme, non dénommée.

152. Bois de noyer.

153. Bois fin pour luthiers, ébénistes, etc.

154. Bois en feuilles ou plaques, pour placage.

155. Bois scié, raboté ou bouveté.

156. Saindoux et beurre.

157. Machines, réservoirs en fer galvanisé et appareils non dénommés antérieurement, dont le poids ne dépasse pas 1,000 kilogrammes. Si les machines sont importées avec des pièces de rechange qui, prises séparément, payent un droit plus élevé, le tout sera taxé comme machine, pourvu que ces pièces arrivent dans le même colis.

158. Moulins de toute sorte, non compris dans la classe I.

159. Minerai de fer, de cuivre et d'étain, mine de plomb et amiante ou asbeste.

160. Pommes de terre de toute sorte.

161. Papier de toute sorte, non dénommé, serpentins ou rubans de papier, confetti blancs ou de couleur et papier de soie, blanc, en feuilles, n'ayant pas plus de 49 centimètres de hauteur sur 36 centimètres de largeur, employé pour la fabrication des copies de lettres.

162. Poisson pressé, salé ou fumé, autrement qu'en boîtes de fer-blanc.

163. Pierres lithographiques, pierre ponce, pierres de toute sorte et de toute forme pour meules ou à aiguiser; pierres réfractaires pour fourneaux métallurgiques, pierres à filtrer et autres similaires.

164. Couleurs ordinaires à l'huile.

165. Pianos, y compris les pianos muets.

166. Salpêtre, sel de nitre, potasse commune et potasse calcinée.

167. Sangsues.

168. Sardines pressées, sardines à l'huile, aux tomates ou autrement préparées.

169. Stéarine préparée pour la fabrication des bougies.

170. Soude commune ou calcinée.

171. Carbonate de soude cristallisé.

172. Sulfate de fer ou couperose verte.

173. Sulfate de cuivre ou couperose bleue.

174. Toile en fil de fer, non dénommée, et ressorts, en fil métallique.

175. Térébenthine commune de Venise, pâte et extrait de bois de campêche.

176. Poison pour conserver les peaux.

177. Verres et cristaux en feuilles non étamées, blancs ou de couleur.

178. Vinaigre ordinaire, vinaigre empyreumatique et eau-de-vie de marc.

179. Vins de toute sorte, en pipes, barils ou barriques, à l'exception des vins médicinaux.[a]

180. Vans pour nettoyer le café (venteadores).

181. Sumac pulvérisé ou à l'état brut.

---

[a] Par décret du 1er juillet 1902, et à partir de cette date, les vins rouges de toute sorte, importés en boutillon et bouteilles, seront rangés dans la troisième classe du tarif, sauf le vin de Porto, même rouge, qui, importé en boutillons ou bouteilles, sera rangé dans la quatrième classe. ("Gaceta oficial" du 1er juillet 1902.)

SECTION 4.

Classe IV.—Marchandises taxées à raison de 75 centimes de bolivar par kilogramme.

182. Huile de lin.

183. Huile de poisson autre que l'huile de foie de morue, huile de sésame et huile d'amandes.

184. Huile de palme et huile siccative ou liquide pour peintres.

185. Olives et câpres de toute sorte.

186. Huiliers, porte-carafons et ménagères, autres que ceux ayant une partie quelconque en or ou en argent, qui suivent le régime de la classe VIII, et ceux en argent allemand ou dorés ou argentés qui sont compris dans la classe VI.

187. Acier, fer, cuivre, laiton, étain, fer-blanc, métal pour cloches, bronze plomb, spéautre, zinc, aluminum et nickel, en articles de toute sorte non dénommés dans d'autres classes, qu'ils soient ou non polis, laqués, étamés ou bronzés, ainsi que fourneaux pour la fabrication du sucre.

188. Fil métallique ouvré en articles tels que montures de perruque, cages, portemanteaux pour vêtements et chapeaux ou autres objets de ce genre, ainsi que montures d'ombrelles et de parapluies.

189. Amandes, noisettes, noix, arachides, châtaignes et tous autres fruits secs avec coques, non dénommés.

190. Alambics et tous appareils semblables.

191. Amer Siegert.

192. Sésame, alpiste et millet.

193. Anis en graines, carvi, cannelle de Ceylan et cannelle de Chine (canelón) ail, oignons, cumin, clous de girofle, origan, poivre et autres épices servant à assaisonner et à relever les aliments.

194. Lustres, globes, tulipes, candélabres, chandeliers, fanaux, réverbères, suspensions, lampes, lanternes, bougeoirs, chandeliers de jardin (guarda brisas) et quinquets, à l'exception de ceux ayant une partie quelconque en or ou en argent, qui suivent le régime de la classe VIII, et de ceux en argent allemand ou dorés ou argentés, qui sont taxés d'après la classe VI. Les pièces accessoires importées avec les articles précités acquittent les droits de la classe à laquelle ces articles correspondent.

195. Arbres de Noël.

196. Jais brut.

197. Sucre blanc ou raffiné.

198. Balances, romaines et dynamomètres, en cuivre ou dans lesquelles le cuivre prédomine, y compris les poids, même en fer, s'ils sont importés avec lesdites balances.

199. Seaux, baquets et cuves en bois.

200. Bandes de billard et bandes ou courroies de grosse toile cirée pour volants de moteurs à vapeur.

201. Jeux de bagatelle avec tous leurs accessoires.

202. Feutres pour chapeaux, non foulés, poils pour chapeaux, étuis en papier, bandes en cuir, coiffes, peluche, visières pour casquettes et képis, rubans en soie ou en coton, en morceaux n'ayant pas plus de 80 centimètres de longueur, et tous autres articles exclusivement destinés à la fabrication des chapeaux, tels que la toile cirée préparée avec de la gomme-laque dissoute dans l'alcool, employée dans la fabrication des chapeaux de soie, et la solution de ladite gomme dans l'alcool, ainsi que cordons de laine ou de soie ayant 80 centimètres de longueur, également employés dans cette fabrication.

203. Cirage et crêmes pour la chaussure, et huile bitumineuse employée à noircir et à assouplir les harnais.

204. Billards avec tous leurs accessoires, y compris les billes et le tapis, pourvu que ces accessoires soient importés avec les billards.

205. Lie d'huile, résidu de saindoux et de toute autre matière grasse, ainsi que bol d'Arménie.

206. Caisses en bois, même importées non montées ou en planchettes pour leur fabrication, et appareils inodores en faïence avec leurs parties en métal et autres accessoires.

207. Paniers, grands et petits, corbeilles, voitures d'enfants et autres articles en jonc ou en osier, y compris les voitures d'enfants en matière quelconque, le canevas de coton recouvert de papier, pour la fabrication des enveloppes, et le canevas recouvert d'une couche de sulfate de cuivre.

208. Carton manufacturé ou préparé, pour boîtes, grandes et petites, ou pour tout autre usage, excepté les jouets d'enfants, les masques et les cartes à jouer. Sont également rangés dans cette classe les cartes de visite en blanc de toutes dimensions.

209. Orge mondé ou moulu.

210. Cévadille.

211. Capsules pour bouteilles.

212. Brosses grossières de pansage et brosses en corne ou en baleine pour laver les parquets.

213. Cire végétale, noire ou jaune, non ouvrée.

214. Soies de porc ou crins et tissus de crin pour renforcer les vêtements d'homme.

215. Chevaux de bois ou carrousels.

216. Colle ordinaire en morceaux ou liquide et collodion pour la photographie.

217. Toile écrue et toile dite *coleta*, écrue, du nº 2; toiles communes, telles que celles comprises sous le nº 114 de la classe III, mais qui ont été plus ou moins blanchies, y compris la cotonnade (cotonia).

218. Couteaux à pointe, ordinaires, avec ou sans gaîne; couteaux avec manche en bois ou autre matière commune, pour pêcheurs; couteaux grands et machetes en acier pour la campagne, et, en général, couteaux employés dans les arts et les métiers.

219. Laques et vernis de toute sorte.

220. Caoutchouc manufacturé en tuyaux ou conduits et en plaques ou bandes pour courroies de machines, ainsi que rondelles ou anneaux de caoutchouc avec intérieur en tissu.

221. Toile cirée pour parquets, pour emballage et pour toiture.

222. Miroirs de toute espèce, encadrés ou non, et glaces étamées.

223. Blanc de baleine et paraffine.

224. Écume de mer, substance employée dans la fabrication du pain et poudre de boulangerie.

225. Nattes en sparte ou en jonc, pour parquets.

226. Petites nattes et dessous de plats en pite de couleur, pour tables.

227. Images, ornements et contenants pour le conditionnement des bonbons, de toute sorte, ainsi que cornets en papier doré, finis en tout ou en partie, importés pour le même usage. Si les contenants dont il s'agit sont recouverts de soie ou de velours, ou garnis de fleurs ou d'autres articles soumis à des droits plus élevés, ils seront rangés dans la classe VI, comme articles de fantaisie.

228. Paillassons non dénommés.

229. Fruits secs.

230. Fruits à l'eau-de-vie, dans du sirop ou dans leur jus.

231. Bois ou arçons de selles.

232. Fleurs artificielles en porcelaine.

233. Biscuits avec sucreries.

234. Gazoline, benzine ou naphte.

235. Gélatine de toute sorte.

236. Farine de pommes de terre, de maïz et de seigle.

237. Fil ou filasse pour cordonniers et cordes de chanvre, pour brides, avec

intérieur en étoupe, ainsi que boucles en fer pour bourreliers, même étamées, nickelées, ou bronzés.

238. Fil gros, de chanvre ou de pite, et cordonnet de ces matières, employé dans les pêcheries.

239. Fil de caret.

240. Fer-blanc et tôle de fer, en articles de toute sorte non dénommés, et ustensiles en fer pour usage domestique, munis de couvercles en fer-blanc ou en tôle.

241. Encens.

242. Outils pour les arts et métiers, avec ou sans manches, tels que: alicates, burins, compas, vrilles, truelles, bédanes et ciseaux de menuisiers, niveaux, gouges, varlopes, herminettes, guillaumes, alènes, limes, marteaux, scies à bras et à main, tenailles et pinces, tours et étaux.

243. Savon pour tailleurs.

244. Sirop de toute sorte, autres que les sirops médicinaux, confiseries de toute espèce, sucre candi et fécule de riz aromatisée employée dans la fabrication des bonbons.

245. Cire à cacheter en pains ou en bâtons.

246. Laine brute, ainsi que grosse et petite toile à voiles écrue, de lin ou de coton.

247. Lait condensé.

248. Livres imprimés, reliés à l'exception des livres dénommés à la classe VIII.

249. Faïence, imitation de porcelaine.

250. Porcelaine et porcelaine de Chine, sous toutes formes non dénommées.

251. Houblon.

252. Bois manufacturé en articles de toute sorte non dénommés.

253. *Manígrafos.*

254. Meubles en fer et en bois.

255. Marbre, jaspe, albâtre, granit et toutes autres pierres analogues, ouvrées ou polies, en articles de toute sorte non dénommés.

256. Maïzena.

357. Mèches tissées ou tordues pour lampes et écouvillons pour verres de lampes.

258. Moutarde en grains ou en poudre.

259. Meubles en bois ordinaire, en osier, en paille ou en jonc.

260. Orgues et parties quelconques d'orgues importées séparément.

261. Ostéine et oléomargarine.

262. Bois débité pour allumettes.

263. Tamis en bois avec fond en tissu de lin.

264. Pâte ou mastic pour polir, ainsi que pour queues de billard.

265. Papier peint pour tapisser, y compris le papier noir et le papier albuminé.

266. Composition imitant la porcelaine, le marbre, le granit ou toute autre pierre fine, en toute espèce d'objets, autres que jouets d'enfant.

267. Papier à cigarettes non dénommé, même lorsqu'il porte imprimé ou lithographié le nom du fabricant ou de la fabrique auxquels il est destiné.

268. Pierres à feu, pierres de touche ou à polir et autres semblables, non dénommées dans les autres classes.

269. Peaux non tannées et non manufacturées.

270. Pelles entièrement en bois.

271. Soudures.

272. Procédés pour queues de billard.

273. Fromages de toute sorte.

274. Sacs vides, en canevas, en toile dite "coleta," en toile écrue et autres tissus similaires.

275. Saucissons, saucisses, jambons en boîtes, poissons en boîtes, conserves alimentaires, champignons secs ou en sauce, farine lactée et tous autres comestibles pré-

parés ou non, non dénommés dans les classes antérieures, tels que la pâte agglutinée de Buitoni et la phosphatine.

276. Sauces de toute sorte et pickles à la moutarde.

277. Suif en masses, fondu ou pressé, et graisses ordinaires de toute sorte pour la fabrication du savon.

278. Siphons et appareils à eaux gazeuses.

279. Cuir à semelles, teint ou non, non ouvré, et semelles de chanvre ponr espadrilles.

280. Tabourets de pianos, quelle que soit la matière dont ils sont fabriqués.

281. Talc en feuilles ou en poudre.

282. Fils de crin pour pêcher.

283. Couvre-plats en toile métallique.

284. Couvercles avec bouton de métal, de verre, de cristal ou de porcelaine.

285. Tissus de coton, de chanvre, de sparte ou de lin, pour étendre sur les parquets, même lorsque ces tissus sont mélangés avec un peu de laine, et tissus de crin pour recouvrir les meubles.

286. Toiles préparées pour peinture à l'huile et estompes pour dessin.

287. Tissus ordinaires, de chanvre, lin ou coton, pour meubles, en bandes, sangles, etc., torchons de coton pour usages domestiques, et rubans en paille pour emballer.

288. Talons en bois, avec ou sans renfort en cuivre ou en fer.

289. Bandes d'étoffe ou de papier étamé (de papel estañado), pour la chaussure, de 1 centimètre de large sur 12 de long.

290. Tire-bottes et tire-bouchons.

291. Craie en pains, en tablettes ou sous une autre forme, pour billards.

292. Stores et jalousies pour portes et fenêtres.

293. Pétards dits *triquitraques* , et fulminate pour cosaques ou papillotes à pétard.

294. Tuyaux ou manches en caoutchouc et bandes en caoutchouc pour courroies de machines.

295. Voiles en grosse et petite toile ou en cotonnade (cotonia), pour embarcations.

296. Chandelles.

297. Vélocipèdes ou bicyclettes.

298. Verre ou cristal, ouvrés en articles de toute sorte non dénommés.

299. Vins de toute sorte, importés en boutillons ou en bouteilles, autres que les vins médicinaux.[a]

300. Articles de toute sorte en plâtre, autres que les jouets d'enfants.

SECTION 5.

Classe V.—Marchandises taxées à raison de 1 bolivar 25 centimes par kilogramme.

301. Huile de foie de morue, bulle d'épurge, huiles médicinales autres et toutes huiles non dénommées.

302. Huiles et savons parfumés.

303. Arsenic.

304. Acide tartrique en poudre.

305. Ammoniaque liquide.

306. Eaux de senteur pour la toilette et pour laver les cheveux, telles que la florilina et autres analogues, ainsi que les eaux pour nettoyer les métaux.

307. Eau-de-vie de toute sorte, brandy ou cognac et leurs essences, absinthe, genièvre et leurs essences titrant jusqu'à 22 degrés Cartier, sous réserve d'être tarifées en

---

[a] Par décret du 1er juillet 1902, et à partir de cette date, les vins rouges de toute sorte, importés en boutillons et bouteilles, seront rangés dans la troisième classe du tarif, sauf le vin de Porto, même rouge, qui, importé en boutillons ou bouteilles, sera rangé dans la quatrième classe (Gaceta oficial du 1er juillet 1902).

proportion si elles titrent davantage. Sont également rangés dans cette classe les amers non dénommés, tels que l'élixir amer de coca.

308. Amandes mondées.

309. Conformateurs pour chapeliers.

310. Appareils de photographie et accessoires destinés à leur fabrication et non rangés dans d'autres classes.

311. Carcasses ou formes en toile apprêtée, pour chapeaux, bonnets et casquettes.

312. Anneaux et boucles recouverts de cuir.

313. Cuirs à rasoirs, pierres fines pour repasser les rasoirs et pâte pour le même usage.

314. Safran.

315. Mercure.

316. Malles, sacs de nuit, sacoches et valises de toute sorte pour voyageurs.

317. Outres pour vins et sacs et sachets en toile cirée pour échantillons de grains.

318. Bandages, bougies ou sondes, suspensoirs, charpie, manches ou filtres, biberons et bouts de sein, tétines, tire-lait, ventouses, colliers anodins, spatules, lancettes, cornues, clysopompes, seringues de toute sorte et siphons non denommés.

319. *Bramante*, *brin*, coutils, drills, toile de ménage, *liencillo*, *platilla*, *warandol* ou irlande, écrus, de lin ou de coton, et autres tissus écrus similaires, même avec raies ou fleurs de couleur, pourvu que le fond soit écru, et hollandille de fil, noire ou bleue.

320. Brosses et pinceaux de toute sorte.

321. Étuis à chapeaux, en cuir.

322. Calendriers de toute sorte.

323. Chambres claires ou noires, pour dessin ou photographie, et autres appareils similaires.

324. Canevas de coton, pour broder, et canevas de fil écru, semblable au tulle ordinaire pour les moustiquaires.

325. Capsules, sacs ou sachets, en papier, de toute sorte et de toute grandeur, avec ou sans inscriptions, pour pharmacies.

326. Écaille brute.

327. Toile de ménage, toile dite *coleta*, blanche, toile de rose, *lomo de camello*, créas de coton et tissu de fil appelé *créas* écrue allemande, des n^{os} 9, 10 et 11, doublure (crehuela) rayée ou quadrillée, de couleur ou non, et toutes autres toiles semblables non dénommées dans les classes antérieures.

328. Tamis en fil de cuivre, en cuir, en bois ou en crin.

329. Brosses à dents, à cheveux, à habits, à chaussure et pour tout autre usage, à l'exception des brosses dénommées à la classe IV.

330. Cire blanche, pure ou mélangée, non ouvrée, et cire minérale.

331. Soies de sanglier, pour cordonniers.

332. Colle de poisson et colle liquide pour cordonniers.

333. Couleurs et peintures non dénommées, telles que bleu d'outre-mer et *kalsomine*, terres de différentes couleurs et couleur à l'huile employée comme émail.

334. Liège en planches, en bouchons ou en tous autres articles.

335. Cordons pour souliers et tresses ordinaires en coton pour espadrilles, ainsi que cordons et cordonnets de lin ou de coton, retors ou non, suivant l'usage auquel ils sont destinés, à dix bouts ou plus.

336. Améthystes.

337. Cubèbe.

338. Canifs, rasoirs, ciseaux et *chambetas*, couteaux et fourchettes, excepté ceux dont le manche est recouvert d'une plaque d'or ou d'argent, qui acquittent les droits de la classe VIII, et ceux en argent allemand ou argentés ou dorés, qui sont rangés dans la classe VI.

339. Cordes simples ou filées pour instruments de musique.

340. Bière concentrée ou peptonisée.

341. Écorce de sassafras et toutes autres écorces médicinales.

342. Drill de coton, blanc ou de couleur, drill dit *casinette* de coton, flanelle blanche de coton, *batan* de coton et tissus pelucheux blancs ou écrus, pour peignoirs de bains, essuie-mains ou serviettes.

343. Drogues, médicaments et produits chimiques non dénommés antérieurement, ainsi que tous vermifuges et tous autres articles ou substances médicinales, tels que bicarbonate de soude, vin de *buey*, vin de quinquina de Bisteri, semences et plante de cardamome; drogues, médicaments et produits chimiques brevetés, non dénommés, et dynamite.

344. Toiles cirées sous toutes formes, autres que pour parquets, emballages et toiture rangées dans la classe IV.

345. Bougran de coton.

346. Balais grands et petits et balais en crin.

347. Essences et extraits de toute sorte non dénommés.

348. Éponges.

349. Stéréoscopes, cosmoramas, dioramas, panoramas, lanternes magiques, phonographes, graphophones et tous autres appareils analogues.

350. Lanternes en papier, faux-cols, devants de chemises et manchettes, en papier y compris ceux qui sont doublés de tissu, et articles en papier non dénommés.

351. Fleurets, masques, plastrons et gants pour l'escrime.

352. Allumettes de toute sorte non dénommées et phosphore en pâte.

353. Photographies.

354. Couvertures en coton.

355. Couvertures en laine blanche ou avec franges en couleur, et couvertures foncées en poil de chèvre (cabrin).

356. Gomme-laque, résine de copal et toutes espèces de gommes ou de résines non dénommées.

357. Gants de crin et gants d'escrime.

358. Glycérine.

359. Fil à coudre ordinaire, fil non tordu pour broder et fil non tordu à un bout pour métiers à tisser.

360. Aimants.

361. Figurines ou statuettes, autres qu'en or ou en argent et mannequins mécaniques de grandeur naturelle.

362. Instruments de musique et boîtes à musique ou leurs parties accessoires quelconques, excepté les orgues et les pianos.

363. Instruments de chirurgie, de dentiste et d'anatomie, de mathématiques et autres sciences, non dénommés antérieurement.

364. Savon blanc jaspé, appelé de Castille ou de Marseille.

365. Savon ordinaire, poudre de savon et sel gemme pour le bétail.

366. Jeux d'échecs, de dames, de dominos, de roulette et autres similaires, ainsi que cartes à jouer de toute sorte.

367. Images ou gravures sur papier.

368. Livres ou livrets en blanc, crayons et fusains pour le dessin, agendas et portefeuilles, carnets à souche lithographiés pour quittances, crayons de toute sorte, excepté ceux pour ardoises, gomme à effacer, cachets et timbres pour lettres, encre et poudre d'encre, coupe-papier, porte-mines, cire et pains à cacheter, sable, plumes en acier, porte-plumes, encriers et tous autres articles de bureau, à l'exception des enveloppes de lettres et des objets ayant quelque partie d'or ou d'argent.

369. Livrets de feuilles d'or ou d'argent fins ou faux, pour dorer ou argenter, bronze en poudre et livrets pour bronzer.

370. Caves à liqueur, vides ou contenant une liqueur.

371. *Liencillo*, brin et toile de ménage, écrus ou de couleur, en fil ou en coton.

372. Limaille de fer.

373. Tissus à raies, *arabias* et guingans, de lin ou de coton, ordinaires, c'est-à-dire ayant jusqu'à 13 fils de chaîne ou de trame dans un carré de 5 millimètres.

374. Baguettes, moulures et galeries en bois, peintes, vernies, dorées ou argentées, et porte-embrasses ou patères en bois, pour soutenir les rideaux.

375. Cotonine de couleur et tresses en tissu ordinaire de lin, de coton ou de laine, ayant de 7 à 15 centimètres de largeur, pour sangles et surfaix.

376. Liqueurs douces, telles que *Sherry cordial*, crème de vanille, de cacao et autres similaires.

377. Madapolam, Bretagne, toile de ménage, *matrimonio* de coton, Irlande, *créas*, *elefante*, *platilla*, *liencillo*, *simpatico*, *savaje*, hollandille blanche et tous autres tissus de coton, blancs, similaires.

378. Cadres de toute matière, avec ou sans verre, avec ou sans estampes, portraits, images et gravures.

379. Masques de toutes sortes.

380. Macaroni, nouilles, vermicelles et toutes autres pâtes alimentaires semblables.

381. Mesures en cuir, tissu ou papier, avec ou sans étuis.

382. Meubles en bois fin, tel que palissandre, acajou, bois de rose et de noyer; meubles avec dossier et siège recouverts de crin, laine, coton ou soie, meubles en bois ordinaire, dorés, et cercueils de toute sorte.

383. Noix de galle, noix muscades et fleur de noix muscades ou macis.

384. Abat-jour en métal, papier ou tissu.

385. Pastilles de gomme, de toute sorte.

386. Parfumerie de toute espèce et livrets parfumés de papier poudré.

387. Parchemin et imitations de parchemin, en articles non dénommés; toiles employées uniquement pour la reliure; tissus de coton combiné avec du caoutchouc, imperméables, pour couvertures et pardessus d'hiver, et feutre de coton pour machines à lithographier.

388. Pèse-liqueurs ou aréomètres de toute sorte, ainsi qu'alcoomètres.

389. Tableaux, chromos, dessin et portraits, sur toile, bois, papier, pierre ou autre matière; annonces lithographiées collées sur carton, et cartes avec paysages ou sujets en couleur, pour baptême.

390. Papier de soie et papier à lettres avec en-têtes, même s'il est destiné à un usage particulier.

391. Porte-bouteilles et porte-verres.

392. Poudre à feu.

393. Tabac haché pour cigarettes, assujetti en outre à une surtaxe de 2 bolivars par kilogramme.

394. Tanin.

395. Thé et vanille.

396. Encre de Chine, teintures pour les cheveux et autres encres de toute sorte non dénommées.

397. Bougies de blanc de baleine, de paraffine, de composition ou stéariques, et mèches tordues pour leur fabrication.

398. *Warandol* écru, de lin ou de coton, même avec raies ou fleurs de couleur, y compris celui à fond gris plomb ou jaune clair.

399. Briquets et amadou ou mèches à briquets.

SECTION 6.

Class VI.—Marchandises taxées à raison de 2 bolivars 50 centimes par kilogramme.

400. Verroterie, perles et grains de verre, de porcelaine, d'acier, de bois ou de toute autre matière que l'or et l'argent; ornements pour cercueils; articles de fantaisie en verre ou en porcelaine avec garnitures en métal doré ou argenté; plantes arti-

ficielles en caoutchouc, papier et tissu, représentant des palmiers, des bégonias et de grandes feuilles, et bonbonnières recouvertes de soie ou de velours ou garnies de fleurs ou d'autres articles soumis à des droits plus élevés que ceux applicables à la Classe IV.

401. Acier recouvert ou non, pour crinolines et tournures.

402. Toile damassée, toile de Bretagne, bramante, coutil, créas, excepté la créas écrue allemande des Nos. 9, 10, et 11 dénommée à la Classe V, damas, drill blanc ou de couleur, *estopilla*, *estrepe*, fleuret, *garantido*, Irlande, *platilla*,, rouennerie et *warandol* blanc ou de couleur, ainsi que tout tissu analogue, de lin pur ou mélangé de coton.

403. Epingles, aiguilles, œillets, épingles à cheveux, agrafes pour vêtements et pour chaussure, crochets en zinc pour chaussure, boucles pour chapeaux, gilets, pantalons, chaussure, ainsi que pour bourreliers, autres qu'en or et en argent.

404. Tapis en pièces et carpettes.

405. Camisoles, écharpes, bonnets, chaussettes, caleçons, pantalons, bas et cache-corsets en tricot de coton et tissus de même espèce. Les camisoles avec cols et manchettes, ou auxquelles on peut adapter des cols ou des manchettes faux, acquittent une surtaxe de 50 pour cent.

406. Lunettes, besicles, jumelles ou binocles, longues-vues, loupes, télescopes et microscopes, excepté ceux avec garniture d'or et d'argent, y compris les verres ou lentilles pour lunettes, etc., importés séparément.

407. Fanons de baleine et leurs imitations.

408. Basanes et peaux tannées non ouvrées, à l'exception du cuir à semelles blanc ou de couleur rangé dans la Classe IV.

409. Baromètres, hygromètres, chronomètres, thermomètres, sextants, octants et autres instruments similaires, et boussoles de toute sorte.

410. Cannes, fouets, cravaches et armes défensives, à l'exception des cannes à épée ou à feu qui suivent le régime de la Classe VII.

411. Boutons de toute sorte, excepté les boutons en soie, en argent ou en or.

412. Bayette, petite bayette et ratine, en pièces ou plaids, et couvertures faites avec ces tissus.

413. Fourneaux de pipes, fume-cigares et pipes, en ambre, porcelaine et toute matière autre que l'or et l'argent, à l'exception des articles similaires dénommés à la classe III.

414. Boîtes avec accessoires pour la barbe; nécessaires à ouvrage et nécessaires de voyage.

415. Coquilles et coquillages, même ouvrés en articles d'ornement.

416. Portefeuilles, blagues à tabac, porte-cartes, porte-monnaies, porte-cigares, étuis à lunettes, boîtes à allumettes, albums sans couverture en velours, ni dorés ni argentés, et tous autres articles similaires, excepté ceux qui ont quelques parties en or ou en argent.

417. Cire ouvrée en articles de toute sorte, excepté les jouets d'enfants.

418. Courtes-pointes, draps-de-lit, plaids, hamacs, couvertures et tapis de table, en lin ou en coton.

419. Élastiques pour chaussures.

420. Corail en articles de toute sorte, autres que ceux montés sur or ou sur argent.

421. Couronnes et autres articles funéraires analogues.

422. Cordonnet de lin ou de coton, blanc ou de couleur, retors ou non, ayant moins de 10 bouts, ainsi que fil tors en forme de cordonnet mince, tel que le fil à relier ou à coudre les voiles, qui, par son élasticité, ne peut être assimilé à du cordon et peut être employé pour la fabrication des tissus à la main ou à la machine.

423. Crinolines, tournures et autres articles du même genre, et cordons en caoutchouc recouverts ou non, employés à l'intérieur des vêtements de femmes.

424. Couteaux et fourchettes, avec manche en métal allemand ou blanc, ou argenté, ou doré.

425. Matelas, sommiers, oreillers et traversins, non en soie, duvet pour les rembourrer et toile métallique manufacturée pour fonds de lits.

426. Cordes en coton pour hamacs.

427. Damas, *coqui*, bombasin, *bordon* ouaté, coutil, damassé, mahon, nankin, nankin léger, *estrepe*, piqué, satinette, *tangep* ou linon apprêté, en coton blanc ou de couleur, et tous autres tissus de coton similaires, non dénommés dans d'autres classes.

428. Dés à coudre, excepté ceux en or ou en argent, ainsi que dents et yeux artificiels.

429. Jupons, jupes, robes de chambre ou matinées, et blouses de coton, confectionnés ou en coupons, et tissus de coton façonnés pour jupons avec ou sans bandes brodées.

430. Articles en métal allemand ou blanc et ses imitations, tels que: cabarets, plateaux, mors, muselières, éperons, étriers, charnières, boucles, lustres, lampes, candélabres et autres articles similaires.

431. Objets en fer ou en autres métaux dorés ou argentés, à l'exception des articles de bureau qui seront toujours compris dans la classe V, même s'ils sont dorés ou argentés.

432. Fil d'estame brut et poil de chèvre.

433. Nécessaires avec menus objets d'acier, cuivre, ou autre métal, pour broder, pour les dents ou les ongles, pour le dessin et la peinture.

434. Balais, brosses et écouvillons, en palmier, jonc ou autre matière végétale.

435. Feutre en pièces, pour housses de cheval.

436. Plaids de laine pure ou mélangée de coton, avec fonds d'une ou de plusieurs couleurs, et couvertures de lit en laine pure ou mélangée de coton, également de couleur.

437. Tissus pour pantoufles, autres qu'en soie.

438. Élastiques pour chaussures.

439. Gutta-percha ouvrée ou non et galoches en caoutchouc.

440. Fil d'or ou d'argent faux, cannetille, paillettes, clinquant, oripeaux, lamelles, galons, passementerie ou toutes autres fournitures d'or ou d'argent faux, pour broder ou coudre.

441. Os, ivoire, nacre, jais et ses imitations, écaille et ses imitations, caoutchouc, gomme élastique, plaques de celluloïd, corne et talc, en articles de toute sorte non dénommés, à l'exception des jouets d'enfants fabriqués avec ces matières, qui sont rangés dans la classe III, et des articles ayant quelque partie en or ou en argent, qui sont compris dans la classe VIII.

442. Nappes, essuie-mains et serviettes de toute sorte.

443. Tissu *matrimonio* en lin pur ou mélangé de coton.

444. Aiguilles, clefs, ressorts, spiraux et autres pièces de mouvements d'horlogerie à l'exception de celles en or ou en argent.

445. Mèches (pabilo) et coton légèrement filé pour mèches.

446. Mouchoirs en coton, ne dépassant pas 1 mètre de côté.

447. Papier doré ou argenté, papier estampé en relief et papier peint pour fleurs artificielles.

448. Parapluies, ombrelles et parasols, en laine, lin ou coton.

449. Perles et pierres fausses, non montées ou montées sur tout autre métal que l'or et l'argent.

450. Poudre de riz et autres similaires pour la toilette, telles que la poudre de *caracol* calcinée de Perse. Sont également rangées sous ce numéro les houppes à poudre de riz.

451. Métal allemand en articles de toute sorte non dénommés.

452. Plumes d'oie préparées pour cure-dents.

453. Plumeaux.

454. Bijouterie fausse.

455. Pendules et cartels, réveille-matin, clepsydres, sabliers et autres articles similaires, à l'exception des montres, ainsi que des horloges publiques importées par le Gouvernement national et rangées dans d'autres classes.

456. Chapeaux, casquettes, casques et coiffures dites *pavitas*, en paille ou ses imitations, sans aucun ornement.

457. Cuir verni non manufacturé.

458. Tabac en carottes (hueva), tabac tordu à mâcher et papier à cigarettes en rouleaux ou en tuyaux cylindriques pour la fabrication des cigarettes égyptiennes.

459. *Warandol* blanc, de lin pur ou mélangé de coton.

460. Indiennes, nanzouk, calicots, cretonnes, tarlatanes, brillantés, tissus rayés, ayant plus de 13 fils de chaîne ou de trame dans un carré de 5 millimètres, popeline, *malvinas*, japonaises, lustrines, percales de couleur et tous autres tissus de coton de couleurs similaires, non dénommés dans d'autres classes, tels que le mérinos de coton et la flanelle de coton de couleur.

SECTION 7.

Classe VII.—Marchandises taxées à raison de 5 bolivars par kilogramme.

461. Éventails de toute sorte.

462. Manteaux et capelines (sereneras) de laine pure ou mélangée de coton.

463. Camisoles de laine pure ou mélangée de coton.

464. Cannes à épée ou avec armes à feu.

465. Bourses en lin ou en coton.

466. Chaussettes, bas, franges, glands, dentelles, rubans, bandes, cordons, passementerie, peluches, bonnets, ceintures, nœuds, épaulettes, chaussons et gants, en laine pure ou mélangée de coton.

467. Chaussures en coupons ou sans semelles, autres qu'en peau, et tapis en peau de mouton.

468. Bouts en cuir pour espadrilles.

469. Carpettes, tapis et tous autres articles au crochet, à l'exception de ceux en soie.

470. Chasubles, bourses pour corporaux, nappes d'autel, chapes, dalmatiques, étoles, manipules, corporaux, bandes et autres ornements sacerdotaux et à l'usage des églises.

471. Rideaux, tentures et moustiquaires, en lin ou en coton.

472. Dentelles, bandes brodées, blondes, entre-deux, rubans, bordures, épaulettes, glands, cordons, franges, chaussons, écharpes, tresses, gants et passementerie, de lin ou de coton.

473. Épées, sabres, poignards et couteaux fins de chasse, tromblons, pistolets, revolvers, fusils de chasse, mousquetons, fusils de guerre, rifles, carabines et autres armes d'artillerie ou d'infanterie, ainsi que leurs projectiles, capsules et amorces à leur usage; cheminées, platines, cartouches chargées ou vides et tout ce qui se rapporte aux armes blanches ou à feu, ainsi que les armes à air comprimé pour tirer à la cible.

474. Allumettes pyrotechniques ou à feu de Bengale.

475. Feux d'artifice.

476. Housses et tapis de selle, de toute sorte.

477. Chaussettes en lin pur ou mélangé de coton, et chaussettes en coton tordu dit fil d'Écosse.

478. Poires à poudre et sacs à plomb, boîtes à capsules, gibecières ou carniers de chasse.

479. Mousseline, crépon de coton blanc et de couleur, linon, gaze de coton dite *rengue*, barège, grenadine, organdi, zéphire, toile de lin dite *clarin*, *dulce sueno*, tarlatane, *imité*, batiste de Hollande, petite batiste de coton, blanche ou de couleur, unie, ouvragée, à jour ou brodée, en pièces ou en coupons pour vêtements, et tous autres tissus semblables non dénommés.

480. Mousseline et batiste de lin pur ou mélangé, écrue ou de couleur, en pièces ou en coupons pour vêtements.

481. Panne, *panilla* et peluche de coton, imitation de velours, en pièces ou en rubans.

482. Drap ordinaire ou de fantaisie, casimir, cassinette, mousseline, satin, tricot, flanelle, *lanilla*, alépine, alpaga, *cambron*, mérinos, serge, lasting, damas et tous autres tissus de laine pure ou mélangée de coton, non dénommés dans d'autres classes, à moins qu'ils ne soient confectionnés en vêtements, ce qui les soumettrait au régime de la classe IX.

483. Châles, grands et petits, foulards et fichus, en mousseline, linon, tricot ou autre tissu fin de coton, ainsi que tissus de ramie même mélangée de coton.

484. Mouchoirs, châles, grands et petits, foulards, tapis de table, en laine pure ou mélangée de coton, sans ornements ou broderies en soie.

485. Parapluies, en-cas, ombrelles et parasols, de soie pure ou mélangée de laine ou de coton.

486. Peaux tannées, ouvrées sous toutes formes, non dénommées dans d'autres classes.

487. Guipure ou tulle de coton ou de pite, tissu de deuil élastique ou crêpe pour chapeaux.

488. Selles, têtières, fontes à fusil ou à pistolet, brides, sangles, croupières et couvertures de cheval de toute espèce en peau de mouton.

489. Tabac brut et côtes de tabac.

SECTION 8.

Classe VIII.—Marchandises taxées à raison de 10 bolivars par kilogramme.

490. Ornements pour la tête et résilles de toute sorte.

491. Cheveux et leurs imitations, ouvrés ou non.

492. Chemises confectionnées en coton, sans aucune partie en lin.

493. Cigarettes roulées dans du papier ou des feuilles de maïs.

494. Cravates en coton, crin ou laine.

495. Bretelles, corsets, ceintures, cache-corsets et jarretières, de toute sorte.

496. Jupons, jupes, robes de chambre ou matinées, gros jupons, taies d'oreiller, blouses, de lin pur ou mélangé de coton, excepté ceux en batiste de lin pur ou mélangé de coton qui suivent le régime de la classe IX.

497. Fleurs et fruits artificiels, non dénommés, et tournitures pour la fabrication des fleurs, à l'exception du papier peint employé à cet usage, qui est rangé dans la classe VI.

498. Gants de peau, excepté les gants d'escrime qui suivent le régime de la classe V.

499. Batiste de Hollande, tissu clair (clarin), tricot, zéphire, linon, tarlatane, mousseline et tous autres tissus fins de lin pur ou mélangé de coton, ouvrés en articles tels que fraises, ruches, bonnets d'enfants, jupes, manchettes, chemisettes et autres objets et ornements non dénommés dans d'autres classes.

500. Livres et albums, dans la reliure desquels entrent du velours, de la soie, de la nacre, de l'écaille, de l'ivoire, du cuir de Russie ou des filets ou ornements dorés ou argentés.

501. Mouchoirs en lin pur ou mélangé de coton.

502. Reliures pour livres, importées séparément, et couvertures mobiles pour livres.

503. Plumes d'ornement pour chapeaux et bonnets et autres usages similaires, et pauaches pour corbillards importés séparément des voitures.

504. Tissus de toute matière, mélangés ou brodés avec de l'or ou de l'argent fins ou faux, à l'exception des ornements sacerdotaux et à l'usage des églises compris dans la classe VII.

505. Tissus de laine pure ou mélangée de coton, preparés pour moustiquaires, tentures, rideaux et autres articles non dénommés antérieurement.

506. Tabac manufacturé et preparé sous toutes les formes, non dénommé. Sont également rangées dans cette classe, les cigarettes roulées dans une feuille de tabac.

507. Cartes-annonces (grandes) imprimées ou lithographiées.

508. Tarlatane, soie, laine, batiste de Hollande, tissu clair (clarin), zéphire, linon, mousseline et tous autres tissus de lin ou de coton, confectionnés en vêtements pour dames.

509. Vêtements de laine, de coton ou de lin, pour hommes, excepté ceux dénommés dans d'autres classes.

SECTION 9.

Classe IX.—Marchandises taxées à raison de 20 bolivars par kilogramme.

510. Chemises confectionnées, en lin ou laine, et chemises en coton ayant une partie quelconque en lin; pantalons, jaquettes, blouses, gilets, caleçons, paletots, vestons, redingotes et tous autres vêtements confectionnés pour hommes, en lin ou coton, non dénommés dans d'autres classes.

511. Cols, devants de chemises et manchettes, en lin ou coton, pour hommes et femmes.

512. Hamacs en filet, de toute sorte.

513. Affiches et annonces sur carton et feuilles volantes, imprimées ou lithographiées.

514. Boîtes pour le conditionnement des cigarettes.

515. Chaussures confectionnées et peaux tannées préparées pour chaussures.

516. Jupons, jupes, gros jupons, taies d'oreiller et matinées, en batiste ou tissus clair de lin (clarin), purs ou mélangés de coton.

517. Étiquettes et prospectus imprimés ou lithographiés, n'adhérant à aucun objet, et cartes de visites imprimées avec ou sans dessins en couleur.

518. Joyaux, perles, bijoux, pierres et objets précieux, articles en or et en argent et articles fabriqués en partie avec ces métaux; montres de toute matière et boîtes ou écrins vides pour montres ou autres objets précieux, même importés separément.

519. Drap ordinaire ou de fantaisie, casimir, satin, tricot, flanelle, alépine, alpaga, *cambron*, serge, lastings et damas, de laine pure ou mélangée de coton, en vêtements confectionnés pour hommes.

520. Soie pure ou mélangée d'autre matière et tissus d'autres matières mélangées de soie.

521. Enveloppes à lettres, achevées entièrement ou partiellement, de toute sorte.

522. Chapeaux, bonnets, toques et casquettes, avec ornements, pour dames ou enfants.

523. Chapeaux en peluche de soie noire, hauts de forme, et autres chapeaux de même forme, de toute matière, y compris les gibus, les chapeaux simplement coupés, les feutres foulés et toute autre espèce de chapeaux finis, ou à moitié finis, à l'exception seulement des chapeaux de paille et de leurs imitations.

ART. 2. Les droits de douane sont perçus d'après le poids brut.

ART. 3. Sont exempts à l'importation les articles suivants:

1° Articles importés pour le compte de l'État.

2° Animaux vivants, à l'exception des sangsues.

3° Effets que les ministres étrangers importent pour leur usage particulier, et effets que les agents diplomatiques de la République apportent avec eux à leur retour au Vénézuéla.

4° Bagages des voyageurs, à l'exception des objets qui n'ont pas servi et des meubles qui, lorsqu'ils ont servi, acquitteront les droits qui leur sont applicables en vertu de la présente loi, avec une réduction proportionnelle à la dépréciation qu'ils ont subie par suite de l'usage. Quant aux effets neufs importés dans les bagages, ils seront assujettis à une surtaxe de 20 pour cent, et la surtaxe sera de 30 pour cent en sus s'ils proviennent des Antilles.

5° Glace importée dans les localités où il n'existe pas de fabriques de glace établies moyennant autorisation du Gouvernement, ou s'il en existe, si ces fabriques ne sont pas en activité; charbon minéral et charbon pour la production de la lumière électrique à arc, gaz acétylène et trisulfite de chaux.

6° Produits originaires de la Colombie, introduits par les frontières de ce pays, à condition qu'il y ait réciprocité.

7° Échantillons de tissus en petits coupons, en quantité ne dépassant pas 25 kilogrammes, échantillons de papier de tenture dont la longueur ne dépasse pas 50 centimètres, ainsi qu'échantillons de tous autres objets, pourvu que, par leurs dimensions ou pour toute autre raison, ils ne soient pas susceptibles d'être mis en vente.

8° Or en monnaie légale.

9° Ébauche, fonds ou chaudières en fer, grilles, cylindres et appareils à broyer la canne, ainsi que leurs axes, armatures et autres pièces accessoires.

10° Charrues et socs de charrues, houes, bêches, *chicuras*, *chicurones*, sarcloirs, haches, pelles en fer, pics, *tasies*, serpettes, avec ou sans manche en bois, et *machetes* pour élaguer, ordinaires.

11° Fil métallique pour clôtures, avec ronces artificielles ou dans la forme définie par l'ordonnance du 13 juin 1894, et crochets pour le fixer.

12° Machines à imprimer et accessoires de typographie, tels que caractères, interlignes, encre spéciale, y compris l'encre pour lithographes; papier blanc d'impression non collé, ainsi que la pâte de papier pour faire les clichés et l'alliage de plomb et d'aluminium employé dans la stéréotypie.

13° Machines destinées à l'agriculture et à l'exploitation des mines, au tissage, aux scieries et aux fonderies, non dénommées dans les autres classes ainsi que les pièces, de rechange destinées aux appareils à broyer la canne et aux machines agricoles.

ART. 4. Est prohibée l'importation des articles suivants:

Huile de coco, amidon, indigo, cacao, café, mélasse, vesou et miel, viande salée ou *tasajo*, sel, racine de salsepareille, monnaie d'argent, de nickel et de cuivre, appareils à frapper la monnaie, à moins qu'ils ne soient importés pour le compte de l'État.

SECTION UNIQUE. Si le Pouvoir Exécutif juge opportun d'autoriser l'importation par les douanes de la République de quelque article prohibé, il fixera le droit dont cet article devra être frappé, et il en rendra compte au Congrès à sa première réunion.

ART. 5. Le Pouvoir Exécutif pourra prohiber totalement ou partiellement l'importation d'articles en tissu de toute sorte, de vêtements confectionnés et de chapeaux de toute sorte, de bonnets, toques et casquettes et en interdire l'entrée par les douanes de la République dans le ressort desquelles les industriels et ateliers s'occupant de la fabrication de ces articles ont pris une importance et un développement suffisant pour faire face aux besoins de la consommation, sans que les acheteurs aient à souffrir de cette mesure de prohibition.

ART. 6. Pour l'importation par les douanes de la République des armes à feu frappées de droits, de la poudre, de la dynamite, du plomb, des capsules, des amorces, des pierres à fusil, du salpêtre et de toutes autres matières explosibles non dénommées dans la présente loi, il faudra l'autorisation préalable et l'ordre du Gouvernement national.

SECTION UNIQUE. Les armes de précision et tous les engins de guerre exclusivement destinés au matérial des parcs d'artillerie ne peuvent être importés que par le Gouvernement national.

ART. 7. Pour les articles dénommés dans le tarif, on ne tiendra pas compte de la matière dont ils se composent, mais de la classe dans laquelle ils sont rangés. Ainsi les bandages, seringues, clysopompes, jouets d'enfants, masques, lunettes, portefeuilles, porte-cartes et autres articles dénommés payent les droits de la classe à laquelle ils appartiennent, quelle que soit la matière dont ils sont fabriqués, à moins qu'ils n'aient des parties en or ou en argent, ce qui les ferait rentrer dans la classe VIII.

ART. 8. Les colis qui renferment des échantillons de tissus en petits coupons et des échantillons de papier de tenture, pesant plus de 28 kilogrammes, payeront, pour le poids excédant 25 kilogrammes, les droits de la classe III.

ART. 9. Lorsque l'on introduira des marchandises ou autres articles manufacturés soumis au payement des droits d'importation, et que ces articles seront inconnus dans le pays ou ne seront point dénommés dans le tarif ni mentionnés dans des décisions plus récentes du Ministère des Finances, les importateurs devront relater ce fait dans leurs manifestes et adresser au Gouvernement une requête examinée par la douane respective et accompagnée d'un échantillon, afin de permettre d'attribuer à ces articles la dénomination ou la classification qui leur est propre.

ART. 10. Les machines, outils et autres instruments pour l'exploitation des mines ne jouissent de l'exemption des droits d'importation qu'une seule fois pour chaque société minière, et les pièces de rechange importées pour remplacer celles qui sont entrées antérieurement en franchise ne jouiront plus de l'exemption.

ART. 11. Ne pourront être dédouanées que moyennant l'ordre du Ministre des Finances les marchandises bénéficiant de la franchise à l'entrée en vertu de contrats ou de lois en vigueur.

ART. 12. Les objets de provenance étrangère n'ayant pas servi, que les passagers importent dans leurs bagages, acquitteront 20 pour cent en plus du droit qui leur est applicable d'après le tarif.

ART. 13. Le Pouvoir Exécutif est autorisé à diminuer ou à supprimer certaines taxes du présent tarif, lorsque des circonstances imprévues rendront nécessaires ces modifications, et il devra rendre compte au Congrès des mesures qu'il aura cru devoir adopter.

ART. 14. Si des articles susceptibles d'être démontés sont importés dans cet état en un seul colis ou dans des colis distincts, ils acquitteront les droits applicables à ces articles quand ils sont importés non démontés.

ART. 15. Sont abrogés le décret du Pouvoir Exécutif du 10 octobre 1900, ainsi que toutes les décisions postérieures relatives à la tarification des marchandises étrangères.

BIBLIOGRAPHIE.

Les livres et les brochures qui seront envoyés au Bureau des Républiques Américaines, et qui contiendront des sujets ou matières traitant des pays de l'Union Internationale des Républiques Américaines, seront mentionnés dans le Bulletin Mensuel sous le titre "Bibliographie."

Catalogue de la Bibliothèque de la Commission Centrale de Statistique. La Bibliothèque Colombo vient de recevoir, par l'entremise du Ministère des Affaires Etrangères, le Catalogue de la Bibliothèque de la Commission Centrale de Statistique de Belgique. Cette Bibliothèque est consacrée spécialement, ainsi que son nom l'indique, aux ouvrages ayant trait à la statistique et à l'économie politique. Elle reçoit les publications statistiques de tous les pays civilisés en échange des publications officielles de la Belgique. Elle achète les ouvrages les plus marquants relatifs à la statistique ou à la science sociale qui paraissent en Belgique ou à l'étranger. On a appliqué dans ce catalogue les méthodes préconisées par l'Institut International de Bibliographie, à la collaboration duquel est dû le classement des notices.

La notice de chaque ouvrage, rédigée dans la langue d'origine, comprend une description bibliographique complète: nom d'auteur et prénom, date de publication, titre et sous-titre, lieu de publication, nom d'éditeur, format, nombre de pages. Chaque notice porte en outre, un numéro classificateur emprunté au numérotage donné aux matières, dans les tables de la classification bibliographique universelle, adoptées par l'Institut International de Bibliographie (classification décimale). L'ordre de classement des notices dans ce catalogue est celui de ces numéros classificateurs. La disposition typographique de chaque notice met en vedette les indications essentielles, telles que le nom d'auteur, le numéro classificateur et la date des publications. Aux ouvrages qui se rapportent à plusieurs questions, il a été consacré plusieurs notices qui figurent sous les diverses matières que ces ouvrages concernent.

Une table méthodique des matières, une table alphabétique des matières et une table des noms d'auteurs complètent le catalogue. La table méthodique des matières est établie dans l'ordre des numéros classificateurs et renvoie au numéro des pages; la table alphabétique des matières contient, dans l'ordre du dictionnaire, les principales rubriques des matières concernant lesquelles la Bibliothèque possède des ouvrages. La table des noms d'auteurs est alphabétique, elle renvoie au numéro des pages. La méthode suivie permettra d'utiliser le catalogue non seulement sous sa forme de volume, mais aussi, pour l'établissement de catalogues sur fiches et à l'accroissement des répertoires bibliographiques. Ils constituent, en effet, une source précieuse de matériaux. La notice de chaque ouvrage, étant complète par elle-même, peut être découpée et collée sur fiches. En utilisant plusieurs volumes on pourra établir plusieurs catalogues classés suivant des bases différentes, l'un par nom d'auteurs (classement alphabétique), l'autre méthodique par matières (classement suivant les numéros classificateurs), un troisième d'après les pays que concernent les ouvrages (classement géographique, d'après les numéros classificateurs). Les catalogues sur fiches sont appelés à se généraliser de plus en plus. Les accroissements de la Bibliothèque de Statistique pourront donner lieu à des suppléments successifs qui, après avoir été eux-mêmes découpés, pourront être incorporés à leur place exacte dans les catalogues. Ainsi seront maintenues l'unité du catalogue et sa mise à jour constante.

Le Bureau du Ministère de l'Agriculture des Etats-Unis qui s'occupe des marchés étrangers vient de publier un Bulletin très intéressant (No. 23) qui traite des "Différentes contrées ayant exporté aux Etats-Unis des produits agricoles pendant la période quinquennale de 1897 à 1901." La valeur totale des importations agricoles pour 1901 a été de $392,000,000. Le Brésil en a fourni la plus grande partie, les importations de ce pays s'élevant à $53,000,000. Dans ce trafic le café figure naturellement en premier lieu, bien que le sucre, les cuirs et peaux et le cacao en constituent des facteurs importants. En 1901, l'île de Cuba a occupé la seconde place après le Brésil, la valeur des produits agricoles expédiés aux Etats-Unis ayant atteint un total de $39,000,000. Dans ce total d'exportation, c'est le sucre qui occupe le premier rang. Viennent ensuite le tabac, les mélasses, les fruits, les noix et le cacao.

Voici les noms des pays qui ont expédié des productions agricoles s'élevant à plus de $10,000,000: le Brésil, Cuba, le Royaume-Uni, l'Allemagne, le Japon, la France, les Indes orientales hollandaises, l'Italie, l'Empire Chinois, le Mexique, les Indes occidentales anglaises et les Pays-Bas.

Pour la période quinquennale, dont il est question dans se rapport, les différents pays du continent occidental ont contribué par an, en moyenne, à la valeur des productions agricoles importées aux Etats-Unis de la manière suivante: Brésil, $47,452,213; Cuba, $23,410,223; Mexique, $15,515,934; République Argentine, $7,728,584; Vénézuéla, $6,967,035; Pérou, $1,544,421; Saint-Domingue, $2,883,818; Guatémala, $2,278,427; Costa Rica, $3,068,644; Colombie, $3,861,179; Uruguay, $2,033,769; Nicaragua, $778,369; Honduras, $820,468; Salvador, $900,402; Equateur, $666,994; Haïti, $653,778; Chili, $261,651; Paraguay, $380.

Le Bulletin donne en détail la provenance et la valeur des douze principaux produits agricoles importés avec tableaux synoptiques à l'appui.

THE HBCo

THE H. B. CLAFLIN CO.,

NEW YORK, U. S. A.

EXPORTADORES. IMPORTADORES.
FABRICANTES. ALMACENISTAS.

Estampadores y Blanqueadores de Telas de Algodón.

GÉNEROS Y ARTÍCULOS DE FANTASIA.

Dedicamos especial atención á la conversión y blanqueo de géneros de algodón para llenar los requerimientos de todos los mercados extranjeros.

Solicitamos corresponsales en todas partes del mundo.

Nuestra dirección por cable: "CLAFLIN." Usamos la clave "A. B. C.," la "A1" y "Liebers."

Se reciben productos extranjeros en consignación, ó en cambio de mercancías.

COMPAÑÍA INCORPORADA CON EL TÍTULO DE

WRIGHT'S INDIAN VEGETABLE PILL CO.

372 PEARL STREET,
NEW YORK.

ESTABLECIDA HACE 50 AÑOS.

Es la única fabricante de las preparaciones siguientes: Píldoras Indias Vegetales de Wright, Jarabe Indio Vegetal de Wright, Elixir de Opio de McMunn, Gotas Anodinas de Clavo de comer para el dolor de muelas, Vermífugo pronto y eficaz de Perry, Píldoras de Zarzaparrilla de Leidy para la sangre, Bálsamo Romano para los Ojos, Mistura Específica de Crossman.

Los Importadores de Drogas y Medicinas en los países de la América Latina se servirán escribir pidiendo las listas de los precios, y preguntando cuáles son los términos y condiciones del pago. Estos remedios están ampliamente anunciados en los dichos países, y se venden en todas partes del mundo.

El Corsé de Forma Erecta conocido con el nombre de

"W. B." ERECT FORM CORSET

ES EL ÚNICO ENTERAMENTE CORRECTO.

En la Exposición Pan-Americana le fué concedido el premio más alto. Sigue fielmente los perfiles naturales del cuerpo, y no comprime el busto. Toda la fuerza que se necesite para encintarlo se ejerce en él sobre los músculos fuertes y vigorosos de las caderas y de la espalda, y así es que con su uso se hace resaltar de la manera más admirable, como es esencial para las exigencias de la presente moda, el bien redondeado busto y las caderas. Hay un modelo especial para cada forma de cuerpo.

Para obtener catálogos, listas de precios, y cualesquiera otros informes, debe dirigirse quien los desee á

WEINGARTEN BROS.,
377-379 Broadway,
New York,

Que son los fabricantes de corsés, en mayor cantidad, que existen en el mundo.

RATES OF POSTAGE FROM THE UNITED STATES TO LATIN-AMERICAN COUNTRIES.

The rates of postage from the United States to all foreign countries and colonies (except Canada, Mexico and Cuba) are as follows:

		Cents.
Letters, per 15 grams (½ ounce)		5
Single postal cards, each		2
Double postal cards, each		4
Newspapers and other printed matter, per 2 ounces		1
Commercial papers	Packets not in excess of 10 ounces	5
	Packets in excess of 10 ounces, for each 2 ounces or fraction thereof	1
Samples of merchandise	Packets not in excess of 4 ounces	2
	Packets in excess of 4 ounces, for each 2 ounces or fraction thereof	1
Registration fee on letters and other articles		8

Ordinary letters for any foreign country (except Canada, Mexico, and Cuba) must be forwarded, whether any postage is prepaid on them or not. All other mailable matter must be prepaid, at least partially.

Matter mailed in the United States addressed to Mexico is subject to the same postage rates and conditions as it would be if it were addressed for delivery in the United States, except that articles of miscellaneous merchandise (fourth-class matter), not sent as *bona fide* trade samples, should be sent by "Parcels Post;" and that the following articles are *absolutely excluded* from the mails without regard to the amount of postage prepaid or the manner in which they are wrapped:

All sealed packages, other than letters in their usual and ordinary form; *all* packages (including packages of second-class matter) which weigh more than 4 pounds 6 ounces, except such as are sent by "Parcels Post;" publications which violate any copyright law of Mexico.

Single volumes of printed books *in unsealed packages* are transmissible to Mexico in the regular mails without limit as to weight.

Unsealed packages of mailable merchandise may be sent by "Parcels Post" to Bolivia, British Guiana, British Honduras, Chile, Colombia, Costa Rica, Guatemala, Honduras, Mexico, Nicaragua, Salvador, and Venezuela, at the rates named on page XV.

(See page IX.)

PROHIBITED ARTICLES TO ALL FOREIGN COUNTRIES.

Poisons, explosives, and inflammable articles, live or dead animals, insects (especially the Colorado beetle), reptiles, fruits or vegetable matter liable to decomposition, and substances exhaling a bad odor, excluded from transmission in domestic mails as being in themselves, either from their form or nature, liable to destroy, deface, or otherwise injure the contents of the mail bags, or the persons of those engaged in the postal service; also obscene, lewd, or lascivious books, pamphlets, etc., and letters and circulars concerning lotteries, so-called gift concerts, etc. (also excluded from domestic mails); postal cards or letters addressed to go around the world; letters or packages (except those to Mexico) containing gold or silver substances, jewelry or precious articles; any packet whatever containing articles liable to customs duties in the countries addressed (except Cuba and Mexico); articles other than letters which are not prepaid at least partly; articles other than letters or postal cards containing writing in the nature of personal correspondence, unless fully prepaid at the rate of letter postage; articles of a nature likely to soil or injure the correspondence; packets of commercial papers and prints of all kinds, the weight of which exceeds 2 kilograms (4 pounds 6 ounces), or the size 18 inches in any direction, except *rolls* of prints, which may measure 30 inches in length by 4 inches in diameter; postal cards not of United States origin and United States postal cards of the largest ("C") size (except as letters), and except also the reply halves of double postal cards received from foreign countries.

There is, moreover, reserved to the Government of every country of the Postal Union the right to refuse to convey over its territory, or to deliver, as well, articles liable to the reduced rate in regard to which the laws, ordinances, or decrees which regulate the conditions of their publication or of their circulation in that country have not been complied with.

☞Full and complete information relative to all regulations can be obtained from the United States Postal Guide.

MONTHLY BULLETIN

OF THE

INTERNATIONAL BUREAU OF THE AMERICAN REPUBLICS,

International Union of American Republics.

VOL. XIII. NOVEMBER, 1902. No. 5.

DEDICATION OF THE NEW YORK CHAMBER OF COMMERCE.

ADDRESS OF PRESIDENT ROOSEVELT.

At the dedication of the new building of the Chamber of Commerce, held in New York on November 11, 1902, President Roosevelt spoke as follows:

"I do not wish to speak to you in the language of idle compliment, and yet it is but a bare statement of fact to say that nowhere in our country could there be gathered an audience which would stand as more typically characteristic than this of all those qualities and attributes which have given us of the United States our commanding position in the industrial world. There is no need of my preaching to this gathering the need of combining efficiency with upright dealing, for as an American and as a citizen of New York I am proud to feel that the name of your organization carries with it a guaranty of both, and your practice counts for more than any preaching could possibly count.

"New York is a city of national importance, because its position toward the nation is unique; and the Chamber of Commerce of New York must of necessity be an element of weight in the commercial and industrial welfare of the entire people. New York is the great port of entry for our country—the port in which centers the bulk of the foreign commerce of the country—and her welfare is, therefore, no matter of mere local or municipal, but of national concern. The conduct of the Government in dealing with all matters affecting the financial and commercial relations of New York must continually take into account this fact; and it must be taken into account in appreciating the importance of the part played by the New York Chamber of Commerce.

"This body stands for the triumphs of peace both abroad and at home. We have passed that stage of national development when depreciation of other peoples is felt as a tribute to our own. We watch the growth and prosperity of other nations, not with hatred or jealousy, but with sincere and friendly good will. I think I can say safely that we have shown by our attitude toward Cuba, by our attitude toward China, that as regards weaker powers our desire is that they may be able to stand alone, and that if they will only show themselves willing to deal honestly and fairly with the rest of mankind we on our side will do all we can to help, not to hinder, them. With the great powers of the world we desire no rivalry that is not honorable to both parties. We wish them well.

"We believe that the trend of the modern spirit is ever stronger toward peace, not war; toward friendship, not hostility, as the normal international attitude. We are glad, indeed, that we are on good terms with all the other peoples of mankind, and no effort on our part shall be spared to secure a continuance of these relations. And remember, gentlemen, that we shall be a potent factor for peace largely in proportion to the way in which we make it evident that our attitude is due not to weakness, not to inability to defend ourselves, but to a genuine repugnance to wrongdoing, a genuine desire for self-respecting friendship with our neighbors. The voice of the weakling or the craven counts for nothing when he clamors for peace, but the voice of the just man armed is potent.

"We need to keep in a condition of preparedness, especially as regards our Navy, not because we want war, but because we desire to stand with those whose plea for peace is listened to with respectful attention.

"Important though it is that we should have peace abroad, it is even more important that we should have peace at home. You, men of the Chamber of Commerce, to whose efforts we owe so much of our industrial well-being, can, and I believe surely will, be influential in helping toward that industrial peace which can obtain in society only when in their various relations employer and employed alike show not merely insistence each upon his own rights, but also regard for the rights of others, and a full acknowledgment of the interests of the third party—the public.

"It is no easy matter to work out a system or rule of conduct, whether with or without the help of the lawgiver, which shall minimize that jarring and clashing of interests in the industrial world which causes so much individual irritation and suffering at the present day, and which at times threatens baleful consequences to large portions of the body politic. But the importance of the problem can not be overestimated, and it deserves to receive the careful thought of all men such as those whom I am addressing to-night. There should be no yielding to wrong; but there should most certainly be not only desire to do right, but a willingness each to try to understand the view point of his fellow, with whom, for weal or for woe, his own fortunes are indissolubly bound.

"No patent remedy can be devised for the solution of these grave problems in the industrial world, but we may rest assured that they can be solved at all only if we bring to the solution certain old-time virtues, and if we strive to keep out of the solution some of the most familiar and most undesirable of the traits to which mankind has owed untold degradation and suffering throughout the ages. Arrogance, suspicion, brutal envy of the well to do, brutal indifference toward those who are not well to do, the hard refusal to consider the rights of others, the foolish refusal to consider the limits of beneficent action, the base appeal to the spirit of selfish greed, whether it take the form of plunder of the fortunate or of oppression of the unfortunate—from these and from all kindred vices this nation must be kept free if it is to remain in its present position in the forefront of the peoples of mankind.

"On the other hand, good will come, even out of the present evils, if we face them armed with the old homely virtues; if we show that we are fearless of soul, cool of head, and kindly of heart; if, without betraying the weakness that cringes before wrongdoing, we yet show by deeds and words our knowledge that in such a Government as ours each of us must be in very truth his brother's keeper.

"At a time when the growing complexity of our social and industrial life has rendered inevitable the intrusion of the State into spheres of work wherein it formerly took no part, and when there is also a growing tendency to demand the illegitimate and unwise transfer to the Government of much of the work that should be done by private persons, singly or associated together, it is a pleasure to address a body whose members possess to an eminent degree the traditional American self-reliance of spirit which makes them scorn to ask from the government, whether of State or nation, anything but a fair field and no favor—who confide not in being helped by others, but in their own skill, energy, and business capacity to achieve success. The first requisite of a good citizen in this Republic of ours is that he shall be able and willing to pull his weight—that he shall not be a mere passenger, but shall do his share in the work that each generation of us finds ready to hand; and, furthermore, that in doing his work he shall show not only the capacity for sturdy self-help, but also self-respecting regard for the rights of others.

"The Chamber of Commerce, it is no idle boast to say, stands in a preeminent degree for those qualities which make the successful merchant, the successful business man, whose success is won in ways honorable to himself and beneficial to his fellows. There are very different kinds of success. There is the success that brings with it the seared soul—the success which is achieved by wolfish greed and vulpine cunning—the success which makes honest men uneasy or indignant in its presence. Then there is the other kind of success—the success which comes as the reward of keen insight, of sagacity, of resolution, of address, combined with unflinching rectitude of behavior, public and private.

"The first kind of success may, in a sense—and a poor sense at that—benefit the individual, but it is always and necessarily a curse to the community; whereas the man who wins the second kind, as an incident of its winning becomes a beneficiary to the whole commonwealth.

"Throughout its history the Chamber of Commerce has stood for this second and higher kind of success. It is therefore fitting that I should come on here as the Chief Executive of the nation to wish you well in your new home; for you belong not merely to the city, not merely to the State, but to all the country, and you stand high among the great factors in building up that marvelous prosperity which the entire country now enjoys. The continuance of this prosperity depends in no small measure upon your sanity and common sense, upon the way in which you combine energy in action with conservative refusal to take part in the reckless gambling which is so often bred by and which so inevitably puts an end to prosperity. You are men of might in the world of American effort; you are men whose names stand high in the esteem of our people; you are spoken of in terms like those used in the long gone ages, when it was said of the Phœnician cities that their merchants were princes. Great is your power and great, therefore, your responsibility. Well and faithfully have you met this responsibility in the past. We look forward with confident hope to what you will do in the future, and it is therefore with sincerity that I bid you Godspeed this evening and wish for you, in the name of the nation, a career of ever-increasing honor and usefulness."

CUSTOMS CONGRESS.

Pursuant to a resolution of the Governing Board of the International Bureau of the American Republics, made in compliance with the instructions given it in the second paragraph of the first resolution adopted by the Second International Conference of American States at the City of Mexico on January 22, 1902, respecting the convening of a Customs Congress; January 15, 1903, has been fixed for holding the first meeting of that important Congress in the city of New York, in a hall which shall be selected for that purpose.

The full text of the resolution of the Second International Conference relating to this Congress was published in the MONTHLY BULLETIN for April, 1902, page 871 of the English section and pages 986 and 1075, respectively, of the Spanish and Portuguese sections. The subject is there explained with the detail which it merits, the objects and intentions of the Congress are set forth, and the manner and extent of the work it will endeavor to accomplish are discussed at length.

An outline of the general programme that has been formulated for the purpose of carrying on this work is as follows: The honorable Secretary of the Treasury will open the session with an inaugural address, and after the observance of the formalities customary in such cases, the Congress will elect its officers, committees will be appointed as they may be deemed necessary, and the study of the questions under consideration will be proceeded with in the proper manner and form.

At this writing the following nations have signified their intention of participating in the Congress: Bolivia, Ecuador, United States of America, Guatemala, Honduras, Mexico, Salvador, and Venezuela.

The Government of the United States has appointed the following gentlemen as its delegates: Hon. O. L. SPAULDING, Assistant Secretary of the Treasury; Hon. ISRAEL FISCHER, United States General Appraiser; Mr. GEORGE W. WHITEHEAD, Appraiser of Merchandise at New York; Mr. E. T. CHAMBERLAIN, Commissioner of Navigation, and Mr. JOSEPH J. COUCH, Special Deputy Collector of Customs at New York.

The following delegates have been appointed by the other nations:

Ecuador, Señor Don LUIS FELIPE CARBO.

Guatemala, Señor Don ANTONIO LAZO ARRIAGA.

Honduras, Señor Don NICANOR BOLET PERAZA.

Mexico, Señor Don PEDRO M. DEL PASO and Señor Don JAVIER ARRANGOIZ.

Salvador, Señor Don ERNESTO SHERNIKOW.

Venezuela, Señor Don AUGUSTO PULIDO.

The Hon. E. T. CHAMBERLAIN, delegate for the United States, has prepared a plan of committee organization, which has been properly submitted to the respective Governments, and reads as follows:

COMMITTEE ORGANIZATION.

1. It is proposed that the work of the Congress shall be divided into four divisions, as follows:

Division I.—Vessels.
Division II.—Merchandise.
Division III.—Nomenclature.
Division IV.—Future Congresses and Permanent Organization.

2. It is proposed that each division shall be in charge of a committee to be designated on the first day of the Congress. Each Republic, accordingly, is requested to nominate to the Governing Board of the International Bureau of American Republics its representation on any or all of the committees in advance of the meeting of the Congress.

3. It is requested that the representation of each Republic on a committee be prepared to furnish for the use of the committee the laws, regulations, and forms of custom-house papers of the Republic relating to the work of that committee. It is desirable that the representation of each Republic on a committee should prepare in advance of the meeting of the proposed Congress statements of the present practice of that country in the matters assigned to the committee on which it is to serve.

4. Propositions which may be presented by delegates shall be referred without debate to the appropriate committee for report unless the Congress shall otherwise direct.

5. The committees shall be charged with the preliminary consideration of the following subjects, respectively:

DIVISION I.—VESSELS.

(*a*) Requirements of the manifest of a vessel from a foreign port and for a foreign port.

(*b*) Requirements incident to the entry of a vessel from a foreign port and to the clearance of a vessel for a foreign port.

(*c*) Requirements, subsequent to entry of the vessel, incident to the discharge of cargo and special regulations for discharge of cargo at night.

(*d*) Limits of time for discharge of cargo.

(*e*) Conditions under which a foreign vessel may proceed from one port to another port in each country to discharge or take on cargo and passengers.

(*f*) Description of the charges collected from merchant vessels by authority of Federal law.

(*g*) Method of measuring vessels to ascertain gross and net tonnage.

(*h*) Advantage and disadvantage of gross and net tonnage, respectively, as the basis of charges on shipping.

DIVISION II.—MERCHANDISE.

(*a*) Conditions under which merchandise from a foreign country may be brought within the jurisdiction of the collector of customs, and the methods employed by him in taking charge of the same.

(*b*) Requirements incident to the entry of such merchandise at the custom-house by the consignees thereof, in respect to bills of lading, invoices, and various forms of import and transit entries.

(*c*) Proceedings subsequent to entry, in appraisal, classification, and final liquidation of duties.

(*d*) Withdrawals and various dispositions of merchandise entered for warehousing, including practical application of the general bond and warehouse system.

(*e*) The treatment and disposal of unclaimed or abandoned goods.

(*f*) Methods of accounting for all imported merchandise, whether in packages or in bulk.

(*g*) Conditions and provisions relating to drawback of duties paid upon the exportation of merchandise either in condition as previously imported or as material used in subsequent manufactures.

DIVISION III.—NOMENCLATURE.

1. Basis of a common nomenclature to be adopted in the official documents, such as manifests, invoices, etc., required in trade between the American Republics:

(*a*) Advantage or disadvantage of the common adoption of the nomenclature of the metric system of weights and measures.

(*b*) Advantage or disadvantage of the common adoption of the English equivalents of general commercial terms except such as are involved in the nomenclature of the metric system.

(*c*) Adequate means of establishing any common nomenclature which may be recommended.

DIVISION IV.—FUTURE CONGRESSES AND PERMANENT ORGANIZATION.

1. Organization of a permanent Customs Commission.

2. Advisability of determining definite periods for the assembling of future Customs Congresses.

COMMISSION FOR THE STUDY OF THE PRODUCTION, DISTRIBUTION, AND CONSUMPTION OF COFFEE.

The important Commission to which this article refers, and which the BULLETIN discussed with due detail and extent in its former number, closed its sessions on October 31 last by unanimously adopting a resolution requesting the Government of Brazil to convene as soon as possible a second Congress of the same kind, to be held at such date and place as the Brazilian Government might deem proper, and to be attended, as delegates of the different Governments, by intelligent persons experienced in the coffee industry, in order that they might formulate and conclude the conventions or treaties referred to in the recommendations made by the Commission, or those that may be subsequently suggested which shall be conducive to the best and most effective protection of this industry, it being understood that these delegates shall be authorized to sign said agreements. In this resolution the Government of Brazil is also requested to open such negotiations with the other coffee-producing countries as may be necessary to carry out the recommendations already made by the Commission and which may admit of immediate application.

The Commission had fourteen sittings, held consecutively in the following order: The first, which was the inaugural session, October 1, and the others on the 3d, 6th, 8th, 10th, 16th, 17th, 20th, 22d, 27th, 28th, 29th, and 30th, respectively, and the last on October 31. In the session of October 27, which was the tenth sitting, the report of the Commission on Distribution, which reads as follows, was submitted:

"The Committee on Distribution has studied attentively the reports made by the different delegations, but has not found in them, nor has there been furnished it in any other manner, any concrete proposition upon which it could base an opinion. Consequently it has proceeded to collect the general opinions upon this subject which have been presented in said reports, as well as those which have occurred to its members and those which it has obtained from other sources, and has the honor of submitting to the Conference the results of its investigations."

The subject of the distribution of coffee, considered in all its phases, would be a large question capable of great development. It is, however, so intimately connected with a number of the points already studied by some of the other commissions that have rendered full reports thereon that this Commission believes it will only be necessary to consider some of the branches which the subject embraces, and with this object in view has devoted its attention to the following points:

SOURCE.

The advantages of every business that requires the highest ingenuity to effect its transactions counsel the greatest clearness and security possible respecting the source of origin of articles of commerce, and in such a manner as to eliminate the suspicion of deceit, which is always dangerous to the good repute of products of the best class. To change this status for the purpose of gain is a crime that ought to be included among those punishable with the same severity as deceit or fraud, because of the injustice done to the property of those who, due to natural reasons or improved methods, send a superior product to the market. Above all, justice and truth suggest that upon this point it be recommended that no attempt at deception should be tolerated, and that the frauds which, as is well known, are committed to the prejudice of the different grades of coffee from the best accredited sources should be denounced.

CLASSIFICATION.

In addition to the advisability of marking the origin of the coffee clearly on the sacks or packages, there follows the necessity of marking thereon in an equally clear manner the different grades shipped from the same place for the purpose of distinguishing the product in the markets of the world under its own name and by its different grades. Evidence shows the wisdom of this procedure in avoiding the evils that result from confusion and in maintaining the reputation already acquired, or that coffee of the same origin and known grades may acquire.

SALES.

Among the suggestions prepared by a commission at San José and submitted to the conference by the delegation of Costa Rica is the following: Private sales in the United States have great disadvantages which it will not be difficult to prove. There is no control or official inspection whatever in the transactions, and the producer or shipper is under the necessity of relying wholly upon the good faith of his agent, who in the greater number of instances is honest; yet it nevertheless frequently happens that he becomes simply an exploiter of his consignor, whom he deceives—doing in this manner a double injury, since he not only robs the shipper of a profit that belongs to him, but also infuses into the minds of other producers or shippers a natural distrust as to the fairness of the market; all of which exercises a hurtful influence on the quantity of subsequent exportations. Without any great mental effort one may arrive at the more important conclusions that make clear the value of the system of sales at public auction.

The views of the Commission not being unanimous upon this point, the Commission confined itself to a submission of the question to the conference.

REPEAL OF THE ALCABALAS OR LOCAL TAXES.

A different question of reform is that relating to the system of *alcabalas* now in force in some of the countries, and the existence of which does not depend upon the growers, exporters, or dealers in coffee. The Commission is of the opinion that the abolition of the duties known as *alcabalas* or taxes on goods in transit between different places in the same country or nation, such as are collected by the various States or by the different jurisdictions in the same State or Province, should be recommended. This recommendation includes, in addition to the coffee-growing countries, those in which coffee is consumed and where the tax mentioned exists, and to make the recommendation effective the same means should be employed as those utilized for the suppression of the import duties.

PROPAGANDA.

A very important if not an essential requisite to the increase in the consumption of coffee, and therefore closely allied to its distribution, is that which relates to the propaganda, and with this understanding of the subject the commission recommends that every step in the sense of increasing the number of consumers by the most appropriate means for that purpose in the countries where coffee is already known be made use of, and that new markets be opened where none now exist. In a report on this subject by the legation of Costa Rica at Washington, published in September, 1900, the possibility of introducing the use of coffee into Russia is made evident. The Director of the Agricultural Museum at St. Petersburg gratuitously offered the space necessary for the holding of a permanent exhibit of the products of Costa Rica in that institution. This shows that assistance would be forthcoming if a formal propaganda should be started there and the necessary steps taken to introduce and popularize the use of coffee.

TRANSPORTATION.

Necessarily the question of the means of transportation is of the greatest importance. It goes without saying that this is an inherent principle in the possession of any product, since the acquisition of gold itself would profit one little if that rich metal had to remain confined in the place of its production. The greater the facilities the grower has for the transportation of his product, the greater will be the value of his coffee, and, although this is a truth which needs no demonstration, the Commission believes that every efficacious means that would tend to expedite and cheapen land and maritime freights should be recommended, blending as it were these conditions together as a necessary consequence of greater economy, speed, and security in transportation.

PACKING OR SACKING.

An important requisite in this respect is the quality of the packing or sacking, since the shipments must be made by land and water and the covering or packing is to preserve the coffee from dampness and other atmospheric conditions that might injure it. Opinions differ as to the best quality of packing, and the Commission considers it unnecessary to enter into a detailed study regarding the proper material to be used in each country as shown by experience and economy in obtaining it.

RECOMMENDATIONS.

With the foregoing as a basis, the Commission has the honor to submit to the conference the following recommendations:

The International American Coffee Commission recommends that the Governments of the coffee-producing countries take the necessary steps, in conjunction with the other recommendations proposed to them by the Conference, for the accomplishment of the following ends:

1. To secure severe punishment for the abuse of changing the sacks or the marks indicating the origin of the coffee imported into the consuming countries, or for the employment, in any other manner, of deceit for the purpose of unjustly raising the price of coffee of inferior grades to the prejudice of coffee of higher grades.

2. To secure also the assistance necessary for an effective propaganda in the sense of extending the use of coffee and of opening new markets for it.

3. To secure the abolition of the *alcabalas* or any other local taxes that tend to prevent or delay the free movement of coffee.

4. To secure, by the means indicated, or by any other means that may be deemed proper or adequate, the sale of coffee, when it is so desired, at auction in those markets where this practice obtains.

For the home Governments the commission proposes the following:

The International American Coffee Commission recommends to the Governments represented therein—

1. That they encourage and develop every possible means of transportation in their respective countries, and in the means of communication with other States, in order that they may promote the growth of international commerce as a means of increasing the consumption of coffee.

2. That they adopt regulations looking to the employment of better sacks or packing for the purpose of securing the conservation of the coffee without alteration.

3. That by means of these regulations the manner of classifying and marking each sack of coffee under the name of the country from which it comes be determined.

J. B. Calvo.
Ant°. E. Delfino.

New York, *October 27, 1902.*

INTERNATIONAL CONGRESS OF AMERICANISTS.

A most noted gathering of anthropologists and antiquarians was held in the city of New York during the month of October, 1902. It was the occasion of an assembling at the American Museum of Natural History of the thirteenth session of the International Congress of Americanists.

The representation at the congress was thoroughly international, the President being MORRIS K. JESUP, President of the American Museum of Natural History, and the Honorary President, the Duke of Loubat, correspondent of the Institute of France (Academy of Inscriptions and Belles Lettres) while among the delegates were Prof. LEON LEJEAL, of the chair of American Antiquities of the College of France; Prof. EDWARD, SELER of the University of Berlin; Prof. KARL VON DEN STEINEN, Assistant Director of the Berlin Ethnographical Museum; Prof. HJALMAR STOLPE of Sweden; Prof. JUAN B. AMBROSETTI, of the Argentine Republic; Dr. ALFREDO CHAVERO, of Mexico; Mr. A. P. MAUDSLAY, of England; Dr. PITTIER DE FABREGA, Director of the Geographical Institute of Costa Rica, and Dr. DE LA ROSA, of Peru. The contingent from the United States included Prof. W. H. HOLMES, Prof. W J MCGEE, Dr. M. H. SAVILLE, F. W. PUTNAM, Miss ALICE FLETCHER, Mrs. ZELIA NUTTALL, and others.

The sessions occupied in all five days—from October 20 to October 25—and numbers of papers were read and discussed bearing upon subjects regarding the antiquity of man in America, and others pertaining to the early colonies, in which the Toscanelli correspondence played an important part. This consists of letters and chart dealing with the route to the Indies by the way of the west, and is supposed to have been sent by their author, a Florentine astronomer, to Christopher Columbus.

Although organized for the express purpose of studying prehistoric North and South America, this was the first time that the Congress had met in the United States. At the conclusion of the sessions the delegates were taken on an excursion to Philadelphia, Washington, Pittsburg, Cincinnati, and Chicago. In Washington they were received and entertained by a special committee and were presented to President ROOSEVELT.

Following is a list of the papers presented for the consideration of the Congress:

W J MCGEE. Current Work of the Bureau of American Ethnology.

W. J. HOLLAND. The Petroglyphs at Smiths Ferry, Pa.

A. F. CHAMBERLAIN. The Algonquin Linguistic Stock.

THE DUKE OF LOUBAT. On the Mexican Manuscripts.

J. D. MCGUIRE. Anthropology in Early American Writings.

GONZALEZ DE LA ROSA. How I discovered the so-called Toscanelli correspondence was a forgery and science had nothing to do with the discovery of America.

HENRY VIGNAUD. On the Toscanelli Letters.

JOHN B. SHIPLEY. Notes on the Second Letter of Toscanelli.

GENARO GARCIA. "Vida y hechos de Pedro Menendez de Avilés, Adelantado de la Florida. Relación escrita en el siglo XVI par el maestro Bartolomé Barrientos. La publica por 1^a vez Genaro Garcia, en homenaje al XIII Congreso Internacional de Americanistas, Mexico, 1902."

F. S. DELLENBAUGH. The Location of Cibola and the Historic Towns of the Rio Grande Valley in New Mexico prior to 1630.

F. W. Hodge. The Influence of Four Centuries on the Pueblo Indians.

J. V. Brower. Rediscovery of Quivira and Harahey.

Clarence B. Moore. Archæological Research in the Southern United States.

J. V. Brower. Dakota Indians as Builders of Earthworks.

——— Identification of Kakabikansing Quartz Blades.

Juan B. Ambrosetti. The Archæology of the Calchaqui Region, South America.

Alfredo Chavero. Los signos de los dias en el calendario de Palemke.

W J McGee. Some Fundamental Factors in Social Organization.

Aleš Hrdlička. Physical Anthropology of the Indians of the Southwestern United States and Northern Mexico (The Hyde Expedition).

Constance Goddard Du Bois. Early Art of the Mission Indians of Southern California.

Washington Matthews. Probable Myths of Parturition.

Signe Rink. A Comparative Study of Two Indian and Eskimo Legends.

Carl Lumholtz. Conventionalism in Designs of the Huichols of Mexico.

Franz Boas. The work of the Jesup North Pacific Expedition.

Waldemar Bogoras. The Folk-Lore of Northeastern Siberia as compared with that of Northwestern America.

T. C. Chamberlain, W. H. Holmes, George A. Dorsey. Presentation of the Lansing Skull.

S. W. Williston. On the Lansing Man.

Aleš Hrdlička. Somatological Notes on the Bones of the Lansing Man.

Henry Fairfield Osborne. On Possible Evidence of Early Pleistocene Man in America.

Leon Lejeal. La Collection Céramique de M. de Sartiges et les vases péruviens à forme d'aryballe du Musée National d'Ethnographie du Trocadero.

Frederick Starr. The Physical Features of South Mexican Indians.

J. L. van Panhuys. Are there Pygmies in French Guiana?

Alice C. Fletcher. A Star Cult.

G. A. Dorsey. Wichita Creation Myth.

Alfred M. Tozzer. A Navajo Sand Picture of the Rain Gods and the Attendant Ceremony.

George Bird Grinnell. The Social Organization of the Cheyennes.

ARGENTINE REPUBLIC.

REPORT ON THE CROPS OF 1901-2.

The issue of September 15 of the "Boletin de Agricultura" contains the report of the Chief of the Statistical Department of the Ministry of Agriculture on the crops of 1901-2. The report states that the figures contained therein are compiled from the returns received from the owners of the thrashing machines up to July 15 last. As some returns had not been sent in by that date, a general average has been taken for those districts, with the following general results:

	Wheat.	Linseed.
	Tons.	*Tons.*
Province of Buenos Ayres	971,067	174,280
Province of Santa Fé	349,742	151,090
Province of Córdoba	63,950	12,512
Province of Entre Rios	79,646	27,153
Other parts	70,000	....
Total	1,534,405	365,035

The census of 1895 fixed the annual consumption of wheat at 133 kilogram per inhabitant, but up to the present it has been impossible to rectify these figures.

The crops of 1901-2 toward the end of September, 1901, promised a harvest of 3,500,000 tons. Deducting from this amount 220,000 tons required for home consumption and 665,000 tons for seed, there should have been 2,600,000 tons for export, or about 75 per cent of the crops.

The United States, with a production of 19,700,000 tons (1901), exported 5,850,000 tons (in wheat and flour), or just under 30 per cent of the total crops.

	Tons.
The 1901-2 crop was reduced to	1,526,000
Seed and home requirements	885,000
Leaving for export (in wheat and flour)	641,000

If it is taken into consideration that the exports to July 31 in wheat and flour amounted to 574,000 tons, it is easily seen that the above figures are not far wide of the mark.

The highest yields have been in the Province of Buenos Ayres.

For the 1898-99 crops the yield in that province exceeded 1,200 kilograms per hectare sown, and in many instances reached 2,500 kilograms. In 1900 the returns showed that 13 per cent of the agricultural districts had produced from 1,500 to 3,500 kilograms per hectare, and the returns from 1901 have been more or less the same. This year the yields of over 2,000 kilograms per hectare in wheat and linseed have been even more general than during the past year. If it is considered that the cost of production does not pass $4.50 paper per 100 kilograms of wheat and linseed, and that the price of these cereals has in many instances been as high as $6.30 and $13, respectively, it is easily understood that the farmers have been able to reap considerable benefits from the crops.

The area sown with linseed for the 1901–2 crop amounted to 780,000 hectares, and if it had not been for the drought which destroyed the greater portion of the crops in Santa Fé, Córdoba, and Enter Rios, the yield would have been 700,000 tons, or about 35 per cent of the world's production.

The farms numbered 37,434, of which 13,150 were worked by proprietors, 18,819 by tenants, and 5,465 on halves.

The crop returns for previous years have been as follows:

Year.	Wheat.		Maize.		Linseed.	
	Area sown.	Yield.	Area sown.	Yield.	Area sown.	Yield.
	Hectares.	*Tons.*	*Hectares.*	*Tons.*	*Hectares.*	*Tons.*
1891–92	1,202,228	....	825,495	....	58,023	....
1899–1900	2,190,444	2,800,000	1,244,182	1,800,000	258,412	250,000
1900–1901	3,307,749	1,964,437	....	....	607,352	389,951
1901–2	3,296,066	1,534,405	1,405,806	2,134,165	780,000	366,000

The exports have been, in tons—

Year.	Wheat.	Maize.	Linseed.
1897	101,845	374,942	162,477
1898	645,161	717,105	158,904
1899	1,713,429	1,116,276	217,713
1900	1,926,676	713,248	223,257
1901	904,289	1,112,290	338,828
1902 (8 months)	574,285	775,370	330,315

Crops 1901–2.

	Number of farms.	Area harvested.	Crop.	Yield per hectare.
WHEAT.		*Hectares.*	*Tons.*	*Kilos.*
Buenos Ayres	17,323	960,862	971,067	1,011
Santa Fe	14,524	1,050,647	349,742	333
Córdoba	1,739	261,085	63,950	245
Entre Rios	3,848	173,607	79,646	458
Total	37,434	2,446,201	1,464,405	599
LINSEED.				
Buenos Ayres	17,323	169,092	174,280	1,031
Santa Fe	14,524	363,726	151,090	414
Córdoba	1,739	48,988	12,512	255
Entre Rios	3,848	61,800	27,153	439
Total	37,434	644,606	365,035	566

The maize crop of 1901–2 was as follows:

	Area sown.	Yield.
	Hectares.	*Tons.*
Province:		
Buenos Ayres	681,217	1,360,271
Santa Fé	442,367	479,720
Entre Rios	81,198	2,418
Córdoba	35,072	31,344
Corrientes	37,305	7,461
Santiago del Estero	12,152	36,456
San Luis	13,210	20,805
Tucuman	21,328	31,197
Mendoza	7,941	14,905
San Juan	4,921	10,740
Rioja	16,533	49,599
Catamarca	6,618	7,272
Salta	20,000	40,000
Jujuy	1,530	6,120
Territories:		
Chaco	4,401	8,802
Formosa	524	1,048
Misiones	9,579	10,547
Neuquen	100	400
Pampa	9,800	15,060
Chubut	....	....
Total	1,405,806	2,134,165

The area under peanuts was 23,765 hectares, under tobacco 12,696, sugar cane 67,218, and under vines 45,533.

The total yield of sugar has been as follows:

Year.	Production.	Consumption.	Exported.
	Tons.	*Tons.*	*Tons.*
1897	108,487	72,587	41,734
1898	78,962	70,223	20,820
1899	92,855	105,157	26,701
1900	114,473	96,655	20,010
1901	163,695	159,660	49,413

The production and consumption of wine has been as follows, according to the returns of the Inland Revenue Department:

	1900.		1901.	
	Production.	Consumption.	Production.	Consumption.
	Hectoliters.	*Hectoliters.*	*Hectoliters.*	*Hectoliters.*
Capital	1,433	1,957	4,077	3,156
Buenos Ayres	7,443	6,253	5,209	4,838
Entre Rios	17,295	12,894	9,064	7,797
Corrientes	68	59	53	53
Córdoba	3,343	3,754	15,977	15,467
Catamarca	16,490	14,259	21,128	19,367
Rioja	15,375	15,709	17,221	16,506
Salta and Tucuman	19,942	11,742	16,361	16,486
Mendoza	806,671	815,103	1,392,568	997,512
San Juan	260,681	271,272	359,850	297,512
San Luis	1,010	1,914	2,688	2,493
Total	1,149,751	1,154,916	1,844,196	1,381,554

The returns for 1899 were 1,241,235 hectoliters produced and 1,185,715 consumed.

The imports of wine in 1899 amounted to 464,326 hectoliters, in 1900 to 453,776, and in 1901 to 449,475.

The imports of fine stock for breeding purposes from 1897 to 1901 were as follows:

	Cattle.	Sheep.	Horses.	Asses.	Pigs.
1897	916	7,390	184	71	25
1898	623	6,962	154	31	2
1899	1,561	4,839	129	7	19
1900	938	9,165	203	74	3
1901	26	154	441	15	....

The exports of live stock to all countries for the same period were—

	Cattle.	Sheep.	Horses.	Asses.	Mules.	Pigs.
1897	238,121	504,128	13,615	16,390	16,317	666
1898	359,296	577,813	14,360	7,534	10,205	587
1899	312,150	543,458	7,259	6,234	7,740	1,830
1900	150,550	198,102	32,969	10,252	13,179	40
1901	119,189	25,746	9,761	8,793	20,468	250

NEW PROCESS OF PREPARING HIDES CALLED THE ROBERTS SYSTEM.

The "Tribune" of Buenos Ayres, of September 27, 1902, states that the great problem of the preservation and preparation of hides and skins, both wet and dry, has now been solved in that metropolis. This process, according to the authority in question, will render necessary a complete change in the industries that employ these materials.

The process consists in the use of a gas that produces a surprising effect upon the hides and skins which are immersed in it, rendering them practically proof against putrefaction and the ravages of moths or other vermin. The sole owners of this new process, which is called the "Roberts system," is the Conservadora Mercantile Company, of which Mr. Carlos Lix Klett is the general director and Mr. Augusto Potel the technical engineer. The Conservadora Company has sent to the expert director of "The Tannery" of Buenos Ayres, to be tanned and made into sole leather, six oxhides and one dry hide, the first having been preserved by means of the Roberts system thirty-three days and the second nine months. The technical director in his report upon this matter stated that the advantages obtained from hides preserved by the Roberts system are as follows:

1. On the receipt of the hides he found that by this system of preservation they had acquired a much better appearance than that of dry or salted hides. It is undeniable that this appearance influences the buyer favorably, who will not hesitate in judging them to be first class.

2. By this system greater freshness and regularity in the hides is attained, because, being dried very slowly, the operation is more perfect and there is a much smaller loss of albuminoid substances.

3. The hides retain more gelatin by this process, the combination with tannic substances occurs in a greater proportion, and the result is a firmer and more compact leather, impermeable and of great resistance, resembling in this respect the famous English leather.

4. This process offers the great advantage to tanners, especially during the summer season, of being able to preserve the hides for a number of days after they have become green without being endangered by fermentation.

5. Such is the strength of the antiseptic that hides treated by this process acquire a preservative quality which practically resists all decomposition, and they may be stored in any warehouse without danger of being damaged from dampness, vermin, or other cause.

6. The operation being completed, the hides retain the same appearance as if they had been recently received from the slaughter.

After the completion of the process the dry and wet hides operated upon have the appearance of hides just from the slaughter and might easily be mistaken for fresh hides, notwithstanding the fact that the dry hide used in the test referred to in the foregoing was 9 months old and the wet hides had been kept thirty-three days. Hides dried in the open air never have this appearance, since fermentation induces decomposition, and in the summer there is danger of the hides being injured from this cause. Salted hides retain their appearance to some extent, but can never approach those preserved by the Roberts system. Ordinary dry hides yield a product of about 61 per cent and salted hides 63 per cent. The yield by the Roberts system is 66½ per cent for dry hides and 67.6 per cent for half-dried hides.

These figures show that there would be a notable gain to tanners by the use of the Roberts system. This process, then, will fill a long-felt want in the hide and leather industry, both as to operations in the country and exports abroad.

WINE INDUSTRY OF MENDOZA.

The British Foreign Office received from His Majesty's Consul at Buenos Ayres a report on the wine industry of Mendoza for 1901–2, from which the following particulars have been extracted:

"For a person working with capital of his own, who has caution enough not to embark all his money at once, the vineyard business is by no means unpromising. The business is easily learned, and the necessary labor is abundant and cheap. Work on the vineyards is mostly done by contract at a fixed price per hectare. Water is supplied from the public irrigation system. It is drawn from the Mendoza River and is paid for at a fixed price per hectare. Without irrigation nothing grows.

"The climate of Mendoza is excellent, but care has to be taken about drinking water, as most of the available water is so highly charged with mineral salts as to be unwholesome.

"The internal consumption of wine in the Republic in 1901 was 55,000,000 gallons. Of this amount, 26,400,000 gallons was the product of the country; of the remainder, 11,000,000 gallons were imported and 17,600,000 gallons (800,000 hectoliters) were manufactured from ingredients other than grapes (it is not stated what) in imitation of Spanish and Italian wines.

"The district of Mendoza furnished nearly one-half of the wine produced in the country. It is stated that some 90,000 acres of land are at present under vines. There is a wine growing and pressing school at Mendoza, supported by the National Government, where research is carried on and instruction given in both branches of the industry. Phylloxera is practically unknown.

"The following figures relate to the wine on hand in Mendoza:

	Hectoliters.
In deposit, end of March, 1902	416, 000
Last crop produced	913, 216
Total	1, 329, 216
Exported from April 1 to September 15, 1902	587, 343
Stock on hand	741, 873

THE FROZEN-MEAT INDUSTRY.

The British Board of Agriculture gives the following interesting statistics relating to the frozen-meat trade in the Argentine Republic:

The frozen-meat trade in that country, which began in the year 1883 with an export of 17,000 carcasses of sheep, has grown steadily every year, and in 1901 the total exports amounted to 3,100,000 carcasses of sheep, 133,000 of cattle, and 500 pigs.

There are at present three companies in the trade—the Sansinena Company, at Barracas, just outside the city of Buenos Ayres; the River Plate Fresh Meat Company, at Campaña, on the River Parana; and the Las Palmas Produce Company, at Zárate, on the same river. These three companies represent a capital of some £800,000 sterling ($3,888,000), employ 2,000 hands, and have a capacity of 15,000 sheep and 720 cattle per twenty-four hours.

The weight of meat and other products which passed through these factories in 1901 was as follows: Preserved meat (tinned meat), 228 tons; frozen meat, 112,000 tons; grease, 859 tons; hides, 14,000 tons; tallow, 14,400 tons; sundries (blood, bones, etc.), 6,000 tons; giving a total of 147,487 tons.

The expense of running the factories is stated to have amounted to £2,743,055 ($12,709,247.30), made up as follows: Staff, £164,725 ($800,563.50); purchase of stock, £2,416,665 ($11,644,991.90); fuel, £45, 000 ($218,700); sundries, £116,665 ($556,325.90).

The freezing companies buy the cattle direct from stock owners, slaughter, clean, and freeze them on their own premises and make regular shipments of the meat, on their own steamers or on steamers with which they have contracts for the purpose. The companies never freeze and store for shipment the meat of private owners. This method is said to have undoubtedly kept down the prices of live stock since the closing of the British ports to Argentine animals, as there is practically no competition among the companies. On the other hand, it is held to have insured the supply of good meat only, carefully slaughtered, cleaned, and prepared. The trade has been reduced to so regular a system that there is no break in arrivals in England, no excessive storage charges are incurred on either side, and no stale carcasses are put on the market. Most of the Argentine frozen meat is landed in Liverpool, the remainder going to London, Cardiff, Newcastle, Hull, and Southampton.

In 1901 thirty-three steamers were regularly employed in this trade between England and the Argentine Republic, having a total carrying capacity of 1,443,000 carcasses of mutton of 56 pounds each.

This trade has not in any way affected the old established industry of drying and salting beef called "*charque*," the countries of consumption and the customers being entirely different in each case.

It is reported that two more freezing companies have been floated and will shortly erect the necessary buildings and machinery, one at La Plata and the other near Buenos Ayres.

BUENOS AYRES GREAT SOUTHERN RAILWAY.

The report of the directors of the Buenos Ayres Great Southern Railway Company, Limited, for the year ended June 30, 1902, states that the results of the working of the railway for the year, including the lines worked under agreement, as compared with the corresponding period in 1900–1901, are as follows:

	Amount.	Difference.	Per cent.
Gross receipts	£2,373,569	+£6,181	0.26
Working expenses	1,097,751	−61,371	5.29
Net receipts	1,275,818	+67,552	5.59
Depreciation of currency balances	3,294	+ 905	37.88
	1,272,524	+66,647	5.53

To the balance on general revenue account of £1,272,523 must be added balance from 1900–1901, £15,900; interest on reserve funds, etc., £21,063; profit on remittances, etc., less discount on bills and interest on loans, etc., £1,222; transfer fees, £591; making altogether, £1,311,301. Deduct interim dividend of 3 per cent on ordinary stock to December 31, 1901, £292,500; interest on debenture stock paid and accrued, £244,826; interest on 5 per cent preference stock, £200,000; rent of Brandzen branch, £19,917; rent of South Coast Railway, £7,783; rent of provincial government port lines, £16,003;

interest payable under agreement for purchase of La Plata branch, pending payments of installments, £11,176; and income tax charges for year, £39,703; leaving a disposable balance of £488,390. Of this available balance on net revenue account of £488,390 the board propose to transfer £5,000 to the pension fund, and to pay a balance dividend of 4 per cent on the ordinary stock of the company, making, with the interim dividend paid in April last, 7 per cent, free of income tax, for the whole year ended June 30, 1902, carrying forward a balance of £93,390.

The conditions ruling during the year have been more or less normal, the produce of the districts served by the railway having been about the average, the result being that the earnings from the principal sources of traffic compare favorably with those of recent years. The feature of the year's working has been the handling of an increased volume of traffic at a considerably reduced cost. This satisfactory result is mainly due to the better condition of the road consequent upon the stone ballasting and renewal of the permanent way, the improved terminal facilities, and the additional rolling stock recently supplied, and there is therefore every reason to assume that the economy will be of a permanent character. The improvements and enlargements which have recently been undertaken at Bahia Blanca are now practically completed, and the company has thereby been placed in a position to cope with the rapid development which is now taking place at this port, and to meet all reasonable shipping requirements for some years to come,

MISCELLANEOUS NOTES.

An Argentine law, promulgated under date of July 10, 1902, permits the importation of plants and seeds into the Republic, subject to previous inspection and to disinfection or destruction, as the case may require. Such importation may be effected through the port of Buenos Ayres only. Persons desiring to import plants or seeds are required to address a petition to the Agronomical Section, setting forth the name and address of the importer, the name and place of origin of the plants and seeds, the means of introduction and date of arrival, as also the purpose and (if possible) the place for which the goods are intended.

A shipment of maize and hay from Rosario to Australia is reported through the British Foreign Office to have been made in September, 1902, which is regarded as preliminary to the establishment of a regular traffic between the two countries concerned.

BOLIVIA.

FREE EXPORTATION OF SILVER ORES AND BULLION.

President Pando has sent a message to the Chamber of Deputies recommending the passage of the following law authorizing the free exportation of silver ores and bullion on and after January 1, 1903:

"Article 1. The exportation of silver ores and bullion produced in the territory of the Republic is hereby declared free of duty.

"Art. 2. It is the duty of every exporter of silver bullion and ores to secure from the national custom-house a waybill showing the weight of the ores and bullion and their grades and destination. For each mark of silver that the ores or bullion contain 10 cents shall be credited as a statistical tax.

"Art. 3. The failure to obtain the exportation waybill referred to in the foregoing article will work a confiscation of the shipment, one-half of which shall go to the informer.

"Art. 4. Mining enterprises, whether made up of private individuals or associations of whatever nature, shall pay 6 per cent of their net profits to the Government, based on their semiyearly balances, an account of which shall be rendered. The tax of 2 per cent on enterprises that exploit other classes of mines, according to the law of November 12, 1894, remains in force.

"Art. 5. For the purposes of this tax the balance that remains after deducting the necessary expenses of exploitation, treatment, administration, and transportation charges shall be considered as the net gain.

"Art. 6. The mining tax, which is collected at the present time on every concession, in accordance with article 16 of the mining law of 1880 and that of November 11, 1897, is hereby fixed at 6 *bolivianos* ($2.29) for the veins, lodes, and shafts referred to in paragraph 2 of said article 16; 3 *bolivianos* ($1.15) for earths and substances enumerated in article 12 of said law, and 50 cents (silver) for those specified in article 13. This shall be considered as a federal tax.

"Art. 7. This law shall become operative on and after January 1, 1903. The Executive is authorized to duly enforce the same."

RUBBER SITUATION.

An official report on the rubber resources of Bolivia and the progress that has been made in their development, by Señor Manuel Vicente Ballivian, the head of the national office of immigration and statistics of that country, which appeared under date of August 2, 1902, in the "Industria de la Goma Elastica en Bolivia," will contribute largely to a proper understanding of the rubber situation in that Republic. The rubber interest is regarded by Señor Ballivian as second in importance only to the greatest natural source of wealth in Bolivia, namely, mining. While the great extent of those regions which constitute the habitat of the rubber tree in Bolivia is widely known, very little really has been done by the authorities to regulate the acquisition of the rubber lands by private parties and their utilization for the benefit both of industrial interests and of the national treasury.

Señor BALLIVIAN during the past ten years, in addition to numerous articles in the periodical press, has written several pamphlets dealing with the development of the Bolivian rubber industry and the importance of more systematic attention to this matter by the State. One such pamphlet was a report on his exploration, in an official capacity, of the territories of the Northwest and the department of Béni in 1893–94. A later report referred to the work being done in the exploitation of rubber in the regions of Béni, Mamoré, Madidi, and Madre de Dios by parties who had been engaged in similar work on the Rio Madeira.

One of the results of the investigations of Señor BALLIVIAN during all these years has been the framing of laws, now pending before the Bolivian Congress, having for their object a reform in the system of granting concessions for rubber *estradas*, abandoning the system of granting very large tracts of land having an illusory number of *estradas*, very often unverified and not accurately designated. In this connection the Brazilian laws regarding the adjudication of unoccupied lands have been followed.

Having established definitely the extent of the rubber resources of Bolivia, and laws having been framed for the encouragement of the exploitation of rubber, Señor BALLIVIAN next interested himself in an investigation into the status of the concessions of rubber lands that had been made in the different Provinces. This report embraces only the details regarding the districts of La Paz, Santa Cruz, the Béni, Cochabamba, and the national delegation of Madre de Dios, leaving out for the present the large Acre district and the territory drained by by the Purús.

This report shows that only a small percentage of the rubber concessions granted have become valid through full compliance with legal requirements. In some cases the concessions have been abandoned after compliance with the preliminary formalities, and it appears that a great portion of the rubber lands is still in possession of the State and could be granted to any capitalist prepared to exploit them.

From the beginning of the year 1896, and up to July 1 of the present year, it appears of all the rubber concessions applied for in the districts above named the legal provisions have been fully complied with only to the extent of 30,179 *estradas*, while 110,000 *estradas*, covered by applications on file, have been abandoned. This suggests to Señor BALLIVIAN that very much rubber territory has been exploited without clear title, which view is supported by the custom-house statistics, which show a constant increase in the exports of rubber. The attention of the Government is called to these facts in order that steps may be taken for the more thorough collection of revenues from rubber.

Señor BALLIVIAN's report, after these general considerations, gives a complete list of the applications filed for rubber concessions in the several departments, with a record of the present status of each concession. The name of the *concessionnaire* in each case is given—several hundred in number—with the location of the property and the number of *estradas* comprised. The book thus forms a valuable basis for whatever steps may be undertaken by the administrative authorities for the closer supervision of the rubber industry.

NATURAL WEALTH OF THE SOUTHEASTERN PART OF THE REPUBLIC.

The Bolivian representative of the "L'Africaine" company of Brussels is authority for the following interesting data concerning the natural wealth of the southeastern portion of the Republic which will soon be traversed by a railroad running from the river Paraguay to the interior of Bolivia.

The mineral resources of this vast territory, extending west from the Paraguay River to 65° west longitude and lying between 16° and 18° south latitude, are incalculable. The topography of this section of the country is rough and mountainous, the whole region having been raised at some remote period of the earth's formation by internal convulsions of nature, shaping in this manner majestic mountains, picturesque valleys, and extensive table-lands.

Erosion and the constant action of the elements have formed many rugged crags and peaks, which stand out in bold relief compared with the quiet, peaceful valleys covered with rich soil, and dotted here and there with running streams, crystal lakes, and a luxuriance of semitropical vegetation probably unequaled in all the world. At places on the mountain slopes, where the surface of the earth has been laid bare by the long-continued action of wind and water, beautiful masses of crystals are found incrusted in the immense deposits of sedimentary rocks, granite, quartz, mica, schists, graphite, and beds of volcanic clays. This region forms a part of the great plateau drained by affluents of the Amazon and Paraguay rivers. The bed of the Juacavaca River, which flows through this portion of the Republic, is exceedingly broken, and at places the clear waters of this stream run for long distances in their precipitous career over crests of solid rock, forming a series of beautiful cascades, and passing through a country the natural scenery of which is sublimely grand and impressive.

The Jesuits, who colonized this portion of Bolivia after the Spanish conquest, were thoroughly familiar with the mineral wealth of the country, and extracted from the rich mines exploited by them gold and silver in abundance. At the present time, due to the isolation of this region and the lack of transportation facilities, the mining operations are insignificant and the valuable mineral deposits of the territory lie dormant and undeveloped. At occasional intervals within the last decade attempts have been made by foreign capitalists to explore the country and exploit and develop some of its virgin mineral deposits, but the obstacles necessary to be overcome in order to successfully carry into operation these enterprises have been so great that practical results have thus far been impossible. The greatest obstacle to the successful development and exploitation of the vast natural wealth of this region, which now lies dormant and untouched, will have been overcome by the construction of the proposed railway, inasmuch as the great and pressing want of this portion of Bolivia at the present time is a system of easy and rapid communication with the outside world and the centers of population, thereby assuring to capitalists and investors a sure and permanent base of supplies from which to conduct their operations. The following minerals are known to exist at various points within the limits of this favored region:

In the neighborhood of Bahia Negra, lime, marble, iron, and manganese; in the Chochis Range of mountains, near Santiago, deposits of auriferous sands; in the vicinity of San Javier, important mines of tin, platinum, gold, and quicksilver; near Santa Rosa, quicksilver and gold; to the north of Concepcion, gold; to the north of San Ignacio, platinum and precious stones; in the immediate vicinity of San Jose, quicksilver and lime; in the neighborhood of Buenavista, silver, petroleum, and coal; to the west and southwest of Santa Cruz, petroleum, coal, lime, stucco, and slate.

The mineral wealth of southeastern Bolivia, great and abundant as it is, is probably not surpassed in richness by the products of the vegetable kingdom with which this particular portion of the country has been so richly endowed by the Creator. Within the wilds of its forests and plains are to be found a great variety of dyewoods and precious medicinal plants from which may be distilled fine essential oils, while the mountain slopes, hills, and valleys abound in valuable construction and cabinet woods. The celebrated ironwood tree of this region attains a height of 18 meters and a circumference of 80 centimeters. The specific gravity of this exceedingly compact and durable wood is 1,250, and the contents of tannin 26 per cent. This wood is used extensively for railroad ties, posts, etc., and is employed in considerable quantities in tanneries.

Another valuable product of the Bolivian forests is the tree known as "Corupan" (*Piptademia cebil*), which grows to a height of 20 meters and attains a diameter of 1 meter. The wood of this tree has a specific gravity of 1,141 and does not decay when immersed in water, which quality renders it exceedingly valuable for use in the construction of ships, bridges, and hydraulic works. It makes a very durable railroad tie, and the bark, which is very thick, contains about 25 per cent of tannin. The tree secretes an abundance of gum arabic, and is one of the most valuable and highly prized productions of the Bolivian forests. Lapacho (*Tubebuza flavescens*) is a tree noted for its great beauty and usefulness. It grows to the height of 20 meters, has a circumference of trunk of 80 centimeters and a specific gravity of 1.100. When sawed into lumber or beams it is greatly esteemed for construction purposes, and is especially suitable for use in the building of hydraulic works and for railroad ties. There are four varieties—the gray, the yellow, the red, and the black—all of which may be distinguished while in bloom by the color of their flowers. The bark is rich in tannin, and the wood is utilized in the manufacture of dyes. Mumday (*Astronium juglandi folium*) is a greatly prized Bolivian tree, which attains a height of some 20 meters and produces a trunk measuring 1 meter in circumference. The specific gravity of this wood is 1,200, and is suitable for railroad ties, telegraph poles, and general construction purposes. There are three varieties—white, yellow, and black. It is also a dyewood.

A great variety and abundance of fibrous plants are found in this part of the Republic. Vanilla beans, cacao, and sarsaparilla grow everywhere in a wild state and attain great perfection. The castor-oil plant grows luxuriantly throughout the entire region and without cultivation. The wagon road from Santiago to San José runs through a grove of wild oranges of unknown extent. This region produces an abundance of all kinds of semitropical fruits. The cultivation of rice, coffee, corn, manioc, tobacco, cotton, indigo, saffron, etc., gives excellent results. Immense tracts are covered with virgin forests, but there are also many prairies and undulating plains on which the raising of cattle would be extremely profitable. The whole region is well watered and is particularly suitable for agricultural and stock-raising industries.

GOVERNMENT PRINTING OFFICE.

A recent report of the Department of Justice and Government to the National Congress shows that from July 1, 1901, to July 1, 1902, the Government Printing Office of Bolivia published 23 editions of Government publications in pamphlet form, aggregating 23,953 copies, and 118 loose sheets, numbering 1,391,790 copies. In addition to the printed matter mentioned, the Government issued 137 editions of "El Estado," the official newspaper, consisting of 1,250 copies each, or a total of 182,950 copies.

DENOUNCEMENT OF CONVENTION WITH FRANCE.

According to the "South American Journal," Bolivia has "denounced" the Convention which it had concluded with France, and as the negotiations between the two Cabinets for the purpose of concluding a new arrangement have had no results, the minimum tariff in France will cease to apply to merchandise of Bolivian origin.

BRAZIL.

TARIFF MODIFICATIONS.

The "International Customs Journal of Brussels" issued the following bulletin in September, 1902, as seventh supplement to No. 6 (third edition):

I.—Circular relative to duty-free importation of articles belonging to diplomatic agents.

[Diario oficial of March 26, 1902.]

The circular of the Ministry of Finance dated March 25, 1902, provides that the exemptions referred to in sections 5 and 6 of article 2 of the preliminary dispositions of the tariff may be granted by simple application of the Minister for Foreign Affairs or of the interested parties themselves.

II.—Decree No. 858, of August 12, 1902, maintaining in force the exemption from consumption duties in the case of dried meat (xarque).[a]

[Diario oficial of August 15, 1902.]

In virtue of the present decree, the exemption from consumption duties granted by legislative decision to dried meat (xarque) is maintained in force, and the formalities intended to secure collection of these duties are repealed.

POPULATION IN 1900.

According to a statement published by the Statistical Bureau of the State of San Paulo the population of Brazil in 1900 amounted to a total of 21,565,000 inhabitants, distributed as follows among the 20 States of the Republic, and including 750,000 for the Federal district:

Minas Geraes	4,277,000	Parahyba	596,000
San Paulo	2,520,000	Sergipe	450,000
Bahia	3,335,000	Piauhy	425,000
Pernambuco	2,089,000	Rio Grande Norte	407,008
Rio Grande do Sul	1,350,000	Santa Catharina	405,000
Rio de Janeiro	1,300,000	Parana	380,000
Ceara	1,000,000	Goyaz	340,000
Alagoas	781,000	Amazonas	240,000
Maranhao	660,000	Espirito Santo	201,000
Para	652,000	Matto Grosso	157,000

---

[a] See second supplement to No. 6 (third edition), section 10 of article 2 of the Law No. 641.

CUSTOMS RECEIPTS IN AUGUST, 1901 AND 1902.

The following are the receipts (in *contos* of reis) of the custom-houses, as set forth below, for the month of August, compared with the same month in 1901:

	1902.	1901.		1902.	1901.
Rio de Janeiro	6,138	5,898	Paranangua	104	153
Santos	2,941	2,479	Parahyba	97	58
Para	1,417	1,033	Florianopolis	89	143
Bahia	1,118	1,070	Paranahyba	41	20
Pernambuco	992	1,106	Victoria	23	26
Rio Grande du Suo	757	678	Aracaju	15	....
Proto Alegre	376	372	Livramneto	15	....
Maranhao	289	170	Penedo	13	8
Ceara	262	129	Natal	8	6
Jaragua	126	170			

AGRICULTURAL BANK AT BAHIA.

The legislature of the State of Bahia recently passed a law authorizing the establishment of an agricultural bank in that State which will operate in loans to the agricultural industry and allied industries. The capital of the bank will be limited to 5,000 *contos*. Of this amount the State will subscribe 4,000 *contos*, to be covered by the additional tax of 1 per cent collected on all agricultural products exported from the State. Interest payable on loans must not exceed 8 per cent. The bank is expected to be in operation by the beginning of the year.

DIAMOND AND CARBON PRODUCTION OF BAHIA.

An extended report on the output of diamonds and carbons in the State of Bahia, Brazil, was issued in the Consular Reports of the Department of State of the United States for August, embodying the information collected by Mr. H. W. Furniss, Consul at the port of Bahia. The paper in reference states that the diamond region of Bahia is divided into fourteen districts, namely: Lençoes, Andarahy, Chique Chique, Santa Isabel, Cravada, Lavrinha, Campestre, Morro do Chapeo, Bom Jesus, São Ignacio, Chapada Velha, Paraguaçu, Sincorá, and Cannavieiras. Geologically there are but two sections, one in the center of the State in the vicinity of the Paraguaçu River and the other in the southern part, along the Pardo River. The first section is the most productive, and has been constantly worked since the date of its discovery, in 1844. Prior to the discovery of the South African mines it was the greatest diamond-producing center, and prices were high, but recently interest in the Bahia mines has diminished.

The most productive portion of the field is about four days' journey from the city of Bahia and is reached by taking a small steamboat which crosses the bay and goes up the Paraguaçu River to Cachoeira (a distance of about 45 miles and consuming from six to eight hours), thence by train to Bandeira de Mello, 254 kilometers (157.7 miles), involving from ten to twelve hours' travel. From Bandeira de Mello it is necessary to go on mule-back the remaining 64 miles to Andarahy.

The Paraguaçu district is about 172 miles long and varies in breadth from 3 or 4 to about 16 miles at its widest part. It includes the mountain ranges known as Serra do Sincorá, from the village of Sincorá northward, and the headwaters of the Paraguaçu and Una rivers, Serras das Lavras Diamantinas, Serra dos Remedios, Chapada Velha, and Serra do Espinhaço as far as the region about the village of Morro do Chapeo. The most productive area seems to be in the foothills to the east of Serra das Lavras Diamantinas, particularly along the many small streams tributary to the Paraguaçu River, with the towns of Santa Isabel, Chique, Andarahy, and Lençoes as centers.

The geological formation of the region is very interesting, and shows that at some time in the history of the world the mountains were thrown up in a hot mass of stone, and the diamonds there found are the carbon which by great heat and pressure crystallized. A considerable portion, for lack of proper conditions, failed to crystallize and is now encountered in hard, blackish masses of irregular shape, known in trade as carbon. The original rock of the mountains is granite. In many places this occurs stratified with a horizontal trend, or at most with a very slight dip, but it is frequently broken by gullies and deep narrow crevasses, the latter reminding one of earthquake phenomena. Mixed with the granite is a sandstone of different degrees of hardness and a conglomerate composed of round, water-washed pebbles with a very hard matrix. In some instances the matrix is of a sandy character, but more frequently it resembles a dark-colored cement. The sandstone occurring beneath the surface is frequently soft, about the consistency of almost dry mud, and is capable of being crushed or even washed into sand by a strong current of water.

Both the sandstone and the conglomerate are of recent formation as compared with the granite, and contain diamonds and carbons, showing that they were also of a more recent formation than the precious stones, which, in fact, are not found in situ, but are in their present position as the result of fluvial action. Sandstone and conglomerate frequently fill the gullies, crevasses, and interstices beneath the layers of granite, but sometimes form strata in basins made by the granite, and in other places appear with the granite as heterogeneous heaps of stones of different sizes. In this section the diamonds and carbons occur together in sandstone and conglomerate, but they can not be removed except from the soft sandstone, because of the impracticability of breaking the rocks without crushing the precious stones. Instead, the miners take advantage of the disintegrating effect of water and weather and they work by removing the débris from the gullies between the rocks and the cavities under and around them, and this they wash for the diamonds and carbons.

The method of mining differs in the different sections. In the most productive one the work is of two kinds, removing the surface disintegration and that in the gullies, crevasses, and beneath the more accessible stones, or mining by tunnels between the stones into the pockets of the mountains and taking out the cascalho found there. The cascalho is usually collected until the week's end and is then laboriously washed, either by pouring the mass into sluices or ditches of running water and agitating it with a hoe or by placing small quantities in large wooden basins and washing it in the running water. In the first instance the object is to wash the soil and lighter particles away, arrangements being made to impede the heavier masses and consequently the diamonds and carbons. The part remaining is carefully washed in the large wooden basins and the rocks picked over by hand. The miners are so accustomed to the appearance of the desired stones that in spite of the fact that there are ordinary stones which closely resemble them they can wash and finally sort a very large quantity of diamond-bearing material in a short time. The other method of mining consists in diving to the bottom of the river bed and removing the silt, sand, gravel, etc., as far as the layer of clay or stone beneath. This system is carried on mostly in the Paraguaçu River, from a point midway between Bandeira de Mello and Andarahy to João Amaro. The center of this kind of work is near the village of Tamandoâ. Six diving machines are located here. Besides the machine divers there are about twenty men who dive naked into the more shallow waters and this number is increased to about one hundred in the dry season and to even a greater number when the periodical droughts arrive.

According to law, all diamond and carbon bearing lands belong to the State. It is possible for a person of any nation to take out a claim by complying with the regulations. These require a claimant to make a general description in writing of the portion desired, which may not be more than 484,000 square meters (578,864 square yards) or less than 29,040 square meters (34,732 square yards), and to file application for the same at the office of the Director of Diamond Mines at Lençoes. If the portion selected has never been leased, notice of the sale of the parcel selected is published, and thirty days thereafter it is put up at auction and sold to the highest bidder. If the claim has had a previous lease, the time for advertisement is reduced to ten days. A claim can be leased for from one to ten years, and may be renewed *ad libitum* upon the payment of 50 per cent in advance of the auction price for the subsequent periods of renewal. At present there are 351 leased claims, and it is estimated that there are 450 other productive claims without lease. For miners who care to work on lots without leases there is issued a license which grants a privilege for a year. Such a license costs about $1.50 in United States money, including stamps. Anyone mining without a license or lease subjects tools and such stones as may be found to confiscation, the State giving one-half of the value of the confiscated property to the informer. In addition to the State fees, there is in each village a miner's tax of 10 *milreis* ($2.40) per miner.

Besides the claims leased in the regular way, there are various concessions which have been granted by the State to private parties and companies, but in all cases to Brazilians, except one concession to a French company at Cannavieiras. In the Paraguaçu region there are six such concessions, which differ in size, but average about 9 square miles, and from which the State receives sums varying from 432 *milreis* ($105.68) to 8,000 *milreis* ($1,920) a year.

This district is the only place in the world where carbons are found in marketable size, the only other place where they have been found at all being the Cannavieiras district. Consul FURNISS has thoroughly investigated the conditions governing the commercial value of carbons and finds that there is no combination or syndicate controlling the market price or the output. In each town of the mining district there are buyers who represent the rival Bahia City firms which are in the carbon and diamond business. These buyers are furnished with large sums of money and are advised by each mail and frequently by special messenger as to the highest prices they can give, these prices being regulated by cable from abroad. While the prices are in the main uniform, there is often competition for a good specimen, the price being regulated abroad by the supply and demand. The output of carbons for the district now averages about 2,500 carats a month, and unless there are improvements in mining and modern methods of machinery are introduced the output will undoubtedly decrease year by year, while the demand is constantly increasing. Immense quantities of carbons are there, but it will take well-directed companies with large capital to take them out, and there are chances for small operators. With the abundance of accessible water power in the section and with electrically run drills, pumps, and other machinery, there is, in the opinion of Mr. FURNISS, fabulous wealth awaiting development.

Carbons are classified as porous, or crystalline, and good. The first variety is being bought from the miner to-day at half the price of the good stones, which are held at 100 *milreis* ($24) per carat if the stone is larger than three-fourths of a carat and at 30 *milreis* ($7.20) per carat for stones of from one-half to three-fourths of a carat, with which are mixed globular diamonds. Carbons of less than half a carat are mixed with "refugo" diamonds, which are bought at 200 *milreis* ($48) an oitava. The largest carbon ever encountered was found in the Lençoes district in 1895 on the ledge of a mountain which had been worked some time before. It weighed 3,150 carats and was purchased from the miner for 80,000 *milreis* (at that time $16,000), one-fourth of the price going to the owner of the claim upon which it was found. This stone frequently changed hands, and was finally purchased by an exporter of Bahia for 121,000 *milreis* (then $25,400) and was shipped to Paris, where it was broken up into marketable pieces. The next big find was in 1901, upon another claim of the same lessee. The carbon weighed 577 carats, and was sold by the miner for 79,000 *milreis* (then $17,380), one-fourth part going to the lessee. The average size of the carbons encountered is 6 carats.

The diamonds found in the Paraguaçu district are not so clear and perfect as those about Cannavieiras, but are said to have more brilliancy. They occur in conjunction with the carbons and many times contain small particles of uncrystallized carbon which materially lessen their value.

All diamonds and carbons from this section are shipped to Paris and London, the largest local house having its headquarters in Paris. Though the United States is a large consumer of carbons, the dealers have always made their purchases in the European markets. This is stated by Consul FURNISS to be due to the fact that it is impossible to make a selection of carbon of an approximate weight in Bahia, as the local dealers insist on selling an assortment, which method satisfies European buyers.

THE BRAZILIAN DIAMOND AND EXPLORATION COMPANY, LIMITED.

By a decree dated the 8th of September, 1902, authority was given the Brazilian Diamond and Exploration Company, Limited, to operate in the Republic of Brazil. The privilege is for the term of ninety years. Within two years from the date of the decree the company must have raised at least two-thirds of the capital to be used in Brazil, which is £225,000.

The company was formed for the purpose of acquiring mining properties in Brazil and developing the same. These include diamond mines, gold, silver, copper, coal, and iron mines. It will carry on the business of stamping, washing, smelting, and otherwise preparing the minerals for the market. It will also undertake the construction, equipment, and administration of railways, tramways, harbors, wharves, irrigation works, sewerage plants, waterworks, etc.

MANÁOS HARBOR COMPANY, LIMITED.

The "Gazeta Commercial e Financeira" contains a notice of the Manáos Harbor Company, Limited, which was recently incorporated in London with a capital of £500,000. The incorporators are Messrs.

C. Booth, T. M. Booth, G. M. Booth, A. L. Deoter, D. M. Fox, F. C. Bateman, and D. A. Little, of London; B. Nymkiewig, of Rio de Janeiro, and A. de Lavandeyra, of Paris.

It is the purpose of the company to acquire concessions and engage in various business enterprises in Brazil. The company will furnish ships' supplies, own fishing boats, engage in the mercantile business, own quarries, establish brick and tile factories and foundries, erect buildings, construct engines and locomotives, manufacture paper, wood, and metal boxes of all kinds, manufacture and sell ice, build cold-storage warehouses, engage in the mining and smelting industries, install gas and electric plants, establish towns and villages and promote immigration to them, and act as bankers.

NEW ROAD IN BAHIA.

The Bahia State Government, on August 14, 1902, entered into contract with Mr. John S. Webster, an Englishman and late superintendent of the Bahia Central Railroad, for the construction of a roadway from Sitio Novo, a station on the Bahia Central Railroad, to Orobó Grande, 70 kilometers (43.4 miles) distant. The contract divides the work into two sections, the first extending from Sitio Novo to Itaberaba, 29 kilometers (18 miles), and the other from Itaberaba to Orobó Grande, 41 kilometers (25.4 miles).

This will be the first roadway constructed in this district, though the chief item of interest in connection therewith is the fact that it is primarily constructed so that the contractor may have the privilege for twenty-five years to convey over it passengers and cargo, either by means of cars pulled by road locomotives of the type used in the United States to pull thrashers, large plows, etc. (traction engines), or by some other more perfect system of mechanical traction, without utilizing rails.

The chief provisions of the contract are the following:

Four months are given for preliminary studies and drawing of plans, etc., of the work; these must be subsequently approved by the State. Twenty-two months after the acceptance of the plans the road must be completed and open to traffic as far as Itaberaba.

In connection with the roadway proper, the contractor is to bridge the Parahuaçu River at Sitio Novo, with a metal bridge 6 meters (6.5 yards) wide and having a footpath on each side, with a space in the middle for the passage of locomotives and other traffic. It is to be 170 meters (185.3 yards) long, with six spans of 20 meters (21.8 yards) and one 50 meters (54.5 yards) long, and must be complete and thrown open for traffic at least one month before the time set for completion of the roadway to Itaberaba. It is leased for five years after completion to the contractor, at 10,000 *milreis* ($2,000) a year, and he has the right both to use the bridge himself and collect tolls from other users.

After the section of roadway to Itaberaba has been inaugurated fifteen months are allowed for the completion of the second section to Orobó Grande.

The material to be used in construction of the bridge and roadway, together with the curves, grades, embankments, etc., of the latter are specified.

The State agrees to pay the contractor 350,000 *milreis* ($75,000) in stated installments at designated intervals for the construction of the roadbed and bridge of the section from Sitio Novo to Itaberaba, and for the roadbed from Itaberaba to Orobó Grande 4,000 *milreis* ($800) per kilometer (0.6214 mile), this latter amount to be paid quarterly as the work progresses.

The State reserves the right to pay either in lawful money or in bonds running not more than six months with interest at 8 per cent. It further agrees to petition the Federal Government for exemption from duty of all rolling stock and materials imported.

Arrangement is made for the State to reimburse the contractor for wells dug to furnish water for the engines, provided use of the wells is granted the people adjacent thereto, and further provided that each well does not cost more than 10,000 *milreis* ($2,000).

A series of penalties is arranged for failure on the part of the contractor to finish the work in the time agreed upon, and provision is made to indemnify the contractor should the State care to rescind the contract.

It is made obligatory that the contractor shall establish telegraph lines and stations along the roadway and shall send all Government messages free of expense.

The engines and other rolling stock are to be furnished by the contractor, who obligates himself to keep the road in good condition, the State maintaining ownership of roadway and improvements thereto.

SUGAR ESTIMATE FOR 1902.

The future Brazilian sugar crops are estimated as follows:

	Bags.
Pernambuco	1,500,000
State of Rio de Janeiro	300,000
Sergipe	400,000
Alagoas	400,000
Parahyba	200,000
Total	2,800,000

The requirements of consumption are calculated at 2,300,000 bags, so that there will remain a surplus for export of 500,000 bags, and it is in relation to this that negotiations are in progress with Portugal, the River Plate, and Chile, and efforts being made to find for it a home industrial application under the form of alcohol.

MISCELLANEOUS NOTES.

During the first half of the current year the customs receipts of Santos are reported to have amounted to 18,155 *contos*, or 3,221 *contos* in excess of the sum for the corresponding period of the last year. This may be taken as an evident proof of the development of the State of San Paulo and of the effective organization of the customs administration at Santos. For the same half year the import duties have produced 12,134 *contos* paper and 3,169 *contos* gold, as compared with 9,762 *contos* paper and 2,579 *contos* gold in 1901.

The *Morro Velho* Company is seeking a concession from the Legislature of the State of Minas Geraes for the purpose of working the alluvial deposits of the Paraopeba River, which is said to be rich in gold and other minerals. The company also proposes to build an electric line between Bello Horizonte and the West of Minas Railway, which will connect four cities with the capital of Minas.

The total of the consumption duties collected in Brazil for the first half of the year 1902 amounted to 17,389,162 *milreis*, compared with 16,713,933 *milreis* for the same period in 1901. This does not include the taxes collected during the second quarter in Matto Grosso nor the revenue from the custom-house of Sergipe.

An electric street-car line has recently been installed in Bello Horizonte, State of Minas Geraes. The length of the line is 14 kilometers.

At Itapetininga are large plantations devoted to the cultivation of the plant *carrapixo*, from which the vegetable fiber known as *aramina* is obtained.

In the fiscal year 1901–2 the export duty collected on Herva matte amounted to $1,062,968, or $278,768 more than the budget estimate.

A bill was recently introduced in the Brazilian Congress for the establishment of a Department of Agriculture.

CHILE.

COAL DEPOSITS.

In a recent report to the Foreign Office the British Vice-Consul at Talcahuano states that some interest has lately been shown in the working of coal in that district. Operations have been begun in several places, and small quantities of coal have been shipped to Talcahuano, chiefly for domestic purposes. It is apparent that those interested in this business need capital before work on any considerable scale can be expected. There seems to be no question as to the existence of coal in the neighborhood, and its working on proper lines would assuredly be a matter of great importance to the port of Talcahuano. The Cerro Verde Mine, at Penco, has lately been assisted in its operations by the investment of further capital, and very encouraging reports are forthcoming. As far north as Tome coal has been found, and lately boring operations are being engaged in. Coal therefore being found in Tome and even as far north as Dechata, at Cerro Verde, and at Santa Ana, halfway between Penco and Concepción and to the westward, it seems almost a certainty that this is a carboniferous region, and it is somewhat surprising that, considering the situation, so little interest should have been shown in working these deposits.

CONCESSION FOR AN AERIAL RAILWAY.

On August 30, 1902, the President promulgated a law passed by the National Congress, authorizing Mr. ABELARDO PIZARRO to construct an aerial railway from Juncal, Chile, to Paramillo de las Cuevas, Argentine Republic. By the terms of the concession the concessionaire will receive a subvention of $40,000 gold (18d. to the dollar) for a period of fifteen years. In return for this subvention the concessionaire agrees to carry free of charge the mails and employees actually engaged in the mail service of the Government, and to make a reduction of 25 per cent from the regular tariff rates for Government employees. The Government reserves the right to use the posts of the railway in case it desires to construct telegraph lines across the mountains. The subvention becomes payable from the date the entire line is open to traffic. The construction of the railway must commence within eight months from the promulgation of the law, and shall be completed within twenty-seven months after that date. Failure to comply with this provision of the contract will work a forfeiture of the concession.

COLOMBIA.

CONSULAR FEES FOR THE CERTIFICATION OF INVOICES.

The British Board of Trade Journal for August 28, 1902, publishes the fact of the reception by the Board of Trade through the British Foreign Office of a copy and translation of a decree, going into effect on August 1, respecting the regulations to be observed and the fees to be levied by Colombian consular officers when dealing with invoices and manifests of merchandise destined for Colombian ports and the taxes leviable on tonnage and on certain parcels-post packages. The following is the substance of the decree:

Commercial invoices are, for the purposes of consular certification, divided into four classes, viz:

1. Invoices referring only to articles of iron, steel, copper, zinc, or wood, destined for the machinery of industrial companies, railways,

steamers, electric lighting and telegraph apparatus, telephones, printing apparatus, manufactures of glass or earthenware, of stearin, of tissues, or of articles which by official declaration are regarded as being of public utility.

2. Invoices of which the value does not exceed $200.
3. Invoices of which the value exceeds $200 and does not exceed $500.
4. Invoices of which the value exceeds $500.

The fees chargeable for consular certification of the above classes of invoices are as follows:

On invoices of the first class, $3 for each $1,000 or fraction thereof.

On invoices of the second class, $6 for each $1,000 or fraction thereof.

On invoices of the third class, $8 for each $1,000 or fraction thereof.

On invoices of the fourth class, $10 for each $1,000 or fraction thereof.

Invoices referring to articles containing precious stones are chargeable at the rate of 40 per cent.

Invoices referring to articles of gold are chargeable at the rate of 10 per cent.

Invoices referring to articles of platinum or silver are chargeable at the rate of 3 per cent.

Charges on manifests are leviable by consuls at the rate of $5 for the first 100 packages and $1 for each additional 100 packages or fraction thereof.

Foreign merchandise disembarked in any of the ports of the Isthmus of Panama to be sent to other national ports requires a manifest with corresponding certificate, for which certificate a charge of $3 silver will be made for the first 50 packages and $1 silver for each additional 100 or fraction of 100.

When a consular invoice is not in the possession of a custom-house at the time of the examination of the merchandise, the goods will be valued in gold and the customs will, on that basis, collect from the importer a fine equal to four times the consular fees chargeable under the regulations, without prejudice to any other penalty imposable under the customs code.

A tax of 2 per cent, payable in gold or its equivalent in paper money, is to be collected on the invoice value of parcels-post packages containing articles of gold, silver, platinum, or precious stones, in lieu of consular fees.

A tax of $1.50 gold is to be collected for each ton of merchandise intended for national commerce which is unloaded in Colombian ports, but the British Legation at Bogota, in forwarding the decree, points out that "Colombian vessels are specially exempted from this charge, and therefore British ships will enjoy the same exemption under the terms of the treaty of 1866."

EMERALD MINING IN THE REPUBLIC.

A report on the condition and trade of the Republic of Colombia, with the exception of the District of Panama, for the year 1901, recently issued by the British Foreign Office, states that the emerald mines of Muzo and Coscuez, the property of the Colombian Government, have produced the finest emeralds in the world. They are at present rented to a British company. Up to the year 1875 all the emerald mines in the country were the property of the nation. After that date the Government granted the right of exploration and working on private enterprise, reserving only the right to the Muzo and Coscuez mines. Since then several companies have been formed and considerable capital expended.

The most promising of these seem to be the Somondoco mines, worked by a British company. The Department of Boyaca, from a mining point of view, is of a totally different geological formation from the other mining departments of the Republic, no gold or silver being found save in the few rivers emptying into the Magdalena. The one great mine of production is that of Muzo, famous since the year 1555 for the production of the finest emeralds of the world, a stone in the rough weighing 2,330 carats having been taken from one of the many veins of this mine. These mines are the property of the Colombian Government, which leases them for periods of five years to the highest bidder at public auction, which takes place in the capital of the Republic one year previous to the expiration of the term in force. The value of the production of these mines has always been kept a secret by the lessors.

The mode of working is similar to that adopted in Europe in large quarry mines. The top soil is removed by hydraulic monitor washing until the slate rock is left bare, this being cut away by means of long, strong bars handled by native labor, which is cheap, abundant, and very good, and with the aid of blasting with black powder manufactured at the mines, and employed where no damage can be done to existing veins. The precious stones are then extracted from the veins, which run in no given direction or angle in this slate-rock formation. The stones are found chiefly in pockets, but occasionally some are found isolated from the vein, necessitating constant care and vigilance.

The immense amount of débris resulting from the cutting which necessarily falls from the quarry is carried away by means of discharges of water from reservoirs at an elevation above the workings by means of siphons which empty the lock, when full, automatically, great care being taken conveniently to direct this great discharge of water so that no damage may be done to existing productive veins. The short term of the lease does not admit of any very extensive system being adopted, as, for example, in Kimberly, to prevent stealing of the stones, but special care is taken in the selection of the work people, who, in turn, watch most carefully all operations on the banks. The stones, after extraction, are classified into their respective classes, ranging from first to sixth quality, by the superintendent in charge, who forwards them, insured, to Europe. The greater quantity are forwarded to British India to be cut, and afterwards the better qualities return to the markets of Europe for sale.

The theory is that the silicate of glucha and alumina ran in the tissures of the veins, and there, cooling off, formed this particular hexagonal crystal, and according to its abundance produced greater or less quantity, the quality varying according to the favorable or unfavorable conditions existing. The Coscuez group is said by tradition to be very rich, and the quality of the stones said to be of the particular "cañutillo" form and of superb quality. Many attempts have been made to find the actual "locus in quo" of the productive formation, but up to the present without success. An emerald-producing formation of great importance has been discovered by the aid of old Spanish parchments in the Somondoco district, locally known by the name of Chivor, but as yet has not been worked by the discoverers; at present only the old Spanish tunnels and workings, indicating that in past centuries great mining operations had been carried on there, have been overhauled, giving proof of the existence of emeralds of considerable crystallization. It is intended to open up these extensive workings, so long lost to the world since suspension of the works by order of the King of Spain in the year 1792, owing to the fact that all the emerald properties, Muzo and Coscuez included, produced a loss and not a profit to the Kingdom of Spain.

This was due to the dishonesty of the captains of the mines, who, by law, were obliged to deliver the fifth part of the production to the King of Spain in return for the assistance afforded to them by the royal house in the form of troops and ammunition to protect them from hostile tribes. It was during this suspension that so many mines were lost sight of and completely overgrown with tropical vegetation, as were also the bridlepaths which led to them through the forest and mountains. Even towns with 2,000 inhabitants, dependent on the mines, were abandoned; some have been rediscovered by accident, a hunter coming upon a paved street or some stone foundations of a house. The Spaniards always built their houses with stone foundations. Among these lost towns Muzo may almost be counted. At one time it boasted of 17 churches and a large population. To-day there is one church and only about 300 people. It is interesting to note that, with one or two exceptions only, all the mines of any worth now being worked were known to the Spaniards, and in the majority of cases considerable workings are evident.

PLATINUM PRODUCTION.

[From the Industrial Bulletin of Bogota.]

In the statistics showing the production of platinum of the world Russia occupies the first place with an approximate output of about 90 per cent of the total quantity mined. Colombia, which is exceedingly rich in platinum deposits, produces such a small quantity of this useful and valuable element that it is scarcely worth while to include her at the present time in the platinum-producing countries of the globe. In the United States, due to a thorough investigation and careful study of the mines, platinum has been discovered in small quantities in many of the minerals extracted therefrom, and while the production in itself is small it is great in the sense that it represents a large amount of intellectual effort expended in search of the noblest of metals. The first place among the platinum-producing countries of the world will, in the long run, undoubtedly be accorded to Colombia, inasmuch as it is extremely improbable that platinum deposits will ever be found at any other place on the surface of the earth that will equal or even approach in richness and extent the platinum deposits encountered on the slopes and in the alluvial sands of the rivers which course through the immense territory embraced between Atrato and San Juan, in the Republic of Colombia. Not only is platinum found at Chocó, but also in Santa Rosa de Osos, Frontino, and many other places in Colombia.

COSTA RICA.

TARIFF MODIFICATIONS.

The President of the Republic has promulgated a decree declaring that mops made of cotton waste or fibers for cleaning floors, and cane brushes used in coffee yards in preparing coffee for the market, shall be appraised at the rate of 15 centimes per kilogram. These modifications became operative on and after September 29, 1902.

Ordinance of June 26, 1902, establishing the régime applicable to fishing nets.

["La Gaceta" of June 26, 1902.]

By virtue of present ordinance nets intended for fishing, provided or not with leads or floats, shall pay 6 centimes of a colon ($0.06) per kilogram with the surtax of 50 per cent.

THE COAL SUPPLY OF THE REPUBLIC.

The coal deposits of Costa Rica are large and easy of operation, it being further claimed that the product is essentially the same in origin and geological character as that of the anthracite regions of Pennsylvania. The possible advantages accruing from exporting coal from Costa Rica to the United States are at present under consideration, and measures have been taken to develop the latent resources of the first-named country.

The "Pacific States Investor" for November, 1902, reports that the Costa Rica Petroleum and Coal Company has received numerous requests for a conference with capitalists of the United States with a view to exploiting on a large scale the coal deposits of the Company situated on the Atlantic side of the Republic. Arrangements are being made for the immediate opening up on a large scale of the Company's mines in Talcamanca Province, and an expert representing a San Francisco syndicate has been authorized to make a thorough examination of the coal lands on the Gulf of Nicoya previous to negotiating a lease of twenty years' duration.

In commenting on the coal situation in Costa Rica, the "Mexican Herald" makes the following statement: "The company [above referred to] controls the immense petroleum and coal resources of the Republic of Costa Rica, in Central America, under a fifty years' cession from the Government. The holdings of the company include over 50,000 acres of the best coal and oil lands in the world, which, on the surface, is excellent tropical agricultural land, suitable for coffee, cocoa, banana, and rubber plantations. The company has started work and, having a practical monopoly in the field, big dividends are assured."

TRADE-MARK CONVENTION WITH BELGIUM.

The Congress of Costa Rica has approved and the President has signed a trade-mark convention between this Republic and Belgium. The trade-marks to which this convention applies are those which legitimately belong to the manufacturers and traders using them. The convention is to be valid for five years, dating from exchange of ratifications; but if neither of the contracting parties shall give notice of its abrogation before expiration of the five years, it shall remain in force from year to year until such notice shall be given.

CUBA.

MESSAGE OF PRESIDENT PALMA.

In President PALMA's second message to the Cuban Congress, delivered at the commencement of its sessions on November 3, 1902, the Chief Executive said, in substance, that of the recommendations contained in his last message some of them had already become laws, and others, such as those relating to the organization of the provinces and the municipalities, are under discussion and would probably become the subjects of legislative enactment before the adjournment of the present Congress.

The President considers it imperative that a law regarding the organization of courts of justice be passed at the earliest possible moment, in order that these tribunals may duly exercise their functions, and especially is this true of the Supreme Court, whose duty it is to decide upon the constitutionality of laws, decrees, and regulations.

Since the birth of the Republic the most perfect order has reigned and every part of the country has been free from disturbance and without the occurrence of any cases of organized brigandage throughout the island. This state of affairs is greatly to the credit of the Cuban people, and especially of the rural population, since, notwithstanding the scarcity of work or the lack of occupation, due to the economic crisis through which the country was passing, they have been patient and resigned to circumstances, giving in this manner positive proof of their peaceful nature, morality, patriotism, and love of order.

The sanitary condition has continued to improve until, at the present time, it compares favorably with that of many of the cities of Europe and America. The annual death rate in June last was 23.56 per thousand; in July, 24.98; in August, 22.81; in September, 17.86, and, according to data furnished by the department of sanitation which has not yet been published, the death rate in October last was 17.96, or the lowest of any month for a period of thirty-two years.

It has been thirteen months since the last case of yellow fever occurred in Havana, and fortunately the entire island is free not only from the presence of that terrible scourge, but also from other contagious diseases, including smallpox, so that the sanitary condition of the island is even better than it was during the intervention of the military government. The same system that was followed by the military government has been continued, the personnel having been slightly increased during the last few months. The strictest vigilance is exercised by the sanitary authorities to prevent the reappearance of yellow fever or any other contagious diseases of a malignant character, and strong measures are being used for the purpose of checking the death rate arising from cases of consumption and enteritis. A common sanitary law for the entire island is urgently needed, since even in Havana, as in the rest of the Republic, the only sanitary regulations existing are those put in operation by the military authorities during the period of intervention, many of which are not in accord with the prescriptions of the constitution.

The President states that the postal and telegraph services of the nation require more commodious buildings and larger grounds in order to satisfactorily perform their important functions.

The relations of the Government of Cuba with other nations of the world are highly satisfactory. The Republic has been recognized by thirty-three countries, as follows: United States, Mexico, England, France, Spain, Belgium, Guatemala, Costa Rica, Haiti, Switzerland, Santo Domingo, Venezuela, Italy, Nicaragua, Ecuador, Salvador, Denmark, Portugal, Russia, Germany, Holland, Bolivia, Brazil, Austria-Hungary, Greece, the Argentine Republic, Chile, Peru, Honduras, Paraguay, Uruguay, and Sweden and Norway.

The relations of Cuba with the United States are particularly cordial and friendly. Proof of this fact is shown by the good will of the Government of the United States toward the Cuban Government respecting the negotiations, already initiated, for the celebration of a treaty of commerce between the two nations on the basis of mutual tariff concessions. The special object of the treaty is to obtain positive advantages in the markets of the United States for Cuban products, especially for sugar and tobacco, which are staple products and form the principal industry of the island, constituting in reality the foundation of the agricultural wealth of the Republic. It is to be hoped, from the sympathy of the American people toward the Cubans and the manifest interest which the President of the United States has for the prosperity of the Republic of Cuba, that a satisfactory arrangement will be arrived at.

President PALMA also says that the condition of the treasury is very encouraging. The collection of the public revenues is being effected with regularity and system, and the current and special expenses of the Government have been scrupulously met. After the payment of all the expenses up to and including the last day of October, 1902, there remained a balance in the general treasury of $1,561,942.06. The current expenses from the 20th of May to the 30th of June last were paid with the funds which the military government of the island had designated for that purpose. The current expenses of July, August, and September were paid from the revenues collected under the laws of July 12 and September 5. The special or extraordinary expenses have been made out of the credit fund of 300,000 *pesos* referred to in the law of June 3, the balance of this fund still on hand being 157,067.44 *pesos*.

The average monthly expenses during the last four months have been $1,295,428.48, or about $147,063.62 less than for the same period of the preceding year, as will be seen from the comparative table annexed, bearing in mind that in the first of said sums are included the special or extraordinary expenses, as well as those expenses that have recently been created.

	Payments.	
	1901–2.	1902–3.
July	$1,148,821.25	$1,236,852.39
August	1,766,279.49	1,260,957.93
September	1,320,374.07	1,228,912.29
October	1,534,493.60	1,454,191.25
Total	5,769,968.41	5,181,713.86
Monthly average	1,442,492.10	1,295,428.48

Difference, $147,063.62.

At the time of turning over the military government there was a balance on hand of $539,984.99, the difference between this sum and the amount of $681,191.02, mentioned in General Wood's statement at that time, being explained in the President's message to Congress under date of June 27 last. At the present time—five months after the inauguration of the Government of the Republic—the balance on hand in the treasury is $1,561,942.06. The receipts have been as follows:

From May 20 to 31	$416, 953. 39
June	1, 373, 641. 84
July	1, 552, 638. 13
August	1, 239, 048. 34
September	$1, 596, 401. 89
October	1, 610, 196. 48
Total	7, 788, 880. 07

Public instruction has not been neglected, but has continued in its usual and ordinary course, the policy of the Government being to promote and encourage in every way possible the public-school system as well as the cause of higher education.

The various enterprises under the direction of the department of public works, initiated during the period of the military government have been continued. In the province of Pinar del Rio two wagon roads, a wharf, a bridge, and other constructions have been terminated. In the province of Havana two unfinished highways and a bridge have been completed. In Matanzas two wagon roads which were unfinished at the time of the turning over the military government have been completed. Work on the wharf at Matanzas is being continued, as is also the deepening of the bay at Cardenas. In the province of Santa Clara four wagon roads have been completed; in that of Puerto Principe two bridges have been constructed and two reconstructed; in the province of Santiago the construction of three wagon roads, four bridges, and a wharf at Gibara have been completed. In the light-house service works of importance have been carried on, seven light-houses having been erected and a number of light-houses repaired. Four public buildings have been completed, and numerous schools and other public edifices have been repaired.

The Department of Engineering of the city of Havana, which since the 20th of May last has formed a part of the Department of Public Works, has under its supervision the cleaning, sanitation, repair and conservation of streets, parks, and drives, and the construction of new parks and avenues. When this department was transferred to the Department of Public Works, its average monthly expenses amounted to $133,000, or more than $1,596,000 per annum, but since its incorporation into the Department of Public Works, its average monthly expenses have been reduced to $89,000, or $1,058,000 annually. The total amount at present destined to the engineering department to be expended in the city of Havana, as already indicated, is $862,000, which sum seems to be sufficient for that purpose.

Nothing practicable has yet been done in the Department of Agriculture, due to a lack of funds for that purpose. The Agricultural Department requires a large annual appropriation in order to properly attend to the development and improvement of the great agricultural industry of the nation, an industry for which the island is particularly adapted, and which must always be the principal source of wealth of the Republic.

BUDGET FOR FISCAL YEAR 1903-4.

The budget for the fiscal year 1903-4, which was submitted to Congress on November 1 last by President Palma, is a very complete and interesting document. The total revenues are estimated at $17,514,800, and the budget shows a surplus of $2,614,032.28, as will be seen from the following detailed statement of the receipts and expenditures of the nation:

RECEIPTS.		
From customs duties	$14, 781, 000. 00	
From tax on spirits	1, 200, 000. 00	
From the consular service	250, 000. 00	
From internal revenue	500, 000. 00	
From communications	420, 000. 00	
From State property	119, 800. 00	
From other sources	243, 200. 00	
		$17, 514, 000. 00
EXPENDITURES.		
For the Legislature	413, 319. 68	
For the Executive	85, 700. 00	
For the departments of state and justice	310, 396. 00	
For the department of government	4, 529, 998. 00	
For the department of finance	1, 801, 117. 88	
For the department of public instruction	3, 721, 790. 84	
For the department of public works	2, 923, 011. 82	
For the departments of agriculture, industry, and commerce	165, 319. 50	
For the department of justice	949, 314. 00	
		14, 899, 967. 72
Excess of receipts over expenditures		2, 614, 032. 28

The President says, in conclusion, that the present budget is the lowest that Cuba has had since the middle of the last century, with the favorable circumstance of being applied now, also for the first time, in all its parts to wants and needs that redound to the benefit of the nation; that when Congress enacts laws regulating and organizing all that relates to the general, provincial, and municipal administrations, and that when it is possible for the provinces and municipalities to defray their local expenses, the amount of the general budget will be notably reduced, inasmuch as more than 25 per cent of the same is now destined to the payment of provincial and municipal expenses. It will then be possible to use large sums annually in the improvement of the country and in the encouragement of its general interests, and the development of the same will bind together the structure of Cuban independence upon the firm foundations of industry, education, and public and private wealth.

BOOT AND SHOE TRADE.

The latest comparative data bearing on the development of a Cuban market for boots and shoes are shown in the statistics for the eleven months ended May 31, 1901, as compared with that part of the fiscal year ended May 19, 1902, the close of the American occupation, no allowance being made in these figures for the unexpired portion of the month. In the former period the importation amounted to 1,899,041 pairs, valued at $1,429,109, of which Spain sold 74 per cent, or $1,061,739 worth, at an average price of 69 cents per pair, and the United States furnished one-fourth of the entire supply, or $361,957 worth, the average price being $1 per pair. In the eleven months ended May 19, 1902, the United States trade shows a material increase, the total imports for this period amounting to 1,925,373 pairs, valued at $1,557,770. That country supplied nearly one-third, or $486,585 worth, averaging 96 cents a pair, while the imports coming from Spain were approximately 68 per cent, or $1,067,792 worth, a slight increase over the previous period, although the article furnished seems to be of a somewhat better grade, averaging 75 cents a pair.

This result must be somewhat gratifying to the shoe dealers of the United States, as it has been accomplished notwithstanding the fact that the peculiar last adapted to the Cuban fashion required persistent efforts on the part of American merchants to compete favorably with the long-established trade of Spain.

DOMINICAN REPUBLIC.

TARIFF MODIFICATIONS.

Under date of October 4, 1902, United States Minister W. F. POWELL, of Port au Prince, sends translation of a decree of September 12, 1902, regarding import duties in Santo Domingo, which reads as follows:

"Considering that the importation duties with which in some countries our agricultural products are burdened, are equivalent in certain cases to prohibition, and that it is a good economic doctrine to facilitate to the said products an entry into those countries, by means of reciprocal commercial treaties, since it is not possible to have absolute control of free exchange.

"On the advice of the council of the secretaries of state, it is decreed:

"ARTICLE 1. There shall be four classes of tariffs for the collection of the importation duties of the Republic—the minimum, the moderate, the additional, and the maximum. The minimum shall cover those import duties at present in vigor or those that may be established in the future; the moderate, the same duties, with an augmentation of 30 per cent; the additional, the same duties, with a 70 per cent augmentation; and the maximum, the same duties, with 100 per cent augmentation.

"ART. 2. For the purpose of this decree, there shall be fixed in this Republic on sugar, coffee, cocoa, and tobacco the following amount for each 50 kilograms (110.2 pounds) of weight: On sugar of 94 to 98° grade of purity, $2 United States gold; on that lower than 94° and on cane sirup, $1.50 United States gold; on cocoa, $10 United States gold; on coffee, $12 United States gold; on tobacco, $10 United States gold.

"ART. 3. The minimum tariff shall be applied to all goods coming from any country where there is no duty levied on any one of the aforesaid Dominican products, more than 20 per cent of the value that is fixed on the articles before mentioned or where the introduction of the said products shall be free. There shall be applied the moderate tariff on all imports from the countries that collect on any of the said Dominican products 21 to 30 per cent of the value expressed above. There shall be applied the additional duties to those that come from countries that collect on any of the Dominican products indicated 31 to 40 per cent of the value above expressed. There shall be applied the maximum tariff to those products that come from countries that collect in any manner whatever on the Dominican products indicated more than 40 per cent of the value above expressed, or where the entry is prohibited.

"SECTION 1. The colonies of a nation, as well as the divers entities that constitute a confederation or State, shall be considered for the purpose of this decree, as the State or nation to which they may belong, though they of themselves may not collect importation duties on the Dominican products described in article 2, or may collect them in a less proportion than the States or nation to which they appertain.

"SEC. 2. The products that may come from these countries to the Republic shall be considered as from such countries, unless it be known with certainty that such products are not the result of the agriculture or industry of those countries, or unless the particular marks that the articles bear, or other clear and precise indications, determine the country of origin without any kind of doubt.

"ART. 4. The increase of the duties that articles shall pay when coming from countries where more than 20 per cent is charged on the Dominican products, to which this decree refers, shall be applied thus:

"Ten per cent four months after the promulgation of this decree;

30 per cent seven months after the said promulgation; 70 per cent ten months after; and the whole, one year after the promulgation of this decree.

"ART. 5. With the nations with whom we may have treaties of reciprocity the stipulations of these treaties shall regulate the application of this decree."

GUATEMALA.

MODIFICATION OF THE TARIFF ON COFFEE.

Decree of August 4, 1902, relative to exportation of coffee.

[El Guatemalteco No. 99, of August 11, 1902.]

In virtue of the present decree and subject to any other considerations which could modify same, the effects of the decree No. 617, dated August 12, 1901,[a] are prolonged for a further period of one year, to expire on June 30, 1903; in consequence of which exportation of coffee in the bean shall continue to be charged at 6 pesos the quintal, payable in Guatemalan currency, and parchment coffee shall pay an export duty in proportion to the above-mentioned tax.

---

[a] See thirteenth Supplement, II.

INDUSTRIAL AND ECONOMIC CONDITIONS IN 1901.

A report received at the British Foreign Office on July 4, 1902, from the British Consul at Guatemala contains a concise and interesting résumé of the industrial and economic conditions prevailing throughout the Republic in 1901. Portions of this report, being extracts from various public and official documents, have previously appeared in the MONTHLY BULLETIN, but the remainder is reproduced as containing information of present value.

Mr. TRAYNER states that the general condition of Guatemala has, without doubt, improved within the last two years, especially in 1901. Both exports and imports have increased in value, and there has been manifest a desire on the part of the Government to effect some improvements in the system of agriculture, as may be seen in the importation of tobacco and other seed from abroad with a view to experimental culture, also in the foundation of agricultural schools and the promulgation of rules and regulations to be observed by those making such experiments and undertaking new branches of agriculture. The accounts of the crops harvested in the different districts are all satisfactory and show an extension of area under cultivation, and it is hoped that it will not be long before it shall be unnecessary for Guatemala to import such articles as wheat, maize, beans, and rice, all of which can be grown with little expense and labor in the country itself.

Progress has been made in the building of the northern railroad and the carriage road which is to run parallel to it and be coterminous with it. The railroad works have been carried on for a distance of 20 miles nearer to the capital, the embankment and ballasting having been completed throughout this stretch and is now ready for placing the sleepers and rails, these latter materials having been imported; it is now merely the question of a little time till the line shall be in running order for the distance. The old part of the line has been thoroughly repaired and the service of trains as far as El Rancho is quite satisfactory. Work on the carriage road is being carried on with vigor and energy and is progressing rapidly. The length of time necessary for transit between the interior and the United States will be so diminished by the completion of these roads that there will undoubtedly result a largely increased trade, both export and import; freights will decrease, and the country along the railway and carriage roads will be opened up and cultivated and commerce and agriculture alike aided and stimulated.

Two important decrees affecting foreign merchants were recently issued and approved, firstly, that from January 1, 1902, 15 per cent of the original duties, 30 per cent of which had been suspended, is replaced; and, secondly, extending until June 30 the term of the payment of the $6 duty levied on the export of coffee.

In his report on trade conditions Consul TRAYNER states that there is at present a good demand for agricultural implements, such as plows, harrows, rakes, thrashing machines, etc., and attention is called to the description of the improved kinds of plows required for the satisfactory turning up of the dry, hard soil of the country. The scale on which is carried on upon one of the plantations visited by the Consul previous to making his report is shown by the statement that the extent is over 3,000 acres, upon which are produced annually from 10,000 to 12,000 hundredweight of coffee; 30,000 hundredweight of sugar; 22,000 gallons of milk; 300,000 bottles of aguardiente, with about 2,000 head of cattle, while from 900 to 1,300 laborers are employed.

The total value of the exports of the Republic increased in 1901, as compared with the preceding year, though some items show a falling off. The quantity of coffee advanced from 651,629 hundredweight in 1900 to 673,344 hundredweight in 1901, and the value from £1,297,187 to £1,352,425, Germany taking the largest share, followed in order by the United States and the United Kingdom. The sugar export remained practically the same, the values for the two years being £38,572 in 1900 and £38,098 in 1901. The trade in bananas has flourished and increased wonderfully, the United States being the only purchaser. The number of bunches exported in 1901 more than doubled the number for 1900, the values being £26,269 and £12,123, respectively. Exports of india rubber, cacao, timber, and hides decreased. The following table shows the principal exports for 1901, and the countries of destination:

Articles.	Quantity.	Value.	Country.
Coffee .... cwt..	673,344	£1,352,425	Germany, United States, United Kingdom.
Sugar .... do....	55,200	37,098	United States, Central America.
Bananas .... bunches..	262,691	26,269	United States.
Hides .... cwt..	7,018	18,865	Germany, United States.
India rubber .... do....	4,420	49,510	United States, Germany.
Timber .... feet..	2,155,696	8,623	United Kingdom, United States.
Other articles	....	11,107	Do.
Total	....	1,503,897	

According to a report issued by the Government Agricultural Board, the crops for the year were as follows:

From an acreage of 11,648 acres, 295,940 bushels of wheat were taken. This was a great advance over 1899, when the amount produced was 36,000 bushels, while the area sown extended over 27,000 acres. Rice culture showed a decrease, the quantity harvested being 2,800 hundredweight from 672 acres of land. Maize is one of the most important crops, as it largely forms the food of the Indian population, as well as of the mills and livestock of the country. It is necessary to import a considerable quantity, as the home-grown grain is not sufficient to supply the demand. In 1899 the land under cultivation was 221,600 acres and yielded about 860,167 bushels, while in 1901 the crop harvested declined to less than 600,000 bushels from 185,800 acres. Beans are also an important crop as well as an item of import, and in 1901 30,400 bushels were produced from an area of 20,100 acres. In all, there are at present 1,972 farms sown with wheat and rice, comprising about 337,568 acres, and 16,038 farms growing maize and beans, extending over 3,588,704 acres.

Coffee plantations have increased in number during the past three years. In 1888 there existed 572 plantations, which yielded approximately 446,430 hundredweight, while in 1900 there were 772 plantations. The crop of 1900–1901 was the largest ever produced in the Republic and brought good prices. This was followed, however, by a short production in 1901–2, though the quality seems to be up to the average. The decline in production was aggravated by a number of severe earthquakes in the coffee-producing districts, and though, according to Mr. TRAYNER's report, it will be possible to dig out a large quantity of the coffee itself, the quality—that is, the color—will not be improved by exposure to the elements.

The cultivation of the rubber tree and the export of the product is a growth entirely of the last few years and is an industry which is admirably suited to the coast districts of the Republic and should more than make up for any possible permanent decline in the coffee-growing industry.

The report of the Minister of Finance for 1901 shows a decided improvement in the financial and commercial situation of the country, as is shown by the following statement:

"The revenue from the customs, the most important we possess, which was estimated in the Budget at $5,997,500, produced during the year $8,513,260, an amount which exceeded the estimate by $2,515,760 and the returns for 1900 by $4,940,325. Of this increase, $1,794,713 was levied in duties on imports, while the remaining $3,145,612 was levied on exports. As regards the excise duties on liquors and Government monopolies, it is shown that the revenues from these branches amounted to $3,775,892, an increase of $468,392 upon the estimate for the year, and of $407,087 upon the amount realized from the same sources during the year 1900. * * * The returns from the special services, fixed in the estimates at $350,000, amounted to $503,929, an excess of $153,929 over the sum calculated on, and of $149,578 over the returns for 1900, which only reached a total of $354,351."

While some of the remaining taxes did not quite reach the figures attained in the preceding year, the Minister cites the fact that 1900 showed an increase.

The sum total of the national revenues, including returns from the postal and telegraph services, in 1901, amounted to $14,444,330. The expenditures amounted to $1,006,220, leaving a net revenue of $13,438,110.16, as shown by the following:

Customs	$8, 513, 260. 88	
Expenditure	7, 855. 85	
		$8, 505, 405. 03
Liquor excise and Government monopolies	3, 775, 892. 98	
Expenditure	117, 687. 15	
		3, 658, 205. 83
Taxes	1, 651, 246. 55	
Expenditure	72, 588. 45	
		1, 578, 657. 10
Total		13, 742, 268. 96
Deficit from post-office	110, 617. 48	
Deficit from telegraph office	193, 541. 32	
		304, 158. 80
Net total		13, 438. 110. 16

The following table gives a comparison of the revenues for the years 1900–1901, and shows the improvement which has taken place:

	1901.	1900.
Customs	$8, 505, 405. 03	$3, 566, 553. 51
Liquors and Government monopolies	3, 658, 205. 83	3, 247, 692. 88
Taxes	1, 578. 658. 10	1, 509, 069. 14
	13, 742, 268. 96	8, 323, 415. 53
Minus deficit in postal and telegraph services	304, 158. 80	848, 980. 13
Total	13, 438, 110. 16	7, 974, 435. 40

Increase in revenue, $5,463,674.76.

There are at present 53 schools in the city of Guatemala, of which 25 are public, under Government inspection and taught by masters appointed by the authorities. The others are private institutions and include a school for both boys and girls of the German colony only. This school, which was endowed by the German Government, was provided at the request of the colony, in view of the fact that the number of German children was more than sufficient to keep up a school for themselves and the parents naturally desired the instruction of their own children to be carried on in their native language. There are also among the various schools a kindergarten and a mercantile school.

Among the public works of importance during the year were the inauguration of 6 new telegraph stations and 7 public telephone stations, 70 miles of telegraph line being constructed. The telegraph system now extends over 3,000 miles and the telephones over 250 miles, while there are 157 stations for the former and 777 for the latter.

REGULATIONS FOR THE CUTTING OF TIMBER AND EXTRACTION OF RUBBER.

With regard to the cutting of timber and the extraction of rubber, the following rules have been drawn up and published by the Government:

"ART. 1. No timber-cutting business may be established on a large scale without a previous contract with the Ministry of Public Works. The circuit in which the cutting is allowed must be stated exactly in the contract; the words 'large scale' shall be held, for the purpose of these regulations, to mean any cutting amounting to 50 trees or more.

"(2) The cutting of 10 or fewer trees, which may be required by inhabitants of the district for such works of construction as houses, boats, etc., may be granted by the written license of the Political Chief, who shall specify the number of trees to be cut and the spot from which they are to be taken.

"(3) No concession for timber cutting on a large scale shall be for a longer period than five years, and shall only be granted on the understanding that a certain duty will be levied for every ton of mahogany or cedar cut.

"(4) In order to supervise the removal of timber and collect the proper duties, offices will be established in convenient places for the counting, measuring, and marking the timber with a national stamp.

"(5) Every person enjoying a concession will be obliged to bring his timber to one of these stations, in order that it may be counted, measured, and marked by the officials.

"(6) In the case of concessions lying on the banks of a river below a station where such an officer is situated, the concessionary must not float out his timber into the main stream until an official shall have come to count, measure, and mark it.

"(7) All the logs of timber which are transported without being marked with the national stamp shall be forfeited, and the concessionary shall be liable to a fine of $40 currency for each ton.

"(10) In order to prevent fraud, the Government agents may demand that the concessionaries show in the ports or other places the accounts or embarkation papers for the timber, and if this has already been sold, the bills of sale."

The above regulations are by article 18 made appliable also to the cutting of dyewood and the extraction of the dye, which is to be brought to and weighed by the officials as in the case of mahogany and cedar logs.

Further articles provide rules concerning the extraction of rubber and other gums or resins. Any unnecessary destruction of trees yielding such products is to be severely punished. In extracting rubber the use of the machine or any other instrument than a special knife, the pattern of which may be had at the office in the district, is strictly forbidden.

As in other cases, the rubber or other product must be presented for weighing by the officials, and anyone found engaged in this business without having the proper Government license is liable to imprisonment and fine, the product being likewise forfeited.

CONTRACT WITH THE UNITED FRUIT COMPANY.

A contract signed between the Government of Guatemala and the United Fruit Company affecting ships calling at Livingstone and Puerto Barrios contains the following provisions:

(1) The United Fruit Company undertakes to carry all the correspondence (written and printed), and the parcels post from and for the Republic of Guatemala between the ports of New Orleans, Belize, Puerto Barrios, Puerto Cortez, Ceiba, Truxillo, Bluefields, Greytown, Puerto Limon, Bocas del Toro, and Colon, on all the company's boats. The said boats shall make the trip between Puerto Barrios and New Orleans twice a week, and shall give a fortnightly service with the other ports above named.

(2) The steamships shall remain in Puerto Barrios sufficient time to allow of the unloading and loading of merchandise and correspondence and the disembarkation of passengers.

(4) During the period of this contract the tariff of freights and passenger fares which is annexed shall not be augmented without the previous consent of this Government.

(6) The company will incur a fine of $100 for every twenty-four hours of delay which may occur in the arrival of any of its boats, and $200 for any trip entirely omitted, unless owing to unforeseen circumstances or acts of violence.

(7) The company's ships can moor alongside the wharf at Puerto Barrios at any hour of day or night, but can only load or unload during the legal hours, viz, from 6 o'clock in the morning till 5 in the evening, but under certain circumstances the hours of work may, with the permission of the authorities, be prolonged till 9 o'clock in the evening. The mail vessels will always be dispatched with the greatest possible quickness, and will have the right of precedence over any other ships whatsoever.

(10) In payment of these services which the company undertakes, the Government will subsidize it with $30,000 per annum (currency), payable monthly in advance, $2,500 each month.

(11) The company undertakes to provide larger vessels as the commerce between the above-named ports shall increase.

(14) The company will strictly prohibit the sale by its servants of liquors, wines, and other dutiable articles in the ports of Guatemala. Whatever fine may be imposed in consequence of the infraction of

this article, shall be paid by the individual offender and recovered through the company.

(15) On the presentation of a written request from the judge or commandant of the district in which is situated the port, the officials of the company shall hand over to the proper authority any person required by the justice of the country, whether he has embarked in that port or elsewhere, always supposing that he is charged with offenses such as are recognized by the principles of modern international law.

(17) The company must keep an agent in the capital, and another in Puerto Barrios, with sufficient powers to represent it in treating with the Government or with individuals, or appearing in courts of justice.

(18) The company's vessels and their crews are subject to the laws and regulations of the country so long as they are in Guatemala waters.

(19) This contract shall last for three years, counting from January 1, 1901, and shall be extended at the end of this period if the Government so desire.

(20) The company shall, during the period of this contract, take such quantities of bananas as they may arrange with individual fruit growers, undertaking to pay not less than 62½ cents for every bunch of 9 hands in height, 50 cents for every bunch of 8 hands, and 25 cents for every bunch of 6 hands whenever it is possible, and in these cases three bunches of 6 hands shall be at the rate of 50 cents. No bargains shall be made in which the conditions shall be less favorable to the vendor than those laid down in this article, or, if made, they shall be considered null and void.

(21) Any questions arising between the company and fruit vendors shall be settled by the arbitration of some person chosen by both parties.

(22) Any question arising relative to the interpretation or execution of this contract shall be settled according to the laws of the country, by two arbitrators, one chosen by each party. The decision of these arbitrators, or of a third nominated by them beforehand, shall be final and without appeal, it being understood that in no case will the company have the right of appealing to diplomatic intervention.

FINANCIAL DECREE.

Under date of June 12, 1902, Consul-General J. C. McNally, of Guatemala City, inclosed to the Department of State of the United States a translation of a Government decree in regard to Guatemalan bonds. The total amount of the foreign debt of Guatemala liquidated to June 30, 1902, it appears, were as follows:

Principal on June 30, 1898	$7,216,046
Half of interest from 1898 to 1901 convertible in bonds	432,963
Half of interest to June 30, 1901	288,642
Interest from 1901 to 1902	288,642
Total	8,226,293

The decree states:

"As security for the payment of the debt the collectors of customs shall deposit monthly in the Guatemala bank a sum sufficient to cover a twelfth part in gold of the total amount required for the yearly service. These sums shall be forwarded to the agents in London."

Consul-General McNally reported on June 23, 1902, that the silver peso is no longer current in the Republic of Guatemala. The money in use is paper currency and fractional nickel coins. The present value of the paper peso is about 15 cents in United States currency. In Government decrees as to values, customs duties, or other internal revenues where the peso is mentioned reference is made only to the paper peso, which fluctuates in value from day to day. While the Guatemala silver peso commands a premium at a ratio of about 3 for 1, the coin is not in ordinary circulation and is growing noticeably scarce. A Government decree of some time back provided that all obligations or debts contracted when silver was the current currency could be paid in paper. For some time past exchange has been about 700 per cent premium for United States drafts or gold currency.

REGULATIONS FOR THE EXTRACTION OF SARSAPARILLA.

With regard to the extraction of sarsaparilla, it is understood that the industry is free to every inhabitant of the Republic who obeys the necessary rules. A written request for a license, drawn up on stamped paper, must be presented to the political chief of the district, stating the locality where he proposes to work, the number of workmen employed, the length of time for which the license is desired, etc. The duties imposed must be duly paid. The license must then be properly registered, all the details being noted, and no license shall be good for more than one year without being renewed.

A copy of the regulations is to be given to each person obtaining a license, and the infraction of these or of any one of them will, *ipso facto*, cause such license to expire.

The person holding such license may put up houses, huts, or any necessary workshops under the condition that on the expiration of his license such improvements remain the property of the municipality or departmental government.

One indispensable condition is that at least two roots be left on each plant so that it may grow again, and, of course, persons holding licenses for the extraction of sarsaparilla are expressly forbidden to engage in the extraction of rubber or any other substance than that mentioned in the said license.

A minimum duty of $1 (currency) shall be paid on every 100 pounds of sarsaparilla obtained; and the offices where the duty is to be paid are specified in the regulations.

The political chiefs of the departments shall have discretionary powers as to the number of licenses which should be granted for the same region, and are to take care that these are not too numerous.

The license will expire (1) at the end of the period for which it has been granted; (2) if it is proved that the person holding it has destroyed all the roots of one or more plants or has broken any other of the rules laid down. Besides the forfeiture of the license, various fines and penalties are enumerated for cases of fraud or infraction of the laws and regulations.

Anyone desiring to enter upon this business on a large scale, i. e., when treating of the extraction of more than 10,000 pounds, or when license for more than a year is desired, must apply directly to the Minister of Public Works, and a formal contract with the Government must be concluded.

HONDURAS.

LAPSE OF CONCESSION TO HONDURAS SYNDICATE.

United States Consul W. E. ALGER, of Puerto Cortez, under date of September 23, 1902, reports that on account of the failure of the company styled the "Honduras Syndicate" to carry out the terms of its contract, the concession granted it by the Government (to construct an interoceanic railway, settle the foreign debt, and establish a bank) has lapsed. The syndicate was composed of Americans, and the contract was entered into in 1897. The syndicate was bound by the contract to construct a bridge over the Ulua River within four years, and, having failed to do so, it was expected that the Government would, in May, 1902, take possession of the road. The syndicate, however, asked for a prorogue. The request was presented to Congress, which adjourned without taking action. It is expected that the matter will be settled at the next session, which will be held this winter.

BANANA PRODUCTION.

According to advices received from the United States Consul at Puerto Cortez, during the month of July, 180,000 bunches of bananas were shipped from that consular district to New Orleans and Mobile.

In addition, some 100,000 bunches were paid for and destroyed by the contractors, which, together with the fruit lost by noncontractors for lack of a purchaser, would make over 300,000 bunches of bananas produced in one month in the Department of Cortés.

The payment for and destruction of fruit here leads to the belief that there is now an overproduction, though it is alleged that the contractors' wish was to limit the importations into the United States and thereby keep up prices.

Taking into consideration the new plantations which will come into production next year, the month of July, 1903, should show an exportation of 500,000 bunches of bananas from this district—that is, if purchasers can be secured for all the fruit grown.

MISCELLANEOUS NOTES.

Consul W. E. ALGER reports from Puerto Cortez, August 26, 1902, that there has been a notable decline in the customs receipts at that port during the first six months of 1902, on account of the fact that during 1899 and 1900 Honduras exported to Cuba some 30,000 head of cattle, the value of which, coming into the country, made money plentiful, and enabled the people to buy freely. He adds: "Honduras since 1900 has had no market for her cattle. In the past she depended on Guatemala, but financial conditions in that Republic have closed the market. If an opening for the cattle of Honduras could be secured, her importations would increase at least 50 per cent."

Consul W. E. ALGER writes from Puerto Cortez, September 1, 1902, that United States manufacturers of electric supplies and of material for waterworks may find an opening to sell their goods to the industrial company recently organized at Ceiba. The capital of this company (about $10,000) is entirely paid in, and as much more money as may be necessary will, it is said, be subscribed.

The Government of Honduras has decided to have its postage stamps and postal cards engraved abroad this year, and the work is to be done in the United States. It has also arranged for a supply of silver coin to be minted in Philadelphia.

MEXICO.

TRADE STATISTICS FOR 1902.

The preliminary statistics of the foreign trade of Mexico for the fiscal year ending June 30, 1902, show that the imports of Mexico (gold value) came from the following portions of the globe in the quantities mentioned, the figures for the preceding fiscal year being also furnished for the purpose of comparison:

	1900–1901.	1901–2.
Europe	$8,956,971.89	$6,380,111.76
Asia	545,410.29	514,309.08
Africa	26,938.62	25,030.06
North America	35,201,400.35	37,450,613.84
Central America	70,044.75	41,091.93
South America	140,212.27	156,101.38
West Indies	58,009.00	53,851.65
Oceania	84,466.12	35,239.73
Total	65,083,453.29	64,656,349.43

It will be observed that Mexico's imports from Europe diminished by $2,576,860.13, and that the imports from the countries of North America, embracing the United States and Canada, increased by $2,249,213.49. Of this increase practically the whole must be credited to the United States, whose importations to Mexico amounted in 1900–1901 to $35,189,955.85 and in 1901–2 to $37,435,099.29.

The following table showing the imports from the countries of Europe during the two years under review reveals a diminution during the last fiscal year, as compared with the preceding one, with respect to almost every country of importance of the old world with which Mexico trades, the decline of British commerce being the most marked. The only exception is Belgium, which shows a substantial gain, due to the heavy purchases of steel rails. Below is the table in reference:

Countries.	1901–2.	1900–1901.
Germany	$6,451,099.24	$7,079,953.15
Austria-Hungary	354,401.75	419,901.32
Belgium	1,074,743.17	758,706.65
Spain	2,719,909.77	2,856,774.65
France	6,296,001.72	6,564,235.65
Great Britain	8,266,096.33	9,924,553.34
Holland	235,246.35	279,278.23
Italy	397,450.60	536,203.15
Norway	79,056.00	102,905.22
Portugal	41,265.45	55,676.40
Russia	3,062.83	1,626.20
Sweden	49,789.77	31,636.06
Switzerland	405,811.53	333,943.52
Other countries	16,177.25	11,578.44
Total	26,380,111.76	28,956,971.89

The importations for the two years under comparison embrace the following items and respective valuations:

Articles.	1901–2.	1900–1901.
Animal substances	$4,735,158.80	$4,860,719.95
Vegetable substances	10,732,951.24	10,185,243.18
Mineral substances	20,605,521.54	19,031,290.91
Dry goods	8,368,751.28	9,212,506.76
Chemical and pharmaceutical substances	2,653,654.42	2,585,320.34
Spirituous, fermented, and natural beverages	2,792,656.99	2,788,920.07
Paper and its applications	1,911,181.91	2,215,620.07
Machinery and apparatus	8,194,321.47	9,531,653.94
Vehicles	1,368,535.34	1,446,737.85
Arms and explosives	1,387,106.77	1,512,767.64
Miscellaneous	1,906,509.67	1,712,672.58
Total	64,656,349.43	65,083,453.29

The value of exports from the Republic for the year 1901–2 aggregated $156,168,145.66 (silver) against $148,659,001.71 (silver) in the preceding year, the items being precious metals to the value of $68,897,126.17 in 1901–2, as compared with $81,376,319.78 in 1900–1901, and other articles valued at $87,271,019.49 in 1901–2 against $67,282,681.93 in 1900–1901.

PROMOTION OF THE COTTON GOODS INDUSTRY.

The act of the Mexican Congress, passed on June 6, 1902 (as noted in the MONTHLY BULLETIN for July, 1902), having for its object the protection and fostering of the growing industry of cotton goods manufacturing, renders the following data extracted from a report issued by the Mexican Minister of Finance of pertinent value:

At the close of the fiscal year 1900–1901 there were 153 cotton factories in Mexico, as against 144 and 125 at the end of 1899–1900, and 1898–99, respectively. The quantities of raw cotton consumed during each of the three periods under consideration were, in kilograms of 2.204 pounds, as follows:

1898–99	26,518,059
1899–1900	28,985,253
1900–1901	30,262,319

The following table shows the production of all the factories during each of the fiscal years 1898–99, 1899–1900, 1900–1901.

Fiscal years—	Pieces.	Thread.
	Number.	*Kilograms.*
1898–99	10,239,799	1,896,042
1899–1900	11,552,952	1,884,401
1900–1901	11,581,523	1,837,302

The value of sales in 1900–1901 is stated to have been $33,877,214, as compared with $35,458,577 and $29,753,414, respectively, in the two previous years. The total number of workmen employed on June 30, 1901, was 26,709.

Following is an abstract of the act referred to:

The Executive of the Republic is empowered to return all or a part of the internal-revenue tax collected in conformity with the decree of November 17, 1893, in all cases where woven cotton goods are exported through custom-houses of the Republic for use or consumption in foreign countries. The Executive is also empowered to grant exporters of woven cotton goods of native manufacture a drawback in a sum of not exceeding 8 cents per kilogram (2.2046 pounds) net on all import duties, port charges, and additional duties that may have been collected on the imports of raw cotton from foreign countries, which raw cotton has been manufactured into woven cotton goods. All woven cotton goods of native manufacture that may have been exported under the stipulations expressed in the foregoing article may be reimported in conformity with the terms of article 11 of the custom-house regulations. In such case, however, the amount of drawback which may have been allowed by the Government must be refunded to the Treasury at the time of the reimportation of said woven cotton goods.

TRADE WITH GREAT BRITAIN.

The trade of Mexico with Great Britain during the five fiscal years from 1896–97 to 1900–1901, according to late official statistics published in the "Mexican Journal of Commerce" for November 1, 1902, was as follows, the pounds sterling in which the values of the imports are declared in the custom-houses being reduced to dollars at the rate of 5 to 1 and the export valuations being given in Mexican silver:

Fiscal years.	Imporis.	Exports.
1896–97	$6,881,701	$14,280,527
1897–98	8,105,696	14,775,638
1898–99	9,211,221	14,094,978
1899–1900	10,483,200	12,458,047
1900–1901	9,924,553	12,033,076

POST-OFFICE STATISTICS, FISCAL YEAR ENDING JUNE 30, 1902.

The general post-office statistics for the fiscal year ending June 30, 1902, as published by the "Diario Oficial," show an increase of 12.35 per cent over the preceding fiscal year, the total of the operations in 1901–2 being $2,399,232.34, against $2,135,520.82 in 1900–1901. The sale of postage stamps last year amounted to $2,049,680.63, against $1,844,815.40; rents from postal boxes last year $60,591, in the preceding year $54,759, a gain of $5,832; fines and forfeitures last year $32,452.84, against $22,597.61 the year before; postal orders, interior, $218,355.14 last year, against $180,534.92 the preceding year; and international orders, $3,737.59 last year, against $3,307.78 the year before, a total gain in money orders of $38,250.03; editors' drafts $34,415.14 last year, against $29,506.11 the preceding year, a gain of $4,909.03, which together make the total of $2,399,232.34 for 1901–2, a clear increase of $263,711.52 over 1900–1901.

THE PUBLIC DEBT.

According to Treasury figures, published in the "Boletín de Estadística Fiscal" for 1900–1901, the total public debt of Mexico on June 30, 1901, amounted to $250,715,856.50. The amount payable in gold was $113,910,620, reducing the pound sterling to dollars at the rate of five to one. Of this, $113,853,900 bear 5 per cent interest per annum, and is known as the Conversion Loan of 1890. The balance, $56,720, bears 6 per cent interest and represents the outstanding bonds of the Bleishroeder Loans of 1888, 1890, 1893, and of the Tehuantepec Railway.

The amount payable in silver and bearing interest was $135,509,-

271.12. Of this, the bonds of the 3 per cent consolidated debt represent $50,415,461.64; the bonds of the 5 per cent interior redeemable debt, series one to four, inclusive, represent $73,766,474.48 (exclusive of the fifth series of $20,600,000, issued or being issued in 1902), and the remainder, $11,327,335, bearing 6 and 7 per cent interest, represents outstanding bonds issued for railway subsidies.

The amount payable in silver, and not bearing interest, known as the floating debt, was $1,296,965.38, and represents balances on sundry old accounts, unpaid because never collected by the interested parties.

The summary is:

Debt payable in foreign money, estimated at $5 per pound sterling	$113,910,620.00
Debt payable in silver:	
Bonds, earning interest	135,509,271.12
Bonds, not earning interest	1,296,965.38
Total debt June 30, 1902	250,716,856.50

In the budget for the current year (1902–3), as approved by Congress, the amount required for public debt is put at $22,216,893. Of this sum, $7,629,193 are for the expenses of the service of the debt payable in foreign money abroad, and includes exchange and situation, national banks' commission, bank in Berlin commission for acting as agent, and sundry minor and necessary outlays; $2,431,000 are required for the debt payable in silver in Mexico, compromising the 3 and 5 per cent bonds of the consolidated and the redeemable debts, respectively, interest and amortisation of subsidy bonds of the Vera Cruz and Pacific Railway, and interest on cost of Vera Cruz sanitation works, and $789,000 for the civil and military element of this silver debt. After these disbursements, $11,317,700 remain for interest and amortisement for the public debt in general, according to the respective contracts and subsidy concessions.

According to the terms of the conversion loan of 1899, which constitutes a little less than one-half the total debt, the annuity for interest and amortisement is secured by 62 per cent of the total annual import and export duties received in all the Mexican custom-houses, which duties are remitted periodically to the National Bank of Mexico direct. The bank, as the duties are received every month, appropriates the 62 per cent to the service of the debt, and places the balance of 38 per cent at the disposal of the Government. The inevitable expense of the service brings the interest on the capital of this 5 per cent gold debt to about 5.62 per cent.

In the estimates for the cost of exchange on this debt in 1902–3, the average value during the year of the Mexican dollar in London is calculated at 22½d., in view of the probable continued decline of silver, and the total revenue receipts are estimated at $64,823,400.

THE PORT AND TRADE OF VERA CRUZ.

A valuable report published by the British Foreign Office in July, 1902, and covering the commercial and industrial conditions of the port of Vera Cruz for the calendar year 1901, forms the basis of the following information. Mr. FREDERICK LEAY, His Majesty's Consul at the port in reference, states that as regards the value of merchandise and goods of various kinds passing through Vera Cruz, that port still leads the rest of the Republic, and adds that there is little likelihood of any change in this respect, as it is, without doubt, the natural point of entry for the centers of distribution in the southern part of Mexico. Furthermore, the coal and coke trade to the City of Mexico and Pachuca, which was formerly a practical monopoly for the Mexican Central Railway via Tampico has, under the altered terminal conditions now existing in Vera Cruz, been almost completely diverted to the latter port. From 800 to 1,000 tons of coal are daily handled over the piers of both the Mexican and Interoceanic Railways.

The building of the harbor of Vera Cruz, which has extended over a period of seven years, is practically completed and ready to be taken over by the Government. It has been found that despite the natural cost of maintenance of protection to shipping against gales and hurricanes the expenses of keeping up the work have been relatively small. In addition to other works projected, there are now in course of erection new post and telegraph offices, and also what practically amounts to a new building for the transaction of custom-house business.

The four railways at present entering the city have made a combined proposition to the Government for the construction of suitable terminal facilities embracing equipment for the handling of merchandise, both imports and exports, the construction of a joint passenger station and hotel and other improvements, which, if carried out, will materially benefit the port. The Government has recently thrown open to public use two new warehouses for the clearance of inward cargo.

Work on sewerage and waterworks has been actively engaged in since November, 1901, and the entire system will, it is hoped, be completed by the middle of the year 1903, the general sanitary conditions of the port being greatly benefited thereby.

In connection with his report on the altered conditions of travel resultant from the reconstruction of the Tehuantepec Railway, now in progress, Consul Leay cites the following figures in support of his statement that this route will prove a powerful factor in the trade between the Atlantic and Pacific oceans. For example, from New York to Liverpool it is approximately the same whether a vessel goes to Colon or to Coatzacoalcos, but from Salina Cruz north on the

Pacific side it is quite a different matter, as the under-mentioned table of distances will show:

	Miles.
Colon to Panama	47
Panama to Punta Arenas, Costa Rica	454
Panama to San Juan del Sur, Nicaragua	610
Panama to Amapala, Honduras	779
Panama to La Unión, San Salvador	800
Panama to San José de Guatemala	1,002
Panama to San Benito, Mexico	1,121
Panama to Tonalá, Mexico	1,223
Panama to Salina Cruz, Mexico	1,303
Salina Cruz to San Francisco[a]	2,170

Another important railway project, and one which will be completed or nearly so during the year 1902, is that of the Vera Cruz and Pacific Railway, a company formed and financed principally in Baltimore, United States. This line is of standard gauge and will run from Córdoba, a town of considerable importance on the Mexican Railway, situated some 66 miles from Vera Cruz, to Santa Lucrecia, a station on the Tehuantepec Railway. This distance of 200 miles is to be supplemented by a branch road to be constructed from the station of Tierra Blanca to Vera Cruz, making a total length of line of 260 miles. All the materials for construction, as well as the rolling stock, have been purchased in the United States.

There is also being constructed a 2-foot gauge railway, under the name of "Ferrocarril de Córdoba á Huatusco," which will run between the two points mentioned, a total distance of about 60 miles, and passing through a particularly rich section of country devoted to coffee raising. This enterprise is being carried on entirely by local capitalists, and as the construction is being effected on a most economical, although at the same time efficient, basis, it will, no doubt, prove a good investment for the promoters.

The official returns of the sanitary status of the city show a total number of deaths in 1901 of 1,928, against 2,026 in the preceding year, the death rate per thousand in 1901 being attributable to yellow fever in the ratio of 3.43 as against 60.84 due to other causes.

Imports through this point in the fiscal year 1901 show an effective increase to the value of £71,825, as compared with the preceding year, and while those from the United Kingdom and France show notable declines, those from Germany and the United States advanced in valuation. Cotton, woolen, and linen textiles, which form the leading items, show a decreased valuation of £117,404, due mainly to the advancement of the industry locally. The shipment of ores and precious metals through the port destined for the United States remained practically the same for the two periods under comparison, whereas those destined for the United Kingdom advanced from £393,220 in 1900 to £571,870 in 1901. For both the countries mentioned, "agricultural and other items" show notable declines in value.

---

[a] Full particulars concerning this road were published in the MONTHLY BULLETIN for September, 1902.

COMPLETION OF THE MEXICAN CENTRAL LINE TO THE PACIFIC.

The "Mexican Herald" furnishes the particulars of the contract between the Mexican Central Railway and Messrs. HAMPSON & SMITH to complete the Central's line to the Pacific. This railway has a branch running from its main line at Irapuato to Guadalajara and thence to Tuxpan, which latter place must not be confounded with the little port of the same name in the State of Vera Cruz.

The agreement provides for the building by the contractors of 73 kilometers on the new Central branch to the Pacific coast for approximately $3,500,000.

The line will extend from Tuxpan to Colima, and on this short piece of track there will be 13 tunnels and 17 bridges, the longest tunnel being 430 feet and the longest bridge 600 feet, the height of the highest bridge to be 175 feet.

The contract calls for the completion of the work within twenty-six months. The building will commence at Tuxpan and continue toward the coast.

MONTHLY MAIL SERVICE BETWEEN PORTS ON THE GULF OF MEXICO.

The "Official Journal" of August 9 publishes the text of a contract entered into between the Mexican Government and the agent of the North German Lloyd Steamship Line for the establishment of a regular monthly service between the ports of Tampico, Vera Cruz, and any other of the following Mexican ports on the Gulf of Mexico: Coatzacoalcos, Frontera, Laguna, or Progreso; and Bremen, Antwerp, one or more Spanish ports, and one or more Cuban ports.

The company binds itself to carry for the Mexican Government, free of charge, between any of the above-mentioned ports, all mail matter as well as 10 metric tons of merchandise, either from or to Mexican ports.

In return for carrying the mails and the free transport of the 10 tons of merchandise for the Government the vessels of the company shall be exempted from the payment of 40 per cent of the tonnage dues established by the decree of July 1, 1898. The vessels of the company are also allowed to carry on a coasting trade in accordance with article 293 of the customs ordinance. The company is permitted to keep at the ports where its vessels touch the necessary lighters, boats, and tugs which may be required for the proper service of their line, which will be allowed the privileges granted by this contract.

The contract is to remain in force for three years from the date of publication and can be extended for a similar period should neither of the parties denounce it in the meantime.

DRAINAGE AND WATERWORKS AT TAMPICO.

The contract to construct the works for supplying the city of Tampico with water and for its sanitation, according to the plans and specifications submitted to the Government, has been given to Mr. WILLIAM ASTOR CHANLER, of the United States. The contractor must begin the works within six months from the date of the contract, August 15, and finish them within three years from the same date. The price of the works is $2,187,529.73, and will be paid by the bonds to be issued by the state of Tamaulipas, and also by 2 per cent of the customs duties collected in the port of Tampico. The bonds will pay the amount that the 2 per cent on duties does not cover, and will be issued at 80 per cent of the face value to the Central Bank of Mexico which has agreed to take the whole issue at this rate. The 2 per cent of the customs duties in Tampico will be set aside after the work is done to form a redemption fund for the bonds which will carry 5 per cent interest payable at the end of each three months in the city of Mexico, and the rent received from the water will also be set aside for the same purpose.

The contractor guarantees compliance with the obligations assumed by a deposit of $50,000 of the 5 per cent bonds of the redeemable debt in the Central Bank of Mexico, which is to be kept there while the contract lasts, or they may be changed for an equal amount of the Tamaulipas state bonds issued to the Banco Central.

STUDY OF ENGLISH IN PUBLIC SCHOOLS.

According to a decree published in the "Diario Oficial" of September 10, 1902, the English language is to be taught systematically and practically in the National Preparatory school. The first article of the decree in reference prescribes that the professors of English must give all importance to the instruction of the pupils in that language so that they may acquire a vocabulary sufficient for daily use and for the expression of ordinary events and general necessities. The decree also defines explicitly that the oral system must be followed in classes and that no language other than English shall be spoken during lesson hours. It is considered that a knowledge of this tongue is necessary for business purposes in Mexico as well as Spanish.

MANIFESTS FOR MEXICAN PORTS.

Vice-Consul J. G. PAGES reports from Vera Cruz, under date of October 7, 1902, that a recent Treasury decision of the Mexican Government provides a fine for the failure of masters of vessels carrying cargo from a foreign port to several ports in Mexico to procure certified manifests for each port for which cargo is destined. It has been the custom of masters to secure one manifest only for the several ports of the Republic, and it has been necessary for the customs officials at the first port of entry to issue certified copies of such manifest for the other ports to be touched. It has now been decreed that when a manifest is brought to the first port of entry the collector of customs may issue certified copies for the other ports, collecting for each copy $10 gold, or its equivalent at the existing rate of exchange at time of issue at the port of destination, and $5 Mexican currency (about $2 gold) in addition for each copy as a fine for failure to obtain separate certified manifests from the Mexican consul at the port of departure.

THE CULTIVATION OF CANAIGRE.

The cultivation of a canaigre plant which is indigenous to some parts of the United States and Mexico, forms the basis of a new industry. The amount of tannin that is used in the world is constantly increasing and has to be looked for in plants other than those already known. The principal substances that are used for tanning now are oak bark, hemlock bark, and sumac. Last year in England alone they used 136,284 tons of tanning substances, and in the United States the consumption of these amounted to a million and a half tons.

The growing demand for leather also increases the demand for tan bark, and the visible supply is deficient. The tanners and scientific men are looking in the chemical as well as in the vegetable kingdom for a new method to produce tannic acid. This has been discovered in the root of the canaigre, the Latin name of which is "*Rumex hynienosepalas.*"

The name canaigre is a corruption of the word *caña aigre*, meaning sour cane, a name given to this plant by the Mexicans. The plant is an annual, about the size of a small bush, growing to the height of from 15 inches to 3 feet, but having large tuber roots like sweet potatoes, and varying in size as does the sweet potato. The color is very much the same. It is a root handsome in appearance, and grows wild in the arid regions of New Mexico, Arizona, California, and Mexico, but nowhere does it attain such size as about 100 miles south of El Paso, where it grows in great profusion. It is a plant of slow growth, taking about five years to mature. The trouble heretofore has been that after gathering the crop that grew wild there was no other to fall back upon, but before long this will be remedied, as several years ago the farmers around Demong planted large acres to canaigre.

In 1898 the Department of Agriculture analyzed the canaigre, and found that the roots contained 35 per cent of tannic acid. The result of this discovery was that a large shipment was sent to Germany, but this arrived in bad condition, as it fermented en route, but after many experiments the growers have learned better how to handle it and thoroughly dry it before shipping.

ARCHÆOLOGICAL RUINS IN OAXACA.

The "New York Sun" of October 5, 1902, reports an archæological discovery of the first importance recently made in the vicinity of the city of Oaxaca, in the southern part of Mexico, by LEOPOLDO BATRES, Government Archæologist of Mexico, who accompanied Prof. MARSHALL H. SAVILLE, of the American Museum of Natural History, in his researches in that region. The ruins of a great city, older than any previously discovered on the American continent, have been uncovered, and the objects found in the temples and tombs thus far excavated seem to link this city with both Egypt and China. The ruins are more extensive than those of Mitla, only a few miles distant, and appear to have been covered with the dust of ages before Mitla was begun.

The explorers went to Oaxaca for the purpose of excavating certain old Zapotec mounds or tombs, and the discoveries thus far made more than justify their efforts. The ruins uncovered by Señor BATRES are situated upon the summit of Monte Alban, which rises about 1,200 feet higher than the valley of Oaxaca and is about 6,000 feet above sea level. The mountain is only a few miles from the city of Oaxaca, the sides and top having been cultivated by the natives for years. The *patio* or courtyard of what may prove to be the greatest temple ever built upon the American continent was covered with a cornfield. Scattered over the mountain top are mounds, or *mogotes* as they are called in Zapotec, in systematic arrangement. They appeared to be of the same character as hundreds of others dotting the great valley of Oaxaca. These mounds are ranged about a great square several acres in extent, this square proving upon examination to form the central court of the temple. Four pyramidal-shaped mounds run down the center of the great *patio*, which, in the opinion of Señor BATRES, formed the central altars of the great temple. In addition to this purpose they served as tombs, probably for the monarchs of the builders of the city, and it was in one of these mounds that the most important discovery was made.

In the work of excavation, the first object encountered was a great obelisk of porphyry, slightly resembling the Egyptian obelisk known as Cleopatra's needle. The obelisk is 4 meters in height, 60 centimeters across its face, and 40 centimeters across its sides. It rises with perpendicular lines to within 40 centimeters of its top, from that point assuming a wedge shape. On the face of the obelisk is an elaborate figure with a death's head, evidently the portrait in bas-relief of a dead monarch. The back is covered with hieroglyphics, to translate which no attempt has yet been made. Next in importance to the finding of the obelisk was the excavation of a jar made of jade and containing 60 or more specimens of fine jade. Pieces of this stone have been found in all parts of Mexico for the past century, and archæologists have regarded them as evidences of former communication of the prehistoric races of Mexico with the Chinese. Since the Aztecs had little or no communication with China, they probably obtained the jade as a heritage from earlier peoples, and evidently prized them highly. On one of the pieces the face of a Chinaman, with all the facial characteristics most distinctly marked, is carved.

It is the opinion of archæologists that Mitla, the great sacred city of the Nahauns or Toltecs, was destroyed some time between the beginning of the Christian era and the year 500 A. D., whereas Señor BATRES believes that the city of Monte Alba was destroyed by the great upheaval which sunk the continent of Atlantis, possibly the biblical deluge. Pictures, drawings, plans, and specimens, together with a full description of the work and the discoverer's observations and conclusions therefrom, will be submitted at the coming Congress of Americanists in New York for the consideration of the distinguished archæologists of America.

SHOE TRADE AT VERA CRUZ.

United States Consul W. W. CANADA, at Vera Cruz, gives an interesting report of the shoe trade at Vera Cruz, in which he says that ten years ago it was impossible to buy anything there in the line of shoe leather except that of native stock and manufacture, and ready-made shoes for Americans were not to be had at all. These conditions are all changed now.

United States shoes have, within a very short time, made a name for themselves, and, were it not for the excessively high prices asked for them, they would surely drive all others out of the market. As it is, however, only the better classes can enjoy the luxury of American shoes, and the great mass of the people is debarred from this privilege.

All styles and shapes are worn—lace, button, elastic gaiter, low cut, tan, black, or white—the average size being No. 6 (Mexicans, as a rule, have small feet). The large sizes, say, up to No. 9, are called for mainly by foreigners. All styles of toes will sell, but the pointed toe is still the most popular. The Latin-American has a neat, slim foot with comparatively high instep. Single soles are the rule and double soles the exception. Extension soles are not called for. In rare instances only one may see them, usually on Americans or Englishmen. The best-selling shoe is of light weight, with finely-stitched uppers, single sole, and flat heel without any steel nails. For the peon class an old-style brogan would have an immense sale could it be placed within their reach.

The principal obstacle to a heavier business is the high import duty and the fluctuations in the value of silver; the duty on the cheapest shoes is the same as on the finest productions. What is needed at Vera Cruz is an American shoe house, well stocked at all times with an assortment as varied as the tastes of the people. Such a house would have all the local trade and also that of the interior towns.

The shipper must exercise the greatest care in having his goods classified according to the Mexican custom-house requirements, and special attention must be given to consular invoices, as failure to do this even in trivial cases may cause the importer much trouble and annoyance, and may result in extra duties or fines. Consular invoices must be made out in strict conformity with Mexican laws.

THE CONSUMPTION OF SULPHUR.

A recent number of "El Progreso," of the City of Mexico, states that the consumption of sulphur in the Republic exceeds 1,000,000 kilograms annually, more than half of which is imported, notwitstanding the fact that there are in various parts of Mexico immense deposits of sulphur as yet unworked. These deposits have remained unexploited, on a large scale, up to the present time, because capitalists have not considered that the working of the same would render profitable returns. In some parts of the country, however, there are sulphur mines which are exploited on a small scale, producing in the aggregate an annual product of some 500,000 kilograms, but no foreign capital has been invested in enterprises for the mining or production of sulphur, the demand for which is constantly increasing both in Mexico and the United States. The sulphur mines or deposits known to exist in the States of Chiapas, San Luis Potosi, and Durango are considered as practically inexhaustible. Besides the immense supply of this element which is found in the mines mentioned, the great deposit of sulphur found in the crater of Popocatepetl is constantly increasing. Large quantities of sulphur are also found at Mapimi and Cerritos, in the State of Durango, and it is estimated that these mines could produce millions of tons of sulphur annually.

NEW NAVIGATION CONCESSION.

The "Diario Oficial" has published the text of a contract which the department of public works recently made with A. E. STILWELL for navigating the Gulf of California and the Pacific Ocean. The concession provides for the placing of a line of steamers in the waters mentioned to ply between the ports of Guaymas, Topolobampo, La Paz, Mazatlán, San Blas, Manzanillo, Acapulco, Puerto Angel, Salina Cruz, Tonalá, San Benito, and other intermediate points. Other lines may be established to run between Mexican ports and the ports of the United States, South America, and Asia.

MISCELLANEOUS NOTES.

During the first six months of the current year (1902) the exports of Mexican logwoods declined considerably from the Gulf States of Tabasco, Vera Cruz, and Tamaulipas. Since the end of June, however, orders received from the United States, England, and Germany have been very large, and it will tax the powers of the lumber dealers to fill them on time, so that the second half of the year will counterbalance the poor returns for the first half.

The Mexican import and export duties and port dues during the month of July last amounted to $2,277,341.37, against $2,069,344.32 in the corresponding month of the preceding year, being an increase of $207,977.04.

NICARAGUA.

TARIFF MODIFICATIONS.

In September, 1902, the "International Customs Journal," of Brussels, published as third supplement to No. 129 (second edition) the following modification of the customs tariff of Nicaragua:

Law, dated October 5, 1901, relative to the importation of wine.

[Circular of ministry of finance, dated October 5, 1901.]

ARTICLE 1. The decrees dated July 31, 1900, and January 8, 1901, regulating the importation of genuine grape wine and establishing a surtax of 20 per cent on entry thereof, are repealed, and wine of any description and quality shall only be subject to the standing duties of the tariffs in force.

ART. 2. Tariff item No. 1238, affecting champagne dutiable at 60 centavos per kilogram, being canceled, item 1244 shall read as follows:

	Pesos.
1244. Sparkling wines of all kinds, including champagne, generous or dry, up to 20° strength, in bottles, per kilogram	0.60
The same, above 20° strength, per degree and per kilogram, gross weight	.02½

ART. 3. This law, which is to be construed together with the tariff, shall enter into force on and after the date of its publication.

PARAGUAY.

PRINCIPAL EXPORTS DURING FIRST HALF OF 1902.

The principal articles of Paraguayan export, according to data published in the semimonthly bulletin of the board of trade at Asuncion

(Boletín Quincenal de la Cámara de Comercio de la Asuncion), during the first six months of 1902, as compared with 1901, were as follows:

		1901.	1901.
Hides:			
Dry	pieces	36,132	43,158
Salted	do	51,527	36,844
Bristles	kilos	27,451	27,723
Guampas	do	45,470	52,107
Wool	do	15,411	21,356
Cocoanut bran	do	28,780	10,330
Cocoanuts	do	10,169	269,859
Cocoanut oil	do	3,500	690
Extract of ironwood	do	389,300	505,000
Petit grain	do	10,443	10,837

Ground	do	205,946	95,980
Curupay bark	do	96,350	560,480
Oranges		3,235,630	3,028,800
Palms		28,661	4,014

RECEIPTS OF PARAGUAY TEA AT ASUNCIÓN IN JUNE AND JULY, 1902.

During the months of June and July, 1902, the receipts of Paraguay tea at the port of Asuncion, forwarded from the plantations of the Republic, consisted of 7,251 sacks, weighing 438,666 kilos; the June shipments amounting to 5,246 sacks, weighing 318,360 kilos; and the July receipts aggregating 2,005 sacks, weighing 120,306 kilos.

ECONOMIC CONDITIONS.

The following information, supplementary to figures published in the MONTHLY BULLETIN for September, is taken from a report to the British Foreign Office by His Majesty's Consul, A. GOSLING, at Asuncion. It gives a general outline of the economic situation of Paraguay during 1901.

Trade in Asuncion is larger than generally supposed and is chiefly carried on through European firms in Buenos Ayres and Montevideo. Most articles sold in Europe are obtainable here, and though not of the best quality the prices are not, taking into consideration the cost of freight and the high duties, on the whole unreasonable. Some of the largest firms, and those which sell at the lowest prices, conduct an import and export trade combined. There are twenty-five large importing firms in Asuncion, and nearly all of these sell articles of British manufacture.

In the month of July last a meeting was held at the Asuncion Chamber of Commerce, at which the principal firms in Paraguay were represented. Among other resolutions passed was the following: "That a fund should be raised for the purpose of obtaining reliable statistics of the exports and imports of the country."

There are three principal banks established in Paraguay, the Banco Mercantil, the Banco de los Rios, and the Banco Territorial. There is also an Agricultural Bank—a Government institution founded with the object of promoting agriculture by loans on real estate and by the purchase of produce.

The interest paid by the various banks is as follows: Current accounts, 4 per cent per annum; deposits, 30 days, 5 per cent per annum; deposits, 60 days, 7 per cent per annum; deposits, 90 days, 9 per cent per annum; deposits, 180 days, 10 per cent per annum. During the past ten years the Banco Mercantil has paid a dividend of from 12 to 18 per cent. The dividend in 1901 was 15 per cent. The premium on gold has varied from 800 to 1,000 per cent, touching the latter figure at the end of 1901.

The following table shows the condition of the public debt between the years 1890 and 1900:

	1890.	1900.
Interest-bearing funded debt:		
Internal	....	£29,083
External	£843,600	989,266
Noninterest-bearing funded debt	3,913,205	4,668,496
Floating debt	1,515	382,595
Total debt	4,758,320	6,069,440

The revenue in 1890 was £310,507, as compared with £616,829 in 1900. The total expenditure during the same period was £162,129 and £725,181, respectively, the above figures being obtained from official sources.

The imports for 1901 may be calculated at £600,730. No figures for the values imported from the various European countries are procurable. In the consular report on this district for 1900 a statement was given of the approximate values of these imports, and showing the amounts imported from the United Kingdom as more or less £167,710. The figures for 1901 would probably be smaller, for reasons already mentioned.

A German consular report for the years 1899–1900 assesses the value of goods imported from Germany at £160,000. Rice, for which there is a large demand, is imported principally from Bremen. Petroleum, another important item in a country dependent entirely upon lamps for artificial light, comes from North America. Sugar is imported from France and the Argentine Republic. Wines and spirits come from Spain and Italy. There is a small though perhaps growing demand for British spirits, such as refined gin and whisky. The amount of beer imported from Europe is small, the cost being too great to compete with the local brewery, which does a good business. Hardware and machinery come chiefly from the United States and Germany. The latter country, however, sells a cheaper article and consequently gets a greater proportion of the trade. Earthenware and glass come from Holland, the United Kingdom, and Germany; china from Germany and Austria; window glass from Belgium; table glass from Germany; clocks from the United States and Switzerland. The leather trade is almost entirely in the hands of Germany. Rifles and revolvers come principally from the United States, Belgium, and Germany. Knives and daggers come from the United Kingdom and Germany. Bent-wood furniture is imported from Austria, and a small amount from the United States. The most important article of import, namely, cotton goods, is still entirely in British hands. Germany has, however, monopolized the trade in ponchos and to some extent also that in cloths. Hats are imported from Italy and Germany, but are usually sold here with a French manufacturer's mark. The best hats sent to the country are of British make.

According to a recent publication, there are 850 firms in the country districts engaged in business, whose joint capitals are estimated at £350,000. In Asuncion itself there are some 560 stores, with a capital of about £1,000,000. There are 250 houses representing native industries, whose capital is calculated at £3,000,000. The funds invested in cattle raising are stated by the same authority to be about £2,500,000. German capital in Paraguay is computed at £300,000. The British capital invested in the Paraguayan Central Railway is £1,457,000.

The following figures show the values of the exports and imports during the past seven years, based on official statistics:

	Imports.	Exports.		Imports.	Exports.
1895	£492, 010	£388, 578	1899	£502, 118	£458, 150
1896	557, 267	409, 688	1900	567, 724	412, 858
1897	442, 293	511, 054	1901	600, 730	505, 861
1898	521, 697	492, 658			

The principal articles of export during 1901 were as follows:

Dried hides	£58, 647	Timber	£52, 792
Salted hides	92, 422	Fruits	47, 574
Yerba maté	154, 818	Extract of quebracho	13, 323
Tobacco	38, 769		

The greater part of the dried and salted hides go to Germany, the price paid being 9d. and 5¾d. per one pound, respectively. There is an abundant supply of alligator skins in this consular district.

Yerba maté, or Paraguayan tea, is largely exported to the various republics of South America. A few sample packages have been shipped to the United States and to Germany. One sample has been forwarded from this consulate to a firm in London. A German house here prepares a refined quality of yerba maté suitable for drinking like tea. It is packed in parcels of 2 pounds at a cost of 1s. 6d. There seems to be little doubt but that yerba maté is a great restorative in hot weather or after physical exhaustion.

At the end of the year under review the representative of a Paraguayan firm largely interested in tobacco growing visited the principal European markets with the object of introducing Paraguayan tobacco. It is reported that some quantity was sold in Spain at a fair price. The French Government has purchased 30,000 pounds at about 2d. per pound through the French legation here. The firm above referred to state that they are able to supply 35,000 to 40,000 cigars monthly. These cigars, which are grown from Habana seeds, are sold here at the following prices: 2s. 6d., 3s., 5s., 7s. 6d., 10s., 15s., £1, £1 5s., and £2 10s. per 100. The rate of exchange being taken at 800 per cent, or $40 equal £1.

The various kinds of valuable timber found in Paraguay are specified in the consular report on this district for 1900. It is reported that the Paraguayan Chamber of Commerce intends to classify the various species, and to forward a descriptive list with samples to the various European Chambers of Commerce.

A considerable amount or fruit is exported to the Argentine and Uruguayan republics, consisting chiefly of oranges, bananas, and pineapples. The former are of a superior quality.

Steamers, sailing vessels, and large coasting vessels to the number of 2,157 have entered and cleared from the port of Asuncion during the year.

There has been comparatively very little immigration during the same period.

Oil of a superior quality, extracted from palm and earth nuts, is made by a German firm. These two oils have a good color and very little smell, and are said to be suitable for the manufacture of soap.

Cattle breeding is the most important industry in Paraguay, and there is a slow but perceptible improvement in the stock. Many zebus (a species of Indian buffalo) are imported from Matto-Grosso, Brazil, but cattlemen are not agreed as to the entire suitability of this animal for breeding purposes.

One not inconsiderable advantage which the zebu appears to possess is his comparative immunity from the attacks of ticks (ixodes), which are extremely injurious to some of the finer breeds. Durhams, Holsteins, and Herefords have been imported and found to cross well with the native breeds. The animals slaughtered in Asuncion during the year amounted to 33,245 head, representing a value of about £91,932. The amount of horned cattle in the entire Republic is calculated at 3,500,000 head.

In view of the urgent necessity of some improvement to the harbor of Asuncion, necessitating the construction of a breakwater and a wharf and the dredging of the river, the various commercial houses of Asuncion offered the Government a loan of a sum not to exceed £40,000, the interest payable being fixed at the rate of 8 per cent per annum; £4,000 was at once advanced to commence work on the breakwater, which was in progress at the end of the year.

As previously mentioned in this report, the greater part of the imports to Paraguay are shipped out of bond from Buenos Ayres or Montevideo, and there is consequently but little direct trade with the European markets, and few commercial travelers visit Asuncion. The following are the regulations for commercial travelers in Paraguay: Upon entering Asuncion a tax varying from £10 to £15 is payable. A further tax, the amount of which is not specified, is payable on entering the other townships of the Republic. Samples having no intrinsic value and being of no other use, such as small patterns of cloth, etc., may be introduced free of duty. Dutiable articles are allowed to pass the Customs on condition of an undertaking being given to pay the duty in the event of the goods not being reshipped within a certain time.

A North American company has obtained a contract to light the town of Asuncion with electricity.

By virtue of a law passed on August 31, 1900, bicycles and carriages were admitted free of duty until the month of August, 1902, and December, 1902, respectively.

PERU.

NEW CABINET.

The cabinet of the Peruvian Government as organized on November 5, 1902, was composed as follows:

President of the Cabinet and Minister of Foreign Affairs—EUGENIO LARRABURE-UNANUE.

Minister of Home Affairs—Dr. RAFAEL VILLANUEVA.

Minister of Justice—TELEMACO ORIHUELA.

Minister of War—Commander MANUEL A. VILLAVICENCIO.

Minister of Finance—PABLO SARRIA.

Minister of Public Works—Dr. DAVID MATTO.

EXPORTS FROM 1897 TO 1902.

The following interesting table, showing a résumé of the general exportation of Peru from 1897 to 1901, inclusive, has been compiled from the report of the Department of Finance:

Articles.	1897.	1898.	1899.	1900.	1901.
Mineral waters		£13.000	£812.610	£2,075.680	£350.655

Central America	92,703		
India	46,762		
Ecuador	31,038		
Other countries	86,671		
Total	[a]19,747,854	Total	[a]19,747,857

[a] Equivalent to $9,617,204.90 American gold.

INDUSTRIAL AND COMMERCIAL DEVELOPMENT.

The Department of State of the United States received from United States Minister Irving B. Dudley, of Lima, under date of September 17, 1902, the annual report of the Peruvian Minister of Public Works. The two statements appended to this report are of special interest—one showing the progressive increase in the exportation of the ten principal products of Peru during the last six years, as follows:

Exports.

[In metric tons of 2,204.6 pounds.]

Article.	1896.	1897.	1898.	1899.	1900.	1901.	Increase in 1901 over 1896.
Cotton	4,118	5,586	6,712	5,876	7,246	8,011	3,293
Rice	2,804	4,222	4,276	2,873	4,260	4,164	1,360
Sugar	71,735	105,463	105,713	103,706	112,222	114,637	42,902
Cocoa	....	12	62	54	99.3	107	107
Coffee	713	1,240	1,245	1,215	1,254	946	233
Coca	....	497	490	312	566	610	106
Cocaine	....	4.2	4.35	4.5	7.75	10.6	10.7
Leather	1,332	1,710	2,127	2,062	2,286	2,251	919
Wool	2,544	3,770	3,489	3,434	3,534	3,856	1,312
Minerals	12,000	15,000	17,225	23,158	39,405	46,885	34,885

The other shows the progress of Peru's international commerce during the same period:

Description.	1896.	1897.	1898.	1899.	1900.	1901.	Increase in 1901 over 1896.
Exportation	$6,113,678	$6,760,428	$7,265,945	$7,374,218	$10,795,198	$10,316,109	$4,202,431
Importation	4,201,234	3,870,874	4,611,540	4,496,486	5,561,160	6,619,737	2,418,503
Total	10,314,912	10,631,302	11,877,485	11,871,704	16,356,358	16,935,846	6,620,934

With respect to the copper industry and American participation therein, the report says:

"The copper industry, which, simultaneously with the extraordinary rise in price of that metal, acquired in a very brief space of time a notable development and made evident the magnitude of the numerous American copper deposits, has undergone a certain paralysis with the fall in its price. The enterprise undertaken by the Pasco Copper Company, an American corporation, which is undoubtedly the most important mining enterprise ever set on foot in Peru, will contribute to reestablish the highest prosperity of our copper industry. The metallurgical installations and workshops which the enterprise is establishing have resulted in reducing the cost of production to incredibly low figures."

The Pasco Copper Company will, within a few months, begin the construction of a railroad from Oroya to Cerro de Pasco, a highway which will exercise a potent influence in the development of that mineral belt and likewise in the scarcely less important one of Huanaco.

SALVADOR.

TARIFF MODIFICATION.

Ordinance of June 9, 1902, relating to the duty-free importation of certain articles.

[Diario Oficial of June 10, 1902.]

In virtue of this ordinance, the importation of the following articles shall be exempt from all duties and taxes:

Spirit lamps for lighting, complete cooking ranges, furnaces, and stoves for various domestic and industrial purposes.

Motor cars.

Boats and canoes.

Engines for all kinds of machinery and generally all unenumerated articles in which spirit is used as fuel or motive power.

This ordinance shall enter into force on this date and continue to be applicable until the 1st March, 1903.

IMPORTS DURING THE FIRST HALF OF 1902.

During the first six months of 1902, according to a statement of the Treasury Department of Salvador, published in the Diario Oficial, the Republic of Salvador imported goods weighing in the aggregate 7,707,415 kilos, invoiced at 1,302,611.78 *pesos*, equal to $500,202.92 American gold. The countries from which these goods were imported, together with the weight and invoiced value, arranged in alphabetical order, are shown in the annexed table:

Countries.	Weight.	Invoiced value.	Countries.	Weight.	Invoiced value.
	Kilos.	*Pesos.*		*Kilos.*	*Pesos.*
Belgium	33,094	6,099.70	Great Britain	1,185,841	379,794.19
Chile	5,077	1,500.00	Guatemala	17,524	4,169.50
China	26	7.50	Honduras	147	2,104.02
Colombia	1,712	788.50	Italy	81,610	24,380.74
Costa Rica	912	....	Mexico	39,818	11,415.59
Cuba	184	822.50	Nicaragua	15,709	2,180.00
Ecuador	9,356	7,729.34	Spain	30,583	9,026.49
France	457,998	177,433.13	United States	4,937,680	482,794.66
Germany	890,144	192,366.42			

The following table shows in detail the imports into Salvador from the United States for the period mentioned:

Articles.	Weight.	Invoiced value.	Articles.	Weight.	Invoiced value.
	Kilos.	*Pesos.*		*Kilos.*	*Pesos.*
Beer and ginger ale	61,190	4,532.45	Machinery	5,706	1,399.56

SCIENTIFIC, AGRICULTURAL, AND INDUSTRIAL MUSEUM.

The "Diario Oficial" of September 12, 1902, publishes an important decree establishing in the Republic a Scientific, Agricultural, and Industrial Museum composed of six parts or sections.

The first section will be devoted to objects of natural history, archæology, and numismatics. Collections of the principal representatives of the fauna and flora of the country will be made, and an exhibit of mineral and vegetable fossils of Salvador, together with the remains of pre-Colombian architecture and sculpture, will form an interesting feature of this branch of the museum. This section will also collect and exhibit specimens of the pottery work and arms of the aborigines, their coins, medals, etc.

The second section will be devoted to the agricultural industries of the nation. Salvador, as is well known, is an agricultural country, and there is said to be scarcely an acre of her domain that is not adapted to the cultivation of the soil. This department will be enriched by a complete display of the agricultural productions of the Republic, among which may be mentioned rubber, cacao, coffee, indigo, balsam, tobacco, and an immense variety of grains, seeds, and fruits.

The third section will deal with foreign and domestic industrial products. An exhibition of the principal products of the sugar cane, from the coarsest brown sugar to the whitest crystalline products, will be made. This section will also exhibit samples of domestic wines and liquors, will make an extensive display of leaf and manufactured tobacco, cotton, and silk fabrics, and will have on hand for exhibition and inspection a collection of the principal articles of commerce and trade that go to make up the bulk of the commercial transactions of the country.

The fourth section or division of the museum will concern itself with the natural products of the country, and will make a display of the productions of the mines and forests, consisting of coal, minerals, plants, medicinal roots and herbs, textile fibers, construction and cabinet woods, etc.

The fifth section will contain a collection of objects and writings concerning the history and political development of the country, while the sixth section will be a kind of botanical garden and nursery combined.

RECEIPTS AND EXPENDITURES, FIRST HALF OF 1902.

[From Diario Oficial No. 220.]

UNITED STATES.

TRADE WITH LATIN AMERICA.

STATEMENT OF IMPORTS AND EXPORTS.

Following is the latest statement from figures compiled by the Bureau of Statistics, United States Treasury Department, showing the value of the trade between the United States and Latin-American countries. The report is for the month of September, 1902, with a comparative statement for the corresponding month of the previous year; also for the nine months ending September, 1902, as compared with the same period of 1901. It should be explained that the figures from the various custom-houses showing imports and exports for any one month are not received at the Treasury Department until about the 20th of the following month, and some time is necessarily consumed in compilation and printing, so that the returns for September, for example, are not published until some time in November.

CONSULAR TRADE REPORTS.

The following reports are furnished the International Bureau of the American Republics by the various Latin-American consular officers at the ports mentioned.

The Mexican Consul at San Francisco, Cal., reports that the imports to the United States from the Republic of Mexico through the port of San Francisco during the month of September, 1902, consisted of mineral products to the value of $205,899, Mexican silver, and other products valued at $17,682, Mexican silver, the details of which are shown in the following tables:

MINERAL PRODUCTS.	Quantity.	Value.
Gold bullion		$10,060
Silver bullion		133,756
Silver ores		62,083
Total		205,899
SUNDRY PRODUCTS.		
American merchandise returned		1,922
Bones		402
Coffee ... pounds	6,952	925
Copper ore ... tons	33	1,506
Drugs		3,326
Feathers		48
Fish		497
Fruits		7
Hides and skins ... pounds	36,100	4,708
Lead ... do	24,479	681
Lemons		1,086
Live animals		104
Manufactures of wood		2
Material for glue		26
Residue of linseed oil ... pounds	58,658	266
Rubber ... do	2,290	466
Salt ... do	350,117	695
Shellfish		1,005
Straw hats		10
Total		17,682

The exports from San Francisco to Mexican ports during the same period consisted of domestic merchandise invoiced at $118,871, and foreign products reexported to the value of $7,522. This trade is shown in detail in the following tables:

AMERICAN MERCHANDISE.

The exports of Mexican dollars to Hongkong amounted to 239,950; to the Philippine Islands, 137,000.

The Consul-General of Mexico at New York advises that during the month of September, 1902, 11 vessels proceeding from Mexican ports entered the harbor of New York, bringing 89,580 packages of merchandise. During the same period 13 vessels cleared from the port of New York, carrying 164,710 packages of merchandise, destined to Mexican ports. The imports in detail from Mexico to New York during the month referred to were as follows:

Alligator skins	bales	39	Hides	bales	3,053
Bones	packages	399	Hides, loose	do	5,390
Broom root	bales	2,524	Honey	barrels	312
Cedar	logs	922	Ixtle	bales	4,353
Chicle gum	bales	788	Lead bullion	bars	33,996
Cigars	boxes	56	Mahogany	logs	460
Coffee	sacks	1,972	Metals		35
Copper bullion	bars	1,918	Oranges	boxes	782
Deerskins	bales	123	Ores	sacks	18,299
Fustic	logs	2,877	Rubber, crude	bales	22
Goatskins	bales	873	Sarsaparilla	do	86
Hair	do	27	Tecali marble	pieces	144
Henequen	do	9,742	Tobacco, leaf	bales	388

The Mexican Consul at Pascagoula, Mississippi, reports that during the month of October, 1902, the following consignments of lumber were shipped from Pascagoula to Mexican ports: To Progreso, lumber valued at $9,384; to Vera Cruz, lumber valued at $5,106, and to Tampico, lumber valued at $4,084, or a total of $18,574.

The Mexican Consul at Philadelphia advises that the merchandise exported from that port to Mexican ports during the month of October, 1902, consisted of 3,465,947 kilograms of oil, valued at $60,834.70; 306,109 kilograms of iron pipes, valued at $9,188.78, and 4,370,000 kilograms of coal, valued at $12,017.50.

The Mexican Vice-Consul at Mobile, Alabama, reports that during the month of September, 1902, four vessels, proceeding from the Mexican ports of Progreso and Tampico, entered the port of Mobile, bringing cargoes of henequen. During the same period six vessels sailed from Mobile, bound for the Mexican ports of Coatzacoalcos, Vera Cruz, Campeche, and Progreso, carrying cargoes of lumber, canned goods, steel, and general merchandise.

Reports furnished by the Mexican Consul at Nogales, Arizona, show that the imports into Mexico through the port of Nogales during September, 1902, amounted to $110,821, and consisted of the following merchandise:

Animal products	$8,655	Textile products	$23,994
Arms and explosives	338	Vegetable products	12,146
Beverages	2,887	Vehicles	3,591
Chemical products	7,708	Sundries	6,024
Machinery and parts thereof	17,990		
Mineral products	25,561	Total	$110,821
Paper and paper products	1,927		

This merchandise originated in the following countries:

Austria	$330	Switzerland	$569
China	395	United States	82, 168
England	12, 882		
France	5, 873	Total	$110, 821
Germany	8, 604		

The duties collected by the Mexican Government on the goods mentioned amounted to $54,047.56, Mexican silver.

The exports from Mexico to the United States, through the port of Nogales, in September, 1902, amounted to $933,327, Mexican silver, and consisted of the following products:

Articles.	Quantity.	Value, Mexican silver.
Copper bullion pounds..	5, 860, 433	$703, 250

FOREIGN TRADE IN SEPTEMBER, 1902.

The revised figures for exports and imports given out for September by the Treasury Bureau of Statistics furnish especially interesting information concerning the progress of manufactured exports. According to these latest returns the percentage of total exports for September, represented by the manufactured exports of the country, is 26.62, as against 29.27 for September a year ago. In absolute amount, however, this year's exports of manufactured products exceed in amount those of September, 1901, being $31,771,479, as against $30,806,594. On the other hand, the percentage of agricultural exports for September is 64.79, as against 62.85 a year ago, the gross amount being $77,335,170, as against $66,109,082. For the nine months ending September the percentage of manufactured exports is 33.74 this year, as against 29.05 during the same period of 1901, the gross amount exported being $311,302,441, as against $298,660,551 a year ago. In agricultural exports the percentage for the nine months ending September, 1902, is 58.12, as against 63.46 in 1901. The total agricultural exports for the nine months is $536,273,620, as against $649,352,577. It thus appears that manufactured exports are making gratifying progress, and that the only reason why the percentage of total exports which they represent for the month of September is smaller than it was last year is that agricultural exports have lately been growing so rapidly, and that the effect of the large crops of this year is making itself felt. In the following table the progress made in the different classes of exports and their relation to other classes on a percentage basis is cursorily surveyed:

	Exports nine months ending September—	
	1901.	1902.
Domestic products of—		
Agriculture	$649,352,577	$536,273,620
Manufactures	298,660,551	311,302,441
Mining	30,674,115	26,926,364
Forest	39,038,344	39,408,660
Fisheries	3,558,791	4,492,604
Miscellaneous	3,497,877	4,304,534
Total	1,024,782,255	922,708,223

Turning to the figures for the nine months ending September, 1902, and comparing these returns with those of the nine months ending September, 1901, it appears that there has been an increase in the amount of exports classified under the headings agricultural implements, copper ingots, cotton cloths (colored), and cotton cloths (uncolored), fiber manufactures, gunpowder and explosives, india-rubber manufactures, structural iron and steel, steel wire, builders' hardware, metal-working machinery, pumps and pumping machinery, typewriting machines, miscellaneous machinery, paper and manufactures, and tobacco manufactures. This leaves only a comparatively short list of articles in which there has been a decline, the principal being refined mineral oils, musical instruments, steel rails, electric and electrical apparatus, clocks and watches, cars and carriages, and glass and glassware. Of these categories the only ones in which the decline has been serious are refined mineral oils and steel rails, the decrease in exports of which classes has been so frequently explained as to require no further attention. In looking over the returns for the month of September, 1902, as compared with those for the corresponding month a year earlier, it appears that the growth in the exports of manufactured products has been general, and in many instances rather more marked for that month than for the preceding portion of the year.

The following table traces the progress in manufactured exports, by classes of articles, for the nine months ending September during this year and last:

Articles.	1901.	1902.
Agricultural implements	$15,237,127	$15,527,673
Books, maps, etc	2,502,268	3,157,514
Cycles and parts	2,115,055	2,158,465
Cars, carriages, etc	6,316,778	5,570,134
Clocks and watches	1,740,344	1,568,548
Copper ingots	24,082,770	34,962,400
Cotton cloths:		
Colored	5,449,930	6,687,270
Uncolored	9,605,637	14,655,150
Fiber manufactures	3,509,162	3,856,801
Glass and glassware	1,578,681	1,408,460
Gunpowder and explosives	1,440,136	1,742,184
India-rubber manufactures	2,336,165	2,699,395
Electric and scientific apparatus	5,844,181	4,579,730
Steel rails	7,194,078	1,758,973
Structural iron and steel	2,243,935	2,328,155
Steel wire	3,394,975	3,823,177
Builders' hardware	6,557,438	8,399,857
Metal-working machinery	2,107,075	2,141,458
Pumps and pumping machinery	1,400,961	1,778,137
Locomotive engines	3,153,290	2,769,034
Typewriting machines	2,103,061	2,644,211
Miscellaneous machinery	13,576,838	15,802,869
Iron pipes and fittings	3,852,130	3,700,602
Boots and shoes	4,551,328	4,940,676
Musical instruments	2,447,956	2,380,954
Refined mineral oils	49,043,445	45,287,456
Paints and colors	1,560,481	1,661,164
Paper and manufactures	5,485,929	5,570,153
Tobacco manufactures	3,963,706	4,253,894
Household furniture	3,040,640	3,102,334
Woolen manufactures	1,126,987	1,167,087

In the matter of imports the progress is remarkable. Of imports free of duty the amount for September, 1902, is $36,490,413, while for the same month in 1901 it is $29,058,382. Of dutiable imports the amount for these two months, respectively, was $51,251,965 and $37,768,431. Total imports of merchandise for the month are $87,742,378, as against $66,826,813. For the nine months ending September the figures are $702,155,675 in 1902, as against $646,477,569 in 1901. In the following table a review of our imports is furnished:

Groups.	Imports—Nine months ending September.	
	1901.	1902.

TREASURY STATEMENT FOR FIRST QUARTER OF 1903.

The first quarterly period of the fiscal year 1903 closed on September 30, 1902, with a highly favorable showing for the Treasury. At the close of the first month of the quarter there was a deficit of nearly $9,000,000. This was reduced by the operations of August to $1,552,064. The statement issued for September shows that the excess of receipts for the month was $11,025,583, and for the three months $9,099,909. The September business was unusually large, the customs receipts having reached a total of $26,225,777, an increase of $7,000,000 over the corresponding month of last year. There was also an increase of more than $2,000,000 in internal revenue receipts compared with those for August, although compared with September, 1901, there was a falling off of $2,600,000. For the month the total receipts were $48,580,381, against $44,434,423 for the same month of last year. The expenditures for the month show an increase over those for September, 1901, of $5,000,000, and aggregated $37,554,798.

As a result of the increased receipts for September the deficit of the two previous months is wiped out and the available cash increased by $11,761,893, that fund now standing at $221,253,394. Of that, $136,124,771 is gold, an increase since August 31 of $21,467,077. The total of the gold fund, which includes the reserve and trust funds, is $590,506,825, an increase of $19,204,192 during the month. This is the largest sum of gold ever held by the Treasury, and it is perhaps the largest amount of gold held in any one place in the world.

The amount of Government paper currency in circulation exceeds that of one month ago by about $4,000,000. The changes are shown in the following table:

	1901.	1902.
Gold certificates	$306,644,939	$304,382,054
Silver certificates	452,357,023	459,571,478
Treasury notes	27,622,750	26,741,790
Total	786,624,712	790,605,322

The amount of public funds deposited with the national banks to secure Government deposits is $126,102,430, an increase since the 1st of September of over $8,000,000. There is also held by the depository banks nearly $8,000,000 to the credit of disbursing officers, which is about the average amount held on that account.

The total receipts for the three months ending with September 30, were $146,491,885, against $142,148,888 for the corresponding period of 1901. Eliminating the receipts from miscellaneous sources, which show an increase in favor of the current year of nearly $3,000,000, the receipts from the two revenue sources were $136,171,953, an increase over last year of $1,477,170. The growth of the import trade is shown by the fact that the customs receipts are upward of $15,000,000 in excess of those for the three months of 1901, which sum is nearly offset by the decline in internal revenue receipts, the falling off from that source having been $13,974,827. This sum is below the average of the loss of revenue which was estimated in Congress when the bill to abolish war taxes was under consideration. The Ways and Means Committee and other fiscal authorities placed the probable reduction at $70,000,000. On the basis of the decline for the three months just closed, the loss of revenue in consequence of the abolition of war taxes will not exceed $65,000,000.

The annexed table shows the receipts from all sources for the three months ending September, 1901, and 1902, respectively:

	1901.	1902.
Customs	$61,886,748	$77,238,751
Internal revenue	72,808,029	58,933,202
Miscellaneous	7,454,111	10,319,932
Total	142,148,888	146,491,885

The expenditures continue to advance. For the three months they were $137,481,976, an increase of $13,500,000 over those for the corresponding period of last year. With the exception of interest on the public debt, there was an increase in every item of expenditure. In the first three items it will be observed that there was an average increase of $4,000,000, and in payment of pensions an increase of more than $1,000,000. The annexed table shows the expenditures in detail for the two periods:

	1901.	1902.
Civil and miscellaneous	$27,017,334	$31,153,911
War	31,695,074	35,564,956
Navy	16,835,838	20,813,200
Indians	2,769,239	3,594,731
Pensions	35,132,157	36,323,910
Interest	10,520,182	10,031,268
Total	123,969,824	137,481,976

The monthly statement of the Comptroller of the Currency shows that the amount of Government bonds held to secure national bank circulation is $326,052,770, and to secure public deposits $136,625,170. During the month of September there was an increase in the circulation of national banks of $5,710,907. Of the $446,000,000 of 2 per cent bonds outstanding the banks have on deposit with the Treasurer to secure circulation and deposits of public funds $408,092,200.

NEW PLATINUM DEPOSITS.

The United States Geological Survey, in view of the report that the world's production of platinum is noticeably decreasing, has been making special efforts in the last year to locate other deposits of the precious mineral in this country with encouraging results. Reports on file in Washington show that the production of platinum in this country in 1901 was 1,408 ounces, valued at $27,546, as compared with 400 ounces of crude platinum, valued at $2,500, in 1900. This was a noticeable increase, although the quantity produced was only a small part of the total domestic consumption for the year. However, the product in 1901 was the largest annual output on record since statistics of platinum produced from domestic ores were first compiled in 1880. The next largest output was in 1890, when 600 ounces, valued at $2,500, were produced.

In connection with the production of platinum from domestic ores in 1901 there were obtained also 253 ounces of iridium, a metal so closely allied with platinum production in early years in the opinion of experts. The domestic supply of platinum in recent years has been obtained as a secondary product, chiefly from gold placer deposits in Trinity and Shasta counties, California. The occurrence of the metal has been reported from California, Oregon, Washington, Idaho, Montana, and Alaska, while sperrylite, the platinum arsenide mineral, has been reported from Macon County, North Carolina.

It is also noteworthy that platinum and other metals of the platinum group, such as osmium, palladium, and iridium, were discovered in the copper ores of the Rambler mine, near Encampment, in the Medicine Bow Mountains of Albany County, Wyoming. The platinum of the ores of this region varied from 0.06 to 1.4 ounces a ton.

The imports of platinum in 1901 were valued at $1,695,895, as compared with $1,762,020 in 1900. The world's annual production of platinum for the last few years has ranged between 160,000 and 170,000 ounces, of which Russia supplies about 150,000 ounces, the remainder being obtained mainly from South America. The price of platinum reached $21 an ounce in the latter part of 1901, and the demand is still in excess of the supply.

One of the agents of the Geological Survey has detected platinum in the auriferous sand at Corozal, Porto Rico. This is the only definite report of the existence of platinum in the West Indies, except the old discovery in San Domingo, which has never panned out well. As platinum is in great demand for the manufacture of electrical apparatus and electrical engineering generally, as well as for numerous other purposes for which no substitute has been found, the persistent efforts of the Geological Survey to locate other and better paying deposits of it in this country are both timely and praiseworthy. While scientists say there is no good reason to apprehend an exhaustion of the available supply for a great many years, still the Russian owners of the big platinum fields in the Ural Mountains now have such a complete monopoly of the market that the extensive interests of the United States dependent upon the metal are now at the mercy of the small group of men who control these deposits.

STATISTICS OF THE COAL INDUSTRY.

The volume of "Mineral Resources of the United States" for the calendar year 1901, United States Geological Survey, presents some interesting statistics of the labor in the coal mines of the country. The statistics are as follows:

In the report on the bituminous coal industry in 1890 it is shown that 192,204 men, working 226 days, produced 11,302,322 short tons, valued at $110,420,801, an average of 2.56 tons per man per day and of 579 tons per man per year; in 1895, 239,962 men, working 194 days, produced 135,118,193 short tons, valued at $115,779,771, an average of 2.90 tons per man per day and of 563 tons per man per year; in 1900 304,375 men in 234 days produced 212,314,912 short tons, valued at $220,913,513, or 2.98 tons per man per day and 697 tons per man per year; in 1901 340,235 men in 225 days produced 225,826,849 short tons, valued at $236,406,449, or 2.94 tons per man per day and 664 tons per man per year. The average price of bituminous coal per short ton in 1890 was 99 cents, in 1895 it was 86 cents, in 1900 it was $1.04, and in 1901 it rose to $1.05.

In the anthracite mines in 1890 the number of miners was 126,000, who in 200 days produced 46,468,641 short tons, valued at $66,383,772, the average production being 1.85 tons per man per day and 369 tons per man per year; in 1895 the number of men was 142,917, they produced in 196 days 57,999,337 short tons, valued at $82,019,272, an average of 2.07 short tons per man per day and of 406 tons per man per year; in 1900, 144,206 men, working 166 days, produced 57,367,915 short tons, valued at $85,757,851, or 2.40 short tons per man per day and 398 tons per man per year; in 1901, 145,309 men, working 196 days, produced 67,471,667 short tons, valued at $112,504,020, an average production of 2.36 short tons per man per day and of 464 tons per man per year. The average price per short ton of anthracite coal in 1890 was $1.43, in 1895 it was $1.41, in 1900 it was $1.49, and in 1901 it was $1.67.

In the last twelve years the number of workers in the anthracite mines has increased from 126,000 in 1890 to 145,309 in 1901, or over 15 per cent. During the same period the number of men in the bituminous mines has increased from 192,204 to 340,235, or a little over 77 per cent.

The statistics of accidents in the mines in the calendar year 1901 show that in the bituminous mines 954 men were killed and 2,400 were injured in a total of 340,235 men at work; in the anthracite mines 513 men were killed and 1,234 were injured, in a total of 145,309 at work. The statistics for Pennsylvania alone show 301 men killed, 656 men injured.

CUSTOMS DECISIONS.

The following is the substance of some decisions affecting the customs tariff of the United States, and having bearing upon certain tropical products, which have recently been issued by the Treasury Department at Washington for the guidance of United States customs officers.

Preserved pineapples containing only about 7 per cent of invert sugar, and less than 1 per cent of cane sugar, are dutiable as "pineapples preserved in their own juice," under the last clause of paragraph 263 of the tariff, at the rate of 25 per cent ad valorem.

Balata sheets and so-called "Tuno belting" (of which balata is the component material of chief value), are dutiable under paragraph 450 of the tariff, by similitude to manufactures of gutta-percha, at the rate of 35 per cent ad valorem.

STEAMSHIP COMMUNICATION WITH MEXICO AND CUBA.

On October 20, 1902, bids for the contracts for carrying the mails between New York and Havana, Cuba, and Tampico, Mexico, were opened in the Post-Office Department at Washington. The only bidder was the New York and Cuba Mail Steamship Company, whose bid was $1 per mile for each of the routes. One route is from New York to Havana, and the contract covering the service is to be for five years, beginning November 1, 1902, with a weekly service, a minimum speed of 14 knots per hour, and a minimum tonnage of 2,500. The other route is from New York to Tuxpan, Mexico, stopping at Havana, Progreso, and Tampico on the outward trip and at Vera Cruz and other points on the return. The same speed and tonnage requirements as are applied to the route to Cuba are made, and the service is to be performed weekly. The contract is to be for ten years, and on both routes American-built ships are to be used.

SALE OF PUBLIC LANDS.

The report of the Commissioner of the General Land Office, made public on November 3, shows that the cash receipts of the Land Office for the fiscal year 1902 were $6,261,927, a gain over the preceding year of $1,289,766.

There has been a steady and remarkable increase for the past four years, the cash receipts amounting in 1898 to $2,277,955; in 1899 to $3,070,137; in 1900 to $4,379,758; and in 1901 to $4,972,160.

There is now a net surplus of $4,380,369 in the Treasury to the credit of the office. There was a corresponding increase in the disposal of public lands, the total in 1902 being 19,488,535 acres, an increase over the preceding year of 3,925,739 acres.

The number of original homestead entries made during the fiscal year 1902 was 98,829, embracing 14,033,245 acres, a greater number of entries and a larger amount of land than in any preceding year, showing an increase as compared with the fiscal year 1901 of 30,181 entries and 4,555,470 acres.

The total amount recovered during the past year from depredations committed upon public lands aggregated $284,078, as compared with $261,573 for the previous year, an increase of $22,505, nearly $100,000 in excess of the appropriation for the maintenance of the special agency force.

The public domain is shown to consist of 1,809,539,840 acres, of which 893,955,476 acres are unappropriated and unreserved, 151,161,638 acres reserved, and 764,422,726 acres appropriated.

THE SUPPLY OF RUBBER.

According to the New York Commercial, the enormous increase in the world's consumption of rubber, which has taken place within the last few years, is leading to a gradual revolution in the system of gathering and marketing the raw material. The formation of rubber manufacturing companies with millions of dollars capital in this and other countries has materially assisted this movement.

The fact that the sources of supply are limited to definite and fairly well-known portions of the earth's surface makes it imperative that those who invest in the industry have the assurance that the supplies of raw material upon which their dividends depend are carefully conserved.

Within forty years the price of rubber on the New York market has advanced from 40 cents a pound to nearly 80 cents, and even at that price the demand is in excess of the supply.

During 1901 the United States imported 60,000,000 pounds of crude rubber, as compared with a few thousand pounds forty years ago. During 1900 the world's output of rubber was about 116,000,000 pounds, and the total is constantly rising.

At present the harvesting of rubber is almost entirely in the hands of natives of South American and African rubber countries, and the collection and marketing of it is done by local brokers, all of whom do business on a small scale.

Within a short time, however, all the important rubber regions will be controlled, if the land is not actually owned, by the comparatively few large rubber manufacturing companies, and the rubber industry will then be placed on a level with the other great industries in which the product, from the stage of raw material to that of the finished article, is under one efficient and economical management.

URUGUAY.

CUSTOMS CLASSIFICATION OF HYDRAULIC LIME

[Circular of the Direction General of Customs dated July 16, 1902.]

By virtue of this circular, hydraulic lime not being specially mentioned in the tariff shall, for the purpose of clearance, be treated as Roman and Portland cement and accordingly be valued at the rate of 1 peso and 60 centesimos per 100 kilograms, paying 20 per cent of its evaluation plus an additional duty of 5 per cent and a further 3 per cent for license.

AGRICULTURAL STATISTICS.

According to a report received by the British Foreign Office from His Majesty's Consul at Montevideo, the principal exports from Uruguay are live stock, wool, jerked beef, hides, extract of beef, slaughterhouse products, agricultural products, and provisions for vessels. The value of live stock exported in 1901 was £100,730 ($489,547.80), together with £5,517,260 ($26,814,283.60) of slaughterhouse products and £121,840 ($589,142.40) of agricultural products.

The imports of live stock comprised 113 horses, 1,022 rams, including 352 from the United Kingdom, and 118 bulls, including 111 from the United Kingdom.

The total production of wool in Uruguay is estimated to be roughly 45,000 tons, divided into the following classes: (1) Extra superior in fineness and quality, about 14,000 tons; (2) good, clean wool, not quite first class, some 12,000 tons; (3) second-class wools of good quality, but not so fine as the above, about 10,000 tons; and (4) fine and coarse crosses amounting to 2,000 tons; 2,500 tons of lambs' wool ("borrego") and 4,500 tons of belly wool. The value of the whole wool clip for the last two seasons ending 1901 and 1902 was approximately £2,500,000 ($12,150,000). The prospects for the next season are encouraging, and owing to the reduction of scab and the comparatively small mortality among the lambs, some considerable increase may be expected.

The principal crops grown in Uruguay are maize, wheat, and a little linseed. Oats, barley, and bird seed are also grown in very small quantities. The wheat crop of the season 1900–1901 was the worst since 1892, owing to the prolonged drought. The area under wheat was 683,000 acres, and the returns give the crop at 99,720 tons, against 187,376 tons in the previous year. Estimates for the new season's crop indicate that there will be about 300,000 tons available for exportation. The maize crop for 1900–1901 was a good one, being returned at 141,648 tons, almost double that of the season before; the area under cultivation was 448,450 acres.

VITICULTURAL STATISTICS.

[From the Stock and Agricultural Review of Montevideo.]

There are at the present time in the Republic of Uruguay 1,029 vineyards, covering a superficial area of 4,149 hectares, and which give employment to 1,935 persons. The following table shows the average number of vines per hectare in the different departments:

Departments.	Number of vines.	Area.	Averages.
		Hectares.	
Artigas	408, 300	106	4, 083
Salto	3, 726, 076	902	4, 130
Paysandú	806, 310	194	4, 156
Rio Negro	18, 500	4	4, 625
Tacuarembó	60, 000	14	4, 285
Rivera	103, 000	24	4, 291
Treinta y Tres	31, 730	11	2, 884
Cerro Largo	....	....	....
Minas	50, 550	11	4, 595
Rocha	207, 700	50	4, 154
Maldonado	1, 074, 240	367	2, 927
Duranzo	175, 800	37	4, 751
Flores	38, 000	12	3, 166
San José	174, 913	56	3, 123
Florida	425, 266	96	4, 429
Soriano	322, 338	90	3, 581
Colonia	2, 095, 512	448	4, 677
Canelones	2, 546, 295	560	4, 546
Montevideo	4, 248, 121	1, 167	3, 460
Total	16, 512, 651	4, 149	3, 979

The statistics given below show the production per hectare in the various departments:

Departments.	Kilos.	Hectares.	Average.	Vines.	Production.	Average.
			Kilos.		*Kilos.*	*Kilos.*
Artigas	188,600	100	1,886	377,100	188,600	500
Salto	1,882,593	902	2,087	3,290,136	1,882,593	572

Florida	390,593	96	4,068	403,466	390,593	968
Soriano	176,982	90	1,966	256,838	176,982	689
Colonia	2,668,256	448	5,955	1,988,242	2,668,256	1,342
Canelones	2,079,659	560	3,713	1,894,595	2,079,659	1,097
Montevideo	4,633,779	1,167	3,970	3,012,963	4,633,779	1,537
General average	13,612,449	4,149	3,280	13,525,143	13,612,449	1,006

MISCELLANEOUS NOTES.

The customs revenue of the Republic from January to August, inclusive, in 1902 are stated to have been $6,624,416 against $6,626,989 in the same period of 1901, showing a decrease of $2,573. For the month of August the following figures are given: Importation, $739,356.32; exportation, $33,542.03; Departments (estimate), $60,000, a total of $832,698.35 as compared with $782,803 for the corresponding month of the previous year. This was the third month in succession in which increases over the corresponding months of 1901 are shown and the hope is nourished that the total result for the year may be brought up to the standard in spite of heavy losses in the earlier months.

The Uruguayan wool clip for 1901–2, according to the "Review of the River Plate" of September 6, 1902, was 86,200 bales, or 43,100,000 kilogs. The arrivals in Montevideo from October 1, 1901, to July 31, 1902, were 72,000 bales, the exports from Montevideo having aggregated 71,876 bales.

Dr. Carlos Nery, Consul-General of Uruguay in London, has been named Minister of that Republic in Washington.

VENEZUELA.

THE ESTABLISHMENT OF PORCELAIN FACTORIES.

The "Venezuelan Herald" of October 12, 1902, publishes the following contract entered into between the Minister of Fomento of the United States of Venezuela, on behalf of the Federal Executive, of the one part, and ELEODORO GONZÁLEZ, of the other, of Caracas, as attorney of Dr. ELÍAS MARTÍNEZ ORAMAS, residing at Marseilles, by virtue of a power executed in Paris on the the 11th of July, 1902.

"ARTICLE 1. The contractor undertakes to establish in the Federal District or at other points in the Republic of Venezuela one or more factories for the manufacture of such objects of crystal, glass, porcelain, and pottery as should be required for the consumption of the country. The factories shall be established and in working order within the two years next following the date on which this contract is approved by the National Congress, save in case of impediments caused by superior force or accident, legally proved before the Federal Executive.

"ART. 2. As special protection to this industry, which is a new one in Venezuela, the Federal Executive makes the following concessions to the contractor: The exclusive right to exercise the said industry in the State, Territory, or Federal District in which a factory may be installed, during the first ten years of the duration of this contract; the right to use gratis, during the continuance of this contract, all prime materials found on unreclaimed lands, the property of the nation; the right to import, free of duty, for once only, for each of the factories which the contractor may establish, the machinery, apparatus, instruments, buildings, materials, tools, and implements destined for the installation and exploitation of his factories, on complying for that purpose, on every importation, with the legal requisites; and the exemption of this enterprise and its annexes and products from the payment of all national imposts and contributions during the continuance of this contract.

"ART. 3. This contract shall endure fifteen years, to count from the date of its approbation by the National Congress, and during its existence the Federal Executive shall not grant any concession which might prejudice the rights acquired by the contractor.

"ART. 4. All doubts and controversies which may arise in the interpretation and execution of this contract shall be settled amicably between the contracting parties, but in case it be impossible to agree they declare that they will submit in everything to the provisions of article 139 of the Federal Constitution now in force, and such doubts shall not in any case be allowed to give rise to international reclamations.

"ART. 5. The contractor shall have the power to transfer in part or in their entirety the rights which he acquires by this contract, with the previous consent of the Federal Executive, but shall in no case transfer the same to a foreign government."

AGRICULTURAL AND INDUSTRIAL SITUATION.

A recent volume of the "Receuil Consulaire Belge" contains an interesting and detailed report upon the financial, agricultural, industrial, and commercial situation of Venezuela, prepared by Mr. F. VAN DER HEYDE, the Belgian Consul-General and Chargé d'Affaires at Caracas, from which the following items are taken.

Regarding agriculture, the report says that the agricultural exploitation of Venezuela depends in great part upon the cultivation of coffee. Cocoa is another source of agricultural wealth, the product obtaining remunerative prices in European markets, in view of its very superior quality. Arabean coffee, *coffea arabica*, is generally cultivated in Venezuela. It was imported in 1784 from Martinique, where it had been introduced in the beginning of the century. The Venezuelan planters in recent years have been experimenting with the Abyssinian coffee and have obtained very good results. However this culture is not yet far enough advanced to provide any definite forecast as to its future.

The general area of the coffee plantations is estimated at about 170,000 hectares. The total production is valued at 850,000 bags of 100 Venezuelan pounds, or 46 kilograms. This production is very small in comparison with that of Brazil, the State of Saint Paul alone producing more than 6,000,000 bags. Hâvre, the great market for Venezuelan coffee, has been closed to it for several months on account of the application of the prohibitive duty of 300 francs per 100 kilograms. The coffee is now sent to Hamburg and New York. This, as well as the consequences of the general crisis, has contributed to a considerable decrease in the price. The average prices quoted at La Guayra since 1895 were 24¾ *pesos* per bag in 1895, 22 in 1896, 19½ in 1897, 11¾ in 1898, 9½ in 1899, and 12¾ in 1900. Coffee is at present sold for 9 and 10 *pesos* or 37 to 40 *bolivares* per bag of 46 kilograms.

The country consumes about 200,000 bags of its production and exports 650,000, and 200,000 bags of coffee, of Colombian coffee, are yearly exported through the port of Maracaibo. The minimum production of the coffee tree is one-fourth of a Spanish pound, and the extreme production does not exceed 1 pound per foot. In Brazil the yield is much greater. The coffee is gathered in the same manner as the Brazilian crop, and the machinery used for its industrial manipulation is of English, American, or Dutch make; but these agricultural installations are as yet very rudimentary and leave much to be desired.

Two grades of cacao are found in Venezuela—*criollo* cacao, which is the native cacao, and *trinitario* cacao, which was imported from Trinidad. The *criollo* cacao grows wild in the valleys situated near the sea, where the temperature is warm and moist. It is of a very high grade, and sells for 72 to 120 bolivares a fanega, or 50 kilograms. The most important plantations are found between La Guayra and Puerto Cabello at an altitude of 500 meters. The *trinitario* is inferior in quality to the *criollo*, but it grows more rapidly. This cacao is extensively planted at present, and although it is bitter in taste compared with the *criollo*, which is much sweeter, it is readily sold. The *trinitario* sells for from 70 to 90 bolivares the fanega. The annual production of cacao in Venezuela is about 8,000 tons, average crop.

Tobacco grows in the warm and temperate regions. It is planted from August to November and gathered toward the month of May. The places of production are Barinas, Barquisimeto, Coro Capadare, Maturin, Guanape, etc. The tobaccos of the last three places are most used. Capadare furnishes the best quality; Maturin tobacco is of inferior quality; but the most abundant quality is the intermediate grade, which comes from Guanape. These tobaccos are divided into three classes, according to the size and beauty of the leaves and their special conditions of color, strength, taste, perfume, etc. The Venezuelan tobacco has a bitter taste. Tobacco imported from Havana, where it is known under the name of Vuelta-Abajo, is now being cultivated at Perija, near Maracaïbo. A German firm introduced this industry, which is said to give satisfactory results. The Perija tobacco is not exported, but the firm mentioned makes cigars from it of three grades, which sell for 10, 20, and 30 centimes.

Rubber grows abundantly in Venezuela, and is found especially in the Orinoco basin. Several foreign companies—German, American, French, and Belgian—have been organized in recent years for the exploitation of this rich product. Last year more than 1,000,000 kilograms of rubber were exported from Venezuela. This rubber is sold in the foreign markets, classified as fine, half fine, and Sernamby, quoted, respectively, at 12 francs, 11.50 francs, and 8 to 9 francs per kilogram.

Cotton and indigo are scarcely cultivated in Venezuela at the present time.

The consumption of bananas in Venezuela is very large, as in all tropical countries; but they are not exported, although a direct line of navigation connecting La Guayra, Puerto Cabello, and Maracaibo with the United States would contribute to the success of the export commerce of this product.

Sugar cane is widely cultivated. According to the last census, of a general total of 49,462 haciendas, 11,020 were devoted to the exploitation of the cane, of which there are two varieties, the *caña criolla*, or native cane, and the *caña de otaïti*, or of the South Seas. This latter variety is stronger, taller, more easily cultivated, and contains a larger per cent of sugar. In central Venezuela, in the valleys of the Tuy, Aragua, Lake of Valencia, etc., the cane is prepared in large mills, which are run by steam. In the Cordilleras the mills are much more primitive.

The products obtained are, with the exception of a small exportation, all consumed in the country. Brown lump sugar, "papelon," is the most important product. The enormous quantity consumed is only equaled by that of the cane "aguardiente" (cane brandy), the most profitable resource of the sugar-cane planters. A part of the raw sugar is refined and gives a fine white crystallized sugar which is consumed by the wealthier classes.

The vast forests which cover Venezuela contain all the fine tropical woods. The small exportation of Venezuelan woods, which scarcely amounts to 4,000 tons per year, is due to the lack of labor and means of communication. In the exports mahogany, ebony, lemon, and orange woods figure for only a small part, while ironwood (vera), guayacan, and zapatero form almost the entire amount. The State of Lara, owing to its salubrious climate, more numerous population, and to the railway line from Barquisimeto to the port of Tucacas which crosses the State, is the most accessible of the forest regions, and contractors of the country will furnish any quality of wood for 60 francs per ton, f. o. b. at Puerto Cabello.

Cattle raising, which was formerly very profitable, has decreased considerably since the war of independence; however, the stock raisers are endeavoring to bring this industry up to its former standard. The pasture lands in 1895 were divided into 148,133 square kilometers of public lands and 257,289 square kilometers of land belonging to private individuals. At the present time the number of large cattle in the Republic is estimated at 2,000,000 head. Caracas and the suburbs consume 6,000 head per month. The exports are shipped principally through the ports of Puerto Cabello and Guanta. Puerto Cabello ships from 50,000 to 60,000 head annually (66,049 head in 1901), which are all destined to Cuba. Shipments are also made via Barrancas from Ciudad Bolivar. The average weight of the animals is 850 Spanish pounds, but it is estimated that from 12 to 15 per cent of this weight is lost on the voyage. At Havana the price obtained is about 0.14 reals, or 7 francs, for an arroba of 25 pounds.

There is only one "saladero" or packing house in Venezuela now. It is called "Candelaria," and is situated in the State of Apure and equipped on the model of the saladeros of Uruguay.

Leather manufacturing is the principal native industry, all the raw material being found in the country. The hides are furnished by the large troops of llamas, sheep, and goats of the States of Lara and Falcon. The tanning barks are obtained from myrobalam, mangle, dividivi, and quebracho from the forests of the Orinoco and the Zulia. About the middle of the century some European workmen—Italians and Spaniards principally—established a shoe factory in Caracas, and, protected by the customs duties, the leather, tanning, saddlery, and shoemaking industries were gradually established in the country. There are two tanneries at Caracas. The larger of these buys about 80 ox hides a day from the Caracas abattoirs, and in addition treats about 200 sheepskins and 60 dozen goatskins bought at Maracaïbo and at

Coro. This factory only uses for tanning purposes the bark of the dividivi coming from the valleys of Aragua, Coro, Margarita, and Maracaïbo, and the bark of the mangle from this last port. Only ordinary or half-fine leather for soles and vamps is produced in this factory. The fine leather, varnished calfskins, etc., come from France, Germany, and the United States. The shoe factory is established at Caracas, and produces 500 pairs of shoes and slippers of every size and shape. The price of these shoes varies from 2.50 to 22 francs per pair. The saddlery established at Caracas also makes on an average 325 saddles, varying in price from 60 to 500 francs. There is another shoe factory at La Guaira which produces 200 pairs of shoes and 40 dozen *alpargatas* (ordinary slipper) daily. It has retail houses at Ciudad Bolivar and at Maracaïbo and sends its products to all parts of the Republic.

The cigarette factories, which are protected by high import duties, are in a very flourishing condition. There are several of these factories; the most important one buys its tobacco in leaves partly from Cuba and partly from Capadare, Maturin, and Guanape (Venezuela). Two American machines are used in the preparation of the tobacco, according to whether it is to be used for the hand or machine-made cigarettes. The normal production of this factory is 5,000 packages of 15 cigarettes per day. All of the cigarette factories, in spite of the competition, make handsome profits.

The protective duty of 1 franc per gross kilogram (packing included), which is levied upon all grades of chocolate imported into Venezuela, prohibits the introduction of any except manufactured chocolate, candies, etc., the consumption of which is quite large. An important house in Turin has in the three years it has been trying to establish a market in Caracas imported 5,000 kilograms annually. But the protective tariff has almost completely stopped the importation of chocolate in cakes, as it is to-day manufactured in the country in sufficient quantities to supply the national consumption. Two factories of some importance are established at Caracas and supply the local demand. The annual production of the India factory is 20,000 kilograms. The raw material, cocao and sugar, are bought in the country, which produces these articles in abundance and of good quality. The fine chocolate made by the India factory is excellent. The second factory, el Indio, is of equal importance, but produces second grades of chocolate.

There are two breweries in Venezuela, the Cerveceria Nacional, and the Maracaïbo brewery. The Cerveceria Nacional, a stock company capitalized at 2,500,000 francs, was established at Caracas the 16th of August, 1894, with a capital of 600,000 francs. The enterprise prospered from the beginning. In 1895 it was obliged to increase its capital to 1,300,000 francs, and in 1901 to 2,500,000 francs, its present capital. This last increase was due to the purchase of two rival establishments, the breweries of Puerto Cabello and Valencia.

The Cerveceria Nacional of Caracas produces actually from 10,000 to 12,000 hectoliters annually, although it could easily produce 30,000 hectoliters. The beer is sold in casks or in bottles in all the central and eastern provinces. The hops come from Germany and Austria and the bottles and corks from Germany. The ice plant annexed to the brewery produces, after cooling the vats, 2,300 kilograms of ice per day. The Cerveceria Nacional is very prosperous. A German company has recently acquired a majority in the management of the concern and will further develop the business.

Two telephone companies are established in Caracas, only one of which, however, is of importance, the "Anglo-American Telephonic and Electrical Appliances Company." This company has a double system, one for the city of Caracas and the other for certain points in the interior—Santa Lucia, Valencia, and the ports of La Guaira and Puerto Cabello. All the apparatus, wire, etc., come from the United States.

The monopoly for the gas and electric lighting of the Federal District is held by the Gas and Electric Light Company—a Venezuelan stock company capitalized at 2,300,000 francs, subscribed in the country. A current for from 3,000 to 4,000 incandescent lamps of 16 candlepower is furnished daily for interior lighting, and from 90 to 100 arc lights of 2,000 candlepower for street lighting. This production could be doubled.

The use of street cars in Venezuela is as yet little developed, only two cities (Caracas and Valencia) being supplied with street-car lines. The cars used are of American make. For more than four years the establishment of electric lines has been under consideration, the contract for which would be given to the General Electric Company of New York.

TRADE OF AMERICA AND GREAT BRITAIN, FIRST NINE MONTHS OF 1902.

The "Accounts Relating to Trade and Navigation of the United Kingdom," published in September, 1902, contain a detailed statement of the commercial intercourse between Great Britain and the various countries of America during the first nine months of 1902 as compared with the corresponding period in the two preceding years.

The classification of imports is as follows:

Articles and countries.	Value—nine months ending September 30—		
	1900.	1901.	1902.
Animals, living (for food).			
Cattle:			
Argentine Republic	£667,500	....	....
United States	4,797,017	£5,540,386	£4,667,759
Sheep and lambs:			
Argentine Republic	289,000	....	....
United States	173,441	351,575	274,730
Articles of food and drink.			
Wheat:			
Argentine Republic	5,109,013	2,412,894	1,341,525
Chile	....	....	75,047
United States	5,595,824	8,000,047	7,402,194
Wheat flour:			
United States	6,055,244	6,742,887	5,116,342
Barley:			
United States	1,241,719	641,263	757,324
Oats:			
United States	1,078,535	1,151,533	178,278
Maize:			
Argentine Republic	1,097,268	1,572,321	2,161,895
United States	6,317,497	5,424,082	317,809
Beef, fresh:			
Argentine Republic	452,552	859,146	1,332,101
United States	4,603,524	5,274,219	4,009,966
Mutton, fresh:			
Argentine Republic	1,363,507	1,426,320	1,680,776
Pork, fresh:			
United States	295,817	493,129	447,935
Bacon:			
United States	5,461,963	6,831,822	6,099,485
Beef, salted:			
United States	185,800	179,266	172,554
Coffee:			
Brazil	56,409	70,458	305,140
Central America	604,776	736,595	537,918
Sugar, unrefined:			
Argentine Republic	18,417	193,275	200,877
Brazil	35,156	134,855	171,309
Peru	117,318	19,575	32,511
Tobacco, unmanufactured:			
United States	....	....	4,650,688
Tobacco, manufactured:			
United States	794,301	925,946	940,401
Metals.			
Copper;			
Chile	345,496	199,372	216,307
United States	26,414	23,256	19,424
Regulus and precipitate:			
Chile	256,700	119,124	193,928
Peru	82,761	223,423	82,958
United States	272,901	454,239	347,792
Wrought and unwrought:			
Chile	810,981	950,470	700,503
United States	1,702,772	1,097,377	2,004,773
Iron, pig:			
United States	155,534	103,276	54,274
Steel, unwrought:			
United States	454,409	277,745	29,409
Lead, pig and sheet:			
United States	495,073	472,769	466,175
Oil.			
Petroleum:			
United States	2,057,988	1,882,940	2,219,251
Lubricating oil:			
United States	593,099	612,928	647,241
Raw materials for textile manufactures.			
Cotton, raw:			
Brazil	585,295	140,367	879,396
United States	15,640,070	19,400,498	17,322,921
Wool, sheep, or lambs':			
South America	858,256	1,461,540	1,125,792
Alpaca, vicuña and llama:			
Peru	145,324	154,157	212,564

Articles and countries.	Value—nine months ending September 30—		
	1900.	1901.	1902.
Raw materials for sundry industries.			
Hides, wet:			
Argentine Republic and Uruguay	£18,629	£56,041	£142,204
Brazil	31,200	27,387	53,727
Tallow and stearine:			
Argentine Republic	223,547	196,135	570,549
United States	571,208	394,400	146,502
Manufactured articles.			
Rails, steel:			
United States	72,253	164,274	40,525
Tires and axles:			
United States	736,507	536,861	398,530
Jute manufactures:			
United States	2,219,712	2,475,717	2,676,734
Paper:			
United States	32,902	36,066	236,044
Miscellaneous articles.			
Horses:			
United States	815,113	568,992	228,583
Flax or linseed:			
Argentine Republic	684,513	1,514,777	1,835,445
United States	14,185	13,642	128,446

The classification of exports is as follows:

Articles and countries.	Value—nine months ending September 30—		
	1900.	1901.	1902.
Articles of food and drink.			
Aerated waters:			
United States	$148,075	$144,126	$141,628
Salt, rock and white:			
United States	65,845	67,726	69,058
Spirits:			
United States	164,962	203,516	228,001
Raw materials.			
Coal, coke, etc.:			
Brazil	610,228	554,765	546,659
Wool, sheep and lambs':			
United States	403,160	244,157	380,160
Articles manufactured wholly or in part.			
Cotton manufactures, all classes:			
Argentine Republic	1,227,209	897,589	881,702
Brazil	806,831	601,956	963,026

TRADE OPPORTUNITIES IN LATIN AMERICA.

Contracts will shortly be placed in the United States for the equipment of 17 miles of electric traction, which is to be constructed in the city of Monterey, Mexico. The contracts will aggregate about $1,000,000. Two of the principal existing horse-car roads are to be converted into electric motive power and a new short line will be built, the concession for which has been acquired recently by a United States engineering and contracting firm. The new electric line will be about 30 miles in length. The enterprise will entail an expenditure of about $1,500,000. Everything in the way of power-house equipment, cars, trucks, motors, etc., will be bought in the United States. Large double-deck cars will be utilized. Freight will be carried on specially constructed flat trucks. Sixty and 70 pound rails will be laid. The initial capacity of the power-house plant is to be 1,500 horsepower.

A syndicate of New Yorkers, incorporated as the Central Construction Company, has taken over from the Guatemalan Government the construction of a line of railway from the Gulf of Honduras coast inland, reaching Guatemala City. The Guatemala Central Railroad has already built a line between Puerto Barrios and El Rancho and the new construction will be on the remainder of that line, which would bring it to Guatemala City. The length of the new line will be about 70 miles, but of this 20 miles have already been graded. The New York contractors will complete the work on the graded section, including the bridging work. All of the new road will be inland and through the mountains, the coast line having been finished. The work will be sublet by the contractors through their New York office. The estimated cost is between $2,000,000 and $3,000,000.

A Chicago firm is reported to have secured a concession from President Zelaya, of Nicaragua, for a trans-Continental railroad running from Rama on the Bluefields River to Managua, there connecting with the Government road to Corinto, with the branch line running from La Plaza to the Matagalpa coffee and mining district. This concession, it is stated, carries with it a subsidy of 14,000 acres of land per mile. The road will be narrow gauge to conform with the present Government road and is to be in full operation by January 1, 1905. The highest altitude of this road is only 900 feet, and it has only one bridge of 40 feet. The concession also will include the operation of the Government road in connection with this new line. The total length of this road, including the branch, is 300 miles; the present Government road being 140 miles, would give a total of 440 miles—being all the railroad mileage in Nicaragua. Free importation of all construction material is granted, with exemption of local taxation.

HAROLD J. ROSSI, of the City of Mexico, Mexico, is about to let contracts for the equipment of an electric power transmission plant to be located on a hacienda situated near the town of San Martin, Texmelucan, State of Puebla. It is proposed to utilize the power derived from a large waterfall to generate 500 horsepower of electric energy, which is to be transmitted 10 miles to the before-mentioned town, where the power is to be used to operate cotton mills and other manufacturing plants. Later on a greater amount of power will be generated for transmission to Tlaxcala and the haciendas between San Martin and Puebla.

MANUEL SIQUEROS, a capitalist of Juare, Mexico, and MANUEL GAMEROS, a mining engineer of Chihuahua, have purchased the great Passasiachic Falls, situated near Ocampo, in the State of Chihuahua, and will construct a large hydraulic plant for the purpose of generating electricity to furnish power for an extensive railway system and for a number of mines and mills in that section. The waterfall which it is proposed to utilize has a sheer drop of 1,800 feet over a precipice. It is intended to build an electric railway for handling ore, etc., between the town of Minica, at the terminus of the Chihuahua and Pacific Railway, and the mining camps of Altos, Ocampo, Pinos, and Concheno.

The Government of Uruguay requests tenders for the construction of the following sanitary works for the city of Montevideo: A rock tunnel 1,278 meters in length, 3.65 meters in height, and 3 meters in width; main collector, 1,557 meters plus 1,283.30 meters long; a secondary collector 2,016 meters in length, and the auxiliary collectors, effluents, and inspection chambers, etc. Plans and specifications may be obtained at the consulate of Uruguay, Edinburgh Mansions, Howick place, London, S. W. Bids will be received up to December 15.

The Commissioners of the drainage works of the Province of Buenos Ayres have invited tenders for the construction of the necessary works in connection with some 600 miles of main drainage canals, branch trenches, and necessary works in certain repairs subject to inundation. Further information can be had by addressing the Secretary, Argentine Legation, No. 16 Kensington Palace Gardens, London, W. No date for the placing of the contract is yet announced.

The "Diario Oficial of Chile" publishes a Presidential Decree inviting persons to submit designs for ten postal and six telegraphic stamps for the use of the Chilean Government. A prize of 300 pesos will be awarded for each design accepted, which will thereupon become the absolute property of the Chilean Government. The examination of the designs submitted will take place on the 15th of November next in the offices of the Subsecretary of the Ministry of the Interior at Santiago, Chile.

Tenders were recently submitted to the Chilean Government for the construction of a submarine cable between Talcahuano and Punta Arenas. As the committee appointed to consider the offers did not recommend any of them for acceptance, the Government has determined to get fresh soundings made with the object of issuing another call for tenders.

Tenders are invited by the municipal authorities of Callao, Peru, for the supply of 2,400 tons of straight cast-iron pipes, varying from 2½ inches to 21 inches in diameter, and also for a quantity of special castings, tees, crosses, valves, hydrants, etc. Specifications can be obtained from Graham, Rowe & Company, Mersey Chambers, Liverpool, England. A fee of £5 is insisted upon, which is to be returned on receipt of a bona fide bid.

According to a report of the French Chargé d'Affaires at Asuncion, there is, owing to the climate, a good market for cement and earthenware tiles in Paraguay, the employment of board or parquet floors being in many cases out of the question. This report likewise mentions some of the principal importers of these articles at Asuncion.

The Brazilian Government has extended for three months the period for which tenders can be received for improvement works at the port of Pernambuco.

The South American Journal of August 23, 1902, reports that the Chilean Government is about to establish a complete meteorological station at Santiago.

The Santiago de Cuba municipal authorities are to install a system of electric lighting in that city. Bids are now being invited.

San Luis Potosi, Mexico, is to have a complete system of waterworks, and a dam holding 400,000 cubic meters of water will be constructed at a cost of some $34,000 gold.

The San Rafael Paper Company, Mexico, is to considerably extend its plant. The Pelton Water Wheel Company has secured a contract for a 600-horsepower water wheel and a mile of steel-riveted pipe varying from 28 inches to 32 inches in diameter.

The proprietors of the Celaya Alcohol Distillery, Mexico, according to advices from the southern republic, are about to construct a plant in the City of Mexico.

BOOK NOTES.

Books and pamphlets sent to the Bureau of the American Republics, and containing subject-matter bearing upon the countries of the International Union of American Republics, will be treated under this caption in the Monthly Bulletin.

Dr. GERARDO JIMÉNEZ and Mr. ENRIQUE JIMENEZ, both of San José, Costa Rica, the first a noted surgeon and the second a distinguished and expert agriculturist of the Costa Rican Republic, have written a valuable book of some 250 octavo pages, entitled "Higiene de las Habitaciones y del Agua en Costa Rica" (Hygiene of the Dwellings and Water of Costa Rica). The book is profusely illustrated with appropriate drawings and cuts explanatory of the subject-matter, and is divided into five parts or subdivisions. The first of these subdivisions treats in a masterful manner of the elements necessary, from a hygienic standpoint, to make the sanitary condition of dwellings what it should be. Into this great and important subject to every resident of the Republic enter the questions of soil, water, humidity of the atmosphere, drainage, capillary attraction, construction materials, size, form, and arrangement of buildings constructed for and used as dwellings, and their location. The second part is devoted to a discussion of the atmospheric conditions with respect to health, quantity of fresh air necessary for the proper maintenance of the health of the individual, the air space that should be provided for in dwellings, and the ventilation of all habitations in a scientific and practical manner. The third part treats of sanitary appliances, removal of waste products, such as ashes, rubbish, etc., and the proper utilization of the same for fertilizing purposes. The fourth section or division contains a learned discussion of the water supply, the quantity necessary per capita, the storing of potable water in deposits, and its conduction, distribution, and chemical analysis, etc. The fifth part treats of the danger existing from the propagation of certain diseases by means of contaminated water and contains valuable suggestions as to how the water supply may be kept pure and wholesome on all occasions. Malarial fever, consumption, typhus, diphtheria, intestinal parasites, etc., transmitted by means of foul and unwholesome water are discussed at considerable length, and the way in which these terrible and destructive diseases may be avoided is ably set forth.

The Department of Fomento (Public Works) of the Republic of Peru has published an interesting pamphlet, entitled "A Bulletin of the Mining Engineers of Peru." The principal subject discussed in the 50 pages composing this pamphlet is the decree authorizing the organization into a society of the mining engineers of the Republic for the purpose of studying in a methodical and scientific manner the mining interests of the country, and with the intention of initiating and furthering plans and methods especially adapted to the development of this rich and growing industry. The by-laws of the association are printed in full, and a number of recommendations of the organization in its collective capacity are inserted, as are also numerous editorials of the Peruvian press upon the subject of mining in Peru. The last few pages of the pamphlet contain some of the instructions given to the various mining commissions that are soon to inspect and report upon the important mineral zones of Yauli, Moquegua, Cerro de Pasco, and other great mining centers of the nation. The pamphlet states that there will soon be published at Lima, under the direction of the Society of Mining Engineers, the following bulletins: "The Petroleum Industry in 1901;" "A Geological and Mineral Bibliography of Peru;" "The Silurian Rocks of Peru and Their Outcrops Containing Gold;" "Coal in Peru;" "The Petroleum and Asphalt of Peru," and "Copper in Peru." These bulletins will be published in Spanish. In addition to the publications mentioned, there will be published within the next few months by the president of the Society of Mining Engineers, at Lima, Peru, preliminary reports relating to the mineral zones of Yauli and Cerro del Pasco, and the Moquegua and Tacna explorations. The president of the society will also discuss in his annual report for 1901 the following subjects: Annual Mining Statistics; Final Reports on the Yauli and Cerro del Pasco Districts, and the Maquegua and Tacna explorations; Reports on iron at Piura, gold at Huanuco, tungsten at Lircay, and nickel at La Mar. This report will also be supplemented by an exhaustive essay upon the collections of rocks, fossils, and minerals forwarded to the society by the various mining commissions appointed for the purpose of making reports on important mining regions, and by numerous mine owners and miners throughout the country.

A pamphlet of 33 pages has just been published by the Department of Fomento (Public Works) at Lima, Peru, entitled "La Crisis del Azúcar" (The Sugar Crisis). This pamphlet contains the report of the Commission appointed by the Government to investigate the difficult and intricate question of the sugar industry in Peru, and to determine and make known the cause of the low price of this commodity in the markets of Europe, and to recommend, at the same time, such measures of relief as it may deem advisable for the Government to initiate regarding the matter. The Commission embodies in its report some useful suggestions to the sugar planters of Peru, the principal ones of which are treated under the following headings:

1. Means for decreasing the cost of production. To this end the Commission recommends the repeal or reduction of the import taxes on machinery and other supplies of prime necessity used and consumed on sugar plantations, as well as the repeal of the internal taxes on sugar products.
2. Means for increasing the yield of the sugar cane.
3. Means for increasing the quantity of sugar obtained in the process of refining, for a prevention of waste, and for a more complete utilization of the by-products.
4. A reduction in the cost of transportation.
5. A reciprocity treaty with the United States and commercial treaties with Japan, Chile, and Bolivia for the purpose of obtaining the admission of Peruvian sugar into these countries on more favorable terms.

The annual compilation of data bearing upon the "Mineral Industry, its Statistics, Technology, and Trade in the United States and Other Countries," issued annually by the "Engineering and Mining Journal," has been received by the Columbus Memorial Library, and forms a valuable acquisition to the branch of knowledge of which it treats. In addition to the world's production in 1901 of the various metals and minerals considered, the following items are covered: Antimony in the United States and Mexico; asphaltum in Cuba, Mexico, Venezuela, and the United States; borax in the United States, the Argentine Republic, and Chile; coal and coke in the United State and Mexico; copper in the United States, the Argentine Republic, Bolivia, Chile, Mexico, Peru; gems and precious stones in the United States and South America; gold and silver in the United States Mexico, Costa Rica, Honduras, Salvador, Nicaragua, Bolivia, Brazil, Chile, Colombia, Ecuador, Peru, Uruguay, and Venezuela; graphite in the United States and Mexico; lead in the United States and Mexico; manganese in the United States, Brazil, Colombia, Chile, and Cuba; monazite in the United States and Brazil; nickel and cobalt in the United States, Chile, and Mexico; petroleum in the United States, Brazil, Colombia, Peru, and Venezuela; quicksilver in the United States and Mexico; soda and sodium nitrate in the United States, and Chile; sulphur and pyrites in the United States, Chile, and Venezuela; tin in the United States and Bolivia. A general summary of the import duties of the principal countries of the world is made and the mineral statistics of foreign countries, so far as they are available, are included in the volume.

The Columbus Memorial Library is in receipt of an interesting volume, by Dr. PAUL PREUSS, the title of which is "Expedition nach Central und Süd Amerika" (Expedition to Central and South America).

Dr. Preuss was sent out by the German Colonial Economical Committee in 1899 to make a thorough study of the agricultural and storage methods used in the plantations of Central and South America. He visited the most important districts of those countries (Dutch and British Guiana, Trinidad, Grenada, Venezuela, Ecuador, Nicaragua, Salvador, Guatemala, Mexico, Cuba, and Jamaica), and collected a vast amount of valuable information. He describes his journey briefly in the first volume, but devotes more space to botanical and agricultural observations. The second part of his work contains a minute description of some tropical food plants as well as the preparation of these products. In the final chapter he institutes a comparison between Camerun, West Africa, with certain South American territories, and it is very interesting to note that, with regard to the sanitary conditions and labor, South America is the superior, whereas Camerun has the better climate. The book is very well gotten up and contains, besides some excellent illustrations, a comprehensive index.

Through the courtesy of Consul-General Seeger, the Columbus Memorial Library has received a copy of the first number of the "Brazilian Mining Review," published at Ouro Preto, Minas Geraes, under the direction of Dr. Alcides Medrado. Dr. Medrado is a leading authority on mineralogy in South America, having been appointed mining commissioner for Brazil at the Pan-American Exposition at Buffalo. This review is published in English, and its object, as stated in the programme, is to make known the causes of the decadence of mining in Brazil, to give a vigorous impulse to the industry, and deal with every subject of general interest to the mining and metallurgical professions. The following are some of the very interesting and instructive articles contained in this number: "The Mineral Wealth of the State of Minas Geraes, Brazil;" "Diamonds in Brazil;" "Brazilian Manganese;" "The Monazite Sands of Bahia;" "Report on the Manganese of Corumba, State of Matto Grosso, Brazil;" "The Diamond Deposits of Salobro, Brazil;" "The Manganese Deposits of Gandarella, Minas Geraes;" "Some Gold Mines in the State of Minas Geraes and The Diamond Fields of Bahia, Brazil."

A special consular report issued by the Bureau of Foreign Commerce of the United States Department of State deals with "Silver and Plated Ware in Foreign Countries," and a section is devoted to the importations of this class of goods by the countries of Latin America with reference to United States dealers. The data bearing on the subject is arranged from reports forwarded to the Department by the various consular officers at the ports treated of, and forms a valuable guide to persons interested in this branch of trade. The silverware trade of Mexico is said to be very large, and the greater part imported is received from the United States. Germany is said to be the most active competitor in this line. The Central American countries import relatively small quantities of silver and plated ware, while the Argentine Republic, Chile, and Brazil form the leading South American markets.

"The Dairy Industry and Dairy Markets in Porto Rico" is the subject of a special report issued by the United States Department of Agriculture, being a reprint from the Eighteenth Annual Report of the Bureau of Animal Industry, 1901. In a prefatory statement Mr. HENRY E. ALVORD, Chief of the Dairy Division, says that although most of the report is based upon observations of the conditions prevailing in Porto Rico, it may be applied equally to other Spanish-American tropical countries where customs of trade and habits of the people are similar to those of Porto Rico. It is for this reason that in some cases much detail is furnished in regard to matters of apparently small importance so far as the country under consideration alone is concerned.

A pamphlet of 33 pages, entitled "Escuela Nacional de Agricultura" (National School of Agriculture), has recently been issued from "La Industria" Printing House at Lima, Peru. The front page of the publication is embellished by an excellent engraving of the President of the Republic. The book proper treats of matters relating to the National Agricultural College at Lima, and contains the decree establishing the school, the by-laws adopted for the government of the institution, and a list of the officers, faculty, and students of the school.

BOLETÍN MENSUAL

DE LA

OFICINA INTERNACIONAL DE LAS REPÚBLICAS AMERICANAS,

Unión Internacional de Repúblicas Americanas.

VOL. XIII. NOVIEMBRE, 1902. No. 5.

DISCURSO DEL SEÑOR PRESIDENTE DE LOS ESTADOS UNIDOS DE AMÉRICA EN EL BANQUETE CON QUE SE CELEBRÓ EN NEW YORK LA DEDICACIÓN DEL NUEVO EDIFICIO DE LA CÁMARA DE COMERCIO EL 11 DE NOVIEMBRE DE 1902.

No es mi deseo, Señores, dirigiros un simple cumplimiento al expresar que en ningún otro lugar de nuestro país podría haberse reunido un conjunto de personas tan altamente característico, como el que tengo en mi presencia, de las cualidades y atributos típicos que nos han dado, á nosotros los hombres de los Estados Unidos, la posición dominante que ocupamos en el mundo industrial. No hay necesidad de que yo explique á una reunión de esta clase la necesidad de combinar en estrecho lazo la eficiencia y la honradez. Como ciudadano de New York, y como americano, tengo orgullo en sentir que el nombre solo de esta institución lleva consigo la mejor garantía de aquellos dos elementos. El ejemplo de vuestra práctica constante vale más ciertamente que toda predicación en aquel sentido. New York es una ciudad de nacional importancia, porque la posición que ella guarda en el conjunto de la nación se puede decir que es única. Su Cámara de Comercio tiene que ser, por lo tanto, un elemento de gran peso en el bienestar comercial é industrial de la totalidad de nuestro pueblo. New York es el gran puerto de ingreso en nuestra tierra, y aquel á que converge en su mayor parte el comercio exterior del país, y lo que pueda afectarlo en bien ó en mal abandona, por lo tanto, desde el primer momento, el carácter puramente local ó municipal, para volverse asunto nacional. Á este hecho tiene que atender el Gobierno en todo lo que haga sobre materias que afecten las relaciones comerciales y rentísticas de New York, y con él también ha de contarse para apreciar debidamente la importancia del papel que desempeña en todas estas cosas la Cámara de Comercio de New York.

La existencia de esta institución simboliza los triunfos de la paz, así en el exterior del país, como dentro de él. Hemos pasado aquel momento en el período de nuestro desenvolvimiento nacional, en que la depreciación de otros pueblos podía estimarse como un tributo al nuestro. El crecimiento y la prosperidad de los otros pueblos se miran por nosotros con sincera y amistosa buena volundad, sin odios y sin celos de ninguna clase. Me parece poder decir con perfecta seguridad, que por nuestra actitud con respecto á Cuba y á China se ha patentizado nuestro deseo de que las Potencias débiles manejen sus cosas por sí mismas, con absoluta independencia, en la seguridad de que en tanto que demuestren su disposición de tratar equitativa y honradamente con el resto del mundo, se hará por nuestra parte cuanto esté á nuestro alcance para auxiliarlas. Con las grandes Potencias del mundo no queremos más rivalidad que la que resulte honrosa para ellas y para nosotros. No les deseamos más que bien. Abrigamos la creencia de que todo en el espíritu moderno tiende cada vez con más fuerza, no á encender la guerra, sino á mantener y asegurar la paz: no á fomentar hostilidad, y hacer de ella el elemento dominante de la situación internacional, sino, por el contrario, cultivar el sentimiento amistoso y arraigarlo con gran firmeza. Es grato para nosotros, en verdad, hallarnos en buenas relaciones con todos los otros pueblos de la tierra, y no se escasearán por nuestra parte los esfuerzos para que esta situación se perpetue. Y recordad, Señores, que nuestra eficacia, como factor enérgico en la conservación de la paz, dependerá con mucho de la demostración que hagamos, de que nuestra actitud no es debida á debilidad, ó impotencia para defendernos, sino á genuina repugnancia de hacer daño, y á sincerísimo deseo de mantenernos en relaciones de respetuosa amistad con nuestros vecinos. La voz del débil, ó del que tiene que suplicar rendido, cuenta por poco cuando clama por paz; pero la voz del hombre justo, cuando está bien armado, es siempre poderosa. Es de necesidad para nosotros mantenernos preparados, sobre todo en lo que respecta á nuestra marina de guerra, no porque amemos la guerra ni deseemos tenerla, sino porque nos conviene permanecer colocados entre aquellos cuya solicitud en favor de la paz tiene que ser atendida con respetuosa consideración.

Si preservar la paz con las demás naciones del globo es importante para nosotros, lo es todavía más, si cabe, preservarla en el interior del país. Vosotros, miembros de la Cámara de Comercio, á cuyos esfuerzos se debe en tanto grado el bienestar de nuestras industrias, podéis, y estoy seguro que querréis, ejercer influencia para asegurar el establecimiento de la paz industrial, cosa que en la sociedad no podrá nunca obtenerse sino cuando en las relaciones entre el trabajador y el que lo emplea, cese de dominar de cada parte la insistencia en sus propios derechos, y se la sustituya por la consideración debida al derecho ajeno, y al legítimo interés de aquel tercero que se llama el público. No es cosa fácil en verdad escogitar un método, por el cual bien sea con el auxilio de los legisladores, ó bien sin él, pueda llevarse á cabo este propósito, reduciéndose al mínimum en el mundo industrial el choque de los intereses encontrados, que es tan productivo en el día de irritación y sufrimientos individuales y que en momentos dados puede causar serios desastres á gran porción del cuerpo político. Nunca puede estimarse demasiado la importancia de este problema, y á tratar de resolverlo cual corresponde deberán encaminarse los esfuerzos de todos los hombres, en especial si pertenecen á la clase de aquellos á quienes me dirijo en estos momentos. No debe haber una indebida sumisión á lo que es injusto; pero es preciso que prevalezca en todo tiempo, no sólo el deseo de hacer justicia, sino una disposición favorable á esforzarse en entender el punto de vista de aquel otro, con quien, para bien, ó para mal, la fortuna propia está ligada indisolublemente.

No hay medio de inventar una panacea universal con que puedan curarse estos padecimientos del mundo industrial. El problema es grave; pero debemos tener confianza en que es capaz de resolverse, si al estudiarlo recordamos algunas de nuestras antiguas virtudes, y nos esforzamos en hacerlo más simple, descartando aquellos de sus elementos tan bien conocidos como poco deseables, que han hecho pasar al género humano, en el transcurso de los siglos por tanta degradación y sufrimiento. La arrogancia, la suspicacia, la envidia brutal al que disfruta de comodidades, la indiferencia no menos brutal del que vive bien respecto de los que sufren privaciones, la fría crueldad del que se niega á considerar en algo los derechos de los demás, la negativa no menos insensata de los que rehusan considerar los límites de la acción benéfica, el bajo llamamiento al espíritu de egoísta lucro, bien sea bajo la forma de un despojo al favorecido por la fortuna, bien sea bajo la de opresión al desvalido—son cosas todas que una nación como la nuestra debe echar á un lado resueltamente, si es que quiere permanecer en el puesto que ocupa, en primera línea, entre los pueblos del mundo.

Es claro, por otra parte, que el bien ha de venir, aún de dentro de los mismos males que se sienten ahora, si nos ponemos frente á ellos, armados con nuestras antiguas virtudes—si los contemplamos sin temor en el pecho, sin calor en la cabeza, con benignidad en el corazón—si sin dar señales de una debilidad que sólo justifica el deseo de hacer mal, demostramos con la palabra y con los hechos, que en un Gobierno como el nuestro cada uno de nosotros es y debe ser realmente el guardador de su hermano.

En un momento histórico, tal como el presente, en que el carácter de nuestra vida social é industrial, se vuelve cada vez más complexo, haciendo necesaria la intrusión del Estado en esferas de actividad con las que antes nada tenía que hacer—y en que se manifiesta igualmente, con mayor fuerza cada día, la tendencia á que se haga en favor del Gobierno el traspaso ilegítimo y poco prudente de un trabajo que sólo debe hacerse por los particulares, individualmente, ó asociados unos con otros—es placentero dirigirse á un cuerpo, cuyos miembros están en tanto grado poseídos por el espíritu tradicional americano de confianza en sus propias fuerzas, que mirarían con desdén toda solicitud de que el Gobierno, ya sea el de su Estado, ya el de la nación, les concediese favor alguno—que sólo aspiran á que no haya trabas en el campo en que su acción deberá ejercitarse—que ponen su confianza para alcanzar el éxito á que aspiran, no en el auxilio que les venga ó pueda venir de fuera, sino en su propia habilidad y energía.

El primer requisito de todo buen ciudadano en nuestra República consiste en que pueda y quiera tomar parte activa en el trabajo de todos—en que no sea en la nave un simple pasajero—en que tome sobre sí la porción que le cabe en la tarea á que cada generación, entre nosotros tiene precisamente que dar cima. Más todavía, al emprender el trabajo que le corresponde y llevarlo á cabo, es su deber demostrar no sólo su perfecta aptitud para valerse á sí mismo, sino también el propio y debido respeto á los derechos de los demás.

No es ociosa jactancia proclamar que la Cámara de Comercio simboliza en grado eminente las grandes cualidades que aseguran al mercader y al hombre de negocios el éxito en lo que emprenden, éxito asegurado con honradez, glorioso para el que lo obtiene, y beneficioso para la comunidad. Hay muchas y muy diferentes clases de éxito. Hay el éxito que trae consigo laceración en el espíritu; hay el éxito que no se alcanza sino merced á la avidez del lobo y la astucia de la zorra; hay el éxito en cuya presencia el hombre honrado se siente inquieto ó indignado. Pero hay también otro éxito, que es el que viene como premio del talento, de la sagacidad, de la resolución del espíritu, de la destreza, combinado todo ello con inflexible rectitud de conducta en lo privado y en lo público. El éxito de las primeras clases puede en un sentido, en verdad un sentido pobre, beneficiar al individuo; pero es siempre, y con razón, un verdadero mal para la sociedad. Pero el que corresponde á la última clase trae consigo, en adición al provecho del que lo obtiene, un beneficio positivo para la comunidad. La Cámara de Comercio se ha encontrado en todo tiempo, al través de su larga historia, al lado de este último éxito, el mejor y más grande de todos ellos. Es por lo tanto propio que yo me presente en ella, como Primer Magistrado de la nación, para darle la bienvenida á su nueva casa; porque, en verdad, Señores, vosotros pertenecéis á toda la nación, y no meramente á esta ciudad ó al Estado de que es ella la metrópoli comercial; porque estáis á grande altura y representáis un papel muy elevado entre los factores de la prosperidad maravillosa que actualmente se disfruta en el país. La continuación de este estado de cosas depende en gran parte de vuestro juicio y buen sentido, de la manera en que combinéis la energía en la acción con el espíritu conservador que os aleja de los desbordes de la especulación y el agiotaje. Éstos nacen á menudo de la misma situación de prosperidad, pero están inevitablemente destinados á ponerle término.

Sois hombres de gran fuerza en el mundo de los hechos americanos. Sois hombres cuyos nombres están muy altos en la estimación de nuestro pueblo. De vosotros se habla como se hablaba en otros tiempos, muy alejados del presente, cuando se decía que en las ciudades fenicias los comerciantes eran príncipes. Grande es vuestro poder, y grande es por lo tanto vuestra responsabilidad. Bien y fielmente habéis hecho frente á esta última en todo el pasado. Á lo que hagáis en lo futuro hay por tanto que mirar con la mayor confianza. Así es que yo, esta noche, con la mayor seguridad, y en nombre de la nación, os ofrezco el mejor deseo de que la utilidad de vuestros trabajos, y el honor que de ellos resulte con justicia para vosotros, continúen aumentándose constantemente.

CONGRESO ADUANERO.

Por determinación del Consejo Directivo de la Oficina Internacional de las Repúblicas Americanas, tomada en cumplimiento de la obligación que le impuso el párrafo segundo de la primera resolución adoptada por la segunda Conferencia Pan-Americana de México el 22 de enero del corriente año de 1902, relativamente á la celebración de un Congreso Aduanero, se ha fijado el día 15 de enero de 1903 para que tenga lugar en la ciudad de Nueva York, en el local que al efecto se escogerá, la primera reunión de aquella importante Asamblea.

El texto íntegro de la resolución de la Conferencia respecto á este Congreso se publicó en el número del BOLETÍN correspondiente al mes de abril de este año, páginas 986 de su sección en castellano, y 871 y 1075 de sus secciones en inglés y portugués respectivamente. Allí se verán explicados en detalle, cual corresponde, los objetos y propósitos de la reunión, y la naturaleza y extensión del trabajo á que habrá de dar cima.

El programa que en general se ha formulado para llevar á cabo esta obra es el siguiente.

El Honorable Señor Secretario de Hacienda abrirá las sesiones, pronunciando el discurso de inauguración.

Después de las formalidades acostumbradas en estos casos para formar la Mesa y organizar la parte relativa al servicio de oficina, se nombrarán las Comisiones que el Congreso estime oportunas, y se procederá al estudio de los asuntos en el modo y forma que corresponda.

Á la fecha en que esto se escribe han significado su intención de estar representadas en este Congreso las naciones siguientes: Bolivia, Ecuador, los Estados Unidos de América, Guatemala, Honduras, México, el Salvador, y Venezuela.

El Gobierno de los Estados Unidos de América ha nombrado por sus Delegados á los Señores Don O. L. SPAULDING, Subsecretario de Hacienda; Don ISRAEL FISCHER, Aforador General de los Estados Unidos; Don GEORGE W. WHITEHEAD, Tasador de mercaderías en New York; Don E. T. CHAMBERLAIN, Comisionado de Navegación; y Don JOSEPH J. CONCH, Subadministrador especial de la Aduana de New York.

Los Delegados nombrados por las demás naciones son hasta ahora los siguientes:

Por Ecuador, el Señor Don LUIS FELIPE CARBO.

Por Guatemala, el Señor Don ANTONIO LAZO ARRIAGA.

Por Honduras, el Señor Don NICANOR BOLET PERAZA.

Por México, los Señores Don PEDRO M. DEL PASO y Don JAVIER ARRANGOIZ.

Por El Salvador, el Señor Don ERNESTO SCHERNIKOW.

Por Venezuela, el Señor Don AUGUSTO PULIDO.

El siguiente proyecto de organización de las Comisiones, del que se remitió copia á los diferentes Gobiernos, y que, si merece ser aprobado, servirá de base á los trabajos, fué preparado por el Honorable Señor CHAMBERLAIN, Delegado de los Estados Unidos de América.

ORGANIZACIÓN DE LAS COMISIONES.

1. Se propone que el trabajo del Congreso se distribuya en cuatro divisiones; á saber:

División I.—Buques.

División II.—Mercaderías.

División III.—Nomenclatura.

División IV.—Congresos futuros y organización permanente.

2. Se propone que cada División esté á cargo de una Comisión que se nombrará el primer día de reunido el Congreso. Se suplica, pues, á cada República, que indique al Consejo Directivo de la Oficina Internacional de las Repúblicas Americanas, antes de que se reúna el Congreso, quien deberá representarla en las Comisiones.

3. Se recomienda á la representación de cada República en una Comisión, que esté preparada para suministrar á esta copias de las leyes, y reglamentos de aduana de su propio país y también de los modelos ó

formularios de los documentos que estén en uso. Es de desearse que los representantes de cada República en una Comisión preparen, con anticipación á la reunión del Congreso, una exposición de las prácticas vigentes en su país, en lo tocante á los asuntos asignados á la Comisión.

4. Las proposiciones que presenten los Delegados serán remitidas sin discusión á informe de la Comisión respectiva, á menos que el Congreso ordene lo contrario.

5. Las Comisiones tendrán á su cargo el estudio preliminar de las siguientes materias:

DIVISIÓN I.—BUQUES.

(*a*) Lo requerido en el manifiesto de un buque que llega de un puerto extranjero ó que zarpa para él.

(*b*) Lo requerido después de la llegada de un buque procedente de un puerto extranjero, ó para el despacho de un buque que sale al exterior.

(*c*) Lo requerido, después de haber entrado un buque, respecto á su descarga, y los reglamentos especiales que deban observarse para poder hacer esta descarga durante la noche.

(*d*) Limitación de tiempo para descargar.

(*e*) Las condiciones bajo las cuales puede un buque extranjero seguir de un puerto á otro en cada país, descargar y cargar mercaderías y embarcar ó desembarcar pasajeros.

(*f*) Descripción de los impuestos á que estén sujetos los buques mercantes por autoridad de ley nacional.

(*g*) Método de arquear los buques para saber su porte neto y en bruto.

(*h*) Ventajas y desventajas de escoger respectivamente el porte en bruto ó el neto, como base para cobrar los impuestos.

DIVISIÓN II.—MERCADERÍAS.

(*a*) Las condiciones bajo las cuales las mercaderías de un país extranjero pueden llegar á la jurisdicción del Administrador de la Aduana y los métodos que éste emplea al hacerse cargo de ellas.

(*b*) Lo requerido de los consignatarios de las mercaderías introducidas en la Aduana, en lo tocante á conocimientos, facturas y demás formas de declaración en uso para la importación ó el tránsito.

(*c*) Los procedimientos subsiguientes á la declaración, en cuanto á aforo, clasificación y liquidación final de los derechos.

(*d*) Retiro de las mercaderías y modo de disponer de las declaradas para ser almacenadas, incluyendo la aplicación práctica del sistema general de depósito y almacenaje.

(*e*) Procedimiento para disponer de mercaderías no reclamadas ó abandonadas.

(*f*) Métodos para llevar la cuenta de la totalidad de las mercaderías importadas, bien en fardos ó paquetes, ó á granel.

(*g*) Las condiciones y disposiciones relativas á la devolución de los derechos pagados al exportarse la mercadería, bien sea que esta se halle en el estado mismo en que fué importada, bien sea para ser usada como material en manufacturas subsiguientes.

DIVISIÓN III.—NOMENCLATURA.

(*a*) La base de una nomenclatura común que haya de ser adoptada en los documentos oficiales, á saber: manifiestos, facturas, etc., requeridos en el comercio entre las Repúblicas Americanas.

(*b*) Ventajas ó desventajas de la adopción común en esa nomenclatura del sistema métrico de pesos y medidas.

(*c*) Ventajas ó desventajas de la adopción común de los equivalentes ingleses de los términos comerciales generales, excepto los que están comprendidos en la nomenclatura del sistema métrico.

(*d*) Medios adecuados que puedan recomendarse para establecer una nomenclatura común.

DIVISIÓN IV.—CONGRESOS FUTUROS Y ORGANIZACIÓN PERMANENTE.

1°. Organización de una Comisión aduanera permanente.

2°. Conveniencia de fijar períodos definitivos para la reunión de los futuros Congresos aduaneros.

COMISIÓN PARA EL ESTUDIO DE LA PRODUCCIÓN, DISTRIBUCIÓN Y CONSUMO DEL CAFÉ.

La importante Comisión á que se refiere este artículo, y de que el Boletín, en su número anterior, se ocupó con la extensión y preferencia debidas, terminó sus sesiones el 31 del pasado octubre, adoptando por unanimidad de votos una resolución por la cual se ruega al Gobierno del Brasil que tenga á bien convocar, tan pronto como sea posible, una segunda reunión del mismo género, señalando para ello la fecha y el lugar que sean de su agrado. Á ella deberán concurrir como delegados de los diferentes Gobiernos personajes entendidos en el ramo del café, con autorización para concluir los tratados á que den lugar las recomendaciones hechas por la Comisión, ó que de aquí para entonces resulten conducentes á la mejor y más efectiva protección de esta industria.

Se suplica igualmente al Gobierno del Brasil, por medio de esta resolución, que se sirva iniciar con los de los demás países productores del café las negociaciones que sean del caso para poner en práctica los acuerdos, ya tomados por la Comisión que sean susceptibles de aplicación inmediata.

Ha tenido la Comisión catorce sesiones, celebradas respectivamente en el orden siguiente: La inaugural el 1° de octubre, y las demás el 3, el 6, el 8, el 10, el 16, el 17, el 20, el 22, el 27, el 28, el 29, el 30, y el 31 del mismo mes.

En la sesión del 27, que fué la décima, se dió cuenta con el informe de la Comisión de Distribución, que dice como sigue:

"La Comisión de Distribución se ha impuesto con toda atención de los trabajos presentados por las diferentes delegaciones, y no ha encontrado en ellos, ni le ha sido sometida de otra manera, ninguna proposición concreta sobre la cual tenga que formular dictamen particular. Ha procedido, de consiguiente, á reunir las ideas generales que sobre la materia se han emitido en dichos trabajos, de igual manera que otras que á sus miembros han ocurrido, y las que de otras fuentes ha encontrado, y tiene la honra de someter á la conferencia el resultado de sus modestas labores.

"El asunto de la distribución del café, tomado en todos sus aspectos, sería materia extensa á que pudiera darse un grande desarrollo; pero estando tan íntimamente ligado con varios de los puntos ya estudiados por otras de las Comisiónes que han presentado luminosos trabajos, esta Comisión cree que no será necesario entrar sino en la consideración de algunos de los ramos que el asunto comprende, y al efecto ha dedicado su atención de preferencia á los siguientes.

PROCEDENCIA.

"Las conveniencias de todo negocio, que requieren la más completa ingenuidad en la manera de efectuar las transacciones, aconsejan que haya toda la claridad y seguridad posible con respecto á la procedencia de los artículos de comercio, de tal manera que se aleje la sospecha de engaño siempre nociva al buen crédito de los productos de mejor clase. Alterar este dato con objetos de lucro es un delito que debe comprenderse entre los que deben castigarse con la severidad de los de engaño ó suplantación, por la injusticia que se infiere á la propiedad de quien, por razones naturales ó por adelantos de la industria, lleva al mercado un producto superior. La justicia y la verdad, sobre todo, indican que sobre este particular debe recomendarse que no haya contemplaciones y que se denuncien los fraudes que, como es bien sabido, se cometen en perjuicio de los cafés de procedencias mejor acreditadas.

CLASIFICACIÓN.

"A la conveniencia de que se marque de modo inequívoco en el envase ó empaque la procedencia del café sigue la de que se marquen de igual manera las diferentes clases de una misma procedencia, á efecto de que en los mercados del grano sean conocidas por sus nombres propios y por sus diferentes grados. La evidencia demuestra la conveniencia de proceder así para evitar los males que resultan de la confusión, y para mantener el crédito ya adquirido ó para que lo adquieran los cafés de una procedencia y de una clase determinada.

VENTAS.

"Entre las sugestiones preparadas por una Comisión en San José, y presentadas á la Conferencia por la Delegación de Costa Rica, se encuentra la siguiente; 'Las ventas que se efectúan de mano á mano, como en los Estados Unidos, tienen grandes desventajas que no será difícil poner en evidencia. No existe control ó inspección oficial alguna en las operaciones, y el productor está en la necesidad de atenerse únicamente á la buena fé de su agente, que si bien en la mayor parte de los casos es honrado, ocurre y no con poca frecuencia, que se convierte en simple explotador de su comitente á quien engaña, haciendo un doble perjuicio, pues no sólo le despoja de un bien que le pertenece, sino que lleva al ánimo de los demás productores una natural desconfianza con respecto á la bondad del mercado, lo que ejerce nociva influencia en el monto de la exportación subsiguiente. Sin gran esfuerzo podrá llegarse á mayores conclusiones que ponen de manifiesto la bondad del sistema de ventas en asta pública.' La Comisión, no estando unánime sobre el particular, se limita á someter el punto á la Conferencia.

SUPRESIÓN DE ALCABALAS Ó IMPUESTOS LOCALES.

"De otro orden, por cuanto una reforma en los sistemas actualmente establecidos en algunos países no depende de los productores, exportadores ó negociantes en café, la Comisión es de parecer que debe recomendarse la abolición de los derechos llamados de alcabala ó de pasaje entre unos y otros lugares en un mismo país ó nación, como los que se cobran entre Estado y Estado ó entre una y otra jurisdicción en un mismo Estado ó Provincia. Esta recomendación se extiende, además de los países productores, á aquellos donde el café tenga consumo y donde exista el impuesto mencionado, y para hacerla efectiva se emplearán los mismos medios que para la supresión de los derechos de importación.

PROPAGANDA.

"Parte muy importante si no esencial de la extensión del consumo, y por lo tanto ligada con la distribución del café, es la que se refiere á la propaganda, y en este concepto la Comisión recomienda que por los medios más adecuados al efecto, se impulse toda gestión en el sentido de aumentar el número de consumidores en los países donde el café es ya conocido, y que se le abran nuevos mercados donde no lo sea. Á este respecto, en un informe de la Legación de Costa Rica en Wáshington, publicado en setiembre de 1900, aparece evidente la posibilidad de introducir el uso del café en Rusia. El Director del Museo de

Agricultura de San Petersburgo ofreció gratuitamente el espacio necesario para que pudiera hacerse una exhibición permanente de los productos de Costa Rica en aquel establecimiento, lo cual demuestra que se encontraría apoyo si allí se emprendiera una propaganda formal y se dieran los pasos necesarios para introducir y popularizar el consumo del café.

TRANSPORTES.

"Necesariamente el asunto de las vías de comunicación es de la mayor importancia. No será preciso decir que él sigue al hecho de poseer un producto, porque la adquisición del oro mismo á nada equivaldría, si el rico metal hubiera de permanecer estacionado en un lugar. El café valdrá tanto más al productor, cuantas mayores sean las facilidades de que éste disponga para el transporte; y aunque esta es una verdad que no necesita siquiera de que sea enunciada, la Comisión cree que debe recomendarse con eficacia toda medida que expedite y abarate los fletes por tierra y por mar, de tal manera que á estas condiciones se una como necesaria consecuencia la mayor economía, brevedad y seguridad en los transportes.

ENVASE Ó EMPAQUE.

"Condición importante á este efecto es la calidad del envase ó empaque, desde luego que ha de contener el grano durante los viajes por tierra y por agua, y que como cubierta ó capa ha de preservarlo de la humedad y de otras influencias atmosféricas que pudieran dañarlo. Hay diferentes opiniones acerca de cuál sea la mejor calidad de envase, pero la Comisión crée innecesario entrar en el estudio de este detalle que en cada país se provée según la experiencia adquirida y los medios más económicos de obtenerlo.

"Fundándose en las consideraciones someras que preceden, la Comisión tiene la honra de proponer á la Conferencia los siguientes proyectos de resolución:

"'La Conferencia Internacional Americana del Café recomienda á los Gobiernos de los países productores de este grano que hagan las gestiones necesarias juntamente con las otras que la Conferencia les recomiende:

"'1º. Para obtener que se castigue con toda severidad el abuso de cambiar los envases ó las marcas que indican la procedencia de los cafés que se importen á los países de consumo, ó toda otra manera de engaño con el objeto de elevar sin razón justa el precio de un artículo de inferior calidad con perjuicio del de una clase superior.

"'2º. Para obtener de igual manera el apoyo necesario para una propaganda efectiva en sentido de extender el uso del café y de abrirle nuevos mercados.

"'3º. Para obtener la abolición del impuesto de alcabala ó de otro ú otros gravámenes locales que impidan ó detengan la libre circulación del café.

" '4°. Para obtener por el medio indicado, ó por otros que se juzguen convenientes ó adecuados, que las ventas de café se hagan, cuando así se desée, en subasta pública, en aquellos mercados donde no sea esta la práctica establecida.'

"De órden interior, la Comisión propone los siguientes proyectos de resolución:

" 'La Conferencia Internacional Americana del Café recomienda á los Gobiernos en ella representados:

" '1°. Que fomenten y desarrollen todas las facilidades posibles de transporte en sus países respectivos, y en las vías de comunicación con los otros Estados, de manera que se propenda al crecimiento del comercio internacional, como medio de aumentar la demanda del café.

" '2°. Que establezcan reglamentos que den por resultado el empleo del mejor envase ó empaque con el fin de procurar que el café se conserve sin alteración.

" '3°. Que por medio de los mismos reglamentos se determine la manera de clasificar y marcar cada bulto de café, bajo la indicación principal del nombre del país de donde proceda.'

"J. B. Calvo.
"Anto. E. Delfino.

"Nueva York, *27 de octubre de 1902.*"

En la sesión del 30, que fué la penúltima, se aprobaron las recomendaciones siguientes:

"1.ª Que se prohiba en absoluto, y por los medios más eficaces, en los países productores la exportación del café de clases inferiores, y en los consumidores la importación del mismo artículo, ó de cualquiera otro grano ó substancia, que sin ser café, lleve su nombre ó tenga por objeto su adulteración.

"2.ª Que se den pasos para obtener de los Gobiernos de los países consumidores una rebaja razonable de los derechos de aduana, y de todos los demás impuestos y contribuciones que afecten la importación, distribución y consumo del café.

"3.° Que se organice una Unión Internacional, que comprenda el mayor número posible de los países interesados, y tenga por primordial objeto hacer constante propaganda por los periódicos y de todo otro modo, para que se desarrolle en el mundo hasta el máximum el uso del café.

"4.° Que se elimine de la venta y exportación una cierta cantidad de café, á fin de reducir la oferta á los límites de consumo.

CONGRESO INTERNACIONAL DE AMERICANISTAS.

Acaba de celebrarse en New York la sesión décima tercera del Congreso Internacional de Americanistas. Fué ésta la primera vez en que las reuniones de aquel distinguido cuerpo se han efectuado en los Estados Unidos de América, lo que aumentó naturalmente en este último país el interés, siempre muy vivo, que inspiran sus trabajos.

Las sesiones, que fueron cinco en número, empezaron el 20 de octubre y terminaron el 25. Todas se celebraron en el edificio del Museo Americano de Historia Natural de la ciudad de New York.

El Presidente honorario de este Congreso es el Señor Duque de LOUBAT, del Instituto de Francia; pero las reuniones de que se trata en este artículo fueron presididas por el Señor MORRIS K. JESUP, que es el Presidente del Museo; y concurrieron como delegados, el Profesor LEÓN LEJEAL, Catedrático de Antigüedades Americanas en el Colegio de Francia; el Profesor EDWARD SELER, de la Universidad de Berlín; el Profesor KARL VON DEN STEINEN, Subdirector del Museo Etnográfico de Berlín; el Profesor HJALMAR STOLPE, de Suecia; el Profesor JUAN B. AMBROSETTI, de la República Argentina; el Dr. D. ALFREDO CHAVERO, de México; Mr. A. P. MANDSLAY, de Inglaterra; el Dr. PITTIER DE FÁBREGA, Director del Instituto Geográfico de Costa Rica, y el Dr. DE LA ROSA, del Perú. La representación de los Estados Unidos estuvo encargada, entre otras personas, á los Señores W. H. HOLMES, Catedrático de Geología Arqueológica de la Universidad de Chicago; W J MCGEE, Profesor de Etnología, encargado de la Oficina de Etnología Americana; el Dr. MARSHALL H. SAVILLE, del Departamento Antropológico del Museo Americano de Historia Natural de New York; la Señorita ALICE CUNNINGHAM FLETCHER, distinguida etnologista, del Museo de Argueología y Etnología Americanas, denominado de Peabody, en Cambridge, Massachusetts; y la Señora ZELIA NUTTALL, etnologista y viajera, conocida por sus valiosos trabajos sobre las lenguas y antigüedades de México.

REPÚBLICA ARGENTINA.

LEY REGLAMENTANDO LA INTRODUCCIÓN DE TODA CLASE DE VEGETALES Y SEMILLAS.

El "Boletín Oficial" de Buenos Aires, con fecha 27 de agosto de 1902, publica el siguiente decreto reglamentando la introducción en el país de toda clase de vegetales y semillas:

ARTÍCULO 1°. Toda semilla, vegetal vivo, ó parte del mismo, están sometidos á su entrada al Territorio Argentino á la jurisdicción de la Sección de Agronomía del Ministerio de Agricultura, la cual está encargada de velar escrupulosamente á fin de impedir la introducción de plagas vegetales y animales. La importación de vegetales y semillas sólo podrá hacerse, por ahora, por el puerto de Buenos Aires.

"ART. 2°. Toda persona que desee introducir al país plantas vivas, partes de las mismas ó semillas, deberá presentar una solicitud á la Sección de Agronomía, exponiendo:

"(*a*) Nombre del introductor y su domicilio.

"(*b*) Nombre del vegetal ó semilla.

"(*c*) Origen del mismo, comprobado por la declaración del vendedor y un certificado de autoridad competente.

"(*d*) Medio por el cual será introducido (vapor, ferrocarril, etc.) y la fecha de llegada.

"(*e*) Objeto que se le asigna (plantación, venta, siembra, consumo).

"(*f*) Siempre que sea posible, indicación de la localidad donde se plantará ó sembrará.

"ART. 3°. Toda planta ó parte de la misma, que proceda de países donde exista alguna afección perjudicial á los intereses agrícolas del país, ó en donde la introducción de vegetales no estuviera reglamentada, será considerada sospechosa y, como tal, sometida á los tratamientos y desinfecciones que la Sección de Agronomía repute necesarios.

"ART. 4°. Toda planta ó parte de la misma, que fuera reconocida atacada por una afección perjudicial y fácilmente difusible, será rechazada ó destruida por el fuego, siempre que no pudiera efectuarse una desinfección eficaz.

"La destrucción no dará lugar á indemnizaciones. Si se optara por el reembarco, deberá hacerse inmediatamente por el interesado.

"ART. 5°. Los vegetales, ó partes de los mismos, que no sean sospechosos, ó que no estén atacados de enfermedades perjudiciales ó vengan provistos de certificados de sanidad, expedidos por la autoridad competente y visados por el Cónsul Argentino más próximo del lugar de origen, serán admitidos previa inspección de práctica.

"ART. 6°. Se declaran, por ahora, de procedencia sospechosa á los fines del Art. 3°, los países donde reinan la filoxera y la sarna de San José. Para otras afecciones se dictarán medidas profilácticas cuando se crean necesarias.

"ART. 7°. Los vegetales, así como las partes de los mismos que de acuerdo con el artículo 3° se declaren sospechosos, se dividirán para su tratamiento en las categorías siguientes:

"(*a*) Plantas vivas y estacas.

"(*b*) Bulbos, tubérculos y raíces.

"(*c*) Frutos y legumbres.

"(*d*) Semillas.

"ART. 8º. Para el tratamiento, las plantas vivas se subdividirán en dos grupos:

"1º Plantas con tierra.

"2º Plantas sin tierra.

"Las plantas con tierra serán desinfectadas en sus partes aéreas; las enterradas y la tierra se tratarán por medio de insecticidas.

"Las plantas sin tierra y las estacas sufrirán la desinfección completa de todas sus partes por procedimientos de inmersión ó de exposición, durante un tiempo suficiente, á la acción de vapores antisépticos.

"ART. 9º. Los bulbos y turiones deberán ser despojados de todas sus membranas y apéndices muertos, así como de la tierra, y sufrirán un lavado antiséptico antes de ser admitidos.

"Los tubérculos y raíces, serán admitidos siempre que se encuentren limpios de tierra y reconocidos sanos; en caso contrario, serán sometidos á un lavado, ó á la acción de vapores antisépticos.

"ART. 10. Los frutos y legumbres que se destinen al consumo, provenientes de países donde no existan las affecciones enunciadas anteriormente, serán admitidos libremente. Si estos productos provienen de países sospechosos, se les aplicarán las medidas profilácticas indicadas para los demás vegetales.

"ART. 11. Las semillas en grandes ó pequeñas cantidades que se introduzcan en el país, serán también sometidas á la inspección de la Sección de Agronomía, que permitirá la libre introducción, procederá á la desinfección ó las rechazará en absoluto, según lo que resulte del examen que se efectuará en cada caso para determinar la naturaleza de las impurezas que contengan.

"ART. 12. En cada solicitud de introducción de plantas ó semillas, se dejará constancia de las resoluciones que se comuniquen á los interesados.

"En caso de que se comprobara alguna afección perjudicial, se conservará un ejemplar debidamente preparado como comprobante de las informaciones de la oficina; ejemplar que quedará depositado durante tres meses en el local de la Sección de Agronomía.

"ART. 13. Todo solicitante que no estuviere conforme con las resoluciones de la Sección de Agronomía, tendrá trés días de plazo para pedir reconsideración, pasados los cuales no habrá lugar á ningún reclamo.

"En caso de admitirse la reconsideración, el Ministerio de Agricultura nombrará una Comisión compuesta de tres personas, que procederán á una nueva inspección, siendo inapelables las resoluciones de este tribunal.

"ART. 14. Efectuada la inspección y las desinfecciones á que hubiere lugar, se entregará al solicitante un certificado para que pueda retirar sus plantas ó partes de las mismas.

"Art. 15. Toda plantación hecha con plantas introducidas clandestinamente, será destruida por orden de la autoridad competente, sin perjuicio de las acciones á que hubiese lugar contra los delincuentes. La misma medida se aplicará para las frutas y legumbres.

"Art. 16. Comuníquese, publíquese y dése al Registro Nacional."

NUEVO SISTEMA DE PREPARACIÓN DE LOS CUEROS—SISTEMA ROBERTS.

Según "La Tribuna" de Buenos Aires (número 27 de setiembre de 1902) se ha resuelto en aquella capital un gran problema para la conservación y preparación de cueros y pieles frescas y secas que traerá una transformación completa en la industria que emplea estas materias primas.

Se trata de la aplicación de un gas que produce un efecto sorprendente sobre los cueros y pieles que pasan por este procedimiento de fácil y económica aplicación, haciéndoles inmunes contra la putrefaccion, la polilla y otros inconvenientes. El único concesionario de este nuevo invento, que se denomina "Sistema Roberts," es la sociedad comercial La Conservadora, de la cual es Director general el señor Carlos Lix Klett é ingeniero técnico, el Sr. Augusto P. Potel.

La sociedad La Conservadora ha enviado al Director técnico de la sociedad La Tanería, de Buenos Aires, para curtir y preparar en suela, seis cueros de vacunos de matadero frescos y un cuero de matadero seco, los primeros después de 33 días de conservación por el sistema Roberts, y el segundo después de nueve meses.

El señor Bosio Polar, Director técnico, en su informe y certificado atestigua que las ventajas obtenidas por los cueros conservados por el sistema Roberts, son las siguientes:

1ª. Al recibir los cueros, encontré que con este sistema de conservación habían adquirido una apariencia mucho mejor que la de los cueros secos ó salados; es indudable que esta apariencia impresiona agradablemente al comprador, el cual no vacilará en juzgar la mercadería de primer orden.

2ª. Más fácil reverdizaje y regularidad en todas sus partes, porque habiéndose secado muy despacio, esta operación resulta más perfecta y con mucho menos desperdicios de sustancias albuminoides.

3ª. Conservando el cuero por este procedimiento más gelatina, la combinacion con las sustancias tánicas se hace en mayor proporción y resulta un cuero mas firme, compacto, resistente é impermeable, asemejándolo así á los cueros ingleses, que deben á sus células fibrosas llenas de la combinación gelatino-tánica su grande renombre.

4ª. Este procedimiento ofrece la gran ventaja al curtidor, sobre todo en verano, de poderse conservar durante varios días después de reverdecidos sin que la fermentación produzca su obra destructora.

5ª. Es tal la potencia antiséptica que adquiere el cuero conservado por el sistema Roberts, que á pesar de todas las operaciones de reverdizaje mantienen su fuerza preservativa, pudiéndose tener con seguridad en cualquier pelambre débil, sea cual fuere la estación, sin peligro alguno de que se piquen ó solapen, como sucede fácilmente con los demás cueros.

6ª. Concluida la operación del reverdizaje se observa que tanto los cueros secos como los medio secos ofrecen el mismo aspecto que los recien llegados del matadero, al punto de confundirse con éstos por su frescura é inodoridad en todas sus partes (á pesar de su tiempo, 9 meses el primero y 33 días los segundos).

Los cueros secados al aire libre nunca tienen este aspecto, pues la fermentación siempre se desarrolla al reverdecerlos y en verano hay que acelerar el trabajo, so pena de que se piquen ó solapen en el mismo pelambre y su aspecto es muy caido.

Los cueros salados conservan buen aspecto, pero nunca pueden rivalizar con los conservados por el sistema Roberts; además, como por efecto de la misma sal, la hinchazon de los cueros al contacto de los jugos acídulo-tánicos es mucho menor, quedan siempre más delgados y con menos rendimiento, como se verá por el siguiente dato: Cueros usuales secos dan un rendimiento de 61.30 por ciento; cueros salados, 63 por ciento.

Los del sistema Roberts han dado: Cueros secos, 66.54 por ciento; cueros medio secos, 67.66.

Resulta para los curtidos por el sistema Roberts una notable diferencia. Este invento viene, pues, á llenar una necesidad bien sentida en la industria del cuero y pieles, ya sea para curtirlas en el país ó en el exterior, donde será empleado.

INDUSTRIA VINÍCOLA EN MENDOZA.

De un informe dirigido á su Gobierno por el Cónsul General de S. M. B. en Buenos Aires, relativo á la industria vinícola de Mendoza en el año de 1901 á 1902, se toman los párrafos siguientes:

"Para un hombre de capital que no quiera aventurarlo todo de una vez en una empresa, la industria vinícola presenta buenas perspectivas. El negocio es de tal naturaleza que pronto puede aprenderse, y los brazos que requiere son abundantes y baratos. El trabajo se hace generalmente por contrata, á un tanto fijo por hectárea. El sistema de irrigación pública que toma del Rio Mendoza toda el agua que pueda necesitarse, la suministra con abundancia, mediante el pago de una cantidad fija por hectárea. Nada crece ó prospera en aquella parte del país sin el auxilio de la irrigación.

"El clima de Mendoza es excelente, pero hay que tener cuidado con el agua que se bebe, por razón de que en los más de los casos está sobrecargada de sales minerales que la hacen malsana.

"La temperatura media es 15.99 centígrados. La máxima en verano es 35.02° y en invierno 3.01°. El pluviómetro acusa una caída media de 160.2 milímetros. La presión atmosférica ordinaria es 693.75 milímetros, y la humedad del aire 72.

"El consumo de vino en la República en 1901 representó un total de 55,000,000 de galones, de los cuales 25,400,000 fueron producidos en el país. De los 29,600,000 restantes, 11,000,000 fueron importados, y los demás fabricados químicamente, imitando á los vinos españoles é italianos.

"El distrito de Mendoza suministra muy cerca de la mitad del vino producido en el país. Se dice que en el día hay como 90,000 acres de tierra dedicados al cultivo de la vid. Hay en Mendoza una escuela, sostenida por el Gobierno nacional, dedicada especialmente á la enseñanza de cuanto se relaciona con la industria vinícola, tanto en la parte puramente agrícola como en la industrial.

"La phylloxera es prácticamente desconocida."

COMERCIO DE CARNES CONGELADAS.

La Junta Británica de Agricultura (British Board of Agriculture) ha publicado los siguientes datos estadísticos, obtenidos de fuente oficial, relativos al comercio de carnes congeladas en la República Argentina.

Este comercio que empezó allí en 1883, con una exportación de 17,000 carneros en dicho estado ha ido creciendo constantemente de día en día hasta llegar en 1901 á la de 3,100,000 carneros, 133,000 reses vacunas y 500 cerdos.

Hay al presente dedicadas á este negocio tres grandes Compañías, que representan juntas un capital de cerca de $3,880,000, y dan empleo á unos 2,000 operarios. Sus establecimientos están preparados para disponer de 15,000 carneros y 720 reses de ganado mayor cada veinte y cuatro horas.

El peso de las carnes, y productos accesorios, que salieron de ellos en 1901, fué como sigue:

	Toneladas.
Carnes conservadas en latas	228
Carnes congeladas	112,000
Substancias grasas	859
Cueros	15,000
Sangre, huesos, etc	6,000
Total	147,487

El gasto requerido para obtener estos resultados fué como sigue:

Operarios de todas clases	$800,563.50
Valor del ganado comprado	11,644,991.90
Combustible	218,700.00
Gastos diversos	556,325.90
Total	13,220,581.30

Las Compañías congeladoras compran el ganado directamente de los hacendados, y hacen la matanza, limpieza y congelación en sus propios establecimientos, verificando los embarques de la carne, bien en sus propios vapores, ó en vapores que han fletado para este objeto. Carnes pertenecientes á individuos particulares nunca son congeladas por estas Compañías, ni admitidas en sus almacenes para aguardar embarque. Se dice que por esta causa, no habiendo prácticamente competencia alguna entre las tres Compañías, se han mantenido bajos los precios del ganado vivo, después de haberse cerrado los puertos británicos á los animales argentinos. Por otra parte se asegura también que no de otra manéra hubiera podido estarse cierto de la buena calidad de las carnes suministradas y de su propio acondicionamiento.

Este comercio ha llegado á regularizarse de tal manera que no se experimenta interrupción en el orden de la llegada de los cargamentos á Inglaterra, sin haber necesidad de satisfacer almacenajes excesivos ni de poner en el mercado carnes que no hayan sido preparadas recientemente.

La mayor parte de la carne argentina va á Liverpool; el resto se distribuye entre Londres, Cardiff, Newcastle, Hull, y Southampton.

En 1901 había 33 vapores empleados en este tráfico regular entre Inglaterra y la Argentina. En ellos había capacidad para transportar hasta 1,443,000 carneros congelados, de á 56 libras de peso cada uno.

Este tráfico no ha afectado en manera alguna la antigua industria del tasajo, pues que los países que consumen este artículo son otros distintos.

Las tres Compañías que se han mencionado en este artículo, son: la "Compañía Sansinena de Carnes Congeladas," que tiene sus establecimientos en las afueras de Buenos Aires; la "River Plate Fresh Meat Company," que es una Compañía inglesa, cuyos establecimientos están en Campaña sobre el río Paraná; y la "Las Palmas Produce Company," que es también inglesa, y tiene sus establecimientos en Zárate, sobre el mismo río.

BOLIVIA.

LIBRE EXPORTATIÓN DE MINERALES Y PASTAS DE PLATA.

El Señor Presidente de la República tuvo á bien expedir el siguiente Decreto:

Artículo 1°. Se declara libre de derechos la exportación de minerales y pastas de plata que se explotan en el territorio de la República.

Art. 2°. Todo exportador de pastas y minerales de plata está obligado á sacar de la aduana nacional una guía en que se exprese el peso de los minerales y pastas, su ley y destino. Por cada marco de plata que contengan los metales ó pastas exportados, se abonarán 10 centavos como derecho de estadística.

Art. 3°. La falta de la guía de exportación establecida por el artículo anterior, dará lugar al comiso, siendo la mitad en beneficio del denunciante.

Art. 4°. Las empresas mineras, sean personas particulares ó asociaciones de cualquiera naturaleza, que explotan minas de plata, pagarán el 6 por ciento de sus utilidades netas, conforme á los balances semestrales que deben presentar. Queda vigente el impuesto del 2 por ciento para las empresas que explotan otra clase de minerales, según ley de 12 de noviembre de 1894.

Art. 5°. Se considerará como ganancia neta, para los efectos de este impuesto, el saldo que quede disponible desquitados los gastos necesarios de explotación, beneficio, administración y trasporte.

Art. 6°. La patente minera que se cobra actualmente por toda concesión, conforme al artículo 16 de la ley de minería de 1880 y á la de 11 de noviembre de 1897 queda fijada en 6 bolivianos para las vetas, filones y para los boca-minas á que se refiere el inciso 2 del citado artículo 16; 3 bolivianos para los terrenos y sustancias que se expresan en el artículo 12 de dicha ley; y 50 centavos para los especificados en el artículo 13. Este impuesto se considerará nacional.

Art. 7°. Esta ley empezará á regir desde el 1° de enero de 1903. El Ejecutivo queda autorizado para reglamentar su ejecución.

Comuníquese, etc.

José Manuel Pando.
Ignacio Calderón,
Ministro de Hacienda.

IMPRENTA DEL ESTADO.

[De la Memoria del Ministerio de Gobierno y Justicia.

En los doce meses trascurridos desde el 1° de julio de 1901 al 1° de julio de 1902, se han ejecutado los siguientes trabajos: veintitrés folletos, con un total de 23,953 ejemplares; 118 hojas sueltas con un total de 1,391,790, en esta forma:

	Ejemplares.
Para la Prefectura	98, 200
Para los Telégrafos	923, 000
Para la Aduana Nacional	250, 000
Para la Policía	1, 400
Para el Tesoro Departamental	10, 600
Para los Ministerios	108, 590
Total de hojas sueltas	1, 391, 790

Á estas considerables cifras hay que agregar la impresión de 137 números del periódico oficial "El Estado," con 1,350 ejemplares cada uno, lo que arroja la cantidad de 182,950 ejemplares.

Todas estas ediciones, sin contar otras pequeñas para el servicio interno de algunas oficinas, han costado, desde el 1° de julio de 1901 hasta el 30 de junio último, la cantidad de 12,000 bolivianos, incluyendo el pago á los operarios. Las cuentas de la imprenta, presentadas á este ministerio respecto de los gastos efectuados durante el año, arrojan la cantidad de 12,618.85 bolivianos.

RIQUEZAS NATURALES DEL SUDESTE DE LA REPÚBLICA.

El representante en Bolivia de la Compañía denominada "L'Africaine" de Bruselas, ha proporcionado á la prensa de Buenos Aires los siguientes datos relativos á las riquezas naturales de la parte sudeste de Bolivia que, en día no muy lejano, estará penetrada por un ferrocarril que, partiendo de un punto del río Paraguay, llegará al interior de la República:

"*Riqueza minera.*—He atravesado," dice, "la Bolivia oriental desde el río Paraguay hasta los 65° de longitud occidental, entre los grados 16 y 18 de latitud sur, con el propósito de formar mi opinión en lo que atañe á la riqueza minera de aquella región. Hállase ésta formada casi en su totalidad por un levantamiento del terreno de época muy remota, con relleno de la superficie del suelo, que en algunos lugares en la actualidad se halla oculto bajo una capa espesa de tierra vegetal, y que en otras está expuesto á la vista, caprichosamente distribuido, con masas cristalizadas, depósitos sedimentarios, cuarzo, mica, esquitos, serpentina y deorito, grafita, arcillas volcánicas, etc. La región forma una parte de la meseta regada por varios afluentes del Amazonas y del Paraguay. Á causa de varias ondulaciones del terreno, que se extienden mucho, el río Jucavaca hállase entrecortado en todos sentidos por corrientes de agua clara, que se deslizan sobre crestas de roca.

La riqueza mineral de la región de que se trata fué reconocida de manera exacta por los jesuitas, que la colonizaron á raíz de la conquista. De ahí extrajeron oro y plata. Hoy día es poco conocida á causa de su aislamiento y por la dificultad de las comunicaciones. Las raras veces en las que capitalistas extranjeros parecían dispuestos á emprender algo, sus encargados de hacer las exploraciones los engañaron, porque las Comisiones estaban formadas de personas no avezadas á la lucha con aquella naturaleza, y apenas examinaron las eflorescencias de los yacimientos metalíferos, renunciando á toda tarea ante cualquiera privación y los obstáculos que son inherentes á toda exploración en semejantes comarcas, porque no estaban á la altura de tales dificultades, que ellos consideraban insuperables.

Hay en las cercanías de Bahía Negra: cal, mármol, fierro y manganeso.

En la Serranía de Chochis, cerca de Santiago: plata y fierro.

En la Serranía de Sunsas, en la dirección de Santo Tomás y Santo Corazón: depósitos aluviales auríferos.

En las inmediaciones de San Javier: importantes minas de estaño, de plátino, oro y azogue.

En los alrededores de Santa Rosa: azogue y oro.

En el norte de Concepción: oro.

En el norte de San Ignacio: platino y piedras preciosas.

En las inmediaciones de San José: azogue y cal.

En las de Buenavista: plata, petróleo y carbón de piedra.

Al oeste y sudoeste de Santa Cruz: petróleo, carbón de piedra, cal, estuco y pizarra.

Riquezas vegetales.—Hablando únicamente de las plantas de fácil uso, sin más gasto que el del transporte y sin entrar en ninguna enumeración de las innumerables especies de maderas tintóreas, yerbas medicinales, ó de aquellas que producen preciados aceites esenciales, sólo mencionaré tres de las cuatro variedades de árboles cuyas maderas son preciosas para la construcción y la ebanistería. Tales son el "quebracho" (quebracho lorentzu). Este árbol alcanza á veces una altura de 18 metros, con un diámetro de 80 centímetros. El peso específico de su madera es de 1,250 y contiene un 26 por ciento de tanino. Empléasela mucho para estacas, travesaños de ferrocarril, postes de reparos, etc. Su madera se emplea para la curtiembre.

Hay otros árboles parecidos al anterior (quebrachina y aspidos permina).

"Corupán" (piptademia cebil). Este árbol tiene á veces una altura de 20 metros por 1 de diámetro. El peso específico de la madera es de 1,141. Dicha madera es incorruptible en el agua, y cuando se la puede obtener en grandes trozos, es muy solicitada para estacones, obras hydráulicas, puentes, etc. También se la emplea para travesaños y otras construcciones. La corteza es muy gruesa y contiene cerca de un 25 por ciento de tanino. Este árbol secreta abundante goma arábiga.

"Lapacho" (tubebuza flavecens). Este hermoso árbol crece hasta la altura de 20 metros con un diámetro de 80, el peso específico de la madera es de 1,100. Se la usa mucho para tablones, para obras hidráulicas, travesaños de ferrocarril, etc. Hay cuatro variedades—la gris, la amarilla, la roja, y la negra, que se distinguen por el color de las flores. La corteza contiene tanino y la madera es usada para dar tinte.

"Mumday" (astronium juglandi folium). Este es un árbol cilíndrico, que crece á una altura de 20 metros por 1 de diámetro. Su peso específico es de 1,200. Se hace mucho pedido de dicha madera para trabajos hidráulicos, travesaños, postes de telégrafo, y palos de esgrima, ejes, etc. Hay tres variedades—blanca, amarilla y negra. Su madera sirve para teñir.

Las plantas textiles son muy abundantes y variadas. La vainilla, la coca y la zarzaparrilla se encuentran por donde quiera en estado silvestre.

La planta del aceite de castor [la palma Christi medicinal] es por demás abundante.

La carretera de Santiago á San José cruza un bosque de naranjos silvestres, cuyo límite no es conocido. Esta región produce en abundancia todos los frutos semi-tropicales. El cultivo del arroz, el café, el maíz, la mandioca, tabaco, algodón, indigo, azafrán, etc., da excelentes resultados. Hállase la tierra cubierta en inmensa extensión por la selva virgen, pero también hay muchos planos abiertos y ligeramente ondulados, y en los cuales prospera el ganado. Vense, allí, mantos de agua, en cierto modo estancada, á causa de su débil corriente, y de la interposición de la vegetación acuática.

Comunicaciones.—Los medios de comunicación, aunque fáciles son de una terrible lentitud y de muchos costo. Sólo hay carreteras y caminos de herradura, pero ellos se encharcan á menudo. El costo del transporte ha retardado del desarrollo agrícola, industrial y minero del país.

BRASIL.

POBLACIÓN POR ESTADOS.

Según publicación oficial últimamente hecha (Oficina Estadística del Estado de São Paulo), la población de los veinte Estados que componen la Unión brasilera es como sigue:

Minas Geraes	4,277,000	Sergipe	450,000
Bahía	3,335,000	Piauhy	425,000
São Paulo	2,520,000	Rio Grande do Norte	407,000
Pernambuco	2,089,000	Santa Catharina	405,000
Rio Grande do Sul	1,350,000	Paraná	380,000
Rio de Janeiro	1,300,000	Goyaz	340,000
Ceará	1,000,000	Amazonas	240,000
Alagoas	781,000	Espíritu Santo	201,000
Maranhão	660,000	Matto Grosso	157,000
Pará	652,000		
Parahiba	596,000	Total	21,565,099

CAMBIOS EN EL ARANCEL DE ADUANAS.

I.—*Circular Nº 24, de 25 de marzo de 1902, relativa á la franquicia de derechos de importación concedida á los objetos pertenecientes á los agentes diplomáticos, etc.*

["Diario Oficial" de 26 de marzo de 1902.]

Por la presente circular del Ministerio de Hacienda se ha dispuesto que las franquicias de que tratan las secciones 5 y 6 del artículo 2 de las Disposiciones preliminares del Arancel podrán concederse por los objetos en ellos expresados, mediante simple requisición del Ministro de Relaciones Exteriores ó de los propios interesados.

II.—*Decreto Nº 858, de 12 de agosto de 1902, manteniendo en vigor la exención del impuesto de consumo aplicable al tasajo.*

["Diario Oficial" de 15 de agosto de 1902.]

Art. 1°. Se mantiene en vigor la exención concedida por la ley con respecto al impuesto de consumo del tasajo, quedando sin efecto las disposiciones relativas á la garantía del cobro de dicho impuesto.

Art. 2°. Queda derogada toda disposición en contrario.

COLOMBIA.

DECRETO SOBRE CERTIFICACIÓN DE SOBORDOS Y FACTURAS CONSULARES.

El Vicepresidente de la República, encargado del Poder Ejecutivo, en uso de las facultades que le confiere la Constitución, decreta:

"ARTÍCULO 1º. Las facturas comerciales para los efectos de la certificación consular, se dividirán en cuatro clases, á saber:

"1ª. Las facturas en que solamente estén anotados artículos de fierro, acero, cobre, zinc ó madera, destinados á maquinarias de empresas industriales, ferrocarriles, vapores, luz eléctrica, telégrafos, teléfonos, imprentas, fábricas de vidrio ó loza, de esteáricas, de tejidos y de las que se consideren como de utilidad pública por medio de declaración oficial;

"2ª. Las facturas cuyo valor no sea mayor de doscientos pesos;

"3ª. Las facturas cuyo valor pase de doscientos pesos y no exceda de quinientos; y

"4ª. Las facturas cuyo valor sea mayor de quinientos pesos.

"ART. 2º. Las facturas para obtener la certificación consular serán gravadas en la siguiente forma, y siempre que en ellas no estén anotados objetos con piedras preciosas, ó de oro, platino ó plata, en cuyo caso tendrán el recargo especial que más adelante se indica:

"Facturas de 1ª clase, con $3; facturas de 2ª clase, con $6; facturas de 3ª clase, con $8; facturas de 4ª clase, con $10 por cada mil pesos, ó fracción de mil.

"Las facturas en que estén anotados objetos con piedras preciosas, ó de oro, platino ó plata, tendrán el siguiente recargo:

"Por los artículos que contengan piedras preciosas, el cuarenta por ciento;

"Por los artículos de oro, el diez por ciento;

"Por los artículos de platino ó plata, el tres por ciento.

"*Parágrafo.*—Los Cónsules sólo podrán certificar facturas en que estén anotados bultos pertenecientes á una misma marca, una sola firma remitente, para una sola persona ó compañía y para un solo lugar.

ART. 3º. Por las encomiendas postales se cobrará el dos por ciento de la correspondiente factura ó el recargo impuesto á los objetos de oro, plata, platino y piedras preciosas, pagadero en oro ó en su equivalente en papel-moneda, como compensación del gravamen consular sobre las mercancías que contengan.

"*Parágrafo.*—La Dirección General de Correos y Telégrafos reglamentará el cobro de ese gravamen y dará el aviso del caso á quien corresponda.

"ART. 4º. Los derechos de sobordos se cobrarán en los Consulados á razón de cinco pesos por los primeros cien bultos y un peso por cada cien bultos restantes ó fracción de ciento.

ART. 5°. El desembarco de mercaderías extranjeras en cualquier puerto de la República, sea franco ó habilitado, marítimo ó fluvial, con destino al comercio en territorio de la República, obliga al capitán ó sobrecargo del respectivo buque á presentar un sobordo con la certificación consular.

"ART. 6°. Cuando en un puerto extranjero se tomen mercancías con destino á este país, pero que deban ser trasbordadas en otro puerto extranjero, las facturas correspondientes serán presentadas para su legalización al Cónsul del puerto donde primitivamente fué embarcada la mercancía, quien dará inmediato aviso al del lugar en cuyo puerto se verifique el trasbordo por medio de un oficio en que conste el número, marca y peso total de los bultos, el valor de la mercancía y el puerto de Colombia al cual se encamina, el nombre de los destinatarios, embarcadores y consignatarios, y los demás datos que sea conveniente manifestar.

"El Cónsul del puerto de trasbordo permitirá que las facturas certificadas de este modo sean insertadas en el sobordo que debe presentársele, siempre que estén de acuerdo con los datos que haya recibido.

"ART. 7°. La mercancía extranjera que sea desembarcada en alguno de los puertos del Istmo de Panamá para seguir á otros puertos nacionales, obliga el sobordo con la correspondiente certificación, extendida por el Administrador de Hacienda nacional, por la cual certificación se pagarán tres pesos, en moneda de plata á la ley de 0.835, por los primeros cincuenta bultos, y un peso, en la misma moneda, por cada cien bultos restantes ó fracción de ciento.

"ART. 8°. El valor de toda certificación consular debe hacerse constar por el respectivo Cónsul, Agente consular ó Administrador de Hacienda en el correspendiente sobordo ó factura.

"ART. 9°. Los Cónsules á quienes no se haya asignado sueldo fijo tienen derecho á percibir para sí, como emolumentos, el cincuenta por ciento, de lo que recauden mensualmente por la certificación de sobordos y facturas, y siempre que dichos emolumentos no sean en cantidad mayor de cien pesos.

"En el caso de que el valor total de las certificaciones pase en un mes de doscientos pesos, los Cónsules tendrán también derecho para sí, además de los señalados en la primera parte de este artículo, al dos por ciento de lo más que recauden de la dicha cantidad de doscientos pesos en el mismo mes.

"ART. 10°. Los Cónsules generales tendrán la obligación de exigir de los Cónsules, Vicecónsules, etc., la comprobación de sus cuentas, y pasar una relación mensual al Ministerio de Hacienda sobre las entradas y gastos de los Consulados que estén bajo su dependencia, y asimismo rendirán al Ministerio de Relaciones Exteriores un Informe sobre la manera como los empleados consulares desempeñan sus obligaciones.

"1°. Las cuentas que á los Cónsules generales pasen los Cónsules, Vicecónsules ó Agentes consulares, se rendirán por mensualidades ó quincenas, según la cuantía de las entradas y á juicio de los Cónsules generales.

"2°. La Corte de Cuentas exigirá igualmente la rendición de las de los Consulados en la forma legal, y las comparará con los datos é Informes que envíen los Cónsules generales.

"Art. 11. Habrá dos clases de derechos de tonelaje—el de registro y el de descarga.

"El de registro se cobrará á razón de diez centavos oro por cada tonelada que señale la patente del buque, y sólo se cobrará en las Islas de San Andrés y San Luís de Providencia.

"El de descarga se cobrará á razón de un peso cincuenta centavos oro por cada tonelada de mercaderías que desembarque en los puertos nacionales, marítimos ó fluviales, francos ó habilitados, y que sean destinadas al comercio dentro del territorio de la República.

"Art. 12. El producto total del derecho de tonelada que se recaude en los puertos francos de Colón y Panamá, se distribuirá de la siguiente manera: El cuarenta por ciento ingresará al Tesoro nacional; el veinte por ciento al del Departamento, y el cuarenta por ciento restante, por partes iguales, á los fondos municipales de dichas ciudades.

"Art. 13. Exceptúanse solamente del pago de derechos de tonelada, salvo que por leyes especiales ó contratos se diga claramente lo contrario:

"1°. Los buques de guerra de naciones amigas y los asimilados á ellos, cuando á unos y otros les sea permitido entrar y fondear en los puertos de la República, siempre que no traigan carga particular;

"2°. Los buques que vengan en lastre;

"3°. Los que traigan inmigrados en número mayor de cincuenta;

"4°. Los que traigan solamente carbón, sal, hielo, ladrillo, baldosas y tejas, y las mercaderías embarcadas en un puerto habilitado, y

"5°. Los buques nacionales.

"Art. 14. Cuando en una Aduana no apareciere la factura consular en el acto del reconocimiento de la correspondiente mercadería, la Junta respectiva la avaluará en oro y sobre esa base se cobrará al introductor una multa igual al cuádruplo de los derechos consulares que se hubieren dejado de causar, y sin que por esto se deje de imponer la pena de que habla el artículo 326 del Código de Aduanas.

"*Parágrafo.*—Asimismo se procederá cuando se note diferencia entre el precio anotado en las facturas y el que en realidad deban tener las mercaderías que en ellas se señalan.

"Art. 15. Cualquiera empresa industrial, establecimiento, comunidad ó persona, á quien desde la fecha de este acto legislativo se conceda franquicia aduanera sobre los artículos que introduzca, en virtud de contrato posterior, pagará al retirar las mercaderías de la respectiva Aduana los correspondientes derechos de importación; los cuales serán devueltos tan pronto como el Ministerio de Hacienda ordene la respectiva exención.

"Art. 16. Las devoluciones de derechos de Aduana indebidamente pagados, que sean decretadas ú ordenadas por el Jurado de Aduanas, se efectuarán inmediatamente por la respectiva Aduana, y si en ésta no hubiere fondos suficientes para cubrirlas se girará por la misma Aduana á cargo de la Tesorería general de la República, la que las cubrirá inmediatamente á reserva de legalizar el gasto, aunque no haya partida votada suficiente en la Presupuesto de Gastos para esa clase de pagos.

"*Parágrafo.*—Asimismo se procederá con respecto á las devoluciones decretadas por el Ministerio de Hacienda y que se relacionen con cualesquiera derechos de Aduana.

"Art. 17. El presente Decreto, que modifica el artículo 56 del Código de Aduanas y algunas disposiciones fiscales, principiará á regir tanto en las Aduanas como en los Consulados de la República, desde el 1° de agosto del presente año.

"Comuníquese y publíquese.

"Dado en Bogotá, á 28 de mayo de 1902."

EL PLATINO.

[Del "Boletín Industrial" de Bogotá.]

En la estadística de la producción del platino en el mundo Rusia ocupa el primer lugar con una producción que se acerca, en mucho, al 90 por ciento del metal destinado á la venta universal; Colombia, aunque rica en extremo en yacimientos platiníferos, no produce nada que valga la pena de tenerse en cuenta.

Gracias á notabilísimos esfuerzos de investigación y estudio es ha descubierto platino en muchos minerales de los Estados Unidos, y de ellos se le extrae en pequeñas proporciones. Esta producción, pequeña en sí, es grande en cuanto representa una suma de trabajo intelectual considerable, desplegado y puesto en acción en busca del metal más noble entre todos.

El primer puesto entre los países productores del platino, á la larga, tiene que corresponder á Colombia, pues es muy posible que en ninguna otra parte se encuentren yacimientos tan ricos y tan vastos como los de las vertientes y aluviones de la inmensa zona comprendida entre el Atrato y el San Juan.

No solamente existe el platino en el Chocó, sino también en Santa Rosa de Osos, en Frontino y en otros muchos lugares de Colombia.

El precio del platino se parangona mucho con el del oro, pues varía entre $18 y $19 la onza troy, siendo el del oro $20.67; vale, pues, muy bien la pena buscarlo con el mismo ahinco con que se busca el metal amarillo.

COSTA RICA.

CAMBIOS EN EL ARANCEL DE ADUANAS.

Acuerdo de 26 de junio de 1902.

[De "La Gaceta," No. 144.]

Por el presente acuerdo se establece el aforo de 6 céntimos de colón ($0.06) por kilogramo sobre las redes destinadas á la industria de la pesca, ya vengan solas ó con los plomos y boyas correspondientes, sujeto al 50 por ciento de recargo.

Decreto de 29 de setiembre de 1902.

[De "La Gaceta," No. 77.]

Ascención Esquivel, Presidente Constitutional de la República de Costa Rica,

Vista la reclamación presentada á la Secretaría de Hacienda por los Señores Macaya y Cía., sobre aforo de los limpiapisos de pabilo; y

Considerando que la ley emitida por el Congreso el día 3 de julio de este año tuvo como principal mira favorecer la industria nacional; que los limpiapisos de hilacha ó pabilo no se fabrican en el país; y que, por lo tanto, no deben sufrir el impuesto proteccionista que señaló para las escobas la referida ley;

Considerando, además, que los escobones de caña que usa la agricultura para patios de beneficiar café, tampoco se hacen en la República, y que al dejarlos comprendidos en la categoría de escobas se grava la principal industria nacional; Por tanto,

En uso de las facultades que le confieren las leyes de 16 de julio de 1888 y 14 de junio de 1901, Decreta:

Artículo único. Los limpiapisos de pabilo ó hilacha y los escobones de caña para patios de beneficiar café se aforarán á razon de 15 céntimos el kilogramo.

Dado en la Casa Presidencial, San José, á los veintinueve días del mes de septiembre de mil novecientos dos.

MINAS DE CARBÓN DE PIEDRA.

Los depósitos de carbón de piedra en Costa Rica son abundantes y fáciles de explotar, y según se asegura por personas entendidas en el asunto tienen el mismo origen y presentan los mismos caracteres geológicos que los de las regiones de la antracita en el Estado de Pennsylvania.

Según noticias publicadas por la Revista denominada "The Pacific States Investor," número del corriente mes de noviembre, la Compañía Costarricense de Petróleo y Carbón de Piedra ha recibido numerosas invitaciones de capitalistas de los Estados Unidos á fin de facilitar la explotación en grande escala de las minas que aquella posee en la porción de la República que linda con el Atlántico. Las de la misma clase que se hallan en la provincia de Talamanca están á punto de abrirse y explotarse también en grande escala, habiéndose concedido á un ingeniero, que representa un sindicato de San Francisco de California, la autorización necesaria para hacer por el término de veinte años los estudios que han de preceder á la conclusión de un arrendamiento que se tiene en proyecto.

Refiriéndose á la industria del carbón de piedra en Costa Rica, dice el "Mexican Herald" que el Gobierno ha concedido á la Compañía antes nombrada, por el término de cincuenta años, las inmensas propiedades mineras de que se trata, en las que se encuentran más de 50,000 acres de las mejores tierras que hay en el mundo en cuanto á la riqueza de los depósitos de las substancias indicadas. "Todas ellas están situadas en una región tropical, y son muy adecuadas para el cultivo del café, el cacao, los bananos y el caucho. En ellas se encuentran también fácilmente los dos valiosos minerales antes nombrados. La Compañía ha empezado sus trabajos de explotación, y como está prácticamente en posesión de un monopolio, abriga la esperanza de realizar grandes dividendos."

CUBA.

MENSAJE DEL PRESIDENTE AL CONGRESO DE LA REPÚBLICA, AL EMPEZAR EL SEGUNDO PERÍODO DE SUS SESIONES.

Al Congreso de la República:

Cumplo con agrado, al abrirse la Segunda Legislatura de la Nación, el precepto contenido en el artículo 68 de la Ley Fundamental.

De los asuntos que en mi anterior Mensaje me permití recomendar á la consideración del Congreso, algunos son ya leyes promulgadas; otros, como los que se refieren á la organización de la provincia y de los municipios, han comenzado á discutirse bien en la Cámara ó en el Senado, y es de esperarse, por la importancia que tienen, que durante la presente Legislatura queden terminadas ambas leyes, la provincial y municipal.

Es asimismo de urgente necesidad que se dicte la ley sobre organización de los tribunales, á fin de que las facultades de éstos y el modo de ejercerlas, queden propiamente regulados, más especialmente en cuanto se relaciona con el Tribunal Supremo, que tiene á su cargo la alta misión de conocer sobre la constitucionalidad de las leyes, decretos y reglamentos.

Durante el período que lleva de existencia la República, el orden más completo ha reinado en todo el territorio, sin que pueda señalarse ninguna alteración del orden público y sin que se hayan dado casos de bandolerismo organizado en punto alguno de la Isla.

Esto habla muy alto en honor del pueblo cubano, particularmente en las poblaciones rurales; porque á pesar de la escasez ó de la falta de trabajo, á consecuencia de la crisis económica que hemos venido atravesando, se ha mantenido resignado á la dureza de las circunstancias, dando pruebas evidentes de su naturaleza pacífica, de su moralidad, de su amor al orden y honrado patriotismo.

El estado sanitario continúa mejorando de tal modo, que resiste ventajosamente la comparación con muchas ciudades de Europa y América.

La cifra de mortalidad anual en junio último fué de 23.56 por mil, en julio de 24.98, en agosto de 22.81, en septiembre de 17.86, y según los datos adquiridos en el Departamento de Sanidad, que no han sido aún publicados, puedo asegurar que la cifra de octubre último ha sido de 17.96, la más baja ocurrida en dicho mes en esta Capital desde hace trienta y dos años, es decir desde 1870.

Con respecto á la fiebre amarilla, se han cumplido ya trece meses desde el último caso ocurrido en la Habana, viéndose afortunadamente libre todo el territorio de la Isla, no sólo de aquella cruel enfermedad, sino de otras de carácter cuarentenario, incluso la viruela, pudiendo afirmarse por lo tanto, que el estado sanitario de la República es mejor aún que durante la intervención del Gobierno Militar.

En sanidad se ha continuado el mismo sistema seguido por el Gobierno Interventor, habiéndose aumentado ligeramente el personal en los últimos meses, pero sin aumentar el costo del servicio. Se ejerce cuidadosamente la mayor vigilancia por las autoridades sanitarias para evitar la reaparición de la fiebre amarilla ó de cualquiera otra enfermedad epidémica, y se trata de impedir, empleando todos los medios posibles, la aparición de casos de muermo y de tétanos infantil, así como de disminuir la cifra de mortalidad por tuberculosis y enteritis.

La ley de sanidad ha de considerarse como de urgencia inmediata, pues tanto para la misma Habana cuanto para el resto de la Isla carecemos aún de guía fija, á no ser las órdenes militares, opuestas, en no pocos casos, á los preceptos constitucionales.

Los servicios de correos y telégrafos de la República necesitan edificio más amplio y lugar más adecuado á los fines para que se destinan.

Muy satisfactorias son las relaciones que sostenemos con las demás naciones, pues la República de Cuba ha sido reconocida sucesivamente por los Estados Unidos de América, los Estados Unidos Mexicanos, Inglaterra, Francia, España, Bélgica, Guatemala, Costa Rica, Haití, Suiza, Santo Domingo, Venezuela, Italia, Nicaragua, Ecuador, El Salvador, Dinamarca, Portugal, Rusia, Alemania, Países Bajos, Bolivia, Brasil, Austria Hungría, Grecia, Argentina, Chile, Perú, Honduras, Paraguay, Uruguay y Suecia y Noruega.

Especialmente cordiales y amistosas son nuestras relaciones con los Estados Unidos, siendo una prueba de la buena voluntad que une al Gobierno de la Gran República con el nuestro las negociaciones, ya iniciadas, para un tratado de comercio bajo la base de mutuas concesiones arancelarias. El objeto primordial de este tratado es obtener ventajas positivas en el mercado de los Estados Unidos para nuestros productos, particularmente para los azúcares y el tabaco, sobre todo los primeros que forman nuestra principal industria y constituyen aquí, en una gran proporción, el fundamento de la riqueza pública. De las simpatías, nunca desmentidas, del pueblo americano hacia nosotros, que sentímos por él admiración y gratitud; del interés manifiesto que tiene por la prosperidad de Cuba; de los deseos generosos en este mismo sentido y del espíritu de justicia del ilustre Magistrado que preside los destinos de la Gran República, es de esperarse confiadamente que se ha de llegar á un acuerdo razonable sobre los términos en que ha de redactarse el convenio proyectado, porque nada hará tan firmes y duraderos los vínculos de afecto y gratitud que ligan hoy al pueblo de Cuba con el pueblo de los Estados Unidos, como el bienestar que se derive del fomento de nuestras industrias por virtud del incremento y desarrollo del comercio mutuo entre ambos países.

Halagador en extremo es el estado actual de nuestro Tesoro. La recaudación de las rentas públicas se efectúa con regularidad, y las obligaciones ordinarias y extraordinarias del Estado se han cumplido con exactitud. Después de cubiertas todas nuestras obligaciones hasta fin del mes próximo pasado, la existencia en la Tesorería General es de $1,561,942.06.

Las atenciones ordinarias de 20 de mayo á 30 de junio fueron satisfechas con los fondos que para ese fin había destinado el Gobernador Militar de la Isla.

Las de julio, agosto, septiembre y octubre han sido satisfechas con arreglo á las autorizaciones que me fueron concedidas por las leyes de 12 de julio y 5 de septiembre.

Las extraordinarias lo han sido con cargo al crédito de 300,000 pesos á que se refiere la ley de 3 de junio, quedando aún de éstos un saldo de 157,067.44.

El promedio mensual de todos los gastos en los cuatro meses últimos es de $1,295,428.48, ó sean $147,063.62 menos que en iguales meses del año pasado, según se pone de manifiesto en el siguiente cuadro comparativo; debiendo advertirse que en la primera de las mencionadas cantidades están comprendidos los gastos extraordinarios y los servicios de nueva creación.

	Pagos.	
	1901 á 1902.	1902 á 1903.
Julio	$1,148,821.25	$1,236,852.39
Agosto	1,766,279.49	1,260,957.93
Setiembre	1,320,374.07	1,228.912.29
Octubre	1,534,493.60	1,454,991.25
Total	5,769,968.41	5,181,713.86

Promedio mensual—	
1901 á 1902	$1,442,492.10
1902 á 1903	1,295,428.48
Diferencia	147,063.62

Recibimos el Tesoro de la República con una existencia efectiva de $539,984.99, pues la diferencia entre esta suma y la de $689,191.02, que aparecía en la carta del General Wood al hacer entrega del Gobierno, fué explicada en el mensaje que tuve la honra de dirigir á la Cámara de Representantes en 27 de junio último. Hoy, á los cinco meses diez días de inaugurada la República, tenemos en caja la expresada existencia de $1,561,942.06.

Los ingresos han sido los siguientes:

De 20 al 31 de mayo	$416,953.39
Junio	1,373,641.84
Julio	1,552,638.13
Agosto	1,239,048.34
Setiembre	1,596,401.89
Octubre	1,610,196.48
	7,788,880.07

Se acompaña un Estado del movimiento de fondos de la Tesorería General desde el 20 de mayo hasta el 31 de octubre del corriente año.

La Instrucción Pública ha seguido su marcha regular y ordenada, sin entorpecimiento alguno en los servicios que comprende.

La Universidad y los Institutos de Segunda Enseñanza inauguraron el primero de octubre el nuevo curso académico.

Á juzgar por lo que hasta ahora se observa, hay motivos para creer que irán adquiriendo cada día mayor desarrollo los estudios en ambos establecimientos.

Á fin de promover este resultado se reunen en la actualidad informes y datos con objeto de introducir en el Plan de estudios vigente algunas modificaciones que contribuyan á mejorar el sistema y hacerlo más práctico.

Funcionan con igual regularidad la Academia de Pintura y Escultura y la Escuela de Artes y Oficios. Me place también manifestar que desde hoy (3 de noviembre) ha quedado abierta al público la Biblioteca Nacional, recién instalada en uno de los Departamentos de la Secretaría de Instrucción Pública.

En junio y agosto últimos se efectuaron exámenes para maestros de primero y segundo grado. Hoy se dispone de personal de uno y otro sexo habilitado para el magisterio en número suficiente para atender á las necesidades de la enseñanza.

De julio á agosto estuvieron abiertas, durante cuatro semanas, las Escuelas Normales de verano en las capitales y otras ciudades importantes de las provincias.

Por su mejor organización y disciplina y por el método más práctico de las conferencias, el éxito obtenido en el año actual ha sido muy superior al del pasado. Y es de advertir que dichas escuelas cuentan hoy con un sobrante derivado de sus propios recursos, que ha de servir para irlas dotando del material docente necesario al objeto que se persigue.

No omitiré decir que el día 8 de setiembre se inauguró la Escuela Normal de Kindergarten, á la cual asisten, además de las alumnas formalmente inscriptas, otras varias en calidad de oyentes, que de este modo se preparan á prestar más tarde sus servicios á la instrucción primaria de la República.

En el ramo de Obras Públicas se han continuado todos los trabajos en vías de ejecución al cesar el Gobierno de la Intervención Americana.

En la provincia de Pinar del Río queda terminada la construcción de dos trozos de carretera y de un muelle, la de un puente y la reconstrucción de varias obras.

En la de la Habana se han concluido dos trozos de carretera y un puente.

En la de Matanzas se dió fin á la construcción de dos trozos de carretera, se continúan los trabajos del muelle en construcción en la capital de la provincia y del dragado de la bahía de Cárdenas.

En la de Santa Clara se han terminado cuatro trozos de carretera.

En la de Puerto Príncipe se han construido dos puentes y reconstruido otros dos.

En la de Santiago de Cuba se terminó la construcción de tres trozos de carretera, la de cuatro puentes y la del muelle de Gibara.

En el ramo de faros se han hecho también obras de alguna importancia, quedando terminadas la construcción de siete faros y la reparación de otros.

Se han terminado cuatro edificios del Estado que se encontraban en construcción, y reparado treinta y dos más, siendo la mayor parte de dichos edificios casas escuelas.

Se llevan á cabo importantes reparaciones en varios establecimientos de la República, entre ellos la Universidad y el Asilo de Enagenados.

Por el departamento de ingenieros de la ciudad de la Habana, dependiente de la Secretaría de Obras Públicas desde el 20 de mayo, se atiende á todos los trabajos de limpieza y saneamiento, reparación y conservación de calles, parques y paseos, y á la construcción de nuevos parques y avenidas, entre ellas las del litoral, conocida vulgarmente por el Malecón.

Cuando se traspasó este servicio á la Secretaría de Obras Públicas, el promedio de sus gastos mensuales ascendía á $133,000, ó sea $1,596,000 anuales. Segregados del mencionado Departamento de ingenieros de la ciudad los del arquitecto municipal, que pasó al Ayuntamiento, el de construcción y reconstrucción de edificios del Estado y el de obras del puerto, que actualmente funciona como el repetido Departamento de ingenieros de la ciudad, dentro del organismo de la Secretaría de Obras Públicas, los gastos de dichos Departamentos de ingenieros ascendían á $89,000 mensuales, ó sea $1,058,000 al año. De esta suma correspondía al personal de plantilla la crecida cifra de $300,312. Tan pronto como la Secretaría de Obras Públicas se hizo cargo del servicio de que se trata se procedió á llevar á cabo todas las economías razonablemente compatibles con las funciones que el Departamento desempeña, especialmente en el capítulo de personal, cuya plantilla anterior de $300,312 ha quedado reducida a $122,444.

El total por año destinado á cubrir las atenciones del referido Departamento de ingenieros de la ciudad no asciende actualmente á más de $862,000. Sin embargo, todos los servicios que le corresponden se vienen desempeñando hasta la fecha con toda regularidad.

Existen en vías de ejecución diferentes obras en cada una de las seis provincias.

La economía realizada en sueldos de plantilla en las varias dependencias de obras públicas está representada por la cifra de $248,000 anuales.

Nada práctico ha podido hacerse directamente en el Departamento de Agricultura por la falta de fondos destinados á ese objeto. Este departamento requiere anualmente una asignación crecida para atender al desarrollo y mejoramiento de las industrias que comprende, siendo uno de los medios más eficaces á ese fin la creación de estaciones agronómicas en donde se perfeccione el cultivo de aquellas plantas que son la base de nuestra riqueza industrial y se introduzca el de otras que puedan llegar á ser muy productivas en nuestro suelo, como lo son actualmente en otros países.

El estado halagüeño de nuestro tesoro, después de cinco meses y medio de gobierno propio, nos hace esperar con absoluta fe que, administrando con honradez las rentas públicas y haciendo uso de ellas con prudencia y discreción, llegaremos á tener en lo sucesivo fondos suficientes, no sólo para imprimir á nuestra agricultura un gran impulso, cual corresponde á un país esencialmente agrícola, sino también para emprender en todas las provincias obras de verdadera utilidad, que demanda el alto nivel de civilización que hemos alcanzado.

Tengo la seguridad de que el Congrso se inspira en estos mismos propósitos, y confio en que el Ejecutivo encontrará siempre en ambos cuerpos colegisladores apoyo cierto para el fomento material y moral de nuestra amada tierra.

T. Estrada Palma.

Habana, *3 de Noviembre de 1902.*

CUBA.

MENSAJE DEL PRESIDENTE ENVIANDO AL CONGRESO EL PRESUPUESTO PARA 1903.

HABANA, *1º de noviembre de 1902.*

Al Congreso:

Cumplo con verdadera satisfacción el deber que me corresponde, conforme al inciso 5º del artículo 68 de la Constitución, presentando al Congreso el Proyecto de Presupuestos Generales de la Nación para el año fiscal de 1903.

Por primera vez hacemos los cubanos uso del más importante de los derechos que puede disfrutar un pueblo; el de regular libremente sus ingresos y sus gastos, y ello tiene que ser para todos motivo de verdadera complacencia, por cuanto fué una de nuestras más ardientes aspiraciones, que hoy después de cruentos sacrificios, vemos felizmente realizada. El Gobierno se congratula de contribuir por su parte á que se normalice la vida económica del Estado, proponiendo al Poder Legislativo las asignaciones para el sostenimiento de los servicios públicos y los ingresos que se estiman necesarios para cubrirlos.

Mientras existió la soberanía española los presupuestos de Cuba eran aprobados, primeramente, sin el concurso de los representantes del país y después con la intervención de los pocos que se enviaban al Parlamento Español, los cuales, por su reducido número y otras causas nunca pudieron influir eficazmente en favor de los intereses genuinamente cubanos. En los 31 cuadros que acompañan se detallan las ingresos y gastos que fueron presupuestos para Cuba á partir del año 1850 hasta el de 1898, y por ellos podrá verse el importe total de las obligaciones que pesan sobre el Tesoro local y la aplicación que se da á los recursos que se exigían al pueblo cubano, justificando las protestas del mismo contra aquel sistema contrario á sus legítimas aspiraciones y más apremiantes necesidades.

Durante el régimen de la intervención no se formularon presupuestos y por esta causa en los mensajes que dirigí á la Cámara de su digna Presidencia, en 11 de junio y 22 de agosto últimos, solicité las correspondientes autorizaciones para satisfacer los gastos del Estado hasta que fueran aprobados estos presupuestos generales, indicando en aquellos mensajes las causas que impedían haber realizado, con la urgencia deseada, tan importante trabajo. Se carecía de punto de partida, en virtud de la organización especial que á los servicios públicos había dado el Gobierno Interventor, los cuales funcionaban sin presupuestos, atendiéndose á las necesidades del Estado mediante la concesión de fondos solicitados por los pagadores de los distintos Departamentos, primero en pedidos mensuales, y después, bimensuales. Al cesar dicho Gobierno en 20 de mayo, pasaron á formar parte de las Secretarías del Despacho servicios que antes tenían una organización independiente ó que estaban subordinados directamente al Cuartel General del Departamento de Cuba, no existiendo por ese motivo, antecedente alguno en las Secretarías. Ha sido preciso, por tanto, como trabajo previo, hacer la reorganización y distribución de aquellas dependencias de conformidad con el nuevo orden de cosas establecido al inaugurarse la República.

En el proyecto que tengo la honra de someter al Congreso se ha procurado establecer las mayores economías, de acuerdo con las manifestaciones que hice en mi carta programa de 7 de septiembre de 1901, en la que expresaba la necesidad de organizar la República tan modesta como fuera posible, para evitarnos dificultades y embarazos por falta de previsión, por cuyo motivo debíamos combinar cuidadosamente la organización de los servicios públicos y su dotación, ajustándolos á la capacidad rentística de la Isla y descansando sobre datos ciertos, nunca en lisonjeras esperanzas.

Consecuente con ese propósito se han limitado los gastos á las necesidades que pesan sobre el Estado, de conformidad con las leyes y disposiciones que regulan los servicios públicos, y de acuerdo con una de las cláusulas del Apéndice de nuestra Constitución, en lo que respecta á los de sanidad terrestre y marítima.

El resumen general del Proyecto es como sigue:

INGRESOS.			
Aduanas		$14,781,000.00	
Impuesto de bebidas		1,200,000.00	
Derechos consulares		250,000.00	
Rentas interiores		500,000.00	
Comunicaciones		420,000.00	
Propiedades y derechos del Estado		119,800.00	
Productos diversos		243,200.00	
			$17,514,000.00
GASTOS.			
Poder Legislativo		413,319.68	
Poder Ejecutivo:			
Presidencia	$85,700.00		
Secretaría de Estado y Justicia	310,396.00		
Secretaría de Gobernación	4,529,998.00		
Secretaría de Hacienda	1,801,117.88		
Secretaría de Instrucción pública	3,721,790.84		
Secretaría de Obras públicas	2,923,011.82		
Agricultura, industria y comercio	165,319.50		
		13,537,334.04	
Poder judicial		949,314.00	
			14,899,967.72
Superávit			2,614,032.28

Deduciendo de $14,899,977.82 que importan los gastos en el Proyecto que se acompaña, los de servicios de nueva creación, Congreso, Presidencia, Cuerpo Consular y aumento de la Guardia Rural, ascendentes á $1,457,947.68, los de los contratos celebrados por el Gobierno Militar que tiene que cumplir el actual Gobierno, ascendentes á $1,085,271.38, resultaría que los gastos para los servicios antes establecidos sólo ascenderían á $12,356,748.66, ó sea $7,157,855.21 menos que la ascendencia de los egresos en el pasado ejercicio de 1901 á 1902, sin que se hayan hecho reducciones en los servicios de Sanidad, Beneficencia y otros de no menor importancia. Estas cantidades comparadas con las de los tres años últimos ofrecen el resultado siguiente:

	1899 á 1900.[a]	1900 á 1901.[a]	1901 á 1902.[b]	Se presupuestan: 1903.
Ingresos	$17,385,905.30	$17,154,929.28	$18,791,473.21	$17,514,000.00
Gastos	15,691,453.06	17,644,994.81	19,514,603.87	12,899,967.72
Superávit	1,694,452.24			2,614,032.28
Déficit		490,065.53	723,130.65	

Entrando en el examen de los gastos, es de observarse que todos los del Poder Legislativo, los de la Presidencia y Vicepresidencia y los del Cuerpo Diplomático y Consular son de nueva creación y constitucionalmente ineludibles, teniendo los últimos el carácter de permanentes, conforme á la Ley fundamental; por cuyo motivo constituyen parte del Presupuesto fijo y deberán regir mientras no sean reformados por leyes especiales.

También tienen el carácter de permanentes los gastos de la Administración de Justicia; pero como todavía el Congreso no ha redactado la Ley orgánica del Poder Judicial, donde deberán consignarse definitivamente aquellos gastos, á él toca adoptar la medida que juzgue procedente para que resulte cumplido el precepto constitucional en cuanto á la legalidad de dichos gastos. Mientras tanto se consignan en el Proyecto las cantidades necesarias para mantener la actual organización como única legalidad existente. Por ese motivo no ha sido incluida en este Proyecto la dotación de los Juzgados Municipales, puesto que el fijar su ascendencia es atribución exclusiva del Congreso.

En el Departamento de Gobernación figuran las obligaciones de carácter transitorio que ha tomado el Estado sobre sí, tales como las de los Gobiernos provinciales y las de Sanidad y Beneficencia. Las primeras, por no estar aún organizados los Consejos provinciales y las últimas, porque su propia naturaleza exige la acción tutelar del Estado, siempre que las organizaciones locales no tengan recursos para atenderlas.

Es posible que las atenciones de los Gobiernos de provincia sólo figuren en el actual presupuesto durante algunos meses, si se tiene en cuenta la proximidad de la promulgación de la Ley orgánica Provincial; las de Beneficencia, ascendentes á cerca de un millón de pesos, seguramente serán disminuidas, tan pronto como se encuentren los Ayuntamientos en condiciones de que el Gobierno pueda hacerles entrega de las instituciones benéficas de carácter municipal.

---

[a] Datos de la Memoria del Secretario de la Guerra de los Estados Unidos de Norte América.
[b] Datos del Tesoro General de la Isla.

El costo de los servicios de Sanidad, lejos de disminuir está llamado á acrecentarse, puesto que al extenderse la organización de los servicios á todo el país y aun fuera de él, tiene que ser mayor la suma requerida para su sostenimiento. Entre esos gastos aparece el proyecto de creación de un Laboratorio Químico-Bacteriológico de carácter general, en el que se harán las preparaciones científicas que hoy resultan muy costosas para el Estado y se practicarán los análisis químicos que en la actualidad se hacen mediante crecidos gastos; por lo que puede afirmarse que ese Laboratorio no sólo producirá efectivas economías, sino que dará rendimientos positivos.

Entre las nuevas atenciones de Gobernación se incluyen los gastos de la Guardia Rural conforme á la Ley de 18 de octubre, que ascienden á 1,783,582 pesos; la policía secreta, antes sufragada en parte por el Municipio de la Habana, y hoy á cargo del Estado por efecto de las disposiciones vigentes; así como la subvención señalada al Cuerpo de Bomberos por la orden 103, serie de 1902, la cual se reduce á $6,000 en vez de los $12,000 asignados en dicha orden, por cuanto el Municipio de la Habana debe atender con mayor cantidad que el Estado al sostenimiento de tan benéfica institución, ya que ha sido descargado de otros gastos de carácter local, y le es posible, por lo mismo, atender con mayor holgura á las atenciones municipales.

En cuanto al ramo de Hacienda se han hecho en todos los servicios adscriptos á la Secretaría las mayores economías. Terminada la ocupación americana se llevó á cabo la reorganización de todos los servicios, procurando la uniformidad en la administración económica y financiera de la Isla. Por la orden número 113 de 7 de mayo último, se dispuso pasaran á aquel Departamento las oficinas de Tesorería y de la Auditoría General (hoy Intervención General del Estado), y por la número 142 de 10 del mismo mes, los servicios de Aduanas, Guardacostas y Estadística mercantil.

También se dispuso—orden número 133—quedaran adscriptos á aquel Departamento los servicios de Inmigración y Cuarentena, y por resolución del Cuartel General de 19 del propio mes, se le dió posesión del Arsenal, Campamento de Colombia, Ferrocarril de Triscornia y otras varias propiedades del Estado que administraba directamente dicho Cuartel General.

En el Proyecto del Departamento de Hacienda se presupuestan las sumas que se consideran indispensables para los gastos de Transportes; Comisión del Banco Nacional, según el contrato de 18 de Febrero del presente año; el aumento del servicio de Guardacostas; el importe del arrendamiento de los terrenos de Triscornia, según escritura de 13 de noviembre de 1900; los gastos conforme á contratos de las Plantas de hielo y de luz eléctrica del Hospital No. 1, y de la Planta eléctrica establecida en el Cuartel de la Fuerza, los $91,027.56 que deben pagarse anualmente al Olero, conforme á las escrituras de 2 de octubre de 1901 y 11 de enero de 1902; la suma que se calcula necesaria para reintegros y devoluciones por el concepto de Rentas terrestres y marítimas, y la que se cree indispensable para satisfacer los censos reconocidos sobre propiedades del Estado.

Por Decreto de 7 de junio del presente año se pasó el servicio de Sanidad Marítima, que se había agregado por la Orden No. 133 á la Secretaría de Hacienda, á la de Gobernación, pues existiendo en este Departamento la Dirección general de Sanidad creada por el Gobierno Interventor, á la misma competía, por su especialidad, los asuntos de aquel ramo.

Por Decreto de 9 de junio último se suprimieron las Administraciones de Rentas é Impuestos de las Zonas Fiscales de Guanajay, Cárdenas, Cienfuegos y Manzanillo. Esta reforma representa para el Tesoro una economía de $39,800 al año. Dispuesta por la Orden No. 23 de la serie de este año la supresión de varios municipios de la Isla, quedó reducida la acción de algunas de esas zonas, y por consiguiente, disminuido el trabajo á ellas recomendado.

La de Cienfuegos sólo recaudó el año de 1901 el 4.321 por ciento del total de las rentas interiores de la Isla; la de Cárdenas 4.146 por ciento; la de Manzanillo el 1.379 por ciento y la de Guanajay el 1.349 por ciento.

La recaudación de esas zonas suprimidas, en comparación con el resto, fué la siguiente en el año de 1901:

	Recaudación.	Costo.
Guanajay	$9,060.56	9,060.00
Cárdenas	27,846.10	9,360.00
Cienfuegos	29,020.03	12,320.00
Manzanillo	11,688.11	9,060.00
Total	77,614.80	39,800.00

Resulta, pues, que el presupuesto de esas dependencias absorbía más del 50 por ciento de su recaudación.

El servicio de pagos no ha sufrido perjuicios con la supresión de dichas zonas, porque aquéllos continúan realizándose como antes por las Administraciones de las capitales de provincia, con excepción de la zona de Holguín.

Al crearse las zonas de Cienfuegos y Manzanillo, se les agregaron términos municipales pertenecientes á la provincia de Puerto Príncipe, alterándose la división provincial, quedando ésta restablecida, con la supresión de aquellas oficinas, como era justo y procedente, de conformidad con lo dispuesto en la Constitución.

Se ha dejado subsistente la zona de Holguín, por la gran distancia que la separa de la capital de la provincia, y su conservación facilita los servicios, sin quebranto del régimen provincial.

Por la Orden del Gobernador Militar No. 78, de 14 de junio de 1899, se dispuso la supresión de todas las Capitanías de Puerto de la Isla, encargando de las mismas á los Administradores de Aduanas, con independencia absoluta de la Habana, que se dejó subsistente con independencia absoluta de todo otro organismo administrativo.

Á poner término á esa excepción que ningún bien reportaba al servicio, antes al contrario, constituía un obstáculo para el mismo, por decreto de 29 del pasado mayo se suprimió también el cargo de Capitán del Puerto de esta Capital, pasando sus funciones al Administrador de la Aduana.

En el personal de las Oficinas Centrales ha sido preciso realizar algún aumento para atender á los nuevos servicios encomendados á las mismas.

En el Departamento de Instrucción Pública, ha sido necesario mantener el régimen actual, tanto en la enseñanza superior, como en la intermedia y primaria, porque la organización de la Universidad, la de los Institutos de Segunda Enseñanza, Academia de Pintura, Escuela de Artes y Oficios y Escuelas de Instrucción Primaria obedece á Planes de estudios establecidos por la legislación vigente y el Ejecutivo carece de facultades para hacer alteraciones en organismos creados por una ley y en las dotaciones asignadas por la misma á todos ellos.

El artículo 31 de la Constitución ordena que la enseñanza primaria sea obligatoria y que tanto ella como la de Artes y Oficios ha de ser gratuita, estando ambas á cargo del Estado mientras no puedan sostenerlas, respectivamente, por carecer de recursos suficientes, el Municipio y la Provincia. En consecuencia se mantienen las 3,474 escuelas, á las que asisten 163,348 alumnos de uno y otro sexo, consumiendo dicha enseñanza primaria la parte más importante del presupuesto del ramo. Claro está que si se suprimieran escuelas sería fácil reducir los gastos de la enseñanza primaria, pero esto sería una economía contraproducente para la cultura social del pueblo cubano, la cual exige que el Gobierno contribuya á fomentar la instrucción por todos los medios que estén á su alcance, como base de nuestra vida nacional.

En Obras Públicas el Gobierno ha tenido que aceptar los compromisos contraídos por el Gobierno Militar americano, que dejó en estudio y contratadas varias obras á cuya terminación hay que atender como también á la realización de las que demandan las necesidades de la Isla, entre ellas la construcción de algunos puentes y carreteras, las mejoras de los puertos y el servicio de los faros para facilitar el tráfico interior y exterior de la República y por consiguiente el movimiento mercantil.

En el presupuesto de este ramo se suprimen las partidas destinadas á ciertas atenciones de carácter municipal que han pasado á ser obligaciones de los respectivos Ayuntamientos, á los cuales el Estado auxilia con alguna subvención pecuniaria, habiéndoles cedido además todas las propiedades y utensilios con que se venían realizando los trabajos que corrían y aun corren parcialmente por cuenta del Tesoro Público.

Para los ramos de Agricultura, Industria y Comercio sólo se consignan los créditos necesarios para el sostenimiento de la Secretaría y la creación del Servicio Meteorológico y de cosechas, con más el pequeño crédito de 75,000 pesos para organizar una Estación Agronómica.

El Gobierno lamenta la pobreza de la dotación de este Departamento y espera que cuando se apruebe el empréstito que ahora discuten las Cámaras, se acuerde la organización de los servicios del mismo de modo que alcance la importancia que le corresponde y debe tener en un país esencialmente agrícola como el nuestro.

Cuanto pueda contribuir al mejoramiento y prosperidad de la riqueza agrícola será para el Ejecutivo objeto de preferente atención, y favorecerá dentro de sus facultades las iniciativas y propósitos de todos á fin de que su reconstrucción se realice con la mayor brevedad, llevándose á cabo las mejoras que exigen los actuales cultivos y dedicándose á la explotación de otros que ofrecen ventajas apreciables en distintos países y que pueden rendirlas en el nuestro á virtud de las condiciones excepcionales del suelo, en gran parte inexplotado aún.

La situación económica del país no es ciertamente satisfactoria, pero no hay motivos para abrigar dudas respecto á un próximo mejoramiento así que se concierte el tratado de reciprocidad con los Estados Unidos, y pueda darse salida en ventajosas condiciones á nuestros dos principales productos—el azúcar y el tabaco.

Según los datos estadísticos recopilados por la Secretaría de Hacienda, el movimiento comercial entre la República de Cuba y los países extranjeros durante el primer semestre de 1902, arroja un resultado inferior al obtenido en igual período de 1901. La disminución de las importaciones, equivalente á $1,700,000, representa un 5 por ciento de las del primer semestre de 1901. En las exportaciones la disminución es mayor de $12,200,000, ó sea el 28 por ciento de la de igual período de 1901.

Tan notable disminución obedece al bajo precio de los azúcares embarcados para el extranjero y á la menor venta de este fruto en espera de que las concesiones arancelarias para Cuba, que se gestionaban en los Estados Unidos, proporcionasen precios más favorables.

En el primer semestre de 1901 se exportaron 465,000 toneladas de azúcar quedando en almacenes 132,000.

En igual período de 1902 la exportación sólo ha llegado á 332,000 toneladas y la existencia en almacenes, el 30 de junio, era de 450,000 toneladas, cuyos datos permiten calcular la exportación total del año en unas 760,000 toneladas, deducido el consumo de la Isla; pero á pesar de esta mayor exportación probable en 1902, si las ventas se efectúan al precio medio de 3 reales arroba, su valor resultaría en

$2,000,000 menos que el año pasado. El movimiento general del comercio de Cuba en los tres años últimos es como sigue:

[Valor en miles de pesos.]

	Importación.	Exportación.	Balance a favor de la—	
			Importación.	Exportación.
1899.				
Primer semestre	35,911.8	31,600.6	4,311.2	....

Segundo semestre	34,089.3	23,559.6	10,529.7	....
Total	67,753.1	66,502.1	1,251	....
1902.				
Primer semestre	31,977.1	30,687	1,290.1	....
Total desde 1º de enero de 1899	245,113	199,574.2	45,538.8	....

Para la comparación de valores debe tenerse en cuenta el bajo precio de los azúcares que se exportaron, y la existencia por vender, la cual, felizmente, ha disminuido en los dos meses últimos al extremo de que, probablemente, será totalmente realizada en lo que resta del presente año.

La situación que atraviesa la industria azucarera no es exclusiva de Cuba, puesto que todos los países productores de azúcar de caña experimentan como ella los rigores de la competencia de la remolacha, que merced á procedimientos de elaboración muy adelantados y á la protección que se le presta con primas directas é indirectas, logra colocación en todos los mercados del mundo en condiciones ventajosas. Para nosotros ha sido esta competencia más sensible por las aflictivas circunstancias por que ha atravesado Cuba y por no haberse alcanzado aún la rebaja de los derechos arancelarios que se cobran á nuestros productos en los Estados Unidos; pero debemos tener fe en que tan pronto como se celebre el Tratado de reciprocidad con aquella Nación, cuyo Primer Magistrado viene realizando una activa campaña en pro de esa justa causa; con la supresión de las primas acordadas en la conferencia de Bruselas y la medida que adopte el Congreso para favorecer la Agricultura, la Industria y el Comercio, la reconstrucción de nuestra riqueza será completa dentro de pocos años.

Las condiciones de nuestro suelo y la energía de sus habitantes, demostradas en todas las circunstancias, son factores que coadyuvarán también al logro de esos patrióticos deseos.

Ya el Congreso ha demostrado la importancia que reconoce al fomento de la industria pecuaria dictando la Ley de 15 de septiembre, que concede franquicias arancelarias para la importación de algunas clases de ganado, como estímulo poderoso para que aquel ramo de nuestra riqueza llegue á su completo desarrollo.

Teniendo en cuenta las circunstancias expresadas en los párrafos anteriores los ingresos se han calculado con algunas reducciones, comparados con las recaudaciones de los tres últimos ejercicios económicos y el resultado del primer trimestre del actual.

Se dejan vigentes los mismos conceptos de tributación á que las rentas del Estado quedaron reducidas desde que por Decreto de 25 de marzo de 1899 se estableció la reforma del sistema tributario en esta Isla, pasando á los Ayuntamientos todas las contribuciones de carácter directo y algunas indirectas, reservándose sólo el Estado las rentas indirectas de Aduanas, Correos, Telégrafos y los Impuestos de Derechos Reales, las contribuciones de Bancos y Sociedades, la renta de sus bienes y propiedades y los derechos reconocidos sobre las mismas.

Al Congreso toca resolver, en su día, si los compromisos del Estado deben cubrirse, como sucede en la actualidad, sólo con los productos de los impuestos indirectos de cuantía indeterminada y sujetos á variaciones naturales por circunstancias imprevistas ó causas exteriores, ó si debe realizarse una transformación completa en el actual sistema rentístico del Estado Cubano, en virtud de las atribuciones que le confiere el inciso 8º del artículo 59 de la Constitución, para que á la vez las Provincias y los Ayuntamientos puedan hacer uso del derecho que les conceden los artículos 93 y 105 de la misma.

Se propone el restablecimiento del Impuesto de importación y fabricación de bebidas, creado por la Ley de Presupuestos del año de 1892 á 1893, el cual daba un rendimiento de $1,250,000 aproximadamente.

El impuesto sobre alcoholes constituye una de las bases de los Presupuestos de las principales Naciones europeas y el de los Estados Unidos; en Inglaterra rinde el 36 por ciento del total del Presupuesto de ingresos; en Francia el 19 por ciento; en Alemania el 18 por ciento y el 29 por ciento en los Estados Unidos. Ahora bien, aunque no es posible que en Cuba rinda en igual proporción por ser importada una gran parte de las bebidas espirituosas que se consumen entre nosotros, están sometidas al pago de derechos arancelarios y también porque tenemos que atender al fomento de nuestra industria local, puede asegurarse, sin embargo, que el rendimiento ha de ser de bastante importancia. En tal concepto debe someterse á la propuesta tributación los vinos y bebidas espirituosas y fermentadas, regulando al propio tiempo la contribución á las fábricas establecidas en el país, con excepción de las que existían en los ingenios, debiendo tributar todos al Estado en la cuantía que se propone y haciendo desaparecer de las Tarifas del Subsidio Industrial los epígrafes por los cuales dichas fábricas contribuyen á los Ayuntamientos, á fin de unificar la exacción de dichas contribuciones.

En virtud de la creación de los Consulados se exigirán los derechos correspondientes que según se calcula pueden producir aproximadamente 250,000 pesos al año.

El superávit que resulta de la comparación de los ingresos con los egresos, se encuentra justificado por la necesidad de atender á los nuevos gastos que originará el aumento del Cuerpo de Artillería, la dotación de los Juzgados Municipales y los intereses y amortización del empréstito pendiente de aprobación en las Cámaras, debiendo atribuirse á los últimos el carácter de permanentes, de acuerdo con lo prevenido en el inciso 2° del artículo 59 de la Constitución.

Terminaré consignando que el actual Proyecto ofrece el Presupuesto más reducido que ha tenido Cuba á partir de mediados del siglo pasado, con la circunstancia favorable de aplicarse ahora, también por primera ves, todos sus capítulos á necesidades y obligaciones que redundan en provecho suyo. Y puedo agregar que cuando el Congreso dicte las disposiciones que regulen y organicen cuanto se relacione con la Administración General, la Provincial y la Municipal y sea posible á las Provincias y á los Municipios sufragar sus atenciones especiales, el Presupuesto general del Estado se reducirá notablemente, puesto que más del 25 por ciento de su totalidad se destina hoy al pago de obligaciones provinciales y municipales.

Será entonces posible destinar anualmente importantes sumas á la reconstrucción del país y al fomento de sus intereses generales, y el desarrollo de los mismos consolidará la obra de nuestra independencia sobre los firmes cimientos del trabajo, la instrucción y la riqueza pública y privada.

Al proyecto se acompañan las bases de aquellas disposiciones que se consideran necesarias para la aplicación el ordenado funcionamiento del Presupuesto, entendiendo que en este caso el Ejecutivo sólo sugiere una serie de ideas ó principios de carácter general que el Congreso puede aceptar en parte ó en totalidad, como estime más conveniente para el servicio público y los intereses generales de nuestra República.

Respetuosamente,

T. Estrada Palma.

INFORME SANITARIO Y DEMOGRÁFICO DE LA HABANA EN SETIEMBRE DE 1902.

[Del "Nuevo País," Habana, Octobre 25 de 1902.]

El Informe sanitario y demográfico de esta ciudad, correspondiente al mes de setiembre, publicado por el Departamento de Sanidad, revela que la higiene continúa conquistando posiciones ventajosas en su lucha con las enfermedades y la muerte.

La cifra total de la mortalidad en setiembre ha sido de 404, que son 103 defunciones menos que en agosto. Esa cifra equivale á un promedio de 13.46 por día y á un tipo anual de 17.86 por mil habitantes.

Ha habido un descenso notable en las afecciones del sistema nervioso, enfermedades generales, aparatos respiratorio y digestivo y causas exteriores.

La fiebre tifoidea sólo ocasionó 6 víctimas, contra 13 en agosto. La mortalidad por fiebres palúdicas disminuyó en 29 por ciento, y los esfuerzos de la Liga contra la tuberculosis, dice el Informe que han producido resultados favorables.

La mortalidad general entre niños menores de 5 años se ha reducido en 24 por ciento, y sólo en la ocasionada por meningitis infantil ha descendido de 45 á 27, habiendo contribuido á este éxito ventajoso la acción eficaz de los dispensarios establecidos en el Obispado y en el Arsenal.

Dos casos de fiebre amarilla hubo en setiembre; los dos fueron importados de México y los enfermos se curaron en el Hospital "Las Ánimas."

En el resto de la Isla no se ha registrado ninguna invasión de esa enfermedad, ni de viruelas, ni de otra alguna de las que están sujetas á cuarentena, y esto puede servir de victoriosa respuesta á las maliciosas informaciones de ciertos corresponsales de periódicos americanos que, con evidente falsedad, han pretendido hacer creer á sus compatriotas del continente que el estado sanitario ha desmejorado desde que, por el establecimiento de la República, pasó á manos cubanas la dirección de ese importantísimo ramo de la Administración pública. La comparación de las estadísticas actuales con las anteriores al mes de junio, arroja un balance favorable á la capacidad cubana, calumniada en vano por aquellos despreocupados corresponsales.

Con referencia á la fiebre amarilla, complácese el Doctor FINLAY en hacer constar que, al finalizar setiembre, se ha completado un año desde la fecha del registro del último caso de fiebre amarilla originado en el término de la Habana: hecho sin precedente en las tres décadas anteriores. Si á esta observación se agrega que tampoco ha habido defunciones por esa enfermedad en ninguna otra población de la República, donde no se da caza á los mosquitos, podemos unir nuestras congratulaciones á las del apreciable Jefe de Sanidad por los efectos innegables, aunque no estemos de entero acuerdo con él en la determinación de las causas.

No corto espacio dedícase en el Informe al tétanos infantil y al muermo, "manchas que afean aún nuestras estadísticas de mortalidad." Para hacerlas desaparecer, se invoca el auxilio de las autoridades, de los profesores médicos y del público mismo, y anuncia el Doctor FINLAY que pronto se llevará á la práctica la distribución—gratuita para los pobres y á módico precio para los demás—de paquetes convenientemente cerrados, que contienen el material requerido para la cura aséptica del ombligo de los recién nacidos, acompañados de instrucciones impresas, detalladas y precisas, y de 1 litro de una solución al 1 por mil de bicloruro de mercurio; proyecto aprobado por la Escuela de Medicina de la Universidad.

Con respecto al muermo, á más de las medidas paliativas que se recomiendan, indícase en el Informe que se solicitará del Gobierno y del Ayuntamiento la realización de medios de carácter mucho más radical, como el de señalar un plazo para no permitir par más tiempo que se tengan en el interior de las casas caballos, carruajes y arneses, á menos que no sean en caballerizas y cocheras separadas con salida independiente á la calle.

Emitiremos opinión acerca de este proyecto cuando sean conocidas las reformas que se intente introducir en las Ordenanzas municipales.

De las 404 muertes ocurridas en setiembre, corresponden 300 á cubanos, 78 á españoles, 3 á americanos, 10 á chinos y el resto á otras nacionalidades. El tributo pagado por la raza de color á la muerte es de 55.

Murieron—por estado social—138 niños, 157 solteros, 72 casados y 37 viudos. El mayor número de defunciones debióse á la tuberculosis, fiebre tifoidea, paludismo y sarampión.

Contrajeron matrimonio 242 personas: de éstas, 157 cubanos blancos, 20 de color, 61 españoles, 1 americano, 2 ingleses y 1 francés.

Inscribiéronse 489 nacimientos: de ellos 329 blancos legítimos y 88 ilegítimos; 22 legítimos y 50 ilegítimos de color. La proporción de nacimientos de blancos es de 24.77 por mil y de color 11.83.

En el cementerio de Colón ó católico fueron sepultados 341 cadáveres; en el bautista 39; en el de los chinos 9; en Regla 11; en Arroyo Naranjo 2, y en el Calvario 2.

Entraron 705 inmigrantes, de los que 573 son varones y 132 hembras; 496 españoles y 94 españolas; 25 americanos y 14 americanas; 34 turcos, 14 mexicanos, 6 franceses, 3 colombianos, de ambos sexos; 10 italianos, 3 ingleses y los demás de otras nacionalidades.

De la comparación de nacimientos y defunciones resulta en septiembre un saldo de 85 á favor de la población.

En el hospital de dementes fallecieron 8 asilados, y quedaban el 30 de setiembre 1,047, de los que 596 son varones y 451 mujeres, 596 blancos, 28 chinos y 423 de color.

CHILE

CONCESIÓN DE UN FERROCARRIL AÉREO.

Con fecha 30 de agosto de 1902 el Congreso Nacional ha dado su aprobación al siguiente proyecto de ley:

"ARTÍCULO 1°. Concédese á Don ABELARDO PIZARRO, ó á quien sus derechos represente, permiso para construir y explotar, en la sección ubicada en territorio chileno, un ferrocarril aéreo que partirá del

Juncal y deberá terminar en el lugar denominado Paramillo de las Cuevas, en territorio argentino.

"ART. 2°. Concédese igualmente al Señor PIZARRO una subvención anual de cuarenta mil pesos ($40,000), oro de dieciocho peniques, por el término de quince años, en compensación de las siguientes obligaciones que contrae por su parte:

"1ª. Trasportará sin gravamen para el Fisco toda la correspondencia que entre ó salga del país por la vía de Uspallata y á los empléados públicos que viajen en comisión del servicio; y con una rebaja de 25 por ciento á los demás empleados.

"Mientras el ferrocarril trasandino no llegue al Juncal, el concesionario estará además obligado á trasportar la correspondencia desde el punto de término de dicho ferrocarril, sección chilena, hasta el Paramillo de las Cuevas.

"2ª. Las instalaciones ó postes del ferrocarril aéreo podrán ser aprovechados por el Gobierno en caso que deseara construir líneas telegráficas á través de la cordillera, mediante el pago de una tercera parte del valor en que la Dirección de Telégrafos avalúe la economía que resulte para el Estado del empleo de las instalaciones ó postes de la Empresa.

"Podrá también el Gobierno hacer uso de los terrenos que necesitare para el servicio de sus líneas.

"ART. 3°. La subvención comenzará á regir desde la fecha en que se inicie el tráfico en toda la extensión de la línea, desde el Juncal hasta Paramillo de las Cuevas.

"ART. 4°. Las tarifas de carga y pasajeros serán fijadas en oro de dieziocho peniques y aprobadas por el Presidente de la República.

"El valor de los pasajes de primera y segunda clase no podrán exceder de diez y cinco pesos por persona, respectivamente.

"El flete de carga no excederá de ocho pesos por tonelada, para mercadería valiosa, y de cuatro pesos para mercadería ó carga de poco valor.

"ART. 5°. La construcción de la línea deberá iniciarse dentro de los dieziocho meses siguientes á la fecha de esta ley, y estar terminada y entregada al servicio veintiséis meses después de la misma fecha.

"ART. 6°. El concesionario, ó quien sus derechos represente, perderá el derecho á esta concesión si no terminare los trabajos en el plazo indicado en el artículo que antecede.

"ART. 7°. En caso de interrumpirse el tráfico por más de quince días, la subvención se suspenderá por todo el tiempo que durare la interrupción.

"ART. 8°. El concesionario, ó quien sus derechos represente, constituirá domicilio en Chile, y todas las cuestiones á que dé lugar la ejecución ó cumplimiento del contrato, quedarán sometidas exclusivamente á los tribunales chilenos.

"Y por cuanto, oído el Consejo de Estado, he tenido á bien aprobarlo y sancionarlo; por tanto, promúlguese y llévese á efecto como ley de la República."

"Jermán Riesco.
"Ramón Barros Luco."

PRIMA Á LA PRODUCCIÓN DEL ÁCIDO SULFÚRICO.

El "Boletín de la Sociedad Nacional de Minería" de Santiago de Chile, dice en su número correspondiente al 31 de julio próximo pasado, que el Congreso Nacional ha dado ya su aprobación al siguiente proyecto, que se promulgará como ley dentro de pocos días:

"Artículo 1°. Se concede una prima de tres centavos por cada kilogramo de ácido sulfúrico de sesenta grados Beaumé que se produzca en al país, siempre que la cantidad que elabore cada fábrica no sea inferior á mil quinientas toneladas anuales.

"Art. 2°. Para gozar de esta prima, los interesados deberán iniciar los trabajos de instalación de su fábrica dentro del plazo de un año, contado desde el día en que se promulgue dicha ley.

"Art. 3°. Se autoriza al Presidente de la República para que invierta hasta la suma de cincuenta mil pesos anuales durante cinco años en pagar las primas que concede el Art. 1°.

"Art. 4°. Si la suma de cincuenta mil pesos fuere insuficiente para subvencionar el total que produzcan las diversas fábricas de ácido sulfúrico que se establecieren en el país, se hará el prorateo en relación con el producto de cada fábrica."

REPÚBLICA DOMINICANA.

DERECHOS DE IMPORTACIÓN.

Horacio Vásquez, General de División del Ejército y Presidente del Gobierno Provisional de la República.

Considerando: Que los derechos de importación con que están gravados en algunos países los productos de nuestra agricultura equivalen en ciertos casos á derechos prohibitivos, y que es de buena doctrina económica facilitar á dichos productos el acceso á esos países por medio de tratados de reciprocidad comercial, ya que no es posible el predominio absoluto del libre cambio;

Oído el parecer del Consejo de Secretarios de Estado, decreto:

Artículo 1°. Habrá cuatro clases de tarifas para el cobro de los derechos de importación en la República: la mínima, la moderada, la recargada y la máxima. Constituirán la mínima los derechos que están señalados en el arancel de importación vigente, ó los que se señalen en los que se establezcan en lo sucesivo; la moderada, esos mismos derechos con un treinta por ciento de aumento; la recargada, los expresados derechos con un setenta por ciento de aumento; y la máxima, esos mismos derechos más un ciento por ciento de aumento.

Art. 2°. Para los efectos de este decreto se fija en la República á la azúcar, café, cacao y tabaco el valor siguiente por cada cincuenta kilogramos de peso:

Á la azúcar de 94 á 98 grados de pureza, dos pesos oro americano.

Á la de 94 abajo y á la miel de caña, uno con cincuenta oro americano.

Al cacao, diez pesos oro americano.

Al café, doce pesos oro americano.

Al tabaco, diez pesos oro americano.

Art. 3°. Se aplicará la tarifa mínima, ó sean los derechos que señale el arancel, á todos los efectos de cualquier país en el que no esté gravada la introducción de uno cualquiera de los antedichos productos dominicanos con más de un veinte por ciento del valor que se señala en el artículo anterior, ó en donde sea libre la introducción de dichos productos.

Se aplicará la tarifa moderada, á todos aquellos que procedan de países en que se cobre á cualquiera de los expresados productos dominicanos de un veinte y uno á un treinta por ciento del valor arriba expresado.

Se aplicará la tarifa recargada á los que procedan de países en que se cobre á cualquiera de los indicados productos dominicanos de un treinta y uno á un cuarenta por ciento del valor arriba expresado.

Se aplicará la tarifa máxima, á los que procedan de países en que se cobre á cualquiera de los indicados productos dominicanos más de un cuarenta por ciento del valor expresado arriba, ó en donde esté prohibida su introducción.

Sección 1ª. Las colonias de una nación, así como las diversas entidades que constituyan una confederación ó Estado, se considerarán, para los efectos de este decreto, como se considere al Estado ó nación á que pertenezcan, aunque ellas por si no cobren derechos de importación á los productos dominicanos expresados en el artículo 2°, ó los cobren en menor proporción que el Estado ó nación que formen ó á que pertenezcan.

Sec. 2ª. Se considerarán como de cada país los productos que vengan de ese país á la República, á menos que se sepa con certeza que semejantes productos no son el resultado de la agricultura ó de la industria de ese país, ó que las marcas especiales que tengan los objetos ú otras indicaciones claras y precisas determinen el país de origen sin dudas de ninguna clase.

Art. 4°. El recargo de los derechos que deban pagar los objetos de los países en donde estén gravados con más de un veinte por ciento los productos dominicanos á que se refiere este decreto, se aplicará así:

Un diez por ciento de lo que le corresponda de aumento á los objetos entre la tarifa mínima y la que le sea aplicable según los casos, cuatro meses después de la promulgación de este decreto.

Un treinta por ciento, siete meses después de la dicha promulgación.

Un setenta por ciento diez meses después.

El total al año de promulgado este decreto.

ART. 5°. Con las naciones con quienes se celebren tratados de reciprocidad regirán las estipulaciones de esos tratados en vez de las prescripciones de este decreto.

ART. 6°. Queda á cargo del Ministerio de Hacienda dictar las disposiciones necesarias para la puntual ejecución de este decreto.

Dado en el Palacio Nacional de Santo Domingo, Capital de la República, á los 12 días del mes de Septiembre de 1902, año 59° de la Independencia y 40° de la Restauración.

HORACIO VÁSQUEZ.

Refrendado:

E. TEJERA,
Ministro de Hacienda y Comercio.

ECUADOR.

MENSAJE DEL PRESIDENTE RECOMENDANDO EL PROYECTO PARA LA CONSTRUCCION DE UN NUEVO FERROCARRIL.

Honorables Legisladores:

Informado de que en la Cámara de Diputados se ha presentado el respectivo Proyecto de Ley, referente á la construcción de un ferrocarril que una los cantones Sucre, Chone y Rocafuerte, me es grato recomendar á mi vez, de modo especial, á vuestra ilustrada atención, dicho proyecto que contribuirá indudablemente al bienestar y adelanto de la provincia de Manabí, cuya riqueza natural debe contar con las facilidades indispensables para el incremento de su producción agrícola y de su movimiento comercial. La obra del ferrocarril, tal como se propone, siendo un nuevo y poderoso estímulo para el trabajo, contribuirá además al restablecimiento completo de una tranquila y próspera administración local.

LEONIDAS PLAZA G.

Casa de Gobierno, en Quito, á 3 de setiembre de 1902.

ESTADOS UNIDOS.

COMERCIO CON LA AMÉRICA LATINA.

IMPORTACIONES Y EXPORTACIONES.

En la página 1394 aparece la última relación del comercio entre los Estados Unidos y la América latina, tomada de la compilación hecha por la Oficina de Estadística del Departamento de Hacienda de los Estados Unidos. Estos datos se refieren al valor del comercio arriba mencionado. La estadística corresponde al mes de setiembre de 1902, comparada con la del mes correspondiente del año anterior, y también comprende los datos referentes á los nueve meses que terminaron en setiembre de 1902, comparados con igual período de 1901. Debe explicarse que la estadística de las importaciones y exportaciones de las diversas aduanas referente á un mes cualquiera, no se recibe en el Departamento de Hacienda hasta el 20 del próximo mes, necesitándose algún tiempo para su compilación é impresión, de suerte que los datos estadísticos correspondientes al mes de setiembre, por ejemplo, no se publican sino en noviembre.

GUATEMALA.

DERECHO DE EXPORTACIÓN DEL CAFÉ.

Decreto de 4 de agosto de 1902 publicado en "El Guatemalteco" de 11 de agosto de 1902, nº 99.

Por el presente decreto se prorroga por un año más, que expirará el 30 de junio de 1903, la providencia contenida en el Decreto Gubernativo número 617, de 12 de agosto de 1901, á menos que sobrevengan motivos que aconsejen su modificación, debiéndose, en tal virtud, continuar percibiéndose por el fisco el impuesto de 6 pesos, moneda del país, por cada quintal de café en oro que se exporte de la República, cobrándose en proporción á este impuesto por el café en pergamino.

MÉXICO.

PRODUCCIÓN DE PLATA EN LOS OCHO PRIMEROS MESES DEL AÑO FISCAL DE 1901-2.

El "Boletín Fiscal" correspondiente á febrero del año en curso nos da á conocer la producción de plata en ese mes.

Hé aquí las cifras y su comparación con las correspondientes á febrero de 1901:

	Febrero de 1902.	Febrero de 1901.
Exportación:		
Mineral de plata en piedra, polvo ó tierra	$273,487.15	$1,169,400.16
Plata en pasta:		
En barras	703,049.43	332,368.27
En marquetas de plomo	2,003,235.00	2,073,978.00
Ligada con cobre	696,440.00	302,840.26
Plata en cianuros	3,357.96	5,719.89
Plata en sulfuros	248,801.51	101,812.54
Plata en grasas de fundición	17,723.00	9,583.00
Amonedación	2,134,500.00	1,416,000.00
Total	6,080,594.05	5,411,702.12

La producción de plata en los ocho primeros meses del año fiscal de 1901–2, fué como sigue:

Julio de 1901	$5,455,539.36
Agosto	6,024,316.65
Setiembre	5,320,079.14
Octubre	6,441,436.87
Noviembre	4,262,920.72
Diciembre	5,622,127.00
Enero de 1902	7,871,790.89
Febrero	6,080,594.05
Total	47,078,804.68
Contra: en igual período de 1900–1901	48,609,114.69
Diminución	1,530,310.01

PRODUCCIÓN DE ORO EN LOS OCHO PRIMEROS MESES DEL AÑO FISCAL DE 1901-2.

Las cifras relativas á exportación y amonedación de oro en el mes de febrero último, comparado con el de febrero de 1901, son como sigue:

	Febrero de 1902.	Febrero de 1901.
Exportación:		
Mineral de oro en piedra, polvo ó tierra	$39, 432. 33	$141, 834. 39
Oro en pasta	714, 962. 49	557, 391. 39
Oro en cianuros	5, 931. 22	13, 483. 73
Oro en sulfuros	5, 811. 70	1, 345. 15
Amonedación	72, 460. 00	44, 480. 00
Total	838, 597. 74	758, 534. 66

Producción de oro en los ocho primeros meses del año fiscal de 1901–2:

Julio de 1901	$690, 642. 78
Agosto	1, 083, 974. 14
Setiembre	587, 244. 37
Octubre	759, 583. 44
Noviembre	719, 718. 33
Diciembre	813, 388. 75
Enero de 1902	990, 602. 86
Febrero	838, 597. 74
Total	6, 483, 752. 41
Producción de oro en los ocho primeros meses de 1900–1901	6, 049, 660. 48
Aumento	434, 091. 93

NUEVO SERVICIO DE VAPORES ENTRE LOS PUERTOS DEL GOLFO, CUBA Y EUROPA.

El "Diario Oficial" del 9 de agosto pasado publica el texto del contrato celebrado por el Gobierno mexicano con la línea alemana de vapores denominada "Norddeutscher Lloyd" de Bremen.

Según los términos de este contrato la Compañía de vapores se compromete á transportar entre los puertos en que toquen sus vapores, libre de gastos, para el Gobierno de México, toda la correspondencia, impresos, paquetes, bultos postales y valores transmisibles por correo. Los vapores de la línea harán por lo menos un viaje al mes, tocando por tanto una vez al mes en los puertos de Veracruz, Tampico y un tercer puerto mexicano entre los expresados antes, á opción de la Compañía.

En compensación del servicio postal y del servicio de transporte libre, los vapores de la línea quedan exentos del pago del 40 por ciento del derecho de toneladas creado por el decreto de 1° de julio de 1898.

Los vapores de la línea podrán hacer el tráfico de cabotaje con arreglo á las condiciones establecidas por el artículo 293 de la Ordenanza de Aduanas vigente, y á todas las disposiciones que se dicten en lo sucesivo sobre la materia.

Se permitirá á la Compañía tener en todos los puertos en donde toquen sus vapores, las lanchas, botes y remolcadores de vapor, que sean necesarios para su buen servicio, los que disfrutarán de todas las franquicias que otorga el contrato.

El contrato durará tres años y se entenderá prorrogado por igual período de tiempo si no se denuncia por alguno de los contratantes en los seis meses anteriores á su terminación.

LA EXPLOTACIÓN DE AZUFRE.

El "Progreso de México" dice que el consumo anual de azufre en esa República pasa de un millón de kilogramos, y la mitad de esta cantidad es importada, no obstante que en varias partes del país hay inmensos depósitos de dicha substancia, inexplotados, simplemente porque nadie ha visto en ellos la riqueza que representan.

Los 500,000 kilogramos producidos son explotados en pequeña escala en distintos lugares del país; pero en ninguna parte se ha hecho inversión formal de capital en este negocio. La demanda de azufre aumenta en México y en los Estados Unidos, y los depósitos de este mineral existentes en los Estados de Chiapas, San Luis Potosí y Durango son ilimitados, sin mencionar los depósitos que aumentan constantemente en el cráter del Popocatepelt. Los depósitos de Mapimí y Cerritos, en el Estado de Durango, pueden ellos sólo proporcionar millones de toneladas de azufre.

SERVICIO DE NAVEGACIÓN EN EL GOLFO DE CALIFORNIA Y EL MAR PACÍFICO.

El "Diario Oficial" ha publicado el texto de un contrato celebrado entre la Secretaría de comunicaciones y el Señor A. E. STILWELL, para el establecimiento de un servicio de navegación costera entre los puertos mexicanos del Golfo de California y del Oceano Pacífico, tales como Guaymas, Topolobampo, La Paz, Mazatlán, San Blas, Manzanillo, Acapulco, Puerto Ángel, Salina Cruz, Tonalá, San Benito y demás lugares intermedios. Podrá establecer igualmente el referido concesionario uno ó varios servicios de navegación de altura entre cualquiera de los expresados puertos mexicanos y uno ó varios puertos de los Estados Unidos del Norte, de la América del Sud ó de las costas é islas del continente de Asia, que son generalmente conocidas bajo la denominación de Oriente. Dentro de un plazo de tres meses quedará establecido, cuando menos un servicio entre Guaymas y Topolobampo, haciéndose, cuando menos, cien viajes redondos al año. Dentro de seis meses se establecerá el servicio de altura entre puertos mexicanos y extranjeros.

NICARAGUA.

DERECHOS DE IMPORTACIÓN DE VINOS.

Ley de 5 de octubre de 1901.

Artículo 1. Deróganse los decretos de 31 de julio de 1900 y 8 de enero de 1901, que reglamentan, con el recargo del 20 por ciento, la introducción de vinos legítimos de uva. En consecuencia, todo vino, cualquiera que sea su calidad, estará sujeto solamente á los gravámenes que expresan los aranceles vigentes.

Art. 2. Suprímese la fracción 1238 de los aranceles vigentes, que grava el champagne con 60 centavos el kilo.

La fracción 1244 se leerá así: "Vinos espumosos de cualquier clase, inclusive el champaña, ya sean generosos ó secos, con tal que no pasen de 20 grados, embotellados, 60 centavos el kilo. Si pasaren de esta riqueza, pagarán 2½ centavos por grado en cada kilo de peso bruto."

Art. 3. Esta ley regirá desde su publicación y es adicional á los aranceles aduaneros.

SALVADOR.

CAMBIOS EN EL ARANCEL DE ADUANAS.

Acuerdo de 9 de junio de 1902, por el cual se concede franquicia de derechos á los artículos que se expresan.

["Diario Oficial" de 10 de junio de 1902, No. 136.]

Por el presente acuerdo se declara libre de derechos é impuestos la introducción de los siguientes:

Lámparas completas para alumbrado de alcohol;

Cocinas, hornillos y estufas para diversos usos domésticos é industriales;

Automóviles;

Lanchas y botes;

Motores para toda clase de maquinaria, y en general, todos aquellos objetos no denominados en que el alcohol sea usado como combustible ó fuerza motriz.

Esta disposición entrará en vigor desde esta fecha y regirá hasta el 1° de marzo del año próximo.

IMPORTACIÓN DURANTE EL PRIMER SEMESTRE DE 1902.

MUSEO CIENTÍFICO AGRÍCOLA É INDUSTRIAL DEL SALVADOR.

El "Diario Oficial" de septiembre 12 de 1902, pública un decreto que crea y reglamenta el Museo Científico Agrícola é Industrial. El nuevo instituto estará divido en seis partes ó secciones, del modo siguiente:

"1ª. *Objetos de historia natural, arqueología y numismática.*—Aquí estarán comprendidos algunos ejemplares sobresalientes de la fauna y de la flora del país, grandes trozos de rocas mineralógicas, restos de la arquitectura y escultura precolombinas, modelos de la cerámica y armas aborígenes, colecciones de monedas y medallas, etc.

"2ª. *Productos agrícolas nacionales.*—Siendo El Salvador un país esencialmente dedicado á la agricultura, como que casi no posee una hectárea de terreno baldío, esta sección, de las más importantes, estará enriquecida con todas las muestras de sus artículos de cultivo, entre los que sobresalen el caucho, cacao, café, añil, bálsamo, tabaco y toda la variedad de los cereales y las semillas de las frutas.

"3ª. *Productos industriales, nacionales y extranjeros.*—Aquí se verán todas las extracciones que se hacen de la caña de azúcar, desde el mascabado hasta la panela; los licores que se fabrican en el país; el tabaco en rama; las muestras de cigarros puros y cigarrillos; los tejidos de algodón y de seda, y todos los artefactos y productos manufactureros, en los que se vincula una parte del tráfico comercial.

"4ª. *Productos naturales.*—Será una exhibición de los productos del subsuelo y de los bosques, conteniendo muestras de carbón de piedra, diversas brozas minerales, plantas y raíces medicinales é industriales, fibras textiles, maderas de construcción y ebanistería, etc.

"5ª. *Objetos y documentos de historia patria, antigua y moderna.*—Esta sección es probable que contenga la iconografía de los hombres públicos más notables de El Salvador; armas y objetos de recuerdo histórico; libros, folletos y periódicos que arrojen luz sobre los acontecimientos políticos de la nación.

"6ª. *Arboles y plantas vivos, industriales y de ornato* (*Jardín Botánico*).—Esta parte está debidamente explicada en el artículo 13 del Reglamento del Museo. Dice así: 'En el lugar reservado al cultivo de las plantas, se destinará una porción de tierra para multiplicar las especies útiles y árboles de larga vida, como los balsameros, árboles de goma y resina, de aceite, de canela, quina, henequén, ramié, yute, alcanfor, gutapercha, coca y otros que pueden producirse en el país, para repartirlos entre los agricultores en el tiempo oportuno de las siembras. También dará la Dirección toda clase de datos sobre estos cultivos, y el modo de propagarlos.'"

CUADRO GENERAL DE CAJAS FISCALES.

URUGUAY.

TRATADO DE ARBITRAJE CON ESPAÑA.

El Senado y Cámara de Representantes de la República del Uruguay han dado su aprobación al tratado de arbitraje con España, firmado el 28 de enero de 1902.

La parte esencial del tratado dice así:

"ARTÍCULO 1°. Las altas partes contratantes se obligan á someter á juicio arbitral todas las controversias de cualquiera naturaleza, que por cualquiera causa surgieren entre ellas, en cuanto no afecten á los preceptos de la Constitución de uno ú otro país y siempre que no puedan ser resueltas por negociaciones directas.

"ART. 2°. No pueden renovarse, en virtud de este convenio, las cuestiones que hayan sido objeto de arreglos definitivos entre ambas altas partes. En tal caso, el arbitraje se limitará exclusivamente á las cuestiones que se susciten sobre validez, interpretación y cumplimiento de dichos arreglos.

"ART. 3°. Para la decisión de las cuestiones que en cumplimiento de este convenio se sometieren á arbitraje, las funciones de árbitros serán encomendadas con preferencia á un jefe de Estado de una de las Repúblicas hispano-americanos ó á un un tribunal formado por jueces y peritos españoles, uruguayos ó hispano-americanos.

"En caso de no recaer acuerdo sobre la designación de árbitros, las altas partes signatarias se someterán al Tribunal Internacional Permanente de Arbitraje, establecido conforme á las resoluciones de la Conferencia de La Haya de 1899, sujetándose en éste y en el anterior caso á los procedimientos arbitrales especificados en el Capítulo III de dichas resoluciones.

"ART. 4°. El presente convenio permanecerá en vigencia durante diez años contados desde la fecha del canje de sus ratificaciones.

"En caso de que, doce meses antes de cumplirse dicho término, ninguna de las altas partes contratantes hubiere declarado su intención de hacer cesar los efectos del presente convenio, continuará éste siendo obligatorio hasta un año después de que una ú otra de las altas partes signatarias lo hubiere denunciado.

"ART. 5°. Este convenio será sometido por los infrascritos á la aprobación de sus respectivos Gobiernos, y si mereciese su aprobación y fuese ratificado según las leyes de uno y otro país, se canjearán las ratificaciones en la ciudad de Montevideo, en el término de un año contado desde la fecha."

CAMBIO EN EL ARANCEL DE ADUANAS.

Régimen aduanero aplicable á la cal hidráulica.

[Circular de la Dirección General de Aduanas de 16 de julio de 1902.]

Por la presente circular la cal hidráulica se asimila para el despacho á la "tierra romana" y al "portland" por no estar expresamente determinada ni en la ley ni en la tarifa de aduana vigentes. En consecuencia, se afora á 1 peso con 60 centésimos por cada 100 kilogramos y paga el derecho de 20 por ciento, más 5 por ciento de adicional y 3 por ciento de patente adicional.

ESTADÍSTICA VITÍCOLA.

[De los Anales del Departamento de Ganadería y Agricultura de Montevideo.]

Actualmente se encuentran en el país 1,029 viñedos, que ocupan una extensión superficial de 4,149 hectáreas, dando ocupación á numerosas familias y á 1,935 individuos que se dedican á la conservación y fomento de los importantes establecimientos donde aquéllos tienen su asiento.

Densidad media de plantas por hectárea.

Total	16, 512, 651	4, 149	20	3, 979

De la observación del estado precedente se desprende que la densidad media de los cultivos por hectárea es variable, aun cuando las conclusiones generales den á sus densidades uniformidades bastante relativas, y, si en algunos Departamentos la cantidad de cepas que se cultivan por hectárea difieren en sus resultados numéricos, debemos atribuirlo á causas diversas y fáciles de precisar por otra parte.

Cuadro sinóptico de la producción media de uva por hectárea y por pie.

El cuadro sinóptico que precede presenta al más ligero examen notables contrastes, y los promedios de la producción, con relación á las hectáreas y cepas en cultivo, ofrecen diferencias que resultarían inaceptables, si ellas no estuvieran plenamente confirmadas por las observaciones que en el terreno han recogido los agentes designados para la realización de este censo y robustecidas por las informaciones que los inspectores de la Sección de Agricultura han recogido en las zonas exploradas.

El total de la vendimia en la última cosecha es de 13,612,449 kilogramos de uva, obtenidos de 13,525,143 cepas en plena producción, de lo que se desprende un promedio mayor de 1 kilogramo por pie.

La uva elaborada es de 10,939,163 kilogramos, que entregados á la fermentación produjeron 7,039,498 litros de vinos de diversos tipos y calidades.

VENEZUELA.

FÁBRICA DE OBJETOS DE CRISTAL, VIDRIO, PORCELANA, Y LOZA.

El Ministro de Fomento de los Estados Unidos de Venezuela, en representación del Ejecutivo Federal, por una parte, y por la otra el ciudadano ELIODORO GONZÁLEZ P., vecino de esta capital, en su carácter de apoderado del ciudadano Dr. ELÍAS MARTÍNEZ ORAMAS, residente en Marsella, según poder otorgado en París el 11 de julio del corriente año, han convenido en celebrar el siguiente contrato:

ARTÍCULO 1°. El contratista se obliga á establecer en el Disrito Federal ó en otros puntos del territorio de la República de Venezuela, en terrenos apropiados al efecto, una ó más fábricas para la manufactura de los objetos de cristal, de vidrio, de porcelana y de loza que requiera el consumo general del país. Las fábricas estarán establecidas y funcionarán dentro de los dos años siguientes á la fecha en que este contrato sea aprobado por el Congreso Nacional, salvo impedimentos causados por fuerza mayor, ó caso fortuito, legalmente comprobados ante el Ejecutivo Federal.

ART. 2°. Como protección especial á esta industria, completamente nueva en Venezuela, el Ejecutivo Federal concede al contratista lo siguiente: privilegio exclusivo para ejercer dicha industria en el Estado, Territorio ó Distrito Federal en que instale una fábrica, durante los diez primeros años de la duración de este contrato; derecho para hacer uso gratis, mientras esté vigente este contrato, de las materias primas que se encuentren en terrenos baldíos de la propiedad de la nación; la importación libre de todo impuesto, por una sola vez y para cada una de las fábricas que establezca el contratista, de las máquinas, aparatos instrumentos, edificios, materiales, enseres y útiles destinados á la instalación y explotación de sus fábricas, debiendo llenar, para el efecto, en cada importación, los requisitos legales; y exoneración de todo impuesto y contribución nacionales, creados ó que se crearen, para esta empresa, sus dependencias, anexidades y productos, mientras este contrato esté vigente.

Art. 3°. Este contrato durará quince (15) años, contados desde la fecha de su aprobación por el Congreso Nacional; y mientras él esté vigente, el Ejecutivo Federal no otorgará ninguna concesión que perjudique los derechos que el contratista adquiere.

Art. 4°. Las dudas y controversias que puedan suscitarse sobre la inteligencia y ejecución de este contrato serán resueltas amistosamente entre las partes contratantes; pero en el caso de no poder avenirse, ellas declaran someterse en todo á lo dispuesto en el artículo 139 de la Constitución Federal vigente, sin que puedan ser en ningún caso motivo de reclamaciones internacionales.

Art. 5°. El contratista podrá traspasar, en todo ó en parte, los derechos que adquiere por este contrato, con consentimiento previo del Ejecutivo Federal; y en ningún caso podrá hacerlo á Gobierno extranjero.

Hechos y firmados dos ejemplares de un mismo tenor y á un sólo efecto, en Caracas, á diez y nueve de agosto de mil novecientos dos. Año 92°. de la Independencia y 44°. de la Federación.

Arnaldo Morales.
E. González P.

CAPITAL FRANCÉS EN EL MUNDO.

El "Journal Officiel" de París publica el resumen de los informes de los agentes diplomáticos y consulares franceses en respuesta á los cuestionarios que les había dirigido el Ministerio de Negocios Extranjeros, para conocer la suma de capitales franceses colocados en el extranjero.

Del resumen resulta, que el país donde los franceses tienen empleada mayor cantidad de dinero es, después de Rusia, España; y que después de Inglaterra, Bélgica, los Estados Unidos y Alemania, España es el país con el cual Francia hace mayores cambios.

En 1900 España ha enviado á Francia mercancías por valor de 200,000,000 de francos, y Francia ha enviado á España mercancías por valor de 135,000,000.

Existen en España numerosas casas de comercio francesas; 60 y pico en Cataluña; otras tantas en Valencia; más de 200 en Madrid. Los capitales que dichas casas de comercio tienen empleados en España suman 54,000,000 de francos.

La propiedad inmueble francesa en España se calcula en 74,000,000 de francos.

Aunque faltan datos para evaluar exactamente las utilidades que producen dichos capitales, se calcula el interés de las empresas mercantiles en un 10 por ciento anual, y el de las fincas en un 5 por ciento.

Existen además tres casas de banca francesas en Madrid, una en Vizcaya y una en Valencia; en todo el reino tiene numerosas sucursales el Crédit Lyonnais.

Sumando á los capitales de los bancos franceses de España el dinero de ciudadanos franceses que se halla depositado en bancos españoles, particularmente en Barcelona, y los créditos franceses abiertos á diversas empresas españolas, se alcanza una suma total de 31,000,000 de francos.

Los capitales franceses empleados en empresas de navegación fluvial y marítima, en construcción de docks y muelles en España, se elevan á 46,000,000 de francos, su mayoría en los puertos de Bilbao, Santander y Pasajes.

Las acciones y obligaciones de los ferrocarriles españoles están en mayoría en manos de tenedores franceses, sumando un total de 1,672,000,000 de francos.

Los capitales franceses interesados en minas españolas ascienden á 71,000,000 de francos, figurando la circunscripción de Madrid con 24,000,000.

Las empresas industriales francesas en España representan un capital de 173,000,000 de francos, dando un rendimiento medio de 10 por ciento.

El dinero francés colocado en fondos españoles es el siguiente: 40,000,000 de francos en obligaciones de la villa de Madrid, 650,000,000 de exterior estampillado, 150,000,000 en Cubas.

Si se suman todas las partidas precedentes, el total de los capitales franceses empleados en España, asciende a 2,974,000,000 de francos.

Los capitales franceses empleados en los otros Estados de Europa alcanzan las siguientes cifras: 6,966,000,000 de francos en Rusia, 2,850,000,000 en Austria, 1,818,000,000 en Turquía, 1,430,000,000 en Italia, 1,000,000,000 en Inglaterra, 900,000,000 en Portugal, 600,000,000 en Bélgica, 455,000,000 in Suiza, 200,000,000 en Holanda, 158,000,000 en el Principado de Monaco, 85,000,000 en Alemania, etc., hasta un total de 21,012,000,000 de francos, en Europa solamente.

Dal resumen se deduce que el total de los capitales franceses empleados, fuera de Francia, en el mundo entero, asciende á 29,855,000,000 de francos.

PRODUCCIÓN DE AZÚCAR DE CAÑA EN LA PENÍNSULA ESPAÑOLA.

Terminada la zafra de este año, la Dirección General de Aduanas ha publicado los datos de producción del azúcar de caña que pueden considerarse ya como definitivos.

Veintiuna fábricas y diez trapiches han intervenido en la molienda de este año, y han entrado en ellas 226,328,500 kilogramos de caña, que han producido 15,046,947 kilogramos de azúcar envasado.

En 1901 la caña molida llegó á 294,984,766 kilogramos, que produjeron 25,744,471 kilogramos de azúcar.

Existe, pues, contra la zafra actual una diferencia total de 68,656,260 kilogramos de caña menos y 10,697,524 kilogramos de azúcar menos que en el año anterior.

BOLETIM MENSAL

DA

SECRETARIA INTERNACIONAL DAS REPUBLICAS AMERICANAS,

União Internacional das Republicas Americanas.

VOL. XIII. NOVEMBRO DE 1902. No. 5.

CONGRESSO ADUANEIRO.

Por determinação do Conselho Directivo da Secretaria Internacional das Republicas Americanas, tomada em cumprimento da obrigação que se lhe impoz no paragrapho segundo da primeira resolução adoptada pela Segunda Conferencia Pan-Americana do Mexico o 22 de Janeiro do corrente anno de 1902, relativamente á celebração de um Congresso Aduaneiro, foi fixado o dia 15 de Janeiro de 1903 para que tenha lugar na cidade de Nova York, no local que se escolherá para este fim, a primeira reunião daquella importante Assemblea.

O texto da resolução da Conferencia respeito a este Congresso foi publicado no numero do BOLETIM correspondente ao mez de Abril deste anno, pagina 986 da secção em hespanhol, e 871 e 1075 das secções em inglez e portuguez respectivamente. Alli se verão explicados, em detalhe, os objectos e propositos da reunião, e a natureza e escopo dos trabalhos que se têm de levar a cabo.

O programma que em geral foi formulado para levar a effeito esta obra é o seguinte:

O Honrado Senhor Secretario da Fazenda abrirá as sessões, pronunciando o discurso de inauguração.

Depois de constituida a Mesa, o Congresso nomeará as commissões que estimar opportunas, e procederá ao estudo dos assumptos sobre que hão de versar as resoluções.

Á data em que isto se escreve, significaram sua intenção de estarem representadas no Congresso as nações seguintes: Bolivia, Equador, Estados Unidos de America, Guatemala, Honduras, Mexico, O Salvador e Venezuela.

O Governo dos Estados Unidos de America nomeou como seus Delegados os Senhores O. L. SPAULDING, subsecretario da Fazenda; ISRAEL FISCHER, Avaliador Geral dos Estados Unidos; GEORGE W. WHITEHEAD, Avaliador de Mercadorias em Nova York; E. T. CHAMBERLAIN, Commissario de Navegação; e JOSEPH J. COUCH, Subadministrador especial da Alfandega de Nova York.

Os Delegados nomeados pelas demais nações são até agora os Senhores seguintes:—

Por Equador, o Senhor LUIS FELIPE CARBO;

Por Guatemala, o Senhor ANTONIO LAZO ARRIAGA;

Por Honduras, o Senhor NICANOR BOLET PERAZA;

Pelo Mexico, os Senhores PEDRO M. DEL PASO E JAVIER ARRANGOIZ.

Pelo Salvador, o Senhor ERNESTO SCHERNIKOW;

Por Venezuela, o Senhor AUGUSTO PULIDO.

O Honrado Senhor CHAMBERLAIN, Delegado dos Estados Unidos de America, preparou o seguinte projecto de organização, de que se remetteu copia aos differentes governos, e que, si merece ser approvado, servirá de base aos trabalhos.

ORGANIZAÇÃO DAS COMMISSÕES.

1. Propõe-se que o trabalho do Congresso se distribua em quatro divisões, a saber:

Divisão I.—Navios.

Divisão II.—Mercadorias.

Divisão III.—Nomenclatura.

Divisão IV.—Congressos futuros e organização permanente.

2. Propõe-se que cada Divisão esteja ao cargo de uma Commissão que se nomeará o primeiro dia de reunido o Congresso. Pede-se, pois, a cada Republica, que indique ao Conselho Directivo da Secretaria Internacional das Republicas Americanas, antes de que se reuna o Congresso, sua representação em alguma ou todas as Commissões.

3. Recommenda-se á representação de cada Republica em uma Commissão, que esteja preparada a supprir, para o uso da Commissão, as leis, regulamentos e modelos de documentos de alfandega do paiz que representa, relativos ao trabalho da Commissão respectiva. É de desejar-se que os representantes de cada Republica em uma Commissão preparem, com antecipação á reunião do projectado Congresso, uma relação da practica vigente no paiz que representam, no tocante aos assumptos assignados á Commissão de que hão de formar parte.

4. As proposições que apresentem os delegados serão remettidas sem discussão á Commissão respectiva para que dê parecer, a menos que o Congresso ordene o contrario.

5. As Commissões terão ao seu cargo a consideração preliminar respectiva das seguintes materias:

DIVISÃO I.—NAVIOS.

(*a*) O exigido no manifesto de um navio procedente de um porto estrangeiro ou que sai para o exterior.

(*b*) O exigido quanto á entrada de um navio que chega de um porto estrangeiro, e ao despacho de um navio para semelhante porto.

(*c*) O exigido, depois de haver entrado um navio, respeito a sua descarga, e regulamentos que haja para poder fazel-a durante a noite.

(*d*) Limitação de tempo imposta para descarregar.

(*e*) As condições em que pode seguir um navio estrangeiro de um porto a outro em cada paiz, para descarregar e carregar mercadorias e embarcar ou desembarcar passageiros.

(*f*) Descripção dos impostos e direitos a que estão sujeitos navios mercantes, por auctoridade de lei nacional.

(*g*) Methodo de arquear os navios para saber seu porte grosso e liquido.

(*h*) Vantagens e desvantagens do porte grosso e liquido, respectivamente, como base para cobrar impostos.

DIVISÃO II.—MERCADORIAS.

(*a*) As condições em que as mercadorias de um paiz estrangeiro podem chegar á jurisdicção do administrador da Alfandega e os methodos que este emprega ao fazer-se cargo dellas.

(*b*) O exegido, respeito á introducção dessas mercadorias na Alfandega, dos consignatarios dellas no tocante a conhecimentos, facturas e varias formas de declarâçao de importação e de transito.

(*c*) Os procedimentos subsequentes á declaração, quanto á avaliação, classificação e liquidação final dos direitos.

(*d*) Despacho das mercadorias e modo de dispôr das declaradas para ser armazenadas, inclusive a applicação pratica do systema geral de deposito e armazenagem.

(*e*) Procedimento para dispôr de mercadorias não reclamadas ou abandonadas.

(*f*) Methodos para dar-se conta da totalidade das mercadorias importadas, em pacotas ou grandes bultos.

(*g*) As condições e disposições relativas á devolução dos directos pagos ao exportar-se a mercadoria, já nas condições em que foi importada, já como material para ser usado em manufacturas subsequentes.

DIVISÃO III.—NOMENCLATURA.

1. Base de nomenclatura commum que ha de ser adoptada nos documentos officiaes, a saber: Manifestos, facturas, etc., exigidos no commercio entre as Republicas Americanas.

(*a*) Vantagens ou desvantagens da adopção commum da nomenclatura do systema metrico de pesos e medidas.

(*b*) Vantagens ou desvantagens da adopção commum dos equivalentes inglezes dos termos commerciaes geraes, excepto os que estão comprehendidos na nomenclatura do systema metrico.

(*c*) Meios adequados de estabelecer uma nomenclatura commum que se recommende.

DIVISÃO IV.—CONGRESSOS FUTUROS E ORGANIZAÇÃO PERMANENTE.

1. Organização de uma commissão permanente de alfandegas.
2. Conveniencia de fixar periodos definitivos para a reunião dos futuros congressos aduaneiros.

REPUBLICA ARGENTINA.

DADOS RELATIVOS Á CAPITAL.

O "Anuario Estadístico Municipal" correspondente a 1901, publicado pela municipalidade de Buenos Aires, contem os seguintes dados:

O numero dos carneiros e cordeiros que se consumiram na capital da Republica durante o anno de 1901, foi de 25,000 menos que em 1900, ao passo que houve um augmento de 2,733 no numero das vaccas e novilhos consumidos durante o mesmo periodo. Estimando em 174 kilogrammas o peso médio da parte utilizavel para o consumo, de uma vacca, novilha, vitella, etc.; o dos carneiros e cordeiros em 12 kilogrammas, e o dos porcos em 150, se encontra um total de 138,828,606 kilogrammas de carne, consumidos em um anno por 850,000 habitantes, ou seja um consumo médio por anno de 163 kilogrammas por habitante.

A farinha de trigo consumida pela população pesou 46,271,675 kilogrammas, ou 1,748,063 kilogrammas mais que em 1900. A proporção por habitante é de 54 kilogrammas para todo o anno.

Existem em Buenos Aires onze linhas de tramways, das quaes oito são com tracção animal e tres com tracção electrica, com uma extensão de 450 kilometros. Estas linhas, com 895 coches em serviço diariamente, transportaram em 1901, 125,525,224 passageiros. Todo este extraordinario movimento deu um producto bruto de quasi 3 milhões de pesos ou seja mais de 6 milhões de francos. No anno de 1900, as mesmas linhas transportaram 122,886,803 passageiros. O augmento, pois, foi de só 2,638,421 passageiros em um anno, ou seja um 2 por cento.

As estradas de ferro que têm seu ponto de arranque de Buenos Aires transportaram em 1901, dentro das estações do municipio, 12,578,976 passageiros, contra 11,347,861 passageiros no anno anterior.

Durante o mesmo anno, 3,045 propriedades, com uma superficie de 5,173,228 metros quadrados, foram hypothecadas, por um valor de 29,943,000 pesos papel. Este algarismo é em 1,273,000 pesos inferior ao de 1900.

As operações effectuadas na Bolsa de Commercio durante o anno de 1901 subiram a 1,003 milhões de pesos papel, das quaes 934 milhões foram sobre metallico (401 milhões de pesos ouro), 15 milhões sobre titulos hypothecarios, 33 milhões sobre fundos e titulos publicos, 17 milhões sobre acções e obrigações de outras sociedades e 2 milhões sobre Bancos.

Si se comparam as operações de 1901 com as de 1900, se encontra que as primeiras excederam ás segundas em 168,727,840 pesos papel. Este augmento foi produzido quasi exclusivamente pelas transacções sobre o ouro.

A instrucção primaria está em Buenos Aires a cargo de um Conselho Nacional de Instrucção, o qual goza, pela lei, de uma relativa autonomia e conta com rendas proprias.

Os alumnos matriculados nos diversos cursos, em 1901, chegavam a 69,958.

A instrucção secundaria se dá no Collegio Nacional, de accordo com os programmas approvados pelo Governo geral, e o numero dos matriculados, no anno em referencia, sommava 1,718.

Existem tambem diversos institutos nos quaes se dá instrucção normal e commercial. Nestes foram matriculados em 1901, 2,713 alumnos.

A instrucção superior, que tambem está a cargo do Governo geral, é dirigida por quatro faculdades, a saber: De direito e sciencias sociaes, de medicina, de sciencias exactas e de philosophia e lettras.

A primeira teve 1,098 matriculados; a segunda, 1,795; a terceira, 264, e a quarta, 55.

O serviço publico de illuminação da cidade se faz em parte pela autoridade municipal e em parte por emprezas particulares, as quaes recebem daquella uma remuneração.

Em todas as ruas do municipio se encendem, pela média, 13,028 lampeões a gaz, fora de 1,896 lampadas electricas de diversa potencia, distribuidas em differentes barrios do municipio e de 382 collocadas no porto.

Alem do gaz e da luz electrica, a municipalidade teve encendidos 8,540 lampeões de kerozene. Pelo serviço de illuminação a gaz e a kerozene, a municipalidade pagou em 1901, 1,284,169 pesos. Si a este se aggrega 1,664,442 pesos pagos ás companhias que fazem o serviço de illuminação electrica publica, se tem uma somma total de 2,948,611 pesos.

CONSTRUCÇÃO DE ELEVADORES PARA GRÃOS.

As companhias das estradas de ferro Buenos Aires e Rosario e a Argentina Central já começaram a construcção de seus elevadores para grãos que estão situados no lado de leste do cáes n. 2 do porto do Buenos Aires. As excavações no fundo onde se devem assentar os massiços de concreto já foram feitas, sendo actualmente empregados neste trabalho cerca de 500 trabalhadores.

Um dos elevadores que se vão construir terá 240 metros de comprimento e 15 metros de largura e estará situado á distancia de 47 metros do cáes. Terá a capacidade de 25,000 toneladas de grãos. Junto a este será construido um armazem com 100 compartimentos iguaes para a distribuição e classificação dos cereaes. Este armazem terá a capacidade de 20,000 toneladas de grãos. Os outros tres armazens serão construidos mais proximos ao cáes, e terão 120 metros de comprimento e 15 metros de largura cada um. Estes serão providos de tres elevadores e tres torres, á altura de 40 metros do nivel do cáes. Nestes armazens estarão collocados sete linhas ferreas, e entre estes e o cáes duas linhas destinadas ao serviço do cáes. Quando concluidos, estes elevadores podem carregar, ao mesmo tempo, oito vapores de 3,000 toneladas cada um. As machinas serão movidas por electricidade. O custo da construcção dos elevadores e seu equipamento é calculado em $1,500,000 ouro.

A INDUSTRIA DE CARNES GELADAS.

O British Board of Agriculture publica os seguintes interessantes dados estatisticos relativos ao commercio de carnes geladas na Republica Argentina.

O commercio de carnes geladas naquelle paiz, que começou no anno de 1883 com uma exportação de 17,000 carneiros gelados, tem tido um constante augmento, attinjindo as exportações em 1901, a 3,100,000 carneiros, 133,000 bois e vaccas e 500 porcos.

Ha actualmente tres emprezas frigorificas: A Sansinena Company, situada em Barracas, perto da cidade de Buenos Aires; a River Plate Fresh Meat Company, em Campana, no Rio Parana, e a Las Palmas Produce Company, em Zarate, no mesmo rio. Estas tres companhias representam um capital total de £800,000, empregam 2,000 operarios e tem a capacidade de 15,000 carneiros e 720 de gado vaccum em cada vinte e quatro horas.

A quantidade de carnes e outros productos que passaram por estes estabelecimentos em 1901 foi como segue: Carne conservada em latas, 228 toneladas; carne gelada, 112,000 toneladas; graxa, 859 toneladas; couros, 14,000 toneladas; sebo, 14,400 toneladas; residuos, 6,000 toneladas, o que perfaz o total de 147,487 toneladas.

As despezas de funccionamento são calculadas em £2,743,055, distribuidas assim: Pessoal, £164,725; compra de gado, £2,416,665; combustivel, £45,000; despezas miscellaneas, £116,665.

As emprezas frigorificas compram o gado directamente dos criadores, o abatem, preparam e conservam a frio nos seus proprios estabelecimentos, e fazem embarques de carne em seus proprios vapores, ou em vapores por ellas fretados para este fim. Diz-se que este systema assegura o supprimento de boa carne, cuidadosamente abatida e preparada. A maior parte da carne gelada é enviada a Liverpool, o restante sendo desembarcado em London, Cardiff, Newcastle, Hull e Southampton.

No anno de 1901, foram regularmente empregados neste commercio entre Inglaterra e a Argentina 33 vapores, com a capacidade total de 1,443,000 carneiros gelados de 56 libras cada um.

Este commercio não tem affectado de maneira alguma a industria de xarque, pois os paizes consumidores deste producto são inteiramente differentes.

Diz-se que foram organizadas mais duas emprezas frigorificas, que em breve montarão as necessarias installações, uma em La Plata, e a outra perto de Buenos Aires.

BOLIVIA.

COMMERCIO ESTRANGEIRO EM 1901.

O Consul Geral da Bolivia em Nova York submistrou ao BOLETIM MENSAL valiosos dados estatisticos relativos ao movimento commercial da Republica em 1901. As mercadorias importadas na Republica durante o anno de 1901 foram de 58,000,140 kilogrammas, no valor de 16,953,233 *bolivianos.* Os direitos de importação cobrados sobre estes productos foram na importancia de 5,422,687 *bolivianos.* Si se aggrega a estas sommas, o custo do seu transporte para o interior, que é calculado em 5,000,000 *bolivianos*, o valor total das mercadorias importadas, entregues nos armazens dos importadores, eleva-se a 27,374,910 *bolivianos*, como se vê do seguinte quadro:

	Bolivianos.
Valor das mercadorias importadas, como consignado nas facturas	16, 953, 233
Direitos aduaneiros cobrados pelo Governo da Bolivia	5, 421, 687
Transporte das mercadorias para ó interior	5, 000, 000
Valor total das importações	27, 374, 910

Bolivia exportou durante ó anno de 1901, 110,763,320 kilogrammas de mercadorias, no valor de 37,578, 210.97 *bolivianos.* Os generos exportados foram os seguintes:

	Peso.	Valor.
	Kilogrammas.	*Bolivianos.*
Productos mineraes	105, 615, 971	26, 855, 425. 76
Productos agricolas	4, 413, 883	9, 688, 512. 82
Productos manufacturados	161, 072	535, 937. 46
Animaes	443, 574	373, 502. 85
Productos miscellaneos	128, 823	124, 832. 08
Total	110, 763, 323	37, 578, 210. 97

No seguinte quadro se especificam os productos mineraes, agricolas e manufacturados exportados:

	Peso.	Valor.
Productos mineraes.	*Kilogrammas.*	*Bolivianos.*
Prata	75,649,644	14,566,660.66
Estanho	21,915,907	9,380,714.00
Bismutho	1,059,129	1,463,088.43
Cobre	3,049,850	1,112,598.90
Chumbo, antimonio, ouro, cobalto, zinco	3,941,441	332,363.77
Total	105,615,971	26,855,425.76
Productos agricolas.		
Borracha crúa	3,465,063	9,151,823.61
Coca	255,718	259,513.50
Casca peruana	315,163	137,554.24
Café	212,358	110,263.89
Cacáo, fumo, etc	165,581	29,384.58
	4,413,883	9,688,539.82
Productos manufacturados.		
Prata estampada	28,434	411,831.00
Artigos miscellaneos	132,638	124,106.46
Total	161,072	535,937.46

A importação de mercadorias pela Alfandega de La Paz, nos quatro primeiros mezes de 1902, foi de 3,757,013 kilogrammas, no valor de 1,226,625.83 *bolivianos*. Exportaram-se durante o mesmo periodo, 2,697,827 kilogrammas de mercadorias, com o valor de 1,940,468.10 *bolivianos*.

LIVRE EXPORTÂÇAO DE MINERAES E BARRAS DE PRATA.

ARTIGO 1°. Declara-se livre de direitos a exportação de mineraes e barras de prata que se exploram no territorio da Republica.

ART. 2°. Todo exportador de mineraes e barras de prata está obrigado a saccar da alfandega nacional uma guia em que se consigne o peso dos mineraes e barras, seu titulo e destino. Por cada marco de prata que contenham os metaes ou barras exportados, se abonará 10 centavos como direito de estatistica.

ART. 3°. A falta da guia de exportação estabelecida pelo artigo anterior, dará lugar ao commisso, sendo a metade em beneficio do denunciante.

ART. 4°. As emprezas mineiras, sejam particulares ou associações de qualquer natureza, que exploram minas de prata, pagarão o 6 por cento de seus lucros, conforme aos balanços semestraes que devem apresentar. Fica em vigor o imposto de 2 por cento para as emprezas que exploram outra classe de mineraes, segundo lei de 12 de Novembro de 1894.

ART. 5°. Considerar-se-ha como ganho liquido, para os effeitos deste imposto, o saldo que fique disponivel descontados os gastos necessarios de exploração, beneficio, administração e transporte.

Art. 6°. O imposto mineiro que se cobra actualmente por toda concessão, conforme ó artigo 16 da lei de minas de 1880, e a de 11 de Novembro de 1897, fica fixado em seis bolivianos para as veias camadas e para as bocca-minas a que se refere ó paragrapho 2 do citado artigo 16; tres bolivianos para os terrenos que se expressam no Art. 12 da dita lei; e cincoenta centavos pelos especificados no Art. 13. Este imposto será considerado nacional.

Art. 7°. Esta lei começará a reger desde ó 1° de Janeiro de 1903. Ó Executivo fica auctorizado para regulamentar sua execução.

Communique-se, etc.

José Manuel Pando.
Ignacio Calderón,
Ministro da Fazenda.

BRAZIL.

PROPOSTA DA RECEITA E DESPEZA GERAL DA REPUBLICA PARA O EXERCICIO DE 1903.

A receita geral da Republica dos Estados Unidos do Brazil é orcada em ouro 43,123,942$000, papel 255,543,000$000, e será realizada com o producto do que fôr arrecadado dentro do exercicio da presente proposta, sob o seguintes titulos:

	Ouro.	Papel.
Importação	33, 000, 000$000	130, 050, 000$000
Entrada, sahida e estada de navios	120, 000$000	10, 000$000
Addicionaes		90, 000$000
Interior	34, 413, 666$667	204, 218, 000$000
Consumo		32, 690, 000$000
Extraordinaria	180, 275$333	
Renda com applicação especial	8, 530, 000$000	11, 880, 000$000

A despeza geral da Republica dos Estados Unidos do Brazil é fixada em ouro 42,593:070$612 e papel 238,489:192$178, a qual será distribuida na forma que segue:

	Ouro.	Papel.
Ministerio da Justiça e Negocios Interiores		16, 209:881$135
Ministerio das Relações Exteriores	889, 500$000	726, 920$000
Ministerio da Marinha		24, 646, 425$117
Ministerio da Guerra		46, 292, 812$933
Ministerio da Industria, Viação e Obras Publicas	4, 812:025$479	66, 773:487$408
Ministerio da Fazenda	36, 891:545$133	83, 839:665$585

MANÁOS HARBOUR, LIMITED.

Transcrevemos da "Gazeta Commercial e Financeira" a seguinte noticia:

"Foi registrada em Londres a Manáos Harbour, Limited, com o capital de £500,000 em 2,000 acções de £100 cada uma de socios fundadores; e 3,000 acções preferencias de £100 cada uma. O fim da companhia é aceitar um contrato feito entre B. Nymkiewig & Co., de 1ª parte, A. Booth da 2ª e B. Nymkiewig da 3ª, e um segundo accordo feito por esta companhia com a Booth Steamship Company, Limited; adquirir quaesquer concessões, direitos e poderes e desenvolver e aproveitar os mesmos do modo que a Companhia julgar mais conveniente; tambem como armadores, proprietario de saveiros, negociantes, fabricantes de tijolos e telhas, proprietario de pedreiras, engenheiros e fundidores de metaes, constructores e empreiteiros, constructores de machinas e locomotivas; fabricantes e negociantes de todas as especies de caixas de papelão, madeira ou metal; tambem fazer o negocio de estivadores, de fabricantes e negociantes de gelo de armazens frigorificos, de trapicheiros; tambem o de mineração de fundicão e metallurgia; para desenvolver os recursos do paiz dos bens moveis e immoveis; para a producção e abastecimento de gaz e electricidade; para fundar cidades e aldeas e promover a immigração para ellas; para agir como banqueiros, financeiros e commissionarios.

"Os incorporadores são os Srs. C. Booth, T. M. Booth, G. M. Booth; A. L. Deoter, D. M. Fox, F. C. Bateman, D. A. Little, de Londres; B. Nymkiewig, do Rio de Janeiro e A. de Lavandeyra, de Pariz. A sua directoria fica composta dos Srs: A. A., C. e G. M. Booth, B. Nymkiewig, A. de Lavandeyra e D. M. Fox."

DECRETO CONCEDENDO AUTORISAÇÃO Á "THE BRAZILIAN DIAMOND AND EXPLORATION COMPANY, LIMITED" PARA FUNCCIONAR NA REPUBLICA.

O Presidente da Republica dos Estados Unidos do Brazil, attendendo ao que requereu a The Brazilian Diamond and Exploration Company, Limited, devidamente representada, decreta:

Artigo unico. É concedida autorização á The Brazilian Diamond and Exploration Company, Limited, para funccionar na Republica com os estatutos que apresentou, sob as clausulas que a este acompanham, assignadas pelo Ministro da Industria, Viação e Obras Publicas e ficando obrigada ao cumprimento das formalidades exigidas pela legislação em vigor.

Capital Federal, 8 de Setembro de 1902, 14° da Republica.

M. Ferraz de Campos Salles.
Antonio Augusto da Silva.

PRODUCTO DOS IMPOSTOS DE CONSUMO PARA O PRIMEIRO SEMESTRE DE 1902.

O seguinte quadro demonstra a renda dos impostos de consumo arrecadada em toda a União, durante o semestre de Janeiro a Junho de 1902 comparado com o mesmo semestre de 1901:

	1902.	1901.
	Milreis.	*Milreis.*

CHILE.

CONCESSÃO DE UMA VIA-FERREA AEREA.

Em data de 30 de Agosto de 1902 o Congresso Nacional votou o seguinte projecto de lei:

ARTIGO 1°. Concede-se ao Sr. ABELARDO PIZARRO, o a quem suas vezes fizer, permissão para construir e explorar, em territorio chileno, uma estrada de ferro aerea que partirá do Juncal e deverá terminar no lugar denominado Paramillo de las Cuevas, em territorio argentino.

ART. 2°. Concede-se igualmente ao Senhor PIZARRO uma subvenção annual de 40,000 pesos ouro, de dezoito pence, pelo prazo de quinze a nnos, em compensação das seguintes obrigações que contrae por sua parte.

1ª. Transportará sem onus para o Thesouro toda a correspondencia que entrar ou sahir do paiz por via de Uspallata, e os empregados publicos que viajarem em commissão do serviço, e com um desconto de 25 por cento, os demais empregados.

Emquanto que a estrada de ferro transandina não chegar a Juncal, o concessionario estará obrigado a transportar a correspondencia desde o ponto terminal da dita estrada, secção chilena, até Paramillo de las Cuevas.

2ª. As installações ou postes da estrada de ferro aerea poderão ser aproveitadas pelo Governo em caso que desejasse construir linhas telegraphicas atravez da cordilheira, mediante o pagamento de uma terça parte do valor em que a Direcção de Telegraphos avalie a economia que resulte para o Estado do emprego das installações ou postes da Empreza.

Poderá tambem o Governo fazer uso dos terrenos que necessitar para o serviço de suas linhas.

Art. 3°. A subvenção começará a reger desde a data em que se iniciar o trafico em toda a extensão da linha, desde o Juncal até Paramillo de las Cuevas.

Art. 4°. As tarifas de carga e passageiros serão fixadas em ouro de dezoito pence, e approvadas pelo Presidente da Republica.

O valor das passagens de primeira e segunda classe não poderão exceder de 15 pesos por pessoa, respectivamente.

O frete de carga não deverá exceder de 8 pesos por tonelada, para mercadoria valiosa e de 4 pesos, para mercadoria ou carga de pouco valor.

Art. 5°. A construcção da linha deverá iniciar-se dentro de dezoito mezes contados da data desta lei, e estar terminada e entregue ao serviço vinte e seis mezes depois da mesma data.

Art. 6°. O concessionario, ou quem suas vezes fizer, perderá o direito a esta concessão si não terminar os trabalhos no prazo indicado no artigo que precede.

Art. 7°. Em caso de interromper-se o trafico por mais de quinze dias, a subvenção se suspenderá por todo o tempo que durar a interrupção.

Art. 8°. O concessionario ou quem suas vezes fizer, constituirá domicilio, no Chile, e todas as questões que se suscitarem na execução on cumprimento do contracto, ficarão submettidas exclusivamente aos tribunaes chilenos.

Promulgue-se, etc.

Jermán Riesco.
Ramón Barros Luco.

PREMIO Á PRODUCÇÃO DO ACIDO SULPHURICO.

"El Boletín de la Sociedad Nacional de Minería," de Santiago de Chile, diz em seu numero correspondente ao 31 de Julho proximo passado, que o Congresso Nacional approvou o seguinte projecto, que se promulgará como lei dentro de poucos dias:

Artigo 1°. Concede-se um premio de 3 centavos por cada kilogramma de acido sulphurico de 60 gráos Beaumé, que se produzir no paiz, sempre que a quantidade que produza cada fabrica não seja inferior a 1,500 toneladas annuaes.

Art. 2°. Para gozar deste premo, os interessados deverão iniciar os trabalhos de installação de sua fabrica dentro do prazo de um anno, contado do dia em que se promulgar a dita lei.

Art. 3°. Auctoriza-se ao Presidente da Republica a despender até a somma de 50,000 pesos annuaes em pagamento dos premios que concede o artigo 1.

Art. 4°. Si a quantia de 50,000 pesos fôr insufficiente para subvencionar o total que produzam as diversas fabricas de acido sulphurico que se estabelecerem no paiz, far-se-há a distribuição della pro rata.

COLOMBIA.

EMOLUMENTOS PELA LEGALISAÇÃO DE FACTURAS.

O "British Board of Trade Journal," em sua edição de 28 de Agosto 1902, contem a noticia do recebimento pela Junta Commercial, por intermedio do Ministero das Relações Exteriores da Grã Bretanha, de uma copia e traducção de um decreto estabelecendo os emolumentos que os consules e agentes consulares da Colombia devem cobrar pela legalisação das facturas e manifestos de mercadorias destinadas a portos da Colombia, assim como os impostos que deverão ser pagos por cada tonelada de mercadorias desembarcadas em portos colombianos e por certas classes de encommendas postaes. O decreto é, em substancia, como segue:

As facturas commerciaes, para os fins de legalisação consular, dividem-se em quatro classes, a saber:

1. Facturas que se referem sómente a artigos de ferro, aço, cobre, zinco ou maderia, destinados a fabricas, estradas de ferro, vapores, installações para illuminação electrica, apparelhos telegraphicos e telephonicos, apparelhos de imprensa, manufacturas de vidro ou de barro, de estearina, tecidos ou de artigos que por declaração official são considerados de utilidade publica.
2. Facturas de mercadorias cujo valor official não excede de $200.
3. Facturas de mercadorias cujo valor official excede de $200, mas é inferior a $500.
4. Factusas cujo valor excede de $500.

Os emolumentos cobrados pela legalisação consular das classes de facturas acima mencionadas, são os seguintes:

Sobre facturas da 1ª classe, $3 por cada $1,000, ou fracção desta somma;

Sobre facturas da 2ª classe, $6 por cada $1,000, ou fracção desta unidade;

Sobre facturas da 3ª classe, $8 por cada $1,000, ou fracção desta unidade;

Sobre facturas do 4ª classe, $10 por cada $1,000, ou fracção desta unidade.

As facturas que se referem a artigos que contêm pedras preciosas, pagarão um emolumento de 40 por cento do valor official dos objectos.

As facturas que se referem a artigos de ouro, pagarão um emolumento de 10 por cento do seu valor official.

As facturas de artigos de platina ou prata estarão sujeitas a uma taxa de 3 por cento do seu valor official.

Pela legalisação dos manifestos, os consules cobrarão $5 pelos primeiros 100 volumes, e $1 por cada 100 volumes ou fracção desta unidade que exceder.

Os certificados exigidos para effectuar-se o desembarque em qualquer dos portos do Isthmo de Panama, de mercadorias estrangeiras em transito para outros portos nacionaes, devem pagar a taxa de $3, prata, pelos primeiros 50 volumes, e $1, prata, por cada 100 volumes ou fracção desta unidade excedente deste numero.

Si a factura consular não estiver em poder da Alfandega na occasião do exame das mercadorias, o valor das mesmas será estimado em ouro, e sobre esta base será imposta ao importador uma multa equivalente ao quadruplo dos emolumentos consulares a que ficam sujeitas as mercadorias em virtude do regulamento, sem prejuizo de qualquer outra multa que lhe fôr imposta por infracção das disposições da lei das Alfandegas.

Uma taxa de 2 por cento, pagavel em ouro ou seu equivalente em papel moeda, será cobrada sobre o valor das encommendas postaes facturadas que contêm artigos de ouro, prata, platina ou pedras preciosas.

As mercadorias que se descarregarem nos postos da Republica de Colombia, destinadas ao commercio do paiz, pagarão uma taxa de $1.50, ouro, por tonelada. A Legação da Grã Bretanha em Bogotá, ao remetter este decreto, faz notar que como navios colombianos estão isentos do pagamento desta taxa, os navios britannicos gozarão da mesma isenção em virtude do tratado de 1866.

NOVA LEI DE MINAS.

A nova lei de minas, recentemente promulgada, augmenta consideravelmente os impostos sobre esta industria. A nova lei foi posta em execução no dia 1° de Junho de 1902.

Resumem-se em seguida as principaes alterações feitas nesta industria. Pela lei anterior, o denunciante de uma propriedade mineira não pagava direitos, ao passo que agora, conforme a nova lei, tem de pagar $10. De accordo com a lei anterior, o imposto pago pela denuncia de tres pertenças ou propriedades foi de $5; conforme a nova lei, cada pertença custa $500.

O imposto pago pela expedição de um titulo a uma mina foi de $10, mas conforme a nova lei é de $150. Pela lei anterior, toda mina de propriedade particular pagava um imposto annual de $2; agora paga $100, quer trabalhada ou não.

No caso de propriedades alluviaes, o imposto annual por cada 5 kilometros quadrados foi de $1; agora é de $150. Devido a este augmento nos impostos, a mais pequena propriedade mineira custará $250 ou mais.

Diz-se que esta nova lei não dá satisfacção e muitos pensam que terá o resultado de retardar o desenvolvimento das minas.

A PLATINA.

[Do "Boletín Industrial" de Bogotá.]

Na estatistica da producção da platina no mundo, Russia occupa o primeiro lugar com uma producção que representa cerca de 90 por cento do metal destinado á venda universal; Colombia, rica em extremo em jazidas de platina, não produz nada que vale a pena de ter-se em conta.

Graças a grandes esforços de investigação e estudo de minas, a platina tem sido descoberta em muitos mineraes dos Estados Unidos, e delles se extrae em pequenas proporções; esta producção, pequena em si, é grande em quantó representa uma somma de trabalho intellectual consideravel expendido em busca do metal mais nobre entre todos.

O primeiro posto entre os paizes productores da platina tem que corresponder a Colombia; pois é muito possivel que em outra parte não se encontrem jazidas tão ricas e tão vastas como as das vertentes e alluviões da immensa zona de territorio comprehendida entre o Atrato e o San Juan.

Não sómente existe a platina no Chocó; encontra-se tambem em Santa Rosa de Osos, em Frontino e em outros muitos lugares de Colombia.

O preço da platina varia entre $18 e $19 a onça Troy.

COSTA RICA.

CONVENÇÃO SOBRE MARCAS DE FABRICA E DE COMMERCIO CELEBRADA COM A BELGICA.

O Congresso de Costa Rica approvou e o Presidente firmou uma convenção sobre marcas de fabrica e de commercio celebrada entre esta Republica e a Belgica. As marcas de fabrica e de commercio a que esta convenção é applicavel são as que são de propriedade legitima dos fabricantes e negociantes que as usam. A convenção permanecerá em vigor durante cinco annos, contados da data da troca das ratificações, e si não for denunciada por uma das partes contractantes antes de que expire este prazo, continuará em vigor de anno para anno até que fôr denunciada.

CUBA.

COMMERCIO DE CALÇADO.

Comparando-se a estatistica da importação de calçado em Cuba no periodo de 1° de Julho de 1900 a 31 de Maio de 1901, com a da importação realizada desde 1° de Julho, 1901, até 19 de Maio de 1902, data em que terminou a occupação americana, vê-se que no primeiro periodo foram importados 1,899,041 pares, no valor de $1,429,109, dos quaes 74 por cento, representando o valor de $1,061,739, vieram da Hespanha, sendo o preço médio de 69 centavos por par, e a quarta parte de toda a importação, representando o valor de $361,956, foi importada dos Estados Unidos, sendo o preço médio de $1 por par.

No segundo periodo, desde 1° de Julho de 1901, a 19 de Maio de 1902, o commercio dos Estados Unidos mostra um sensivel augmento, a importação total de calçado neste periodo montando a 1,925,373 pares no valor de $1,557,770; para esta quantidade contribuiram os Estados Unidos com a terça parte, representando o valor de $486,585, sendo de 96 centavos o preço médio por par, ao passo que as importações de calçado da Hespanha representam o valor de $1,067,792, ou 68 por cento da importação total, sendo de 75 centavos o preço médio por par.

Este resultado deve ser muito satisfactorio aos commerciantes de calçado deste paiz, pois tinham de fazer persistentes esforços para concorrer vantajosamente com a Hespanha neste commercio.

EQUADOR.

PROJECTO PARA A CONSTRUCÇÃO DE UMA NOVA ESTRADA DE FERRO.

O Presidente da Republica, em uma mensagem especial dirigida á Camara dos Deputados no dia 3 de Setembro de 1902, recommenda com urgencia a approvação do projecto de lei auctorizando a construcção de uma via-ferrea que una os cantões de Sucre, Chone e Rocafuerte. Como se sabe esta parte do Equador abunda em recursos naturaes, e a construcção de uma estrada de ferro na provincia de Manabí contribuirá poderosamente para o desenvolvimento daquella provincia.

ESTADOS UNIDOS.

COMMERCIO COM A AMERICA LATINA.

IMPORTAÇÕES E EXPORTAÇÕES.

No pagina 1394 apparece a ultima relação do commercio entre os Estados Unidos e os paizes latino-americanos, tomada da compilação feita pela Secção de Estatistica do Departamento do Thesouro dos Estados Unidos. A relação corresponde ao mez de Setembro de 1902, com uma relação comparativa para o mez correspondente do anno anterior, assim como para os nove mezes findos em Setembro de 1902, comparados com os correspondentes de 1901. Deve-se explicar que os algarismos das diversas alfandegas, mostrando as importações e exportações de um só mez não são recebidos no Departamento no Thesouro até quasi o dia 20 do mez seguinte e perde-se algum tempo necessariamente em sua compilação e impressão. Por conseguinte as estatisticas para a mez de Setembro, por exemplo, não são publicadas até os primeiros dias de Novembro.

DECISÕES RELATIVAS Á TARIFA DAS ALFANDEGAS.

O Departamento do Thesouro dos Estados Undos proferiu as seguintes decisões relativas á classificação de certos productos tropicaes:

Ananazes conservados que contêm apenas 7 por cento de assucar denominado *invert*, e menos que 1 por cento de assucar de canna, estão classificados na ultima parte do paragrapho 263 da Tarifa em vigor como "ananazes conservados em seu proprio sumo," e sujeitos a direitos *ad valorem* na razão de 25 por cento.

Folhas de balata e "Tuno belting" (de que a balata constitue a parte componente de maior valor) devem ser classificadas no paragrapho 450 da Tarifa, para a taxa de 35 por cento *ad valorem*, por serem semelhantes ás manufacturas de gutta-percha.

MEXICO.

ESTATISTICAS DO SERVIÇO POSTAL PARA O EXERCICIO DE 1902.

Segundo as estatisticas do serviço postal para o exercicio que terminou em 30 de Junho, publicadas no "Diario Oficial" do Mexico, o total da receita realizada em 1901–2 foi de $2,399,232.34, comparada com $2,135,520.82 no exercicio anterior, o que mostra um augmento para 1902 de $263,711.52, equivalente a 12.35 por cento. A venda de sellos postaes foi na importancia de $2,049,680.63 em 1902, contra $1,844,815.40

no exercicio anterior; aluguel de caixas postaes, $60,591 em 1902, contra $54,759 em 1901, ou seja um augmento de $5,832; penas e multas, $32,452.84 em 1902, contra $22,597.61 no exercicio anterior; vales nacionaes, $218,355.14 em 1902, contra $180,534.92 em 1901; vales internacionaes, $3,737.59 em 1902, contra $3,307.78 em 1901; lettras de editores, $34,415.14 em 1902, contra $29,506.11 no exercicio anterior, o que mostra um augmento de $4,909.03.

SERVIÇO DE VAPORES ENTRE PORTOS DO GOLFO DO MEXICO E OS DA EUROPA E CUBA.

O "Diario Oficial" de 9 de Agosto ultimo publica o texto de um contracto celebrado entre o Governo do Mexico e a linha de vapores Lloyd Norte-Allemã, para o estabelecimento de um serviço de vapores entre os portos de Tampico, Vera Cruz e qualquer outro porto mexicano que se escolher entre os de Coatzacoalcos, Frontera, Laguna ou Progreso, e Bremen, Antuerpia, um ou mais portos da Hespanha e um ou mais portos da ilha de Cuba.

A companhia compromette-se a transportar entre os portos em que toquem seus vapores, livre de gastos, para o Governo do Mexico, toda a correspondencia, impressos, pacotes e valores transmissiveis por correio, assim como 10 toneladas metricas de mercadorias.

Em compensação ao serviço postal e ao serviço de livre transporte de 10 toneladas de mercadorias para o Governo, os vapores da linha ficam isentos do pagamento do 40 por cento do direito de toneladas creado pelo decreto de 1° de Julho de 1898. Os vapores da linha poderão fazer o traficó de cabbotagem em conformidade com as disposições do artigo 293 do Regulamento das Alfandegas. Será permittido á companhia ter em todos os portos em que toquem seus vapores, as lanchas, botes e rebocadores que forem necessarios para seu bom serviço, os quaes desfructarão de todas as franquias concedidas por este contracto.

Este contracto durará tres annos, a contar da data de sua promulgação, e si nenhum dos contractantes o denunciar seis mezes antes de sua terminação, vigorará por outro periodo de tres annos.

CONCLUSÃO DA ESTRADA DE FERRO CENTRAL AO PACIFICO.

O "Mexican Herald" correspondente a 13 de Setembro, publica o texto de um contracto celebrado entre a companhia da Estrada de Ferro Central do Mexico e os Senhores HAMPSON E SMITH, para a conclusão da linha ao Pacifico. Um ramal desta linha estende-se de Irapuato, na linha principal, até Guadalajara e daqui a Tuxpan. Este ultimo ponto não deve ser confundido com o pequeno porto do mesmo nome no Estado de Vera Cruz.

Os contractantes compromettem-se a construir 73 kilometros de viaferrea desde Tuxpan até Colima, na costa do Pacifico, pela somma de $3,500,000. Neste prolongamento haverá 13 tunneis e 17 pontes. O maior tunnel terá 430 pés de comprimento e a maior ponte 600 pés de comprimento. A ponte mais alta terá 175 pés de altura.

Conforme os termos do contracto, a linha deverá ser terminada dentro de vinte e seis mezes.

NOTAS ECONOMICAS.

Durante os dez exercicios que começaram em 1° de Julho de 1892 e terminaram em 30 de Junho de 1902, o Departamento do Fomento expediu 17,929 titulos a minas de todas as classes, comprehendendo 215,973 hectares ou 529,670 geiras. No exercicio de 1892–93, o numero dos titulos expedidos foi de 417; 2,184, no exercicio de 1899–1900; 2,339, no exercicio de 1900–1901 e 3,607 em 1901–1902. Estes algarismos demonstram ó progresso que se tem feita na industria mineira da Republica, notavelmente nos ultimos tres annos.

Segundo estatísticas recentemente publicadas pelo Governo do Mexico, a producção de prata e de ouro no Mexico no periodo decorrido de 1877–78 até 1900–1901, inclusive, foi no valor de $1,094,623,182 e $67,117,277, respectivamente.

Segundo um relatorio do Sr. Barlow, consul-geral dos Estados Unidos, os capitaes norte-americanos actualmente empregados no Mexico, importam em $750,000,000, moeda mexicana. Desta somma, $200,000,000 foram empregados em emprezas mexicanas desde Janeiro a Maio do corrente anno. Depois dos Estados Unidos, vêm, na ordem da importancia dos capitaes por elles empregados na Republica, a Hespanha, Grã Bretanha, França, Allemanha, Belgica, Italia e Suissa.

Os direitos de importação e exportação e de portos, arrecadados pelas Alfandegas do Mexico no mez de Julho ultimo, ascenderam a $2,277,341.37, contra $2,069,344.32 no mesmo mez do anno anterior, o que mostra um augmento de $207,977.04.

DIVIDA PUBLICA.

Segundo estatisticas officiaes publicadas no "Boletin de Estadística Fiscal" para 1900–1901, a divida publica do Mexico em 30 de Junho de 1901, foi na importancia de $250,715,856.50. A divida pagavel em ouro importava em $113,910,620, á razão de $5 por libra esterlina. Desta somma, $113, 853,9000 representam os titulos do emprestimo de 1899, ao juro annual de 5 por cento, e $56,720, ao juro de 6 por cento, os emprestimos de 1888, 1890 e 1893 e os titulos hypothecarios da estrada de ferro nacional de Tehuantepec.

A divida pagavel em moeda de prata, com juros, foi de $135,509,271,12, dividida assim:

Titulos da divida consolidada de 3 por cento	$50, 415, 461. 64
Titulos da divida amortizavel de 5 por cento, 1ª serie	19, 753, 494. 48
Titulos da divida amortizavel de 5 por cento, 2ª serie	19, 719, 857. 50
Titulos da divida amortizavel de 5 por cento, 3ª serie	19, 858, 020. 00
Titulos da divida amortizavel de 5 por cento, 4ª serie	14, 435, 102. 50
Titulos das obras do porto de Veracruz	25. 00
Titulos da Estrada de Ferro de Monterrey ao Golfo Mexicano	45, 810. 00
Titulos das obras do molhe de Tonalá	7, 000. 00
Titulos da Estrada de Ferro de Pachuca a Zacualtepán e Tampico	3, 000. 00
Titulos da Estrada de Ferro de Tula a Pachuca e Tampico	42, 000. 00
Apolices de Subvenção da Estrada de Ferro troncal de Oaxaca	9, 260, 000. 00
Apolices da Estrada de Ferro de Veracruz ao Pacifico	1, 969, 500. 00
Total	135, 509, 271. 12

A divida fluctuante, pagavel em prata, sem juros, foi de $1,296,965.38, representados por diversos saldos não cobrados.

No orçamento para o exercicio de 1902–1903, a despeza com o serviço da divida publica é orçada em $22,216,893. Desta somma, $7,629,193 são destinados ao serviço da divida pagavel em moeda estrangeira, que comprehende cambios e gastos por situação, a commissão que se paga ao Banco Nacional, commissão que cobra a casa bancaria de Berlim encarregada de fazer o serviço, e outros gastos de menor importancia; a verba de $2,431,000 é destinada ao serviço da divida pagavel em moeda mexicana, comprehendendo os juros, amortização e gastos da divida interior consolidada de 3 por cento e das quatro series da divida interior consolidada de 5 por cento, pagamento da subvenção da Estrada de Ferro de Veracruz ao Pacifico, e despezas com as obras de saneamento da cidade de Veracruz; e a verba de $789,000, para as classes civis e militares. A verba de $11,317,700 é destinada ao serviço de juros e amortização da divida publica em geral, segundo os respectivos contractos.

Segundo o contracto do emprestimo de conversão de 1899, que constitue um pouco menor que a metade da divida total, ao serviço de juros e de amortização do capital, está consignado o 62 por cento dos direitos de importacão e de exportação, o qual deve ser recolhido ao Banco Nacional do Mexico, afim de remetter do dito fundo o que seja necessario para cobrir a importancia da annuidade. A despeza con este serviço faz subir a 5.62 por cento o juro sobre o capital.

Em vista da baixa da prata que provavelmente continuará, a média da taxa cambial durante o exercicio é calculada em 22½ pence por peso. A receita total é orçada em $64,823,400.

SANEAMENTO E ABASTECIMENTO DE AGUA DE TAMPICO.

O Governo do Mexico contractou com ó Sr. WILLIAM ASTOR CHANLER o serviço do abastecimento de agua e saneamento da cidade de Tampico, de conformidade com os planos e especificações por elle submettidos. Pelos termos do contracto, as obras devem ser começadas dentro de seis mezes contados da data do contracto (15 de Agosto), e concluidas dentro de tres annos contados da mesma data. O custo das obras é fixado em $2,187,529.73. Esta quantia será realizada com titulos que serão emittidos pelo Estado de Tamaulipas, e com o producto de 2 por cento dos direitos aduaneiros cobrados no porto de Tampico. O Banco Central do Mexico contractou a receber toda a emissão de titulos, ao preço de 80 por cento do seu valor nominal.

Os títulos vencerão o juro annual de 5 por cento, que será pago por trimestres vencidos na cidade do Mexico. Depois de concluidas as obras, o producto de 2 por cento dos direitos aduaneiros arrecadados no porto de Tampico, assim como o producto das taxas cobradas pelo supprimento de agua, será applicado á constituição de um fundo de amortização dos titulos.

Como garantia da fiel execução do contracto, o contractante deverá depositar no Banco Central do Mexico, a quantia de $50,000 em apolices da divida amortizavel de 5 por cento, as quaes podem ser substituidas por titulos emittidos pelo Estado de Tamaulipas ao Banco Central.

PARAGUAY.

MOVIMENTO COMMERCIAL ENTRE O PARAGUAY E A REPUBLICA ORIENTAL DO URUGUAY.

Durante o anno de 1901 foram exportados do Paraguay para a Republica Oriental do Uruguay productos nacionaes por valor de pesos 152,562, ouro, sem que conste nas estatisticas do Uruguay nenhuma importação daquelle paiz. No anno de 1900, as exportações para aquelle paiz foram no valor de pesos 168,846, ouro, ou seja pesos 16,284, ouro, mais que em 1901.

Durante o periodo em revista sahiram de Assumpção com destino ao porto de Montevidéo 80 vapores arqueando 48,540 toneladas e tendo 3,279 tripolantes, e 26 navios de vela arqueando 2,451 toneladas e tendo 519 tripolantes, e entraram neste porto, procedentes do porto de Montevidéo, 88 vapores arqueando 54,345 toneladas e tendo 3,624 tripolantes e 26 veleiros com 3,359 toneladas e 263 tripolantes.

A Republica Oriental importou em 1901 os seguintes generos similares aos paraguayos:

ESTATISTICA DEMOGRAPHICA DA CIDADE DE ASUMPÇÃO.

Segundo o recenseamento realizado no dia 1° de Julho de 1902, a população da cidade de Asumpção é de 51,719 habitantes, dos quaes 28,545 são do sexo feminino e 23,174 do sexo masculino. A população por nacionalidade é como segue: Naciones, 47,075; argentinos, 1,274; italianos, 1,245; hespanhóes, 718; francezes, 328; allemães, 234; uruguayos, 220; brazileiros, 177, e austriacos, 127. O Japão é representado por só um habitante na capital do Paraguay.

OBRAS DE MELHORAMENTO NO PORTO DE ASSUMPÇÃO.

Diz o "Board of Trade Journal" que em vista da necessidade urgente de melhoramentos no porto de Assumpção, comprehendendo a construcção de um quebra-mar e um cáes, e a dragagem do rio, as diversas casas commerciaes de Assumpção offereceram a emprestar ao Governo uma somma que não deve exceder a £40,000, vencendo o juro annual de 8 por cento. A quantia de £4,000, foi immediatamente adiantada afim de dar-se começo á construcção do quebra-mar.

REGULAMENTO DOS AGENTES COMMERCIAES.

O Consul da Grã Bretanha em Assumpção dirigiu ao seu Governo um relatorio sobre o regulamento para os agentes commerciaes. Diz o relatorio, que, ao entrarem em Assumpção, os agentes commerciaes pagarão um imposto de £10 até £15. Ao entrarem nos outros municipios da Republica, pagarão uma taxa addicional, cuja quantia não fica especificada. Amostras sem valor real, taes como pequenos cortes de panno, etc., podem ser introduzidas livres de direitos. Artigos que estão sujeitos a direitos, serão admittidos livres de direitos, ficando entendido que pagarão os direitos que lhes são realmente applicaveis, caso que não forem exportados dentro de certo prazo depois de sua introducção.

PERU.

COMMERCIO DURANTE OS ULTIMOS CINCO ANNOS.

Segundo estatisticas publicadas na "Gaceta Comercial" em sua edição de 31 de Agosto proximo findo, o commercio geral do Peru no ultimo quinquennio foi como segue:

Anno.	Importação.	Exportação.	Total.
	Soles.	*Soles.*	*Soles.*
1897	1,612,864	2,816,845	4,429,709
1898	1,921,475	3,027,477	4,948,952
1899	1,873,494	3,072,591	4,946,085
1900	2,317,150	4,497,999	6,815,149
1901	2,758,223	4,298,378	7,056,601

SALVADOR.

CREAÇÃO DE UM MUSÉU SCIENTIFICO, AGRICOLA E INDUSTRIAL.

O "Diario Oficial" de 12 de Setembro, 1902, publica um decreto que estabelece um muséu scientifico, agricola e industrial. O novo instituto estará dividido em seis partes ou secções, do modo seguinte:

1ª. *Objectos de historia natural, archeologia e numismatica.*—Aqui estarão comprehendidos alguns exemplares sobresalentes da fauna e da flora do paiz, grandes troços de rochas mineralogicas, restos da architectura e esculptura pre-Colombianas, modelos da ceramica e armas aborigines, collecções de moedas e medalhas, etc.

2ª. *Productos agricolas nacionaes.*—Sendo o Salvador um paiz essencialmente dedicado á agricultura, pois quasi não possue um hectare de terreno inculto, esta secção, das mais importantes, estará enriquecida com todas as amostras de seus artigos de cultivo, entre os quaes sobresaem a borracha, cacáo, café, anil, balsamo, tabaco e toda a variedade dos cereaes e as sementes das fructas.

3ª. *Productos industriaes, nacionaes e estrangeiros.*—Aqui se verão todas as extracções que se fazem da canna de assucar; os licores que se fabricam no paiz; o tabaco em rama; as amostras de charutos puros e cigarros; os tecidos de algodão e de seda, e todos os artefactos e productos manufacturados.

4ª. *Productos naturaes.*—Será uma exposição dos productos do subsolo e das florestas, contendo amostras de carvão de pedra, diversos mineraes, plantas e raizes medicinaes e industriaes, fibras textis, madeiras de construcção, etc.

5ª. *Objectos e documentos de Historia patria, antiga e moderna.*—Esta secção é provavel que contenha a iconographia dos homens publicos mais notaveis do Salvador; armas e objectos de recordo historico, livros, folhetos e periodicos que arrojem luz sobre os acontecimentos politicos da nação.

6ª. *Arvores e plantas vivos, industriaes e de ornato* (*Jardim Botanico.*)—Esta parte está devidamente explicada no artigo 13 do regulamento do Museu. Diz assim: "No lugar reservado ao cultivo das plantas, se destinará uma porção de terra para multiplicar as especies uteis e arvores de larga vida, como as arvores de balsamo, de borracha e resina, de azeite, quina, hennequen, ramie, juta, gutta-percha, coca e outros que podem produzir-se no paiz, para distribuil-os entre os agricultores no tempo opportuno das semeaduras. Tambem dará a direcção toda classe de dados sobre estes cultivos, e o modo de propagal-os.

URUGUAY.

ESTATISTICA AGRICOLA.

Segundo um relatorio que o Consul da Grã Bretanha em Montevidéo dirigiu ao seu Governo, os principaes productos que o Uruguay exporta são gado em pé, lã, xarque, couros, extractos de carne, productos animaes, productos agricolas e viveres para navios. Durante o anno de 1901 este paiz exportou gado em pé por valor de £100,730; productos animaes por valor de £5,517,260, e productos agricolas por valor de £131,840. As importações de gado em pé realizadas durante o anno comprehenderam 113 cavallos, 1,022 carneiros, dos quaes 352 vieram do Reino Unido, e 118 touros, dos quaes 111 foram importados do Reino Unido.

A producção total de lã da Republica do Uruguay em 1900–1901 foi calculada em 45,000 toneladas. A colheita total de lã para os dous annos de 1901 e 1902 foi no valor de £2,500,000. A perspectiva da colheita para a estação proxima futura é muito animadora e como a mortalidade entre os cordeiros foi relativamente pequena, é de esperar-se um consideravel augmento na producção.

As principaes culturas do Uruguay são milho, trigo e linhaça; cultivam-se tambem em pequena escala, aveia, cevada e sementes para passaros. A colheita de trigo para o anno de 1900–1901, foi a mas pequena que se tem havido desde 1892, devido á prolongada secca. A area semeada de trigo foi de 683,000 geiras, e a colheita realizada foi de 99,720 toneladas, contra 187,376 toneladas no anno anterior. A colheita proxima futura foi estimada em cerca de 300,000 toneladas. A colheita de milho em 1900–1901, foi de 141,648 toneladas, ou seja o dobro da do anno anterior. A area semeada de milho foi de 448,450 geiras.

ESTATISTICAS DA INDUSTRIA VITICOLA.

[Transcripto do Anales del Departamento de Ganaderia y Agricultura de Montevideo.]

Ha actualmente na Republica do Uruguay 1,029 vinhedos, que occupam uma extensão superficial de 4,149 hectares, dando emprega a 1,935 pessoas. O seguinte quadro mostra o numero medio das vinhas por hectare nos varios departamentos:

Departamentos.	Cepas.	Hectares.	Numero médio de cepas por hectare.
Artigas	408,300	106.25	4,083
Salto	3,726,076	902.40	4,130
Paysandú	806,310	194.40	4.156
Rio Negro	18,500	4.64	4,625
Tacuarembó	60,000	14	4,285
Rivera	103,000	24	4,291
Treinta y tres	31,730	11.16	2,884
Cerro Largo	...	...	...
Minas	50,550	11.69	4,595
Rocha	207,700	50.1	4,154
Maldona	1,074,240	367.7	2,927
Durazno	175,800	37.50	4,751
Flores	38,000	12.40	3,166
San José	174,913	56.64	3,123
Florida	425,266	96.7	4,429
Soriano	322,338	90,30	3,581
Colonia	2,095,512	448.29	4,677
Canelones	2,546,295	560.65	4,546
Montevidéo	4,248,121	1,167.56	3,460
Totales	16,512,651	4,149.20	3,979

O quadro que segue demonstra a producção média de uva por hectar e por pé:

Departamentos.	Kilos.	Hectares.	Numero médio por hectare.
Artigas	188,600	100.25	1,886
Salto	1,882,593	902.40	2,087
Paysandú	296,517	194.40	1,528
Rio Negro	11,000	4.64	2,750
Tacuarembó	10,000	14	714
Rivera	8,000	24	333
Treinta y tres	3,200	11.16	290
Cerro Largo	...	...	...
Minas	22,000	11.69	2,000
Rocha	65,695	50.18	1,313
Maldonado	987,450	367.07	2,689
Durazno	68,200	37.50	1,843
Flores	14,860	12.40	1,238
San José	105,065	56.64	1,876
Florida	390,593	96.07	4,068
Soriano	176,982	90.30	1,966
Colonia	2,668,256	448.29	5,955
Canelones	2,079,659	560.65	3,713
Montevidéo	4,633,779	1,167.56	3,970

O quadro synoptico que precede, apresenta ao mais ligeiro exame, notaveis contrastes, mas estas differenças foram plenamente confirmadas pelas observações que no terreno tem recolhido os agentes designados para a realização deste censo e robustecidas pelas informações que os inspectores da Secção de Agricultura recolheram nas zonas exploradas.

O total da ultima colheita é de 13,612,449 kilogrammas de uva, obtidos de 13,525,143 cepas em plena producção, do que se deprehende uma media maior de 1 kilogramma por pé.

A uva elaborada é de 10,939,163 kilogrammas, que entregues a fermentação produziram 7,039,498 litros de vinhos de diversos typos e qualidades.

BULLETIN MENSUEL

DU

BUREAU INTERNATIONAL DES RÉPUBLIQUES AMÉRICAINES,

Union Internationale des Républiques Américaines.

VOL. XIII. NOVEMBRE 1902. No. 5.

CONGRÈS INTERNATIONAL DES AMÉRICANISTES.

Une conférence des anthropologistes et des antiquaires les plus distingués a eu lieu à New York pendant le mois d'octobre 1902. Cette réunion, qui s'est tenue au Muséum National d'Histoire Naturelle, a marqué la 13^e session du Congrès International des Américanistes.

Ce congrès avait un caractère tout à fait international. Le Président était Mr. MORRIS K. JESSUP, directeur du Muséum National d'Histoire Naturelle, et le président honoraire le duc de LOUBAT, membre correspondant de l'Institut de France (Académie des Inscriptions et Belles-Lettres). Parmi les délégués, on remarquait: MM. LEÓN LEJEAL, professeur des antiquités américaines au Collège de France; EDWARD SELER, professeur à l'Université de Berlin; KARL VON DEN STEINEN, professeur et directeur adjoint du Musée Ethnographique de Berlin; HJALMAR STOLPE, professeur en Suède; JUAN B. AMBROSETTI, professeur dans la République Argentine; Dr. ALFREDO CHAVERO, du Mexique; M. A. P. MAUDSLAY, d'Angleterre; Dr. PITTIER DE FABREGA, directeur de l'Institut géographique de Costa Rica, et le Dr. de la ROSA, du Pérou.

Les Etats-Unis y étaient représentés comme il suit: MM. W. H. HOLMES, professeur; W. J. MCGEE, professeur; le Dr. M. H. SAVILLE, F. W. PUTNAM, Mlle. ALICE FLETCHER, Mme. ZELIA NUTTALL, et autres.

Les conférences ont duré en tout cinq jours, du 20 au 25 octobre et on a lu et discuté plusieurs rapports ayant trait à l'antiquité de l'homme aux Etats-Unis et aux colonies des premiers temps. La correspondance de TOSCANELLI a joué un rôle important dans ces discussions.

Cette correspondance consiste en lettres et cartes indiquant la route pour aller aux Indes via Ouest, et on suppose qu'elle fut envoyée par son auteur, un astronome florentin, à Christophe Colomb.

Bien que ce congrès ait été organisé pour étudier spécialement l'Amérique préhistorique du Nord et du Sud, c'est la première fois qu'il s'est réuni aux Etats-Unis. A la fin des sessions, les délégués sont allés faire une excursion à Philadelphie, Washington, Pittsburg, Cincinnati et Chicago. A Washington, un comité spécial lés a reçus et ils ont été présentés au Président Roosevelt.

RÉPUBLIQUE ARGENTINE.

L'INDUSTRIE DE LA VIANDE FRIGORIFIÉE.

Le "British Board of Agriculture" (Conseil agricole anglais) fournit les intéressants renseignements qui suivent au sujet de l'industrie des viandes frigorifiées dans la République Argentine.

L'industrie des viandes frigorifiées dans ce pays, qui en 1883 a commencé avec une exportation s'élevant à 17,000 moutons, s'est développée constamment chaque année, et en 1901 le total des exportations s'est élevé à 3,100,000 moutons, 133,000 têtes de bétail et 500 porcs.

Il y a actuellement trois compagnies engagées dans ce commerce, qui représentent un capital de £800,000 sterling environ; elles emploient 2,000 ouvriers et peuvent livrer au commerce 15,000 moutons et 720 bestiaux en vingt-quatre heures.

Le poids de la viande et des autres produits qui ont passé par ces fabriques en 1901 a été comme suit: viande de conserve (en boîtes de fer blanc), 228 tonnes; viande frigorifiée, 112,000 tonnes; graisse, 859 tonnes; cuirs, 14,000 tonnes; suif, 14,400 tonnes; divers (sang, os, etc.), 6,000 tonnes. Soit un total de 147,487 tonnes.

Les dépenses pour maintenir ces fabriques s'élèvent, dit-on, à £2,743,055, cette somme est distribuée de la manière suivante: personnel, £164,725; achat d'animaux, £2,416,665; combustible, £45,000; divers, £116,665.

Les compagnies frigorifiques achètent le bétail directement aux éleveurs et le tuent, le nettoient et le gèlent dans leurs établissements; ils font des expéditions régulières de la viande par leurs propres steamers ou par des steamers appartenant à des compagnies avec lesquelles ils ont des contrats pour cet objet. Les compagnies ne gèlent ni emmagasinent jamais l'expédition de viande pour les particuliers. Cette méthode a sans doute empêché les prix du bétail sur pied de monter, depuis la fermeture des ports anglais au bétail argentin, puisqu'il n'y a pas de concurrence pour ainsi dire entre les compagnies. D'un autre côté cette méthode a assuré la bonne qualité des viandes qui sont préparées très soigneusement. Le commerce a été réduit à un système si régulier qu'il n'y a aucun arrêt dans les arrivages en Angleterre, ni aucun frais excessif d'emmagasinage de l'un ou de l'autre côté et il n'y a jamais de vieille viande sur le marché. La plus grande partie de la viande frigorifiée de la République Argentine se débarque à Liverpool, le reste étant débarqué à Londres, à Cardiff, à Newcastle, à Hull et à Southampton.

En 1901 on a employé régulièrement dans ce commerce entre l'Angleterre et la République Argentine 33 vapeurs pouvant transporter 1,443,000 moutons de 56 livres chacun.

Ce commerce n'a affecté nullement l'industrie anciennement établie pour sécher et saler la viande de bœuf appelée "charque," les pays de consommation et les acheteurs étant entièrement différents dans chaque cas.

On fait connaître que deux autres compagnies frigorifiques ont été organisées. Ces compagnies doivent construire d'ici peu les bâtiments et les machines nécessaires, l'une à La Plata et l'autre près de Buenos-Ayres.

BRÉSIL.

MODIFICATIONS DOUANIÈRES.

I. *Circulaire relative aux exemptions accordées à l'importation des objets appartenant aux agents diplomatiques, etc.*

["Diario Oficial" du 26 mars 1902.]

Par circulaire du Ministère des Finances, en date du 25 mars 1902, il est convenu que les exemptions visées aux sections 5 et 6 de l'article 2 des dispositions préliminaires du tarif peuvent être accordées simplement à la requête du Ministre des Affaires Étrangères ou des intéressés eux-mêmes.

II. *Décret nº 858, du 12 août 1902, maintenant en vigueur l'exemption de l'impôt de consommation applicable à la viande séchée* (*xarque*).

["Diario Oficial" du 15 août 1902.]

En vertu du présent décret est maintenue en vigueur l'exemption de l'impôt de consommation accordée par décision législative á la viande séchée (*xarque*), et sont abrogées les formalités qui avaient pour objet de garantir la perception de cet impôt.

POPULATION EN 1900.

D'après un rapport émanant du Bureau des Statistiques de l'État de São Paulo, la population du Brésil en 1900, y compris 750,000 habitants pour le District Fédéral, s'élevait à un total de 21,565,000 habitants, distribués comme il suit dans les vingt états de la République:

Minas Geraes	4,277,000	Parahyba	596,000
São Paulo	2,520,000	Sergipe	450,000
Bahia	3,335,000	Piauhy	425,000
Pernambuco	2,089,000	Rio Grande do Norte	407,000
Rio Grande do Sul	1,350,000	Santa Catharina	405,000
Rio de Janeiro	1,300,000	Parana	380,000
Ceara	1,000,000	Goyaz	340,000
Alagoas	781,000	Amazonas	240,000
Maranhão	660,000	Espirito Santo	201,000
Para	652,000	Matto Grosso	157,000

PRÉVISIONS SUR LA RÉCOLTE DU SUCRE POUR 1902.

La future récolte des sucres s'annonce ainsi:

	Sacs.
Pernambuco	1,500,000
État de Rio de Janeiro	300,000
Sergipe	400,000
Alagoas	400,000
Parahyba	200,000
Total	2,800,000

Les besoins de la consommation sont évalués à 2,300,000 sacs. Il y a donc un excédent de 500,000 sacs auxquels il faut ou trouver un débouché extérieur, et c'est le but des négociations engagées avec le Portugal, les Républiques de la Plate et le Chili, ou assurer une application industrielle à l'intérieur sous forme d'alcool.

RECETTES DOUANIÈRES PENDANT LE MOIS D'AOÛT 1901-2.

Voici les recettes (en contos de reis) des douanes pour le mois d'août comparées à celles du mois correspondant de l'année 1901:

	1902.	1901.		1902.	1901.
Rio de Janeiro	6,138	5,898	Paranangua	104	153
Santos	2,941	2,479	Parahyba	97	58
Para	1,417	1,033	Florianopolis	89	143
Bahia	1,118	1,070	Paranahyba	41	20
Pernambuco	992	1,106	Victoria	23	26
Rio Grande do Sul	757	678	Aracaju	15	....
Porto Alegre	376	372	Livramento	15	....
Maranhão	289	170	Penedo	13	8
Ceara	262	129	Natal	8	6
Jaragua	126	170			

LES RECETTES DOUANIÈRES DE SANTOS.

Pendant le premier semestre de l'année en cours, la recette de la douane de Santos a été de 18,155 contos, soit 3,221 contos de plus que pendant la même période de l'année 1901. Cette augmentation de recettes est une preuve évidente du développement de la prospérité de cet État et de la bonne organisation du service douanier de Santos.

Pendant ce semestre, les droits d'importation ont produit 12,134 contos-papier et 3,169 contos-or, contre 9,762 contos-papier et 2,579 contos-or en 1901.

COLOMBIE.

TARIF DU VISA DES FACTURES CONSULAIRES.

Le "Board of Trade Journal" du 28 août 1902, fait connaître que le Board of Trade a reçu, par l'entremise du Ministère des Affaires Étrangères d'Angleterre, une copie et une traduction d'une loi mise en vigueur le 1er août au sujet des règlements à suivre par les agents consulaires et des taxes qu'ils devront prélever sur le visa des factures et manifestes de marchandises destinées aux ports colombiens, ainsi que sur le tonnage et les colis-postaux. Voici les principaux articles de cette loi:

"Pour les effets du visa consulaire, les factures consulaires se diviseront en quatre classes, savoir:

"1° Les factures ne mentionnant que des articles de fer, de cuivre, de zinc ou de bois destinés à des machines appartenant à des entreprises industrielles; chemins de fer, vapeurs, éclairage électrique, télégraphes, téléphones, imprimeries, verreries at faïenceries, fabriques de bougies, de tissus et autres établissements déclarés officiellelement d'utilité publique;

"2° Les factures d'une valeur maxima de 200 piastres;

"3° Les factures d'une valeur supérieure à 200 piastres et n'excédant pas 500;

"4° Les factures d'une valeur supérieure à 500 piastres.

"Art. 2. Toute facture autre que celles relatives à des objets ornés de pierres précieuses, d'or, de platine ou d'argent, qui payeront une surtaxe spéciale indiquée ci-après, acquittera les droits suivants pour le visa consulaire pour 1,000 ou fraction de 1,000 piastres:

"Factures de 1re classe, 3 piastres.

"Factures de 2e classe, 6 piastres.

"Factures de 3e classe, 8 piastres.

"Factures de 4e classe, 10 piastres.

"Toute facture relative à des articles ornés de pierres précieuses, d'or, de platine ou d'argent, sera frappée de la surtaxe ci-après:

"Articles avec pierres précieuses, 40 pour cent.

"Articles en or, 10 pour cent.

"Articles de platine ou d'argent, 3 pour cent.

"Les droits de manifestes seront perçus dans les consulats, à raison de 5 piastres pour la première centaine de colis ou de 1 piastre pour chaque autre centaine ou fraction de centaine.

"Toute marchandise étrangère débarquée dans un des ports de l'isthme de Panama et destinée à d'autres ports nationaux, devra être accompagnée d'un manifeste muni du visa correspondant délivré par l'administration du Trésor; le coût de ce visa sera de 3 piastres-argent pour les 50 premiers colis, et de 1 piastre-argent pour chaque autre centaine ou fraction de centaine.

"En cas de non présentation dans une douane de la facture consulaire au moment de la visite de la marchandise, la junte compétente procédera à l'évaluation en or, base d'après laquelle on prononcera contre l'importateur une amende égale au quadruple des droits consulaires qu'il aurait eu à payer, sans préjudice des pénalités édictées par les articles du Code des douanes.

"En ce qui concerne les colis-postaux recommandés, on percevra 2 pour cent de la facture correspondante ou la surtaxe imposée aux objets d'or, d'argent, de platine ou avec pierres précieuses, payable en or, ou son équivalent en papier-monnaie, comme compensatien de la taxe consulaire sur les marchandises qu'ils contiennent.

"Une taxe de 1.50 piastres en or sera perçue sur chaque tonne de marchandise débarquée dans les ports colombiens et destinée au commerce, mais la Légation anglaise à Bogota fait remarquer, en transmettant ce décret, que les navires colombiens sont exempts de tous ces frais et par conséquent les navires anglais jouiront de la même exemption d'après les termes du traité de 1866."

LOI MINIÈRE.

Une nouvelle loi minière augmentant considérablement les frais d'exploitation a été mise en vigueur à partir du 1^er^ juin 1902.

Voici en quelques mots les changements les plus notoires dans cette industrie: Autrefois il n'y avait aucun frais quand on déclarait vouloir mettre une propriété minière en exploitation, tandis que maintenant il faut payer $10, soit environ $4 en or. D'après l'ancienne loi, il fallait payer $5 ($2 or) quand on déclarait la mise en exploitatión de trois *pertenencias;* maintenant, il faut payer $500 ($200 en or) pour chaque *pertenencia.* L'impôt sur le titre de propriété était autrefois de $10 ($4 or) et maintenant, d'après la nouvelle loi, il est de $150 ($60 or). L'impôt annuel sur chaque *pertenencia* était de $2 (80 cents), actuellement il est de $100 ($40), qu'il soit en exploitation ou non.

L'impôt sur les placers, qui était de $1 (40 cents) pour une surface de 5 kilomètres carrés s'élève actuellement à $150 ($60). Avec ce tarif le prix de la plus petite concession minière atteindra $250 ($100) et même plus.

Il y a beaucoup de plaintes au sujet de cette augmentation et un grand nombre de personnes pensent qu'elle retardera le développement des mines.

COSTA RICA.

CHARBONNAGES DANS LA RÉPUBLIQUE.

Les gisements de charbon de Costa Rica sont d'une étendue considérable et d'une exploitation facile. De plus on assure que le charbon est essentiellement de la même origine et du même caractère géologique que celui des régions anthracites de la Pennsylvanie. Actuellement on considère les avantages qu'on pourrait retirer de l'exportation du charbon aux États-Unis, et on a pris des mesures afin de développer les ressources qui sont encore à l'état latent dans ce pays.

Le "Pacific States Investor" du mois de novembre 1902 fait connaître que la Compagnie de Pétrole et de Charbon de Costa Rica a reçu de nombreuses lettres de capitalistes américains demandant une conférence en vue d'exploiter sur une grande échelle les gisements houilliers de la Compagnie qui sont situés sur le littoral de l'Atlantique. On fait des arrangements pour l'exploitation immédiate des gisements de la Compagnie qui se trouvent dans la Province de Talamanca et un expert représentant un syndicat de San Francisco a été autorisé à faire un examen sérieux des terrains houilliers sur le Golfe de Nicoya avant de faire un bail de vingt ans.

Le "Mexican Herald" s'exprime ainsi au sujet de la situation du charbon dans Costa Rica: "La Compagnie ci-dessus mentionnée est complètement maîtresse des grandes quantités de pétrole et de charbon qui se trouvent dans la République de Costa Rica, en vertu d'une concession d'une durée de cinquante ans. Les propriétés de la Compagnie comprennent plus de 50,000 acres des meilleurs terrains bitumineux et houilliers que l'on puisse trouver et qui à la surface constituent d'excellents terrains agricoles convenant parfaitement à la culture du café, du cacao, du bananier et du caoutchouc. La Compagnie a commencé ses opérations et comme elle a, pour ainsi dire, le monopole de ces combustibles, elle est assurée de faire de grands bénéfices.

MODIFICATIONS DOUANIÈRES.

Ordonnance du 26 juin 1902, établissant le régime applicable aux filets de pêche.

["La Gaceta" du 26 juin 1902.]

En vertu de la présente ordonnance, les filets destinés à la pêche, qu'ils soient munis ou non de leurs plombs et de leurs flotteurs, acquitteront 6 centimes de colon ($0.06) par kilogramme, avec la surtaxe de 50 pour cent.

TRAITÉ AVEC LA BELGIQUE POUR LA PROTECTION DES MARQUES DE FABRIQUE.

Le Congrès de Costa Rica a approuvé et le Président a signé un traité entre cette République et la Belgique pour la protection des marques de fabrique.

Les marques de fabrique auxquelles ce traité s'applique sont celles qui appartiennent légitimement aux fabricants et aux négociants qui s'en servent.

Ce traité sera valable pour cinq ans à partir de la date de l'échange des ratifications, mais dans le cas où ni l'une ni l'autre des parties contractantes ne donnerait avis de son abrogation avant l'expiration des cinq ans, il resterait en vigueur d'une année à l'autre jusqu'à ce que l'une des parties ait signifié son désistement.

CUBA.

COMMERCE DE CHAUSSURES.

Les dernières données comparatives ayant trait au développement de Cuba au point de vue du commerce de chaussures sont comprises dans es statistiques des onze premiers mois finissant le 31 mai 1901, comparées avec la même période de l'année fiscale finissant le 19 mai 1902, date de la fin de l'occupation américaine. Dans ces statistiques on ne tient pas compte de la fraction du mois non expiré.

L'importation dans la première période s'est élevée à 1,899,041 paires, évaluées à $1,429,109. L'Espagne en a fourni 74 pour cent, soit une valeur de $1,061,739, au prix moyen de 69 cents la paire; et les États-Unis ont fourni un quart de l'importation totale, soit une valeur de $361,957, au prix moyen de $1 la paire. Dans les onze mois finissant le 19 mai 1902, le total des importations s'est élevé à 1,925,373 paires, évaluées à $1,557,770. Les États-Unis montrent une augmentation considérable, ayant fourni presqu'un tiers, soit une valeur de $486,585, ce qui fait un prix moyen de 96 cents la paire, tandis que les importations provenant de l'Espagne ont été de 68 pour cent environ, soit une valeur de $1,067,792, montrant une augmentation de peu d'importance sur la période précédente. L'article fournit paraît d'une qualité supérieure et coûte en moyenne 75 cents la paire.

Ce résultat doit être satisfaisant pour les fabricants de chaussures de ce pays, puisqu'on l'atteint malgré le fait que la forme qui convient à la mode cubaine exige de la part des fabricants américains des efforts soutenus pour pouvoir concourir favorablement avec le commerce espagnol.

ÉTATS-UNIS.

COMMERCE AVEC L'AMÉRIQUE LATINE.

IMPORTATIONS ET EXPORTATIONS.

On trouvera à la page 1394 le dernier rapport du commerce entre les États-Unis et l'Amérique Latine, extrait de la compilation faite par le Bureau des Statistiques du Ministère des Finances. Le rapport a trait au mois de septembre 1902 et donne un tableau comparatif de ce mois avec le mois correspondant de l'année 1901. Il donne aussi un tableau des neuf mois finissant au mois de septembre en les comparant avec la période correspondante de l'année précédente. On sait que les chiffres des différents bureaux de douane montrant les importations et les exportations pour un mois quelconque ne sont reçus au Ministère des Finances que le 20 du mois suivant et qu'il faut un certain temps pour les compiler et les faire imprimer, de sorte que les résultats pour le mois de septembre ne peuvent être publiés avant le mois de novembre.

COMMUNICATION MARITIME AVEC LE MEXIQUE ET L'ÎLE DE CUBA.

Le 20 octobre 1902 l'Administration des Postes à Washington a mis en adjudication le transport de la poste entre New York et la Havane (Cuba) et Tampico (Mexique). On n'a reçu qu'une soumission, celle de la New York and Cuba Mail Steamship Company, qui a demandé $1 par mille pour chacune des deux routes. Une route va de New York à la Havane et le contrat pour le service doit durer cinq ans, commençant le 1^er^ novembre 1902, avec un service mensuel, une vitesse minimum de quatorze nœuds par heure et un tonnage minimum de 2,500 tonnes. L'autre route va de New York à Tuxpan, Mexique, avec escale à la Havane, Progreso, Tampico à l'aller et à Vera Cruz et à d'autres points au retour. Les exigences quant à la vitesse et au tonnage sont les mêmes que pour la route allant à Cuba et le service est menseul. Le contrat sera en vigueur pendant dix ans et les vapeurs sur les deux routes doivent sortir de chantiers américains.

GUATÉMALA.

MODIFICATIONS DOUANIÈRES.

Décret du 4 août 1902, prorogeant jusqu'au 30 juin 1903 les effets du décret nº 617 relatif aux droits d'exportation applicables au café.

["El Guatemalteco" du 11 août 1902.]

En vertu du présent décret et sous réserve de toutes autres considérations qui pourraient en modifier la teneur, sont prorogés pour une nouvelle période d'une année qui prendra fin le 30 juin 1903, les effets du décret nº 617, en date du 12 août 1901. En conséquence, l'exportation du café en fèves continuera à être frappée d'un impôt de 6 pesos par quintal, payables en monnaie du pays, et le café en parchemin acquittera un droit de sortie proportionnel à la taxe susindiquée.

MEXIQUE.

COMMERCE EXTÉRIEUR EN 1902.

Les plus récentes statistiques sur le commerce extérieur de la République du Mexique pour l'année fiscale finissant le 30 juin 1902, accusent pour les importations une valeur totale de $51,448,343.74 en or, contre $53,123,953.39 en 1901. Il y a donc eu une diminution de $1,675,699.65 en 1902 en la comparant à l'année précédente.

Les exportations de produits mexicains pendant l'année se sont élevées à une valeur de $138,454,435.50 en monnaie mexicaine, contre $132,454,680.73 en 1901, soit une plus-value de $5,999,804.57.

Au taux moyen du change de l'année fiscale 1900–1901, la valeur des importations de cette année, soit $53,123,953.39 en or, représente une somme de $108,209,830.08 en argent mexicain, tandis que les importations, qui ont accusé une diminution en 1901-2, et qui étaient de $51,448,343.74 en or, au taux moyen du change pour cette dernière année, représentent $115,980,991.85 en argent mexicain. La balance du commerce pour 1902, fait donc ressortir une somme se montant à $22,473,443.45 en argent en faveur de la République, contre un total de $24,244,850.65 en argent pour l'année antérieure.

COMMERCE PENDANT LES NEUF PREMIERS MOIS DE 1902.

Les statistiques commerciales de la République du Mexique pour les neuf premiers mois de l'année fiscale 1902, publiées par le Bureau de Statistiques du Ministère des Finances, font ressortir pour les importations une valeur totale de $44,378,251 en or, contre $48,037,851 pour la même période de l'année fiscale précédente. Pour les exportations, la valeur en argent a atteint $113,496,098.50, contre $114,136,377.25 pour les mêmes mois de l'année 1901. Ces chiffres indiquent que la diminution dans la valeur des importations se porte principalement sur les machines et appareils, les tissus de coton, le papier et les marchandises en papier, les eaux-de-vie et liqueurs. Toutefois cette baisse n'est pas due à la diminution dans la consommation des articles signalés ni à une demande moins considérable, mais elle est le résultat du développement de l'industrie nationale qui est à même de suppléer à la demande.

Le Gouvernement mexicain a encouragé par tous les moyens possibles, la manufacture des tissus de coton et la production a augmenté avec tant de rapidité que le Mexique peut maintenant exporter et il cherche des débouchés dans l'Amérique du Centre et du Sud.

On a fait de grands progrès dans la manufacture du papier et on peut fabriquer dans le pays des papiers de toutes sortes. Cependant le Mexique ne produit pas encore assez de papier pour satisfaire à la consommation locale.

La fabrication de la bière et des liqueurs s'est développée énormément pendant l'année passée et le Mexique possède maintenant assez de brasseries pour fournir à la consommation nationale un article qui égale la bière importée et qui coûte bien moins cher. L'alcool dont on se sert est extrait de plants mexicains; la taxe annuelle sur les distilleries d'alcool s'élève à $500,000.

STATISTIQUES POSTALES POUR L'ANNÉE FISCALE FINISSANT LE 30 JUIN 1902.

Les statistiques générales de la poste pour l'année fiscale finissant le 30 juin 1902, telles qu'elles ont paru dans le "Diario Oficial," font ressortir une augmentation de 12.35 pour cent sur l'année fiscale précédente, le total des opérations en 1901–2 s'élevant à $2,399,232.34, contre $2,135,520.82 en 1900–1901. La vente des timbres-poste pour l'année dernière a accusé une somme de $2,049,680.63, contre $1,844,815.40; le loyer des boîtes aux lettres pour la même année, $60,591, contre $54,759 pour l'année antérieure, soit un bénéfice de $5,832; amendes et confiscations pour l'année dernière, $32,452.84, contre $22,597.61 pour l'année antérieure; mandats-poste, $218,355.14 pour l'année dernière, contre $180,534.92 pour l'année antérieure, et mandats internationaux, $3,737.59 pour l'année dernière, contre $3,307.78 pour l'année antérieure, soit un gain total dans les mandats-poste de $38,250.03; abonnements des rédacteurs, $34,415.14 pour l'année dernière, contre $29,506.11 pour l'année précédente; ce qui fait ensemble un total de $2,399,232.34 pour 1901–2, soit une augmentation nette de $263,711.52 sur l'année 1900–1901.

ACHÈVEMENT DE LA LIGNE CENTRALE DU MEXIQUE AU PACIFIQUE.

Le "Mexican Herald" du 13 du mois dernier publie en détail le contrat passé avec le Chemin de fer Central du Mexique et MM. HAMPSON ET SMITH pour l'achèvement de la ligne qui va au Pacifique. Cette ligne a un embranchement qui, partant de la ligne principale à Irapuato, va à Guadalajara et de là à Tuxpan. On ne doit pas confondre ce dernier endroit avec le petit port du même nom situé dans l'État de Vera Cruz.

Il est stipulé dans le contrat que les entrepreneurs construiront 73 kilomètres sur le nouvel embranchement central à la côte du Pacifique pour la somme de $3,500,000 approximativement.

La ligne s'étendra de Tuxpan à Colima et sur cette courte distance il faudra construire 13 tunnels et 17 ponts, le tunnel le plus long étant de 430 pieds, et le pont le plus long étant de 600 pieds et la hauteur du pont le plus élevé étant de 175 pieds.

Le contrat exige l'achèvement des travaux dans un délai de vingt-six mois. Le travaux de construction seront entrepris à Tuxpan et s'étendront dans la direction de la côte.

SERVICE MENSUEL DE PAQUEBOTS-POSTE ENTRE LES PORTS DU GOLFE DU MEXIQUE.

Le "Journal Officiel" du 9 du mois de septembre publie les conditions du contrat passé entre le Gouvernment mexicain et l'agent de la ligne de vapeurs du "North German Lloyd" pour l'établissement d'un service mensuel régulier entre les ports de Tampico, de Vera Cruz, et l'un des ports suivants sur le Golfe du Mexique: Coatzacoalcos, Frontera, Laguna ou Progreso; et Brême, Anvers, un ou plusieurs ports espagnols et un ou plusieurs ports cubains.

La compagnie s'engage à faire gratis pour ce Gouvernment le service postal entre les ports ci-dessus mentionnés et à transporter 10 tonnes métriques de marchandises, soit en allant ou venant des ports mexicains.

En échange du service postal et du transport gratis des 10 tonnes de marchandises pour le Gouvernement les vapeurs de la compagnie seront exempts du paiement de 40 pour cent des droits de tonnage établis par le décret du 1er juillet 1898. Les vapeurs de la compagnie pourront aussi faire le commerce de cabotage conformément à l'article 293 de l'Ordonnance douanière. La compagnie pourra maintenir, dans les ports où leurs navires font escale, les gabares, bateaux et remorqueurs nécessaires pour le service de leur ligne.

Le contrat sera en vigueur pendant trois ans à partir de la date de publication et pourra être prolongé pour une période de même durée si ni l'une ni l'autre des parties contractantes ne déclare dans l'intervale son désistement.

DRAINAGE ET SERVICE DES EAUX DANS LA VILLE DE TAMPICO.

On a accordé à Monsieur WILLIAM ASTOR CHANLER l'adjudication pour l'établissement des eaux et les travaux sanitaires dans la ville de Tampico d'après les plans et devis qui ont été soumis au Gouvernement. L'entrepreneur doit commencer les travaux dans un délai de six mois à partir du 15 août, date du contrat, et les achever dans l'espace de trois ans à partir de cette même date. Pour effectuer le payement de ces travaux, qui doit s'élever à la somme de $2,187,529.73, l'État de Tamaulipas fera une émission d'obligations et l'on prélevera une somme de 2 pour cent sur les droits de douane perçus au port de Tampico. Les obligations payeront le montant des sommes non couvertes par les 2 pour cent provenant des droits de douane et seront émises à 80 pour cent de la valeur inscrite sur le bon à la Banque Centrale du Mexique, qui s'est engagée à prendre toute l'émission à ce taux. Après l'achèvement des travaux on continuera de prélever les 2 pour cent sur les droits de douane et on les mettra en réserve pour former un fonds d'amortissement des obligations qui rapporteront un intérêt de 5 pour cent payable à la fin de chaque trimestre dans la ville de Mexico. On mettra aussi en réserve pour la même objet les fonds provenant des taxes sur les eaux.

Pour garantir l'exécution des conditions souscrites, l'entrepreneur déposera la somme de $50,000 en obligations de 5 pour cent de la dette remboursable à la Banque Centrale du Mexique où elles resteront en dépôt pendant la durée de l'entreprise. Ces obligations pourront être échangées contre une somme égale en obligations de l'Etat de Tamaulipas émises à la Banque Centrale.

DÉCOUVERTES DE RUINES ARCHÉOLOGIQUES À OAXACA.

Le "New York Sun" du 5 octobre 1902 fait connaître qu'on a découvert récemment des ruines de première importance près de la ville d'Oaxaca, au sud du Mexique. Ces ruines ont été découvertes par LEOPOLDO BATRES, archéologue du gouvernement du Mexique qui accompagnait le Professeur MARSHALL H. SAVILLE, du Muséum d'Histoire Naturelle des Etats-Unis, dans les recherches qu'il faisait dans cette région.

Les fouilles entreprises ont amené la découverte d'une grande ville plus ancienne que toutes celles qu'on a trouvées jusqu'ici sur le continent américain, et les objets découverts dans les temples et les tombeaux semblent rattacher cette ville à la période égyptienne ou chinoise. Les ruines sont plus étendues que celles de la ville de Mitla, située seulement à quelques milles de distance, et paraissent avoir été couvertes par la poussière des temps bien avant la fondation de Mitla.

Les explorateurs sont allés à Oaxaca en vue de faire des fouilles dans certains tumulus ou tombeaux et les découvertes faites jusqu'ici ont plus que justifié leurs efforts. Les ruines mises à jour par Señor BATRES sont situées sur le sommet du Mont Alban, qui s'élève à 1,200 pieds environ au-dessus de la vallée d'Oaxaca et se trouve à 6,000 pieds environ au-dessus du niveau de la mer. La montagne est à quelques milles seulement de la ville d'Oaxaca, les flancs et le sommet ont été cultivés pendant des années par les indigènes. Le *patio*, ou cour intérieure de ce qui semble être le plus grand temple qui ait jamais été construit sur le continent américain, était couvert d'un champ de maïs. On trouve dispersés sur le sommet de la montagne et rangés systématiquement, des tumulus ou *mogotes*, ainsi qu'on les appelle en Zapotèque. Ils paraissent de même nature que les centaines d'autres qu'on trouve dans la grande vallée d'Oaxaca.

Ces tumulus sont rangés autour d'un grand carré de plusieurs acres d'étendue; après examen, on constate que ce carré formait la cour centrale du temple. Quatre monticules en formes de pyramides s'élèvent au centre du grand *patio*, qui, d'après l'avis de Señor BATRES, formaient les autels centraux du grand temple. De plus, ils devaient servir de tombeaux aux monarques qui étaient au pourvoir pendant la construction de la ville, et c'est dans l'un de ces tumulus qu'on a fait la plus importante découverte. Le premier objet qu'on a rencontré dans les fouilles a été un grand obélisque de porphyre, ressemblant un peu à l'obélisque égyptien connu sous le nom de "Aiguille de Cléopâtre." L'obélisque a 4 mètres de hauteur, 60 centimètres de face et 40 centimètres de côté. Il s'élève en lignes perpendiculaires jusqu'à 40 centimètres du sommet, et à partir de ce point il prend la forme d'un prisme rectangulaire.

Sur la face de l'obélisque, il y a une figure et aussi une tête de mort qui sont exécutées avec le plus grand soin. Le portrait en bas-relief est évidemment celui d'un monarque. Le derrière de l'obélisque est couvert d'hiéroglyphies qu'on n'a pas encore essayé de traduire.

La trouvaille la plus importante qui vient ensuite est celle d'un vase en jade contenant plus de soixante échantillons de beau jade.

On a trouvé partout au Mexique des morceaux de cette pierre pendant le siècle dernier et les archéologues les considèrent comme une preuve d'une communication antérieure entre les races préhistoriques du Mexique et les Chinois. Les Azèques n'ayant pour ainsi dire pas de communications avec la Chine, ce jade leur est venu sans doute des premiers peuples et évidemment ils y attachaient beaucoup de prix.

Sur un des morceaux se trouve gravée la figure d'un Chinois avec tous les traits caractéristiques marqués très distinctement.

Les archéologues sont de l'avis que Mitla, la grande ville sacrée des Nahuans ou Toltèques, a été détruite à une époque que l'on peut placer entre le commencement de l'ère chrétienne et l'année 500 après J. C., tandis que Monsieur BATRES pense que la ville découverte sur le Mont a été détruite par le grand soulèvement, probablement le déluge mentionné dans la Bible, qui a englouti le continent de l'Atlantis.

Les tableaux, dessins, plans et devis, avec une description complète du travail, ainsi que les observations et conclusions que l'explorateur en a tirées, seront soumis aux archéologues distingués qui doivent se réunir en congrès à New York.

NOTES FINANCIÈRES ET ÉCONOMIQUES.

Pendant les dix années fiscales commençant le 1er juillet 1892 et finissant le 30 juin 1902, le Département de Fomento a accordé 17,929 concessions minières de toutes classes, embrassant 215,973 hectares ou 529,670 acres. En 1892–93 on a accordé 417 concessions; en 1899–1900 ce nombre a atteint 2,184; en 1900–1902, 2,339 et en 1901–2, 3,607. Ces chiffres indiquent la marche en avant qu'il y a eu dans les intérêts miniers du pays, surtout pendant les trois dernières années.

Selon les statistiques publiées récemment par le gouvernement mexicain, il ressort que pendant les vingt-quatre ans jusqu'en 1900–1901, inclusivement, la production de l'argent mexicain a atteint une valeur de $1,094,623,182, tandis que celle de l'or a été de $67,117,277.

D'après un rapport de M. Barlow, le Consul-général des États-Unis, le total du capital américain placé au Mexique s'élève à $750,000,000 en monnaie mexicaine. Sur cette somme, on a placé $200,000,000 dans l'intervalle du mois de janvier au mois de mai de l'année courante. Après les États-Unis, voici par ordre d'importance les noms des pays étrangers qui ont placé des fonds dans le Mexique: l'Espagne, la Grande Bretagne, la France, l'Allemagne, la Belgique, l'Italie et la Suisse.

Les droits d'importation et d'exportation et les droits d'entrée dans les ports pour le mois de juillet dernier se sont élevés à $2,277,341.31, contre $2,069,344.32 pour le même mois de l'année antérieure, soit une augmentation de $207,977.04.

NICARAGUA.

MODIFICATIONS DOUANIÈRES.

Loi du 5 octobre 1901, relative à l'importation des vins.

[Circulaire du Ministère des finances du 5 octobre 1901.]

Article 1. Par abrogation des décrets du 31 juillet 1900 et du 8 janvier 1901, réglementant l'importation des vins légitimes de raisin et établissant une surtaxe de 20 pour cent à leur entrée, tout vin, quelle que soit sa qualité, ne sera assujetti qu'aux seules taxes établies dans les Tarifs en vigueur.

Art. 2. La rubrique n° 1238 du Tarif relative au champagne frappé d'un droit de 60 centavos par kilogramme, étant abrogée, la rubrique n° 1244 aura la teneur suivante:

		Pesos.
1244	Vins mousseux de toute sorte, en bouteilles, y compris le champagne, généreux ou secs, s'ils ne titrent pas plus de 20 degrés, par kilogramme	0.60
	Les mêmes titrant pas plus de 20 degrés, par degré et par kilogramme brut	.2½

Art. 3. La présente loi, qui fera partie intégrante du Tarif, entrera en vigueur à partir de la date de sa publication

PARAGUAY.

DÉNOMBREMENT DE LA VILLE D'ASSOMPTION.

D'après le dénombrement effectué le 1er juillet 1902, la ville d'Assomption comptait 51,719 habitants, le sexe féminin y prédominant, de même que pendant plusieurs années. Les statistiques font ressortir 28,545 femmes et 23,174 hommes, dont la nationalité est distribuée de la manière suivante: 47,075 Paraguayens et 4,644 étrangers, y compris 1,274 Argentins et 1,245 Italiens. Viennent ensuite, 718 Espagnols, 328 Français, 234 Allemands, 220 Uruguayens, 177 Brésiliens, 127 Autrichiens et 1 seul Japonais.

CONDITIONS ÉCONOMIQUES.

Pour compléter les chiffres publiés dans le BULLETIN MENSUEL du mois de septembre, on a extrait les renseignements suivants d'un rapport transmis au Ministère des Affaires Étrangères à Londres par M. A. GOSLING, Consul d'Angleterre à Assomption, donnant ainsi un résumé général de la situation économique du Paraguay en 1901.

Le commerce d'Assomption, qui est plus considérable qu'on ne le suppose généralement, se fait surtout par l'entremise de maisons européennes établies à Buenos-Ayres et à Montévidéo.

On peut trouver ici la plupart des articles que se vendent en Europe, et quoiqu'ils ne soient pas de la meilleure qualité, les prix n'en sont pas excessifs lorsqu'on considère les prix du frêt et les droits élevés. Quelques-unes des plus importantes maisons de commerce et celles qui vendent au plus bas prix font le commerce d'importation et d'exportation. Il y a à Assomption 25 grandes maisons qui font l'importation et presque toutes ces maisons vendent des articles de fabrication anglaise.

Au mois de juillet dernier une réunion à laquelle les principales maisons de commerce étaient représentées a eu lieu à la Chambre de Commerce d'Assomption. Parmi les décisions qui ont été prises se trouve celle-ci: "On se procurera une certaine somme d'argent dans le but de recueillir des statistiques exactes au sujet des exportations et des importations du pays."

Il y a trois banques principales au Paraguay, le Banco Mercantil, le Banco de los Ríos et le Banco Territorial. Il y a aussi une banque agricole, institution fondée par le Gouvernement dans le but de développer l'agriculture au moyen de prêts sur la propriété foncière et aussi par l'achat de produits divers.

On peut évaluer les importations pour l'année 1901 à £600,730. On n'a pas pu se procurer de statistiques se rapportant à la valeur des importations provenant des divers pays d'Europe. Le rapport consulaire sur ce district pour 1900 contient un état de la valeur approximative de ces importations, d'après lequel les quantités importées du Royaume-Uni se sont élevées à £167,710 environ. Les chiffres pour 1901 doivent être probablement moins élevés pour les raisons déjà citées.

Un rapport consulaire allemand évalue à £160,000 les marchandises importées d'Allemagne. Le riz, dont on fait une grande consommation, est importé principalement de Brême. L'huile de pétrole, article de grande importance dans un pays qui se sert entièrement de lampes pour l'éclairage provient des Etats-Unis. On importe le sucre de France et de la République Argentine, les vins et spiritueux viennent d'Espagne et d'Italie. Les spiritueux anglais, tels que la genièvre et le whisky y trouveraient peut-être un débouché. On n'importe d'Europe qu'une très petite quantité de bière, les frais étant trop élevés pour permettre la concurrence à la Brasserie Nationale qui fait de bonnes affaires. On importe principalement des Etats-Unis et d'Allemagne la quincallerie et les machines. L'Allemagne vend ces produits meilleur marché, et par conséquent fait la plus grande partie du commerce. La Hollande, l'Angleterre et l'Allemagne importent la verrerie et la poterie; l'Allemagne et l'Autriche, la porcelaine; la Belgique, les verres à vitre; l'Allemagne les verres et cristaux; les Etats-Unis et la Suisse, les horloges et pendules. Le commerce des cuirs est presqu'entièrement entre les mains de l'Allemagne. Les fusils et les révolvers proviennent principalement des Etats-Unis, de Belgique et d'Allemagne; l'Angleterre et l'Allemagne importent les couteaux et poignards; les meubles proviennent d'Autriche et une quantité peu considérable provient des Etats-Unis. Le principal article d'importation, les tissus de coton, est encore entre les mains des Anglais. Toutefois, l'Allemagne tient le monopole du commerce de *ponchos* et jusqu'à un certain point celui des draperies. Les chapeaux qui proviennent d'Italie et d'Allemagne sont généralement vendus comme articles de fabrication française. Les chapeaux de meilleure qualité sont de fabrication anglaise.

D'après une publication de date récente, on compte dans les districts de l'intérieur 850 maisons de commerce dont le capital réuni est estimé à £350,000. Il y a dans la ville d'Assomption seulement, 560 magasins formant un capital de £1,000,000 environ. Il y a 250 maisons qui représentent les industries nationales, dont le capital est évalué à £3,000,000. D'après la même autorité, les fonds placés dans l'élevage du bétail s'élèvent à £2,500,000 environ. Le capital allemand placé dans le pays est évalué à £300,000 et le capital anglais placé dans le Chemin de fer Central du Paraguay, est évalué à £1,457,000.

Les chiffres ci-dessous, basés sur les statistiques officielles, font ressortir les valeurs des exportations et des importations pendant les sept dernières années:

	Importations.	Exportations.
1895	£492, 010	£388, 578
1896	557, 267	409, 688
1897	442, 293	511, 054
1898	521, 697	492, 658
1899	502, 118	458, 150
1900	567, 724	412, 858
1901	600, 730	505, 861

Voici les principaux articles d'importation pendant l'année 1901:

	Valeur.
Cuirs séchés	£58, 647
Cuirs salés	92, 422
Yerba maté	154, 818
Tabac	38, 769
Bois de charpente	52, 792
Fruits	47, 574
Extrait de quebracho	13, 323

La plus grande partie des cuirs séchés et salés est expédiée en Allemagne au prix de 9d et 5¾ d la livre. Il se trouve dans ce district consulaire une quantité considérable de peaux de crocodiles.

Les exportations de yerba maté, ou de thé paraguayen, dans les différentes Républiques sud-américaines sont très grandes. On en a expédié des échantillons aux Etats-Unis et en Allemagne et du consulat d'Allemagne on en a expédié un échantillon à une maison de Londres. Il y a ici une maison allemande qui prépare une qualité supérieure de yerba maté pouvant rivaliser avec le thé comme boisson. On l'emballe en paquets de 2 livres au prix de 1s. 6d.

La yerba maté est une boisson très rafraîchissante en été ou après un travail fatigant.

A la fin de l'année 1901, le représentant d'une maison du Paraguay qui s'intéresse beaucoup à la culture du tabac a visité les principaux marchés européens dans le but d'introduire le tabac paraguayen. On dit qu'il en a placé une quantité considérable en Espagne, où il a rapporté d'assez bons prix. Le gouvernement français en a acheté, par l'intermédiaire de la légation française, 30,000 livres à 2d. la livre. La compagnie dont il est question pourra fournir de 35,000 à 40,000 cigares par mois. Ces cigares, qui sont fabriqués avec le tabac provenant de semences de la Havane, se vendent ici aux prix suivants: 2s. 6d., 3s. 5d., 7s. 6d., 10s., 15s., £1, £1 15 s. et £2 10s., le cent. Le taux du change est de 8 pour cent ou $40 pour £1 sterling.

Le rapport fait par le consul sur ce district pour l'année 1900 mentionne d'une manière toute spéciale les différents de bois de charpente. On fait connaître que la Chambre de commerce du Paraguay a l'intention de classifier les diverses qualités et d'en transmettre une liste descriptive, avec échantillons à l'appui, aux différentes chambres de commerce de l'Europe.

On exporte dans la République Argentine et dans l'Uruguay des quantités considérables de fruits, principalement des oranges, des bananes et des ananas. Les oranges sont d'une qualité supérieure.

Deux milles cent cinquante-sept vapeurs, voiliers, et grands bateaux de cabotage sont entrés et sortis du port d'Assomption pendant l'année.

L'immigration pendant cette même période n'a pas été très grande.

Une maison allemande fabrique une huile de qualité supérieure extraite de noix de palmier et de noix de terre. Ces deux huiles ont une bonne couleur et très peu d'odeur et conviennent à la fabrique du savon.

L'élevage constitue la principale industrie du Paraguay et l'amélioration du bétail, quoique lente est visible. On importe de Matto Grosso, Brésil, beaucoup de zébus (espèce de buffalo de l'Inde), mais quelques éleveurs trouvent que le zébu ne convenient pas à la reproduction. Le principal avantage que possède le zébu est son immunité contre les attaques des tiques (ixodes) qui sont très nuisibles à quelques animaux de race. On a importé des Durhams, des Holsteins et des Herefords qui croisent bien avec les animaux du pays.

Le nombre des animaux abattus à Assomption pendant l'année s'élève à 33,245 têtes, représentant une valeur de £91,932 environ. On évalue à 3,500,000 têtes le nombre de bêtes à cornes dans tout le Paraguay.

En vue de l'urgente nécessité de faire des améliorations au port d'Assomption, à savoir: la construction d'un brise-lames et d'un quai, ainsi que le dragage de la rivière, les maisons de commerce d'Assomption ont offert de prêter au Gouvernement une somme maximum de £40,000. devant rapporter un intérêt de 8 pour cent par an.

On a avancé immédiatement la somme de £4,000 pour commencer les travaux de la construction du brise-lames; ces travaux étaient en voie d'exécution à la fin de l'année.

La plus grande partie des importations du Paraguay sont expédiées de Buenos-Ayres ou de Montévidéo en franchise de droits et par conséquent il y a peu de commerce direct avec les marchés européens. Un très petit nombre de voyageurs de commerce parcourent le pays. Voici les règlements établis pour les voyageurs de commerce au Paraguay:

Les voyageurs de commerce sont soumis, à leur entrée dans la ville d'Assomption, au paiement d'une taxe variant de $48.70 à $73.05. Une autre taxe dont le montant n'est pas spécifié est payable à leur entrée dans les autres villes de la République. Les échantillons n'ayant aucune valeur marchande et ne pouvant être d'aucun usage, tels que les échantillons d'étoffe, etc., peuvent entrer en franchise de droits. Les articles soumis aux droits pourront passer la douane, à condition qu'on s'engage à les payer dans le cas où les marchandises ne seraient pas réexpédiées dans un délai spécifié.

Une compagnie des États-Unis a obtenu l'adjudication pour l'éclairage à l'électricité de la ville d'Assomption.

En vertu d'une loi passée le 31 août 1900, les bicyclettes pouvaient entrer en franchise de droits jusqu'au mois d'août 1902, et les voitures avaient les mêmes privilèges jusqu'au mois de décembre 1902.

PÉROU.

COMMERCE PENDANT LES CINQ DERNIÈRES ANNÉES.

Le tableau ci-dessous, montrant la valeur totale du commerce du Pérou pour les cinq dernières années, est basé sur les chiffres publiés dans la "Gaceta Comercial" du 31 août de l'année dernière:

Année.	Importations.	Exportations.	Total.
1897	$1,612,814	$2,816,845	$4,429,709
1898	1,921,475	3,027,477	4,948,952
1899	1,873,494	3,072,591	4,946,085
1900	2,317,150	4,497,999	6,815,149
1901	2,758,223	4,298,378	7,056,601

SALVADOR.

MODIFICATIONS AUX DISPOSITIONS DOUANIÈRES.

Ordonnance du 9 juin 1902, relative à la franchise accordée à l'importation de certains articles.

["Diario Oficial" du 10 juin 1902.]

En vertu de la présente ordonnance, sera exempte de tous droits et impôts, l'importation des articles suivants:

Lampes complètes pour l'éclairage à l'alcool;

Cuisines, fourneaux et poëles pour différents usages domestiques et industriels;

Automobiles;

Embarcations et canots;

Moteurs pour toutes sortes de machines et, en général, tous objets non dénommés pour lesquels l'alcool est employé comme combustible ou force motrice.

La présente ordonnance entrera en vigueur à partir de cette date et restera applicable jusqu'au 1er mars 1903.

URUGUAY.

MODIFICATIONS AUX DISPOSITIONS DOUANIÈRES.

Régime douanier applicable à la chaux hydraulique.

[Circulaire de la Direction générale des douanes du 16 juillet 1902.]

En vertu de la présente circulaire et aux effets du dédouanement, la chaux hydraulique, non spécialement dénommée dans la loi douanière et dans le tarif, suivra le régime du ciment romain et de portland. En conséquence, ce produit sera évalué à raison de 1 peso et 60 centesimos les 100 kilogrammes et acquittera 20 pour cent de sa valeur, plus 5 pour cent de droit additionnel et 3 pour cent additionnels de patente.

STATISTIQUES SUR L'AGRICULTURE.

Voici, d'après un rapport que le consul anglais à Montévidéo a fait parvenir au Ministère des Affaires Étrangères à Londres, les principales exportations de l'Uruguay; le bétail sur pied, la laine, le bœuf salé, les cuirs, l'extrait de bœuf, les produits des abattoirs, les productions agricoles et les approvisionnements des navires. La valeur des exportations d'animaux vivants en 1901, s'est élevée à £100,730, plus £5,517,260, valeur des produits des abattoirs, et £121,840, valeur des productions agricoles.

Les importations d'animaux vivants se composaient de 113 chevaux, 1,022 béliers dont 353 du Royaume-Uni, et 118 taureaux dont 111 du Royaume-Uni.

On estime à 45,000 tonnes, la production totale de laine de l'Uruguay, se divisant comme il suit par rapport à la qualité: 1° Extra supérieure en finesse et qualité, 14,000 tonnes environ; 2° Laine bonne et propre, mais pas tout à fait de première classe, 12,000 tonnes environ; 3° Laine de bonne qualité de seconde classe, mais pas si fine que celles dont on a parlé ci-dessus, 10,000 tonnes environ, et 4° les mélanges de laines fines et grossières s'élevant à 2,000 tonnes; 2,500 tonnes de laine d'agneau (borrego) et 4,500 tonnes de laine d'une qualité tout à fait inférieure. La valeur de la tonte de laine pour les deux dernières saisons finissant en 1901 et 1902, s'est élevée approximativement à £2,500,000. La saison prochaine s'annonce bien, et vu la diminution de la gale et de la mortalité parmi les agneaux, on peut s'attendre à une augmentation considérable.

Les principales céréales cultivées dans l'Uruguay sont le maïs, le blé et un peu de graine de lin. On cultive aussi, mais en très petite quantité, l'avoine, l'orge et des graines pour les oiseaux. La récolte de blé de la saison 1900–1901 a été la plus mauvaise depuis 1892, à cause de la grande sécheresse. La superficie cultivée en blé était de 683,000 acres et le rendement, d'après les statistiques, était de 99,720 tonnes contre 187,376 tonnes pour l'année précédente. Les prévisions pour la nouvelle récolte indiquent 300,000 tonnes environ pour l'exportation. La récolte de maïs pour 1900–1901 a été bonne, étant de 141,648 tonnes, soit presque le double de celle de l'année antérieure; il y avait 448,450 acres en culture.

VÉNÉZUÉLA.

ÉTABLISSEMENT DE FABRIQUES DE PORCELAINE.

Le "Venezuelan Herald" du 12 octobre 1902, publie le texte du contrat passé entre le Ministre de Fomento des Etats-Unis du Vénézuéla, représentant le Pouvoir Exécutif d'une part et ELEODORO GONZÁLEZ, de Caracas, d'une autre part, qui, en vertu d'un décret exécuté à Paris le 1^er^ juillet 1902, représente en qualité d'avocat, le docteur ELÍAS MARTÍNEZ ORAMAS, demeurant à Marseille.

"ARTICLE 1. Le concessionnaire s'engage à établir dans le district fédéral ou dans d'autres points de la République du Vénézuéla, une ou plusieurs fabriques pour la manufacture d'objets en cristal, verre, porcelaine et poterie nécessaires à la consommation du pays. Les fabriques doivent être installées et mises en exploitation dans un délai de deux ans à partir de la date de l'approbation de ce contrat par le Congrès national, sauf en cas d'empêchement de force majeure ou d'accident, prouvé, légalement devant le Pouvoir Exécutif.

"ART. 2. En vue de protéger cette nouvelle industrie le Président accorde à l'entrepreneur les concessions suivantes: le droit exclusif d'exploiter ladite industrie dans l'Etat, le territoire ou district fédéral dans lequel la fabrique sera installée, et cela pendant les deux premières années de la durée de ce contrat; le droit de se servir gratis, pendant la durée de ce contrat, de toutes les matières premières qui se trouvent sur les domaines de l'Etat non cultivés; le droit d'importer, en franchise de droits, pour une fois seulement, les machines, appareils, instruments, matériaux de construction et outils destinés à l'installation et à l'exploitation de chacune des fabriques qu'il établira, à condition de se conformer aux formalités légales à chaque importation, et la franchise de droits pour cette entreprise, ses annexes et ses productions pendant la durée de ce contrat.

"ART. 3. Ce contrat est fait pour une durée de quinze ans, à partir de la date de son approbation par le Congrès National et pendant sa durée le Président n'accordera aucune concession de nature à porter préjudice aux droits acquis par le concessionnaire.

"ART. 4. Tous les doutes et discussions qui pourraient survenir au sujet de l'interprétation et de l'exécution de ce contrat seront réglés à l'amiable entre les parties contractantes, mais en cas de l'impossibilité de se mettre d'accord, elles déclarent qu'elles se soumettront en tout aux stipulations de l'article 139 de la constitution fédérale actuellement en vigueur et ces doutes ne pourront en aucun cas soulever des réclamations internationales.

"ART. 5. Le concessionnaire aura le pouvoir de transférer en partie ou entièrement les droits qu'il aura acquis par ce contrat, avec le consentement préalable du Pouvoir Exécutif, mais en aucun cas, il ne pourra les transférer à un gouvernement étranger."

SITUATION AGRICOLE ET INDUSTRIELLE.

Un récent tome du "Recueil Consulaire Belge" renferme un rapport intéressant et détaillé au sujet de la situation agricole, industrielle et commerciale du Vénézuéla, préparé par Monsieur F. VAN DER HEYDE, le Consul-Général, Chargé d'Affaires de Belgique à Caracas.

Au sujet de l'agriculture, le rapport dit que l'exploitation agricole au Vénézuéla repose en grande partie sur la culture du caféier. A côté du caféier, le Vénézuéla possède une autre richesse agricole; la culture du cacaoyer, dont le produit atteint sur les marchés européens les prix les plus rémunérateurs, eu égard à sa qualite tout à fait supérieure.

Le café généralement cultivé au Vénézuéla est celui d'Arabie, le *coffea arabica.* Il y fut importé en 1784 de la Martinique, où il avait été introduit au commencement du siècle.

Depuis quelques années les planteurs vénézuéliens font des essais avec le caféier d'Abyssinie au moyen duquel ils ont obtenu jusqu'ici de bons résultats. Cette culture n'est cependant pas encore assez avancée pour qu'on puisse se prononcer définitivement sur son avenir.

La superficie générale des plantations de café est estimée à environ 170,000 hectares. La production totale est évaluée à 850,000 sacs de 100 livres vénézuéliennes ou 46 kilogrammes. Cette production est bien faible si on la compare à celle du Brésil, où de l'État de Saint-Paul seul sortent plus de 6,000,000 de sacs. Le grand marché du café vénézuélien, le Hâvre, lui est fermé depuis six mois à cause de l'application du droit prohibitif de 300 francs les 100 kilogrammes.

C'est à Hambourg et à New York que s'écoule actuellement le produit.

Voici les cotations moyennes à la Guayra depuis 1895: 1895, 24¾ piastres le sac; 1896, 22 piastres; 1897, 19½ piastres; 1898, 11¾ piastres; 1899, 9½ piastres; 1900, 12¾ piastres.

On vend actuellement entre 9 et 10 piastres, ou 37 à 40 bolivars le sac de 46 kilogrammes.

De sa production, le pays consomme à peu près 200,000 sacs et il en exporte 650,000; 200,000 sacs de café de provenance colombienne sont annuellement exportés par le port de Maracaïbo.

La production minima du caféier est de un quart de livre espagnole et la production extrême ne dépasse pas 1 livre par pied. Au Brésil le rendement est beaucoup plus fort.

La récolte se fait comme au Brésil et les machines qui servent à la manipulation industrielle sont d'origine anglaise, américaine ou néerlandaise, mais ces installations agricoles sont encore bien rudimentaires et laissent beaucoup à désirer.

On rencontre au Vénézuéla deux qualités de cacao: le cacao "criollo," qui est le cacao indigène, et le cacao "trinitario," qui a été importé de Trinidad. Le cacao criollo se trouve à l'état sauvage dans les vallées situées à proximité de la mer où la température est chaude et humide. La qualité est absolument supérieure. Il obtient les prix de 72 à 120 bolivars la "fanega," soit 50 kilogrammes. Les plus importantes plantations de cacao sont sises entre La Guayra et Puerto-Cabello à une altitude de 500 mètres. Le cacao trinitario est inférieur en qualité au cacao criollo, mais il pousse plus rapidement. On le plante beaucoup aujourd'hui et quoiqu'il ait un goût âcre comparativement au criollo, qui est plus doux, il trouve facilement acheteur. Le trinitario se vend de 70 à 90 bolivars la fanega. La production annuelle de cacao au Vénézuéla est de 8,000 tonnes environ, récolte moyenne.

Le tabac pousse dans les terres chaudes et tempérées. On le plante d'août à novembre; la récolte se fait vers les mois de mai. Les lieux de production sont Barimas, Barquisimeto, Coro, Capadare, Maturin, Guanape, etc. Ce sont les tabacs de ces trois dernières provenances qui sont les plus employés aujourd'hui. Capadare fournit la meilleure qualité; Maturin la qualité inférieure, mais la plus abondante est la qualité intermédiaire qui vient de Guanape. Ces tabacs sont divisés en trois classes selon la grandeur et la beauté des feuilles et d'autres conditions spéciales de couleur, force, goût, parfum, etc. Les tabacs vénézuéliens sont d'un goût âcre.

On cultive maintenant à Périja, dans la région de Maracaïbo, des semences de tabac importées de la Havane où il est connu sous le nom de Vuelta-Abajo. C'est une maison allemande de Maracaïbo, qui y a créé cette industrie et on dit que ses essais sont satisfaisants. Le tabac de Périja ne s'exporte pas, mais cette maison en fait des cigares qui s'écoulent dans le pays en trois qualités à 10, 20 et 30 centimes.

Le caoutchouc est abondant au Vénézuéla. On le rencontre surtout dans le bassin de l'Orénoque. Plusieurs sociétés étrangères se sont formées depuis quelques années pour l'exploitation de ce riche produit—sociétés allemandes, américaines, françaises et belges. On a exporté l'année dernière du Vénézuéla un peu plus de 1,000,000 de kilogrammes de caoutchouc. Ce caoutchouc se vend sur les marchés étrangers en qualités fine, entrefine et sernamby, cotées respectivement 12 francs, 11.50 francs et 8 à 9 francs le kilogramme.

La culture du coton et de l'indigo n'a aucune importance au Vénézuéla.

La consommation de la banane est fort répandue au Vénézuéla, comme dans tous les pays tropicaux; seulement son exploitation au point de vie de l'exportation est absolument inconnue. La ligne directe de navigation reliant La Guayra, Puerto-Cabello et Maracaïbo aux Etats-Unis devrait cependant laisser espérer le succès à une entreprise d'exportation de ce produit.

La culture de la canne à sucre est très répandue. Lors du dernier recensement, sur un total général de 49,462 haciendas 11,020 se consacraient à l'exploitation de la canne. Celle-ci présente deux variétés: la "caña criolla," ou canne indigène, et la "caña de otaïti," ou des mers du sud. Cette dernière est plus forte, plus haute, d'une culture plus facile et d'une teneur en sucre plus grande.

Dans le Vénézuéla central, vallées du Túy, de l'Aragua, lac de Valencia, etc., la canne est usinée dans d'importantes fabriques possédant un outillage à vapeur. Dans la Cordillère les moulins sont beaucoup plus simples.

Les produits obtenus sont, sauf une insignifiante exportation, tous consommés sur place. C'est d'abord le sucre brun, en pain, le "papelon," dont le peuple fait son aliment journalier. L'énorme quantité qu'il en consomme n'a d'égale que celle "d'aguardiente," l'eau-de-vie de canne, la meilleure ressource des cultivateurs de canne. Une partie du sucre brut est raffinée et donne un beau sucre blanc, bien cristallisé, que consomme la classe aisée.

Les vastes forêts dont le Vénézuéla est couvert renferment toutes les belles essences tropicales. La main-d'œuvre rude et habile de même que les communications faciles manquent malheureusement presque partout, et c'est à cela qu'il faut attribuer en partie l'exportation relativement faible des bois vénézuéliens, à peine 4,000 tonnes par an. L'acajou, l'ébène, le citronnier, l'oranger n'y ont qu'une petite part, tandis que le bois de fer (vera), le guayacan et le zapatero en forment la presque totalité. L'Etat de Lara, par son climat salubre, sa population moins rare qu'ailleurs, la ligne ferrée de Barquisimeto au port de Tucacas qui le traverse de part en part, est une des régions forestières les plus facilement exploitables. Des entrepreneurs du pays contractent des fournitures de n'importe quelle qualité des bois de la région à 60 francs la tonne, franco bord à Puerto-Cabello.

Depuis la guerre de l'Indépendance, l'élevage, qui était alors très prospère au Vénézuéla, a beaucoup diminué, cependant les éleveurs font des efforts pour ranimer une source de richesse aussi grande. Les terres de la zone des pâturages se divisent (1895) en 148,133 kilomètres carrés de terres publiques et 257,289 kilomètres carrés de terres appartenant à des particuliers. On évalue actuellement à 2,000,000 de têtes le gros bétail de la République. Caracas et les environs en consomment mensuellement 6,000 têtes.

L'exportation se fait par les voies de Puerto-Cabello et Guanta, principaux ports pour ce trafic. Puerto-Cabello expédie de 50,000 à 60,000 têtes par an (66,049 têtes en 1901), toutes à destination de l'île de Cuba. On en envoie également via Barrancas, de Ciudad-Bolivar. Le poids moyen des bêtes est de 850 livres espagnoles, mais on compte que le voyage leur fait perdre de 12 à 15 pour cent de ce poids. Le prix qu'elles obtiennent à La Havane est d'environ 0.14 réal ou 7 francs l'arrobe de 25 livres.

Il n'y a plus au Vénézuéla qu'un seul "saladero," il s'appelle Candelaria et est situé dans l'Etat d'Apure, aux environs des rivières Apure et Orénoque. Cet établissement est monté sur le modèle des saladeros de l'Uruguay.

L'industrie du cuir est une des principales industries du Vénézuéla. Toutes les matières premières s'y trouvent à pied d'œuvre; les cuirs des vastes troupeaux de gros bétail des llanos, des moutons et des chèvres des Etats de Lara et de Falconi; les écorces tannantes, myrobolan, mangle, dividivi et quebracho des forêts de l'Orénoque et du Zulia. Quelques ouvriers européens, italiens et espagnols surtout, vinrent établir vers le milieu du siècle, la cordonnerie à Caracas et, protégée par des mesures douanières, l'industrie du cuir, de la tannerie, de la sellerie, de la bourrellerie et de la cordonnerie s'y est développée.

Il y a deux tanneries à Caracas. La plus importante achète en production normale 80 cuirs de bœuf par jour aux abattoirs de Caracas et traite en plus, mensuellement, environ 200 douzaines de peaux de moutons et 60 douzaines de peaux de chèvres achetées à Maracaïbo et à Coro. Elle ne tanne qu'au dividivi venu des vallées d'Aragua, de Coro, Margarita et Maracaïbo et au mangle de ce dernier port. Cette tannerie ne produit que les cuirs ordinaires et demi-fins pour semelles et empeignes. Les cuirs fins, veaux et vaches cirés et vernis, etc., viennent de France, d'Allemagne et des Etats-Unis. La cordonnerie est établie à Caracas et fabrique 500 paires de bottines et souliers de toutes dimensions et modèles. Le prix de vente de ces chaussures va de 2.50 francs à 22 francs la paire. La sellerie établie aussi à Caracas, fait en moyenne 325 selles dont le prix varie de 60 à 500 francs. Il y un second atelier à La Guayra produisant journellement 200 paires de bottines et 40 douzaines d'Alpagatas, sorte de pantoufle ordinaire. Elle a des maisons de vente à Ciudad-Bolivar et à Maracaïbo et écoule ses produits dans toute la République.

Les fabriques de cigarettes, protégées par de forts droits d'entrée, ont pris une réelle importance. Il y a plusieurs de ces fabriques, dont la plus importante achète ses tabacs en feuilles, partie à Cuba et partie à Capadare, Maturin et Guanape (Vénézuéla). Deux machines américaines coupent ou déchiquètent ces tabacs selon qu'ils sont destinés aux cigarettes confectionnées à la machine ou à la main. La production normale de cette fabrique est de 5,000 paquets de 15 cigarettes par jour. Toutes les fabriques de cigarettes, malgré la vive concurrence qu'elles se font, réalisent de beaux bénéfices.

Le droit protecteur de 1 franc par kilogramme brut (emballage compris) qui frappe les chocolats de toutes qualités à l'entrée au Vénézuéla n'y permet plus que l'introduction des chocolats façonnés, pralines, bonbons, etc., dont la consommation est assez considérable. Une importante maison de Turin, depuis trois ans seulement qu'elle cherche à traiter avec Caracas, y importe déjà près de 5,000 kilogrammes par an.

Mais le tarif protecteur a arrêté presque complètement l'entrée du chocolat en pain, aujourd'hui fabriqué dans le pays pour satisfaire à toute la consommation nationale. Deux fabriques de quelque importance, établies à Caracas, y suffisent. La "India" a une production de 20,000 kilogrammes par an. Les matières premières, cacao et sucre, sont achetées dans le pays, qui produit ces deux articles en abondance et de bonne qualité. Le chocolat fin produit par la fabrique "India" est excellent au goût, mais la fabrication laisse un peu à désirer. La seconde fabrique, "El Indio," a la même importance que celle que nous venons de décrire, mais produit surtout le chocolat ordinaire.

Il existe au Vénézuéla deux brasseries, la Cervecería Nacional et la brasserie de Maracaïbo. La Cervecería Nacional, société anonyme au capital de 2,500,000 francs, fut fondée à Caracas le 16 août 1894, au capital de 600,000 francs. L'entreprise prospéra immédiatement. Dès 1895, elle se voyait forcée d'augmenter une première fois son capital, qu'elle portait à 1,300,000 francs, puis en 1901 à 2,500,000 francs, capital actuel. Cette dernière augmentation fut provoquée par le rachat de deux établissements concurrents; les brasseries de Puerto-Cabello et de Valencia.

La Cervecería Nacional de Caracas produit actuellement de 10,000 à 12,000 hectolitres par an. Son outillage lui permet d'en fabriquer 30,000 sans difficulté. Ses bières sont vendues soit en fûts, soit en bouteilles dans toutes les provinces du centre et d'est. Ses houblons viennent d'Allemagne et d'Autriche et les bouteilles et les bouchons d'Allemagne. La fabrique de glace annexée à l'usine produit, après réfrigération des caves, 2,300 kilogrammes de glace par jour. La Cervecería Nacional est très prospère. Un group allemand, établi dans le pays, y a acquis depuis peu la majorité dans le conseil et parait devoir lui donner un nouveau développement.

Deux entreprises téléphoniques fonctionnent à Caracas. L'une d'elles seulement a de l'importance, c'est la Anglo-American Telefonic and Electrical Appliances Company. Elle possède un double réseau desservant, l'un la ville de Caracas, l'autre certains centres de l'intérieur, à Santa Lucía, Valencia, et les ports de La Guayra et de Puerto-Cabello. Tous les appareils, fils, etc., viennent des États-Unis.

La Compagnie de Gaz et Lumière Électrique, société anonyme vénézuélienne, au capital de 2,300,000 francs souscrits dans le pays, exploite le monopole de l'éclairage au gaz et à l'électricité dans le district fédéral. L'usine fournit journellement le courant à 3,000 à 4,000 lampes à incandescence de 16 bougies pour l'éclairage intérieur et 90 à 100 lampes à arc de 2,000 bougies pour l'éclairage des rues. Cette production pourraient être doublée.

L'entreprise des transports urbains est encore peu développée au Vénézuéla. Deux villes seulement, Caracas et Valencia, possèdent des lignes de tramways. Les voitures sont de fabrication américaine. On étudie depuis plus de quatre ans un projet de traction électrique dont l'exécution serait confiée à la General Electrical Company, de New York.

BIBLIOGRAPHIE.

Les livres et les brochures qui seront envoyés au Bureau des Républiques Américaines, et qui contiendront des sujets ou matières traitant des pays de l'Union Internationale des Républiques Américaines, seront mentionnés dans le Bulletin Mensuel sous le titre "Bibliographie."

La Bibliothèque Colomb vient de recevoir la compilation annuelle de données ayant trait à l'industrie minérale: ses statistiques, sa technologie et son commerce aux Etats-Unis et dans les autres pays, publiée par le "Engineering and Mining Journal." Cette brochure constitue une acquisition précieuse pour cette branche de connaissances. En plus de la production générale des divers métaux et minéraux, on y traite des sujets suivants: antimoine aux Etats-Unis et au Mexique; asphalte à Cuba, au Mexique, au Vénézuéla et aux Etats-Unis; borax aux Etats-Unis, à la République Argentine et au Chili; charbon et coke aux Etats-Unis et au Mexique; cuivre aux Etats-Unis, dans la République Argentine, en Bolivie, au Chili, au Mexique, au Pérou; pierres précieuses aux Etats-Unis et dans l'Amérique du Sud; or et argent aux Etats-Unis, au Mexique, en Costa Rica, au Honduras, au Salvador, au Nicaragua, en Bolivie, au Brésil, au Chili, en Colombie, à l'Equateur, au Pérou, à l'Uruguay et au Vénézuéla; graphite aux Etats-Unis et au Mexique; plomb aux Etats-Unis et au Mexique; manganèse aux Etats-Unis, au Brésil, en Colombie, au Chili, à Cuba; monazite aux Etats-Unis et au Brésil; nickel et cobalt aux Etats-Unis, au Chili, au Mexique; pétrole aux Etats-Unis, au Brésil, en Colombie, au Pérou et au Vénézuéla; mercure aux Etats-Unis et au Mexique; soude et nitrate de sodium aux Etats-Unis, au Chili; soufre et pyrites aux Etats-Unis, au Chili et au Vénézuéla; étain aux Etats-Unis et en Bolivie. On trouve dans cette brochure un sommaire général des droits d'importation des principaux pays du monde, ainsi que les statistiques sur les minéraux des pays étrangers.

Un rapport consulaire spécial publié par le Bureau du Commerce Extérieur du Ministère des Affaires Etrangères des Etats-Unis traite du "Commerce des articles en argent et en argent doublé dans les pays étrangers," ainsi que de l'importation de cette marchandise par les pays de l'Amérique Latine au point de vue des commerçants des Etats-Unis. Les données se rapportant à ce sujet ont été tirées des rapports transmis au Ministère par les différents agents consulaires des ports dont il est question et constituent un guide précieux pour ceux qui s'intéressent à ce commerce. Le commerce d'argenterie au Mexique est très grand, et la plupart de ces articles sont importés des Etats-Unis. Dans la préface, M. HENRY E. ALVORD, chef de la division laitière, Bureau de l'Industrie des Animaux, Département de l'Agriculture, dit que quoique le rapport soit basé, en grande partie, sur les observations des conditions qui existent à Porto Rico, on peut l'appliquer également aux autres pays tropicaux de l'Amérique Espagnole, où les coutumes commerciales et les usages des habitants sont similaires à ceux de Porto Rico. C'est pour cette raison qu'en certains cas on fournit beaucoup de détails sur des sujets de peu d'importance en ce qui concerne le pays seulement.

NEW YORK, U. S. A.

EXPORTADORES. IMPORTADORES.
FABRICANTES. ALMACENISTAS.

Estampadores y Blanqueadores de Telas de Algodón.

GÉNEROS Y ARTÍCULOS DE FANTASIA.

Dedicamos especial atención á la conversión y blanqueo de géneros de algodón para llenar los requerimientos de todos los mercados extranjeros.

Solicitamos corresponsales en todas partes del mundo.

Nuestra dirección por cable: "CLAFLIN." Usamos la clave "A. B. C.," la "A1" y "Liebers."

Se reciben productos extranjeros en consignación, ó en cambio de mercancías.

COMPAÑÍA INCORPORADA CON EL TÍTULO DE

WRIGHT'S INDIAN VEGETABLE PILL CO.

372 PEARL STREET,
NEW YORK.

ESTABLECIDA HACE 50 AÑOS.

Es la única fabricante de las preparaciones siguientes: Píldoras Indias Vegetales de Wright, Jarabe Indio Vegetal de Wright, Elixir de Opio de McMunn, Gotas Anodinas de Clavo de comer para el dolor de muelas, Vermífugo pronto y eficaz de Perry, Píldoras de Zarzaparrilla de Leidy para la sangre, Bálsamo Romano para los Ojos, Mistura Específica de Crossman.

Los Importadores de Drogas y Medicinas en los países de la América Latina se servirán escribir pidiendo las listas de los precios, y preguntando cuáles son los términos y condiciones del pago. Estos remedios están ampliamente anunciados en los dichos países, y se venden en todas partes del mundo.

El Corsé de Forma Erecta conocido con el nombre de

"W. B." ERECT FORM CORSET

ES EL ÚNICO ENTERAMENTE CORRECTO.

En la Exposición Pan-Americana le fué concedido el premio más alto. Sigue fielmente los perfiles naturales del cuerpo, y no comprime el busto. Toda la fuerza que se necesite para encintarlo se ejerce en él sobre los músculos fuertes y vigorosos de las caderas y de la espalda, y así es que con su uso se hace resaltar de la manera más admirable, como es esencial para las exigencias de la presente moda, el bien redondeado busto y las caderas. Hay un modelo especial para cada forma de cuerpo.

Para obtener catálogos, listas de precios, y cualesquiera otros informes, debe dirigirse quien los desee á

WEINGARTEN BROS.,
377-379 Broadway,
New York,

Que son los fabricantes de corsés, en mayor cantidad, que existen en el mundo.

RATES OF POSTAGE FROM THE UNITED STATES TO LATIN-AMERICAN COUNTRIES.

The rates of postage from the United States to all foreign countries and colonies (except Canada, Mexico and Cuba) are as follows:

		Cents.
Letters, per 15 grams (½ ounce)		5
Single postal cards, each		2
Double postal cards, each		4
Newspapers and other printed matter, per 2 ounces		1
Commercial papers	Packets not in excess of 10 ounces	5
	Packets in excess of 10 ounces, for each 2 ounces or fraction thereof	1
Samples of merchandise	Packets not in excess of 4 ounces	2
	Packets in excess of 4 ounces, for each 2 ounces or fraction thereof	1
Registration fee on letters and other articles		8

Ordinary letters for any foreign country (except Canada, Mexico, and Cuba) must be forwarded, whether any postage is prepaid on them or not. All other mailable matter must be prepaid, at least partially.

Matter mailed in the United States addressed to Mexico is subject to the same postage rates and conditions as it would be if it were addressed for delivery in the United States, except that articles of miscellaneous merchandise (fourth-class matter), not sent as *bona fide* trade samples, should be sent by "Parcels Post;" and that the following articles are *absolutely excluded* from the mails without regard to the amount of postage prepaid or the manner in which they are wrapped:

All sealed packages, other than letters in their usual and ordinary form; *all* packages (including packages of second-class matter) which weigh more than 4 pounds 6 ounces, except such as are sent by "Parcels Post;" publications which violate any copyright law of Mexico.

Single volumes of printed books *in unsealed packages* are transmissible to Mexico in the regular mails without limit as to weight.

Unsealed packages of mailable merchandise may be sent by "Parcels Post" to Bolivia, British Guiana, British Honduras, Chile, Colombia, Costa Rica, Guatemala, Honduras, Mexico, Nicaragua, Salvador, and Venezuela, at the rates named on page XV.

RATES OF POSTAGE FROM THE UNITED STATES TO LATIN-AMERICAN COUNTRIES—Continued.

(See page IX.)

PROHIBITED ARTICLES TO ALL FOREIGN COUNTRIES.

Poisons, explosives, and inflammable articles, live or dead animals, insects (especially the Colorado beetle), reptiles, fruits or vegetable matter liable to decomposition, and substances exhaling a bad odor, excluded from transmission in domestic mails as being in themselves, either from their form or nature, liable to destroy, deface, or otherwise injure the contents of the mail bags, or the persons of those engaged in the postal service; also obscene, lewd, or lascivious books, pamphlets, etc., and letters and circulars concerning lotteries, so-called gift concerts, etc. (also excluded from domestic mails); postal cards or letters addressed to go around the world; letters or packages (except those to Mexico) containing gold or silver substances, jewelry or precious articles; any packet whatever containing articles liable to customs duties in the countries addressed (except Cuba and Mexico); articles other than letters which are not prepaid at least partly; articles other than letters or postal cards containing writing in the nature of personal correspondence, unless fully prepaid at the rate of letter postage; articles of a nature likely to soil or injure the correspondence; packets of commercial papers and prints of all kinds, the weight of which exceeds 2 kilograms (4 pounds 6 ounces), or the size 18 inches in any direction, except *rolls* of prints, which may measure 30 inches in length by 4 inches in diameter; postal cards not of United States origin and United States postal cards of the largest ("C") size (except as letters), and except also the reply halves of double postal cards received from foreign countries.

There is, moreover, reserved to the Government of every country of the Postal Union the right to refuse to convey over its territory, or to deliver, as well, articles liable to the reduced rate in regard to which the laws, ordinances, or decrees which regulate the conditions of their publication or of their circulation in that country have not been complied with.

☞Full and complete information relative to all regulations can be obtained from the United States Postal Guide.

MONTHLY BULLETIN

OF THE

INTERNATIONAL BUREAU OF THE AMERICAN REPUBLICS,

International Union of American Republics.

VOL. XIII. DECEMBER, 1902. No. 6.

ANNUAL REPORT OF THE DIRECTOR.

INTERNATIONAL BUREAU OF THE AMERICAN REPUBLICS,
Washington, November 29, 1902.

The Secretary of State, Chairman, and Members of the Governing Board of the International Union of American Republics.

GENTLEMEN: At the date of the last annual report of the Bureau, the Second International Conference of American States was in session at Mexico. On the 31st of January, 1902, it was brought to a close, and left as a result of its labors a number of recommendations, some in the shape of drafts of treaties and conventions to be acted upon in the proper constitutional way by the respective Governments, and others in the form of protocols, resolutions, etc., admitting in some cases of being carried at once into practice.

The reorganization of the International Bureau of the American Republics, provided for in the resolution passed by the conference on the 29th of January, 1902, was carried into effect on the 19th of March following, and has been in successful operation since that time under the direction of the governing board. A prominent feature of the new arrangement is the foundation, under the name of "Columbus Memorial Library," of the Latin-American Library, whose establishment was recommended by the first International American Conference of 1889–90. The International Bureau has been made the custodian of the archives of the International American Conferences, and its publications are considered public documents and are carried free in the mails of all the Republics of the Union.

The Commission recommended by the Conference for the study of the production, distribution, and consumption of coffee met in New York on October 1, 1902, and held fourteen sessions. The recommendations, declarations, and resolutions, as finally adopted by the Commission, will be published in the December number of the MONTHLY BULLETIN.

The Conference's recommendation for a convention to study all matters relating to international sanitary police will be carried into effect on the 2d of December, when the first meeting of the convention will be held in Washington.

The Customs Congress provided for in the resolution passed by the Conference on January 22, 1902, will meet in New York on the 15th of January, 1903. A committee consisting of five members of the Governing Board has been chosen to elaborate a programme.

The International Archæological Commission recommended by the Conference on the 29th of January, 1902, and which requires the ratification of the respective Governments, will be held in due time. In a meeting of the Governing Board on October 6 it was unanimously agreed to enlarge the scope of this Commission so as to embrace ethnology. Prof. W J McGEE, of the Bureau of American Ethnology, has been appointed a delegate on the part of the United States to confer with such persons as may be appointed delegates by the Governments of the other Republics of the International Union regarding the preliminary details for the meeting of the Commission.

NEW MEMBER OF INTERNATIONAL UNION.

On July 3, 1902, the Republic of Cuba became a member of the International Union of American Republics, which now embraces all of the twenty Republics of the Western Hemisphere.

ACCOUNTS.

The accounts of the Bureau for the fiscal year ended June 30, 1902, are as follows:

Receipts and expenditures for the fiscal year ended June 30, 1902.

RECEIPTS.

Annual appropriation, 1902				$36,000.00
Balance from receipts from sales, rents, etc., July 1, 1901			$2,552.82	
Contributions from Latin-American Republics		$14,020.32		
From advertisements	$1,266.55			
From sale of publications	1,466.07			
Salary of Director for one year during absence in China	5,000.00			
		7,732.62		
			21,752.94	
				24,305.76
Total receipts				60,305.76

EXPENDITURES.

From annual appropriation, 1902	$36,000.00	
From receipts from sales, rents, etc	19,982.21	
		$55,982.21
Balance July 1, 1902		4,323.55

Detailed statement of expenditures for the fiscal year ended June 30, 1902.

	From annual appropriation 1902.	From receipts from sales, rents, etc.	Total.
Compensation	$31,446.67	$3,331.90	$34,778.57
Rent	1,666.68	333.32	2,000.00
Stationery		880.64	880.64
Library	2.74	1,239.64	1,242.38
Postage	223.91	917.00	1,140.91
Furniture		234.15	234.15
Printing	2,600.00	10,330.21	12,930.21
Miscellaneous	60.00	2,715.35	2,775.35
Total	36,000.00	19,982.21	55,982.21

Account of the Public Printer for the fiscal year ended June 30, 1902.

Total amount of bills rendered for the fiscal year ended June 30, 1902		$7,388.82
Paid from receipts and sales, rents, etc., during fiscal year 1902	$3,701.89	
Paid from annual appropriation, 1902	2,600.00	
Paid during current fiscal year	1,086.93	
		7,388.82

The following estimate of receipts and expenditures for the fiscal year ending June 30, 1903, is herewith submitted:

Estimated receipts:		
Appropriation		$36,000.00
Contributions from Latin-American Republics		15,370.56
Sale of publications		1,400.00
Total		52,770.56
Estimated expenditures at present ratio:		
Pay roll	$33,600.00	
Rent	2,000.00	
Printing	11,000.00	
Stationery and furniture	900.00	
Library	1,200.00	
Postage	400.00	
Miscellaneous	2,200.00	
		51,300.00
Balance		1,470.56

PUBLICATIONS.

The thirteenth volume of the MONTHLY BULLETIN is now being published. Eleven thousand copies are issued in each edition, over 8,000 of which are distributed throughout the Latin-American countries. During the preceding three years, similar editions were published.

The number of copies in each edition could, it would seem, be largely increased if means were devised for bringing the publication more prominently to the attention of the public in the various American countries.

During the year the Bureau has published, in English, a new edition of the "Handbook of Paraguay." The Spanish text of this work was prepared by Señor Don JOSÉ S. DECOUD, Honorary Corresponding Member of the International Union, in Paraguay.

"A List of Books, Magazine Articles, and Maps relating to Central America, 1800–1900," has also been issued, and will soon be followed by a bibliography of Chile, which is now in the hands of the printer.

For the use of the delegates to the coffee conference at New York, the Bureau prepared and published in Spanish and English a pamphlet entitled "El Café: Su Historia, Cultivo, Beneficio, Variedades, Producción, Exportación, Importación, Consumo, etc."

The handbooks of Santo Domingo and Nicaragua, now in course of preparation by the honorary corresponding members of those countries, are well under way and will be published within the next few months.

MAPS.

Two maps of Gautemala have been published during the year, and one of Brazil has been completed. The map of Costa Rica, which was completed some time ago, has been submitted to the Government of that Republic for examination. A map of Nicaragua is now in course of preparation.

LIBRARY.

On the 7th of April of this year the Columbus Memorial Library was established in accordance with the provisions of Article XIII of the resolution passed by the Conference at Mexico for the reorganization of the International Bureau. At that time, the library of the Bureau consisted of 8,948 volumes. Since then, 1,038 volumes and pamphlets have been added, of which 822 were gifts, making the total number of volumes and pamphlets now in the library 9,986. This number shows an addition of 4,986 volumes and pamphlets since the year 1899. During the year, 43 new periodicals have been placed on the permanent files and 32 maps have been received.

Much interest is being shown in the upbuilding of the Columbus Memorial Library by all the countries of the International Union and generous contributions have already been made to it by many of them, notably the Argentine Republic, Bolivia, Brazil, Guatemala, and Peru.

I have the honor to be, gentlemen, your obedient servant,

W. W. ROCKHILL, *Director.*

COMMISSION FOR A STUDY OF THE PRODUCTION, DISTRIBUTION, AND CONSUMPTION OF COFFEE.

FINAL TEXT OF THE RECOMMENDATIONS, DECLARATIONS, AND RESOLUTIONS ADOPTED BY THE INTERNATIONAL AMERICAN COFFEE COMMISSION.

PRODUCTION.

1. *Resolved:* To recommend that all governments and municipalities should procure good coffee seeds to acclimate and distribute, in order to obtain better prices and increase the demand for coffee; that agricultural institutions and botanical experimental stations be established in countries where they do not exist, in order to acclimate and propagate new species of coffees; that practical demonstrations be made to farmers regarding the most modern developments accomplished in regard to coffee; that prizes be offered in order to stimulate cultivations other than coffee; that special laws be enacted for the protection of owners coffee plantations.

DISTRIBUTION.

2. To recommend that the abuse of changing the original packages or marks, showing whence the coffees are imported, be severely punished; that effective propaganda be established to extend the use of coffee in new markets; that local duties on coffee be abolished; that coffee, when desirable, be sold at auction; that facilities of transportation be developed; that regulations be adopted so that coffee shall be packed in such condition as not to suffer alteration; that each package of coffee be marked with the name of the country whence it is imported.

CONSUMPTION.

3. To recommend that all governments make the use of coffee a regulation in their armies and navies; that the governments in countries which produce coffee establish, as soon as possible, in countries where coffee is not now consumed, places for the demonstration of pure coffee; that coffee producing and consuming countries prohibit the sale of adulterated coffee and all substitutes bearing the name of coffee, and in case this prohibition can not be enforced, that a heavy duty be imposed on said substitutes.

PRESENT CRISIS.

The following three declarations and five recommendations were adopted.

Declarations:

1. That although it is desirable that many improvements be introduced in the production and trade in coffee, the present crisis in that

industry consists only in the lack of profit and in ruinous prices paid for the commodity to the producer.

2. That the principal cause of the low price which brings about the present crisis is the excess of the supply over the natural or normal demand.

3. That speculation may, to a certain extent, be responsible for the crisis, but such speculation would not produce such an effect if said excess of the supply over the natural or normal demand did not exist.

Recommendations:

First. To prohibit, by the most efficient means, the exportation of *triage* as coffee; the most diligent action on the part of the consuming countries, to prevent the importation and use of said *triage* and of whatever adulterations or substitutes which are offered in the name of coffee, or are intended for adulterations.

Second. The adoption of the most advisable and effective measures in order to obtain from the consuming countries the suppression of, or at least a reasonable reduction in, the customs duties and other taxes affecting the importation, distribution, and consumption of coffee.

Third. The organization of an International Union composed of the greatest possible number of persons interested, intended to guard perpetually the interests of the coffee industry, maintaining a constant propaganda, spoken or written, and, by means of the diffusion of knowledge to increase, to its utmost, the use of coffee in the world.

Fourth. As the only measure which may modify favorably and quickly the price at which producers sell their coffee, the elimination from sale or exportation of such a quantity of the total production as may reduce the supply to the reasonable limits of consumption, a surplus stock of not more than 3,000,000 bags of 60 kilograms, or 132 pounds, each, being allowed as a reserve, the use of which shall be discretionary for the time being, and dependent upon the bulk of the visible stock.

Fifth. To call together, as early as possible, a conference of fully empowered delegates, thoroughly competent in this branch of economics, for the purpose of concluding a convention or treaty concerning the measures of an international character which this conference has recommended, or of others which may be suggested later on.

FUTURE CONFERENCES.

The following resolutions were adopted:

The International Conference for the Protection of the Coffee Industry,

Resolves: (1) To invite the Government of Brazil to convene, as soon as possible, and in the place and date it may designate, a second International Conference of Experts on Coffee, for the purpose of concluding the conventions or treaties of international character, which may be derived from the measures recommended by this Conference, or which may be hereafter suggested for the protection of the coffee industry.

The delegates to such Conference must be provided with full authority to conclude and sign conventions or treaties.

(2) To invite, also, the Brazilian Government to open and continue all necessary or convenient negotiations with the Governments of the other producing countries, in order to carry out the resolutions, recommendations, and desires of this Conference.

INTERNATIONAL SANITARY CONFERENCE.

In accordance with Article V of the Resolutions of the Second International Conference of American States, signed in the City of Mexico on January 29, 1902, the sessions of the International Sanitary Convention were held in Washington City from December 2 to 5, 1902, inclusive.

Following are the representatives of the various nations participating in this important conference:

Chile.—Dr. Eduardo Moore, Dr. Eduardo García Collao.

Cuba.—Dr. Juan Guiteras, Dr. Carlos J. Finlay.

Costa Rica.—Dr. Juan J. Ulloa.

Ecuador.—Señor Don Luis Felipe Carbo.

Guatemala.—Señor Don Antonio Lazo-Arriaga.

Mexico.—Dr. Eduardo Licéaga, Dr. José Ramírez.

Nicaragua.—Dr. D. Román.

Paraguay.—John Stewart, C. E.

Salvador.—Señor Don Ernesto Schernikow.

Uruguay.—Señor Don Luis Alberto de Herrera.

United States.—Walter Wyman, Surgeon-General of the Public Health and Marine-Hospital Service; M. J. Rosenau, Director Hygienic Laboratory, U. S. Marine-Hospital Service; H. L. E. Johnson, Washington, District of Columbia, American Medical Association, Chairman Legislative Committee; James Taggart Priestly, Des Moines, Iowa, Surgeon-General Iowa National Guard, ex-Member Board of Trustees, American Medical Association; Arthur R. Reynolds, Chicago, Illinois, Commissioner of Health; Charles B. Adams, Sac City, Iowa, Member State Board of Health, President State Board of Medical Examiners; Edmond Souchon, New Orleans, Louisiana, President Louisiana State Board of Health; Fred. W. Powers, Waterloo, Iowa, Member State Board of Health; Joseph Y. Porter, Jacksonville, Florida, State Health Officer of Florida; Alvah H. Doty, New York City, Quarantine Officer of Port of New York; L. M. Powers, Los Angeles, California, Health Officer; Frank William Porterfield, Atlantic, Iowa, ex-President Medical Society of Missouri Valley; GEORGE P. BRADLEY, Medical Director, U. S. Navy; Maj. WALTER D. MCCAW, Surgeon, U. S. Army; WHYTE GLENDOWER OWEN, Delegate Louisiana State Board of Health; Dr. RHETT GOODE, Health Officer of City of Mobile, President Quarantine Board of Mobile Bay; Dr. HENRY GOLDTHWAITE, Health and Executive Officer, Quarantine Board of Mobile Bay, Mobile, Ala.

The address of welcome was delivered by Dr. WALTER WYMAN at the opening session of the Conference on December 2. The speaker referred to Second International Conference of American States in Mexico as marking an era in the progress of civilization in the New World. He added:

"No topics are of greater importance than those which will be considered by this Conference, for protection against the inroads of disease and the providing of such environments of man as will enable him to cultivate the highest standard of health are the bases of our physical welfare and enjoyment, as well as of our intellectual enjoyment and moral uplifting. Health, cleanliness, intellect, and morals might well be the motto of this Conference."

Hon. LESLIE M. SHAW, Secretary of the Treasury of the United States, followed Dr. WYMAN in welcoming the visiting delegates and in commending the purposes of the Conference, saying, in part:

"I remember the time when the physician's principal ambition was to cure the individual case of disease, and little attention was paid to its spread among others; but now the physician endeavors to protect others from the epidemic as well as to cure the case on hand. One of the principal objects of the physician of to-day is to take precautions that will hold disease in check. These changes in methods of practice indicate that there have been great improvements in medical science as well as in mechanical and industrial science."

The Department of State of the United States extended its welcome through Dr. DAVID J. HILL, Assistant Secretary of State, who said:

"When the first Conference between the American Republics was proposed, fears were expressed that it would never come to pass, but those fears have now been dispelled and benefits are already apparent. What we need between these Republics is a closer contact, a mingling with one another in the discussion of questions of mutual vital importance. I am glad to see that the Conference in the City of Mexico has already borne fruit and that such meetings as this are to be continued."

Dr. WALTER WYMAN was elected president of the Conference, the secretaries being Dr. ARTHUR R. REYNOLDS, for the United States, and Dr. JUAN GUITERAS for the countries of Latin-America. Among the visiting members taking part in the debates of the Conference were: Dr. W. M. BRUMBY, City Health Officer of Houston, Texas; Dr. CHARLES WARDELL STILES, Zoologist of the United States, Public Health and

Marine-Hospital Service; Dr. L. O. HOWARD, Entomologist, United States Department of Agriculture; Dr. JAMES CARROLL, Assistant Surgeon, United States Army, and Dr. JOHN F. ANDERSON, Assistant Director of the Hygienic Laboratory, Washington, District of Columbia.

Sessions were held daily, in the morning and afternoon, at which reports prepared by the various delegates were read and discussed, the following resolutions being agreed to by the conferring delegations:

"Whereas the Second American International Conference of the Pan-American States, held in the City of Mexico, November, 1901, to January, 1902, provided that a Sanitary Convention should convene in Washington within one year from the signing of the resolutions on sanitation and quarantine, and elect an International Sanitary Bureau with permanent headquarters at Washington, for the purpose of rendering effective service to the different Republics represented in this Convention, it is hereby resolved:

"First. That it shall be the duty of the International Sanitary Bureau to urge each Republic to promptly and regularly transmit to said Bureau all data of every character relative to the sanitary condition of their respective ports and territories.

"Second. And to furnish said Bureau every opportunity and aid for a thorough, careful, and scientific study and investigation of any outbreaks of pestilential diseases which may occur within the territory of any of the said Republics.

"Third. That it shall be the duty of the International Sanitary Bureau to lend its best aid and experience toward the widest possible protection of the public health of each of the said Republics, in order that disease may be eliminated and that commerce between said Republics may be facilitated.

"Fourth. That it shall be the duty of the International Sanitary Board to encourage and aid or enforce in all proper ways the sanitation of seaports, including the sanitary improvements of harbors, sewerage, drainage of the soil, paving, elimination of infection from buildings, and the destruction of mosquitoes and other vermin.

"Fifth. It is also recommended by this convention that in order to carry out the above measures a fund of $5,000 shall be collected by the Bureau of American Republics, in accordance with paragraph 7 of the resolutions of the Second International American Conference above referred to."

The personnel of the International Sanitary Bureau was elected as follows:

President, Dr. WALTER WYMAN, Surgeon-General of the Public Health and Marine-Hospital Service of the United States.

Members: Dr. Eduardo Licéaga, of Mexico; Dr. Eduardo Moore, of Chile; Dr. Juan Guiteras, of Cuba; Dr. Juan J. Ulloa, of Costa Rica; Dr. Rhett Goode, of Alabama; and Dr. A. H. Doty.

It was decided that the next meeting of the International Sanitary Conference should be held in Santiago de Chile, the sessions to be convened on March 15, 1904.

ARGENTINE REPUBLIC.

COMPARATIVE TRADE STATISTICS.

A table prepared by the "Commercial Intelligence" of London, for October 30, 1902, shows that of the total imports of the Argentine Republic, in the fiscal years 1893 and 1895, Great Britain furnished 37 per cent as against 36 per cent in the years 1898 and 1900. For both periods Germany's quota was 12 per cent, while that of France declined from 11 per cent in the former to 10 per cent in the latter years, the United States alone showing a gain of from 9 to 12 per cent in the interval recorded.

The Argentine Consul in Dunkirk has published a chart showing the trade with the Argentine Republic passing through that port. In 1881 the imports amounted to 1,906,927 kilograms, and the exports of French products to the Republic were 125,584 kilograms. In 1901 the imports were 193,684,566 kilograms, and the exports 11,427,144 kilograms, the total in 1881 being 2,032,511 kilograms, and in 1901, 205,111,710 kilograms.

FOREIGN COMMERCE FOR THE FIRST NINE MONTHS OF 1902.

The Bureau of Statistics of the Argentine Government has compiled some interesting data concerning the commerce of the Republic during the first nine months of 1902.

The imports during this period amounted to $77,878,619, gold, as compared with $88,126,952, gold, during the first nine months of 1901, or a decrease in 1902, as compared with the previous year, of $10,248,333, gold.

The exports during the first nine months of 1902 were $136,707,787, gold, as compared with $131,147,227, gold, during the same period of 1901, or an increase in 1902 of $5,560,560, gold.

The imports by countries during the first nine months of 1902 were as follows:

Countries.	Value of imports in gold.	Countries.	Value of imports in gold.
Belgium	$4,626,249	Germany	$9,908,649
Bolivia	91,790	Italy	9,658,212
Brazil	3,327,361	Spain	2,355,622
Chile	166,607	United States	9,484,368
France	6,962,514		

The decrease in imports by countries, during the period referred to, in 1901, as compared with 1902, was as follows:

Belgium	$2,180,627
France	839,962
Germany	3,139,124
Italy	2,225,508
Spain	598,280
United States	1,734,763

The imports from Brazil during the period referred to, in 1902, increased $96,031 gold, and those from Chile $81,596 gold, as compared with the imports corresponding to the same period in 1901.

The exports to the different countries during the first nine months of 1902 were as follows:

	Gold.
Belgium	$10,968,822
Bolivia	555,963
Brazil	6,261,334
Chile	381,216
France	20,127,049
Germany	17,691,553
Italy	3,071,198
Spain	1,260,366
United States	7,545,229

A comparison of these figures with those corresponding to the first nine months of 1901 shows the following increase in the exports: Germany, $263,293 gold; Bolivia, $60,568; United States, $1,307,473. There was a decrease in the exports to Belgium amounting to $604,031 gold; to Brazil, $492,939 gold; to Chile, $6,731 gold; to Spain $216,002 gold; to France, $752,836 gold and to Italy, $294,617 gold.

The decrease of $10,248,333 gold in the imports was made up principally of the following articles: animal food-substances, $103,882; vegetable food-substances, $145,318; spices and condiments, $70,276; substances for infusions and hot drinks, $123,935; other food products, $3,751; tobacco and its products, $164,508; wines, $1,286,084; liquors, $66,454; textile products, $3,448,556; fixed oils, mineral, volatile, and medicinal, $455,583; chemical and pharmaceutical products, $438,582; colors and paints, $141,999; wooden manufactures, $371,904; paper and paper manufactures, $327,528; hides, $171,199; iron, $1,411,021; farm machinery and implements, $68,559.

PORT MOVEMENTS OF LA PLATA DURING THE FIRST NINE MONTHS OF 1902.

The Buenos Ayres "Handels-Zeitung" reports that 171 steamships and 12 sailing vessels entered the port of La Plata in the first nine months of 1902. During the same period 174 steamships and 8 sailing vessels cleared from that port, carrying the following merchandise:

Maize	kilos	36,059,849	Hair	kilos	3,502
Wheat	do	51,735,741	Frozen meats	do	5,150,708
Linseed	do	2,234,538	Casein	do	8,000
Bran	do	2,409,406	Oats	do	520,359
Dried meats	do	2,976,373	Birdseed	do	14,100
Butter	do	246,960	Horses	head	424
Hay	do	2,282,421	Sheep	do	26,551
Tougues	do	72,638	Cattle	do	2,267
Sheepskins	do	268,222	Mules	do	2,026
Goatskins	do	11,184	Hogs	do	23
Fruits	do	92,360	Horns	pieces	41,000
Quebracho	do	4,917,500	Bones	do	17,900

CROP AREAS OF THE REPUBLIC.

In the report, recently issued, of the Chief Statistician of the Department of Agriculture of the Argentine Republic, the following figures are given as representing the areas sown in the leading crops of the country during the past five years:

Years.	Wheat.	Linseed.
	Hectares.	*Hectares.*
1898–99	3,037,701	332,788
1899–1900	3,167,283	355,329
1900–1901	3,307,749	607,352
1901–2	3,221,066	782,880
1902–3	3,254,641	955,873

From the above figures may be seen the tremendous increase in the area under linseed during the past five years, while wheat, on the other hand, remains practically stationary.

The crop area of 1902–3 is divided as follows among the producing provinces:

Province.	Wheat.	Linseed.
	Hectares.	*Hectares.*
Buenos Ayres	1,092,360	255,062
Santa Fé	1,237,322	509,973
Entre Rios	251,604	74,279
Córdoba	673,349	116,550

REAL-ESTATE TRANSFERS IN BUENOS AYRES.

According to the "Boletín de Estadistica Municipal" (Bulletin of Municipal Statistics) there were sold in the city of Buenos Ayres from January 1 to June 30, 1902, real estate, numbering 3,350 pieces valued at $19,172,001.72 (national currency). The transfers during the same periods from 1897 to 1901 were greatly in excess of the sales for the first half of 1902, as shown in detail by the following table:

Year.	Sales.	National currency.
1897	5,095	$37,890,502.50
1898	3,402	30,496,968.19
1899	3,514	28,461,185.12
1900	4,325	27,648,351.32
1901	4,388	27,094,284.84

NEW RAILWAY MAP.

The Stroeder Colonization Society, of Buenos Ayres, has published an important railway map of the agricultural zone of the Republic, showing, among other things, the location of the colonies founded by the colonization companies. The work is replete with useful data compiled from the offices of the various railways and from other reliable sources, and is exceedingly interesting and valuable to the agriculturists and colonists of that region.

INTERNATIONAL EXPOSITION OF HYGIENE AT BUENOS AYRES.

The Department of State of the United States received from the legation of the Argentine Republic at Washington, under date of October 27, 1902, notice of the International Exposition of Hygiene, to be held at Buenos Ayres in connection with the second Latin-American Medical Congress. The Congress will hold its sessions in April, 1904. An invitation is extended to public and private institutions interested in the subject to participate in the exposition. Reduced rates for the transportation of exhibits have already been obtained from several steamship companies.

LUMBER TRADE FOR THE FIRST EIGHT MONTHS OF 1902.

The imports of timber from the United States during the first eight months of the year 1902 comprised 52,517,000 feet pitch pine, against 73,817,000 feet in the same period of 1901, a decrease of 21,300,000. The imports of spruce were 21,882,000, against 29,588,000 feet in 1901, a difference of 7,706,000 feet. In the year 1901 the exports of timber from the United States to the Argentine Republic were 113,826,000 feet pitch pine and 47,314,000 feet spruce. In 1901 pitch pine paid $6.34 gold per 100 meters, against $10.63 in 1902, and spruce paid $5.28 the 100 meters in 1901, against $9.36 in 1902. There was an increase of 65 per cent and 80 per cent, respectively.

BOLIVIA.

BUDGET FOR 1903.

The "Opinión," of La Paz, in a recent article regarding the budget for 1903, states that the estimated receipts for 1903 amount to 7,564,602 *bolivianos* ($2,904,807.17). The expenditures for the same period are estimated at 8,816,134.48 *bolivianos* ($3,385,395.64), made up of the following items:

	Bolivianos.
Legislative Department	216, 280. 00
Department of Foreign Relations and Worship	565, 491. 51
Department of Government and Justice	723, 576. 00
Department of Finance and Industry	1, 720, 410. 43
Department of Fomento and Public Instruction	1, 372, 700. 00
Department of War	2, 651, 424. 54
Department of Colonization	1, 566, 252. 00
Total	8, 816, 134. 48

An analysis of these figures shows a deficit in the budget of 1,251,532.48 *bolivianos* ($480,588.47).

POPULATION OF LA PAZ.

According to the last census (September, 1902), the population of the Department of La Paz is 60,031, as follows:

Urban population, September 20, 1902	52, 697
Rural population	7, 334
Total	60, 031

STATISTICS OF THE DEPARTMENT AND CITY OF POTOSI.

Recent statistics furnished by the Prefect of the Department of Potosi show the population of that Department to be 325,615 inhabitants, 167,744 being males and 160,868 females. The population of the city of Potosi is 20,910, the sexes being about equally distributed. In the city of Potosi there is 1 club, 3 hotels, 13 saloons, 3 ball grounds, 13 wholesale warehouses, 47 storage houses, 3 breweries; which sell 43,600 dozen bottles of beer, 10 inns, 13 churches, 3 convents (one for males and two for females), 2 chapels, and 3 cemeteries. Occupations and professions in Potosi include the following representatives: 897 miners, 368 tailors, 251 shoemakers, 144 bricklayers, 124 blacksmiths, and 69 bakers. There are engaged in the fine arts in the city of Potosi 2 sculptors, 4 designers, 17 painters, 5 photographers, 13 musicians, and 1 engraver. There are 7 municipal schools for males, with 12 professors and 532 pupils. The schools for females have 13 professors and 475 pupils.

BRAZIL.

INAUGURATION OF PRESIDENT RODRIGUES ALVES.

The new President of Brazil, Senhor FRANCISCO DE PAULA RODRIGUES ALVES, successor to ex-President CAMPOS SALLES, was formally inaugurated on November 15, 1902, in the capital city, Rio de Janeiro. The ceremony was made the occasion of brilliant festivities, in which the various legations of foreign countries participated. In his inaugural address President ALVES maintained the necessity for a good financial condition in the Republic as of prime importance, but promised also that a new electoral law and the promulgation of a civil law code should be given careful attention. His efforts will be directed toward the preservation and improvement of the good work of President CAMPOS SALLES's government; strict economy will be adhered to; special attention will be given to agricultural and commercial conditions, and endeavors will be made to attract immigration and capital. Considering that the health of Rio de Janeiro is closely bound up with larger immigration, the President promised to promote the sanitation of the city as well as the improvement of harbor works. The army and navy will also be augmented and improved when consistent with the condition of the Treasury.

Senhor RODRIGUES ALVES was born on July 7, 1848 at Guaretingueta in the State of São Paulo. He was graduated from the college of Dom Pedro II in 1866, and in 1870 received the degree of Doctor of Laws at the college of São Paulo. He was shortly afterwards elected to the State Legislature of São Paulo and to the Imperial Congress in 1887. He subsequently was appointed as President of his native States by the Emperor Dom Pedro II. Since the proclamation of the Republic he has served in various important legislative capacities, having been Governor of São Paulo at the time of his election to the presidency.

NEW CABINET.

The cabinet for the new administration of Brazilian affairs, under President RODRIGUES ALVES, is composed as follows:

Minister of Justice and Interior: Dr. SEABRA.
Minister of Foreign Affairs: Baron DE RIO BRANCO.
Minister of Finance: Dr. LEOPOLDO DE BULHÕES.
Minister of War: Marshal FRANCISCO DE PAULA ARGOLLO.
Minister of Transportation, Public Works, and Education: Senhor Dr. MULLER.
Minister of the Navy: Admiral DE NORONHA.

PUBLIC IMPROVEMENTS.

United States Consul K. K. KENNEDAY, at Para, in his report to the Department of State of the United States, of October 9, 1902, furnishes interesting information in regard to the general development of the Republic of Brazil.

Work on the new harbor improvements at Manaos has been begun. These include an extensive system of docks and wharves, which will facilitate the growing commerce of that city. The Booth Steamship Company has secured the concession, and a large portion of the work has been sublet to a New York firm; an engineer from that city has gone up the river to take charge. Work on a new electric-light plant will also be begun at once.

The harbor at Para is to be dredged to a depth which will permit the largest steamers in these waters to come up to the piers; and docks, wharves, and warehouses will be erected extending across the entire water front of the city. Dry docks will also be erected for the repair of the largest vessels afloat. A German syndicate, being the lowest bidder, has secured this valuable concession, and the managers of the syndicate, who have been in Germany financing the concession, are expected soon to begin the preliminary work on the contract, which will be completed in about five years.

There is now a steady improvement in the financial and commercial situation, and business men are preparing for a prosperous season. Trade statistics for the past eight months are inaccessible at this time, but from information gathered from various sources it is an indisputable fact that the bulk of the trade is being carried on by the United States representatives. American exporters are now in a fair way to secure more trade because they are adopting effective methods, sending skillful salesmen, men who speak the language of the country and who are quick to find out what is actually wanted in this Republic.

The revival of a large number of public enterprises which have remained in abeyance during the past two years is another indication of the improvement in the commercial situation. The reconstruction of the local tramway system and waterworks has been resumed, and money is finding its way into circulation in this manner.

A United States company is conducting experiments on the upper river with a new wireless-telegraph system. If this shall prove successful and practical, it is designed to place it in operation between Para and Manaos.

Mariners visiting the Amazon will be interested in the late announcement that a light-house and shelter station is to be erected at the mouth of the river, on the island of Tatuoca, a few miles below Para. It will be located in latitude 1° 11′ 45″ south and longitude 48° 30′ 10″ west. It will show a fixed white light at an altitude of 150 feet, which will be visible at a distance of 12 miles in clear weather.

The municipal government of Para has determined to erect a large warehouse on one of the numerous small islands opposite the city for the storage of oils and such other inflammable products as are a menace to the safety of the city. Business houses here which handle this class of goods will be divided by law into two groups, one consisting of the wholesale firms, which are allowed to keep a certain quantity of inflammables in stock, and the other group comprising the retail firms, which will be allowed to keep a smaller proportion of these goods on hand. Importers will be allowed to sell this class of goods only to the wholesale houses.

Following is a list of the materials which are affected by the law of September 25, 1902, the bulk of which come from New York:

Kerosene, matches, cachaca (white rum), alcohol, turpentine, pitch, tar, rosin, waste, naphtha, acids, saltpeter, caustic soda, powder, dynamite, potash, fireworks, loaded cartridges, empty cartridges with the caps on, and caps.

It is also reported that a railroad about 4 miles long will be built from Para to Pena Cova to haul these goods to the city, and Americans are already on the ground to bid for the contract.

The imports of American kerosene into this valley have increased to such proportions during the past year that it has become necessary to organize a new system to meet the demand and distribute the oil. Para will be made the supply depot for the entire Amazon Valley. As a result of the law mentioned, oil has advanced in price 2 *milreis* (50 cents) per can of 5 gallons.

The $5,000,000 loan which the State of Amazonas has been seeking to raise has been financed by a prominent financier of New York City. The arrangement of this loan will enable Amazonas to carry out several important improvements in contemplation at Manaos and upriver points. The loan is guaranteed, as is usual in Brazil, by the customhouse receipts.

The supremacy of United States machinery is thoroughly established, and if properly placed on the market an immense quantity of it can be sold, to the practical exclusion of foreign machinery and machinery tools. A large warehouse will soon be opened and will have nothing but United States goods, principally machinery, and at the same time will serve as supply depot for all northern Brazil.

FACILITATION OF TRADE WITH GERMANY.

The following extract from the Berlin South American Outlook was forwarded to the Department of State of the United States from the consular officer at Frankfort, Germany, as being indicative of the facilities enjoyed by that country in the prosecution of its commercial relations with Brazil:

"The English Booth Line has absolutely transferred to the two united Hamburg companies the business which it has been handling between Hamburg and northern Brazil for about thirty-six years, and has also withdrawn from Antwerp. Accordingly, the carrying trade from Amazonas to the European Continent will henceforth be in the hands of the Hamburg companies, which, on the other hand, surrender to the English company the carrying trade between northern Brazil and England, as well as the United States.

"The paragraph of the agreement which relates to return-voyage freight rates deserves especial attention, as it is therein fixed that the rate to England must always be the same as to the Continent. As is well known, the principal market for rubber—the chief export article of northern Brazil—is now Liverpool, although a large portion thereof (experts say three-fourths of the entire importation) is consumed upon the Continent, principally in Germany and Russia. In future German and other continental merchants and manufacturers will accordingly be able to import their rubber directly and at less cost than when it was brought via Liverpool."

THE IRON ORES OF THE REPUBLIC.

The iron-ore regions of the Republic are situated within a zone of about 3,200 square miles, 3,280 to 5,000 feet above the level of the sea, and about 310 miles from Rio de Janeiro, which is the nearest port. The principal ore outcrops commence at Congonhas do Campo, extending toward Ouro Preto and on through Antonio Pereira, Infeccionado, Agua Quente, and Caraca. From this latter place there is a break to Itabira do Matto Soares Mountain, where iron was first made in the State by the direct process in 1815. Another series of mountains through which the iron-ore stratum runs extend from Pico d'Itabira do Campo, through Taquaral, Piedade, and Cocaes. The zone is crossed by the Central Railway, the most important line in Brazil, built with a wide gauge of 1.60 meters, to a place named Lafayette, on the borders of the ore field, where it is broken to one meter, owing to the mountainous character of the country. This railway carries all the manganese ore exported from the States, and is well managed by the Government. Other important deposits of iron ores also occur in different parts of the State, at Barbacena on the Central Railway, and Vicisa on the Leopoldina Railway, as well as in the neighboring State of Sao Paulo, where, at a place named Ipanema, a deposit of magnetite has been worked more or less intermittently from the year 1590, when the first ironworks were built in Brazil. In the States of Parana and Santa Catharina, iron-ore deposits are found near the coast, which are considered by Dr. Derby, the distinguished geologist, as of the same character and probably a continuation of the deposits of Barbacena. These ores carry varying quantities of manganese, in fact in some cases to such an extent as to be considered manganese rather than iron ores.

The principal ore deposit forms part of Serra do Espinhaço, the others being found in the Serras do Mar e Mantiquiera. The rocks of the first range of mountains are constituted of schistose quartzites, micaceous schists, and limestone being known as the Itacolumite series. These rocks appear to run successively into micaceous schists and schistose quartzites, which in turn pass into an almost pure hematite named itabirite. The base of the rock series is gneiss or granite, and on them the principal iron formation rests, interstratified between the schists and limestones. Owing to the faulted character of the country the precise order in which the rocks occur is not known, nor can their age be determined, though Dr. DERBY is inclined to think that they may be assigned as Archæan, Pre-Cambrian, or Lower Silurian. His study of the genesis of these deposits is not yet complete, but as manganese is so intimately associated with the iron formations he is of opinion that they may be residual metamorphosed deposits of limestones which originally contained carbonate of iron.

The second series of mountains consist of gneiss, with injected diogrites and granites and the deposits in them are, as far as known, exclusively magnetite and of less importance than those already mentioned.

DESCRIPTION OF THE ORES.

The ores found in the principal deposits may be divided into three classes, as follows:

First. Massive hematite ores.

Second. Micaceous iron schists.

Third. Rubble or conglomerate ores.

First. The massive hematite constitutes the most important ore from the economic point of view, and has often associated with it a small quantity of magnetic oxide of iron. It occurs in enormous beds 30 to 50 yards in thickness, generally very much tilted up and outcropping on the summits or along the sides of the mountains, where, owing to its excessive hardness, it has resisted erosion better than the inclosing rock. In composition, it generally contains from 66 to 70 per cent metallic iron with a small quantity of silica and traces of phosphorus.

Second. The micaceous iron schist, or Itabirite, consists of alternating bands of varying thickness of micaceous iron ore and quartz, being often in a very friable condition, which accounts for its facility of weathering. The constituents of the schist exhibit a folded structure, and it has a special interest, because it sometimes incloses thin lines of an ochreous mineral known as "Jacutinga," which often carries gold values. The micaceous schist is preferred to the massive hematite ore by the native ironworkers, because the micaceous character of the ore facilitates reduction in the small furnaces worked on the direct process.

Third. The rubble or conglomerate ore, the result of the weathering of the two other classes and more especially of the micaceous iron schist, is found in one or the other state according as it is anhydrous and pure or hydrated and mixed with argillaceous matter. The rubble ore is always found on the surface and varies between 1 and 10 yards in thickness. Owing to natural concentration, this rubble constitutes a very rich ore, averaging 66 to 70 per cent metallic iron, while the conglomerate portion, which from its very nature is hydrated and mixed with argillaceous matter, contains a very much lower percentage of iron, varying according to the intermixture of binding material. Where possible the native ironworkers use the pure rubble ore, and so dispense with the concentrating process necessary when the micaceous iron schist is used. The conglomerate is often found to be auriferous, the gold no doubt being derived from the "Jacutinga" in the original micaceous iron schist.

The Pico d'Itabira do Campo is perhaps the most favorably situated body of ore. It is about 2½ miles from the Central Railway and some 160 feet above it. The thickness of the deposit, which is tilted almost to the vertical, is somewhat difficult to determine, but it is probably more than 50 yards in width where the "pico" (peak) proper rises 480 feet above the mountain summit. All around this mass huge bowlders of ore exist in great profusion, and for some distance along the slope of the mountain there is the usual surface deposit of rubble or conglomerate ore. The natural facilities for economical working on a large scale are very great, and in view of the enormous dimensions of the outcrop and purity of the ore it is probable that large quantities of mineral could be excavated without the removal of any overburden to speak of or appreciable on the dump.

Along the Caraca Mountain, which is one of the largest in the district, the iron-ore deposit is more imposing and certainly more extensive than that above considered. The railway at the present time is 22 miles from the Caraca Mountain, but a line is projected that will pass near the deposits. The outcrop is nearly vertical, and the deposit, which extends almost without a break along the mountain for about 25 miles, is about 50 yards in thickness. Professor GORCEIX, the first director of the Ouro Preto School of Mines, always considered this the largest iron-ore deposit in the district, and he estimated the quality of easily workable ore at some hundreds of millions of tons.

The Tapanhoacanga Mountain, which runs parallel to that of the Caraca, is covered for some miles with the rubble and conglomerate ore, no doubt being the result of the erosion of the Caraca deposit, and especially those parts of it that are essentially a micaceous iron schist.

The Pico d'Itabira do Matto Dentro is 75 miles from Sabara Station of the Central Railway. It has very much in common with the Pico d'Itabira do Campo, already considered, and consists of an immense body of the purest ore, which outcrops very strongly at an altitude of about 4,250 feet above sea level. Unlike the other "pico," where the stratum is vertical, this one has an inclination of about 30°. The distance from the railway renders it of little present economic importance, but with the projected extension of the Leopoldina Railway to this place it will have an importance equal to any of the other deposits.

The deposits of Congonhas do Campo, Taquaral, Cocaes, Congo Soco, Sao Miguel de Piracicaba, Gandarella, etc., have all much in common with those already noticed.

The Ipanema ore exists as rounded nodules, varying in size from shot-like grains to masses of half a cubic meter or more. In the States of Parana and Santa Catherina the ores are manganiferous in character, but they have not yet been explored, and little information is available with regard to them. W. H. Herdsman, of Messrs. E. Riley & Co., who last year visited the manganese and iron-ore districts of Brazil, and has again recently paid a more extended visit, is much impressed by the character and extent of the immense iron-ore deposits of the State of Minas Geraes and of their importance in the future development of the world's iron and steel industries. Samples of the iron ore, some of which are on view for the inspection of members, were taken by Mr. Herdsman from several districts and analyzed in Messrs. E. Riley & Co.'s laboratory, with the following results:

No. 1.	Per cent.
Silica	0.37
Peroxide of iron	98.98
Alumina	Traces.
Oxide of manganese	.20
Lime	.18
Manganese	.18
Phosphoric acid	.023
Arsenic acid	Nil.
Sulphur	.007
Oxide of copper	Nil.
Carbonic acid	Traces.
Combined water	.10
Moisture	.12
	100.160

	Per cent.
Metallic iron	69.29
Phosphorus	.010
No. 2.	
Metallic iron	67.61
Silica	1.72
Sulphur	.027
Phosphorus	.083
Moisture	.32
No. 3.	
Metallic iron	65.77
Silica	.78
Sulphur	.016
Phosphorus	.109
Moisture	.50

No. 1 is a general sample taken from the Pico d'Itabira do Campo deposit (massive hematite).

No. 2 is a general sample of the Miguel Burnier micaceous rubble surface ore.

No. 3 is a general sample of the Catta Brabca rubble surface ore.

Nos. 2 and 3 are used at the Esperanca blast furnace, and being alluvial surface deposits they contain phosphorus, and so facilitate the production of a satisfactory, easy-running foundry pig.

Respecting the outcrop of Itabira, Mr. Herdsman reports as follows: "Although one hears frequently of mines and deposits which are described as being 'mountains of iron,' I have never in my twenty-five years' experience until I visited Itabira found one which even remotely justified the title. The Pico d'Itabira is, however, a real mountain of iron, and doubly remarkable in the uniform purity of the mineral, for from the moment of arrival on the iron-ore area I did not find one single fragment of stone which was not mineral, not one single piece of mineral which was not of the same pure and rich quality as is evidently the whole of the gigantic body of ore. I use the word 'gigantic' advisedly, for there can be little doubt that not less than 10,000,000 tons of the purest ore known is found outcropping here at a single point, and when one remembers that a similar outcrop is found some 95 miles distant and that other lodes and ore bodies are found at numerous intervening places, while the whole adjoining country is covered with iron ore, ('Canga,') in every direction the immensity of the Brazilian ore deposits becomes very evident."

NATIVE TEXTILE GOODS.

United States Consul Archer, at Porto Alegre, reports that the native mills in different parts of the country are now making many goods which were formerly imported from abroad, and such articles as gray cottons, Oxfords, denims, cotton trouserings, etc., are almost entirely supplied by them. Prints are made in considerable quantities, and the quality of the cloth is excellent and very durable.

Fancy cotton dress goods, and even laces, are now to be had of native manufacture. Woolen trouserings, cassimeres, etc., of good designs and quality, woolen ponchos, blankets, also cotton ponchos and blankets are made by a mill in the city, so that there is little importation of these goods.

There are also hosiery factories now making good undershirts, stockings, etc., which in quality and finish are equal to similar grades of the imported articles, and owing to the advantage in price they have almost entirely driven their foreign competitors out of the market.

Mr. Archer points out that the development of native industries is almost entirely due to the high protective tariff, and as the customhouse revenue throughout the country has continued to decrease in recent years, notwithstanding the elevation of the duties, it is clear that importation must have diminished to a very large extent.

So far the serious competition of native industry is chiefly, if not entirely, confined to textiles; hardware, machinery, earthenware, and rough goods generally being still imported from foreign countries, chiefly Germany and the United Kingdom.

CUSTOMS RECEIPTS DURING THE FIRST NINE MONTHS OF 1902.

The customs receipts for the first nine months of 1902 show a considerable increase under all heads in comparison with the corresponding period of last year. The figures for the two years are as follows:

	1902.	1901.
Paper money (*contos*)	111,935	101,521
Gold (*contos*)	29,608	25,447
Total	141,542	126,968

The import receipts show an augmentation of 10,000 *contos* of *reis*, gold, and 3,600 *contos* paper. The receipts in gold specially applied to the guarantee funds have increased by 578 *contos*, taking into account all the custom-houses, but with figures still incomplete, which assures definite results even more favorable.

MISCELLANEOUS NOTES.

The Board of Trade of Great Britain has received information through the Foreign Office to the effect that the commercial convention between Italy and Brazil has been prolonged, by agreement between the two Governments, for a period of two years from the 31st of December. Under the convention in question, Italy grants to Brazilian coffee a special tariff rate of 130 *lire* instead of 150 *lire* per 100 kilograms in return for the application of the Brazilian minimum tariff to Italian products.

The Bureau of the Society of Agriculture, Industry, and Commerce of São Paulo has established a permanent exhibition of agricultural and other machinery, including motors and alcohol engines. Brazil has an abundant supply of alcohol, which would afford a cheap source of power in the country, and the movement in favor of its use as a motive power has obtained the support of the Government, alcohol motors of foreign manufacture being admitted into the Republic free of duty.

The government of the State of São Paulo has extended for eighteen months the time granted to Señor FIORITA for the organization of a company for the introduction of Japanese immigrants.

CHILE.

CUSTOMS REVENUES FOR 1901.

The report of the Superintendent of Customs of the Chilean Republic for 1901 has recently been issued and furnishes very interesting data touching this important source of public revenue. The total income from customs in 1901 amounted to $70,988,447 (gold), of which $26,862,188 corresponded to imports and $44,126,259 to exports. Of the total export duties, $43,764,657 corresponded to nitrate and $361,602 to iodine. The quantity of nitrate on which duty was paid was 1,291,958 metric tons, the duty levied being $33.80 per ton, the surcharge corresponding to the price in gold on ninety days' bills on London. The quantity of iodine on which duty was paid was 284 metric tons and 726 kilograms.

It is also shown that 79.04 per cent of the imports and 84.47 per cent of the duties corresponded to the ports of Valparaiso, Talcahuano, Coronel, Valdivia, and Puerto Montt. To the mining and nitrate provinces of the north a credit of 20.96 per cent of the imports and 15.63 per cent of the duties is given. The total importation in 1901 was considerably augmented by the introduction from Australia and the United States of 89,000 tons of wheat and 45,500 tons of flour.

The following table shows the value and character of imports contributed by the four nations leading in imports into Chile:

	Great Britain.	Germany.	United States.	France.
Animal products.				
Preserved food	$280,000	$272,000	$365,000	$108,000
Skins and manufactures of, bone	449,000	780,000	70,000	882,000
Stearine, tallow, common soap, etc	157,000	580,000	80,000	12,000
Vegetable products.				
Rice, sugar, tea, flour, wheat, etc	1,700,000	1,625,000	3,280,000	225,000
Miscellaneous	260,000	613,000	220,000	125,000
Woods and manufactures of	160,000	357,000	1,508,000	150,000
Mineral products.				
Jewelry	83,000	152,000	73,000	385,000
Iron and manufactures of	7,540,000	3,600,000	1,875,000	600,000
Copper, brass, etc., and manufactures of	960,000	880,000	135,000	325,000
Machinery	1,810,000	2,372,000	1,528,000	286,000
Tools	1,026,000	1,220,000	1,020,000	200,000
Arms and ammunitions	122,000	320,000	85,000	24,000
Earthenware, glassware, cement, marble, etc	910,000	3,280,000	83,000	290,000
Fuels, oils, and paints.				
Coal	11,387,000	117,000	329,000	....
Petroleum and industrial oils	455,000	418,000	3,185,000	....
Matches, candles, paints, blacking	520,000	530,000	130,000	40,000
Textiles.				
Jute, hemp, straw	2,500,000	506,000	106,000	140,000
Cotton	12,380,000	6,620,000	1,310,000	1,405,000
Wool	4,392,000	4,450,000	10,000	1,300,000
Flax	220,000	205,000	10,000	190,000
Silk	622,000	736,000	....	1,050,000
Sundries.				
Paper, cardboard, and manufactures	590,000	2,680,000	565,000	400,000
Wines and liquors	520,000	182,000	....	420,000
Perfumes, pharmaceutical and chemical products	700,000	1,300,000	240,000	510,000
Toys	50,000	240,000	7,000	42,000
Miscellaneous	385,344	330,068	312,333	205,536
Total	50,188,344	34,365,068	16,526,333	9,314,536

IMPORT STATISTICS FOR 1901.

The "Chilian Times" of October 4, 1902, publishes an interesting statement bearing on the importation of merchandise of various kinds from abroad into Chile during 1901, in which the relative interests of the nations furnishing such importations are compared. Total import valuations for the year amounted to $139,300,766 (Chilian). Coal and coke head the list as the most important item, the total valuation being $14,388,000, of which Great Britain contributed $11,397,220; Australia, $2,544,800; Germany, $116,840, and the United States, $329,140. The total value of pig iron imported is given as $291,362, of which sum $128,877 was furnished by Great Britain, $110,069 by Germany, and the balance apportioned between the United States and Belgium. The value of merchant iron is returned at $1,437,899, of which sum $798,845 corresponded to Great Britain; $321,401 to Germany; $215,680 to Belgium, and the remainder to the United States and France. Sheet iron figures for $357,549, of which $223,133 corresponded to Great Britain; $105,741 to Germany, and the remainder to the United States and Belgium. Plain galvanized sheets, which pay 25 per cent duty, figured for $129,509, of which $96,422 corresponded to Great Britain; $31,672 to Germany, and the remainder to the United States. Black corrugated sheets, which pay 5 per cent duty, figured for $86,977, of which $83,011 corresponded to Great Britain, and the remainder to Germany. Galvanized corrugated sheets, which pay 35 per cent duty, figured for $1,212,086, of which $1,128,285 corresponded to Great Britain; $68,645 to Germany, and $15,156 to the United States. Painted and tinned corrugated sheets, which pay 25 per cent duty, figured for $122,715, of which $110,237 corresponded to Great Britain and the remainder to Germany, the United States, and France.

The duties above mentioned are specially designed for the protection of a local factory which galvanizes imported black sheets.

Sheet and bar steel, duty free, figured for $531,656, of which $314,927 corresponded to Great Britain; $115,874 to Belgium; $63,190 to Germany, and the remainder to the United States and France. Tin plates, duty free, figured for $220,096, of which $209,362 corresponded to Great Britain, and the remainder to Germany and the United States. Rails figured for $1,905,904, of which $1,592,515 corresponded to Great Britain; $98,827 to Germany; $203,737 to the United States, and $10,825 to Belgium. Fish plates figured for $102,722, of which $87,170 corresponded to Great Britain; $21,320 to the United States; $2,747 to Germany, and the remainder to Belgium. Railway and barrow wheels figured for $1,195,308, of which $508,978 corresponded to Great Britain; $299,520 to Germany; $383,236 to the United States, and the remainder to France and Belgium.

In sacking materials, duty 15 per cent, there was a total importation of $174,501, of which $122,605 corresponded to Great Britain; $42,985 to Germany, and the remainder to the United States, France, and India. Cotton belting, duty 5 per cent, figured for $88,304, of which $52,274 were supplied by Great Britain; $30,686 by Germany, and the remainder by France. Oil cloths, duty 25 per cent, show a total of $219,044, of which Great Britain furnished $133,854; Germany, $64,051; France, $17,032, and Italy and the United States the remainder. Druggets, duty 25 per cent, figured for $82,736, of which $49,949 was contributed by Great Britain; $22,744 by Germany, and the remainder by France and the United States. Rope, duty 25 per cent, represented a value of $199,315, of which Great Britain contributed $98,612; Germany, $51,222; United States, $44,596, and the remainder by other countries. Bags, duty 15 per cent, represented a value of $2,238,727, of which Great Britain contributed $1,752,118; India, $408,319; Germany, $30,275; Italy, $47,884, and the remainder by other countries. In straw hats, a total import value of $300,000 was reached, with Italy as the leading country of origin, followed in order by Germany, Eucador, and Great Britain. In drills, and similar articles, duty 25 per cent, a total value of $2,559,306 was reached, of which Germany furnished $1,362,900; Great Britain, $999,013, and other countries the remainder. Flannels, duty 25 per cent, represented a total of $2,537,878, of which Great Britain supplied $1,390,858; Germany, $596,025, and other countries the remainder. White sheetings figured for $2,844,159, of which Great Britain furnished $2,338,980; Germany, $302,530, and other countries the remainder. Osnaburgs, duty 15 per cent, represented a total of $808,551, of which the United States supplied $505,252; Great Britain, $191,258; Germany, $42,667, and other countries the remainder. Materials for dresses and linings represented a total of $4,037,451, of which Great Britain furnished $2,906,344; Germany, $768,993; France, $265,664, and other countries the remainder. Oxfords represented a total of $584,638, of which Great Britain contributed $421,916; Germany, $147,149, and other countries the remainder. Handkerchiefs figured for $476,973, of which Great Britain furnished $389,734; Germany, $63,879, and other countries the remainder. Gray shirtings represented a value of $1,235,149, of which Great Britain supplied $805,274; the United States, $229,422; Germany, $176,580, and other countries the remainder. In woolen cloths, duty 25 per cent, there was a total importation of $3,305,108, of which Great Britain furnished $1,744,036; Germany, $1,118,064, and other countries the remainder.

A table prepared by the "Commercial Intelligence," of London, and published on October 30, 1902, shows that of the total imports of Chile in the years 1893–1895 Great Britain furnished 44 per cent as against 37 per cent in 1898 and 1900. For both periods Germany's quota remained stationary at 27 per cent, that of France declined from 9 per cent in the former period to 6 per cent in the latter, while that of the United States showed an advance from 6 to 9 per cent in the interval recorded.

NEW CABINET.

The new cabinet of Chile is composed as follows:
Minister of Interior, Señor Fernandez Albano.
Minister of Foreign Affairs, Señor Domingo Amunategui.
Minister of War, Señor Francisco Baeza.
Minister of Public Instruction, Señor Horacio Pinto.
Minister of Finance, Señor Ricardo Cruzat.
Minister of Public Works, Señor Agustín Gana.

CONCESSION FOR THE CONSTRUCTION OF A SUSPENSION RAILWAY.

The Chilian Government has granted a concession to W. R. Grace & Co. for the construction of an aerial railway 2,060 meters long, to connect the Zapiga cañon in the Department of Pisagua with some point on the opposite side of said cañon. The work of construction must commence within a period of six months. When the railway is completed, should the concessionaires desire to use it for the transportation of passengers and freight not connected with the business of the company, the charges or tariffs governing same must be submitted to and approved by the Government. The concessionaires have the right to use such land as may be necessary for the road in the nature of stations, shops, warehouses, offices, etc.

CHILEAN CONSULS IN AMERICA.

[From the "Boletin de la Sociedad de Fomento Fabril."]

Residence.	Title.	Name.
ARGENTINA.		
Mendoza	Consul-general	Gustavo Munizaga V.
Neuquen Chos-Malal	Consul	Víctor Aquiles Bianchi.
Buenos Ayres	do	Ignacio Reyes Lavalle.
Gallegos	do	Ignacio Anguita Greene.
San Juan	do	José Francisco Esbry Ossa.
Corrientes	Vice-consul	Vicente Barrios.
San Rafael	do	Isaac Espíndola.
Mendoza	do	Luis Stoppel.
San Luis	do	Juan de Dios Escobar Bascuñan.
San Carlos de Mendoza	do	Jaime Fuenzalida.
Malagüe y Rio Grande-Mendoza	Acting consul	Luis Valenzuela.
BOLIVIA.		
Oruro	Consul-general	Luis Ortúzar Búlnes.
La Paz	Consul	Domingo Peña Toro.
Colquechara	Vice-consul	Jorje Kindermann.
Oruro	do	Teodoro Van de Wingard.
BRAZIL.		
Paranaguá	Consul	Antonio F. de Santa Riba.
Bahía	do	Federico A. Asselmann.
Rio Grande	do	Francisco S. Barboza García.
Pará	do	Ignacio Gonçalvez Pereira.
Fortaleza (Est. Ceará)	do	Cosme Alfonso Maia.
Rio Janeiro	do	Enrique Romaguera.
Manaos	do	Raul de Azevedo.
Pernambuco	Vice-consul	Antonio J. de Amorin.
S. Francisco del Sur	do	Serjio Augusto Nobrega.
Natal (R. Grande del Norte)	do	Aristides Ovidio Pereira.
Pernambuco	do	Antonio de Amorin.

Chilean Consuls in America—Continued.

Residence.	Title.	Name.

Baltimore, Maryland	do	R. J. Leupold.
Philadelphia, Pennsylvania	do	Eduardo Pastor Mora.
Tacoma, Washington	do	L. Tennant Steeb.
Chicago, Illinois	do	M. J. Steffens.
Port Townsend, Washington	do	Oscar Kloker.
GUATEMALA.		
Guatemala	Consul-general	Julio Pérez Canto.
Quelzaltenango	Vice-consul	Francisco S. Taglo.
San José	Acting-consul	E. H. Melville.
Champerico	do	Perdo A. Bruni.
Ocos	do	Carlos Lest.
HAITI.		
Haiti	Consul	Charles d'Aubigny.
HONDURAS.		
Tegucigalpa	Vice-consul	Federico Werling.
Amapala	Acting consul	Roberto Motz.
MEXICO.		
Mexico	Consul-general	Vicente Pricto Puelman.
Mexico	Vice-consul	Eujenio Motz.
Manzanillo	do	Adolfo Stoll.
NICARAGUA.		
Managua	Consul	Antonio Agacio.
Managua	Vice-consul	Bernabe Mejía.
San Juan del Sur	Acting consul	Cárlos Holmann.
Corinto	do	Ernesto Palacio.
PARAGUAY.		
Asuncion	Consul-general	Arturo Fernández M.
PERU.		
Callao	Consul-general	Bernardino Toro C.
Mollendo	Consul	Luis M. Vidal.
SALVADOR.		
San Salvador	Vice-consul	Federico Mejía.
Ajacutla	Acting-consul	Leopoldo Córdova.
La Libertad	do	Félix J. Charlaix.
La Union	do	Eduardo Svendblad.
URUGUAY.		
Montevideo	Consul-general	Matías Alonso Criado.
Paisandu	Consul	Juan C. Soto.
VENEZUELA.		
Caracas	Consul-general	Alfredo de la Sota.
Puerto Cabello	Consul	Jacobo E. Pardo.
Caracas	do	Enrique Stock.

COLOMBIA.

TARIFF MODIFICATIONS.

The International Customs Journal of Brussels publishes, as second Supplement to No. 90 (second edition), under date of October, 1902, the following modifications to the customs tariff of the Republic of Colombia:

I. Decree No. 868 of May 28, 1902, increasing the import duties.

["Diario Oficial" No. 11688, of June 9, 1902.]

Sole article. The import duties chargeable upon goods of every description entering the country are increased by 50 per cent.

Sole paragraph. This increase shall be levied on and after the 1st of July next.

II. Extract from Decree No. 865, of May 28, 1902, respecting the certification of manifests (sobordos) and consular invoices, and referring to other fiscal dispositions.

["Diario Oficial" No. 11689, of June 10, 1902.]

ART. 1. Commercial invoices are, for the purposes of consular certification, divided into four classes, viz:

(1) Invoices referring only to articles of iron, steel, copper, zinc, or wood, destined for the machinery of industrial companies, viz., railways, steamers, electric lighting and telegraph apparatus, telephones, printing apparatus, manufactories of glass or earthenware, candles, tissues, or articles which by official declaration are regarded as being of public utility.

(2) Invoices of which the value does not exceed $200.

(3) Invoices of which the value exceeds $200 and does not exceed $500.

(4) Invoices of which the value exceeds $500.

ART. 2. The fees chargeable for consular certification of invoices shall be levied according to the following tariff:

Invoices of the first class per 1,000 pesos or fraction thereof	$3
Invoices of the second class per 1,000 pesos or fraction thereof	6
Invoices of the third class per 1,000 pesos or fraction thereof	8
Invoices of the fourth class per 1,000 pesos or fraction thereof	10

Provided that there will be exception in case said documents refer to articles containing precious stones, or relate to gold, platinum, or silver goods, which would render them liable to the under-mentioned surtaxes:

	Per cent.
Articles containing precious stones	40
Articles of gold	10
Articles of platinum or silver	3

Sole paragraph. Consuls shall not affix their certificate except upon invoices setting out packages provided with the same mark, shipped by the same firm, consigned to the same person or company, and bound for the same destination.

ART. 3. As regards postal parcels, there shall be collected in lieu of the consular fee upon the goods contained therein a charge of 2 per cent on the value of the invoice or the surtax applicable to gold, silver, or platinum wares or to articles furnished with precious stones, the same to be payable in gold or its equivalent in paper money.

Sole paragraph.—It shall be the duty of the General Direction of Posts and Telegraphs to undertake the collection of this surtax and to give notice thereof to all concerned.

ART. 4. The consular fees on manifests shall be at the rate of $5 for the first 100 packages and $1 for every additional 100 packages or fraction thereof.

ART. 5. In order to land foreign goods intended for home consumption of the country at any port of the Republic, whether it be a free port or one open to sea or river trade, the captain or supercargo of the vessel is required to produce a manifest certified by the Consul.

ART. 6. If in a foreign port merchandise is shipped in destination of Colombia and is intended to be transhipped in another foreign port, the corresponding invoices must be legalized by the Consul in the port of the original embarkation. This officer will immediately forward to the Cousul in the port of transshipment an official notice containing the following particulars: Number, marks on, and total weight of the packages; value of the goods; port of destination in Colombia; name of addressee, shipper, and consignee, and all other information deemed to be necessary.

The Consul in the port of transshipment may permit that the invoices so certified be written upon the manifest to be presented to him, if they agree with the information in his possession.

ART. 7. Foreign merchandise disembarked in any of the ports of the Isthmus of Panama to be sent to other national ports requires a manifest, certified by the Administrator of National Finance, for which visé a charge will be made at the rate of $3, silver, at the standard of 0.835, for the first 50 packages, and of $1, in the same money, for each additional 100 or fraction of 100.

ART. 8. Manifests or invoices shall bear note of the fee paid to the consul, consular agent, or financial administrator.

ART. 11. Two kinds of tonnage dues shall be levied—the dues upon the registered tonnage and the dues for landing.

The registered tax is to be charged at the rate of 10 centavos gold per ton entered on the ship's register, and this due shall only be levied in the islands of San Andrés and San Luis de Providencia.

The landing tax shall be at the rate of $1.50 gold per ton of goods unloaded in national sea or river ports, whether free or open to trade, and intended for the home consumption of the Republic.

ART. 13. Unless otherwise clearly specified under special laws or contracts, the following shall be exempt from tonnage dues:

(1) Men-of-war of friendly nations and ships assimilated thereto if authorized to enter and moor in ports of the Republic, provided they do not transport cargo.

(2) Vessels arriving in ballast.

(3) Vessels having more than 50 immigrants on board.

(4) Vessels solely transporting coal, salt, ice, bricks, flooring, or roofing tiles and goods shipped in an open port of the Republic.

(5) National vessels.

ART. 14. If a consular invoice is not in the possession of a customhouse at the time of examination of the merchandise the competent authorities will value the goods and the customs will, on that basis, collect from the importer a fine equal to four times the unpaid consular fees without prejudice to any other penalties imposable under article 326 of the customs code.

Sole paragraph.—The same course shall be adopted in case a difference is detected between the value entered on the invoices and the actual value of the merchandise to which they refer.

ART. 15. Any industrial undertaking, corporation, or person having, after the date of this decree, obtained a customs privilege in respect of goods they import under a subsequent contract shall, when taking delivery of the goods at the customs, pay the corresponding import duties, save that such duties shall be refunded as soon as the Ministry of Finance has issued an order to that effect.

ART. 17. This decree, which modifies article 56 of the customs code as well as other fiscal dispositions, shall, both at the customs and consulates of the Republic, be applicable on and after the 1st of August of this year.

NEW EXPORT DUTIES.

On September 20, 1902, President MARROQUIN, of Colombia, signed an Executive decree providing for certain changes in the export duties of the Republic, as follows:

"ARTICLE 1. From the arrival of the present decree to the knowledge of the respective managers of the customs of the Republic, and until new orders be given, the charges for the export duties will be made in gold, in the form and amount expressed below:

Clean coffee	per quintal	$0.70
Coffee in husk	do	.50
Rubber	do	3.50
Hides	do	1.00
Goatskins and the like	do	3.00
Tagua, or vegetable ivory	do	.25
Divi-divi	do	.08

Tobacco:		
Raw	per quintal	$0.40
Plug	do	.50
Prepared	do	.80
Cotton:		
Raw	do	.30
Clean	do	.35
Seeds	do	.15
Bananas	per bunch	.01
Stuffed birds	per kilogram	1.50
Heron feathers	do	15.00
Orchids	do	.30
Tortoise shell	do	2.50
Balsam	per quintal	1.20
Dye:		
Mora	do	.80
Brazil	do	.80
Construction woods (cedar, galiavo, or any other)	per 1,000 superficial feet	2.40
Cocoanuts	per 1,000	1.00
Cattle	per head	8.00
Straw hats	per kilogram	.50

"Art. 2. Articles not mentioned, declared for export, will be valued by the section of inspection of the respective custom, with the approval of the manager, and will pay 5 per cent of the value in gold.

"Art. 3. The Government will charge for the freight of export cargo: In the Upper Magdalena, $1 gold; in the Lower Magdalena, 80 cents gold—for every cargo not exceeding 10 arrobas (250 pounds).

"Art. 4. The payment of the duties will be made in the same way as it has been effected so far; likewise the payment of freights.

"Art. 5. Private persons who wish to anticipate the payment of funds in gold to the Government will have a reduction of 20 per cent, and when they make the consignment, bonds admissible in full in all the custom-houses will be issued to them in payment of export duties and freights.

"Art. 6. The Ministry of the Treasury is authorized to issue the bonds of which the foregoing article deals.

"Art. 7. Forty days from the date of this decree is the term fixed during which these anticipations can be made, and 100 pesos ($100) the smallest quantity which can be anticipated.

"Art. 8. The quantity anticipated will be taken into account in order to give preference in embarking the cargo of those who have anticipated the money.

"Art. 9. Exporters who are willing to do so will be exempt from the payment of the export duties and of the freight if they will deliver to the Government, as a loan, a sum double the value of the duties and freights.

"*Paragraph 1.* The said loan will be returned in the manner and terms which the Congress of the Republic shall determine, or before, if the Government can do so.

"*Par. 2.* The duties, freights, and loans with which this decree deals will be paid in Colombian gold, according to law 73 of 1867.

"ART. 10. Special passports and safe conducts will be issued by the Ministry of War for all those conducting cargo for export to river ports.

"The civil and military chiefs, as well as the commanders and chiefs of operations in the field, will order the necessary measures to quicken and facilitate export; will give strict fulfillment to decree No. 1202 of 1901, and for no reason will put contributions on export articles.

"ART. 11. Export duties for minerals fixed by decree No. 722 of May 1 last continue without any change, but loans can be made as well as the anticipated payments with which the present decree deals, relative to the same minerals.

"ART. 12. All regulations on the matter which do not oppose this decree are in force and those contrary to it are abolished."

NATURAL WEALTH OF THE REPUBLIC.

A recent article in the Industrial Bulletin ("Boletín Industrial") of Bogota calls attention to the natural wealth of Colombia, and refers especially to the gold, silver, platinum, tin, and copper mines, as well as to the valuable dye and cabinet woods, which are found in abundance in many of the provinces of the Republic. As is well known, the resources of Colombia consist principally of her agricultural and mining industries.

The agricultural lands of Colombia may be divided into the tablelands of the Andes, which include the plain of Bogota, and the temperate and tropical zones. These three divisions are adapted to the cultivation of a great diversity of useful products, practically including everything that can be grown in the torrid and temperate zones. The lands of the plain of Bogota, in the immediate vicinity of the capital of the Republic, have been in use so long that the soil has in many places become greatly exhausted, and now requires the use of fertilizers in order to insure the harvesting of crops equal in yield to those formerly obtained. These poor or worn-out lands may be rendered highly fertile by the use of fertilizers, or they may be, in the course of time, returned to their former state of productiveness by a systematic and careful rotation of crops.

The lands lying in the temperate zone of the Republic are chiefly used for the growing of coffee. Many of the older coffee plantations are beginning to show evidence of long and continued cultivation, and a large number of these will have to be systematically manured in order to restore them to their original fertile condition. Some of the agricultural lands of Colombia are very favorably situated for purposes of irrigation. Those of Tolima are exceedingly well watered by numerous streams that flow from the mountains into the plains, and their location is such that irrigation ditches could be employed to great advantage and profit either on a small or a large scale. The exploitation of the virgin forests along the Upper Orinoco and the Amazon rivers offers great returns to persons engaged in commerce with the numerous products of that rich and extensive region.

The mineral wealth of the Republic is incalculable. The precious metals are abundant, are distributed over a vast area, and by the use of improved metallurgical and reduction methods may be mined with great profit. The country is exceedingly rich in copper ores, and this branch of mining offers great inducements to capitalists and miners. The tin deposits in the province of Santander are rich and extend over a large portion of country. Many of the old mines are idle or are practically undeveloped, and great opportunities exist for the profitable employment of capital and labor in the exploitation and development of the mining industry.

TONNAGE DUES.

A decree of the Government, to the effect that tonnage dues are to be collected on all vessels, including those under the Colombian flag, was received by the Department of State of the United States. The decree, which was enforced October 13, 1902, originally exempted ships under the national flag, but it has been changed to include all ships carrying local cargo.

COSTA RICA.

EXTRADITION TREATY WITH BELGIUM.

The Republic of Costa Rica has concluded an extradition treaty with Belgium. This treaty was ratified by Belgium on April 25 last, and was duly signed and proclaimed in Costa Rica on August 14, 1902. The extraditable crimes and offenses covered by this treaty are as follows:

Voluntary homicide, which includes the crimes of assassination, homicide, parricide, infanticide, and poisoning; arson; assault and battery, where dangerous wounds are inflicted that may give rise to extradition, according to the laws of the countries; (where this latter offense would be punishable by death, in conformity with the laws of the country demanding the extradition, the extradition shall only be allowed upon a prior assurance through diplomatic channels that the death penalty, in case of conviction, shall not be inflicted); rape, attempts against chastity with force; attempts without force against the chastity of children who, according to the penal laws of the countries, are under the age of consent; abduction of minors, concealment, suppression, substitution, or supplanting of children; robbery and pillage; damaging or obstructing railways, thus endangering lives of passengers; piracy or rebellion on board ships when the crew or passengers take possession of the ship by surprise, or violence against the captain; association of evildoers; falsification of deeds, falsification of documents or telegraphic messages; use of falsified documents; falsification or fraudulent alteration of official instruments that are issued by the Government or by the public authority, as well as those of tribunals of justice, and the fraudulent use of documents thus changed or falsified; the manufacture of counterfeit money; falsifying or altering of bonds or coupons of the public debt, of bank notes, national or foreign, of paper money or other public values of credit, of seals, stamps, dies, labels of the State, or of the public administration; placing in circulation or fraudulently using any of the objects mentioned above which have been changed or falsified; embezzlement of public funds by public employees or depositaries; fraudulent bankruptcy; extortion; attempts against individual liberty and against the inviolability of the domicile committed by private persons; false testimony, perjury, and subornation of witnesses, experts, or interpreters; deceit; abuse of confidence; abortion; bigamy; the constant excitation of minors to licentiousness; the concealing of objects obtained by means of one of the crimes or offenses mentioned in the foregoing, and an attempt to commit any of the crimes or offenses enumerated, when the attempt is a penal offense under the laws of the contracting nations.

In every case the offenses by reason of which the extradition is demanded shall be punishable, in conformity with the laws of the country making the demand, by a penalty of not less than two years' imprisonment, and the extradition shall not take place except where a similar offense is punishable under the laws of the country upon which the demand is made. It is expressly agreed that the foreigner whose extradition has been granted shall not be prosecuted or punished for any political offense committed prior to the date of the extradition, nor for any act connected with a similar offense, nor for any crime or offense not included in the present treaty. The treaty goes into effect ten days after its publication, in conformity with the laws of the respective countries, and may be annulled by either party giving a year's notice to the other party of such intention, after the expiration of which time the treaty will cease to remain in force and effect.

DUTY ON CEMENT AND PIPES.

An executive decree dated November 10, 1902, contains the following regulations on duties on cement and pipes imported into Costa Rica:

"ARTICLE 1. Roman cement and earthenware tubes introduced for exclusive use in the port of Limon for sidewalks and sewer connections will be free of duty and wharfage.

"Art. 2. This exemption from duty will last until the 30th of April, 1903, exclusive, and will be subject to the following conditions:

"1. That said materials come consigned to the order of the governor of Limon.

"2. That, before authorizing the withdrawal of any quantity of these articles, the said official will demand from the interested party a signed declaration with respect to the place where they will be employed in conformity with the law.

"That the owner of the articles pay, in proportion to the importations, the warehousing and other indispensable charges that the Government may have to pay for the execution of this decree.

"Art. 3. If the articles thus retired be used outside the port, or for any other object than that authorized, the introducer shall pay a fine three times the value of the duty and wharfage, and shall lose besides, the cement and tubes that he may still have in deposit to the order of the governor."

FREE EXPLOITATION OF THE PACIFIC PEARL FISHERIES.

On July 3, 1902, the pearl fisheries of the Republic of Costa Rica on the Pacific coast were opened for exploitation to natives of the country and to foreigners who had resided at least two years in the Republic. On the 22d of last August rules were promulgated by President Esquival, in an executive decree, governing the exploitation of these fisheries. Under these rules the fishing for mother pearl shall not be carried on by contract, but under a license obtained from the Governor of Punta Arenas, which license will be issued upon payment of the proper fee.

Permission will not be given to fish in indeterminate points on the west coast, but certain places between Salinas Bay and Golfo Dulce shall be designated. Fishing may be carried on from May to October, inclusive, in the territory to the north of Cabo Blanco, and from November to April, inclusive, in the territory to the south of said cape. Search may be made by means of divers or with machinery, but no person or company shall employ more than one diving train composed of more than three machines.

Licenses for the use of machines shall not be granted for a longer period than three months, renewable, however, on their expiration at the discretion of the Governor of Punta Arenas. The use of machines is prohibited in water of a depth of less than 5 fathoms. All kinds of explosives or destructive agencies are prohibited under the penalty of a heavy fine.

DUTY ON CONSTRUCTION MATERIAL.

The Government of Costa Rica has repealed the law of November 2, 1900, admitting construction material, such as iron, lumber, and other articles, for use in the city of Limon, free of duty. According to this decree, lumber now introduced into the Republic, through the port of Limon, shall pay importation duties of 25 colones ($11.63) on each 2 cubic meters and 356 cubic decimeters, equal to 1,000 superficial feet, English measure.

DUTY ON WOODEN BLINDS.

On October 24, 1902, the President of the Republic, acting under authority of the laws of July 16, 1888, and June 14, 1901, fixed, by an executive decree, the duty on wooden blinds or curtains simply painted and joined together by means of wire, and intended for use in balconies and halls as a protection against the sun and water, it not being considered just to classify them as shutters owing to their construction and size, at 0.15 colones ($0.07) per kilogram, provided they are without ornaments of any kind and are at least 2½ meters wide.

CUBA.

ENGINEERS' TITLES IN THE REPUBLIC.

Under date of November 11, 1902, United States Minister SQUIERS, at Havana, transmitted the following information to the Department of State of the United States, concerning the formalities required for the exercise of an engineer's profession in the Republic of Cuba:

"The order (No. 81, March 18, 1902) authorizing engineers with foreign titles to exercise their profession, serve in public office, and fulfill official commissions upon presentation of said titles to the Department of Public Instruction, is repealed. The authorization granted to engineers, mentioned in order No. 81, as well as those subsequently granted by the Department of Public Instruction, remain in force. According to order No. 90 (June 23, 1899) and modifications on December 5, 1900, engineers having titles issued by foreign universities shall be admitted on their incorporation in the University of Havana, provided their titles fulfill the requirements. The incorporation of titles shall be effected in the form established for the school of sciences, the examinations being upon matters studied in the school of engineers. Cubans holding titles as engineers issued prior to this law by foreign schools of recognized fame and reputation may, on presentation of said titles to the Department of Public Instruction, exercise their profession without examination. Agricultural engineers from the school of agriculture in Havana, in order to exercise their profession freely in Cuba, shall present their certificate of degree to the Department of Public Instruction, and upon proof of its authenticity and personal identification they shall receive a title authorizing them to exercise their profession in Cuba. Professional men holding foreign titles, who have not previously revalidated them, shall not exercise their professions nor discharge any professional duty—national, provincial, or municipal—dating from the promulgation of this law (October 28, 1902). The engineers above referred to are alone excepted."

SUGAR PRODUCTION.

United States Minister SQUIERS, of Havana, under date of October 24, 1902, transmitted the following statement to the Department of State of the United States, showing the quantity of Cuban sugar exported and on hand September 30, 1902, as compared with the same date in 1901:

[In bags of 320 pounds.]

PROCEDURE FOR OBTAINING CITIZENSHIP.

The law promulgated November 7, 1902, establishing the procedures necessary for the obtaining of the rights of citizenship within the Republic of Cuba is as follows:

"ARTICLE 1. The acts by virtue of which Cuban nationality is acquired, lost, or recovered shall be made to appear by means of a record in the section of citizenship of the registry of civil status.

"The persons included in the cases referred to in sections 2 and 3 of article 5 of the constitution, and the second of the transitory provisions of the same, and residing abroad, shall exercise the right conferred upon them by the former sections before the diplomatic or consular agent of Cuba nearest to their place of residence.

"Art. 2. The inscriptions to which the preceding article refers shall be made with the following formalities and requirements:

"1. The date and place where they are drawn.

"2. The names and surnames of the officials authenticating the same.

"3. The names, surnames, and filiation of the parties and witnesses participating in the act.

"The witnesses referred to in the preceding paragraphs shall be two, having legal capacity, and shall make a declaration setting forth the truth of the circumstances, which should be expressed in the inscription.

"Art. 3. The interested parties shall present to the custodian of the registry their certificates of baptism, or the certificate of birth, as the case may be, as well as the record or certificate of marriage, should they be married, together with the certificates of birth of the wife and of the children.

"Should it be impossible to present the documents referred to in the preceding paragraph, they shall indicate the archives where they may be found and their approximate date.

"In the cases where the birth of the interested parties, their wives, or their children shall have been inscribed in the registry of civil status of this island, or in the register in charge of the diplomatic or consular agent, the acquisition, loss, or recovery of Cuban citizenship shall be made by a marginal note on the record of birth, for which purpose the custodian of the register wherein the said acquisition, loss, or recovery occurs shall remit, within the term of fifteen days—counting from that on which the inscription took place—a certificate of the same, to the custodian of the register wherein the said birth appears.

"For failure to comply with the provisions of the preceding paragraph, a fine of from $10 to $25 in United States currency shall be imposed on the custodian of the register, required to remit the certificate.

"Art. 4. In the inscriptions mentioned in this law, the following circumstances shall be expressed if it is possible:

"1. The former domicile of the interested parties.

"2. The names, surnames, place of birth, domicile, and profession or occupation of his parents.

"3. The name, surnames, and place of birth of his wife, if he be married.

"4. The names, surnames, place of birth, residence, and profession or occupation of the parents of the latter.

"5. The names, surnames, place of birth, residence of the children, setting forth if any of them are emancipated.

"Whenever it is impossible to express any of the circumstances mentioned above, a statement shall be made in the inscription of the reason of that inability.

"ART. 5. In order to be inscribed as Cuban citizens, the persons included in section 1 of article 6 of the constitution shall prove by means of the discharge, or of any other document issued by a competent revolutionary authority, that they have belonged to the liberating army. This proof shall be made by such persons before the custodian of the civil registry of their domicile, should they be in this island, or by means of a special attorney before the custodian of the civil registry at their last place of domicile therein, or of the place of domicile where they intend to fix their residence in Cuba, if they are abroad.

"ART. 6. In order to be inscribed as Cuban citizens, the persons included in sections 2 and 3 of article 6 of the constitution shall prove before the custodian of the civil registry of their place of domicile in Cuba the residence required by said sections by means of an authentic document, or proof by witnesses made in the manner established in article 8 of the present law.

"The declaration of intention to which section 3 of article 6 of the constitution refers should be made before the custodian of the civil registry of the domicile which the interested party has in Cuba with the same formalities as in case of inscription.

"ART. 7. To be inscribed as Cuban citizens, the persons included in section 4 of article 6 of the constitution shall prove before the custodian of the registry of civil status of their place of domicile in Cuba that they have not been registered in the registry of Spaniards opened in pursuance of the provisions of the treaty of Paris of December 10, 1898; that they are of full age, and that they resided in this island on the 11th day of April, 1899.

"The proof of not being inscribed in the said registry of Spaniards must necessarily be made by means of a certificate issued by the functionary of said registry.

"The circumstances of full age and of residence shall be accredited by means of proof by witnesses received under oath before the custodian of the registry of civil status, the witnesses declaring that they resided, on the aforesaid date of April 11, 1899, in the same locality as the moving party making the proof.

"The interested party shall present a certificate of the captaincy of the port, or proper authority, wherein shall appear the date of his arrival in the island, the age which he then had, whether he came alone or with a family, the name of the vessel which brought him and of the captain of the same.

"ART. 8. To be inscribed as Cuban citizens, the persons included in section 5 of article 6 of the constitution shall prove before the custodian of the civil registry of their place of domicile that the circumstances exacted in said section exist as to them by means of a declaration of witnesses received under oath.

"ART. 9. In all the inscriptions to which this law refers it shall be made to appear that the interested parties renounce their previous nationality and that they swear to obey the constitution of the Republic, the laws which are actually in force in this island, and those which may be in force in the future.

"ART. 10. The custodians of the registry of civil status in this island shall remit to the division of State of the Department of State and Justice a certificate of each inscription which they make in the books of the section of citizenship, and to the section of registries and notarial affairs of the same Department a comprehensive table of the inscriptions, classified according to the model which said section shall formulate.

"The diplomatic or consular agents shall remit to the Department of State certificates of the inscriptions referred to in paragraph 2 of article 1 of this law, for their transcription in the registry of civil status of the last place of domicile which the interested parties may have had, or of that which they propose to have in this island.

"The term for the remission provided for in the two preceding paragraphs shall be fifteen days, counted from the day following that on which the inscription shall take place.

"Failures to fulfill this duty shall be punished by the Secretary of State.

"ART. 11. Those who, prior to the promulgation of this law, have proven in the extinct Department of State and Government that there exist, as to them, the circumstances exacted in articles 5, 6, 7, and 8 of this law, are exempted from the proof of the same, as well as those that may have made in the registry of civil status of their domicile the declaration of option or renunciation of nationality, to the end that they might be registered as electors, according to the provisions of the additional dispositions of order No. 218, of October 14, 1901."

TRADE WITH GERMANY.

The following interesting article concerning trade between Cuba and Germany is translated from the Berlin South American "Outlook," of November 9, 1902:

"The transfer of the Pearl of the Antilles from Spanish ownership to the control of the American Union has not, during the past year, exerted any injurious effect upon European trade with the island. On the contrary, the Cuban demand for German wares is, judging from the figures for 1901, considerably increasing.

"In the years 1895 to 1897 the annual exportation to Cuba from Hamburg amounted to between 2,000,000 and 3,000,000 marks ($476,000 and $714,000); in 1898, it was 1,700,000 marks ($404,600); in 1899, it was 5,900,000 marks ($1,404,000); in 1900, it was 8,800,000 marks ($2,094,400); and in 1901, it amounted to 10,200,000 marks ($2,427,600).

"The needs of the Cuban market are exceedingly varied, Hamburg export statistics showing that 124 different kinds of merchandise were shipped from that port to Cuba last year. The importation into Cuba from Hamburg of rice alone increased in the past year from 1,100,000 to 4,500,000 marks ($261,800 to $1,071,000). Shipments of other articles increased as follows: Malt, from 60,000 to 167,000 marks ($14,280 to $39,746); cotton wares, from 151,000 to 262,000 marks ($35,938 to $62,356); hosiery, from 260,000 to 496,000 marks ($61,880 to $118,048); and paper, from 202,000 to 387,000 marks ($48,076 to $92,106).

In 1901, there was a slight decrease in shipments of ironware, passementerie, and toys, but the amount exceeded that of 1899.

The condition of Cuba's export trade with Germany is also favorable, although the results in 1901 fell somewhat short of those for the preceding year. In 1895, Germany imported from Cuba merchandise valued at 16,000,000 marks ($3,808,000); in 1898, 6,700,000 marks ($1,594,600); in 1899, 12,300,000 marks ($2,927,400); in 1900, 13,200,000 marks ($3,141,600); and in 1901, 12,900,000 marks ($3,020,200). The principal articles taken by Germany in 1901 were cigars, valued at 7,000,000 marks ($1,666,000); and raw tobacco, valued at 3,000,000 marks ($714,000), a decrease of 800,000 marks ($190,400) in cigars and an increase of 400,000 marks ($95,200) in raw tobacco. Other articles furnished by Cuba to Germany in 1901 were wood, valued at 1,000,000 marks ($248,000); wax, valued at 856,000 marks ($205,870); and cattle skins, valued at 300,000 marks ($71,400)."

OPEN PORTS OF THE REPUBLIC.

Following is a list of the ports of the island of Cuba open to importation and exportation of merchandise, as communicated by the Secretary of State and Justice:

Havana, Matanzas, Cardenas, Ysabela de Sagua, Caibarien, Nuevitas, Gibara, Baracoa, Guantanamo, Santiago, Batabano, Manzanillo, Santa Cruz, Tunas de Zaza, Cienfuegos, and Trinidad.

Other ports, such as Bañes, Puerto Padre, Nipe, and Sama, are authorized for the exportation of fruit and for the importation of foreign merchandise, but they are known as subports and depend directly on the administration of customs of the open ports.

DOMINICAN REPUBLIC.

EXPORTS IN 1902.

[From " La Gaceta Oficial."]

The following is a résumé of the exports through the custom-houses of the Republic during the first half of 1902:

Articles.	Quantity.	Value.
Raw cotton, quintals	36	$364.30
Live animals, head	168	2,691.00
Deer horns	6,000	138.00
Sugar, quintals	1,084,090	1,962,814.18
Bera, tons	245	1,971.50
Sisal rope, quintals	142	1,419.40
Cacao, do	80,428	750,530.32
Coffee, do	26,615	188,500.00
Campeche wood, tons	1,274	10,732.00
Yarey fiber, dozen	4,286	870.00
Mahogany logs, feet	159,188	8,217.52
Mahogany forks, do	15,300	1,570.00
Caya wood, do	5,000	100.00
Cedar, do	30,820	925.00
Wax, quintals	1,506	34,636.49
Tortoise shells, pounds	54	213.00
Goatskins, dozen	4,033	22,051.56
Ox hides, quintals	2,206	20,313.04
Divi-divi, tons	675	4,176.00
Espinillo wood, feet	56,148	2,701.45
Guayacán, tons	286	7,078.32
Bananas, bunches	113,455	37,836.50
Moss, quintals	92	160.00
Molasses, gallons	4,690	398.00
Honey, do	19,150	5,056.00
Mora wood, tons	26	190.00
Guayacán resin, quintals	18	211.80
Rum, gallons	2,093	434.03
Sole leather, quintals	22	225.00
Leaf tobacco, do	10,651	26,974.07
Miscellaneous	....	2,192.95
Total	....	3,095,691.43

ECUADOR.

PROPOSED RAILWAY TO SUCRE, CHONE, AND ROCAFUERTE.

On September 3, 1902, the President of the Republic, in a special message to the Chamber of Deputies, strongly recommended the passage of the proposed law authorizing the construction of a railway into the rich agricultural and mining region embraced in the cantons of Sucre, Chone, and Rocafuerte. As is well known, this portion of Ecuador is exceedingly rich in natural resources, and the building of a railway into the province of Manabí would be a powerful incentive toward the rapid development of that province.

GUATEMALA.

INDUSTRIAL CONDITIONS.

An interesting résumé of general conditions throughout the Republic of Guatemala is published in the "Tribune" of New York for November 30, 1902, being the expressed views of a traveler recently returned from Central America. He states that one of the features that particularly impressed him was the number of aboriginal descendants found in the country, statistics showing that the pure-blooded descendants of the original Guatemalans outnumber the full-blooded descendants of the other Central American countries 12 to 1. The explanation of this fact lies in the peace-loving characteristics of the native inhabitants of Guatemala at the time of the Spanish conquest, who devoted their time chiefly to agriculture and offered little or no resistance to the invaders. Thus, while the warlike Indians were exterminated, those of Guatemala were merely subjected for the time being, and their descendants, with a slightly larger number of "ladinos" and "mestizos," as the Indians of mixed blood are called, make up the bulk of population of the country.

The pursuits of the inhabitants are still largely agricultural and it is only recently that manufacturing has assumed any proportions in the country. The soil is fertile and the principal crops are: Coffee, which grows between 1,000 and 6,000 feet above sea level; sugar cane, growing between sea level and 6,200 feet; cacao, up to 3,000 feet, while tobacco, wheat, maize, and beans are also raised in large quantities. The ordinary yield of tobacco, according to the best authorities, is 1,000,000 pounds annually; of sugar, 11,000,000 pounds; bananas, 1,000,000 bunches; cacao, 200,000 pounds, and coffee exports in one year attained 85,373,223 pounds, with a value of $7,390,477 gold.

In addition to the agricultural resources of the country, there are also about 1,300,000 acres of forest land, abounding in mahogany, and 750,000 acres of grazing land. Gold mines have been opened on the south bank of the Montagna River and silver mines are being exploited in the vicinity of the same stream. Other mineral deposits embrace coal, lignite, manganese, lead, tin, kaolin, opals, slate, alum, marble, antimony, sulphur, and salt, none of which have, however, received adequate exploitation.

Such manufacturing plants as exist are devoted to the supply of local needs, and include the preparation of ramie fiber and the manufacture of coarse textiles, hats, shoes, clay products, cigars, foundry products, furniture, musical instruments, agricultural implements, and liquors.

The leading population centers are: Guatemala City, with 72,102 inhabitants; Quezaltenango, with a population of 22,265; Coban, with

24,475; Totonicapam, 25,196, and San Pedro, 11,189. The principal ports on the Atlantic Ocean are Livingston and Puerto Barrios, the latter one of the terminals of the transisthmian railway now under construction, while on the Pacific are San Jose, the other terminal of the same railway; Champerico, and Ocos. Education is free and compulsory, the State expenditure for the purpose, exclusive of a polytechnic school, being $95,062.

MODIFICATION OF THE NORTHERN RAILWAY CONTRACT.

The President of Guatemala, in exercise of the authority vested in him by Congress, authorized the Department of Public Works, on October 23, 1902, to make a contract with the Central American Improvement Company, Incorporated, modifying the contracts of August 31 and November 28, 1900, relating to the construction, exploitation, and conservation of the Northern Railway.

In conformity with the terms of the new contract, which was entered into on October 23 of the present year, the Northern Railway Company is granted until December 30, 1904, in which to complete the construction of the railway from the San Augustin ranch to the city of Guatemala. The railway company is also allowed until December 30, 1904, in which to select from the Los Andes ranch the 500 *caballerías* of land referred to in article 8 of the contract of August 31, 1900.

In case of default by the Government in the payment of the principal and interest, the Improvement Company shall retain the railway properties, provided the provisions of the different agreements concerning this subject are complied with. Any questions regarding the interpretation of the contract that can not be mutually settled to the satisfaction of the parties shall be submitted to arbitration.

The contracts of August 31 and November 28, 1900, remain in force in so far as they are not modified or abrogated by the present covenant.

HONDURAS.

POPULATION IN 1901.

Official statistics, received by the International Bureau of the American Republics, of the population of Honduras in 1901 show the following result of the census of that year:

Departments.	Men.	Women.	Total.	Departments.	Men.	Women.	Total.
Tegucigalpa	39,617	42,183	81,800	La Paz	13,452	13,932	27,384
Copán	30,890	31,508	62,398	Intibucá	12,723	13,625	26,348
Gracias	24,543	23,699	48,242	Cortéz	11,594	10,207	21,801
Choluteca	22,199	23,141	45,340	Yoro	9,542	10,446	19,988
Olancho	20,966	23,530	44,496	Colón	6,351	7,440	13,791
El Paraíso	19,567	20,351	39,918	Atlántida	4,778	4,019	8,797
Santa Bárbara	18,053	18,175	36,228	Islas de la Bahía	2,458	2,279	4,737
Valle	16,611	16,839	33,450				
Comayagua	13,960	15,063	29,023	Total	267,304	276,437	543,741

MEXICO.

IMPORTATION OF TEXTILES IN 1902.

The statistics issued by the Treasury Department of the Mexican Republic for the fiscal year ended June 30, 1902, show the importations of textiles and woven goods in the year to have amounted in value to $8,368,751.28 gold, as compared with $9,212,506.76 in the preceding fiscal year, thus indicating a decrease for the year of $843,755.48. This decline in the importation of textiles and woven goods is the direct result of the increased manufacture of such goods within the Republic. These native manufactures are identical in quality and variety with the imported goods, but are much cheaper.

The number of cotton mills paying the stamp tax for the six months from July to December, 1902, rated in June, was 125, exclusive of the woolen mills. The amount of stamp tax paid in advance was $80,913.10. The total number of spindles employed in these factories was 554,880, of which 162,667 were of the old style and 392,213 new style. Of looms, a total of 17,725 was in operation, 6,125 being old style and 11,600 of modern make. Efforts are being made by the Mexican Government to increase the output of the factories to such an extent that Mexico may enter into competition with the countries exporting textiles.

STATISTICS OF TOBACCO MANUFACTURE.

The "Boletín de Statistica Fiscal," published by the Treasury Department, gives the following statement of the manufacture of tobacco in Mexico during the three fiscal years 1898–99 to 1900–1901:

1898–99.—Number of factories, 743; tobacco made into cigarettes, 4,915,730 kilograms contained in 328,605,915 packets; common cigars, 174,628 kilograms; number of cigars, 45,438,759; fine cigars, 432,966 kilograms; number of cigars, 64,302,282; rape, 414 kilograms in 828 packets; fine cut, 22,939 kilograms in 39,443 packets.

1889–1900.—Number of factories, 766; cigarettes, 5,906,520 kilograms of tobacco in 375,542,765 packets; common cigars, 236,559 kilograms; number of cigars, 53,465,432; fine cigars, 417,932 kilograms; number of cigars, 65,498,010; rape, 22 kilograms in 40 packets; fine cut, 23,733 kilograms in 30,726 packets.

1900–1901.—Number of factories, 740; cigarettes, 5,974,334 kilograms of tobacco in 364,699,301 packets; common cigars, 283,472 kilograms; number of cigars, 55,014,618; fine cigars, 405,798 kilograms; number of cigars, 60,348,278; rape, 16 kilograms in 32 packets; fine cut, 18,215 kilograms in 24,820 packets.

The tobacco factories contributed under the stamp tax in each of these three years the following sums: In 1898–99, $1,395,212.17; 1899–1900, $1,551,447.15; 1900–1901, $1,582,816.46.

The annual consumption of tobacco in the factories each month was: In 1898–99, 5,546,677 kilograms; 1899–1900, 6,584,766 kilograms; and in 1900–1901, 6,681,835 kilograms.

Of the foregoing manufactures of tobacco the exports were during the same three years: In 1898–99, cigarettes and cigars, 404,701 kilograms; value declared in custom-houses, $894,700. In 1899–1900, cigarettes and cigars, 276,967 kilograms; value declared in custom-houses, $699,306. In 1900–1901, cigarettes and cigars, 284,283 kilograms; value declared in custom-houses, $705,385.68.

The tobacco-leaf exports, exclusive of the manufactured articles, were: In 1898–99, 2,275,918 kilograms; declared value, $2,515,606. In 1899–1900, 1,692,578 kilograms; declared value, $1,645,576. In 1900–1901, 1,735,073 kilograms; declared value, $1,509,328.25. Tobacco exported pays no duty.

The foregoing quantities show that the total production of tobacco in each of the three years under review was, in 1898–99, 7,822,595 kilograms; in 1899–1900, 8,277,344 kilograms; in 1900–1901, 8,416,908 kilograms. The production for the year 1901–2 is estimated to reach 10,000,000 kilograms.

CONCESSION FOR THE CUTTING OF TIMBER.

The Department of Public Works has granted a concession to J. E. PLUMER for timber cutting on 216,936 hectares of Government lands situated in the Peto district, State of Yucatan. The lands in question are covered with valuable forests of mahogany, cedar, dyewoods and construction timbers. The contract also authorizes the concessionaire to engage in the industry of extracting rubber and other resinous substances. The duration of the concession is ten years, and is based on the payment to the Government by the concessionaire of the following sums:

	Pesos.
For each mahogany or cedar tree cut	1.50
For each tree of construction timber cut	.50
For each ton of firewood cut	.50
For each ton of dyewood	2.00
For each ton of chicle gathered	18.00
For each ton of rubber gathered	24.00
An annual payment for each hectare of land cultivated	1.00
An annual payment, per head, for cattle pastured in the zone embraced in the concession	.50
An annual payment per hectare of land exploited of	.12

DIVIDIVI, OR CASCALOTE.

A recent article in the "Progreso," of Mexico, contains some useful information regarding the important commercial product called *cascalote*, or dividivi, the latter name being the designation applied by European importers to the pod or fruit of the *Caesalpina coriaria*, an indigenous leguminous plant of tropical America, the West Indies, Northern Brazil, Venezuela, and Colombia. The plant upon which the *cascalote* grows is also cultivated in other tropical regions, usually on a small scale, and in India its cultivation has been engaged in to a considerable extent. The pods of the plant, which is the valuable part for commercial purposes, contain a large percentage of tannin, and, when mixed with other substances possessing tannic properties, makes a good substitute for nutgalls. When employed for tanning purposes, it renders the leather soft and pliable and of a dark red color. One of the largest markets for dividivi, or *cascalote*, is Hamburg. The annexed table shows the value of the shipments of this product to Hamburg from 1893 to 1899, inclusive:

Years.	Value.	Years.	Value.
	Marks.		*Marks.*
1893	1,761,090	1898	1,195,310
1894	1,170,230	1899	1,639,410
1895	988,080	Total	[a]9,957,240
1896	1,532,250		
1897	1,670,870		

[a] Equal in American gold to $2,389,737.

In Venezuela and Colombia the principal ports from which this article is exported are Maracaibo, Rio Nacho, and Sabanilla. The average price paid for *cascalote* during the last twenty years, according to the "Hamburger Seeinfurg," was from 20 to 22 marks per kilogram.

The dividivi shrub thrives over a considerable range of altitude varying from sea level to 2,500 feet. It bears fruit at the end of the sixth or seventh year, the yield increasing annually up to the twenty-fifth year. The shrub may also be employed to advantage as a shade tree, and as protection against the windstorms or gales. It is propagated from the seed. A plot or bed of rich loam of from 3 to 4 feet wide, and of a suitable length, is prepared, the seeds are planted at a distance of about 8 centimeters apart, and are covered to the depth of 1 centimeter with a layer of rich soil. This seed bed or nursery should be kept humid, and should be protected by shade during the heated portion of the day. In about ten days from the completion of the planting, the seeds will have germinated and the tiny plants will appear above the surface of the ground. The shade should then be gradually lessened, and when the plants reach a height of 15 centimeters the shade should be removed altogether. When the plants are 30 centimeters high they should be carefully carried to the field intended for the permanent grove, and transplanted at a distance of 4 meters apart. After transplanting, the soil in which the plants are placed should be kept moist until they have taken root, and should be partially shaded for a period of three months after the operation of transplanting.

No other attention is required except to keep the grove free from weeds. The freeing of the grove from weeds will be rendered easier from year to year until the plants begin to produce, at which time the shade will have become so dense as to prevent any undesirable undergrowth that would endanger the trees or lower their yield. The harvesting of the fruit is very simple, and consists in gathering the pods when they turn to a dark, gray color. These pods, after being dried in the sun, are placed in sacks and are then ready for the market.

RAILWAY CONCESSION IN SONORA.

The Mexican Government has granted a concession for the construction of a railway from Alamos, Sonora, to the port of Ybaros in the same State, with the privilege of building branch lines to San Bernardo, and the mineral districts of Josefita. The duration of the concession is ninety-nine years, at the expiration of which time the railway will revert to the Government. The concessionaire agrees to commence the survey within six months, and is obligated to complete at least 20 kilometers of the road during the first two years, and must not construct less than 20 kilometers additional in any subsequent year, the entire line to be finished within a period of five years.

CONCESSION FOR THE CONSTRUCTION OF IRRIGATION WORKS.

The Department of Public Works has authorized the use for irrigation purposes of a quantity of water taken from the Techuitlan or Fuertes rivers, in the State of Jalisco, not to exceed 1,000 liters per second. The concessionaire has seven years in which to construct the hydraulic works necessary to be used in the taking and distributing of the water referred to.

CONCESSIONS FOR THE CONSTRUCTION OF ELECTRIC POWER HOUSE.

The Mexican Government has authorized the construction of hydraulic works necessary to convert the water power of the Pilón or Montemorelos River, in the State of Nuevo Leon, into electric power. The concessionaire is obligated to use the electric energy mentioned at the place where it is generated, or transmit it for use to some other more convenient place by means of overhead wires.

A similar concession has been granted for the utilization for the generating of motive power of a quantity of water, not exceeding 2,000 liters per second, taken from the Verde River, in the district of Temascaltepec, State of Mexico. The electric energy thus obtained must be used at the place where it is generated, or transmitted for use at some more convenient place.

THE MEZQUITAL MINES.

The Mezquital mines are situated in the range of mountains, in the State of Zacatecas, in which the Mezquital River rises. In addition to the mines proper and the space occupied by the mill and waterworks and concessions, there are 162 hectares of valuable woodland belonging to the company. Adjoining the village of the corporation is the village of Mezquital del Oro, which has a population of some 2,500 inhabitants, composed principally of miners and their families. The company has an excellent 50-stamp mill, and is supplied with all the tools and appliances necessary for the exploitation of the mines, including the crushing and treatment of the ores. The mines contain a number of veins or lodes, but up to the present time the workings have been confined to the principal lode, which runs through the entire length of the mining property for a distance of more than 3½ kilometers. This lode has an average width of 1.50 meters, and assays about 23 grams of gold per ton, of which quantity only about 60 per cent is saved by the amalgamation process. The grade of the ore, while not high, is even and regular, and the treatment of thousands of tons shows but little variation in the richness of the mineral. The other lodes of the mines are of considerable importance and extent, but as the main vein is capable of furnishing a quantity of ore that appears to be practically inexhaustible, the smaller veins will probably not be worked for some time to come. The ores are taken from the mines to the stamp mill through the San Miguel tunnel, and owing to the slant of the tunnel no mechanical force is necessary. The tunnel, which also serves as a drain, penetrates the mountain for a distance of 610 meters. The entrance to the tunnel is 9 meters above the level of the river, and the mines are 129 kilometers from Guadalajara, from which city provisions and supplies are obtained.

THE DEVELOPMENT OF COFFEE CULTURE.

Mexico is the most northerly of American countries to engage profitably in the growing of the coffee plant. The initial efforts in this culture were made in 1818 at Cordova, in the State of Vera Cruz, and large *cafetals*, or coffee plantations, may still be seen in that region, though tobacco growing has become the leading industry of the district. Certain parts of the Republic are admirably adapted for coffee cultivation, and yield a quality which is equal to the best varieties of Arabia.

The plant may be grown at any altitude between sea level and 5,000 feet, its success at the various heights being governed by local climatic conditions. On the Isthmus of Tehuantepec, where the elevation of some of the plantations is not more than 500 feet, a favoring temperature is produced by the air currents which sweep across the neck of land from ocean to ocean, reducing what would otherwise be too tropical heat. Equally good results are obtained from among the mountains and foothills of the States of Oaxaca, Michoacan, Puebla, Vera Cruz, and Chiapas. These States are the principal coffee-producing sections of the Republic, as the northern part has too sterile a soil and too temperate a climate for such vegetation, and much of the southern part is a table-land over 5,000 feet above sea level.

The variety chiefly cultivated is *Coffea arabica*, allied to the Mocha. The myrtle species, similar to the Java, is second in quality, and it is thought that on the lowlands near the coast Liberian coffee would do well, as it is grown near the sea in its native habitat. The best coffee in Mexico is grown in the State of Michoacan, near the city of Uruapan. The berry is small and dwarfed and contains but one seed. This is of so delicious a flavor that it is supposed to have its own portion and that of the missing seed as well.

One of the largest plantations in Mexico is owned by United States citizens, and is situated in the Sierra Madre Mountains in the State of Oaxaca, a day's journey on horseback from the Mexican Southern Railway, over seven ranges of mountains. It is a model farm, comprising 6,000 acres, and fitted up with modern machinery of United States origin. In the Department of Palenque, State of Chiapas, a number of planters from the United States are successfully engaged in raising coffee, and several companies have secured land that they are selling in small tracts and colonizing. On the Isthmus of Tehuantepec an Ohio company has bought 900 acres of coffee lands in the foothills of a mountain range, and adjoining this property is an estate owned by a Kansas City company on which one of the most complete coffee-cleaning plants is in operation. Many other planters in the vicinity have reached the period when returns on their outlay are being realized. Another exceptionally favorable location for coffee growing is on the Tehuantepec Railway, 85 miles south of the Gulf port of Coatzacoalcos, and bordered by rivers on each side. This estate is known as "La Puerta," and contains 40,000 acres. The State of Vera Cruz also contains large plantations devoted to this culture, which is being carried on with good results.

RUBBER CULTURE IN THE REPUBLIC.

In the Report of the Secretary of Agriculture of the United States for 1902 the following is stated with regard to the culture of the Central American rubber tree, known as "castilloa," in the Republic of Mexico:

"It is generally supposed that a continuously humid climate is necessary for rubber culture, but in southern Mexico it is obvious that an alternation of distinct wet and dry seasons is favorable to the production of rubber by castilloa, which will permit a much wider use of this tree in our tropical islands than has appeared possible hitherto. The failure of some of the earlier experiments may be ascribed to planting in situations too uniformly moist. The tree will often grow luxuriantly where it will produce little or no rubber, as many planters have learned to their cost. Rubber is the most important vegetable raw material now imported for manufacture in the United States. The agricultural production of rubber is assured, and several millions of capital from the United States have been invested already in Mexican rubber plantations. The extent, however, to which these and similar enterprises in other countries can be made profitable depends on the solution of many new agricultural problems.

PEARL-FISHING CONCESSION.

The "Diario Oficial" of November 30, 1902, publishes a new concession for pearl fishing, granted by the Mexican Government to Messrs. SANTA CRUZ & OLLIVIER for the purpose of exploiting for ten years the mother-of-pearl to be found from the mouth of the Rio Colorado to the port of Manzanillo and on the shores of the islands in the Gulf of California, known as Tiburon, San Esteban, San Pedro Martir, and San Pedro Nolasco. The concessionaires are also allowed during the same period to exploit the sheep and goats, phosphates and sulphates which exist on the islands of the Revillagigedo Archipelago in the Pacific Ocean, and also within a zone extending 10 kilometers (6 miles) around the coast of the last-mentioned islands to exploit the fish, shellfish, and whales, the islands referred to being Socorro, San Benedicto, Roca Partida, and Clarion, as well as the oysters to be found on the last mentioned.

The concessionaires are obliged to respect previously established fishing rights, especially those of small fishermen. By article 4 the concessionaires will pay in rent as follows: $1 for every ton of fish or shellfish, $10 for every ton of mother-of-pearl, $3 for every ton of whale oil, $2 for every ton of ordinary turtle, and $50 for every ton of the *Eretmochelys imbricata* producing tortoise shell, 10 cents annually for each head of cattle given pasture on national lands within the zone, 50 cents annually for every hectare (2.471 acres) of national lands cultivated, 20 cents per ton of oyster shell, and 50 cents per ton of phosphates and sulphates which they will work, 50 cents for each sheep or goat utilized, besides an annual fixed sum of $400.

They must construct within three years a factory or packing house to tin, or otherwise preserve, the produce of their fisheries. They may build the same free of any charge on any national land within the zone of their concession. They will have to begin work within one year from the date of the present contract, and must contribute $12,000 annually toward the expenses of Government inspection.

It is interesting to note that, among other reasons, the contract will become void by paragraph 7 of article 17, "For having given over the concession or having admitted into partnership any foreign Government or agent of such Government," but by article 20 the concessionaires and the company which they may form shall always be considered, and will in all cases be subject to the courts of law of Mexico. They can not ever claim under the contract any rights in international law, neither will they be allowed to make any appeal to any foreign diplomatic agent.

The same number of the "Diario" contains another concession of a similar nature granted to Mr. R. GILBERT for prawn, lobster, and sponge fishing, off the coast of Yucatan, between Cape Cangrejo and Punta Flor.

MISCELLANEOUS NOTES.

The revenues of the State of Durango during the six months from January to June of the current year 1902 amounted to $1,065,350.17 and the disbursements to $1,042,222.48, leaving a balance of $23,127.69 in cash in the treasury to carry over to the following six months. Among the items forming the revenue is the sum of $53,753, the proceeds of the tax on mining. The tax on rural properties produced $72,959.82, and on city properties $24,388.24; the licenses for the various lines of business yielded $57,186.85.

A table prepared by the "Commercial Intelligence" of London, and published on October 30, 1902, shows that of the total imports of Mexico in the years 1893–1895, Great Britain furnished 17 per cent, and in the years 1898 and 1900 a gain of one point was made, 18 per cent being the recorded quota. In the intervals under comparison, the proportion of German trade advanced from 8 per cent to 11 per cent; that of France declined from 14 per cent to 12 per cent, and that of the United States from 52 per cent in the former period to 49 per cent in the latter.

A French consular report states that there are at present in the State of Vera Cruz 9 cotton-weaving mills which occupy the first rank among the 125 mills throughout Mexico. The chief mills are in the hands of Frenchmen.

NICARAGUA.

VOLCANOES IN THE REPUBLIC.

The following excerpts are from an interesting paper, dealing with the volcanoes of the Republic of Nicaragua, prepared by Mr. P. W. CHAMBERLAIN, C. E., member of the American Society of Civil Engineers. The views of Mr. CHAMBERLAIN are the more important as he was for many years one of the members of a United States company of engineers engaged in the construction of roadbeds in Nicaragua.

"The orographic system of Nicaragua is distinctly marked by two separate and well-defined geological formations, each giving different aspect to the country in its hydrography and general physical conditions, and, moreover, to the social and political as well.

"From the boundary line of Honduras to the valley of the San Juan River and from the lakes to the shores of the Caribbean Sea, which comprises the greater part of Nicaragua, the country is covered with a chain of low mountains and its spurs. Those mountains, for the most part, are of primitive rocks covered with soil formed by their own decomposition and the decayed products of the rank vegetation of luxurious primeval forests.

"The water of the torrents, ravines, and rivulets, slowly but continually carving the sides of the hills, have exposed to view the porphyries and other similar rocks forming the great bulk of the mountains, and in these are embedded quartzite veins, several of which contain gold and silver in paying quantities; those lodes undoubtedly will be profitably worked as soon as the country becomes opened by the construction of roads.

"Between the innumerable spurs of those mountains are picturesque valleys and shaded glades, with very rich soil and congenial climate, making them fit abodes for the white man, and also appropriate for the cultivation of many of the grains, vegetables, and plants of the temperate zones.

"The lack of communication and means of transportation has been the cause, up to the present day, of the abandonment of those natural advantages in soil and climate, and for the preference given to the hot but easily approachable volcanic region that is found in the narrow strip of land between the Pacific Ocean and the lakes.

"Hence, in that limited territory, scorched by the fierce rays of a tropical sun, the majority of the inhabitants of Nicaragua have their home; therein their principal cities are built, resting on a soil of reverberating volcanic dust and in a hot climate that enervates all muscular force and is antagonistic to human energy and industry, while 100 or 120 miles inland are allowed to remain in its primitive wilderness, beautiful valleys with abundance of fresh, pure, and cool water, climates of perpetual spring, great facilities for sanitary drainage, and amidst virgin forests of valuable timbers and soils of unsurpassable fertility; ideal sites for modern towns.

"To the casual observer or traveler that goes through by rail from the seaport on the Pacific to the commercial towns, and only sees the volcanic region and nothing of the richer and better part of Nicaragua, to him the country seems to be the most volcanic region of the globe.

"In a recent geological period a geosynclinal of very small dimensions in breadth but immense length, running from northwest to southeast through what is to-day Nicaragua, marked the locality of a fault in the earth crust. The sedimentary rocks formed during the period of subsidence are to be found in several places between the Pacific and the lakes; in Diriamba is a quarry of sedimentary sandstone; in Rivas, Nandaime, Managua, Leon, and Chinandega, fossil shell lime rock is quarried that gives very good lime.

"The form and nature of the volcanic vents and the matter ejected during the following geanticlinal shows that the fault and line of fissure is of limited breadth and not deeply seated.

"In Nicaragua are not found those colossal volcanoes that are met farther north or south of it, like the *Acatenango*, of 14,000 feet elevation, in Guatemala, and the *Irazú* and *Turealba*, of 12,000 feet, in Costa Rica. The highest Nicaraguan volcano is *El Viejo*, only 5,800 feet above sea level.

"The outward appearance and shape of volcanic mountains is a very good sign and criterion for judging of the force and intensity of the pent-up energies brought forward to the surface of the earth during paroxysmal eruptions at the periods of variable activity.

"Those volcanoes of fierce eruptions and great energy are always ragged and of very irregular shape—such are the *Icelandic* volcanoes, the *Vesuvius*, the *Etna*, and several of the volcanoes of *Java*—while those of milder eruptions and moderate force are always of very regular shape and outline. *Mont Pelee*, in the Martinique Island, before the terrible eruption of May 8 last, had a rugged and ragged appearance, while the well-behaved *Fusiyama*, the sacred volcano of Japan, as is well known, has such regularity of lines that it can be called beautiful.

"All the volcanoes of Nicaragua, with two exceptions, those of *Cosigüina* and *Masaya*, are of the Fusiyama type and of moderate elevation—none reach 6,000 feet above sea level.

"*Cosigüina* made a terrific eruption on the 2d of January, 1835, which, before the eruption of *Krakatoa*, in 1883, was considered the grandest on record. The dust from the *Cosigüina* reached the City of Mexico to the north, Bogota to the south, and Jamaica to the east, but in spite of this fierce eruption Nicaragua suffered no damage whatsoever, because the nearest town, Chinandega, is 40 miles distant from *Cosigüina*.

"The Spaniards founded the city of Leon Viejo at the western end of Lake *Xolotlan*, to-day Lake Managua, and at the very foot of volcano *Momotombo* and no more than 2 miles from its crater. In 1609 *Momotombo* made its first recorded eruption, and it so alarmed the citizens of the city, showing them their mistake in planting it so close to the volcano, that the following year they moved en masse, with their chattels and belongings, to 23 miles from the former locality and established New Leon in its present site, at a reasonable distance from any volcanic vent. In 1870 and 1886 *Momotombo* made eruptions, throwing out ashes, scoria, and dust, but no damage whatsoever was done.

"In 1850 volcano *Las Pilas* begun a short period of activity by small vent on its northwestern flank, through which it ejected lava and scoria, forming a parasitic cone of moderate dimensions. This eruption was witnessed by Mr. Squier, minister of the United States to Nicaragua at the time.

"According to the narrative of the *boucanier* Dampier, who, in 1684, with his horde of pirates, took and sacked the town of Realejo, volcano *El Viejo* was in eruption at the time. This is its only recorded eruption.

"The center of volcanic activity in Nicaragua seems to be located on a ridge named Sierra de los Morabios that runs from volcano *Cosigüina* to *Momotombo*. The first is on the border of Gulf of Fonseca and the last on the western shore of Lake Managua. In this ridge are the following vents: Cosigüina, 2,700 feet above sea level; Chonco, 3,580; El Viejo, 5,800; Santa Clara, 4,500; Telica (active), 3,400; San Jacinto, 2,800; Rota, 3,600; Las Pilas, 3,500; Asososca, 3,200, and Momotombo (active), 4,100.

"None of the volcanoes of the Morabios ridge properly could be called extinct. Several of them have remained inactive for centuries and may remain so for centuries to come, but the fumaroles, hot springs, and specially the seismic disturbances occasionally local to the district clearly shows that they are dormant but not dead.

"On the line of axis of the geanticlinal, and farther southeast from the Morabios ridge, are the isolated volcanoes *Masaya* (active), 2,100 feet; *Apoyo* (extinct), 700; *Mombacho*, 4,450; *Ometepe*, 5,100; and *Madera* (extinct), 4,200, and farther on to the southeast at a long distance and in Costa Rican territory volcano *Orosí*, 5,200 feet.

"The *Masaya* was in activity at the time of conquest of Nicaragua by Gil González in the year 1523, and continued so until 1772, when it made a great eruption, ejecting a vast mass of lava, which covered a tract of land 8 miles long by 2 wide. In 1854 it made another small eruption, which it repeated in 1858 and 1861. Since then it was dormant until May of 1902, when it resumed activity. The constant increase of the volume of steam and other gases thrown out at present from the crater in activity gives evidence of a pending eruption.

"As none of the former eruptions did any damage to the city of Masaya, 5 miles from the volcano, its inhabitants are confidently expecting the approaching eruption without fear.

"This volcano of *Masaya*, in a no-distant geological time—probably the beginning of the Quaternary—was one of great magnitude, with a crater 15 miles in diameter. To-day the remains of the borders and ramparts of the old crater are visible, forming a nearly perfect circle around the present cone and vent, which are situated near the center of the old one.

"In Lake Nicaragua is an island named Ometepe, and on it are situated volcanoes *Ometepe* and *Madera*. The former made a small eruption in 1883, and continued in slight activity for several years afterwards, but at present is quiet and dormant. The eruption of 1883 is the only one on record for this volcano. The *Madera* is an extinct volcano, with a cone of truncated form.

"In the territory comprised between *Madera*, the last of the Nicaraguan volcanoes, and *Orosí*, the first in Costa Rican soil, a distance of over 50 miles, there is no vent, cone, hot springs, or any other sign of volcanic activity, past or present. This fact is of great importance, as it shows that the fault or internal fissure in the earth crust that gave rise to the several volcanic vents of Central America is contracted in Nicaragua, and at that particular place so completely built up and healed that it offers such great resistance to the internal forces that they can not overcome it in any way, shape, or form. Hence the low gap in the grand American cordillera found at that place, which has a mean height of about 150 feet above sea level, the lowest gap from Alaska to Tierra del Fuego. This cause also explains the extinction of volcano *Madera*.

"The seismic vibrations or earthquakes recorded in Nicaraguan history show that none has been of very severe intensity. This may be due to several causes; but there is a good explanation in the fact that *all* the lavas of the volcanoes of Nicaragua are basic or subbasic in their composition. There are no acid lavas to be found near any of the vents; not even the smallest piece of obsidian is to be met with. There are no puys like those of the Auvergne or mamelons of the Bourbon Island type. Some trachyte and andesite lavas are found near the extinct volcanoes, such as *Chiltepe* and *Güisisil*.

"All authorities agree to-day in the direct and immediate connection of earthquakes and volcanic phenomena, and also that eruptions are due to steam tension; therefore it is of capital importance to know the chemical composition of the matter ejected by volcanic vents. The composition of the ejected matter gives us an approximate idea of the amount of pressure or tension that the steam or water vapor is subjected to in the bowels of a volcano before it can be relieved, either by its passage to the vent or to some internal cavity in the earth crust.

"It is well known that acid lavas, such as *rhyolites*, have a much higher melting point than basic lavas; consequently the steam pressure is proportionate to the melting point of the rocks, and is increasing until the lava acquires the necessary fluidity to allow the pent-up steam to escape through its mass. The result is that those volcanoes that eject acid lavas generally originate vibratory waves of great force, while those of basic lavas, milder ones. The *Stromboli* is a volcano of basic lavas and mild eruptions and *Vulcano* of acid lavas with eruptions of considerable force.

"The lavas from *Fuego* and *Cerro Quemado*, in Guatemala, and from *San Salvador* and *Ilopango*, in the Republic of Salvador, are rhyolites. Near *El Chato*, in the neighborhood of Guatemala City, there is a big mass of obsidian, which is very transparent.

"The earthquake shocks of Guatemala and Salvador, as a rule, are very severe, while those of Nicaragua are not only mild in force, but circumscribed to more or less limited areas.

"The only recorded seismic disturbances that have affected the whole country are those of 1538, 1648, 1651, 1844, and 1865.

"The earthquake of 1651 is the only severe one ever felt on the valley of the San Juan River; in this valley earthquakes are seldom felt at all; it could be called immune from those disturbances. In all probability the shocks of 1648 and 1651 originated from some Costa Rican volcano.

"The shock of 1844 was from the volcano *Irazú*, in Costa Rica, then in eruption, which destroyed the city of Cartago, in said Republic, but, although felt all over Nicaragua, did no damage to any of its towns.

"At 9 p. m. of the 11th of October, 1885, a somewhat severe earthquake was felt over a great part of Nicaragua. It did considerable damage at Leon, where a lady was killed by the falling of an adobe wall. This seismic vibration was from the volcano *Momotombo*, which in the following year was in eruption.

"In 1898 a very severe shock at Chinandega destroyed many of the adobe houses of that town; also some at Leon. None of the masonry buildings suffered any damage of consideration. The shock was felt at Managua, where it did some slight damage; at Masaya, Granada, and Rivas the vibration was very slight.

"In December, 1887, several shocks of some force occurred at Managua and its neighborhood within a radius of a few miles; at Masaya, 18 miles to the southeast, and Nagarote, 20 miles to the west, nothing was felt.

"Similar local phenomena happened at Granada in 1890, and nothing was felt in other localities close by.

"In both instances it is clear that the vibrations originated within short distance from the surface of the earth.

"Most of the earthquakes of Nicaragua have been traced to the Morabios ridge, the force of the shocks notably diminishing as the distance from the ridge increases.

"The volcanoes of Nicaragua, with their regular-shaped cones, basic lavas, and seismic vibrations of limited areas, could properly be called mild volcanoes in comparison with those of ragged appearance, acid lavas, and tremendous eruptions.

"The numerous vents in Nicaragua ought to be considered as so many well-balanced automatic spring valves for regulating the internal pressure of steam in nature's laboratory boiler, the earth crust, and not looked upon as powder houses, liable to explode at any moment.

"As the existence of those volcanic vents has caused a great deal of apprehension in certain quarters regarding the future stability and security of the isthmian canal, in case it be built by the Nicaragua route, it is convenient and proper to examine at this opportunity into the position of said route in relation to that of the volcanic vents and of the probable effect of volcanic eruptions on said canal.

"Undoubtedly the minds of many persons have been influenced to a great extent by the appalling catastrophe that has befallen the city of St. Pierre, in the island of Martinique, totally destroyed, with all its inhabitants, by the terrific eruption of Mont Pelée on the 8th of May of this year.

"Although volcanoes in eruption are terrible engines of destruction at close quarters, yet the radius of direct action is very limited, hardly reaching 10 miles from the vent.

"Since the year 79 of the Christian era Vesuvius has been, more or less, in constant activity, and very often in eruption; some of which, like those of 1822 and 1872, have been on the grandest scale, yet the city of Naples, no more than 6 miles from the crater, has survived the eruptions of nearly two thousand years.

"The eruption of the year 79 covered with its *laves di fuoco* the Roman cities of Herculaneum, Pompeii, and Stabiæ, on the flanks of Monte Somma, the original name for the old volcano. In spite of this sad experience, the Italians continued to build around the cone and in close proximity to the crater. During the eruption of 1872 the towns *Massa di Somma* and *San Sebastiano* were destroyed by the streams of the *laves di fuoco.*

"The town of St. Pierre was in too close proximity to Mount Pelée to have survived the eruption had it not been destroyed by the cloud of burning carbureted hydrogen that swept it from the face of the earth. The other towns in that island at reasonable distance from the volcano are safe and not in danger.

"The fertility of the soil on the flanks of volcanoes is a well-known fact; this is due to the high percentage of soda and potash contained in volcanic dust. Although the risk is great to anyone who ventures to cultivate those soils, the temptation is greater still, when the reward is so bountiful and the danger somewhat remote. Hence at every volcanic eruption some people are bound to suffer in one way or another. The eruptions of Etna always bring forth calamities to the peasants of Catania, in Sicily, who have in past years, and in the future will cultivate those rich soils on the flanks of Etna, in spite of all the protesting eruptions of the volcano. The greed of man and not the fierceness of the internal forces are to be blamed for many a catastrophe.

"The two volcanoes of Nicaragua of formidable appearance and bad reputation—the *Cosigüina* and *Masaya*—are far away from the canal route; the first is about 150 miles and the second over 50 from the nearest point of the canal.

"Volcano *Ometepe* is the only one in close proximity to the route and yet is over 15 miles from it. The *Ometepe*, as before stated, made a mild eruption in 1883, and now is quiet and dormant; but were it to awake and make an eruption as fierce as that of Mont Pelée, it could not reach the canal, 15 miles away. On that dreadful morning of May 8 last, at the precise moment of the destruction of St. Pierre, the steamer *Rouyer Quertier* was abreast of the ill-fated city and only 8 miles from the scene of destruction, yet it escaped without the least injury. The action of Pelée was tremendous in its havoc and destruction within a radius of 6 or 8 miles, but beyond those limits its fury was impotent.

"With regard to the canal works, more is to be apprehended from earthquakes than from volcanic eruptions.

"The line of the Nicaragua Canal is at safe distance from the products and ejections of volcanic vents.

"The recorded earthquakes of Nicaragua never have been of highly destructive force; none could have done any material damage to the locks or dams of the canal.

"*None of the eruptions or seismic vibrations have ever affected the level of the lakes or caused tidal waves on same.*"

PARAGUAY.

INAUGURATION OF PRESIDENT EZCURRA.

On November 25, 1902, Colonel Juan Ezcurra assumed office as President of the Republic of Paraguay, Dr. Manuel A. Domínguez being the Vice-President. Señor Ezcurra was Minister of War during the incumbency of President Aceval, and in his inaugural address declares that he intends surrounding himself with the most capable men in the country, in order that they may help him to improve the state of the finances and develop the natural resources of the Republic.

NEW CABINET.

The cabinet chosen by President Ezcurra to assist him in his executive duties is composed as follows:

Minister of the Interior, Señor Don Edwards Heytas;
Minister of War and Marine, Colonel Antonio Caceras;
Minister of Finance, Señor Don Fulgencio R. Morano;
Minister of Justice, Señor Don Cayetano A. Carreras;
Minister of Foreign Affairs, Señor Don Pedro Pena.

PRINCIPAL EXPORTS DURING FIRST NINE MONTHS OF 1901 AND 1902.

		1902.	1901.

TARIFF MODIFICATIONS.

I.—*Decree of August 8, 1902, amending decree of April 3, 1902, relative to the régime applicable to wine and other beverages.*

["Diario Oficial," No. 554, of August 17, 1902.]

Article 1. The above-mentioned decree (*see* second supplement) repeals the increased duty applicable to common wine and other beverages, in respect to alcoholic strength and quantity of dry extract contained therein.

Art. 2. The valuation of $0.150 gold per liter assigned to Chianti wine in Tariff No. 263 is maintained.

II.—*Exemption from import duty of horses and mules.*

["Registro Oficial" of 1901, p. 31.]

An order dated February 12, 1901, includes horses and mules in the list of exemptions designated in article 4 of law of September 21, 1899.

REGULATIONS GOVERNING PASSES TO IMMIGRANTS.

Following are the regulations and requirements of the Paraguayan Government touching the granting of passes to immigrants, as published in the "Paraguay Monthly Review:"

1. Proof of the identity of the interested party before the consulate at port of embarcation.

2. Proof of nationality, profession, and other circumstances as a foundation for the request for such passes, except in cases of a contrary order of the Ministry.

3. Orders for passes will be effective for thirty days, and after the expiration of said time they shall become void and of no effect.

4. The obligation of the immigrant making use of a Government pass to present himself on his arrival at the Dirección General or the respective immigration office to be duly registered.

5. In no case shall immigration passes be issued in favor of persons afflicted with a contagious disease, nor to paupers, or natives of Asia or Africa, nor to persons of bad conduct or responsible to foreign tribunals, wherever these circumstances (infirmity, bad conduct, or delinquency) come to the knowledge of the consular agents or representatives by whatever means, it being understood that these restrictions involve no obligation on the part of the applicant to submit to medical inspection or to investigations difficult of verification.

Neither shall passes be granted to valetudinarians, invalids, or persons above 60 years of age, unless they show that they come to live at the expense of their families or unless they accompany their families having sufficient resources for their sustenance.

6. The respective consulates shall transmit monthly a list of all passes issued.

7. In order that passes at the cost of the Government may be issued in favor of immigrants coming to Paraguay to establish themselves therein, it shall be necessary in each case that each single adult and every head of a family possess a minimum capital of $50 gold in cash, and that each adult male of the same family shall possess $30 gold upon arriving in the country, excepting in cases of express orders of the Ministry, or in cases of immigrants called to the country by families already established here.

FOR REIMPATRIATION.

8. Having left the country before the year 1895, and having his last place of residence for at least one year in the consular district from which the pass is solicited.

9. Not having made use of a like privilege for the purpose of reimpatriation.

10. To return to the country with the purpose of definitely locating therein.

11. Justification of applicant's identity.

FOR SOLICITORS OF PASSES RESIDENT IN THE COUNTRY.

Petitioners for passes for immigrants called to the country should express the names, age, nationality, and professions of the persons called, declaring that they become responsible for the observation of the respective instructions and for the proper use of the passes desired, as well as for the presentation of the immigrants at the Direction General of Immigration or branch offices thereof, and that the solicitant shall, upon arrival, take charge of such persons, and shall furnish them a location and employment under penalty of refunding to the State the value of such passes in case of failure to fulfill either of said obligations.

The above rules were issued by JUAN F. PEREZ, Subsecretary of Colonization, under date of March 5, 1902, and were of a provisional character, to remain in force until such time as the laws and regulations in the matter shall be passed.

LIVE STOCK AND AGRICULTURE IN 1901.

Statistics published in the "Paraguay Monthly Review" give the following figures of the number of live stock in the Republic of Paraguay at the close of the year 1901, as also of the culture and production of arable lands:

LIVE STOCK.

Horned cattle	2,413,780
Horses	94,105
Mares	113,225
Mules	5,974
Asses	4,665
Hogs	38,377
Goats	46,871
Sheep	236,755

CROPS.

	Area cultivated.	Production.
	Hectares.	*Kilos.*
Maize	47,262	75,620,268
Mandioca	37,333	848,831,280
Beans	4,995	12,010,221
Peanuts	6,010	19,232,280
Sugar cane	8,552	410,509,000
Cotton	75	43,476
Rice	1,181	3,189,700
Castor bean	214	514,494
Coffee	917	2,203,089
Tobacco	5,607	8,972,613

According to the same authority, the national and foreign capital invested in commerce in the country was, at the same period, $27,242,437 (paper currency), and in industries within the Republic, $19,048,095 (paper).

EXTRACTION OF OIL FROM THE COCO PALM.

The "Revista Financiera y Comercial," of Buenos Ayres, draws attention to one of the dormant resources of Paraguay existing in great abundance in that country in the shape of a palm tree, wrongly called "Palmera Paraguaya de Coco," whose Latin name is *Acrocomia mbocaya.* The kernel of the nut furnishes 40 per cent of oil, worth £16 per ton. It is stated that up to a few years ago very little attention was paid to this palm, the small quantities of oil obtained from kernels shelled by hand being solely used by local soap makers. The administration of the "Banco Agricola," of Asuncion, has now taken the matter in hand, and after sending out numerous samples of the oil to leading soap makers in Europe, found that there would be a good market for it if only it could be produced at the right price. In order to do this a machine would be required which would remove the soft part of the fruit and free the kernel from the extremely hard shell of the nut. These machines would have to be worked by hand and be moderate in price, as they would be distributed to the country folk all over the Republic. It is also stated that Herr CHRISTIAN HEISECKE has invented a machine for that purpose, but it is not known as yet if the problem has been solved in the right way. As the Paraguyan coco palm grows in enormous numbers, it is almost certain that a large number of these machines will be required, and observant business men in the Paraguayan Republic see in the export of palm oil one of the best sources of income of that country.

PERU.

EXPORTS OF COTTON IN 1900 AND 1901.

[From the "Auxiliar del Comercio."]

Cotton is extensively being sown and cultivated in the North Piura district, which is noted for its long fiber; and as it rarely rains there and a vast area lies waste for the want of moisture, two companies have been formed for bringing water down from the mountains, a considerable distance. The work is being actively carried on and will be completed at an early date, so that in Arequipa there will be a large opening for machinery of all kinds.

EXPORTATION OF SUGAR IN 1900 AND 1901.

An extract from a report of the Treasury Department of the Government of Peru, published in "El Auxiliar del Comercio" of Callao, shows that Peru exported in 1901 raw and refined sugar to the amount of 113,596,122 kilograms, as compared with 110,695,372 kilograms exported during 1900, making an increase in the exports of 1901 over those of the preceding year of 2,900,750 kilograms. The annexed table gives a detailed statement of the shipments of sugar from the different ports during the years mentioned:

Ports.	Exports (in kilograms).		Ports.	Exports (in kilograms).

EXPORTATION OF WOOL IN 1900 AND 1901.

[From the "Auxiliar del Comercio," Callao.]

The exports of wool from Peru in 1900 amounted to 3,534,998 kilograms, valued at £296,673, as compared with 3,904,945 kilograms, valued at £277,623, exported from Peru in 1901. The following table shows the exports in detail:

Ports.	Weight (in kilograms).		Ports.	Weight (in kilograms).

ERRATUM.

The title of the article on page 1388 of the November issue of the Monthly Bulletin should read "Maritime Commerce of Callao with Chile for Second Quarter of 1902," instead of "Maritime Commerce of Callao for Second Quarter of 1802."

SALVADOR.

TARIFF MODIFICATIONS.

Following are the modifications of the customs tariff of the Republic of Salvador as issued in September, 1902, by the International Customs Journal of Brussels, as fifth supplement to No. 55 (second edition).

I. Decree of August 1, 1902, relative to importation of flour-manufacturing machinery and apparatus.

["Diario oficial," No. 182, of August 2, 1902.]

ARTICLE 1. Natives may import free of all customs duty and municipal taxes, whether at present in force or to be hereafter established, the following articles: Hydraulic or steam motors of all kinds, and also their accessories; flour mills, complete; grain-hulling, washing, and cleaning machines; beltings, shafts, bearings, etc.

ART. 2. Any person erecting, for the purpose of manufacturing wheat or maize flour, a mill provided with all necessary appliances for milling, bolting, and packing from 10 to 25 quintals of flour in a space of ten hours shall be entitled once, and by way of bounty, to import, free of all duties and taxes, up to 1,000 quintals of wheat. If the mill reaches a production of 50 quintals in ten hours the contractor may import, under the same privileged system, up to 2,000 quintals of wheat, and if the manufacture attains 100 quintals in the same time such exemption may extend to 4,000 quintals of wheat.

ART. 3. Any person desirous to establish larger mills must make an application in writing to the Central Committee of Agriculture, with the view of obtaining further advantages than those referred to in the foregoing article. Said committee will adopt such resolutions as they deem fit, save that the conditions of this decree shall not apply to any exemptions exceeding the limits hereinbefore provided.

ART. 4. Persons importing wheat free of duties and taxes, in exercise of the advantages granted by this decree, shall undertake to deliver during the month of April to the Central Committee of Agriculture 1 quintal for every 100 quintals of wheat imported into the country; this wheat shall be in a cleaned state and ready to be sowed; *id est*, in ears and, as far as possible, the product of warm countries.

II. Decision of August 16, 1902, relative to cast or wrought-iron kettles.

["Diario oficial," No. 193, of August 18, 1902.]

Cast or wrought-iron kettles, riveted or of single piece, weighing 20 kilograms and more, and of at least 2 millimeters in thickness, shall be charged at the rate of 1 centavo per kilogram, but are not to be subject to the surtax of 3 pesos per 100 kilograms. If the aforesaid kettles, whether tinned or not, weigh less than 20 kilograms, they shall pay as heretofore a duty of 10 centavos per kilogram. The present decision shall enter into force from and after the date of its publication, and tariff Nos. 101 and 105 are modified accordingly.

III. Decision of August 18, 1902, relative to importation of spirituous liquors.

["Diario oficial," No. 194, of August 18, 1902.]

In conformity with article 574 of the customs tariff nonlicensed importers of foreign spirituous liquors are to pay the surcharge of 10 centavos per kilogram, and 20 centavos additional, in accordance with article 287 of the spirit regulations. Inasmuch as it is not equitable to levy such duplicate surtax, the Executive Power has ruled that such importers shall be exempted from the surtax of 10 centavos aforesaid.

FREE IMPORTATION OF MACHINERY FOR FLOUR MILLS.

The Government of Salvador, for the purpose of encouraging the growing of wheat and other cereals, and in order to promote and develop the agricultural industry of the country, has decreed the free importation into the Republic of all kinds of milling machinery, as well as machinery used for shelling corn, washing cereals, etc., together with their accessories.

Any person erecting a flour or grist mill equipped with the latest machinery for grinding, sifting, and packing of from 10 to 25 hundredweight of flour or corn meal in ten hours, is authorized to make a single importation, free of duty, of a quantity of wheat not exceeding 2,000 hundredweight, and if the mill should have a capacity of 100 quintals of flour during the same period, the owner of the mill may import, under the same franchise, up to 4,000 hundredweight of wheat.

COMPULSORY ARBITRATION TREATY WITH SPAIN.

TOMAS REGALADO, President of the Republic of Salvador.

DECREES:

Whereas the National Assembly of the Republic, by a decree of the 19th of April last, ratified the Compulsory Arbitration Treaty concluded in the City of Mexico on January 28 of the current year between the Republic of Salvador and the Kingdom of Spain, through their Excellencies the Plenipotentiaries Dr. FRANCISCO A. REYES and the Marquis of PRAT OF NAUTONILLET, respectively, which Treaty consists of a preamble and five articles, as follows:

The Envoy Extraordinary and Minister Plenipotentiary of the Republic of Salvador in Mexico and the Envoy Extraordinary and Minister Plenipotentiary of his Catholic Majesty in the United Mexican States, duly authorized by their respective Governments to celebrate *ad referendum* a Treaty of Arbitration, to the end that both nations may settle in a peaceable manner any questions that may threaten the friendly relations that now happily exist between both countries, have agreed to the following articles:

ARTICE 1. The high contracting parties bind themselves to submit to arbitration all controversies of whatever nature which, for any reason, may arise between them and which do not affect the provisions of the Constitution of either country if the said questions can not be settled through direct negotiation.

ART. II. Questions already settled between the parties by means of final arrangements can not be renewed by virtue of this treaty. In cases of this kind the arbitration shall be exclusively confined to passing upon the validity, interpretation, and execution of the said arrangements.

ART. III. For the settlement of the disputes that, by virtue of this agreement, may be submitted to arbitration, the personnel of the arbitrators shall consist, preferably, of a President of one of the Latin-American Republics, or of a tribunal composed of Spanish judges and experts, Salvadorians, or Latin-Americans.

In case of a failure to agree upon the selection of the arbitrators the high-contracting parties shall submit the matter to the Permanent International Arbitration Tribunal, established in conformity with the resolutions of the Hague Conference of 1899, subjecting themselves in this and in the former case to the arbitration procedure contained in Chapter III of said resolutions.

ART. IV. The present agreement shall continue in force for ten years, to be counted from the date of exchange of the ratifications.

If, twelve months before the termination of said period neither of the high-contracting parties shall have declared its intention to withdraw from the present treaty, the latter shall continue in force until a year after the date on which either of the high-contracting parties shall have renounced it.

ART. V. This treaty shall be submitted by the undersigned to the approval of their respective Governments, and if it should merit their approval and should be ratified according to the laws of either of the countries the ratifications shall be exchanged in the City of San Salvador within a period of one year, to be counted from that date.

In testimony whereof the plenipotentiaries on January 25, 1902, signed and sealed the same.

[SEAL.] FRANCISCO A. REYES.
[SEAL.] MS. DE PRAT DE NAUTONILLET.

Now, therefore, proceed with the exchange of the ratifications.

T. REGALADO.
FRANCISCO A. REYES.

SAN SALVADOR, *September 26, 1902.*

UNITED STATES.

TRADE WITH LATIN AMERICA.

STATEMENT OF IMPORTS AND EXPORTS.

Following is the latest statement, from figures compiled by the Bureau of Statistics, United States Treasury Department, showing the value of the trade between the United States and Latin-American countries. The report is for the month of October, 1902, with a comparative statement for the corresponding month of the previous year; also for the ten months ending October, 1902, as compared with the same period of 1901. It should be explained that the figures from the various custom-houses showing imports and exports for any one month are not received at the Treasury Department until about the 20th of the following month, and some time is necessarily consumed in compilation and printing, so that the returns for October, for example, are not published until some time in December.

CONSULAR TRADE REPORTS.

The following reports are furnished the International Bureau of the American Republics by the various Latin-American consular officers at the ports mentioned:

Advices from the consul of Cuba at Philadelphia state that during the month of October, 1902, 5 vessels cleared from the port of Philadelphia bound for Cuban ports, carrying a cargo of 25,634 cases of oil consigned to Habana, and 7,263 tons of coal billed to the ports of Cardenas, Cienfuegos, and Sagua.

According to data furnished by the consul of Ecuador at San Francisco, California, the exports from that port to the ports of Ecuador during the months of September and October, 1902, consisted of 10,139 packages of merchandise, weighing 451,285 kilograms, valued at $20,379.34. The annexed tables give these shipments in detail, by ports, as well as a recapitulation of the business done during the month:

FOREIGN TRADE IN OCTOBER, 1902.

The following table shows the imports into the United States by great classes in the ten months ending with October of 1902, compared with the ten months of the preceding year:

Class.	1901.	1902.
Food and animals	$187,096,139	$175,078,509
Crude manufacturers' materials	248,484,999	286,114,734
Partially manufactured materials for use in manufacturing	70,574,300	79,748,105
Articles manufactured ready for consumption	114,857,583	136,779,323
Luxuries and other articles of voluntary use	106,911,311	111,848,824
Total imports	727,924,332	789,569,495

The following table shows the domestic exports by great classes in the ten months ending with October of 1902, compared with the ten months of the preceding year:

Classes.	1901.	1902.
Agricultural products	$750,347,698	$632,575,063
Manufactures	332,084,762	347,240,920
Products of the mines	34,410,744	30,195,977
Products of the forests	42,865,756	43,592,782
Products of the fisheries	4,971,970	6,051,878
Miscellaneous articles	3,859,837	4,473,608
Total domestic exports	1,168,540,767	1,064,130,228

The unexampled activity of the manufacturers of the United States, measured by the exports of manufactured articles and the imports of manufacturers' materials, is greater than ever before in the history of the country. The imports of unfinished materials in the ten months ending with October, 1902, are, as shown by the official figures of the Treasury (in round numbers), $365,000,000, against $201,000,000 in the corresponding months of 1896, $274,000,000 in the corresponding months of 1899, and $319,000,000 in the corresponding months of 1901. These imports of 1902, therefore, are 15 per cent higher than those of 1901, the highest record heretofore, and more than 80 per cent in excess of the figures for the corresponding months of 1896. On the other hand, the exports of manufactures are also larger than those of any preceding ten months' period, with the single exception of 1900, showing an increase of over $15,000,000 over the total for the ten months of 1901, and being actually more than double the figures for the corresponding months in 1895.

The following table, prepared by the Treasury statisticians, shows the imports of manufacturers' materials and the exports of manufactures, respectively, in ten months ending with October of each year, from 1895 to 1902:

	Imports of materials.	Exports of manufactures.		Imports of materials.	Exports of manufactures.
1895	$267,981,979	$164,572,252	1899	$274,391,601	$311,369,173
1896	201,019,503	208,286,285	1900	310,044,276	376,247,618
1897	268,775,864	234,728,097	1901	319,026,206	332,084,762
1898	213,730,204	253,177,715	1902	365,862,839	347,240,920

NEW CONCENTRATION PROCESS.

The United States Consular Agent at Rossland, British Columbia, in a recent report (Advance Sheets of Consular Reports, No. 1456), describes a new process for ore extraction, the value of which lies in the increased percentage of recovery of values and the higher grade of concentrates it produces.

The ores in the vicinity of Rossland contain copper, gold, and silver; lead, silver, and gold; gold, copper, silver, and lead, and many other combinations. The process of extraction, known as the "Elmore," is described as follows: The ore having been previously reduced to a freely flowing pulp (oil and suitably pulverized pulp), passes directly from the mill into the open end of a horizontal rotating drum, inside of which is fixed a heli with cross blades or buckets which lift up the pulp to a certain height and drop it again, at the same time propelling it forward to the opposite end of the drum, thus keeping the pulp in constant agitation for the few seconds which are occupied in its passage. With the pulp is also admitted a small quantity of thick, sticky oil known as "summer dark oil." This exercises the remarkable property of picking up and holding the mineral that is floating about or suspended in the pulp in minute particles.

The oil and pulp automatically discharge from the other end of the drum into a pointed box, in which the tailings or rock pass off with the water at the bottom, while the oil floats up to the top and carries with it practically all the values which the ore contained. Ore from an important property on the British Columbia coast, containing 22 per cent of copper, showed by water concentration a loss ranging from 30 to 58.6 per cent, mainly arising from float mineral, the surface of the water being covered with a scum of metallic mineral which would not sink. By the "oil process" the loss was only from 1 to 7 per cent. The extraction was, therefore, 99 to 93 per cent of the assay value.

The initial cost of the machinery is small as compared with plants of equal capacity under any other process. A plant of 4 units, capable of treating 100 tons of ore per day of twenty-four hours, costs f. o. b. London, exclusive of power plant and crushing apparatus, about $10,706. The process appears to be especially applicable to low-grade sulphide ores, such as have a tendency to slime when crushed and also for treating tailings from richer ores. Experiments have also demonstrated the feasibility of separating, at a small cost, sulphides, such as copper pyrites from oxides, etc.

TOBACCO AS A SOURCE OF INTERNAL REVENUE.

A good deal of interesting matter concerning tobacco is furnished by the Commissioner of Internal Revenue in his lately issued report. This is the more important because of the fact that the internal-revenue office is now so largely the source of statistical knowledge concerning tobacco.

This importance of the internal-revenue returns makes it especially interesting to consider the figures furnished by it for exports of unmanufactured tobacco from the United States during the past decade. They show a very considerable growth within the past few years, although the figures do not now stand as high as they have done on various occasions in the past. In the following table the main outlines of the export trade in tobacco are given:

DOMESTIC EXPORTS.

Calendar year.	Pounds.	Value.	Calendar year.	Pounds.	Value.
1892	259,410,020	$21,744,117	1897	281,074,422	$22,790,150
1893	277,258,871	23,819,597	1898	269,966,833	23,796,869
1894	304,597,808	25,772,701	1899	346,823,677	29,985,742
1895	293,637,217	24,707,563	1900	305,033,235	26,886,372
1896	300,047,687	24,052,332	1901	308,743,593	26,861,132

Information concerning the production of tobacco in the United States must also be gained from the internal-revenue figures for tobacco used in manufacturing for home consumption.

The quantity of leaf tobacco used in the production of tobacco, snuff, cigars, and cigarettes for the past ten years has been as follows:

	Pounds.		Pounds.
1892	339,012,619	1897	357,171,033
1893	312,907,679	1898	349,877,737
1894	317,640,403	1899	367,139,310
1895	323,656,332	1900	379,162,884
1896	308,398,583	1901	398,039,646

Roughly stated, the farmers and tobacco growers in the United States annually produce more than 680,000,000 pounds of raw leaf tobacco, of which less than half is exported.

It should be noted that the internal-revenue taxes imposed on manufactured tobacco products include internal-revenue taxes paid by manufacturers and importers, both upon domestic and imported manufactured tobacco products, and those manufactured in Porto Rico and brought to the United States after July 25, 1901. The latter was the date of the proclamation made by the President as provided by section 3 of the act of April 12, 1900. Thus composed, the amount collected during the past fiscal year comes to $51,718,258. These tax receipts from tobacco for the past fiscal year are $10,463,880 less than those of the previous year and $7,303,748 less than during the fiscal year ending June 30, 1900. It will be recalled that the act of March 2, 1901, indirectly reduced the tax of 12 cents per pound imposed on manufactured tobacco and snuff to 9.6 cents per pound. This was due to the discount of 20 per cent allowed to manufacturers on the sale of stamps and to the reduction of the tax on large cigars from $3.60 to $3 per thousand and on small cigars from $1 to 54 cents per thousand. Other changes in rates of taxation on various tobacco forms were also made. This accounts for the falling off of about $10,500,000 as compared with the previous year. A total production of 328,464,428 pounds of tobacco and snuff for the fiscal year ending June 30, 1902, implies an increase in the quantity of tobacco and snuff withdrawn for consumption amounting to 4,925,915 pounds as compared with the preceding year. The figures for the exports of tobacco (unmanufactured) are not available for the calendar year 1902, of course.

COTTON TRADE WITH LATIN AMERICA.

"Dun's Review," in its issue of November 8, 1902, states that in seeking an outlet for American cotton goods too much attention can not be given to the development of the markets lying nearest geographically. Throughout Mexico, the West Indies, and Central and

South America, cotton goods constitute one of the leading imports, but hitherto the United States has been able to secure only a relatively unimportant share of the trade. The reasons for this are extremely complex, and it is not to be expected that any marked progress can be made toward winning a stronger position in these markets without long and systematic effort, but in some respects the conditions are at present more favorable than formerly to the growth of American trade, while the certainty that before long the output of American mills will so far exceed the normal demand as to result in an increasing surplus for export renders it important to devote immediate attention to the subject of increasing the sale for American cottons in these countries. The construction of the Panama Canal will tend to stimulate the demand for American manufactured goods of all kinds in the countries lying on the Pacific Coast of Central and South America, but it is important that a foothold for lines not at present well known, such as American cottons, should be secured in advance. Transportation and banking facilities between the United States and Latin America are improving steadily, and the problems connected with the extension of credit—heretofore the most serious drawback to the growth of American trade—are now being rapidly solved. The following table shows the present volume of the trade in American cotton goods in the principal countries and colonies of the Western Hemisphere south of the United States:

Exports of American cotton goods to Latin America for 1901.

Countries.	Cloths, colored.		Cloths, uncolored.		All other.	Total.
	Yards.		*Yards.*			
Mexico	3,045,876	$179,338	1,007,791	$85,335	$104,359	$369,032
Central America:

South America:						
Argentine Republic	495,916	36,312	1,224,091	78,958	5,261	120,531
Bolivia	80,955	4,670	225,475	9,691	256	14,617
Brazil	4,248,061	259,284	720,712	70,799	9,498	339,581
Chile	1,311,378	78,575	11,331,413	565,445	13,793	657,813
Colombia	15,865,418	729,012	1,968,462	112,307	24,272	865,591
Ecuador	931,652	45,282	161,414	12,829	2,886	60,997
British Guiana	533,556	29,721	129,891	9,737	630	40,088
Dutch Guiana	20,816	1,704	29,944	3,363	100	5,167
French Guiana	373	35	1,527	224	....	259
Peru	482,359	28,718	1,425,915	90,295	291	119,304
Uruguay	252,062	14,962	522,033	42,417	306	57,685
Venezuela	12,398,928	662,651	3,314,841	217,715	4,061	884,427
Total	68,628,351	3,718,831	31,675,852	1,847,915	325,841	5,902,541

Although in the aggregate these figures may seem somewhat imposing, the totals shown form in reality a very insignificant portion of the cotton goods trade of the countries enumerated. In the majority of cases, moreover, the present volume of American trade is greatly below previous records, showing that in the main American manufacturers have not held their own in these markets. Some fifteen years ago, especially, an excellent foothold was obtained for American cotton goods in many parts of Latin America, but through various causes the advantage then gained has since been lost. Thus, in Mexico, the exports of American cotton cloths throughout the decade ending some fifteen years ago were nearly double what they are at present. For the last ten years this trade has continued at about the same volume, averaging less than one-fifth of that of Great Britain in the same lines. In Central America the situation is more satisfactory, the present trade being practically the largest recorded thus far except in Guatemala, where it falls considerably below the totals attained during the nineties. In the West Indies, also, American cotton goods have been sold in recent years to an extent that compares favorably with past records. In both Central America and the West Indies, however, the United States is securing a much smaller share of this trade than that enjoyed by Great Britain and frequently less than that of Germany or France. In the Argentine Republic, Brazil, Colombia, and Venezuela the present volume of American trade is much below the highest record, and the decline in each case is believed to be due, not to the inferiority of American goods or to their higher cost, but to the indifference of American manufacturers to the requirements of these markets whenever domestic demand became brisk.

Each marked increase in the volume of American cotton goods exported to these countries coincides with a period of more or less severe depression in the United States, while the subsequent sharp decline is clearly due to the resumption of a good home demand. It is important that, in the future, efforts to secure portions of this trade should be less spasmodic, and that whenever a foothold is secured it should be steadily maintained, regardless of the fluctuations in the domestic demand. In Chile the trade in American cottons has been more even, and the present volume compares favorably with the average of the past two decades. In the other South American countries the volume of American trade is so slight that occasional fluctuations, even though statistically violent, are of no significance.

In order to appreciate properly the extent of the market for cotton goods in these countries it is desirable to note the volume of trade now enjoyed by Great Britain. Statistics for 1901 are not available for every country, and the returns for 1900 are therefore used. The following table gives the quantities of cotton goods exported from Great Britain to Mexico, Central and South America:

Exports of British Cottons to Latin America for 1900.

Countries.	Unbleached.	Bleached.	Printed.	Dyed.	Total.[a]
	Yards.	*Yards.*	*Yards.*	*Yards.*	*Yards.*
Mexico	159,200	19,178,900	11,931,000	7,103,300	38,372,400
Central America	12,356,800	10,278,400	8,139,100	3,102,100	58,866,800
Brazil	1,813,700	16,897,100	20,954,500	8,657,800	104,937,600
Peru	2,090,700	18,075,500	13,424,700	8,292,300	27,614,700
Colombia	3,733,000	8,322,000	10,468,200	6,733,800	25,252,600
Venezuela	2,804,300	25,532,000	35,135,200	25,638,800	42,596,800
Argentine Republic	19,419,300	24,837,300	46,901,200	31,382,400	131,285,300
Uruguay	4,203,200	7,430,700	10,191,900	8,717,600	30,542,400
Chile	11,719,800	34,005,300	44,086,200	33,774,500	98,025,800

[a] These totals include other cotton goods not here specified.

The average price of the unbleached goods is stated to have been 3½ cents per yard, that of the bleached goods 4½ cents, the printed goods 4½ cents, and the dyed goods 5½ cents, taking as the basis of prices not only the exports for the year 1900 but for the two preceding years. The following table presents, for purposes of comparison, the values of the cotton goods exported from Great Britain to Mexico, Central and South America:

Exports of British Cottons to Latin America for 1900.

Countries.	Unbleached.	Bleached.	Printed.	Dyed.	Total.[a]
Mexico	$6,886.09	$889,333.40	$585,994.73	$471,768.24	$1,953,983
Brazil	71,303.95	649,449.02	838,274.09	458,064.17	5,821,784
Central America	413,744.96	315,183.73	290,491.11	151,158.35	2,359,727
Peru	87,363.40	654,276.59	552,367.21	385,611.72	1,467,070
Colombia	105,393.79	401,247.79	566,149.14	412,309.34	862,227
Venezuela	110,435.48	1,214,717.33	1,664,498.72	1,537,677.73	1,707,558
Argentine Republic	784,484.66	1,267,333.93	2,519,435.71	1,963,433.22	7,601,171
Uruguay	189,005.12	435,040.76	503,921.20	548,493.48	1,671,594
Chile	441,221.22	2,176,814.64	2,329,846.60	2,310,025.35	4,858,115

[a] These totals include other cotton goods not here specified.

These figures suffice to indicate the extent of the market for cotton goods in Latin America. The total imports amount to more than 600,000,000 yards per annum, of which the United States supplies less than 70,000,000, in spite of the fact that the American Southern mills are the nearest to these markets and enjoy greater advantages in the way of transportation costs for their raw materials and cost of labor than do any of the mills which are actually supplying the Latin American trade at present. As already stated, however, little can be done in the direction of extending the sale of American cotton goods in these regions except through long and painstaking effort. English goods are standard everywhere, and trade connections have been established with that country dating back, in many instances, for half a century. The average price of all the English cottons sold in Latin America from 1898 to 1900 was 4½ cents a yard. The average price of all American cottons sold during the same period was 5 cents a yard, a very large difference in favor of English goods. It has frequently been asserted that the quality of the American goods is superior. This may be the case, but it is not what is wanted. To displace the goods now being sold, which are presumably giving satisfaction as to quality, it is necessary to produce something equally good at a lower price. To insist upon supplying superior grades will simply handicap and retard the growth of trade unless superiority is desired by the purchaser. German houses have of late made some progress in many parts of South America through extending even longer credit than has been customarily accorded by the English firms. It is probably not necessary for American manufacturers to meet this policy in extreme cases, but in general it is indispensable that reasonable credit be accorded. Obviously, the latest claimant for the favor of the South American buyers is not the one to tell them how they should transact their business. Insistence upon cash with order or against shipping documents merely means the loss of the time devoted to developing business upon this basis. At present the growth of American banking connections and credit-reporting facilities in Latin America render the granting of credit even safer than in the past, but at all times the average merchant in these countries has been entitled to reasonable credit, both by reason of his personal integrity and the conservatism and soundness of his business methods.

A new factor in the cotton-goods trade of Latin America is the competition of the Mexican cotton mills in many of the cheaper grades formerly imported exclusively from Europe. Already the output of these mills has reached such proportions as to displace the bulk of the importations in these lines from Great Britain to Mexico. In June, 1902, a law was passed granting important bounties on all cotton goods exported from the Republic, and the utmost activity has since prevailed in preparing to take advantage of this offer. A commission is at present visiting the different Latin American markets in behalf of this new development of Mexican industry, and the most ample information is to be obtained as to the goods now in demand, and facilities improved for placing Mexican goods in these markets. Thus far, naturally, exports of Mexican cottons have not assumed great proportions, but before long it is likely that American manufacturers will find this factor a serious one, especially in the cheaper grades.

COINAGE IN 1902.

In his annual report Director of the Mint George E. Roberts states that during the fiscal year ended June 30, 1902, the number of coins minted aggregated 191,419,506, the value of which amounted to $94,526,678. While the number of pieces exceeds any previous record, there was a decline in valuation from 1901, when $136,340,781 represented the total valuation. Gold coinage dropped from $99,065,715 in 1901 to $61,980,572 in 1902, but the stock of bullion on hand increased in the latter year to $124,083,712, as compared with $100,219,493 in 1901. The coinage of silver dollars amounted to $19,402,800, subsidiary silver coins to $10,713,569, and minor coins to $2,429,736.

The original gold deposits of the year amounted to $132,580,839. Gold bars taken for export amounted to $36,332,678 and for domestic consumption $14,482,578. The gross expenditures on account of the mint service, including loss by wastage in operating upon the metals, was $1,910,503. The earnings from all charges and incidental gains, exclusive of seigniorage, aggregated $357,568. The seigniorage realized in the manufacture of 1 and 5 cent pieces amounted to $1,919,370, and the total seigniorage accruing on the silver, nickel, and bronze coins made during the year was $11,013,856, which was turned into the general fund of the Treasury.

THE POSTAL SERVICE IN 1902.

The annual report of the Postmaster-General of the United States for the fiscal year ended June 30, 1902, shows the total receipts from the postal service for the year to have been $121,848,047.26, as compared with $111,631,193.39 for the preceding twelve months. The expenditures were $124,785,697.07, as compared with $115,554,920.87 for the previous year. The excess of expenditures ($2,937,649.81) was less than the previous year's deficit by $986,077.67.

The number of domestic money orders issued was 40,474,327, amounting to $313,551,269, and the number of international money orders issued was 1,311,111, with a value of $22,974,473. The number of international money paid during the year was 307,679, amounting to $5,821,729. It will be noted that the amount of foreign orders issued was nearly four times as great as the amount paid. The present fee for an order for $100 is 30 cents, and it is recommended that legislation be passed authorizing the Department to reduce this fee to 25 cents. For the transportation of foreign mails during the year the sum of $2,245,625.55 was expended.

In regard to parcels-post transport, it is stated that the average weight of parcels dispatched from the United States to all countries only slightly exceeds 3½ pounds.

EMBARGO ON EXPORTS OF CATTLE.

On November 27, 1902, the Secretary of Agriculture issued the following orders touching the transport of cattle by land or sea from the New England States, recent investigations by the Department having disclosed the fact that what is known as the foot and mouth disease exists to an alarming extent in the States of Connecticut. Rhode Island, Massachusetts, and Vermont:

To the managers and agents of railroads and transportation companies of the United States, stockmen, and others:

In accordance with section 7 of the act of Congress approved May 29, 1884, entitled "An act for the establishment of a bureau of animal industry, to prevent the exportation of diseased cattle and to provide means for the suppression and extirpation of pleuro-pneumonia and other contagious diseases among domestic animals," and with the act of Congress approved June 3, 1902, making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1903, you are hereby notified that the contagious disease known as foot and mouth disease exists among animals in the States of Connecticut, Rhode Island, Massachusetts, and Vermont, and that the cattle, sheep, and other ruminants and swine of said States have been exposed to the contagion of said disease: Therefore,

It is hereby ordered, That to prevent the spread of the said disease from the States of Connecticut, Rhode Island, Massachusetts, and Vermont into other States or foreign countries, and to aid in its eradication, no cattle, sheep, or other ruminants, or swine shall be moved or be permitted to move from or across the territory of any one of the States above named into any other State or foreign country. Any person, company, or corporation violating this order will be proceeded against as provided for by the act of Congress above referred to.

It is hoped that all transportation companies, cattle shippers, and others interested in the welfare of our animal industry will cooperate with the Department of Agriculture in enforcing this order, to the end that the restriction on traffic may have the desired effect and be removed in the shortest possible time.

JAMES WILSON, *Secretary.*

Whereas a highly contagious disease, known as foot and mouth disease, exists among cattle in the State of Massachusetts, and the routes of transportation possibly may have been contaminated, and in order to protect the export trade in live animals by preventing the exportation of animals which are diseased or which have been exposed to disease,

It is hereby ordered, That no cattle, sheep, or other ruminants, or swine shall be permitted to be exported from the port of Boston until further orders.

JAMES WILSON, *Secretary.*

The British board of agriculture has closed the ports of the United Kingdom against imports of cattle from Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, and Connecticut, to take effect on December 5, 1902. Cargoes arriving previous to that date will be subjected to special investigation.

FINANCES OF THE REPUBLIC.

The Annual Report of the Comptroller of Currency of the United States, as transmitted to Congress on December 1, 1902, states that regarding the growth of banking in the United States, in 1892 returns were received from 9,338 national and State banks and private banks and bankers, with capital and deposits aggregating $1,071,073,048 and $4,679,114,316, respectively. In July, 1902, reports of condition were received from 4,535 national banks, and on approximate dates statements relating also to 7,889 State and private banks and bankers. Adding to these the nnmber of banks making returns only of capital and surplus for taxation, the deposits of the latter being estimated, it is shown that there are in active operation in the country 16,156 banks and bankers, with capital and deposits amounting, respectively, to $1,340,160,416 and $9,707,281,904.

From the figures making up the above totals it appears that in 1892 the capital stock of the national banks represented 63.9 per cent and in 1902 52.4 per cent of the total for all banks. The deposits of national banks in 1892 amounted to 37.8 per cent of the total for all banks, and in 1902 amounted to 32.8 per cent. Eliminating, however, the deposits in mutual savings banks in the years mentioned, and basing the comparison on the deposits in national banks with capitalized State and private banks, it is shown that the deposits in national banks in 1892 represented 54.9 per cent and in 1902 47 per cent of the total capital.

On September 15, 1902, the date of the last call, 4,601 associations reported, with aggregate resources of $6,113,928,912.50. The loans and discounts amounted to $3,208,127,480.69, or more than 50 per cent of the total resources of the banks. The items of surplus and undivided profits amounted, respectively, to $326,393,953.66 and $169,216,512.03. The individual deposits reached the highest point in the existence of the national banking system, $3,209,273,893.93. There was due to approved reserve agents, other national banks, State banks and bankers, trust companies, and savings banks the sum of $1,200,341,233.39.

From September 30, 1901, to September 15, 1902, there was an increase of $418,581,617.54 in the aggregate resources of the reporting banks, the principal items of interest being: Loans and discounts, $261,511,562.29; United States bonds, $12,570,520; due from national and other banks, $35,217,372.29. There was an increase in capital stock of $50,193,537, in surplus and other profits of $65,048,357.81, and in individual deposits of $271,520,660.60.

Comparing conditions on September 30, 1892, with those shown in the last report, it will be seen that the number of active associations has increased from 3,773 to 4,601, or a net increase of 828. The aggregate resources of the associations increased during the decade

$2,603,834,015; loans and discounts, $1,109,086,393; bonds on deposit as security for circulation, $160,978,460, and specie and legal-tender notes, $157,119,741 and $37,489,673, respectively, while the capital of the associations increased only to the extent of $18,962,402. The surplus and undivided profits are now greater than in 1892 by $155,086,287. The volume of individual deposits increased from $1,765,422,984 to $3,209,273,894, or nearly 82 per cent. While the outstanding circulation has increased $174,568,511, or over 122 per cent, there was no material increase until subsequent to March 14, 1900, the date of the act authorizing the issue of circulation to the par value of bonds on deposit.

DESTINATION OF AGRICULTURAL EXPORTS.

A bulletin prepared by the United States Department of Agriculture (section of Foreign Markets) supplies the following data concerning the destination of the agricultural products exported from the United States during the year 1901.

Out of a total valuation of $952,000,000 worth of farm produce shipped from the United States during the fiscal year 1901, more than half found a market in Great Britain, $496,000,000 representing the British purchases. Cotton was the largest factor in the trade, followed by wheat and wheat flour. Indian corn ranked fourth, while live cattle formed the fifth item, followed in the order given by fresh beef, bacon, hams, and lard. The only additional articles having a value in excess of $5,000,000 were tobacco and oats.

After the United Kingdom, the foreign countries affording the largest markets for the products of United States agriculture in 1901 were Germany, the Netherlands, France, Belgium, Canada, Italy, Denmark, Spain, British Africa, and Cuba. Agricultural exports to Germany amounted in value to $145,000,000, cotton forming the principal item, followed in order by Indian corn, lard, wheat, oil cake, tobacco, oleo oil, and wheat flour. The Netherlands made purchases of agricultural products to the value of $51,000,000, wheat and corn forming the leading items, followed by oleo oil, wheat flour, lard, cotton-seed oil, oil cake, and cotton. Farm produce sent to France in 1901 had a value of $50,000,000, cotton exports having a far greater value than all the other products combined. The other principal articles of shipment to that destination were cotton-seed oil and tobacco. Belgium furnished a market in 1901 for $35,000,000 worth of agricultural produce from the United States, wheat, cotton, and corn forming the largest items. Lard was also an article of leading importance, while oil cake, leaf tobacco, and bacon were also received in considerable quantities. Canada took farm produce to the value of $28,000,000, wheat, cotton, and corn forming the leading items, while tobacco, horses, cattle, flaxseed, hides and skins, pork, bacon, hams, oats, oranges, and wheat flour followed in the order named. Italy's imports of this class were valued at $25,000,000, the articles marketed there most extensively being cotton, tobacco, cotton-seed oil, and wheat. Denmark took agricultural products to the value of over $31,000,000, Indian corn leading, followed by oil cake, cotton, oleo oil, lard, wheat, and wheat flour. Spain's imports were valued at $12,699,000, cotton forming the bulk of the trade, and the other items of importance being tobacco, wheat, Indian corn, and sausage casings. Exceptionally heavy exports of agricultural produce were also sent to British Africa in 1901, the record for that year from the United States being $12,637,000. Horses and mules comprised an important part of the trade, while wheat, wheat flour, corn, corn meal, canned meats, and hay formed other leading items. To Cuba, which was the only other foreign country that purchased in 1901 over $10,000,000 worth of farm produce, shipments were sent amounting in value to $12,624,000. Lard, wheat, flour, and cattle formed the largest items, the other United States products marketed there abundantly being Indian corn, hams, pork, eggs, bacon, milk, beans and peas, and malt liquors.

In addition to the eleven countries above mentioned, Sweden and Norway took $7,086,000 worth of agricultural products; Japan, $6,299,000; Mexico, $6,265,000; Hongkong, $5,172,000, and the British West Indies, $5,136,000.

Cotton was by far the most important agricultural item shipped from the United States in 1901, the total exports having an aggregate value of $315,000,000. Nearly half of this total found a market in Great Britain, that country receiving consignments worth $147,000,000. Germany, which ranked second as a consumer of United States cotton, made purchases amounting to $77,000,000. France was third on the list, with $35,000,000; Italy fourth, with $17,000,000, and Spain fifth, with $11,000,000. After the five countries mentioned, which took about 90 per cent of the total exportation of this commodity, the principal markets abroad for United States cotton were Belgium, Canada, Japan, Russia, and the Netherlands. The only other countries taking cotton exports to a value exceeding $1,000,000 were: Mexico, $1,751,000; Austria-Hungary, $1,686,000, and Denmark, $1,177,000.

The breadstuffs shipped from the United States to foreign markets during 1901 had an aggregate value of $276,000,000. More than half of these exports were sent to Great Britain, the consignments received by that country being valued at $150,000,000. Germany's purchases amounted to $30,000,000; the Netherlands took $23,000,000 worth, while Belgium and Canada took $15,000,000 and $11,000,000 worth, respectively. Foremost among other destinations were: Denmark, $6,465,000; France, $4,498,000; Hongkong, $3,982,000; Cuba, $3,180,000; Portugal, $3,119,000; British Africa, $3,050,000; British West Indies, $2,890,000, and Brazil, $2,727,000. Other countries receiving consignments exceeding $1,000,000 in value were: Sweden and

Norway, $1,538,000; Mexico, $1,185,000; Japan, $1,109,000, and Portuguese Africa, $1,040,000.

United States meat products were marketed abroad in 1901 to the value of $186,000,000, Great Britain taking $118,000,000; Germany, $21,000,000: the Netherlands, $13,000,000; Belgium, $5,778,000; Cuba, $5,000,000; Sweden and Norway, $4,419,000, and France,-$2,512,000. Other countries that bought over $1,000,000 worth of United States meat products were the following: Denmark, $1,997,000; Canada, $1,994,000; Brazil, $1,354,000; the British West Indies, $1,332,000, and British South Africa, $1,033,000.

The live-stock trade of the United States in 1901 amounted in value to $52,000,000. Great Britain furnished the principal market, taking shipments worth $40,000,000. Other destinations of importance were: British South Africa, $5,909,000; Cuba, $2,080,000, and Canada, $1,777,000.

Tobacco in its various unmanufactured forms was exported during 1901 to the value of $28,000,000. The shipments to Great Britain were valued at $8,821,000; to Italy, $4,458,000; Germany, $3,063,000; Belgium, $1,707,000; the Netherlands, $1,567,000, and Canada, $1,020,000.

The vegetable oils exported had a value of $19,000,000, the Netherlands making purchases to the value of $4,118,000; France, $3,398,000; Great Britain, $2,064,000; Belgium, $1,730,000; Germany, $1,687,000, and Italy and Austria-Hungary, $1,369,000 each.

Of oil cake and oil-cake meal the United States sent abroad in 1901 shipments having a value of nearly $19,000,000. Germany took shipments to the value of $5,286,000; Great Britain, $4,461,000; the Netherlands, $3,037,000; Denmark, $2,775,000, and Belgium, $2,335,000.

Foreign shipments of fruits and nuts amounted in value to $11,000,000, approximately. The purchases of Great Britain amounted to $4,606,000; of Germany, $1,717,000; Canada, $1,648,000, and the Netherlands, British Australasia, Belgium, British South Africa, France, Cuba, and Mexico also received large consignments.

Dairy products worth $9,404,000 were exported from the United States in 1901, Great Britain taking $6,914,000 and Cuba $456,000, the countries taking the remainder being Canada, Brazil, the British West Indies, the Chinese Empire, Japan, and Mexico.

Of seeds, the United States exported $6,385,000 worth in 1901, the Netherlands taking $1,633,000; Great Britain, $1,534,000; Germany, $1,288,000, and Canada, $1,217,000. Among other foreign markets, Belgium and France stood foremost.

The Department of Agriculture has also prepared a bulletin treating of the "Sources of Agricultural Imports of the United States in 1901," to which allusion was made in the MONTHLY BULLETIN for October, page 1133.

GERMAN STUDY OF AGRICULTURAL METHODS.

A large delegation of farmers, under the auspices of the German Agricultural Society, Berlin, will visit the United States in April, 1903, for a three months' tour, studying American agricultural methods. The German Embassy at Washington negotiated the affair with the Agricultural Department, which will furnish a guide during the entire trip. His expenses will be defrayed by the Germans. The trip includes stops at Baltimore, where special attention will be given to dairy farms, and Washington, where the Agricultural Department will be exhaustively studied. The German Agricultural Society, though a private organization, has taken the United States Agricultural Department as a model, and is trying to do in Germany many things which the Department does in the United States. After leaving Washington the industries of West Virginia will be examined, and then the horse-breeding and tobacco-growing industries of Kentucky will be inspected. The tourists will afterwards visit St. Louis, Kansas City, and Omaha, where the stock yards will be investigated, and will also inquire into the Nebraska beet-sugar industry. They will next stop at the irrigating systems of Colorado.

From San Francisco the German farmers will go on an excursion to Los Angeles and study the fruit farms. They will return eastward via Tacoma, and see the wheat farms of the Dakotas and of Minnesota. Later they will visit the Chicago slaughterhouses and grain elevators, after which the Germans will see the beet-root industry of Michigan. A number of agricultural experiment stations along the route will be examined. The travelers will embark for home at New York on June 30. The German Agricultural Society's board of managers will be represented on the trip by Baron VON WALLENBERG-PACHALY. Besides a number of important agriculturists, the party will include a dozen students of the Berlin Agricultural Institute, who will take the trip at their own expense, regarding the knowledge to be gained as a valuable investment for the future great farmers of Germany. Dr. GERBER, the agricultural attaché of the German Embassy at Washington, will accompany the delegation.

The society has just completed an immense building in Berlin, costing over $250,000, in which will be installed the new bureau to be founded upon the researches made during the trip to the United States.

COTTON STATISTICS.

The final report of the Statistician of the Department of Agriculture shows the actual growth of cotton in the United States in the year 1901–2 to have been 9,966,478 commercial bales, of which 115,550 bales were marketed before September 1, 1901, and 9,696,336 bales between September 1, 1901, and August 31, 1902, 154,592 bales being carried forward to year 1902–3. The commercial crop of the year amounted to 10,663,224 bales, thus exceeding the amount actually grown by 696,746 bales. This excess was due in the main to the very extensive marketing of cotton held over from previous years.

The Statistician of the Department of Agriculture estimates the actual growth of cotton of the United States in the year 1902–3 as 10,417,000 bales of an average net weight of 490.6 pounds. The area picked or to be picked is estimated at 27,114,103 acres, a reduction of 764,227 acres, or 2.74 per cent, from the acreage planted. The total production of lint cotton is estimated at 5,111,870,028 pounds, an average of 188.5 pounds an acre.

The commercial crop will consist of the above-mentioned 10,417,000 bales, together with 154,592 bales brought forward from last year, about 250,000 bales of linters and sample cotton, and so much of the crop of 1903–4 as may be marketed before September 1, 1903, less 198,190 bales of the present crop marketed before September 1, 1902, and so much of this same crop as may be carried forward to the year 1903–4.

RECOGNITION OF LATIN-AMERICAN CONSULAR OFFICERS.

The following Latin-American consular officers have been recognized by the Department of State of the United States:

Eduardo Tingle, Consul of Chile at Philadelphia, Pennsylvania.

Leonardo D. Le Baron, Consul of Colombia at Mobile, Alabama.

Howard P. Wilson, Consul of Colombia at Norfolk, Virginia.

Octavio Zayas y Adan, Consul-General of Cuba at New York for the United States.

Laureano Cortes y Enriquez, Consul of Cuba at Boston, Massachusetts.

Leopoldo Dolz y Arango, Consul of Cuba at Mobile, Alabama.

Manuel Izaguirre, Consul of Cuba at New Orleans, Louisiana.

Mariano Rocafort y Marcayda, Consul of Cuba at Philadelphia, Pennsylvania.

Francisco F. Mendoza y Rodriguez, Consul of Cuba at Tampa, Florida.

Salvador Ros y Pochet, Consul of Cuba at San Juan, Porto Rico.

Antonio Altamira y Polo, Vice-Consul of Cuba at New York.

Gustav Niederlein, Honorary Consul of Guatemala at Philadelphia, Pennsylvania.

E. F. Peters, Vice-Consul of Honduras at Cincinnati, Ohio.

TRADE WITH CHINA.

The increasing popularity of American products in China and the rapid growth of American trade with that country are shown by two different official statements which have just reached the Treasury Bureau of Statistics. One of these is the report of the foreign commerce of China in the year 1901 by customs districts, which contains the detailed reports of the customs officials of each district, as well as a summarization of the total commerce of the year, while the other consists of some extracts from the report of the British commercial attaché in China, J. W. JAMIESON. The general report on the commerce of China for the year 1901 shows that the imports from the United States have grown from 5,093,182 haikwan taels in 1895 to 23,529,606 in 1901, while those from Great Britain grew from 33,960,060 taels in 1895 to 41,223,538 taels in 1901, those from Russia from 1,791,658 taels in 1895 to 3,015,756 taels in 1901, and those from the continent of Europe, Russia excepted, from 7,552,099 taels in 1895 to 17,046,453 taels in 1901, showing a much more rapid gain proportionately in imports from the United States than from the United Kingdom or other countries of Europe.

Cotton goods and flour are the items of importations from the United States which show the greatest gain, and in cotton goods especially the increasing popularity of the American product seems to be causing some anxiety on the part of European manufacturers and representatives of European manufacturing countries. Commercial Attaché JAMIESON, commenting upon this fact, says that "cotton manufacturers are finding it increasingly difficult to compete with the United States, particularly in the coarser grades of cottons." The American manufacturer, he says, enjoys advantages in the way of geographical position, transport rates, and improved machinery. In gray goods the competition is especially strong, while in other lines American goods are at least holding their own. In cotton yarns the United States has up to this time made no effort to supply the demand, Great Britain, Japan, and India being the chief competitors for that class of merchandise, nearly all of the cotton yarn exported from India being sent to the markets of China. The value of cotton yarns imported into China in 1901 was 48,000,000 haikwan taels, or about $35,000,000.

Especially interesting is a report from the collector of customs at Niuchwang, located in the extreme northeast of China, a section in which American goods are supposed to be especially popular, and to which a large share of those entering China by the way of Shanghai, the most important port of entry, finally make their way, largely for distribution in Manchuria. "Dealing first with foreign goods," says the report, "we find that American drills almost hold their own in comparison with 1899, being 546,123 pieces, against 584,877. Of American jeans and sheetings, 52,473 and 979,559 pieces came in, against 29,630 and 1,101,885 pieces, respectively, in 1899. The value of the three articles during the year, including the small direct arrivals, was 5,653,661 haikwan taels, or about 33 per cent of the total foreign importations into this port. To grasp fully how the trade in American piece goods has grown in Manchuria, the comparative table of ten years' imports should be referred to, when it will appear how rapid the growth has been and how indispensable the Manchurians now find these products." The ten-year table to which he refers is as follows:

Importations of American drills and sheetings into Niuchwang, 1892 to 1901.

Year.	American drills.	American sheetings.
	Pieces.	*Pieces.*
1892	153,485	369,770
1893	100,785	251,750
1894	141,250	290,195
1895	72,485	136,910
1896	246,993	376,105
1897	349,145	566,107
1898	367,916	625,982
1899	584,877	1,101,765
1900	116,525	426,113
1901	546,498	980,001

BUDGET FOR 1903-4.

The estimates of the appropriations required for the Government service for the fiscal year ending June 30, 1904, as furnished by the heads of the various executive departments, were transmitted to the Congress of the United States at the opening of its session on December 1, 1902. The total appropriations asked for are $589,139,112, which is $21,638,576 less than the estimates for 1903, and $33,050,014 less than the appropriations for that year. Following is a recapitulation of the estimates by Departments, the fractions of dollars being omitted:

Legislative	$11,508,483
Executive	319,500
State Department	2,676,825
Treasury Department	172,313,526
War Department	130,986,605
Navy Department	84,725,798
Interior Department	163,018,616
Post-Office Department	10,363,486
Department of Agriculture	5,660,150
Department of Labor	184,220
Department of Justice	7,431,900
Total	589,189,112

URUGUAY.

FOREIGN TRADE FOR THE FIRST HALF OF 1902.

The "Montevideo Times" of the 1st of October publishes the statistics of the foreign trade of Uruguay during the first six months of the current year, supplied from official sources, as compared with the same period during 1901 and 1900:

	First six months of—		
	1900.	1901.	1902.
IMPORTS.			
Drinks in general	$1,480,042	$1,269,733	$1,026,754
Comestibles, cereals, and spices	2,685,153	2,558,430	2,429,639
Tobaccos and cigars	106,697	136,145	99,570
Stuffs and woven goods	2,411,700	1,936,962	2,103,786

The value of the total trade of the country for the first six months of each of the last five years is as follows:

1898	$31,514,398
1899	34,568,866
1900	30,448,921
1901	30,291,580
1902	32,302,289

EXPORTS FROM MONTEVIDEO, FIRST NINE MONTHS OF 1902.

According to figures compiled by the Buenos Ayres "Handels-Zeitung," 848 steamships and 84 sailing vessels cleared from Montevideo during the first nine months of the calendar year of 1902, carrying the following merchandise to the enumerated countries:

To the United States: Oxhides, dry, 499,030; oxhides, salted, 54,115; hair, 486 bales; wool, 151 bales; sheepskins, 66 bales; dried meat, 6,820 bales; bones and bone ash, 3,717 tons; tongues, 100 casks; horns, 254,761 pieces.

To Italy: Oxhides, dry, 46,137; hair, 126 bales; wool, 1,170 bales; sheepskins, 395 bales; dried meat, 100 bales; tallow, 2,907 pipes and 149 casks; corn, 150 sacks; wheat, 14,314 sacks and 942 tons; bones and bone ash, 222 tons; horns, 137,804 pieces.

To France: Oxhides, dry, 16,198; oxhides, salted, 102,660; hair, 371 bales; wool, 14,698 bales; sheepskins, 5,430 bales; various hides, 17 bales; dried meat, 2,359 bales; tallow, 504 pipes and 926 casks; bird seed, 309 sacks; linseed, 3,920 sacks; wheat, 4,197 sacks; bones and bone ash, 12,786 sacks and 365 tons; sheep, 300; intestines, 1 bale and 81 casks; horns, 271,442 pieces.

To Portugal: Oxhides, dry, 55,323; hair, 14 bales; wool, 10 bales; sheepskins, 227 bales; dried meat, 930 bales; tallow, 1,145 pipes and 96 casks; conserved meat, 116 cases.

To Spain: Oxhides, dry, 47,573; oxhides, salted, 1,100; hair, 1 bale; wool, 5 bales; sheepskins, 8 bales; dried meat, 2,174 bales; tallow, 2,018 pipes and 1,922 casks; birdseed, 692 sacks; corn, 162 sacks; wheat, 13 sacks; cattle, 314; sheep, 148; grease, 40 cases; intestines, 158 bales; meat broth, 31 cases.

To Belgium: Oxhides, dry, 24,531; oxhides, salted, 155,823; hair, 147 bales; wool, 13,050 bales; sheepskins, 38 bales; bran, 421 sacks; corn, 2,626 sacks; wheat, 4,000 sacks; barley, 1,583 sacks; bones and bone ash, 611 sacks; tongues, 503 casks and 5,193 cases; intestines, 487 casks; horns, 50,900 pieces.

To Germany: Oxhides, dry, 58,840; oxhides, salted, 138,997; hair, 81 bales; wool, 20,383 bales; sheepskins, 62 bales; dried meat, 595 bales; bran, 38,387 sacks and 211 tons; linseed, 17 tons; wheat, 400 tons and 6,291 sacks; bones and bone ash, 1,924 tons; intestines, 5 casks and 47 barrels.

To Great Britain: Oxhides, dry, 6,659; oxhides, salted, 13,480; hair, 103 bales; wool, 5,666 bales; sheepskins, 194 bales; dried meat, 2,518 bales; tallow, 1,756 pipes and 5,658 casks; flour, 500 sacks; corn, 15,658 sacks; wheat, 212 tons and 17,598 sacks; barley, 70 tons: bones and bone ash, 2,934 tons; tongues, 3,862 cases and 5,152 casks; horses, 2; oxen, 50; grease, 424 bales; intestines, 30 casks; hay, 56 bales; meat broth, 10 cases; conserved meat, 53 cases.

To Brazil: Oxhides, dry, 23,096; oxhides, salted, 3,578; wool, 348 bales; sheepskins, 4 bales; various hides, 6 bales; dried meat, 253,898 bales; tallow, 2,300 pipes and 5,757 casks; birdseed, 5,764 sacks; flour, 108,905 sacks; bran, 2,351 sacks; linseed, 50 sacks; corn, 10,740 sacks; wheat, 96,003 sacks and 364 tons; bones and bone ash, 11 sacks; tongues, 750 cases, 10 casks, and 16 barrels; horses, 2; mules, 182; oxen, 1; cattle, 3; sheep, 5,231; hogs, 150; meat extract, 13 cases; intestines, 51 bales; hay, 2,039 bales; conserved meat, 30 cases.

To the West Indies: Dried meat, 740 bales; birdseed, 50 sacks; bran, 50 sacks; corn, 100 sacks; horses, 5; mules, 125; hay, 34 bales.

To Chile: Dried meat, 874 bales; tallow, 708 pipes and 340 casks; birdseed, 745 sacks; flour, 2,491 sacks; bran, 32 sacks; corn, 2,383 sacks; wheat, 740 sacks; meat extract, 4 cases.

To the Malvinas Islands: Flour, 367 sacks; fine bran, 93 sacks; corn, 497 sacks.

To Holland: Oxhides, salted, 7,707; wheat, 2,900 tons; intestines, 69 casks.

To Cuba: Dried meat, 97,974 bales and 2,063 tons.

Orders: Oxhides, dry, 3,007; oxhides, salted, 26,952; tallow, 40 pipes and 100 casks; flour, 1,006 sacks; fine bran, 46 sacks; corn, 8,554 sacks; wheat, 60 sacks; horn, 40,014 pieces.

DEVELOPMENT OF THE FROZEN MEAT INDUSTRY.

The following law, designed for the protection and development of the frozen meat industry in the Republic of Uruguay, was promulgated on October 17, 1902, having been previously sanctioned by the chambers and signed by the Executive:

"ARTICLE 1. The State hereby accords to the establishments which prepare or export frozen or chilled meat, exemptions from the import duties corresponding to the machinery, construction materials, and pieces of replacement intended for the land installation and floating material necessary for the preparation and exportation of the meat.

"ART. 2. Frozen or chilled meats are hereby exempted from export duties for a term of five years, dating from the promulgation of this law.

"ART. 3. At the termination of said five years they shall pay a specific duty of 16 cents per 100 kilograms for a minimum term of three years, and until further legislative action.

"ART. 4. The establishments claiming the benefit of this law must previously present for the approval of the Executive an inventory of the materials and machinery referred to in article 1.

"ART. 5. The exemptions accorded by this law do not include the additional licenses (duties) created by law of November 7, 1899, with assignment to the construction of the port of Montevideo and to the payment of which the establishments referred to in the preceding articles remain subject.

ANIMAL WEALTH OF THE REPUBLIC.

The "Statistical Annual" of Uruguay for 1901 gives some interesting information on the live-stock wealth of the Republic, showing the existence of live stock in the Republic in 1901, according to the declarations made for the payment of the property tax, to be as follows:

Cattle	6, 326, 601
Mules	22, 184
Horses	575, 361
Sheep	17, 624, 548
Swine	47, 584
Goats	8, 815
Total	25, 605, 093

An official note to the above table adds that live stock are exempt from direct taxation, and the declarations made are very imperfect, so that the real number is greatly superior to that given above. Adding only 5 per cent for omissions, the total is brought up to 25,835,000, or may be safely said to be, in round figures, 26,000,000.

The census of live stock officially taken in 1900 gave a total of 26,134,896, and there is no reason to think that it fell off last year. The "Annual" gives a comparative table showing the difference between the totals of 1900 and those for 1901, in every case to the disfavor of the latter; the decrease being 500,827 in cattle, 13,953 in horses, 948,169 in sheep, and smaller numbers in the other animals, but, for the reasons already mentioned, this can not be regarded as trustworthy.

Taking the three principal animals, the following division is made among the Departments:

	Cattle.	Horses.	Sheep.
Canelones	63,458	10,801	21,446
San José	117,067	13,763	729,637
Colonia	185,957	24,122	851,336
Maldonado	95,421	10,801	437,748
Rocha	233,137	21,646	762,857
Soriano	355,152	32,849	1,738,281
Rio Negro	463,916	21,400	500,798
Paysandu	624,899	39,868	845,137
Salto	357,403	96,031	791,948
Artigas	502,156	47,357	604,652
Rivera	354,224	32,311	227,061
Cerro Largo	595,349	31,587	631,929
Florida	247,719	17,107	1,178,100
Flores	172,707	26,510	2,039,965
Minas	436,178	33,619	1,512,813
Durazno	486,622	39,172	2,828,157
Tacuarembó	707,148	55,407	1,073,240
Trenta y Tres	326,988	21,010	669,343

The Department of Monte Video is not calculated in either this or the preceding table, but this would not make much difference, as the Department is too small in area to be of pastoral importance.

The official estimate of the population of the Republic on January 1 was 964,577 souls, which is probably somewhat under the mark. Taking it in round figures at 965,000, it gives, more or less, a quotient per head of population of 6.3 cattle, 0.59 horse, 18.1 sheep, and 25.5 live stock in general. Unfortunately, there are no means of comparing this with the similar quotient in other pastoral countries, but it is likely that it compares very favorably. At any rate, a country which, although it has only a limited territory of some 186,926 square kilometers, can count some 6,500,000 cattle and 18,000,000 sheep, can not be regarded as an insignificant factor in the world's supply of meat, hides, wool, and other animal products.

COMPARATIVE TRADE STATISTICS.

A table prepared by the "Commercial Intelligence" of London, and published on October 30, 1902, shows that of the total imports of Uruguay in the years 1893–1895, Great Britain furnished 32 per cent as against 27 per cent in 1898 and 1900. For both periods Germany's quota remained stationary at 11 per cent; that of France declined from 10 per cent in the former period to 9 per cent in the latter, while that of the United States showed an advance from 7 to 8 per cent in the interval recorded.

VENEZUELA.

TARIFF MODIFICATIONS.

Following are the modifications of the customs tariff of Venezuela, published in September, 1902, by the "International Customs Journal" of Brussels as 1st supplement to No. 30 (sixth edition):

I. Corrections of errors found in the text of the law of May 19, 1902, establishing the import duty tariff.

["Gaceta Oficial" of June 30, 1902.]

The Customs Law, edition[a] of which dated June 18 inst. was erroneous, is ordered to be reprinted.

The errors detected are as below:

Goods mentioned under Tariff Nos. 507, 508, and 509 are not to be placed in Class VIII but in Class IX under Nos. 521, 522, and 523. The numeration of items 510 and following is modified accordingly, so that these items will become respectively Nos. 507, 508, and so on up to No. 520.

II. Ordinance of July 29, 1902, ranging the various undermentioned articles under Class VIII.

["Gaceta Oficial" of August 1, 1902.]

In virtue of the present ordinance, from and after this date, the following goods are ranged under Class VIII:

Chemisettes, linen or wool, and those of cotton with slight admixture of linen.

Trousers, jackets, blouses, vests, drawers, coats, lounges, frock coats, and all other nonenumerated wearing apparel of linen or cotton, for men.

Collars, shirt fronts, and cuffs of linen or cotton, for men and women.

Hammocks (*chinchorros*) of all kinds.

Petticoats and skirts of all kinds (*fustanes*, *fustansones*), pillowslips, dressing gowns (*tunicos*) of batiste or light tissue of linen, pure or mixed with cotton.

Jewelry, pearls, trinkets, precious stones and articles, also wares of gold or silver, or combined therewith, watches of any material, empty cases for watches or precious articles, even imported separately.

Silk, pure or mixed with another material, and stuffs and tissues of other materials mixed with silk.

---

[a] See No. 30 (sixth edition).

PUBLIC DEBT STATEMENT.

According to figures published in the "Venezuelan Herald" for November 1, 1902, the public debt of the Republic of Venezuela on December 31, 1901, stood as follows:

FOREIGN DEBT.

	Bolivars.
English debt (3 per cent)	66,614,550
French and Spanish debt (3 per cent)	6,546,925
United States (American mixed claims)	466,247

INTERIOR DEBT.

Railroad, 5 per cent (Disconto Bank)	46,880,000
Railroad, 12 per cent per annum	3,544,341
Caracas waterworks, 5 per cent	10,175,199
Caracas waterworks, 6 per cent	59,808,671
Salt debt	5,251,500
Interest, unpaid	34,953,634
Amount due Bank of Venezuela	8,815,797

The Government receipts during the last decade (1890–1901, July to June) have been as follows:

	Bolivars.
1890–91	47,941,886
1891–92	42,272,402
1892–93 (period of revolution)	29,430,187
1893–94	47,862,489
1894–95	42,638,273
1895–96	47,560,636
1896–97	43,035,359
1897–98 (revolution and smallpox)	31,505,405
1898–99 (revolution and smallpox)	37,633,948
1899–1900 (revolution)	41,763,919
1900–1901 (revolution)	41,763,919

CUSTOM-HOUSE RETURNS.

The "Venezuelan Herald" of November 17, 1902, publishes a table showing the custom-house returns of La Guayra for the months of May, 1901, to October, 1902, inclusive; as follows:

1902.	Bolivars.	1901.	Bolivars.
October	768,201	December	829,370
September	511,480	November	881,148
August	572,372	October	832,614
July	670,748	September	889,790
June	687,876	August	1,102,970
May	901,499	July	1,312,671
April	827,655	June	1,222,909
March	640,508	May	1,492,361
February	710,806		
January	874,950		

THE WORLD'S PRODUCTION OF GOLD AND SILVER.

The report of Mr. GEORGE E. ROBERTS, Director of the Mint of the United States, gives the following figures of the production of precious metals during the calendar year 1900: The output of gold from the United States during the year was $78,666,700 and of silver $33,128,400 (commercial value). Mexico produced $10,284,800 gold and $34,593,900 silver; Canada, $24,128,500 gold and $3,145,000 silver; Africa, $9,089,500 gold and no silver; Australasia, $76,880,200 gold and $7,829,500 silver; Russia, $22,859,900 gold; Austria-Hungary, $2,136,700 gold and $2,000,000 silver; Germany, $3,313,000 silver, and Spain $1,911,000 silver.

Colombia leads the South American countries in the output of gold, $2,775,400 being her quota; Brazil produced $2,801,000 gold and $1,129,000 silver; Chile, $1,067,000 gold and $5,553,000 silver; Peru, $1,329,000 gold and $3,360,000 silver; Bolivia, $6,157,600 silver.

China's output of gold was $9,091,000; British India produced $9,395,000 gold; Korea, $4,500,000, and Japan $1,201,600 gold and $1,037,000 silver.

The industrial consumption of precious metals in the world for the year is estimated in the report at $80,000,000 gold and $157,000,000 silver.

THE WORLD'S COAL CONSUMPTION.

Coal production and consumption, and especially of the United States in comparison with other coal-producing countries, is the subject of a monograph appearing in the issue of the Treasury Statistical Bureau's "Summary of Commerce and Finance for September, 1902." The general demand for coal seems to have increased rapidly in recent years, not alone in the United States, but throughout the world, and one of the characteristic features of modern industrial development has been the rise of the coal industry.

The rapidity with which the production of coal has increased may be appreciated when the present volume of that production is considered in conjunction with the phenomenal increase in output within recent times. In 1901 the total coal production of the world was 866,165,000 short tons. Until as late a period as 1883, the world's production had never been half so great, being only 450,990,000 metric tons in that year, and not until 1872 had the world's production been as much as a third as large as it is at present. In 1864 the world's production was only 174,000,000 metric tons, or less than 23 per cent of the production of 1901.

The statistics of production for earlier periods can not be determined with any pretense of accuracy; but on the basis of the British statistics subsequent to 1854 and of estimates for earlier periods, and from such statistics as are obtainable from France, Germany, Belgium, and Austria-Hungary, an approximation may be made of the actual production. In 1860 the world's production of coal was about 144,000,000 metric tons, or less than one-fifth of the production of 1901, and considerably less than the output of either the United States or the United Kingdom at present. Ten years earlier the world's production amounted to only about 83,000,000 metric tons, about one-tenth of the present production, and considerably less than the present output of the single State of Pennsylvania. In 1840, the production was much smaller still, amounting to little over 45,000,000 metric tons, or about one-seventeenth of the present output, while during the three-quarters of a century since 1820, when the output was about 17,000,000 tons, the production has increased about 4,500 per cent.

While the figures of the world's production prior to 1864 are necessarily defective, owing to the absence of accurate statistics for the English and American industry, they sufficiently indicate the immense development of the industry during the last century. The significance of this development can not be overlooked. The production of coal is chiefly in the hands of three nations—the British, the American, and the German. During the last thirty years, and even earlier, the combined coal output of the United States, the United Kingdom, and Germany has averaged, year for year, about five-sixths of the coal output of the world. Possessing only a tenth of the world's population, they have produced about 83 per cent of the mineral fuel, while the remaining 90 per cent of the world's inhabitants have produced only about 17 per cent of the coal, and even if the savage and semibarbarous nations be disregarded, the immense preponderance of coal production in these countries must be conceded. To this group might be added Belgium, which produces and consumes more coal per capita than any other European country except the United Kingdom, but the fact of its small population places it in the second rank of coal-producing countries.

While the continued output of these three countries has kept pace with the production of the rest of the world, their relative position has been materially altered. In 1868 the United Kingdom produced over three times as much as either the United States or Germany, the output of these countries being approximately 52, 14½, and 16½ per cent of the world's production. In 1870 the proportion was about the same, although the United States had gained upon Germany as a coal producer. By 1875 the output of the United Kingdom was still considerably greater than the combined production of the United States and Germany, the output of these three countries being 45, 20, and 18 per cent of the world's production, respectively. The next half decennial period witnessed a remarkable increase in the American production and a corresponding relative decrease in that of Great Britain, the proportions of the three countries under consideration being 36, 28, and 17 per cent, respectively. This increase was maintained during the latter part of the past century, and in 1896 the output of Great Britain and Ireland was only 34 per cent, that of the United States already 30 per cent, and that of Germany 19.2 per cent of the coal production of the world.

In 1899, for the first time, the coal production of the United States exceeded in quantity that of Great Britain. This superiority was maintained for two successive years. During 1901 the United States production was greater than the amount of coal produced in Great Britain and all her colonies. During that year the shares of the leading coal-producing countries were as follows: United States, 34 per cent; United Kingdom, 28 per cent, and Germany, 19.2 per cent.

TRADE OPPORTUNITIES IN LATIN AMERICA.

The construction of an electric road up the Andes on the Chilian side is now contemplated. There are no American bidders, but private advices just to hand from Chile state that public sentiment is now in favor of the Government undertaking the work on its own account. The Government contends that the road has no value to them until completed, and insists on the stipulation in the original concession that subvention is to be payable only upon such completion. It has been pointed out that if the contractors were paid in sections they could build the easiest stretches before the difficult or unprofitable ones were reached. It has been estimated that the final or mountain section of the road would cost more to construct than the amount of the Government grant. It is proposed to build the road from Los Andes to the foot of the mountains, a distance of some 30 miles. The line would then ascend the mountain to Cumbra, located at an altitude of 13,500 feet. There is practically unlimited water power available. After reaching the top of the Andes the road would descend on the Argentine side and connect with the steam road running to Buenos Ayres. Rail connection would thus be made right across South America. If the work is ultimately undertaken by the Government, contracts for equipment, etc., will in all probability be placed through BEECHE, DUVAL & Co., whose offices are in the Broad Exchange Building. It is estimated that the construction of an electric road will entail an expenditure of some $2,250,000 gold.

The Spanish Vice-Consul at Manaos, Brazil, reports that there is a splendid market in the Amazon provinces for all kinds of firearms. This demand is owing to the wild nature of the country and to the number of people employed in the profitable work of exploring for india rubber, who often have to depend for food on what they can shoot. The demand is principally for old-fashioned fowling pieces, but rifles also sell very well. It is further stated that all the boots and shoes sold in the Amazons are imported either from abroad or from southern Brazil. Spanish goods are unknown here, although in style and quality they should be able to compete quite well with the Portuguese article, which practically controls these markets. The first-class qualities sold are chiefly of British make. This report also adds that the furniture trade would be much greater if it were not for prohibitive tariff and high freight charges, as well as for the simplicity with which the people here furnish their homes as a rule. The class of furniture most in demand is that of the Austrian bent-wood type.

HAROLD J. ROSS, of the City of Mexico, is now in New York for the purpose of letting contracts for the equipment of an electric power-transmission plant to be constructed in the vicinity of the town of San Martin Texmelucan, in the State of Pueblo. It is proposed to utilize the power from a large waterfall on the hacienda of Monseñor GUILLOW, Archbishop of Oaxaca. The initial equipment of the plant will have a capacity of 500 horsepower. The power will be transmitted to Texmelucan, about 10 miles away. The energy will also be utilized for operating cotton mills and other industrial plants in the vicinity. Later it is proposed to generate a larger amount of power for transmission to Tlaxcola and to the haciendas between San Martin Texmelucan and the city of Pueblo.

The Mexican Government has granted a concession for the purpose of constructing a railroad from San Juan Bautista, located in the State of Tabasco, to Pichucalco, State of Chiapas, with two branches, one to Juarez and another to Macuspania. The road will cross both these States and will facilitate the transporting of Mexican products from about 80 adjacent plantations. The total length of the line will be about 100 miles. An American company is said to be in course of formation, with a view to carrying out the enterprise. ERNEST F. WOLFF & Co., whose offices are in the Hudson Building, No. 32 Broadway, are interested in the matter.

United States equipment, etc., will be purchased for installation in a large hydraulic plant which is to be constructed on the Hacienda de la Estanguela for the purpose of developing power to transmit for the electric lighting of the city of Ameca, a place of some 12,000 inhabitants, about 65 miles distant from the city of Gaudalajara, Mexico. The transmission line will be about 10 miles in length.

A consignment of ten locomotives will be shipped to Guatemala for use on the new railway system, to be built there by American capitalists, connecting the Atlantic and Pacific Oceans. It is said that the new road will bring San Francisco 1,500 miles nearer to New York than the Isthmian Canal route. Two hundred cars will be used on the road, and they will be purchased in this country. Several hundred trucks and 6,000 tons of 56-pound rails will also be purchased in the United States.

A German syndicate is negotiating for a railway in Rio Grande do Sul, Brazil. The road is to run from Novo Hamburgo to Caxias, and will connect directly with Porto Alegre. It will be 150 kilometers long and is expected to cost 10,000,000 marks. Rio Grande do Sul is to guarantee 4 per cent interest on the expenditure.

The Potosina Electric Light Company, which was formerly the San Luis Potosi Electric Light Company, Mexico, is about to let contracts, through the electrical engineering and contracting firm of SANDERSON & PORTER, Bank of Commerce Building, Nassau street, New York, for an extension to the plant. The contracts about to be placed are for a 1,500-horsepower plant.

South America was the largest purchaser of wire during October. There were 864 tons exported to Chile, 245 tons to the Argentine Republic, and 453 tons to various ports in Brazil. In November there were 370 tons of wire nails exported from the United States to Chile and the Argentine Republic.

The Jalisco Development Company, of Guadalajara, Mexico, is about to build a road between the city of Guadalajara and Chapala, a distance of about 30 miles. The president of the company is Mr. CHAVEZ. Mr. ZERMENO is the vice-president and ERNESTO MORA is treasurer, all of Guadalajara.

It is reported that the Government of Buenos Ayres, Argentine Republic, has under consideration a project for a telegraphic convention with Chile, the object being the union of the telegraph lines of the two countries. The cost of construction in the Argentine Republic to join with the lines of Chile will be about $200,000.

Señor VICENTE VIEGRA, an extensive landowner in the State of Jalisco, Mexico, is about to let contracts for the equipment of an electric plant which is to be constructed in the town of Tamazula de Gordiano. The plant will be used for both light and general power purposes.

AGUSTIN GORDILLO, Chief Engineer of Public Works of the Province of Matanzas, Cuba, desires catalogues with prices and samples of standard manufactured articles of building and mechanical arts for use in the Government offices at Matanzas. His address is care of the Jefatura de Obras Publicas Distuto de Matanzas, Cuba.

The Jimulco Mining Company of Monterey, Mexico, is reported to be making arrangements for the construction of a railroad from its mines in Coahuila to the Mexican Central Railway. The distance is about 7 miles.

Some $700,000 gold is to be expended for the installation of new machinery for making cotton cloths and yarns in the Metepec Cotton Mills, located near Atlixco in the State of Pueblo, Mexico.

The Mexican Electric Tramways Company of the City of Mexico is about to make an extension of its lines to Texcoco, located about 20 miles from Mexico City.

The construction of an extensive shoe factory in Monterey is contemplated by Ohio capitalists. In addition to the shoe factory it is proposed to build a tannery, at which all the leather used in the shoe factory will be prepared. The plants, it is reported, will entail an expenditure of $1,000,000 gold.

The exports of iron pipe in October made through Eastern seaboard points, by the National Tube Company, aggregated 2,559 tons. Mexico was the largest purchaser, 1,241 tons in two lots going to that Southern Republic.

An American syndicate is said to be negotiating for the purchase of the street tramways in San Luis Potosi, Mexico, which are at present horse lines about 13 miles long. It is proposed to convert the road into electric motive power.

The municipality of the city of Guadalajara, Mexico, is about to place contracts in the United States for fire appliances, etc. The initial expenditure will be about $20,000.

FELIPE ROCHA, of Mexico City, is reported to be about to let contracts for the equipment of a water-power plant which is to be constructed on the River Tepic, Mexico.

JOSE GARCIA and DIAZ RUGAMER, of the City of Mexico, are reported to have secured a concession to construct a suburban electrical traction system in the Federal District.

The existing mule lines operated in the city of Granada, Nicaragua, are to be converted into electric traction. The requisite material, equipment, etc., will be purchased in the United States.

OSCAR BRANIFF, of the City of Mexico, is about to let contracts for the equipment of a hydraulic plant which is to be erected on the River Atoyac, near Cordoba, State of Vera Cruz.

T. H. DAVIS, manager of the Rivas Tramway Company, Rivas, Nicaragua, is in the market for electrical equipment, etc.

An electric traction system is to be constructed with United States equipment in Cananea, Mexico.

BOOK NOTES.

Books and pamphlets sent to the Bureau of the American Republics, and containing subject-matter bearing upon the countries of the International Union of American Republics, will be treated under this caption in the Monthly Bulletin.

The "Nineteenth Annual Report of the Bureau of American Ethnology, 1900," received by the Columbus Memorial Library, deals with the ethnologic research carried on by that branch of the Smithsonian Institution during the year 1897–98. The field of operations embraced not only all sections of the United States, but extended into Mexico, the Argentine Republic, Chile, and Honduras. A paper on the numeral systems of Mexico and Central America, by Dr. CYRUS THOMAS, demonstrates the essential similarity of the number systems of the various tribes, ranging from the sedentary groups of American aborigines of the Pacific coast to the nomadic groups in the interior, through the settled peoples of the pueblos and up to the codex makers of Mexico and Yucatan. This paper, in conjunction with that of Mr. W J MCGEE on primitive numbers, renders it clear that primitive numbers were symbolic in a considerable measure before they acquired the conventional character by which they are now distinguished. The mounds in northern Honduras form the topic of a paper by Dr. THOMAS GANN, the contents of the mounds being described and illustrated in demonstration of the fact that the culture of the region corresponded fairly with that of Mexico at the time of the Spanish conquest. The relics are especially significant as connecting links between different archæologic districts. The molded and painted stucco work resembles that of Yucatan, while both symbolic and industrial devices are akin to those of numerous tribes throughout the southwestern part of North America. The Mayan calendar systems are extensively reviewed by Dr. THOMAS, the discussion extending not only to the inscriptions of the codices, but to other Mayan records and to the times of the Nahuatlan peoples. A full list of the papers accompanying the report includes also "Myths of the Cherokee," "Tusayan Migration Traditions," "Localization of Tusayan Claims," "Tusayan Flute and Snake Ceremonies," and "The Wild Rice Gatherers of the Upper Lakes."

In the publication of "Unknown Mexico," a record of five years' exploration among the tribes of the western Sierra Madre, in the *tierra caliente* of Tepic and Jalisco, and among the Tarascos of Michoacán, Dr. CARL LUMHOLTZ, M. A., has levied a new debt of gratitude on all collectors of Americana. The main purpose of the expedition, headed by Dr. LUMHOLTZ and inaugurated in 1890 through the assistance of various scientific societies and private individuals, was the conservation of actual knowledge of the fast-vanishing primitive peoples of the New World. Inquiry was directed principally toward the remote sections of the Sierra Madre del Norte and the contiguous country to the south and east as far as the City of Mexico, and the volumes in reference give a succinct account of the travels and work of the party. The cave dwellings, ancient implements, mummies, etc., are dealt with as matters of prime importance, while the manners and customs of the survivors of the native races of Mexico are extensively treated. The characteristic fauna and flora of the country are noted, as is also their connection with the domestic life of the inhabitants. Thus, the hairless dog, which is indigenous to Mexico, is credited with curative properties, and is placed in the bed of invalids with assumed beneficial results. Among the Tarahumares were found legends relating to the creation and deluge similar to biblical accounts, while the giants of the dawn of the world also had existence in their folklore. Dr. LUMHOLTZ bears enthusiastic witness to the high mental gifts, artistic sense, and innate morality of the so-called primitive races of Mexico, and expresses the opinion that the work of missionaries is often more needed among the conquering soldiers, the prospectors, and adventurers that follow in their wake than among the unsophisticated barbarians. Much light is shed upon the relations between the ancient culture of the valley of Mexico and the Pueblo Indians in the southwest of the United States, and certain phases in the development of the human race are made clear.

The Columbus Memorial Library has received a valuable work prepared by the Bureau of Insular Affairs, United States War Department, 1902, covering information from official and other sources respecting the Philippine Islands, their geography, physical features, areas, communication, population, towns, resources, wealth, products, industries, commerce, finances, social economy, natural history, military occupation, and civil government. This is supplemented by an alphabetically arranged descriptive list of islands, provinces, districts, townships, cities, towns, hamlets, mountain ranges, peaks, volcanoes, rivers, seas, straits, gulfs, sounds, bays, lakes, promontories, capes, points, light-houses, and other mapped objects and places. The full title of the volume is "A Pronouncing Gazetteer and Geographical Dictionary of the Philippine Islands, United States of America, with maps, charts, and illustrations; also the Law of Civil Government in the Philippine Islands, passed by Congress and approved by the President, July 1, 1902." In the compilation of the book not only the existing literature, but all available reports from military, naval, and civil officers, giving the observations and results of campaigns, expeditions, reconnoissances, etc., have been consulted. When this data was collected by provinces it was submitted to officers returning from the Philippine Islands in order that corrections and additions from their personal knowledge might be made. The encyclopedic features have reference only to information of a practical nature associated with the places described.

"The History of the Second Pan-American Congress" is the title of an attractive volume received by the Columbus Memorial Library from the house of Guggenheimer, Weil & Co., Baltimore. In the author's preface, Mr. JOHN VAVASOUR NOEL states that the book embodies his personal impressions of a most interesting and historic event, and the work of the congress is reviewed in order that a general understanding of the scope, purposes, and achievements of that international council may be obtained. He adds that, in his opinion, the educational campaign inaugurated through the medium of these congresses, and the mutual interests which politically and commercially bind the various countries of the Western Hemisphere, will unquestionably bring about practical results, and that future generations will think gratefully of the pioneers in this movement for a better mutual comprehension between the independent nations of the New World. The subject-matter of the volume in reference treats of the various questions considered during the sessions of the congress, with the author's comments thereon, and is supplemented by "Notes on the Republic of Mexico," and an appendix containing the debate on arbitration with the papers referring thereto. Numerous photogravures add to the attractive appearance of the book, which is a valuable contribution to Latin-American literature.

The Geographical Society of Lima, Peru, has published, under the auspices of the Peruvian Government, the fourth volume of the work on Peru by Dr. RAIMONDI. The subject of Volume IV of this valuable series is "Estudios Mineralógicos y Geológicos" (Mineralogical and Geological Studies) of Peru, and the material used in the compilation of this volume was collected by the distinguished Italian scientist, Dr. ANTONIO RAIMONDI, whose lamented death occurred in 1890 while his celebrated work, "El Perú," commenced in 1874, was still unfinished. Dr. RAIMONDI spent forty years in explorations and study in Peru, and devoted nineteen years of his life in collecting material for use in his famous work, "El Perú," four volumes of which have been published. The Geographical Society at Lima recently resolved to revise and publish the manuscript of Dr. RAIMONDI that had not been printed, and this undertaking received the support of the Peruvian Government. The fourth volume of this important work, which has been received by the Columbus Memorial Library, covers a great number of subjects relating to the geology and mineralogy of Peru. The mountain system of the Republic is ably discussed, as are also its rocks, minerals, and mineral springs. Volume IV contains over 500 quarto pages, is neatly printed, and is replete with valuable information upon the subjects of which it treats.

The Consul of the United States at Montevideo, Uruguay, has forwarded to the Columbus Memorial Library a copy of the plans and specifications prepared by the Government of Uruguay in connection with the extensive sanitary works planned to be constructed at the port of Montevideo. The bids, which the Department of Public Works of the Republic of Uruguay is now soliciting, will be based on these drawings and specifications. The improvements contemplated include the construction of a tunnel, excavated in solid rock, 1,278 meters long, 3 meters 65 centimeters high, and 3 meters wide, as well as two reservoirs or deposit basins, sewers, and other works necessary for the complete drainage of the city of Montevideo. The bids, which have been solicited at Montevideo, Paris, London, and Berlin, will be opened in Montevideo on the 15th of December, 1902, the Government reserving the right to reject any or all bids and to accept such bid as it may deem most advantageous to its interests.

Mr. JENARO SANJINES, of Sucre, Bolivia, has recently compiled and published (1902, Bolivar Printing Office, Sucre) a book entitled "Historia de Bolivia Bajo las Administraciones de Don Adolfo Ballivián y Don Tomás Frías" (History of Bolivia during the Administrations of Messrs. Adolfo Ballivián and Tomás Frías), covering an important epoch in the development and growth of the Republic of Bolivia. This excellent work discusses in great detail the political lives of Messrs. BALLIVIÁN and FRÍAS, and relates in simple, concise, and vigorous language the stirring events that took place in Bolivia during the period in question. The book contains 264 octavo pages and is a historical work of great merit and exceedingly valuable to the student of Bolivian history. During the Administrations of the Presidents named some of the most important events concerning the Republic of Bolivia, both as to its domestic and foreign relations, took place.

The Columbus Memorial Library has received an interesting volume of over 250 octavo pages, the author of which is Mr. JENARO SANJINES, of Sucre, Bolivia, entitled "Historia de Bolivia Bajo la Administración del General D. Agustín Morales" (History of Bolivia under the Administration of General Agustin Morales). The book is a valuable compilation from a historical standpoint, and the matter of which it treats has been carefully collated from a number of reliable sources and is presented to the reader in a concise, logical, and entertaining form. The style of the work is patriotic and lofty, and the principal events which occurred during the memorable Administration of General MORALES, and which form an important link in the political and economic history of Bolivia, are recorded in language pure, vigorous, and instructive.

"The Manganese Ores of Brazil" form the topic of a very interesting paper forwarded to the Bureau of the American Republics by Mr.

HERBERT KILBURN SCOTT. Mr. SCOTT states that the presence of manganese ore near Miguel Burnier (the center of the manganese district in the State of Minas Geraes) was first noted during the construction of a branch line of the Central Railway to Ouro Preto in 1888, but not until 1893 were conditions favorable for the exploitation of the new industry. The paper in question deals with the development and possibilities of the ore as found in Brazil, and gives the results of extended geologic research in the vicinity of the mines. Numerous plates and maps add to the utility of the information furnished.

The "Maritime Annual for 1902" (Annuario Maritimo para 1902), issued by the Brazilian Naval League (Liga Naval Brazileira), has been received by the Columbus Memorial Library, and contains abundant information concerning the maritime affairs of the Republic of Brazil, with special reference to the development of the merchant marine of the country.

An interesting publication dealing with the Cuban war for independence is the "Bibliografía de la Segunda Guerra de Independencia Cubana de la Hispano-Yankee" (Bibliography of the Second War for Cuban Independence and the Spanish-American War). As indicated by its title, a complete list of the various books and papers dealing with the subject of Cuban independence is furnished as an aid to students and historians.

BOLETÍN MENSUAL

DE LA

OFICINA INTERNACIONAL DE LAS REPÚBLICAS AMERICANAS,

Unión Internacional de Repúblicas Americanas.

VOL. XIII. DICIEMBRE, 1902. No. 6.

INFORME DEL SEÑOR DIRECTOR DE LA OFICINA INTERNACIONAL DE LAS REPÚBLICAS AMERICANAS SOBRE LAS TAREAS DE LA MISMA EN EL AÑO DE 1901 Á 1902.

OFICINA INTERNACIONAL DE LAS REPÚBLICAS AMERICANAS,
Wáshington, 29 de noviembre de 1902.

Al Señor Secretario de Estado, Presidente, y á los Señores Vocales del Consejo Directivo de la Unión Internacional de las Repúblicas Americanas.

SEÑORES: En la fecha de mi último Informe anual celebraba sus sesiones en México la Segunda Conferencia Internacional Pan-Americana. El 31 de enero de 1902 clausuró aquélla sus sesiones y sus labores dieron por resultado, cierto número de recomendaciones, algunas en la forma de proyectos de tratados y convenciones para que los Gobiernos respectivos las tomaran en cuenta por la apropiada vía constitucional, y otras á modo de protocolos, resoluciones, etc., que en ciertos casos podían ser puestas en ejecución desde luego.

La reorganización de la Oficina Internacional de las Repúblicas Americanas, dispuesta en la resolución aprobada por la Conferencia el 29 de enero de 1902, se llevó á cabo el 19 de marzo siguiente, y desde entonces, funciona aquélla con éxito bajo el gobierno y guía del Consejo Directivo. Es punto notable del nuevo arreglo, la fundación, con el nombre de "Biblioteca de Colón," de una biblioteca latino-americana, cuyo establecimiento fué recomendado por la primera Conferencia Internacional también Americana de 1889–90. Á la Oficina Internacional se le ha encargado la custodia de los archivos de las Conferencias internacionales americanas; y sus publicaciones son consideradas como documentos públicos y transportadas libres de franqueo en las balijas de todas las Repúblicas de la Unión.

La Comisión recomendada por la Conferencia para estudiar la producción, distribución y consumo del café, se reunió en Nueva York el 1° de octubre de 1902 y celebró catorce sesiones. Las declaraciones, recomendaciones y resoluciones adoptadas finalmente por la Comisión, serán publicadas en el BOLETÍN MENSUAL.

La recomendación de la Conferencia respecto de la celebración de una Convención que estudie todo lo relativo á la policía sanitaria internacional, se reunirá el 2 de diciembre, día en que la Convención celebrará su primera sesión en Washington.

El Congreso Aduanero que está previsto por la resolución que aprobó la Conferencia el 22 de enero de 1902, se reunirá en Nueva York el 15 de enero de 1903. Ha sido nombrada una Comisión compuesta de cinco miembros del Consejo Directivo para formular un programa.

La Comisión Arqueológica Internacional, recomendada por la Conferencia el 29 de enero de 1902, requiere la ratificación de los Gobiernos respectivos, y se reunirá á su debido tiempo. En la junta del Consejo Directivo el 6 de octubre, se convino, por unanimidad, en ensanchar el objeto de esta Comisión de manera que comprenda la Etnología. El Profesor W J MCGEE, de la Oficina de Etnología Americana, ha sido nombrado delegado de los Estados Unidos, y deberá ponerse de acuerdo con los nombrados por los Gobiernos de las demás Repúblicas de la Unión Internacional, para arreglar los detalles preliminares de la reunión de la Comisión.

NUEVO MIEMBRO DE LA UNIÓN INTERNACIONAL.

El 3 de julio de 1902, la República de Cuba se adhirió como miembro de la Unión Internacional de las Repúblicas Americanas, que comprende hoy todas las veinte Repúblicas del Hemisferio Occidental.

CUENTAS.

Las cuentas de la Oficina en el año fiscal que terminó el 30 de junio de 1902, son como sigue:

Ingresos y egresos durante el año económico que terminó el 30 de junio de 1902.

INGRESOS.

Cantidad anual votada para 1902				$36,000.00
Saldo proveniente de ventas, alquileres, etc., en 1° de julio de 1901			$2,552.82	
Cuota de las Repúblicas latino-americanas		$14,020.32		
Entradas por anuncios	$1,266.55			
Entradas por venta de publicaciones	1,466.07			
Sueldo de un año del Director durante su ausencia en China	5,000.00			
		7,732.62		
			21,752.94	
				24,305.76
Total de ingresos				60,305.76

EGRESOS.

De la cantidad votada anualmente	$36, 000. 00	
De entradas por ventas, alquileres, etc	19, 982. 21	
		$55, 982. 21
Saldo el 1° de julio de 1902		4, 323. 55

Cuadro detallado de los gastos en el año económico que terminó el 30 de junio de 1902.

	De la cantidad anual votada, 1902.	De las entradas provenientes de ventas, alquileres, etc.	Total.
Sueldos	$31, 446. 67	$3, 331. 90	$34, 778. 57
Alquiler de casa	1, 666. 68	333. 32	2, 000. 00
Articulos de escritorio		880. 64	880. 64
Biblioteca	2. 74	1, 239. 64	1, 242. 38
Sellos de correo	223. 91	917. 00	1, 140. 91
Muebles		234. 15	234. 15
Impresiones	2, 600. 00	10, 330. 21	12, 930. 21
Gastos diversos	60. 00	2, 715. 35	2, 775. 35
Total	36, 000. 00	19, 982. 21	55, 982. 21

Cuenta de la Imprenta del Gobierno correspondiente al año fiscal que terminó el 30 de junio de 1902.

Importe total de las cuentas presentadas en el año fiscal que terminó el 30 de junio de 1902		$7, 388. 82
Pagado de los fondos procedentes de ventas, alquileres, etc., durante el año económico de 1902	$3, 701. 89	
Pagado de la cantidad anual votada en 1902	2, 600. 00	
Pagado durante el actual año económico	1, 086. 93	
		7, 388. 82

El presupuesto de ingresos y egresos para el año que terminará el 30 de junio de 1903, es el siguiente:

Cómputo de ingresos:		
Crédito concedido por el Congreso		$36, 000. 00
Cuotas de las Repúblicas americanas		15, 370. 56
Ventas de publicaciones		1, 400. 00
Total		52, 770. 56
Cómputo de egresos según cuota actual:		
Sueldos	$33, 600. 00	
Alquiler de casa	2, 000. 00	
Impresiones	11, 000. 00	
Artículos de escritorio y muebles	900. 00	
Biblioteca	1, 200. 00	
Sellos de correo	400. 00	
Gastos diversos	2, 200. 00	
		51, 300. 00
Saldo		1, 470. 56

PUBLICACIONES.

Se está imprimiendo el volumen décimo tercero del BOLETÍN MENSUAL. Cada edición se compone de 11,000 ejemplares, de los cuales más de 8,000 se distribuyen en los países de la América Latina. Durante los tres años anteriores publicáronse ediciones semejantes. Pudiera aumentarse considerablemente, á no dudarlo, el número de ejemplares de cada edición, si se escogitaran medios de llamar más la atención del público, en los distintos países americanos, sobre la publicación.

Durante el año ha publicado la Oficina en inglés una nueva edición del Manual del Paraguay. El texto castellano de esta obra fué preparado por el Señor Don JOSÉ S. DECOUD, Miembro Honorario Correspondiente de la Unión Internacional en el Paraguay.

Se ha publicado igualmente una "Lista de libros, artículos, folletos y mapas relativos á Centro-América—1800–1900," y pronto se dará á la luz pública una Bibliografía de Chile, que está actualmente en poder del impresor.

Para uso de los delegados á la Conferencia del Café en Nueva York, la Oficina preparó é imprimió, en castellano y en inglés, un volumen titulado "El Café: Su Historia, Cultivo, Beneficio, Variedades, Producción, Exportación, Importación, Consumo, etc."

Los Manuales de la República Dominicana y de Nicaragua, que están preparándose por los Miembros Honorarios Correspondientes de dichos países, se hallan un tanto avanzados y serán publicados dentro de pocos meses.

MAPAS.

Se han publicado dos mapas de Guatemala durante el año, y se ha terminado uno del Brasil. El mapa de Costa Rica, que se terminó hace poco tiempo, ha sido sometido al Gobierno de esa República para su examen. Se está preparando actualmente un mapa de Nicaragua.

BIBLIOTECA.

El 7 de abril del presente año se estableció la Biblioteca de Colón, de acuerdo con lo dispuesto por el Artículo XIII de la resolución aprobada por la Conferencia de México para la reorganización de la Oficina Internacional. En esa época la biblioteca de la Oficina constaba de 8,948 volúmenes. De entonces á esta fecha se han agregado 1,038 volúmenes y folletos, de los cuales 822 fueron donados, lo que da un total de volúmenes y folletos de 9,986 que existen actualmente en la biblioteca. Esta suma demuestra un aumento de 4,986 volúmenes y folletos desde el año 1899. Durante el año se han recibido 43 nuevos periódicos y 32 mapas.

Mucho interés se siente por fomentar la Biblioteca de Colón en todos los países de la Unión, y la República Argentina, Bolivia, el Brasil, Guatemala, y el Perú han contribuido ya generosamente á este fin.

Tengo el honor, Señores, de subscribirme de Uds., muy obediente servidor,

W. W. Rockhill, *Director.*

COMISIÓN PARA EL ESTUDIO DE LA PRODUCCIÓN Y CONSUMO DEL CAFÉ.

TEXTO DEFINITIVO DE LAS RECOMENDACIONES, DECLARACIONES Y RESOLUCIONES DE LA COMISIÓN.[a]

PRODUCCIÓN.

Recomendar que todos los Gobiernos y Municipalidades deberían procurarse buenas semillas para aclimatarlas y distribuirlas con el fin de conseguir mejores precios y aumento en la demanda del café; que se establezcan, en los países donde aun no existen, Institutos Agronómicos y Jardines Botánicos de Experimentación con el fin de aclimatar y propagar nuevos tipos de café; que se demuestren prácticamente á los labradores los últimos trabajos practicados respecto del café; que se establezcan premios para estimular otros cultivos que no sean el del café; que se decreten leyes especiales que protejan á los propietarios de plantaciones de café.

DISTRIBUCIÓN.

Recomendar que se castigue severamente el abuso de cambiar los envases ó marcas que indican la procedencia de donde se importen los cafés; que se establezca propaganda efectiva para extender el uso del café en nuevos mercados; que se supriman los impuestos locales sobre el café; que el café se venda, cuando así se desee, en subasta pública; que se desarrollen las facilidades de transporte; que se adopten reglamentos con el fin de que el café se empaque en condiciones que no sufra alteración; que cada bulto de café se marque con indicación del país de donde se importa.

CONSUMO.

Recomendar á todos los Gobiernos que hagan reglamentario el uso de café en sus ejércitos y armadas; que los Gobiernos de los países productores de café establezcan, tan pronto como sea posible, en países en donde actualmente no se consume el artículo, centros para la degustación del café puro; que tanto los países productores como los consumidores prohiban la venta de café adulterado y de todo substituto del fruto, y dado el caso de no poderse conseguir una prohibición, que se impongan derechos elevados sobre tales substitutos.

---

[a] El Boletín publica este texto, ciñéndose estrictamente al que le fué comunicado como oficial, procedente de la Comisión misma.

CRISIS ACTUAL.

Las tres declaraciones y cinco recomendaciones siguientes fueron adoptadas.

Las declaraciones fueron las siguientes:

1°. Que aun cuando sea de desear que se introduzcan muchas mejoras en la producción y comercio del café, la crisis presente de esa industria se manifiesta sólo en la falta de ganancia y en el precio ruinoso que por el fruto se paga al productor.

2°. La causa principal del precio bajo que ocasiona la presente crisis, es el exceso de la oferta sobre la demanda natural ó normal.

3°. La especulación puede ser, hasta cierto punto, responsable de la crisis; pero tal especulación no produciría ese efecto sin el enunciado exceso de la oferta sobre la demanda natural ó normal.

Las recomendaciones fueron las siguientes:

1°. Prohibir por los medios más eficaces, la exportación de escorias como si fueran café y la acción más asidua, con respecto á los países consumidores, para que prohiban la importación y uso de dichas escorias y de cualesquiera falsificaciones ó substituciones que se ofrezcan con el nombre de café ó estén destinadas á la adulteración.

2°. La adopción de los medios que se consideren más oportunos y eficaces para conseguir que las Naciones consumidoras supriman ó, por lo menos, reduzcan, por modo razonable, los derechos de aduana y demás impuestos que gravan la importación, distribución y el consumo del café.

3°. La organización de una Unión Internacional que comprenda el mayor número de interesados que sea posible, destinada á velar de una manera permanente por los intereses de la industria cafetera, manteniendo constante propaganda por medio de la palabra hablada ó escrita ó por medio de los hechos, á fin de ensanchar al máximo, el buen uso del café en el mundo.

4°. Como medida única, capaz de modificar favorablemente, á la mayor brevedad posible, el precio á que los productores venden su café, la eliminación de la venta y exportación, de una cantidad tal de la producción universal que reduzca la oferta á los límites razonables del consumo, adicionado de un saldo no mayor de 3,000,000 de sacos de 60 kilogramos ó 132 libras, pudiendo en los primeros tiempos tenerse respecto de este saldo la tolerancia que el volumen descomunal del presente stock visible del mundo pudiera reclamar.

5°. La convocatoria, en el más breve plazo posible, de una conferencia de plenipotenciarios reconocidamente competentes en el ramo económico en cuestión, con el objeto de concluir un convenio ó tratado relativo á las medidas de carácter internacional recomendadas por esta conferencia ó que fueren más tarde sugeridas.

FUTURAS CONFERENCIAS.

Las siguientes resoluciones fueron adoptadas:

La Conferencia Internacional para la protección de la industria del café,

Resuelve: 1°. Invitar al Gobierno del Brasil á que convoque cuanto antes, en el lugar y fecha que tenga á bien, una Segunda Conferencia Internacional de peritos en café, con el objeto de concluir los convenios ó tratados de carácter internacional que puedan derivarse de las medidas recomendadas por esta Conferencia, ó que más tarde puedan ser sugeridas, para la protección de la industria cafetera.

Los delegados á esa Conferencia deberán estar provistos de plenos poderes para concluir y firmar dichos convenios ó tratados.

2°. Invitar también al Gobierno del Brazil á que entable y continúe con los Gobiernos de los demás países productores, todas las negociaciones necesarias ú oportunas á fin de que se lleven á efecto las resoluciones, recomendaciones, y deseos de esta Conferencia.

CONVENCIÓN SANITARIA INTERNACIONAL.

Conforme á lo acordado, se celebraron en esta ciudad de Washington, del 2 al 5 del corriente mes, las sesiones de la Convención Sanitaria Internacional, que mandó convocar el Artículo V de la Resolución de la Segunda Conferencia Pan-Americana, firmada en la capital de México el 29 de enero de 1902.

Estuvieron representadas en esta importante reunión las naciones que siguen:

Costa Rica, por el Señor Dr. Don JUAN J. ULLOA.

Cuba, por los Señores Doctores Don JUAN GUITERAS y Don CARLOS J. FINDLAY.

Chile, por los Señores Doctores Don EDUARDO MOORE y Don EDUARDO GARCÍA COLLAO.

Ecuador, por el Señor Don LUIS FELIPE CARBO.

Los Estados Unidos de América, por los Señores Doctores Don WALTER WYMAN, Médico Mayor y Jefe del Servicio de Hospitales de Marina; Don M. J. ROSENAU, Director del Laboratorio Higiénico, en el Servicio antedicho; Don H. L. E. JOHNSON, Presidente de la Comisión legislativa de la Asociación Médica Americana; Don JAMES TAGGART PRIESTLY, Cirujano General de la Guardia Nacional de Iowa; Don ARTHUR R. REYNOLDS, de Chicago, Illinois, Comisionado de Sanidad;

Don Charles B. Adams, Vocal de la Junta de Sanidad y Presidente de la de Médicos examinadores del Estado de Iowa; Don Edmond Souchon, de New Orleans, Louisiana, Presidente de la Junta de Sanidad de Louisiana; Don Frederic W. Powers, Vocal de la Junta de Sanidad de Iowa; Don Joseph T. Porter, de Jacksonville, Florida, Médico de Sanidad del Estado de Florida; Don Alvah H. Doty, Jefe del Servicio de Cuarentenas del puerto de New York; Don L. M. Powers, Médico de Sanidad, en Los Ángeles, California; Don Frank William Porterfield, de Atlantic, Iowa, Presidente que fué de la Sociedad Médica del Valle del Missouri; Don George P. Bradley, Médico del Cuerpo de Sanidad de la Armada de los Estados Unidos; Don Walter D. McCaw, Médico Militar; Don Whyte Glendower Owen, Vocal de la Junta de Sanidad de Louisiana; Don Rhett Goode, Jefe de Sanidad de Mobila, Alabama, y Don Hènry Goldthwaite, Vocal de la Junta de Cuarentena de esta última ciudad.

Guatemala, por el Señor Don Antonio Lazo Arriaga.

México, por los Señores Doctores Don Eduardo Liceaga y Don José Ramírez.

Nicaragua, por el Señor Doctor Don D. Román.

Paraguay, por el Señor Don John Stewart.

Salvador, por el Señor Don Ernesto Schernikow.

Uruguay, por el Señor Don Luis Alberto de Herrera.

Dieron la bienvenida á estos Señores Delegados, además del Señor Doctor Wyman, que se refirió á la Conferencia Pan-Americana de México, como á un acontecimiento que marcó era en el progreso de la civilización del Nuevo Mundo, el Señor Secretario de Hacienda Don Leslie M. Shaw, y el Señor Doctor Don David J. Hill, Subsecretario de Estado.

Dijo el Señor Shaw que recordaba los tiempos en que la única aspiración del médico era curar el paciente, sin preocuparse de si la enfermedad podía ó no transmitirse á otras personas; pero que ahora se atiende á las dos cosas, procurando no sólo dominar el caso individual sometido al tratamiento facultativo, sino también tomar las propias precauciones para contener el mal dentro de ciertos límites, y extirparlo ó impedir su propagación. De este grande progreso era exponente expresivo la reunión de profesores á que se dirigía en aquel momento.

El Señor Doctor Hill dijo que cuando se propuso hace tiempo la celebración de la primera Conferencia de las Repúblicas Americanas se creyó por muchos que el pensamiento jamás podría realizarse. Los hechos hán demostrado ampliamente que ni entonces ni después hubo razón para abrigar tales temores. Más aún, se ha comprobado que de las referidas reuniones se pueden derivar grandes ventajas. "Lo que se necesita," dijo, "entre nuestras Repúblicas es un contacto más íntimo, una reunión más estrecha, un empeño más marcado de discutir en común cuestiones de mutuo interés y á las veces de importancia vital para todas. Yo me regocijo," agregó, "al ver que la Conferencia Pan-Americana, celebrada en la capital de México, haya dado ya frutos, y que puedan tener lugar y continuarse reuniones como la presente."

Se eligió para Presidente de la Convención al Señor Doctor Don WALTER WYMAN, y para Secretarios á los Señores Doctor Don ARTHUR R. REYNOLDS, para la parte inglesa, y Doctor Don JUAN GUITERAS, para la hispano-americana.

Estuvieron presentes en las reuniones, y tomaron parte en los debates, mediante la debida invitación, el Señor Doctor Don W. M. BRUMBY, Médico de Sanidad de Houston, Texas; el Señor Doctor Don CHARLES WARDELL STILES, Jefe de la División Patológica de la Oficina de Industria Animal en el Departamento de Agricultura de los Estados Unidos; el Señor Doctor Don H. D. GEDDINGS, Segundo Jefe de Sanidad, en el Servicio de los Hospitales de Marina en los Estados Unidos; el Señor Doctor Don L. O. HOWARD, del Departamento de Agricultura de los Estados Unidos de América; el Señor Doctor Don JAMES CARROLL, Médico Militar, y el Señor Doctor Don JOHN F. ANDERSON, Subdirector del Laboratorio Higiénico de Wáshington, D. C.

Las sesiones fueron diarias, teniéndose una por la mañana y otra por la tarde. Leyéronse los diversos Informes y trabajos preparados por las delegaciones, y después de discutirlos debidamente se acordó entre otras cosas:

"1°. Proceder al nombramiento del Consejo Ejecutivo de que habla el Artículo V de la Resolución de la Conferencia, y que funcionará en Wáshington con el nombre de 'Oficina Sanitaria Internacional,' hasta que se reúna la proxima Convención Sanitaria.

"2°. Investir á esta Oficina con el derecho y el deber de solicitar de cada República que se le remitan prontamente, y con la propia regularidad, cuantos datos y noticias de toda clase puedan ser obtenidos relativos á la condición sanitaria de sus respectivos puertos y territorios, y que igualmente se le presten todos los auxilios y facilidades posibles para estudiar cuidadosa, completa y científicamente, cualquiera enfermedad pestilencial que pueda presentarse en el país.

"3°. Imponer á la referida 'Oficina Sanitaria Internacional' el deber de ayudar, con cuantos elementos disponga de ciencia y experiencia, para la mejor protección de la salud pública en cada cual de las naciones americanas, á fin de hacer desaparecer las enfermedades y facilitar el comercio.

"4°. Imponerle igualmente el deber de propender y ayudar por cuantos medios sean propios al mejoramiento de la salubridad de los puertos de mar, incluyendo en esto todo lo relativo á alcantarillado, cloacas, pavimentación, desinfección de edificios, destrucción de mosquitos, etc.

"5°. Y á fin de llevar estas medidas á debido efecto práctico, y ejecutando lo dispuesto en el Artículo VII de la Resolución de la Conferencia, crear un fondo de 5,000 pesos para atender á los gastos de la Oficina Sanitaria Internacional, cuyo fondo se constituya por cuotas que contribuya cada una de las Repúblicas en el orden establecido en dicho artículo."

El personal de la Oficina quedó elegido como sigue:

Presidente: el Señor Doctor Don WALTER WYMAN, Delegado por los Estados Unidos de América.

Vocales: los Señores Doctores Don EDUARDO LICEAGA, Delegado por México; Don EDUARDO MOORE, Delegado por Chile; Don JUAN GUITERAS, Delegado por Cuba; Don JUAN J. ULLOA, Delegado por Costa Rica; Don RHETT GOODE, de Alabama, y Don A. N. DOTY, Delegados por los Estados Unidos de América.

Se acordó finalmente que la próximo reunión de la Convención Sanitaria Internacional se efectúe en Santiago de Chile, inaugurándose sus sesiones el 15 de marzo de 1904.

REPÚBLICA ARGENTINA.

COMERCIO EXTERIOR DURANTE LOS PRIMEROS NUEVE MESES DE 1902.

La Dirección General de Estadística de la nación ha compilado ya los datos del comercio exterior argentino, correspondiente á los primeros nueve meses del corriente año.

El movimiento de importación da el siguiente resultado en pesos oro, 77,878,619.

Cotejando esta cifra con la de los primeros nueve meses de 1901, resulta que la importación ha disminuido en el corriente año en $10,248,333.

Durante el mismo tiempo la exportación ha sido de $136,707,787. La exportación, comparada con la de 1901, ha tenido un aumento de $5,560,560.

La importación de Alemania ha alcanzado en 1902 á $9,908,649; la de Bélgica á $4,626,249; la de Bolivia á $91,790; la del Brasil á $3,327,361; la de Chile á $166,607; la de España á $2,355,622; la de los Estados Unidos á $9,484,368; la de Francia á $6,962,514, y la de Italia á $9,658,212.

De 1901 á 1902 la importación ha disminuido en las siguientes cantidades: la de Alemania, $3,139,124; la de Bélgica, $2,180,627; la de España, $598,280; la de los Estados Unidos, $1,734,763; la de Francia, $839,962, y la de Italia, $2,225,508. En cambio la del Brasil ha tenido un aumento de $96,031 y la de Chile $81,596.

La exportación para los mismos puntos ha alcanzado en 1902 á las siguientes cifras en pesos oro: Alemania, 17,691,553; Bélgica, 10,968,822; Bolivia, 555,963; Brasil, 6,261,334; Chile, 381,216; España, 1,260,366; Estados Unidos, 7,545,229; Francia, 20,127,049; Italia, 3,071,198.

Comparadas estas cifras con las de los primeros nueve meses de 1901 la exportación ha aumentado en esta forma: para Alemania, $263,293; Bolivia, $60,568; Estados Unidos, $1,307,473; habiendo disminuido en cambio: para Bélgica en $604,031; Brasil, $492,939; Chile, $6,731; España, $216,002; Francia, $752,836; Italia, $294,617.

Los $10,248,333 oro, importe de la disminución en las importaciones, corresponden en primer término á los siguientes articulos:

Substancias alimenticias animales, $103,882; substancias alimenticias vegetales, $145,318; especias y otros condimentos, $70,276; substancias para infusiones y bebidas calientes, $123,935; otros productos alimenticios, $3,751; tabaco y sus aplicaciones, $164,508; vinos, $1,286,084; licores, $66,454; materias textiles y sus artefactos, $3,448,556; aceites fijos, minerales, volátiles y medicinales, $455,583; productos químicos y farmacéuticos, $438,582; colores y tintas, $141,999; maderas y sus artefactos, $371,904; papel y sus artefactos, $327,528; cueros, $171,199; hierro, $1,411,021; máquinas y útiles de labranza, $68,559.

LA PROPIEDAD RAÍZ EN BUENOS AIRES.

Según el "Boletín de Estadística Municipal," desde el 1° de enero hasta el 30 de junio de 1902 se han vendido en la ciudad 3,550 propiedades cuyo importe asciende á $19,172,001.72. En el mismo transcurso de tiempo, en los años de 1897 á 1901, las sumas que representan las operaciones de ese género fueron mayores en una proporción de 50 á 100 por ciento, como puede verse por los siguientes resultados del primer semestre de cada año:

Año.	Propiedades.	Pesos, moneda nacional.	Año.	Propiedades.	Pesos, moneda nacional.
1897	5,095	37,890,502.50	1900	4,325	27,648,351.32
1898	3,402	30,496,968.19	1901	4,388	27,094,284.84
1899	3,514	28,461,185.12			

Quiere decir, pues, que en el último quinquenio, en los seis primeros meses de cada año, las sumas que importan las ventas han excedido á las del semestre vencido el 30 de junio próximo pasado, desde la mitad, como en 1901, hasta casi el doble, como en 1897.

MAPA DE FERROCARRILES.

La Empresa Colonizadora Stroeder acaba de publicar un importante mapa de los ferrocarriles de la región agrícola de la República Argentina con la ubicación de las colonias fundadas por la Compañía.

Este trabajo contiene datos muy exactos, como que han sido tomados en las mismas oficinas de las distintas vías férreas y empresas ferrocarrileras.

Es innecesario hacer notar el interés que tiene dicha publicación para los agricultores y colonizadores.

BOLIVIA.

POBLACIÓN DE LA PAZ.

Según el censo último, La Paz tiene 60,031 habitantes, como sigue:

Censo urbano de 20 de septiembre de 1902	51, 162	
Aumento del 3 por ciento	1, 535	
		52, 697
Censo rural de 1º de septiembre de 1900	6, 984	
Aumento del 5 por ciento	350	
		7, 334
Total de población urbana y rural		60, 031

PRESUPUESTO PARA 1903.

[De "La Opinión," de La Paz.]

En el proyecto del Ejecutivo, figuran los ingresos en Bs. 6,008,350, suma á la que hay que agregar la de Bs. 1,566,252, descentralizada para el ramo de Colonización, haciendo un total de Bs. 7,564,602. Los egresos se descomponen como sigue:

	Bolivianos.
Servicio Legislativo	216, 280. 00
Servicio de Relaciones Exteriores y Culto	565, 491. 51
Servicio de Gobierno y Justicia	723, 576. 00
Servicio de Hacienda é Industria	1, 720, 410. 43
Servicio de Fomento é Instrucción	1, 372, 700. 00
Servicio de Guerra	2, 651, 424. 54
Servicio de Colonización	1, 566, 252. 00
Total de egresos	8, 816, 134. 48

En resumen, los ingresos alcanzan á Bs. 7,564,602 y los egresos á Bs. 8,816,134.48. El déficit alcanza á Bs. 1,251,532.48.

DATOS ESTADÍSTICOS SOBRE POTOSÍ.

Del Informe del Prefecto Señor Don Carlos Torrico se toman los siguientes datos estadísticos:

Población de todo el Departamento, 325,615 habitantes, de los que 167,744 son varones, y 160,868 mujeres.

La población de la ciudad es de 20,910, hallándose equilibrada la proporción de sexos.

En la estadística de la ciudad se anotan estos detalles industriales:

Hay un club ó centro social, 3 hoteles, 13 cantinas, 3 canchas de pelota, 13 almacenes de mercaderías al por mayor, 47 bodegas, 3 cervecerías que expenden 43,600 docenas de botellas, 10 tambos y posadas, 13 iglesias, 3 conventos, uno de varones y dos de mujeres, 1 recogimiento, 2 capillas, 3 cementerios.

Los gremios de artesanos son 44, de los cuales los más numerosas son: Mineros 897; sastres 368; zapateros 251; albañiles 144; herreros 124.

En bellas artes hay 2 escultores, 4 dibujantes, 17 pintores, 5 fotógrafos, 13 músicos, 1 grabador.

La estadística escolar es la siguiente:

Siete escuelas municipales de varones, con 12 profesores y 532 alumnos; 7 de mujeres con 13 profesoras y 475 alumnas.

COLOMBIA.

MODIFICACIONES AL ARANCEL DE ADUANAS.

I.—*Decreto nº 868, de 28 de mayo de 1902, pôr el cual se aumentan los derechos de importación.*

["Diario Oficial" de 9 de junio de 1902, nº 11688.]

Artículo único. Auméntanse en un cincuenta por ciento los derechos de importación de toda clase de mercaderías extranjeras que se importen al país.

Párafo. Este aumento principiará á cobrarse desde el día primero de julio próximo venidero.

II.—*Extracto del decreto nº 865, de 28 de mayo de 1902, sobre certificación de sobordos y facturas consulares, y algunas disposiciones fiscales.*

["Diario Oficial" de 10 de junio de 1902, nº 11689.]

Art. 1º. Las facturas comerciales para los efectos de la certificación consular se dividirán en cuatro clases, á saber:

1ª. Las facturas en que solamente estén anotados artículos de hierro, acero, cobre, zinc, ó madera, destinados á maquinarias de empresas industriales, ferrocarriles, vapores, luz eléctrica, telégrafos, teléfonos, imprentas, fábricas de vidrio ó loza, de esteáricas, de tejidos y de las que se consideren como de utilidad pública por medio de declaración oficial:

2ª. Las facturas cuyo valor no sea mayor de doscientos pesos;

3ª. Las facturas cuyo valor pase de doscientos pesos y no exceda de quinientos, y

4ª. Las facturas cuyo valor sea mayor de quinientos pesos.

Art. 2º. Las facturas para obtener la certificación consular serán gravadas en la siguiente forma, y siempre que en ellas no estén anotados objetos con piedras preciosas, de oro, platino ó plata, en cuyo caso tendrán el recargo especial que más adelante se indica:

Facturas de 1ª clase, con	$3
Facturas de 2ª clase, con	6
Facturas de 3ª clase, con	8
Facturas de 4ª clase, con	10

por cada mil pesos ($1,000) ó fracción de mil.

Las facturas en que estén anotados objetos con piedras preciosas, de oro, platino ó plata, tendrán el siguiente recargo:

Por los artículos que contengan piedras preciosas, el 40 por ciento;

Por los artículos de oro, el 10 por ciento;

Por los artículos de platino ó plata, el 3 por ciento.

Parágrafo. Los Cónsules sólo podrán certificar facturas en que estén anotados bultos pertenecientes á una misma marca, una sola firma remitente, para una sola persona ó compañía y para un solo lugar.

Art. 3°. Por las encomiendas postales se cobrará el 2 por ciento de la correspondiente factura, ó el recargo impuesto á los objetos de oro, platino y piedras preciosas, pagadero en oro ó en su equivalente en papel moneda, como compensación del gravamen consular sobre las mercancías que contengan.

Parágrafo. La Dirección General de Correos y Telégrafos reglamentará el cobro de ese gravamen y dará el aviso del caso á quien corresponda.

Art. 4°. Los derechos de sobordos se cobrarán en los Consulados á razón de cinco pesos por los primeros cien bultos, y un peso por cada cien bultos restantes ó fracción de ciento.

Art. 5°. El desembarco de mercaderías extranjeras en cualquier puerto de la República, sea franco ó habilitado, marítimo ó fluvial, con destino al comercio en territorio de la República, obliga al Capitán ó Sobrecargo del respectivo buque á presentar un sobordo con la certificación consular.

Art. 6°. Cuando en un puerto extranjero se tomen mercancías con destino á este país, pero que deban ser trasbordadas en otro puerto extranjero, las facturas correspondientes serán presentadas para su legalización al Consul del puerto donde primitivamente fué embarcada la mercancía, quien dará inmediato aviso al del lugar en cuyo puerto se verifique el trasbordo por medio de un oficio en que conste el número, marca y peso total de los bultos, el valor de la mercancía y el puerto de Colombia al cual se encamina, el nombre de los destinatarios, embarcadores y consignatarios, y los demás datos que sea conveniente manifestar.

El Cónsul del puerto de trasbordo permitirá que las facturas certificadas de este modo sean insertadas en el sobordo que debe presentársele, siempre que estén de acuerdo con los datos que haya recibido.

Art. 7°. La mercancía extranjera que sea desembarcada en alguno de los puertos del Istmo de Panamá para seguir á otros puertos nacionales, obliga el sorbordo con la correspondiente certificación extendida por el Administrador de Hacienda nacional, por la cual certificación se pagarán tres pesos en moneda de plata á la ley de 0,835, por los primeros bultos y un peso en la misma moneda, por cada cien bultos restantes ó fracción de ciento.

Art. 8°. El valor de toda certificación consular debe hacerse constar por el respectivo Cónsul, Agente consular, ó Administrador de Hacienda, en el correspondiente sobordo ó factura.

* * * * * * *

Art. 11°. Habrá dos clases de derechos de tonelaje: el de *registro* y el de *descarga*.

El de *registro* se cobrará á razón de diez centavos oro, por cada tonelada que señale la patente del buque, y sólo se cobrará en las islas de San Andrés y San Luís de Providencia.

El de *descarga* se cobrará á razón de un peso cincuenta centavos oro, por cada tonelada de mercaderías que desembarque en los puertos nacionales, marítimos ó fluviales, francos ó habilitados, y que sean destinadas al comercio dentro del territorio de la República.

* * * * * * *

Art. 13°. Exceptúase solamente del pago de derechos de tonelada, salvo que por leyes especiales ó contratos se diga claramente lo contrario:

1. Los buques de guerra de naciones amigas y los asimilados á ellos, cuando á aquellos les sea permitido entrar y fondear en los puertos de la República, siempre que no traigan carga particular;
2. Los buques que vengan en lastre;
3. Los que traigan inmigrados en número mayor de cincuenta;
4. Los que traigan solamente carbón, sal, hielo, ladrillo, baldosas y tejas, y las mercaderías embarcadas en un puerto habilitado, y
5. Los buques nacionales.

Art. 14°. Cuando en una Aduana no apareciere la factura consular en el acto del reconocimiento de la correspondiente mercadería, la Junta respectiva la avaluará en oro, y sobre esa base se cobrará al introductor una multa igual al cuádruplo de los derechos consulares que se hubieren dejado de causar, y sin que por éso se deje de imponer la pena de que habla el artículo 326 del Código de Aduanas.

Parágrafo. Asimismo se procederá cuando se note diferencia entre el precio anotado en las facturas y el que en realidad deban tener las mercaderías que en ellas se señalan.

Art. 15°. Cualquiera empresa industrial, establecimiento, comunidad ó persona, á quien desde la fecha de este acto legislativo se le conceda franquicia aduanera sobre los artículos que introduzca, en virtud de contrato posterior, pagará al retirar las mercaderías de la respectiva Aduana los correspondientes derechos de importación, los cuales serán devultos tan pronto como el Ministerio de Hacienda ordene la respectiva exención.

* * * * * * *

Art. 17°. El presente decreto, que modifica el artículo 56 del Código de Aduanas y algunas disposiciones fiscales, principiará á regir, tanto en las Aduanas como en los Consulados de la República, desde el 1° de agosto del presente año.

LA PAZ EN COLOMBIA.

["Diario de la Marina," de la Habana.]

Tenemos á la vista un número del "Boletín Oficial" de la República de Colombia, fecha 30 de octubre, en el que se anotan las bases del armisticio y convenio acordado entre el Gobierno y los revolucionarios, con objeto de dar fin á la guerra civil que destroza aquel rico territorio.

Por sus muchas dimensiones, no nos es fácil reproducir íntegro el articulado del convenio.

Véase lo más importante que contiene dicho documento:

Los artículos 1° y 2° están encabezados y redactados en esta forma:

Los suscritos, á saber, Urbano Castellanos, Comisionado por el General Florentino Manjarrés, Comandante General y Jefe de Operaciones en el Departamento del Magdalena, y Carlos Adolfo Urueta, Delegado por el General Rafael Uribe, Comandante General de las tropas liberales en Magdalena y Bolivar, han acordado el convenio contenido en los siguientes artículos:

1°. Las tropas revolucionarias de Magdalena y Bolivar se disolverán, para entrar en la vida pacífica todos los que forman parte de ellas.

2°. Se hace constar que, pudiendo las fuerzas liberales prolongar la guerra, si desisten de ella es por consideraciones de interés patrio, y por no ver probabilidades de triunfo para la revolución.

Véase ahora algunos de los restantes artículos.

7°. Los que depongan las armas no podrán ser en ningún tiempo perseguidos, juzgados, ni penados por actos que, en su calidad de militares en servicio activo y con el fin de realizar operaciones militares, hayan ejecutado ó mandado ejecutar contra las personas ó las propiedades de los demás.

8°. Para comprobar la calidad de militar en servicio activo, bastará la certificación jurada del inmediato Jefe Superior, ó de quien pueda hacer sus veces.

Quedan en consecuencia suprimidas las excepciones señaladas por el articulo 6°. del Decreto Ejecutivo núm. 933, de 12 de junio del corriente año. Con respecto á los liberales que estén sufriendo condenas por sentencias de Consejos de Guerra, se encarece al Señor Presidente de la República que haga uso en favor de ellos de su derecho de gracia, si no se considerara que el tenor de este tratado les alcanza.

Este artículo, el anterior y el 10 irán impresos al respaldo de los salvoconductos y pasaportes que se expidan en virtud de este convenio.

9°. Inmediatamente después de firmado este convenio, el Gobierno hará poner en libertad á todos los prisioneros de guerra y presos políticos que haya en las cárceles y cuarteles de los Departamentos de Magdalena y Bolivar. El Gobierno otorgará á dichos prisioneros y presos todas las garantías de este convenio, siempre que se acojan á él.

10°. En el territorio dominado por la Revolución, designará el Gobierno para autoridades á personas moderadas y conciliadoras, capaces de dar cumplimiento al artículo 10 del Decreto Ejecutivo número 933, de 12 de junio último, que á la letra dice: "ARTÍCULO 10°. Los funcionarios públicos, civiles y militares están obligados á respetar y hacer respetar de todos, las garantías concedidas en este Decreto, y los que infrinjan la presente disposición, incurrirán en las penas que les aparejan la desobediencia y los atentados que cometan contra las personas ó los bienes de los revolucionarios."

11°. Todos los liberales que por algún motivo estén en el Exterior, hayan ó no hecho armas contra el Gobierno, y hayan ó no ejecutado actos de guerra de aquellos de que trata el artículo 7°, podrán regresar libremente al país y recibirán salvoconducto en los términos de este tratado.

12°. Inmediatamente después de firmada la presente convención, el Gobierno ordenará la suspensión definitiva de la contribución de guerra impuesta á los liberales de Magdalena y Bolívar, y los que manifiesten acogerse á los términos de este tratado, no podrán en adelante ser gravados con nuevos empréstitos y expropiaciones especiales.

Firmaron este documento en la finca "Nerlandia," los Generales CASTELLANOS, URUETA, MANJARRÉS Y URIBE-URIBE, el 24 de octubre de 1902.

Los revolucionarios contestaron con lo siguiente, en Barranquilla el 25 de octubre:

"Aprobado, bajo la condición de que las cláusulas 7ª y 8ª queden redactadas así:

"'7°. Los que depongan las armas en virtud de lo convenido en este pacto, no podrán ser en ningún tiempo perseguidos, juzgados ni penados por considerárseles cabecillas de expediciones organizadas en país extranjero, ni por actos que en calidad de militares en servicio activo y con el fin de realizar operaciones militares, hayan ejecutado ó mandado ejecutar contra las personas ó las propiedades de los demás.

"'Para comprobar la calidad de militares en servicio activo, bastará la certificación jurada del inmediato Jefe Superior ó de quien pueda hacer sus veces.

"'8°. Quedan en consecuencia aclaradas las excepciones señaladas por el artículo 6° del Decreto Ejecutivo número 933 de 12 de junio del corriente año. Con respecto á los liberales que estén sufriendo condenas por sentencias de Consejos de Guerra, se encarece al Señor Presidente de la República que haga uso en favor de ellos de su derecho de gracia, si no se considera que el tenor de este tratado les alcanza.

"'Este artículo, el anterior y el 10° irán impresos al respaldo de los salvoconductos y pasaportes que se expidan en virtud de este convenio.'"

Firman los Generales TOVAR y FLÓREZ.

FUENTES DE RIQUEZA EN COLOMBIA.

[Del "Boletín Industrial," de Bogotá.]

Entre las fuentes de riqueza en Colombia, hay que poner en primer lugar las industrias agrícolas y mineras. La agricultura de la Sabana de Bogotá y de las altiplanicies andinas, la de las tierras medias y la de las tierras cálidas representan tres fuentes diferentes de productos y cultivos diversos.

Los terrenos de la Sabana son de primera calidad como contextura, pero están prácticamente agotados, y para rehacer su fertilidad hay que recurrir á los abonos, reintegrando con ellos lo que le quitó el cultivo continuado.

La agricultura de las tierras medias, representada principalmente por la explotación del cafeto, también principia á adolecer del cansancio del suelo; las tierras nuevas, las recientemente desmontadas, pueden dar frutos hasta agotar lo que en ellas había almacenado la Naturaleza; pero al llegar al límite de su fertilidad natural, principian á aparecer los síntomas de cansancio, caracterizados por la enfermedad y debilidad de las plantas y el decaimiento en las cosechas. Entonces se imponen los abonos ó el cambio de cultivo.

El regadío sistemático de las tierras; la construcción de canales para suministrar aguas de riego á las tierras secas, es una de las empresas de más porvenir en el país. Viajando por el Tolima, se ve qué emporio de riqueza han de ser esas tierras cuando en ellas se establezca una irrigación bien conducida. El Tolima, sobre todo por la abundancia de aguas altas, los innumerables ríos y quebradas que bajan de las cordilleras, es el teatro más adecuado para el establecimiento de una irrigación por canales. Una pequeña empresa de esta clase (la que sería un brillante ensayo de prueba) es la toma de agua del río Coello y su conducción al Espinal, regando los terrenos intermedios.

No hay para qué hablar de la explotación de las selvas vírgenes del Orinoco ni del Amazonas, pues todo el mundo sabe qué riquezas están depositadas allí y qué esperanzas representan.

Quien estudie á Colombia con el deseo de su progreso y enriquecimiento, no puede dejar de llenarse de tristeza al contemplar la destrucción de sus selvas, y con ellos la de la enorme riqueza pública y privada que representan, y que es preciso rehacer. Es, por lo tanto, indispensable enumerar como fuentes de riqueza nacional las medidas administrativas que se providencien para conservar las selvas existentes, y para formar bosques artificiales en el futuro. No solamente hay que conservar lo que hay y rehacer mucho de lo que se ha destruido sino que es indispensable, en lo porvenir, reglamentar la explotación de los bosques de tal manera, que aprovechando la industria sus productos, el país no sufra con la extinción de ellos.

Otro factor primario de la riqueza nacional son las minas. Al haber paz establecida, el grande entusiasmo industrial tiene necesariamente que dirigirse á la minería, y no debe perderse de vista que de la perfección de los aparatos metalúrgicos que se empleen, así como de su adaptación á la naturaleza de los minerales á que se apliquen, ha de depender, en gran manera, el éxito favorable ó adverso de la nueva efervescencia minera que se espera.

No hay necesidad de recomendar la importancia que tiene en Colombia el beneficio de los minerales de cobre, en los cuales la República es tan rica. También llaman grandemente la atención los importantes yacimientos de estaño, que ocupan vastas extensiones en el Departamento de Santander. El precio de este metal es en extremo halagador ($600 oro la tonelada) y muy firme.

La transformación y utilización de los productos naturales, la creación de nuevas empresas para el aprovechamiento y transporte de las fuerzas hidráulicas, y el descubrimiento de nuevos productos para la exportación, constituyen por sí solos amplísimo campo para las energías que existen en grado muy eminente en el pueblo colombiano.

COSTA RICA.

LIBRE ENTRADA DE CEMENTO ROMANO Y TUBOS DE BARRO EN EL PUERTO DE LIMÓN.

La Comisión Permanente del Congreso Constitucional de la República de Costa Rica, á iniciativa del Poder Ejecutivo, y de conformidad con la fracción 4ª del artículo 94 de la Constitución, decreta:

Artículo 1°. Serán libres de derechos de aduana y muellaje el cemento romano y los tubos de barro que se introduzcan para usarse exclusivamente en el puerto de Limón en aceras y conexión de las casas con las cloacas.

Art. 2°. Esta franquicia durará hasta el día 30 de abril de 1903, inclusive, y estará sujeta á las siguientes condiciones:

1ª. Que dichos materiales vengan consignados á la orden del Señor Gobernador de Limón;

2ª. Que antes de autorizar el retiro de cualquier cantidad de esos artículos, dicho funcionario exija del interesado declaración firmada respecto del lugar en donde haya de emplearse conforme á esta ley;

3ª. Que los propietarios de los artículos paguen, en proporción á sus introducciones, los gastos de bodega y demás indispensables que tenga que hacer el Gobernador para ejecución de este decreto.

Art. 3°. Si los materiales retirados del depósito fueren usados fuera del puerto ó en otros objetos qué los autorizados, el introductor pagará una multa de tres veces el valor de los derechos de aduana y muellaje, y perderá además el cemento y los tubos de barro que conserve en depósito, á la orden del Gobernador.

Al Poder Ejecutivo.

Dado en el Salón de Sesiones, Palacio Nacional, San José, á primero del mes de noviembre de mil novecientos dos.

PEDRO ZUMBADO, *Presidente.*

CLETO GONZÁLEZ VÍQUEZ.

REGLAMENTO PARA LA EXPLOTACIÓN DE LOS YACIMIENTOS PERLÍFEROS.

ASCENSIÓN ESQUIVEL, Presidente Constitucional de la República de Costa Rica,

Habiendo sido, por decreto Legislativo nº 27 de 3 de julio próximo pasado, declarada libre la explotación de los yacimientos perlíferos de todo el litoral del Pacífico de la República, para los nacionales y para los extranjeros que tengan por lo menos dos años de residencia en el país, decreta la siguiente reglamentación:

ARTÍCULO 1°. La explotación de la pesca de la concha perla no podrá hacerse por contrato; se hará mediante la licencia que otorgue el Gobernador de Puntarenas y el pago de la patente respectiva.

ART. 2°. No se otorgará licencia para pescar en puntos indeterminados del litoral sino en parajes señalados, comenzando desde la bahía de Salinas y prosiguiendo sin interrupción hasta Golfo Dulce, ni se podrá señalar á distintos buceadores varios parajes sino que todos á la vez deben explotar con la debida separación una misma zona, á fin de que la autoridad pueda fiscalizarlos fácilmente.

ART. 3°. La matrícula estará á cargo de la Gobernación de Puntarenas, y la recaudación de derechos se efectuará en la Tesorería Municipal de dicho puerto.

ART. 4°. El Gobernador, con informe del Inspector ó Subinspector de Hacienda, podrá negar el permiso que se le solicite, cuando en alguna forma el solicitante hubiere eludido ó tratado de eludir las disposiciones existentes relativas á esta franquicia, lo mismo que cuando por los antecedentes de las personas ú otros datos haya motivos suficientes á su juicio de que á la sombra del buceo se trata de hacer el contrabando. De estas negativas quedará al interesado el derecho de apelación ante el Ministerio de Hacienda.

ART. 5°. Las estaciones del año para el buceo son dos: una que comprende desde mayo hasta octubre inclusive para la parte del litoral que queda al norte del Cabo Blanco, y otra desde noviembre hasta abril inclusive, para la parte que queda al sur.

ART. 6°. El buceo puede hacerse con buzos llamados de cabeza ó con máquinas, pero ningún individuo, empresa ó compañía podrá poner más de un tren de buceo ni éste constar de más de tres máquinas.

ART. 7°. No se podrán otorgar licencias para máquinas por más de tres meses renovables á su vencimiento á juicio del Gobernador de Puntarenas. Las fechas de estas licencias se computarán desde las de salida de las embarcaciones del puerto de Puntarenas, hasta las de su regreso al mismo.

ART. 8°. El Gobernador, con informe del Inspector ó Subinspector de Hacienda, podrá cancelar las patentes extendidas á aquellos buceadores que en alguna forma infrinjan ó eludan los estatutos de este Reglamento.

ART. 9°. En las licencias deberá constar:

1°. El nombre del lugar en donde debe establecerse la pesquería de perlas.

2°. Los nombres del empresario y de la embarcación de la empresa.

ART. 10°. Las embarcaciones que se empleen en esta pesca deberán estar inscritas en los registros marítimos de la República y ser nacionales.

ART. 11°. El Gobernador tendrá el derecho de poner uno ó más guardas á bordo de las embarcaciones buceadoras y mientras estén á bordo su manutención será obligatoria por el empresario.

ART. 12°. Queda prohibido el buceo con máquinas á una profundidad menor de cinco brazadas, computadas en las mareas bajas.

ART. 13°. Los empresarios presentarán mensualmente al Gobernador de Puntarenas una lista que contenga los nombres de sus empleados y exprese los cambios, supresiones ó defunciones que hayan ocurrido en el personal de la empresa.

ART. 14°. Se prohibe el empleo de todo género de explosivos ó cualesquiera otros medios destructores, bajo la pena de 100 á 500 colones, de multa y la suspensión inmediata del permiso para bucear.

ART. 15°. Queda también prohibida la extracción de concha perla que no tenga por lo menos 0.0635 metro (2½ pulgadas) de diámetro.

ART. 16°. Las máquinas, escafandros, tubos de hule y demás implementos que se empleen quedan sujetos al pago de derechos de importación. Pagarán igualmente derechos de importación los víveres conducidos á bordo de las naves que vengan de otros puertos extraños á ejercer el buceo con arreglo á la presente ley.

ART. 17°. Para que los extranjeros de que habla el preámbulo del presente decreto, puedan gozar de la libertad de la pesca de la concha perla, otorgada á los nacionales, es entendido que renuncian en absoluto á recurrir á la vía diplomática por cualquiera disposición administrativa ó judicial que las autoridades del país dicten en cualquiera cuestión á que pudiera dar lugar la inteligencia de este Reglamento; y al efecto el Gobernador no dará curso á ninguna solicitud de tales extranjeros sin que en ella conste clara y terminantemente expresada dicha renuncia.

Art. 18°. El valor de las patentes se fijará, cobrará y distribuirá según lo previene la ley á que este Reglamento se refiere.

Artículo transitorio. Tomada en cuenta la conveniencia de fijar con cierta anticipación la vigencia de este Reglamento, para que tanto los nacionales como los extranjeros puedan preparar los implementos y embarcaciones convenientes á la pesca y acordarse los Municipios en todos los detalles que por la citada ley á ellos incumbe, se fija el 1° de noviembre próximo, y por lo tanto la sección sur del litoral, para dar principio á la explotación de los referidos yacimientos perlíferos. En consecuencia, todas las embarcaciones que actualmente se ocupan de la pesca se reconcentrarán en Puntarenas para que allí descarguen y utilicen la concha que tengan al presente, bajo el apercibimiento de que quienes infrinjan esta transitoria disposición quedarán inhabilitados en lo futuro para obtener la gracia que la citada ley concede.

Dado en San José, á los veintidós días del mes de agosto de mil novecientos dos.

DERECHOS SOBRE TELONES DE MADERA.

Ascensión Esquivel, Presidente Constitucional de la República de Costa Rica.

Vista la necesidad de establecer un aforo para los telones formados de reglas de madera, sencillamente pintadas y unidas por medio de alambre, destinados á precaverse del sol y del agua, en balcones y corredores, y no siendo equitativo asimilarlos á persianas por lo sencillo de su confección, y por su tamaño;

Por tanto, en uso de la facultad que le confieren las leyes de 16 de julio de 1888 y 14 de junio de 1901, decreta:

Artículo único. Los telones en referencia pagarán el aforo quince céntimos de colón (0.15) por kilogramo, siempre que no tengan adornos de ninguna clase, y midan por lo menos dos y medio metros de ancho.

Dado en San José, á los veinticuatro días del mes de octubre de mil novecientos dos.

DECRETO QUE IMPONE DERECHOS Á LA MADERA INTRODUCIDA POR EL PUERTO DE LIMÓN.

El Congreso Constitucional de la República de Costa Rica decreta:

Artículo 1°. Derógase la ley número 20, de 2 de noviembre de 1900, que se refiere á construcciones en la ciudad de Limón y exención de derechos de aduana á la introducción de hierro, madera y otros artículos.

Art. 2°. La madera que se introduzca por el puerto de Limón, pagará por derechos de importación, veinticinco colones por cada dos metros cúbicos y trescientos cincuenta y seis decímetros cúbicos, equivalentes á mil pies superficiales, medida inglesa.

Al Poder Ejecutivo.

Dado en el Salón de Sesiones del Congreso, Palacio Nacional, San José, á los catorce días del mes de agosto de mil novecientos dos.

FRANCISCO M. IGLESIAS,
Presidente.
CARLOS SÁENZ,
1er Secretario.
PEDRO ZUMBADO,
2º Secretario.

San José, veinte de agosto de mil novecientos dos.

ASCENSIÓN ESQUIVEL.

CONVENCIÓN DE EXTRADICIÓN CON EL REINO DE BÉLGICA.

"El Presidente de la República de Costa Rica y Su Majestad el Rey de los Belgas, deseando arreglar por medio de una convención la extradición de criminales, han nombrado al efecto por sus Plenipotenciarios, á saber:

"El Presidente de la República de Costa Rica á Don MANUEL M. DE PERALTA, Enviado Extraordinario y Ministro Plenipotenciario de la República de Costa Rica en Bélgica, Oficial de la Orden de Leopoldo, y

"Su Majestad el Rey de los Belgas al Excelentísimo Señor Barón de FAVEREAU, Caballero de la Orden de Leopoldo, Senador, su Ministro de Negocios Extranjeros, quienes, después de haber canjeado sus plenos poderes, hallados en buena y debida forma, han convenido en los artículos siguientes:

"ARTÍCULO 1°. El Gobierno de la República de Costa Rica y el Gobierno belga se comprometen á entregarse recíprocamente, á petición hecha por uno de ellos al otro, y con la única excepción de sus nacionales, los individuos procesados ó condenados como autores ó cómplices de cualquiera de los crímenes ó delitos especificados en el artículo 2°, por las autoridades judiciales de una de las dos partes y que se hallen en el territorio de la otra.

"Cuando el hecho que motive la demanda de extradición se hubiere cometido fuera del territorio del Estado requirente podrá darse curso á dicha demanda, siempre que la legislación del país requerido autorice la persecución de hecho semejante cometido en el extranjero.

"ARTÍCULO 2°. Los crímenes y delitos por razón de los cuales se acordará la extradición, son los siguientes:

"1°. Homicidio voluntario, comprendiendo los crímenes de asesinato, homicidio, parricidio, infanticidio y envenenamiento.

"2°. Incendio.

"3°. Golpes y heridas graves que puedan dar lugar á extradición según la ley de ambos países.

"4°. Violación, atentados contra el pudor con violencia, atentados contra el pudor sin violencia en niños menores de la edad determinada por la legislación penal de ambos países.

"5°. Rapto de menores, ocultación, supresión, sustitución ó suposición de niños.

"6°. Robo y pillaje.

"7°. Daños ú obstáculos á las vías férreas, que pongan ó pueden poner en peligro la vida de los viajeros.

"8°. Piratería ó rebelión á bordo de buques cuando la tripulación ó los pasajeros se apoderan del buque por sorpresa ó violencia contra el capitán.

"9°. Asociación de malhechores.

"10°. Falsificación de escrituras, falsificación de documentos ó despachos telegráficos; uso de documentos falsificados.

"11°. Falsificación ó adulteración fraudulenta de instrumentos oficiales que emanen del Gobierno ó de la autoridad pública, como también de los tribunales de justicia; uso fraudulento de documentos así alterados ó falsificados.

"12°. Fabricación de moneda falsa; falsificación ó alteración de títulos ó cupones de la deuda pública, de billetes de banco nacionales ó extranjeros, de papel moneda ó de otros valores públicos de crédito; de sellos, timbres, troqueles, marcas del Estado ó de las administraciones públicas; poner en circulación ó usar fraudulentamente cualquiera de los objetos enunciados arriba alterados ó falsificados.

"13°. Sustracción de caudales públicos por empleados públicos ó depositarios.

"14°. Quiebra fraudulenta.

"15°. Extorsión; atentados contra la libertad individual y contra la inviolabilidad del domicilio cometidos por particulares.

"16°. Falso testimonio, perjurio y soborno de testigos, peritos ó intérpretes.

"17°. Estafa.

"18°. Abuso de confianza.

"19°. Aborto.

"20°. Bigamia.

"21°. Excitación habitual de menores al libertinaje.

"22°. Encubrimiento de objetos obtenidos por medio de uno de los crímenes ó delitos mencionados en el presente artículo.

"23°. Conato de cualquiera de estos crímenes y delitos, cuando el conato es penable según la legislación de ambas partes contratantes.

"En todo caso los hechos en razón de los cuales se pide la extradición deben comportar, según la ley del país requiriente, una pena que no bajo de dos años de prisión, y la extradición no podrá verificarse sino cuando el hecho semejante sea penable según la legislación del país requerido.

"Tampoco habrá lugar á extradición por hechos que sólo puedan procesarse por acusación de la parte dañada.

"Art. 3°. Si hallándose comprendido en la categoría de los hechos previstos en el artículo anterior se presentare algún caso en que la extradición pareciere contraria en cuanto á sus consecuencias, á los principios de humanidad admitidos en la legislación del Estado requerido, éste tendrá el derecho de no entregar al individuo reclamado.

"En este caso y en cualquiera otro en que hubiere duda acerca de saber si es aplicable la presente convención, se pedirán explicaciones y después de examinarlas, el Gobierno á quien se pide la extradición resolverá acerca del curso que deba darse á la demanda.

"Art. 4°. Queda expresamente estipulado que el extranjero cuya extradición se hubiere acordado, no podrá ser procesado ó castigado por ningún delito político anterior á la extradición, ni por ningún hecho conexo con un delito semejante, ni por ningún crimen ó delito no prescrito por la presente convención.

"No se reputará como delito político, ni como hecho conexo con él, el atentado contra la persona del Jefe de un Estado extranjero, cuando este atentado constituya el hecho sea de homicidio, sea de asesinato, sea de envenenamiento.

"El individuo entregado podrá, sin embargo, ser procesado y castigado contradictoriamente por una infracción distinta de la que ha motivado la extradición en los casos siguientes:

"1°. Si ha pedido que se le juzgue ó que se le haga purgar su pena, y, en este caso, su petición se comunicará al Gobierno que lo ha entregado;

"2°. Si durante un mes después de la fecha de haber sido puesto definitivamente en libertad no ha salido del país á que fué entregado;

"3°. Si la infracción está comprendida en la convención y si el Gobierno á quien fué entregado ha obtenido previamente el consentimiento del Gobierno que ha acordado la extradición.

"Este último podrá, si lo juzga conveniente, exigir la producción de algunos de los documentos mencionados en el artículo 6° de la presente convención.

"La reextradición á un tercer país queda sometida á las mismas reglas.

"Art. 5°. No habrá lugar á extradición cuando con arreglo á la legislación del país en que se halle el inculpado haya prescrito la pena ó la acción criminal.

"Art. 6°. La extradición sólo se concederá mediante la producción, ya de una sentencia condenatoria, ya de un auto de procedimiento que decrete formalmente ú obligue de pleno derecho á la comparecencia del inculpado ante la jurisdicción represiva, ya, en fin, de un auto de prisión ó de cualquier otro documento que tenga la misma fuerza. Estos documentos indicarán la naturaleza precisa de los hechos criminados y la disposición penal que les es aplicable.

"Serán producidos en original ó en testimonio auténtico y se acompañarán, siempre que sea posible, de una traducción en la lengua del país requerido, y de la filiación del individuo reclamado.

"Art. 7°. Las demandas de extradición se dirigirán siempre por la vía diplomática ó consular.

"Art. 8°. En casos urgentes la detención provisional del inculpado se verificará previo aviso dado por el correo ó por telégrafo de que existe un auto de prisión, con tal que este aviso sea trasmitido por la vía diplomática ó consular.

"Esta detención será facultativa cuando el aviso arriba mencionado emane de una autoridad judicial ó administrativa de uno de los dos países y venga directamente á una autoridad judicial ó administrativa del otro país.

"Art. 9°. En uno y otro caso el extranjero detenido provisionalmente será puesto en libertad, si en el plazo de tres meses, contados desde el día de su detención, no se le ha notificado ninguno de los documentos enunciados en el artículo 6°, trasmitidos por la vía diplomática ó consular.

"Art. 10°. Si el individuo reclamado está procesado ó condenado en el Estado requerido podrá diferirse su extradición hasta el desistimiento del proceso y, en caso de condenación, hasta que extinga la pena.

"En caso de hallarse procesado ó detenido en el mismo país, con motivo de obligaciones que hubiere contraído respecto de particulares, su extradición se verificará no obstante, bajo reserva para los últimos de hacer valer en seguida sus derechos ante la autoridad competente.

"Art. 11°. Los objetos apresados que puedan servir de pruebas de convicción, así como todos los objetos que puedan provenir del crimen ó delito por el cual se pide la extradición, serán entregados, á juicio de la autoridad competente, al Gobierno de la parte requirente, aun cuando no pudiera verificarse la extradición por muerte ó desaparición ulterior del individuo reclamado.

"Esta entrega comprenderá también todos los objetos que el inculpado hubiere escondido ó depositado en el país y que posteriormente fueren descubiertos.

"Quedan, sin embargo, reservados los derechos que terceros, no implicados en el proceso, hubieren adquirido sobre los objetos designados en el presente artículo.

"Art. 12°. Los gastos de detención, de manutención y de trasporte del individuo cuya extradición fuere acordada, así como los de consignación y trasporte de los objetos que, de conformidad con el artículo anterior, deben ser restituidos ó remitidos, quedan á cargo de ambos Estados dentro de los límites de sus respectivos territorios.

"El individuo que haya de ser entregado, será conducido al puerto del Estado requerido que designe el Agente diplomático ó consular acreditado por el Gobierno requirente, á cuyas expensas será embarcado.

"ART. 13°. Cuando en el curso de una causa criminal no política, se creyere necesario tomar declaraciones á personas que se hallen en uno de los dos países, ó cualquier otro procedimiento de instrucción judicial, se enviará al efecto, por la vía diplomática ó consular un exhorto y se la dará curso con arreglo á las leyes del país requerido.

"Los dos Gobiernos renuncian al reembolso de los gastos que resulten del cumplimiento de exhortos cuando no se trate de exámenes de peritos que puedan ocasionar varias diligencias.

"ART. 14°. Los dos Gobiernos se comprometen á notificarse recíprocamente, sin reembolso de gastos, las sentencias condenatorias que dicten los tribunales del uno contra los súbditos del otro por cualquier crimen ó delito.

"Dicha notificación se llevará á efecto, enviando por la vía diplomática ó consular, un boletín ó extracto al Gobierno del país á que el sentenciado pertenezca.

"Cada uno de los Gobiernos dará al efecto las instrucciones necesarias á las autoridades competentes.

"ART. 15°. Las estipulaciones de la presente convención serán aplicables en todas las posesiones extranjeras ó coloniales que llegaren á poseer las altas partes contratantes.

"En este caso la demanda de entrega será dirigida al Gobernador ó funcionario principal de la colonia por el principal Agente diplomático ó consular del país requirente.

"El presente tratado entrará en vigor diez días después de su publicación, de conformidad con las leyes respectivas de ambos Estados. Cada una de las partes contratantes podrá denunciarlo en cualquier tiempo, dando aviso de su intención á la otra parte con un año de anticipación.

"El canje de las ratificaciones se verificará en Bruselas tan pronto como sea posible.

"En fe de lo cual los Plenipotenciarios respectivos han firmado el presente tratado y lo han sellado con sus respectivos sellos.

"Hecho en Bruselas el 25 de abril de 1902.

"[L. S.] FAVEREAU.

PROTOCOLO.

En el momento de proceder á la firma los infrascritos han convenido en lo siguiente:

El artículo 3° no tiene más alcance que el de hacer depender la extradición en los crímenes que tienen pena de muerte, de la seguridad dada previamente por la vía diplomática ó consular de que en caso de condenación no será ejecutada dicha pena.

El presente protocolo tendrá igual fuerza y durará tanto como la convención de que es parte integrante.

Hecho en Bruselas el 25 de abril de 1902.

FAVEREAU.

CUBA.

INFORME SOBRE PIELES Y CALZADO.

[Enviado por el Cónsul de México, D. ARTURO PALOMINO.]

Cuba es uno de los países que, con relación al número de sus habitantes, importa mayores cantidades de calzado, y hay razones poderosas que justifican esta excepcional importación.

Cuando Cuba era colonia de España, al Gobierno de la metrópoli parece le convenía proteger la industria de fabricación de calzado tan desarrollada en Cataluña y en las Baleares, y ese propósito lo conseguía imponiendo mayores derechos á las pieles curtidas que al calzado, de modo que resultase más barato el importado en Cuba, que el que se fabricase en este país en donde es tan cara la mano de obra.

Llegó la intervención americana, y como quiera que en los Estados Unidos tiene también gran importancia la industria del calzado, no se favoreció en los nuevos Aranceles la importación de pieles curtidas, suelas y demás accesorios para la fabricación, y en cambio se disminuyeron los derechos que á su importación pagaba el calzado, impidiendo así su fabricación en Cuba. Tanto es así, que una de las zapaterías más acreditadas de la Habana, que fabricaba el calzado cobrando á razón de $8 oro el par, envió sus hormas á los Estados Unidos y ahora lo recibe hecho allá y lo vende á $6 oro el par.

Prueba de lo que llevo expuesto es la base de adeudo de pieles y calzado en los Aranceles vigentes hoy en Cuba.

Las pieles en su estado natural ó adobadas, pagan el 10 por ciento *ad valorem.*

Los cueros curtidos con pelo, la suela de becerro, carnero, cabra y cabritilla, pagan el 15 por ciento de derechos. Las pieles barnizadas, charoladas, esmaltadas y con relieves ó adornos, adeudan el 20 por ciento *ad valorem.*

En cambio el calzado paga:

Para hombres, de la medida 5 en adelante, 15 centavos el par, y el 10 por ciento *ad valorem.*

Para señora ó niña, 10 centavos el par, y el 10 por ciento *ad valorem.*

Para niño, del 9½ abajo, 5 centavos el par, y el 10 por ciento *ad valorem.*

La importación de calzado durante el año pasado en Cuba, fué de 2,205,565 pares, con un valor de $1,684,572.

De ellos procedieron de España, 1,716,132 pares, con valor de $212,352 y de los Estados Unidos, 482,132 pares, con un valor de $467,778.

De China y Austria-Hungría se importaron 2,822 pares, valiendo $449 y 1,915 pares, valiendo $1,586, respectivamente.

Cuando comenzó en Cuba la guerra de 1895, se establecieron algunas fábricas de calzado para surtir al ejército español principalmente, no fabricándose las clases finas, sino las más ordinarias de vaqueta y becerro engrasado.

Desde la intervención acá esas fábricas comenzaron á arrastrar una vida lánguida, concluyendo algunas por cerrar sus puertas, en la imposibilidad de sostener competencia con el calzado importado de fuera.

Los únicos países que hoy abastecen el mercado de Cuba son España (Cataluña y Baleares) y los Estados Unidos.

CALZADO QUE SE IMPORTA DE ESPAÑA, CLASES MÁS NORMALES Y PRECIOS APROXIMADOS.

Pantuflas.—Las clases más corrientes son dos: las que se denominan "antillanas" son de alfombra, ó sea cañamazo bordado en lana, con suela delgada y tacón; su precio varía desde 30 á 45 pesetas la docena de pares, según clase y tamaño; la otra clase es de "marroquí," piel de carnero granulada, siendo el color más frecuente el amarillo en distintos tonos, y su precio varía desde 25 á 50 pesetas la docena.

En pequeña cantidad también otras clases de pantuflas de lujo, como las de piel de canguro, de cochino, de cocodrilo, etc.

Napoleones.—Es ésta una clase de calzado de gran importación en Cuba. Los "napoleones" son de chagrín (piel de cabra granulada) y afectan la forma siempre de *borceguíes.* Vienen amarillos y negros, en mayor cantidad estos últimos, y en las medidas de niño, joven y mujer, nunca para hombre. Los hay de tacón y de cuña indistintamente. La marca más acreditada es la del fabricante ANTONIO CABRIZAS, de Barcelona, cuya casa exporta para Cuba muy cerca de 3,000 docenas mensuales. Los precios de este fabricante son de 18½ á 35 pesetas la medida de niño, de 35 á 60 la de joven y de 60 á 87½ pesetas la de mujer. Es éste un calzado que da excelente resultado y que goza por eso de merecida demanda.

Zapatos.—Los de corte bajo, para señora, se importan en gran cantidad de cabritilla de lustre, ó *glacé*, de la misma materia con puntera de charol, de charol solo y de glacé amarillo. La moda ha impuesto ahora los zapatos finos con grandes hebillas plateadas. Es casi imposible señalar un precio aproximado en estas clases de calzado, por la gran variedad de pieles, suelas y adornos de que se componen, pero casi nunca pasan de 150 pesetas la docena.

También se consumen pequeñas partidas de sarga negra, propios para señoras de edad, en clases baratas, sin adorno alguno.

Los zapatos para hombre son por lo general de becerro negro ó amarillo, y de charol, con valor de 90 á 120 pesetas la docena, en clases regulares, y de 120 á 150 pesetas las clases más finas.

Borceguíes.—Recibe aquí ese nombre el calzado que se abrocha por delante con cintas y ganchos ú ojetes. Se reciben para mujer, joven y hombre indistintamente en las mismas clases mencionadas para los zapatos y con un precio algo mayor que éstos en igualdad de clase, por mayor abundancia de material.

El borceguí es el calzado que más se consume para hombres, en las clases siguientes: Glacé negro y amarillo, becerro negro y amarillo y charol.

Una especialidad de las Baleares es el borceguí que se llama de *becerro virado*, ó sea de becerro negro trabajado por el revés ó sea presentando hacia afuera un color avellanado grasiento. Esta clase de calzado se vende en grandes cantidades para los pueblos del interior de la Isla, para lo cual suele venir con triple suela, de rebordes salientes.

Su precio varía, según material, de 100 á 130 pesetas.

Botines.—Es el nombre que reciben los que se abrochan con botones. Las clases para mujer son de cabritilla, glacé negro con puntera de charol ó de glacé amarillo. Tienen tacón Luis XV y cuestan en clase buena de 120 á 180 pesetas. Vienen también más baratos, con pieles de imitación. Las clases para hombre son iguales á las citadas al hablar de los borceguíes y no varían en precio.

La preponderancia que alcanzó en Cuba el calzado balear débese, aparte de la protección arancelaria de que disfrutó en tiempo de la dominación española, á que aquellos fabricantes trabajaron con hormas de Cuba, enviadas de aquí por los importadores.

Una particularidad que hay que tener en cuenta por lo mucho que dificulta la competencia de cualquier calzado con el español, es que la mayoría de los fabricantes envía el calzado *en comisión* á los almacenes importadores, los cuales rinden cuenta del calzado después de vendido éste.

Cabrizas y algún otro fabricante de *napoleones*, se exceptúan de esta regla general por el crédito y el gran consumo de sus productos.

También se exceptúan de la regla las facturas que en clases finas piden los peleteros ó sean los comerciantes al por menor cuyas facturas son pagadas comunmente al recibirse aquí el conocimiento de embarque.

Por la baratura de la materia prima y de la mano de obra, por el cambio y por ser los fletes menos elevados, el calzado que se fabrica en México puede sostener ventajosamente la competencia con el que España exporta.

Para acertar en lo relativo á las hormas, punto esencial para la buena aceptación del calzado, podrían los fabricantes de la República recibir como modelo un par de cada una de las clases de calzado que aquí tiene mayor venta, con nota del precio de fábrica, y del que aquí se vende al comercio al por mayor.

También podría dar resultado la remisión de muestras, contando con una agencia comisionista que sepa hacer resaltar las ventajas de nuestros artículos.

Alpargatas.—Este calzado fabricado en España, de cáñamo, se consume en alguna cantidad para las clases jornaleras, por su bajo precio, siendo su precio en España de 7 á 10 pesetas la docena. Y el de Francia hasta 12 francos la docena, pagando de derechos por la partida 200 del arancel, $0.40 docena.

Importación de calzado americano.—El calzado americano que antes se consumía en pequeña cantidad, por las diferencias arancelarias que á su favor tenían los productos españoles, comenzó á introducirse en mayor escala cuando la intervención americana suprimió los derechos diferenciales de bandera.

El calzado americano está, por regla general, mejor presentado que el español. Los fabricantes americanos venden sus mercancías á sesenta días de plazo cuando más y conceden un descuento extra de 2 á 5 por ciento cuando se les paga al contado.

Las clases finas son las que en mayor nos llegan de los Estados Unidos. En calzado de hombre vienen tres formas: *zapatos*, *borceguíes* y *polacos* ó sea de botones, y las pieles empleadas son más frecuentemente el becerro negro, amarillo de distintos tonos, cabritilla ó glacé negro, amarillo y charol.

La horma modelo es la del fabricante HANAN & SON, cuyos zapatos son aquí los más acreditados. El precio de esta marca varía desde $3.25 á $3.75 el par oro americano. Vienen otras marcas con hormas parecidas y pieles imitación, desde $1.75 á $2.50 oro americano, pero no tienen gran acogida.

En calzado para señora y niños predomina la cabritilla glacé, negra con punta de charol y amarilla en todos los tonos del color. Los precios varían mucho, no sólo según tamaño y clase, sino según la fábrica que los exporta.

También se reciben en regular cantidad zapatos llamados *Sport*, de lona blanca, negra ó azul que valen desde $1 hasta $2.50 según la clase.

Uno de los mayores defectos del calzado americano es la tapa de papel barnizado que allá le ponen á la suela para darle mayor vista. Esta tapa se deshace apenas comienza á usarse el calzado y queda al descubierto el pespunte de la suela.

Siendo en los Estados Unido la mano de obra mucho más cara que en México, muy bien pudiera competir nuestro calzado con el americano, si se le llega á dar al nuestro la horma y el bonito aspecto de aquél. Y si en los fletes no se obtuviesen ventajas, por ser casi iguales, nos favorecerían los cambios para llegar á efectuar una buena exportación.

Zapatos para campesinos.—En Cuba hay como cuarenta fábricas de zapatos baratos de suela blanca y amarilla, llamados de vaqueta, siendo sus precios los siguientes: borceguíes de vaqueta, $11.50 docena; borceguíes de lona, $7.50 á $8 docena, y zapatos de vaqueta, á $6.75 docena; vendiéndose al menudeo, de $1.50 á $1.60 los primeros, á $1 los segundos y á $0.80 los de corte bajo.

Por las razones expuestas al comienzo de este Informe acerca de los inconvenientes con que aquí se tropieza para la industria de fabricación de calzado, puede suponerse que la importación de pieles es de muy escasa importancia. Las pocas que se reciben vienen de Francia en su mayor parte, y de Alemania algunas. Todas ellas se reducen á becerros, chagrines, cabritillas y charoles.

La suela para zapatos viene de Cataluña; y la suela de México, planchada y sin planchar, es importada en muy pequeñas cantidades para trabajos de talabartería. Otros renglones importados por los almacenistas de peletería son hules, plumeros, cinturones y alfombras; pero estos artículos serán objeto de informe por separado.

Habana, Agosto 25 de 1902.

El Cónsul.
ARTURO PALOMINO.

LOS PUERTOS.

Están habilitados para la importación y exportación los siguientes puertos:

Habana, Matanzas, Cárdenas, Isabela de Sagua, Caibarién, Nuevitas, Gibara, Baracoa, Guantánamo, Santiago de Cuba, Manzanillo, Santa Cruz, Tunas de Zaza, Trinidad, Cienfuegos y Batabanó.

Además, existen los sub-puertos de Banes, Puerto Padre, Nipe y Samá, que están autorizados para la exportación de frutos y en algunos casos para la importación los que dependen de la Aduana de los puertos habilitados.

EL FERROCARRIL CENTRAL.

Dentro de muy poco tiempo, antes de finalizar el año corriente, estará ya terminada y en explotación la obra magna de un ferrocarril, que recorriendo á Cuba en toda su extensión, de extremo á extremo, permita el viaje rápido, por tierra, desde la Habana hasta las ciudadas más remotas del uno y otro lado de la isla, y una á los pueblos de las diferentes secciones, facilitando las comunicaciones y favoreciendo el desarrollo de la agricultura y demás recursos del país.

Lo que representa esa nueva vía sin esfuerzo lo comprenden los espíritus más limitados; la comunicación fácil y continua, de un extremo á otro de la isla, entre todas las poblaciones de alguna importancia; los transportes abaratados y simplificada la conducción de los productos industriales y agrícolas á los puertos de embarque; la progresiva creación de centros productivos en la proximidad de la vía férrea, suceso que puede descontarse como seguro; la oferta de trabajo en alza, y por consiguiente su remuneración acrecida; el valor de las tierras y de las propiedades urbanas muy superior al actual, por lo menos en al Camaguey y Oriente; la inmensa riqueza agrícola y forestal que está aun inexplotada y que en parte es casi desconocida, adquirirá un incremento que superará á los cálculos más optimistas; la construcción sucesiva de vías transversales que, partiendo de una á otra costa, tengan su término en la línea central, asegurada para un plazo breve; y como consecuencia de esta fecunda transformación, la vida material menos ingrata para las clases laboriosas, la población en aumento y el orden mejor garantido por ser mayores y más numerosos los intereses creados.

Desde el punto de vista político, ó, mejor dicho, social, la importancia que tiene la construcción del Ferrocarril Central es innegable y ha de apreciarse dentro de pocos años. Los países de población relativamente densa y que cuentan con medios de comunicación apropiados y fáciles, no ofrecen terreno propicio para levantamientos y revoluciones; por una parte el poder público dispone en ellos de medios de conservación social más eficaces, debido á la misma facilidad de concentrar rápidamente en un punto dado elementos defensivos y represivos; y por la otra los intereses que crea la riqueza, y que el desorden pone en peligro, y la seguridad de un trabajo remunerador, son factores poderosos de conservación social y valladar casi siempre eficaz contra el éxito de los movimientos sediciosos.

Otro factor que entra en cuenta para dar garantías de sosiego á las clases productoras, es el capital con que ha sido construido el ferrocarril próximo á inaugurarse. Ese capital ha sido suscrito por americanos y por ingleses; y como dice con harta razón Mr. LEROY BEAULIEU, los países que desarrollan su riqueza con el concurso de capitales extranjeros tienen la ventaja de contar con el saludable temor á complicaciones internacionales.

Todos sabemos que la Habana esta unida, hace bastante tiempo á á Santa Clara por los ferrocarriles occidentales.

Pues bien, de esta última ciudad á Santiago—para terminar el mencionado servicio—tenemos la línea de la Cuba Company establecida del siguiente modo, con las distancias respectivas:

	Millas.
Santa Clara á Entronque Sancti-Spíritus	53
Entronque Sancti-Spíritus á Ciego de Avila	43
Ciego de Avila á Puerto Príncipe	63
Puerto Príncipe á Tunas	72
Tunas á Entronque Holguín	49
Entronque Holguín á Entronque Alto Cedro	24
Entronque Alto Cedro á San Luis	30
San Luis á Santiago	20
Total	354

De la Habana á Santa Clara hay 188 millas que sumadas á las 354 que existen de Santa Clara á Santiago hacen un total de 542 ó sean 904 kilómetros.

Ese trayecto, que permitirá ver los exuberantes y montañosos paisajes de esta bella región, las llanuras históricas del Camagüey, los campos de caña de las Villas, el verdor de Matanzas y la tierra roja y fatigada de la provincia habanera, se recorrerá en 26 horas.

El discurso pronunciado por el Señor William Van Horne, Presidente de la Compañía de este Ferrocarril Central, en la noche del 23 de noviembre último, en un banquete que se dió en honor suyo en el Liceo de Puerto Príncipe, es de importancia tan extrema que debe reproducirse íntegramente.

Dice así:

"Siento no poseer suficientemente vuestro idioma para poder expresaros cuanto agradezco el honor que me hacéis esta noche, pero siendo las cosas como son, tendré que rogar á mi amigo y conciudadano, vuestro Alcides Betancourt, que traduzca las frases que os dirijo. He llamado al Señor Betancourt vuestro conciudadano, pero tal vez podría yo decir *mi conciudadano*, puesto que vosotros os habéis dignado hacerme hijo adoptivo de Camagüey—honor que no encuentro palabras suficientes para expresaros cuanto aprecio, y del que espero hacerme algún día merecedor. Como camagüeyano adoptivo siento que ha aumentado en mí, como jamás antes pude sentirlo, el interés por todo aquello que afecte al bienestar de vuestra bella ciudad y siento latir en mí mayores deseos de contribuir á su prosperidad. Me alegro de esta oportunidad para dirigirme á tantos conciudadanos prominentes é influyentes de Puerto Príncipe y tal vez no esté fuera de lugar manifestar á ustedes algo respecto de los propósitos y política de 'The Cuba Company,' de cuyo éxito quizá dependan más intereses que os afectan que ninguno de vosotros pueda imaginarse en estos momentos.

"'The Cuba Company' no es meramente una Compañía de ferrocarriles, ni una sociedad mercantil para el solo objeto de hacer dinero. Es una Compañía de fomento en su más alto grado, y el ferrocarril es simplemente el primer paso dado para realizar sus planes. Fué organizada para atraer grandes capitales que desenvuelvan las grandes riquezas naturales de Cuba y para hacer todo cuanto pueda para propender á que esta Isla sea lo que debe ser, un inmenso y fructífero jardín y el hogar de un gran pueblo próspero y feliz. No pretendo que no hayamos pensado en alguna utilidad para nosotros, ó que no esperemos nuestra recompensa á la larga sobre el capital invertido, pero ese producto no saldrá por medio de gages onerosos ó exigencias desproporcionadas, sino que nuestra retribución nos vendrá por la reconstrucción del país, para llevar á cabo la cual seguiremos una política tan amplia y liberal que confiamos merecer vuestras simpatías y cooperación, pues trabajando en armonía con vosotros lograremos hacer mucho más que de otra manera.

"No veo sino dos obstáculos que podrán propender á retardar el adelanto de Cuba; es el uno el estado algo caótico de la titulación de las tierras en muchas partes de la Isla, asunto que el Gobierno, debemos esperar, propenderá á rectificar, y que espero hará pronto. El otro obstáculo es que vastas áreas de terrenos en Cuba se hallan en manos de, relativamente, un reducido número de individuos, haciendo casi imposible que personas de escasos recursos puedan adquirir fincas para trabajarlas como propiedades suyas.

"'The Cuba Company' ha tomado medidas encaminadas á remover esta cortapisa, comprando muchas miles de caballerías de tierra que serán divididas en pequeñas fincas para ser vendidas á precios bajos y á plazos cómodos á colonizadores, y tengo la esperanza de que muchos de los grandes terratenientes de Cuba se convencerán pronto de que en su propio interés está dividir y vender parte de sus terrenos de la misma manera.

"Estoy seguro de que como resultado de esa operación, el remanente de sus tierras adquirirá pronto mayor valor que todas sus posesiones originales. La posesión general de las tierras por los habitantes de un país es la garantía más certera de un gobierno sano y conservador y siempre trae consigo prosperidad y riqueza.

"Con objeto de disipar todo rumor ocioso respecto de las intenciones de la Compañía hacia esta ciudad, deseo manifestar que el Cuartel General desde donde operará la Compañía y sus talleres centrales serán establecidos permanentemente aquí.

"Esto deberá contribuir á un aumento considerable en la población y riqueza de esta ciudad y las ventajas que reportará aumentarán en importancia á medida que se vayan realizando los planes futuros de la Compañía.

"Esta tarde tuve el gusto de visitar vuestro Casino Campestre y el lugar donde se celebraban vuestras ferias exposiciones.

"Lo que allí ví trajo á mi mente la idea de que esta ciudad debe tomar medidas inmediatas para propender á hacerse el centro de agricultura de Cuba, estableciendo una feria anual de lo mejor, erigiendo edificios adecuados y contribuyendo por medio de los atractivos necesarios al caso y administrándolo todo de una manera amplia y liberal, de modo que no solamente se exhiban en la feria productos de Camagüey sino de otras partes de Cuba y aún de los Estados Unidos, México, Jamaica y otros países. Esto puede hacerse fácilmente y será de resultado positivo, y 'The Cuba Company' se alegrará de hacer cuanto esté á su alcance para propender al éxito de la obra.

"Me propongo pasar un tiempo considerable todos los años aquí en esta ciudad y estoy siempre á vuestra disposición, tratándose de cualquier asunto en que yo pueda seros útil.

"Os doy nuevamente las gracias por el honor que me hacéis esta noche."

COMERCIO DE LA ISLA DE CUBA DURANTE LA OCUPACIÓN AMERICANA.

El último cuaderno que comprende el período entre el 1° y el 19 de mayo de este año, que publica la Secretaría de la Guerra de Washington, trae un resumen general del comercio de la isla durante los tres años, cuatro meses y diecinueve días que duró la ocupación militar, del cual extractamos los siguientes datos:

El valor total de las mercancías, con exclusión del oro y la plata acuñada, importada en Cuba durante la ocupación de los Estados Unidos, ascendió á 225,437,135 pesos, de los cuales el 74 por ciento se recibió por el puerto de la Habana, siguiendo Cienfuegos con 9 por ciento y Santiago de Cuba con 8 por ciento, de cuyos puertos se hallan á considerable distancia todos los demás.

En las exportaciones se halla la Habana á la cabeza, con 59 por ciento del valor total; Cienfuegos, Cárdenas, y Matanzas representan, en junto, el 25 por ciento siendo mucho menores las de los demás puertos. El valor total de las exportaciones, exclusive del oro y plata acuñada, es de $180,609,067 ó sea cerca de $45,000,000 menos que las importaciones, debiendo atribuirse esa diferencia á la destrucción de propiedades y daños ocasionados á las industrias agrícolas por la guerra.

De las importaciones procedió el 43 por ciento de los Estados Unidos, 15 por ciento de España, 15 por ciento de Inglaterra, 4½ por ciento de Francia, 4 por ciento de Alemania, y 2½ por ciento de los demás paises, en junto 41 por ciento, casi tanto como las de los Estados Unidos, las importaciones de Europa.

En las exportaciones resulta lo contrario, pues el 75 por ciento fué á los Estados Unidos, 9 por ciento á Inglaterra, 75 por ciento á Alemania, 2½ por ciento á Francia y 2 por ciento á España; el total de las exportaciones á Europa fué de 22 por ciento, consistente principalmente en tabaco en rama y torcido, esponjas, miel de abejas, fibras textiles, cera y aguardiente, mientras que casi todo el azúcar exportado fué á los Estados Unidos.

La balanza comercial entre Cuba y los Estados Unidos durante la ocupación militar ha sido decididamente en favor de la primera, aunque no tan grande como en años anteriores; aunque Cuba ha importado durante ese período mercancías cuyo valor excedió en 45,000,000 pesos al de las que exportó, vendió á los Estados Unidos productos cuyo valor superó en unos 37,000,000 pesos al de las mercancías que les compró; se ha notado, sin embargo, que el promedio anual de las importaciones americanas en Cuba fué sensiblemente mayor que cuando estaba la isla bajo el dominio de España. Un hecho digno de mención es que el comercio de los Estados Unidos no ha progresado en ningún país latino-americano en las maravillosas proporciones que ha tenido en las demás partes del mundo.

"Más del 69 por 100 de las exportaciones de Cuba fué de productos agrícolas y el 47 por 100 de las importaciones consistió en sustancias alimenticias y ganado. Procedieron principalmente de los Estados Unidos cereales y otras provisiones, caballos y mulos, mientras que el ganado vacuno vino de México, Centro y Sur América, y es racional suponer que de aquí en adelante irá disminuyendo gradualmente la importación de ganado.

"El año 1901 fué indudablemente el en que mayor desarrollo tuvo el comercio de Cuba durante el período de la ocupación americana, y por este motivo es el que más frecuentemente se menciona; las importaciones en el citado año tuvieron un valor de $66,583,973 ó sea $75,000 y $200,000 menos que en 1900 y 1899 respectivamente, mientras que las exportaciones subieron á $63,278,380, superando en 14 y 18 millones respectivamente, á las de los dos años anteriores. En el citado año, las exportaciones á los Estados Unidos aumentaron en 15 millones y disminuyeron en $500,000 á las de los demás países.

"Los dos principales productos de Cuba son, según se sabe, el azúcar y el tabaco, habiéndose exportado durante el período de la ocupación americana 1,400,000 toneladas del primero y por valor de $25,000,000 del segundo, en rama y elaborado, resultando por primera vez en 1900, que el valor del tabaco exportado excediera al del azúcar.

"Las demás exportaciones de Cuba en 1901 comprenden, maderas por $1,200,000; miel de purga, $1,200,000; frutas, $1,000,000; minerales de hierro y manganeso, $900,000; y esponjas, $480,000.

"Entre las industrias que están llamadas á adquirir en Cuba un enorme desarrollo figura en primer término la crianza de ganado vacuno, caballar y porcino, que estaba bastante floreciente antes de la guerra y que ha desaparecido casi por completo á causa de la misma; pero tardará poco en adquirir proporciones mayores que las que jamás ha tenido, pues con sus inmensos prados alfombrados de yerbas en todas estaciones que constituyen un alimento sano y abundante para el ganado mayor, los palmiches de las palmas para los cerdos y aguas abundantes y cristalinas para ambos, Cuba es el país ideal soñado por los criadores de ganado.

CHILE.

CONCESIÓN PARA LA CONSTRUCCIÓN DE UN FERROCARRIL AÉREO.

Por decreto presidencial se ha dispuesto lo siguiente:

1°. Concédese sin perjuicio de tercero á Don J. N. PEAKE, por los Señores W. R. GRACE y CÍA., el permiso que solicita para construir un ferrocarril aéreo que una la quebrada de Zapiga, en el Departamento de Pisagua, con un punto situado al sur de dicha quebrada, en una extensión de dos mil setenta metros.

2°. Caducará el permiso si no se iniciaren los trabajos dentro del plazo de seis meses corridos desde la fecha del presente decreto y si no se terminare la construcción en el término de dos años.

3°. Si el ferrocarril hubiere de trasportar pasajeros ó mercaderías pertenecientes á otros propietarios, las tarifas deberán ser aprobadas por el Gobierno.

4°. El Gobierno ejercerá las atribuciones que le confiere la ley de policía de ferrocarriles de 6 de agosto de 1862, cuyas prescripciones cumplirá también en todas sus partes el concesionario.

5°. El concesionario recurrirá al Ministerio de Hacienda para los efectos del permiso para usar los terrenos fiscales necesarios para la vía, estaciones y demás dependencias, y á fin de que se determine el plazo dentro del cual pueda hacer uso de dichos terrenos.

6°. En todas aquellas partes donde se encuentre salitre en el terreno, el concesionario deberá trasladar la línea á otro lugar vecino, sin gravamen alguno para el Fisco ó para el que haya adquirido derecho sobre él.

7°. Apruébanse los planos presentados por el concesionario para la construcción del ferrocarril indicado.

8°. Redúzcase el presente decreto á escritura pública, que firmarán el Director del Tesoro, en representación del Fisco, y los señores W. R. GRACE Y CÍA., ó su representante debidamente autorizado.

ESTADOS UNIDOS.

COMERCIO CON LA AMÉRICA LATINA.

IMPORTACIONES Y EXPORTACIONES.

En la página 1639 aparece la última relación del comercio entre los Estados Unidos y la América latina, tomada de la compliación hecha por la Oficina de Estadística del Departamento de Hacienda de los Estados Unidos. Estos datos se refieren al valor del comercio arriba mencionado. La estadística corresponde al mes de octubre de 1902, comparada con la del mes correspondiente del año anterior, y también comprende los datos referentes á los diez meses que terminaron en octubre de 1902, comparados con igual período de 1901. Debe explicarse que la estadística de las importaciones y exportaciones de las diversas aduanas referente á un mes cualquiera, no se recibe en al Departamento de Hacienda hasta el 20 del próximo mes, necesitándose algún tiempo para su compilación é impresión, de suerte que los datos estadísticos correspondientes al mes de octubre, por ejemplo, no se publican sino en diciembre.

GUATEMALA.

CONTRATO CELEBRADO ENTRE EL SUBSECRETARIO GENERAL DEL GOBIERNO, ENCARGADO DEL MINISTERIO DE FOMENTO, Y MR. JAMES McNAUGHT, PRESIDENTE DE "THE CENTRAL AMERICAN IMPROVEMENT COMPANY, INCORPORATED," PARA REPARAR, CONSTRUIR, EXPLOTAR Y CONSERVAR EL FERROCARRIL DEL NORTE, MODIFICANDO LOS AJUSTADOS EN 31 DE AGOSTO Y 28 DE NOVIEMBRE DE 1900.

Palacio del Poder Ejecutivo,
Guatemala, 23 de octubre de 1902.

El Presidente Constitucional de la República,

En virtud de la autorización que tiene concedida por la Asamblea Nacional Legislativa, acuerda:

Autorizar, á su vez, al Subsecretario General del Gobierno, Encargado del Ministerio de Fomento, para que, conforme á las instrucciones que se le han comunicado, celebre con el representante de la Compañía "The Central American Improvement Company, Incorporated" un contrato modificando los ajustados el 31 de agosto y el 28 de noviembre de 1900 para reparar, construir, explotar y conservar el Ferrocarril del Norte.

Comuníquese:

Estrada C.

Por impedimento del Subsecretario General del Gobierno, Encargado del Ministerio de Fomento, el Ministro de Gobernación y Justicia,

Juan J. Argueta.

José Flamenco, Subsecretario General del Gobierno, Encargado del Ministerio de Fomento, con autorización é instrucciones del Señor Presidente de la República, por una parte, y

James McNaught, Presidente de "The Central American Improvement Company, Incorporated," con plenos poderes de la expresada Compañía, por la otra, en el deseo de que los contratos de 31 de agosto y de 28 de noviembre de 1900 sean llevados á cabo, han celebrado el contrato que sigue:

"Artículo 1°. El término para la conclusión del Ferrocarril del Norte, desde el rancho de San Agustín hasta la ciudad de Guatemala, se prorroga, por este convenio, hasta el día 30 de diciembre del año de 1904.

"Art. 2°. El Gobierno de Guatemala concede á "The Central American Improvement Company, Incorporated," el plazo comprendido desde esta fecha hasta el 30 de diciembre de 1904, para que pueda escoger en los terrenos de "Los Andes" las 500 caballerías á que se refiere el artículo 8° del contrato de 31 de agosto de 1900, siendo de advertir que si la empresa comenzare desde luego la explotación de dichos terrenos, el predio en que así lo haga se considerará como parte de las 500 caballerías ya mencionadas.

"ART. 3°. La Compañía contratista podrá, cuando lo juzgue conveniente, cambiar la casa bancaria en donde se depositen los bonos á que se contrae el artículo 3° del convenio de 31 de agosto de 1900, con aprobación previa del Poder Ejecutivo de la República de Guatemala. Dichos bonos serán entregados por el Gobierno á la Compañía cuando el Ferrocarril haya llegado á Sanarate.

"ART. 4°. Si el Gobierno de Guatemala no pagare el capital y los intereses el 8 de diciembre de 1910, y tampoco lo hiciere después de terminadas las prórrogas á que se refieren los artículos 3° y 13° del contrato de 31 de agosto y 5° del de 28 de noviembre de 1900, la Compañía podrá retener las propiedades citadas en éste y en los convenios ya mencionados; pero pagándosele los intereses vencidos, concederá una prórroga de diez años, debiéndosele satisfacer, anualmente, el mismo interés de 6 por ciento ya fijado.

"ART. 5°. La Compañía tiene derecho de subhipotecar las propiedades expresadas en este contrato; pero con las mismas condiciones y limitaciones estipuladas en el convenio de 31 de agosto de 1900.

"ART. 6°. El Gobierno garantiza que en esta fecha el Ferrocarril del Norte, los terrenos donde está construído y donde se construirá, los desvíos, estaciones, máquinas, carros y demás útiles y enseres y el muelle de Puerto Barrios, no tienen gravamen alguno, ni están afectos al pago de deudas internas ni externas, ni tienen impuestos fiscales ni municipales.

"ART. 7°. La Compañía deberá comprar á precio de costo, desde esta fecha hasta el 30 de diciembre de 1903, las locomotoras, rieles, carros, durmientes y demás materiales de uso exclusivo para ferrocarriles y de que el Gobierno dispone en esta capital.

"ART. 8°. Si surgiere cuestión ó duda alguna acerca de la interpretación ó cumplimiento de este contrato ó de los ya vigentes entre ambas partes, serán sometidas á arbitramento en el modo y forma estipulados en los artículos 16° y 31° del contrato de 31 de agosto de 1900.

"ART. 9°. Ambas partes declaran que no tienen reclamo alguno que hacerse por las omisiones ó faltas en que pudiera haberse incurrido con anterioridad á la fecha de este contrato.

"ART. 10. Los contratos de 31 de agosto y de 28 de noviembre de 1900 quedan en toda su fuerza y vigor, exceptuándose las modificaciones sufridas en virtud de este convenio.

"En fe de conformidad firmamos dos ejemplares de un tenor, en Guatemala, á veintitrés de octubre de mil novecientos dos.

"JOSÉ FLAMENCO.

"JAMES MCNAUGHT."

DECRETO NÚMERO 629.

MANUEL ESTRADA CABRERA, Presidente Constitucional de la República de Guatemala, considerando:

Que el contrato celebrado hoy entre el Licenciado Don JOSÉ FLAMENCO, Subsecretario General del Gobierno, Encargado del Ministerio de Fomento, y Mr. JAMES MCNAUGHT, como Presidente de la Compañía "The Central American Improvement Company, Incorporated", modificando los ajustados el 31 de agosto y 28 de noviembre de 1900, está conforme á las instrucciones que para el efecto se le comunicaron; y, que tales modificaciones, en nada alteran la esencia de los primitivos, convenios, sino que, por el contrario, facilitan la ejecución de ellos para el pronto término de aquella magna obra; Por tanto: En uso de las facultades de que estoy investido, y en Consejo de Ministros, decreto:

ARTÍCULO ÚNICO. Se aprueba el contrato de que se ha hecho mérito, modificando los celebrados entre el Secretario de Estado en el Despacho de Fomento y Don RICARDO BARTHEL, con fechas 31 de agosto y 28 de noviembre de 1900, para reparar, construír, explotar y conservar el Ferrocarril del Norte.

Dado en el Palacio del Poder Ejecutivo, á los veintitrés días del mes de octubre de mil novecientos dos.

MANUEL ESTRADA C.

El Secretario de Estado en el Despacho de Relaciones Exteriores:

JUAN BARRIOS M.

El Secretario de Estado en el Despacho de Hacienda y Crédito Público:

GUILLERMO AGUIRRE.

El Secretario de Estado en el Despacho de la Guerra:

LUIS MOLINA.

El Secretario de Estado en el Despacho de Instrucción Pública:

J. A. MANDUJANO.

El Secretario de Estado en el Despacho de Gobernación y Justicia:

JUAN J. ARGUETA.

MÉXICO.

CONTRATO PARA EXPLOTACIÓN DE MADERAS.

La Secretaría de Fomento acaba de otogar una concesión al Sr. J. Ed. PLUMER, para la explotación de maderas en una porción de terreno nacional ubicado en el Partido de Peto, del Estado de Yucatán.

Conforme al contrato respectivo, el Sr. PLUMER queda autorizado para la explotación de maderas de caoba, cedro, de tinte y de construcción, y la extracción de gomas y resinas en una extensión de 216,936 hectáreas en el citado Partido de Peto.

La duración del contrato será de diez años.

El concesionario pagará como precio del arrendamiento:

I. La cuota de un peso cincuenta centavos en efectivo, por cada árbol de caoba ó cedro que corte ó se proponga cortar.

II. La cuota de cincuenta centavos por cada árbol de madera de construcción.

III. La cuota de un peso por tonelada de leña.

IV. La cuota de dos pesos por cada tonelada de palo de tinte ó de otras maderas tintoreales.

V. La cuota de diez y ocho pesos por tonelada de chicle.

VI. La cuota de veinticuatro pesos por tonelada de hule.

VII. La cuota de un peso anual por hectárea de terreno que dedique al cultivo.

VIII. La cuota de cincuenta centavos anuales por cabeza de ganado que paste en la zona.

IX. La cuota de doce centavos anuales por cada hectárea que dedique á la explotación.

Todas estas cuotas se pagarán adelantadas en la Jefatura de Hacienda del Estado de Yucatán, previo el aviso que dará á la Agencia de tierras en el mismo Estado al principiar cada año natural, en el cual aviso ha de constar el número de hectáreas que desee someter á la explotación, el número de árboles que el concesionario se proponga cortar en el transcurso del año y la cantidad de gomas y resinas que pretenda extraer.

El concesionario queda obligado á someter á la explotación una superficie mínima de veintidós mil hectáreas durante los dos primeros años del contrato, y veintidós mil más durante los dos años subsecuentes y treinta mil más en cada uno de los restantes.

YACIMIENTOS DE CARBÓN.

En Durango reina en estos momentos mucho entusiasmo, por haberse descubierto en un punto llamado El Gallo, perteneciente al Partido de Nazas, unos yacimientos de carbón de piedra.

El descubrimiento lo efectuaron dos ingenieros venidos de Pennsylvania, quienes aseguran que el carbón es de suprema calidad, y creen que existe en grandes cantidades.

Los peritos están dedicados en estos momentos á una serie de reconocimientos del terreno, practicando á la vez sondeos en las partes en que encontraron ya el carbón, para ver si en efecto las capas de la hulla descienden á varios metros de profundidad como ellos suponen.

EL NACASCOLO Ó CASCALOTE.

[De "El Progreso" de México.]

Divididivi es el nombre comercial en Europa de los frutos del *Cæsalpinia pulcherrima* (cascalote), leguminosa indígena de la América tropical, de las Indias Occidentales y México, hasta el Norte del Brasil, Venezuela y Colombia. Este árbol se cultiva en otras regiones tropicales, pero en general en pequeña cantidad, excepto en las Indias, donde su cultivo ha adquirido alguna extensión. Las vainas de esta planta contienen una fuerte cantidad de tanino, y sirven como sucedáneo de la nuez de agallas, mezcladas en general con otros cuerpos taníferos. Hacen el cuero blando y de color rojo obscuro.

Uno de los grandes mercados para el cascalote es Hamburgo, á donde se importaron:

	Marcos.		Marcos.
En 1893	1,761,090	En 1898	1,195,310
En 1894	1,170,230	En 1899	1,639,410
En 1895	988,080		
En 1896	1,532,250	Total	9,957,240
En 1897	1,670,870		

En Venezuela y Colombia, Maracaibo, Río Nacho y Sabanilla son los principales puertos de embarque del cascalote. El precio de los 100 kilos de cascalote en los veinte años ha variado, según los promedios del "Hamburger Seeinfurg," de 20 á 22 marcos.

Como el cultivo del cascalote es sumamente fácil, el producto de los árboles considerable, y según la estadística anterior, las necesidades grandes y constantes, parece conveniente dedicar más atención á esa planta. El cultivo de ésta debe ser un cultivo popular, y puede hacerse como accesorio del cultivo del café ó del henequén.

Haremos algunas indicaciones sobre el cultivo del cascalote, siguendo los datos que nos proporciona un cultivador de Ceylán.

El dividivi crece desde el nivel del mar hasta una altitud de 2,500 pies. Fructifica al cabo de cinco á seis años según las condiciones del suelo y del clima, y desde ese momento aumenta su producto hasta que tiene veinticinco años.

Puede emplearse este árbol como porta-sombra ó cortaviento.

La propagación se hace por semillas. Se prepara una tabla de 3 á 4 pies de ancho y de longitud variable. Si el terreno es pobre, es necesario mezclarle abono bien podrido, en una proporción de 2 á 1. Las semillas se depositan á 8 centímetros de distancia unas de otras, y se tapan con una capa de tierra de 1 centímetro de espesor. Se debe poner sombra á la tabla, cuando menos durante la parte más caliente del día, y si no llueve mucho se ha de tener húmeda la tierra por medio de riegos hechos en la tarde. Las plantitas aparecen al cabo de unos diez días; entonces se empieza á quitar la sombra, y se acaba de quitar cuando las plantitas tienen 15 centímetros de altura. Desde este momento no son ya necesarios los riegos, si el tiempo no es muy seco y caliente. Cuando las plantas tienen 30 centímetros de altura, se arrancan con el cuidado con que se arrancan todos los árboles ó arbustos de hojas persistentes, y se les lleva al lugar donde deben quedar definitivamente, dejando entre ellas una distancia de 4 metros á 4 metros y 50 centímetros, en todas direcciones. Si el trasplante se hace en tiempo seco, es necesario regar las plantitas todos los días hasta que estén bien enraizadas. Se les pondrá una sombra de ramas clavadas cerca del pie, durante los tres primeros meses.

Los cuidados que se ha de dar á la plantación consisten en quitar las malas yerbas, hasta que los árboles den la suficiente sombra para hacer inútil ese trabajo. Este momento coincide generalmente con el en que la planta comienza á dar sus frutos. La cosecha es muy sencilla; se recogen las legumbres cuando tienen un color gris oscuro; se secan al sol y se encostalan.

LAS MINAS DEL MEZQUITAL.

Se han publicado importantes datos acerca de las minas del Mezquital, que constituyen una de las negociaciones más productivas con que cuenta el país.

Esta negociación está situada en terrenos pertenecientes al Estado de Zacatecas, sobre las montañas que dan origen al río Mezquital. Comprende, además de las concesiones mineras, el local de la batería, concesiones de agua que se van aumentando cada vez más, y 162 hectáreas de terrenos boscosos de bastante valor.

Situada inmediatamente después de los edificios de la compañía, debajo de éstos se encuentra la población de Mezquital del Oro, que tiene 2,500 habitantes, incluidos en éstos los trabajadores de las minas y sus familias.

Las instalaciones de la negociación comprenden una excelente batería de 50 mazos y toda la herramienta necesaria para el trabajo. Las minas constan de varias vetas ó filones; pero la explotación hasta hoy se ha concretado al filón principal, que atraviesa las concesiones de la Compañía en toda su longitud, ó seá en más de 3½ kilómetros. Este filón tiene una potencia media de un metro cincuenta y dos centímetros, con una ley muy poco inferior á 23.325 gramos de oro por tonelada, de la cual no se recoge actualmente sino el 60 por ciento por amalgamación. Aunque poco elevada, esta ley se ha mantenido constantemente, durante el tratamiento de millares de toneladas.

Hasta ahora, las utilidades provienen del tratamiento del mineral que tiene esta ley, pero se tienen grandes esperanzas de que las explotaciones ulteriores harán que se descubra mineral más rico.

Los otros filones de las minas tienen una extensión y una importancia considerables. Sin embargo, no se piensa por ahora en su explotación, en virtud de que la veta principal puede suministrar todavía cantidades de mineral casi ilimitadas.

El sistema de exportación de éstas es de los más sencillos y económicos, puesto que el acarreo interior, la extracción y el desagüe, no exige ninguna fuerza mecánica, porque todo el mineral se transporta á la batería por el socavón de San Miguel, que es la vía de nivel más baja para la extracción. Ese socavón penetra la montaña en una longitud de 610 metros, y su entrada está situada aproximadamente á 9 metros arriba del nivel del río.

Las minas distan de Guadalaxara 129 kilómetros, de donde reciben todas las provisiones que se necesitan para los trabajos y para las necesidades de los habitantes de Mezquital del Oro.

SALVADOR.

LIBRE IMPORTACIÓN DE MAQUINARIA PARA MOLINOS DE HARINA.

El Poder Ejecutivo, considerando que es un deber del Gobierno procurar el progreso y adelanto del país; que todo lo que se haga en favor de la industria agrícola redundará siempre en beneficio y bienestar del pueblo; que se hace necesario fomentar, de una manera positiva, la siembra del trigo, cereal que deberá ser de gran importancia para los agricultores de la República, dada la enorme importación de harinas extranjeras; que el trigo se produce con muy buen éxito en diferentes zonas del país, y que la falta de empresas molineras es la causa del abandono de esta industria, la cual ha sido antes fuente de riqueza de gran importancia en El Salvador; por tanto, en uso de sus facultades, decreta:

Artículo 1°. Se permite á los nacionales la importación, libre de derechos é impuestos municipales y de aduana, establecidos ó que en lo sucesivo se establézcan, para toda clase de motores hidráulicos ó de vapor y sus accesorios, molinos completos para elaborar harina flor, máquinas de desgranar, lavar y limpiar cereales, fajas, ejes, chumaceras, etc.

Art. 2°. El que montare un molino para hacer harina flor de trigo ó maíz, con toda la maquinaria completa para moler, cerner y empacar de 10 á 25 quintales de harina en diez horas de trabajo, tendrá derecho á que el Supremo Gobierno le permita, por una sola vez y por vía de prima, la importación, libre de toda clase de derechos é impuestos, hasta de mil quintales de trigo. Si la empresa molinera llega á producir cincuenta quintales en diez horas de trabajo, el empresario podrá importar, libres de toda clase de derechos é impuestos, hasta dos mil quintales de trigo; y si la empresa llegare á producir cien quintales en el mismo tiempo de trabajo, podrá importar, mediante la misma franquicia, hasta cuatro mil quintales de trigo.

"ART. 3°. El que quisiere montar empresas harineras de mayor tamaño, deberá presentar por escrito su solicitud á la Junta Central de Agricultura, para obtener mayores franquicias que las establecidas en el artículo anterior, y esta Corporación resolverá lo que tuviere por conveniente, quedando, desde luego, fuera de las condiciones, del presente decreto el exceso que sobre tales franquicias pretendan obtener los interesados.

"Art. 4°. Toda persona que en virtud de las concesiones otorgadas en el presente decreto, importase trigo, libre de derechos é impuestos, estará en la obligación extricta de entregar en el mes de abril á la Junta Central de Agricultura, un quintal por cada cien quintales de trigo que haya importado al país, el cual debe ser propio para semilla, es decir, que debe venir en espiga, y si fuere posible, producido en climas cálidos.

"ART. 5°. Toda persona que se dedique á la siembra del trigo y compruebe con atestados de las Juntas ó Comisiones de Agricultura de su respectiva comprensión, que ha cosechado diez quintales de trigo, listo y limpio para moler, tendrá derecho á que la Junta Central le extienda una constancia para obtener de quien corresponda y sin ninguna retribución, la boleta de exoneración del servicio militar durante un año, siguendo siempre las formalidades establecidas en el decreto de 2 de octubre de 1899.

"Dado en el Palacio del Ejecutivo: San Salvador, á primero de agosto de mil novecientos dos."

TRATADO DE ARRITRAJE CON ESPAÑA.

TOMÁS REGALADO, Presidente de la República de El Salvador, por cuanto:

La Asamblea Nacional de la República, por decreto fecha 19 de abril anterior, ha ratificado el Tratado de Arbitraje Obligatorio, concluido en la ciudad de México el 28 de enero del corriente año, entre la República de El Salvador y el Reino de España, por medio de sus Plenipotenciarios Excelentísimos Señores Doctor Don FRANCISCO A. REYES y el Marqués de PRAT DE NAUTONILLET, respectivamente, cuyo Tratado se compone de un preámbulo y cinco artículos, como sigue:

El Enviado Extraordinario y Ministro Plenipotenciario de la República de El Salvador en México, y el Enviado Extraordinario y Ministro Plenipotenciario de Su Majestad Católica en los Estados Unidos Mexicanos, debidamente autorizados por sus respectivos Gobiernos para celebrar *ad referendum* un Tratado de Arbitraje, con el propósito de que ambos Estados resuelvan pacíficamente toda cuestión que pudiera alterar las relaciones de buena amistad que felizmente existen entre ambas naciones, han convenido en los siguientes artículos:

ARTÍCULO I. Las Altas Partes Contratantes se obligan á someter á juicio arbitral, todas las controversias de cualquier naturaleza que por cualquier causa surgieren entre ellas, en cuanto no afecten á los preceptos de la Constitución de uno ú otro país, y siempre que no puedan ser resueltas por negociaciones directas.

ART. II. No pueden renovarse, en virtud de este Convenio, las cuestiones que hayan sido objeto de arreglos definitivos entre ambas Altas Partes. En tal caso, el Arbitraje se limitará exclusivamente á las cuestiones que se susciten sobre validez, interpretación y cumplimiento de dichos arreglos.

ART. III. Para la decisión de las cuestiones que, en cumplimiento de este Convenio, se sometieren á arbitraje, las funciones de árbitros serán encomendadas, con preferencia, á un Jefe de Estado de una de las Repúblicas hispano-americanas, ó á un Tribunal formado por Jueces y Peritos españoles, salvadoreños ó hispano-americanos.

En caso de no recaer acuerdo sobre la designación de Árbitros, las Altas Partes signatarias se someterán al Tribunal Internacional permanente de Arbitraje, establecido conforme á las resoluciones de la Conferencia de La Haya de 1899, sujetándose, en este y en el anterior caso, á los procedimientos arbitrales especificados en el Capítulo III de dichas resoluciones.

ART. IV. El presente convenio permanecerá en vigor durante diez años, contados desde la fecha del canje de sus ratificaciones.

En caso de que, doce meses antes de cumplirse dicho término, ninguna de las Altas Partes Contratantes hubiere declarado su intención de hacer cesar los efectos del presente convenio, continuará siendo éste obligatorio hasta un año después de que una ú otra de las Altas Partes signatarias lo hubiere denunciado.

ART. V. Este convenio será sometido por los infrascritos á la aprobación de sus respectivos Gobiernos, y si mereciere su aprobación y fuere ratificado, según las leyes de uno y otro país, se canjearán las ratificaciones en la ciudad de San Salvador, en el término de un año, contado desde la fecha.

En fe de lo cual, los plenipotenciarios lo han firmado y sellado á los veintiocho días del mes de enero del año de mil novecientos dos.

[L. S.] FRANCISCO A. REYES.
[L. S.] El Marqués de PRAT DE NAUTONILLET.

Por tanto: Procédase al canje de las ratificaciones. Dado en San Salvador, á 16 de septiembre de 1902.

T. REGALADO.
FRANCISCO A. REYES.

URUGUAY.

EXPORTACIÓN POR EL PUERTO DE MONTEVIDEO EN LOS PRIMEROS NUEVE MESES DE 1902.

[Del "Revista Financiera y Comercial."]

En sus detalles la estadística de la exportación por el puerto de Montevideo en las primeros nueve meses de 1902 consigna las cifras siguientes:

Salieron de dicho puerto 848 vapores y 84 buques de vela, que llevaron las siguientes cantidades de productos del país:

Cueros vacunos secos.—776,444, de los cuales: á los Estados Unidos, 499,030; Italia, 46,137; Francia, 16,198; Portugal, 55,323; España, 47,573; Bélgica, 24, 531; Alemania, 54,840; órdenes, 3,007; Inglaterra, 6,659; Brasil, 23,096.

Cueros vacunos salados.—504,412, de los cuales: á Alemania, 138,997; Francia, 192,660; Bélgica, 155,823; Estados Unidos, 54,115; Inglaterra, 13,480; España, 1,100; Brasil, 3,578; órdenes, 26,952; Holanda, 7,707.

Cerda.—1,329 fardos, de los cuales: á Francia, 371; Bélgica, 147; Italia, 126; Alemania, 81; Estados Unidos, 486; Portugal, 14; Inglaterra, 103; España, 1.

Lana.—56,481 fardos, de los cuales: á Francia, 14,698; Inglaterra, 5,666; Bélgica, 13,050; Alemania, 20,383; Italia, 1,170; Estados Unidos, 151; Brasil, 348; Portugal, 10; España, 5.

Cueros lanares.—6,424 fardos, de los cuales: á Francia, 5,430; Italia, 395; Brasil, 4; Bélgica, 38; Alemania, 62; Inglaterra, 194; Portugal, 227; Estados Unidos, 66; España, 8.

Cueros varios.—23 fardos, de los cuales: 17 á Francia; 6 al Brasil.

Tasajo.—369,162 fardos y 2,063 toneladas; de éstos, al Brasil 253,898 fardos; á Cuba, 97,974 fardos y 2,063 toneladas; Portugal, 930 fardos; á los Estados Unidos, 6,820 fardos; Inglaterra, 2,518 fardos; España, 2,174 fardos; Alemania, 595 fardos; á las Indias Occidentales, 740 fardos; Chile, 874 fardos; Italia, 100 fardos; Francia, 2,359 fardos.

Sebo.—11,378 pipas y 14,948 bordalesas, de las cuales: á España, 2,018 pipas y 1,922 bordalesas; Italia, 2,907 pipas y 149 bordalesas; Chile, 708 pipas y 340 bordalesas; Francia, 504 pipas y 926 bordalesas; Brasil, 2,300 pipas y 5,757 bordalesas; Portugal, 1,145 pipas y 96 bordalesas; Inglaterra, 1,756 pipas y 5,658 bordalesas; á órdenes, 100 bordalesas y 40 pipas.

Alpiste.—7,460 bolsas, de las cuales: al Brasil, 5,764; á las Indias Occidentales, 50; á España, 692; á Chile, 745; á Francia, 309.

Harina.—113,269 bolsas, de las cuales: al Brasil, 108,905; á Chile, 2,491; á órdenes, 1,006; á las Islas Malvinas, 367; á Inglaterra, 500.

Afrecho.—41,241 bolsas y 211 toneladas, de las cuales: á Chile, 32 bolsas; á las Indias Occidentales, 50 bolsas; al Brasil, 2,351 bolsas; á Alemania, 38,387 bolsas y 211 toneladas; á Bélgica, 421 bolsas.

Afrechillo.—139 bolsas, de las cuales: á órdenes, 46; á las Islas Malvinas, 93.

Lino.—3,970 bolsas y 17 toneladas, de las cuales: 17 toneladas á Alemania; 50 bolsas al Brasil; 3,920 bolsas á Francia.

Maíz.—40,870 bolsas, de las cuales: á Inglaterra, 15,658 bolsas; Chile, 2,383 bolsas: á las Islas Malvinas, 497 bolsas; Brasil, 10,740 bolsas; órdenes, 8,554 bolsas; España, 162 bolsas; Indias Occidentales, 100; Italia, 150 bolsas; Bélgica, 2,626 bolsas.

Trigo.—143,216 bolsas y 4,818 toneladas, de las cuales: á Italia, 14,314 bolsas y 942 toneladas; á Chile, 740 bolsas; á Inglaterra, 212 toneladas y 17,598 bolsas; á Bélgica, 4,000 bolsas; al Brasil, 96,003 bolsas y 364 toneladas; á Francia, 4,197 bolsas; á órdenes, 60 bolsas; á Holanda, 2,900 toneladas; á Alemania, 400 toneladas y 6,291 bolsas; á España, 13 bolsas.

Cebada.—1,583 bolsas á Bélgica, y 70 toneladas á Inglaterra.

Huesos y ceniza.—13,408 bolsas y 9,162 toneladas, de las cuales: á Francia, 12,786 bolsas y 365 toneladas; al Brasil, 11 bolsas; á los Estados Unidos, 3,717 toneladas; á Italia, 222 toneladas; á Bélgica, 611 bolsas; á Alemania, 1,924 toneladas.

Lenguas.—9,805 cajones, 5,765 cascos y 16 bordalesas, de los cuales: á Bélgica, 503 cascos y 5,193 cajones; á Inglaterra, 3,862 cajones y 5,152 cascos; al Brasil, 750 cajones, 10 cascos y 16 bordalesas; á los Estados Unidos, 100 cascos.

Caballos.—9, de los cuales: 5 á las Indias Occidentales; 2 á Inglaterra; 2 al Brasil.

Mulas.—307, de las cuales: 125 á las Indias Occidentales; 182 al Brasil.

Toros.—51, de los cuales: 1 al Brasil; 50 á Inglaterra.

Animales vacunos.—3 al Brasil y 314 á España.

Ovinos.—5,231 al Brasil; 148 á España; 300 á Francia.

Cerdos.—150 al Brasil.

Extracto de carne.—17 cajones, de los cuales: 13 al Brasil; 4 á Chile.

Grasa.—125 bordalesas, 1,215 cajones, 424 fardos, 387 cuarterolas, 200 cascos, 143 pipas, de los cuales: 125 bordalesas, 1,175 cajones, 387 cuarterolas, 200 cascos y 143 pipas á Chile; 424 fardos á Inglaterra, 40 cajones á España.

Tripas.—210 fardos, 603 cascos, 69 bordalesas, 47 tercerolas, de los cuales: 158 fardos á España; 1 fardo y 81 cascos á Francia; 51 fardos al Brasil; 5 cascos y 47 tercerolas á Alemania; 487 cascos á Bélgica; 69 bordalesas á Holanda; 30 cascos á Inglaterra.

Pasto.—2,129 fardos, de los cuales: al Brasil, 2,039; á Inglaterra, 56; á las Indias Occidentales, 34.

Astas.—754,921 unidades, de las cuales: á Francia, 271,442; á los Estados Unidos, 254,921; á Italia, 137,804; á órdenes, 40,014; á Bélgica, 50,000.

Carne líquida.—41 cajones, de los cuales: á Inglaterra, 10; á España, 31.

Carne conservada.—199 cajones, de los cuales: á Portugal, 116; á Inglaterra, 53; al Brasil, 30.

VENEZUELA.

MODIFICACIONES AL ARANCEL DE ADUANAS.

I.—Rectificación de errores de copia en la ley de 19 de mayo de 1902, estableciendo el Arancel de importación.

["Gaceta Oficial" de 30 de junio de 1902, número extraordinario.]

Esta ley se reimprime por haber salido con errores de copia en la edición de fecha 18 del corriente mes.

Los errores de que se trata son los siguientes:

Las partidas n^os^ 507, 508, y 509 no deben comprenderse en la octava clase, sino en la novena, con los n^os^ 521, 522, y 523, modificándose en su consecuencia la numeración de las partidas 510 y siguientes, que llevarán respectivamente los n^os^ 507, 508 y así sucesivamente hasta 520.

II.—*Resolución de 29 de julio de 1902, por la cual se mandan aforar varios artículos en la octava clase arancelaria.*

["Gaceta Oficial" de 1° de agosto de 1902, n° 8603.]

Por la presente resolución se dispone:

Que á contar de esta fecha, cuando se introduzcan por las Aduanas de la República, los artículos que á continuación se expresan se aforen en la octava clase arancelaria, á saber:

Las camisetas hechas de lino y de lana y las de algodón que tengan algo de lino, los pantalones, chaquetas, blusas, chalecos, calzoncillos, paletós, sacos, levitas y cualquiera otra pieza de vestido hecho de lino ó de algodón para hombres, no comprendida en otras clases.

Los cuellos, pecheras y puños de lino ó de algodón para hombres y mujeres.

Los chinchorros de todas clases.

Las enaguas, fustanes, fustansones, fundas de almohadas, túnicos de olán batista, ó clarín, de lino, ó mezclados con algodón.

Las joyas, perlas, alhajas, piedras y prendas finas, y los artículos de oro ó plata, ó los que tengan algo de estos metales, los relojes de faltriquera de cualquiera materia que sean, las cajitas vacías preparadas para relojes y prendas finas, aunque vengan por separado.

La seda pura ó mezclada con otra materia y las telas ó tejidos de otras materias que estén mezcladas con seda.

LOS ESCRITOS DEL DR. ERNST SOBRE VENEZUELA.

[Artículo preparado por el Señor Don FRANCISCO DE PAULA ALAMO, Miembro correspondiente honorario de la Unión Internacional de Repúblicas Americanas.]

Bibliographia: Prof. Dr. A. Ernst, Caracas, Venezuela. 1865–1899. Jena.

El Dr. A. ERNST, sabio alemán residente en Venezuela hacía treinta y seis años, cuando murió, ha dejado un buen caudal de interesantes trabajos consagrados en su mayor parte á la historia natural de este país. Las investigaciones del Dr. ERNST y sus notables estudios, pueden dividirse por su índole en botánicos y zoológicos, geognósticos y mineralógicos, etnográficos y etnológicos; y otros sobre agricultura, de crítica histórica y los meramente literarios como los muy bellos que escribió para diversas Revistas literarias de Venezuela.

Es una labor ésta verdaderamente hermosa por el número y la calidad de los trabajos, que empieza el año de su llegada á Venezuela (1865) y concluye en el de su sentida muerte, 12 de agosto de 1899.

Todos esos trabajos se refieren á Venezuela, á su suelo, sus habitantes y sus costumbres, y resulta en ellos, además de una erudición consumada, un espíritu original ó propio para juzgar los hechos investigados.

En una palabra, son selectos materiales para formar la historia natural del país.

Al principio, ERNST siguió las huellas de HUMBOLDT, cuyas opiniones esbozadas en sus inmortales "Viajes" le sirvieron como de jalones para más completas y concluyentes observaciones. Posteriormente, en la Sociedad de Ciencias Físicas y Naturales de Caracas, que fundó en unión de algunos amantes de la naturaleza, desarrolló su espíritu crítico y analizador, produciendo sus mejores trabajos. Entonces fué que estudió la "Flora de Caracas" (comprendida entre el nivel del mar y los 2,700 metros de elevación) y dió á luz su "Idea general de la Flora de Venezuela," que en forma compendiada es el texto para el curso de Botánica en la Universidad Central.

Estudió, igualmente, valiéndose de las obras de distinguidos ornitólogos las "Aves de Venezuela" y también los cuadrúpedos que pueblan los inmensos y desiertos territorios de la República.

Pero su obra de aliento y de verdadera importancia general es la reseña que hizo de los productos reunidos en la Exposición Nacional del Centenario del Libertador, en 1883. Allí están descritos los varios productos del suelo venezolano, los espontáneos y los que la industria perfecciona, y tratados cada uno de esos ramos con lujo de pormenores, más dignos de admirar cuanto es dificil la consecución de informes y datos estadísticos en Venezuela donde no existe una oficina especial consagrada á este importantísimo ramo de la Administración.

El Dr. Ernst contribuyó igualmente á la formación del *Folklore* del país, con un crecido número de cuentos, tradiciones y leyendas, muchas de ellas traducidas al alemán. Se ocupó con ahinco en estudiar la condición de los pobladores aborígenes y sobre este asunto hizo comunicaciones trascendentales para la etnografía á los Congresos Americanistas.

El folleto de que damos cuenta menciona hasta 381 títulos de trabajos firmados por el Dr. A. Ernst.

BOLETIM MENSAL

DA

SECRETARIA INTERNACIONAL DAS REPUBLICAS AMERICANAS,

União Internacional das Republicas Americanas.

VOL. XIII. DEZEMBRO DE 1902. No. 6.

RELATORIO ANNUAL DO DIRECTOR.

SECRETARIA INTERNACIONAL DAS REPUBLICAS AMERICANAS.
Washington, 29 de Novembro de 1902.

Ao Senhor Secretario de Estado, Presidente do Conselho Directivo da União Internacional das Republicas Americanas e aos Membros do mesmo.

SENHORES: Na occasião do ultimo relatorio annual da Secretaria, a Segunda Conferencia Internacional dos Estados Americanos estava em sessão no Mexico; essa sessão encerrou-se no dia 31 de Janeiro de 1902, e deixou como um resultado de seus trabalhos um numero de recommendações, algumas em forma de esboço de tratados e convenções para serem representadas em propria forma constitucional pelos respectivos Governos, e outras em forma de protocólos, resoluções, etc., admittindo-se em alguns casos serem immediatamente postas em pratica.

A reorganização da Secretaria Internacional das Republicas Americanas concedida na resolução passada pela Conferencia do dia 29 de Janeiro do corrente anno, foi levada a effeito no dia 19 de Março seguinte, e está sendo prospera sob a direcção do Conselho Directivo. Um aspecto proeminente do novo arranjo foi o fundamento de uma Bibliotheca, sob o nome de "Bibliotheca Memorial de Colombo," da Bibliotheca Latino-Americana, cujo estabelecimento foi recommendado na primeira Conferencia Internacional Americana de 1889–90.

A Secretaria Internacional foi feita o guarda dos archivos das Conferencias Internacionaes Americanas, e suas publicações são consideradas como documentos publicos e são transportadas livres pelos correios de todas as Republicas da União.

A commissão recommendada pela Conferencia para o Estudo da Producção, Distribuição e Consumo do Café reunio-se em New York, no dia 1ro Outubro de 1902 e convocou quatorze sessões. As recommendações, declarações e resoluções, como finalmente adoptadas pela commissão, serão publicadas no numero do BOLETIM MENSAL de Dezembro.

A recommendação da Conferencia para una convenção afim de estudar todas as materias concernentes a policia sanitaria internacional será levada a effeito no dia 2 de Dezembro proximo futuro mez, quando o primeiro congresso da convenção será convocado em Washington.

O Congresso Aduaneiro concedido na resolução passada pela Conferencia do dia 22 de Janeiro de 1902, congregar-se-ha em New York no dia 15 de Janeiro de 1903. Foi nomeada uma commissão consistindo de cinco membros do Conselho Directivo para elaborar um programma.

A Commissão Archeoloca Internacional recommendada na Conferencia do dia 29 de Janeiro de 1902, e que requere a ratificação dos Governos respectivos, será convocada em tempo competente.

Em um congresso do Conselho Directivo de 6 de Outubro, foi unanimemente concordado a augmentar-se o poder dessa commissão afim de tambem abranger ethnologia.

O professor W J McGEE, da Secretaria de Ethnologia Americana, foi nomeado um dos delegados por parte dos Estados Unidos, para conferir com taes pessôas que tambem possão ser nomeadas delegados pelos Governos das outras Republicas da União Internacional com referencia a detalhes preliminares para o congresso da Commissão.

NOVO MEMBRO DA UNIÃO INTERNACIONAL.

No dia 3 de Julho de 1902, a Republica de Cuba foi feita membro da União Internacional das Republicas Americanas, que agora abrange todas as vinte Republicas do Hemispherio Occidental.

CONTAS.

		7,388.82

Em seguida apresento-vos o orçamento da receita e despeza para o exercicio que terminará no dia 30 de Junho de 1903:

Orçamento da receita:		
Verba votada		$36,000.00
Contribuções das Republicas Latino-Americanas		15,370.56
Vendas de publicações		1,400.00
Total		52,770.00
Calculo das depezas na proporçaõ actual:		
Vencimentos	$33,600.00	
Aluguel	2,000.00	
Impressões	11,000.00	
Artigos de escriptorio e mobilia	900.00	
Bibliotheca	1,200.00	
Sellos de correio	400.00	
Despezas miscellaneas	2,200.00	
		51,300.00
Saldo		1,470.56

PUBLICAÇÕES.

Está sendo agora publicado o decimo terceiro volume do BOLETIM MENSAL.

São postas em circulação onze mil copias de cada edição, das quaes mais de 8,000 são destribuidas pelos paizes Latino-Americanos. Durante os trez annos passados tambem forão publicados edições similhantes. Me parece que o numero de copias em cada edição poderia ter sido muito augmentado, se podesse-mos imaginar um meio mais proeminente afim de prender a attenção do publico esta publicação em varios paizes Americanos.

Durante o anno a Secretaria publicou em idioma inglez uma edição nova do "Manual do Paraguay." O texto do Manual em hespanhol foi preparado pelo Senhor Don José S. Decoud, membro honorario e correspondente da União Internacional em Paraguay.

Uma lista de livros, artigos de publicações e mappas concernentes à America Central, 1800–1900, foi tambem posta em circulação e brevemente será seguida por uma bibliographia do Chile, que presentemente está nas mãos do typographo.

A Secretaria preparou e publicou um folheto em hespanhol e em inglez intitulado "El Café: Su Historia, Cultivo, Beneficio, Variedades, Producción, Exportación, Importación, Consumo, etc., para o uso dos delegados na Conferencia do Café em New York."

O Manual de Santo Domingo e Nicaragua, que estão agora em curso de preparo pelos membros honorarios correspondentes d'aquelles paizes, estão bem adiantados e serão publicados dentro de poucos mezes.

MAPPAS.

Durante o anno forão publicados dous mappas de Guatemala e completou-se um do Brazil. O mappa de Costa Rica, que completou-se ha algum tempo já foi submettido ao Governo d'aquella Republica para exame. O de Nicaragua está agora em curso de preparos.

BIBLIOTHECA.

No dia 7 de Abril de 1902 foi estabelecida a Bibliotheca Memorial de Colombo, de accordo com as provisões do Artigo XIII da resolução passada na Conferencia em Mexico pela reorganização da Secretaria Internacional. Naquella occasião a bibliotheca da Secretaria continha 8,948 volumes. E desde então 1,038 volumes e folhetos forão addicionados, dos quaes 822 forão offerecidos gratuitamente, elevando assim o numero total de volumes e folhetos existentes na bibliotheca actualmente a 9,986, que mostra ser uma addição de 4,986 volumes e folhetos desde o anno 1899.

Durante a anno forão collocadas nas filas permanentes da bibliotheca 43 novas publicações periodicas, e recebidos 32 mappas.

Grande é o interesse que se está manifestando pelo augmento na collecção da "Bibliotheca Memorial de Colombo" por todos os paizes da União Internacional, e contribuições generosas para a Bibliotheca já forão feitas por muitos e notavelmente pelas Republicas da Argentina, Bolivia, Brazil, Guatemala e Perú.

Tenho a honra de ser, Senhores, vosso obediente servidor.

W. W. Rockhill, *Director.*

COMMISSÃO PARA UM ESTUDO DA PRODUCÇÃO E CONSUMO DO CAFÉ.

TEXTO FINAL DAS RECOMMENDAÇÕES, DECLARAÇÕES E RESOLUÇÕES ADOPTADAS PELA COMMISSÃO INTERNACIONAL AMERICANA DE CAFÉ NOS SEGUINTES ASSUMPTOS.

PRODUCÇÃO.

Recommendar que todos os Governos e municipalidades devam procurar obterem boas sementes de café, aclimal-as e distribuil-as afin de que se possa obter melhores preços e augmentar a procura do café; que instituições agricolas e estacões de experimentos botanicos sejão estabelecidas em paizes aonde o café não existir a fim de aclimal-as e propagar novas especies; que demonstrações praticas sejão feitas aos fazendeiros attendendo-se aos ultimos trabalhos completados em relação ao café; que premios sejão offerecidos de maneiras a incitar outros cultivos alem o do café; que leis especiaes sejão estabelecidas para a protecção dos donos das plantações de café.

DISTRIBUIÇÃO.

Recommendar que o abuso na tróca dos pacotes originaes ou marcas que mostrão as procedencias dos cafés importados, seja rigorosamente punido; que propagandas effectivas sejão feitas afim de augmentar o uso do café em mercados novos; que sejão abolidos os direitos locaes do café; que o café seja vendido em leitão quando assim desejarem, para facilitar o desenvolvimento de transporte; que seja adoptado um meio em acondicionar o café de maneiras que elle não venha soffrer alteração alguma; que os pacotes de café importados sejão marcados com o nome do paiz de sua procedencia.

CONSUMO.

Recommendar que todos os Governos estabeleção como um regulamento, o uso do café entre os seus exercitos e marinhas; que os Governos dos paizes productores de café estabeleção, o mais cedo possivel, nos paizes aonde o café não é usado, lugares para a demonstração do puro café; que os paizes productores e consumidores do café prohibão a venda do café adulterado e todos os mais substitutos com o nome de café, e se em caso de não poder levar a effeito essa prohibição um direito rigoroso deverá ser imposto em taes substitutos.

A PRESENTE CRISE.

Forão adoptadas as tres declarações e cinco recommendações que se seguem.

As declarações forão as seguintes:

1ª. Que ainda que se deseje que muitos melhoramentos sejão introduzidos na producção e commercio do café, a presente crise d'aquella industria consiste sómente na falta de lucros e nos preços ruinosos por que os generos são pagos aos productores.

2ª. Que a causa principal do preço baixo que traz a presente crise ser o excesso de supprimento sobre a necessidade natural ou normal.

3ª. Que até certo ponto a especulação possa ter sido responsavel pela crise, porem tal especulação não produziria um tal effeito se não existisse o dito excesso de supprimento sobre a necessidade natural ou normal.

As recommendações forão as seguintes:

Primeira. Prohibir pelos meios mais efficazes a exportação de "triage" como se fosse café, a acção mais diligente com referencia aos paizes consumidores; em prohibir a importação e uso da dita "triage" e de quaesquer falsificações ou substitutos que são offerecidos a venda pelo nome de café, ou são intencionados a falsificações.

Segunda. A adopção de medidas mais convenientes e effectivas de ordem a obter-se dos paizes consumidores a suppressão de, ou ao menos una reducção rasuavel nos direitos aduaneiros e outros impostos que possão affectar a importação, distribuição e consumo do café.

Terceira. A organização de uma união internacional composta do maior numero possivel de pessoas interessadas que quizerem vigiar de um modo permanente os interesses da industria do café, mantendo uma propaganda constante por meio de discursos ou impressos ou por meio de factos de ordem a augmentar, o mais possivel, o bom uso do café no mundo.

Quarto. Como uma medida unica, capaz de favoravelmente modificar e com toda celeridade possivel, o preço porque os productores vendem seus cafés, a eliminação derivada da venda e exportação de uma tal quantidade da producção universal que possa reduzir o supprimento aos limites justos e rasoaveis do consumo, alem de um balanço não superior a 3,000,000 de saccas de 60 kilogrammas ou 132 libras cada uma, tendo ao começo para esse balanço, a tolerancia que a inaudita quantidade do presente stock visivel possa necessitar.

Quinta. Convocar, o mais cedo possivel uma conferencia de delegados autorisados e honrosamente competentes n'este ramo de economias com o intento de concluir uma convenção ou tratado concernente as medidas de um caracter internacional que esta conferencia recommendou ou de outros que mais tarde passão ser insinuados.

CONFERENCIAS FUTURAS.

Forão adoptadas as seguintas resolucões:

A Conferenciá Internacional para a Protecção da Industria do Café.

Resoluções: (1) Convidar o Governo do Brazil para convocar o mais cedo possivel e no lugar e data que indicar, uma Segunda Conferencia Internacional composta de pessoas habilitadas sobre o café, com o fim de concluir as convenções ou tratados de caracter internacional que possão ser derivados das medidas recommendadas por esta conferencia, ou que d'aqui em diante possão ser suggeridas para o fim de proteger a industria do café. Os delegados para essa conferencia devem vir providos de plena autoridade para concluirem e assignarem as convenções ou tratados.

(2) Tambem convidar o Governo do Brazil para iniciar e continuar todas as negociações necessarias ou convenientes para com os Governos dos outros paizes productores, afim de levar a effeito as resoluções, recommendações e desejos d'esta conferencia.

CONFERENCIA SANITARIA INTERNACIONAL.

De accordo com o Artigo V das Resoluções da Segunda Conferencia Internacional dos Estados Americanos, assignado na cidade do Mexico no dia 29 de Janeiro de 1902, as sessões da Convenção Sanitaria Internacional tiverão lugar na cidade de Washington, no dia 2 de Dezembro e continuarão até o dia 5 de 1902 inclusivel.

Os seguintes representantes das varias nações tomarão parte n'esta importante conferencia:

Pelo Chile.—Dr. EDUARDO MOORE e Dr. EDUARDO GARCIA COLLAO.

Por Cuba.—Dr. JUAN GUITERAS e Dr. CARLOS J. FINLAY.

Por Costa Rica.—Dr. ULLOA.

Pelo Equador.—Señor Don LUIZ FELIPE CARLO.

Por Guatemala.—Señor Don ANTONIO LAZZ ARRIAGA.

Pelo Mexico.—Dr. EDUARDO LICÉAGA e Dr. JOSÉ RAMIREZ.

Por Nicaragua.—Dr. D. ROMÁN.

Pelo Paraguay.—JOHN STEWART, Engenheiro Civil.

Pelo Salvador.—Señor Don ERNESTO SCHERNIKOW.

Pelo Uruguay.—Señor Don LUIS ALBERTO DE HERRERA.

Pelos Estados Unidos.—WALTER WYMAN, Cirurgião-Mór do Serviço do Hospital de Marinha dos Estados Unidos; M. J. ROSENAU, Director do Laboratorio de Hygiene e do Serviço do Hospital de Marinha dos Estados Unidos; H. L. E. JOHNSON, Washington, Districto de Columbia, da Associação Medica Americana e Presidente da Commissão Legislativa; JAMES TAGGART PRIESTLY, Des Moines, Iowa, Cirurgião-Mór da Guarda Nacional de Iowa, ex-Membre da Junta Administrativa da Associação Medica Americana; ARTHUR R. REYNOLDS, Chicago, Illinois, Commissionario da Saude; CHARLES B. ADAMS, Sac City, Iowa, Membro da Junta da Saude do Estado e Presidente da Junta de Examinadores Medicos do Estado; EDMOND SOUCHON, New Orleans, Louisiana, Presidente da Junta da Saude do Estado de Louisiana; FRED W. POWERS, Waterloo, Iowa, Membro da Junta da Saude do Estado; JOSEPH Y. PORTER, Jacksonville, Florida, Official da Saude do Estado de Florida; ALVAH H. DOTY, da Cidade de Nova York, Official da Quarentena do Porto de Nova York; L. M. POWERS, Los Angeles, California, Official da Saude; FRANK WILLIAM PORTERFIELD, Atlantic, Iowa, ex-Presidente da Sociedade Medica do Valle de Missouri; GEORGE P. BRADLEY, Director Medico da Marinha dos Estados Unidos; Major WALTER D. MCCAW, Cirurgião do Exercito dos Estados Unidos; WHYTE GLENDOWER OWEN, Delegado da Junta da Saude do Estado de Louisiana; Dr. RHETT GOODE, Official da Saude da Cidade de Mobile e Presidente da Junta da Quarentena da Bahia de Mobile; Dr. HENRY GOLDTHWAITE, Official Executivo da Saude e da Junta da Quarentena da Bahia de Mobile, Mobile, Alabama.

O discurso de saudação foi feito pelo Dr. WALTER WYMAN ao começar a sessão da Conferencia no dia 2 de Dezembro. O orador referio-se à Segunda Conferencia Internacional dos Estados Americanos no Mexico considerando-a uma era no progresso de civilização do novo mundo. Elle disse mais:

"Não ha topicos de maior importancia do que aquelles que serão considerados por esta Conferencia, para a protecção contra as incursões de molestias e a prevenção de taes rodeados de homens que capacitarálos a cultivar o padrão mais elevado da saude são as bases do nosso physico bemestar e gozo, assim como do nosso gozo intellectual e elevação moral. Saude, asseio, intelligencia e moralidade podia bem ser o symbolo d'esta Conferencia."

Em seguida ao Dr. WYMAN orou o honrado Senhor LESLIE M. SHAW, Secretario do Thesouro dos Estados Unidos, saudando aos delegados visitas e recommendando o proposito da Conferencia, disse:

"Lembro-me o tempo quando a principal ambição do medico era curar o caso individual da molestia e pouca attenção prestava pela propagaçaõ da molestia entre outras pessoas; porem hoje o medico esforça-se para proteger os outros da epedemia assim como em curar o caso. Um dos principaes intentos do medico de hoje é em ter precauções para que a molestia nã se propague. Estas mudanças em methodos de clinica indicão que te-em havido grandes melhoramentos na sciencia medica assim como na sciencia mechanica e industrial."

O Departamento de Estado dos Estados Unidos estendeu á conferencia acolhimentos por intermedio do Dr. DAVID J. HILL, Secretario Ajudante de Estado, que disse:

"Quando a primeira Conferencia, entre as Republicas Americanas, foi proposta, houve receio de que nunca haveria de passar, porem esses receios forão caçados e beneficios já são evidentes. O que nós necessitamos entre estas Republicas é um contacto mais estreito, uma mistura entre ellas nas discuções de questões de reciproca importancia vital. Apraz-me ver que a Conferencia na Cidade do Mexico já produzio fructos e que taes congressos como este são para serem continuados."

Foi eleito Presidente da Conferencia o Dr. WALTER WYMAN, sendo os Secretarios os Doutores ARTHUR R. REYNOLDS pelos Estados Unidos e JUAN GUITERAS pelos paizes latino-americanos. Entre os membros visitantes que tomarão parte nos debates da Conferencia forão Dr. W. M. BRUMBY, Official da Saude da Cidade de Houston, Texas; Dr. CHARLES WARDELL STILES, Zoologista, do Departamento de Agricultura dos Estados Unidos; Dr. L. O. HOWARD, Entomologista, do Departamento de Agricultura dos Estados Unidos; Dr. JAMES CARROLL, Cirurgião Ajudante do Exercito dos Estados Unidos, e Dr. JOHN F. ANDERSON, Director Ajudante do Laboratorio de Hygiene, Washington, Districto de Columbia.

Forão diariamente convocadas sessões, durante a manhã e tarde, nas quaes os relatorios preparados por varios delegados forão lidos e discutidos, sendo as resoluções seguintes concordadas pelas delegações da Conferencia:

"Durante a Segunda Conferencia Internacional Americana dos Estados Pan-Americano, convocada na cidade do Mexico, desde Novembro de 1901 a Janeiro de 1902, proveu que uma convenção sanitaria fosse convocada em Washington dentro de um anno a começar da data em que forão assignadas as resoluções sobre o saneamento e a quarentena, e escolherá uma Secretaria Sanitaria Internacional com um permanente quartel geral em Washington, para o fim de retribuir com as differentes Republicas representadas nesta conferencia, um serviço effectivo, fica por este meio resolvido:

"Primeiro. Que será o dever da Secretaria Sanitaria Internacional insistir que cada Republica, prompta e regularmente transmitta á dita secretaria todos os dados de cada caracter relativos á condição sanitaria de seus respectivos portos e territorios.

"Segundo. Fornecer a dita secretaria toda a opportunidade e auxilio para um perfeito, diligente e scientifico estudo e investigação de qualquer erupção de molestias contagiosas que possão occorrer dentro do territorio de qualquer das ditas Republicas.

"Terceiro. Está além resolvido que será o dever da Secretaria Sanitaria Internacional prestar seu melhor auxilio e experiencia para com a mais vasta protecção possivel da saude publica de cada uma das ditas Republicas afim de que possa ser eliminada aquella molestia e facilitar o commercio entre as ditas Republicas.

"Quarto. Está além resolvido por esta convenção que será o dever da Junta Sanitaria Internacional animar e auxiliar ou obrigar com todos os meios proprios o saneamento dos portos de mar, incluindo os melhoramentos sanitarios de portos, esgotos, drenagens de terrenos, calçadas, eliminação de infecção dos edificios e a destruição de pernilongos e outros vermes.

"Quinto. Está tambem recommendado por esta convenção que em ordem de se levar a effeito as medidas acima indicadas será arrecadado um capital de $5,000 pela Secretaría das Republicas Americanas, de accordo com o paragrapho 7 das resoluções da Segunda Conferencia Internacional Americana acima relatado."

O personnel da dita secretaria foi eleito da maneira seguinte:

Presidente, Dr. WALTER WYMAN, Cirurgião-Mór da Saude Publica e do Serviço do Hospital de Marinha dos Estados Unidos.

Membros: Os doutores EDUARDO LICÉAGA, do Mexico; EDUARDO MOORE, do Chile; JUAN GUITERAS, de Cuba; G. ULLOA, de Costa Rica; RHETT GOODE, de Alabama, e A. H. DOTY.

Ficou decidido que o congresso seguinte da Conferencia Sanitaria Internacional convocar-se-hia em Santiago de Chile e as sessões no dia 15 de Março de 1904.

BULLETIN MENSUEL

DU

BUREAU INTERNATIONAL DES RÉPUBLIQUES AMÉRICAINES,

Union Internationale des Républiques Américaines.

VOL. XIII. DÉCEMBRE 1902. NO. 6.

RAPPORT ANNUEL DU DIRECTEUR DU BUREAU INTERNATIONAL DES RÉPUBLIQUES AMÉRICAINES.

WASHINGTON, *le 29 novembre, 1902.*

Le Ministre des Affaires Etrangères, et les Membres du Conseil d'Administration de l'Union internationale des Républiques Américaines.

MESSIEURS: A la date du dernier rapport annuel du Bureau, la seconde Conférence Internationale des Pays américains siégeait à Mexico. Cette conférence s'est terminée le 31 janvier 1902, et on y a pris un grand nombre de décisions, dont quelques-unes étaient sous la forme de traités et de conventions que les gouvernements des pays respectifs doivent régulariser d'après la voie constitutionnelle, et d'autres sous forme de protocoles, de projets, etc., qui dans certains cas pourront entrer immédiatement en vigueur.

La réorganisation du Bureau International des Républiques Américaines, décidée dans le projet voté par la Conférence le 29 janvier 1902, est entrée en vigueur le 19 mars suivant, et depuis cette époque le Bureau a été dirigé avec succès par le Conseil d'Administration.

Un fait important du nouvel arrangement est la fondation, sous le nom de "Bibliothèque de Colomb" d'une bibliothèque latine américaine dont l'établissment avait été recommandé par la première Conférence Internationale Américaine de 1889–90. C'est au Bureau International que sont déposées les archives des conférences internationales américaines et ses publications sont considérées comme des documents publics et comme tels sont envoyées à toutes les Républiques de l'Union en franchise postale.

La Commission recommandée par la Conférence pour l'étude de la production, de la distribution et de la consommation du café s'est réunie à New York le 1er octobre 1902, et a tenu en tout quatorze séances. Les décisions, déclarations et projets, tels qu'ils ont été finalement adoptés par la Commission, seront publiés dans le BULLETIN MENSUEL du mois de décembre.

La décision de la Conférence pour une convention, ayant pour but d'étudier tout ce qui traite du sujet de la police sanitaire internationale, entrera en vigueur le 2 décembre, date de la première réunion de la Convention qui aura lieu à Washington.

Le Congrès Douanier qu'on a décidé dans la conférence du 22 janvier 1902, se réunira à New York, le 15 janvier 1903. Un comité composé de cinq membres du conseil d'administration, a été choisi pour élaborer le programme.

La Commission archéologique internationale recommandée par la Conférence le 29 janvier 1902, et qui exige la ratification des gouvernements respectifs, aura lieu à l'époque fixée. A la réunion du Conseil d'Administration qui a eu lieu le 6 octobre, on a décidé à l'unanimité d'agrandir le cercle d'action de la Commission afin d'y comprendre l'ethnologie. Le Professeur W. J. McGEE, du Bureau de l'Ethnologie américaine a été nommé délégué par les Etats-Unis pour conférer avec les délégués des autres Républiques de l'Union Internationale au sujet des détail préliminaires pour la réunion de la Commission.

NOUVEAU MEMBRE DE LA L'UNION INTERNATIONALE.

Le 3 juillet 1902, la République de Cuba est devenue membre de l'Union Internationale des Républiques Américaines qui comprend aujourd'hui les vingt Républiques de l'hémisphère occidentale.

Voici le compte-rendu des finances du Bureau pour l'année fiscale finissant le 30 juin 1902.

Recettes et dépenses pour l'année fiscale finissant le 30 juin 1902.

RECETTES.

Allocation annuelle, 1902				$36,000.00
Balance provenant des recettes des ventes, loyers, etc., 1er juillet 1901			$2,552.82	
Des allocations des Républiques Latines-Americaines		$14,020.32		
Des annonces	$1,266.55			
Des ventes de publications	1,466.07			
Appointements du Directeur pour un an pendant son absence en Chine	5,000.00			
		7,732.62		
			21,752.94	
				24,305.76
Total des recettes				60,305.76

DÉPENSES.

Allocation annuelle, 1902	$36,000.00	
Recettes provenant des ventes, loyers, etc.	19,982.21	
		$55,982.21
Balance au 1er juillet, 1902		4,323.55

Bordereau détaillé des dépenses pendant l'année fiscale finissant le 30 juin 1902.

	Provenant de l'allocation annuelle de 1902.	Provenant des recettes des ventes, loyers, etc.	Total.
Compensation	$31,466.67	$3,331.90	$34,778.57
Loyer	1,666.68	333.32	2,000.00
Fourniture de bureaux		880.64	880.64
Bibliothèque	2.74	1,239.64	1,242.38
Affranchissement	223.91	917.00	1,140.91
Ameublement		234.15	234.15
Frais d'impression	2,600.00	10,330.21	12,930.21
Dépenses diverses	60.00	2,715.35	2,775.35
Total	36,000.00	19,982 21	55,982.21

Mémoire de l'Imprimeur Public pour l'année fiscale finissant le 30 juin 1902.

Total des mémoires remis pour l'année fiscale finissant le 30 juin 1902		$7,388.82
Paiements provenant des recettes des ventes, loyers, etc., pendant l'année fiscale	$3,701.89	
Paiements provenant de l'allocation annuelle, 1902	2,600.00	
Paiements faits pendant l'année fiscale courante	1,086.93	
		7,388.82

J'ai l'honneur de vous soumettre ci-dessous une estimation des recettes et des dépenses pour l'année fiscale finissant le 30 juin 1903.

Estimation des recettes:		
Allocations		$36,000.00
Allocations des Républiques latines-américaines		15,370.56
Vente des publications		1,400.00
Total		52,770.56
Estimation des dépenses sur la base actuelle:		
Feuille d'émargement	$33,600.00	
Loyer	2,000.00	
Imprimerie	11,000.00	
Fourniture de bureaux et ameublement	900.00	
Bibliothèque	1,200.00	
Affranchissement	400.00	
Dépenses diverses	2,200.00	
		51,300.00
Balance		1,470.56

PUBLICATIONS.

Le treizième volume du BULLETIN MENSUEL est maintenant en cours de publication. Chaque tirage du BULLETIN se monte à 11,000 exemplaires dont plus de 8,000 sont envoyés aux pays de l'Amérique latine. Le tirage des trois années précédentes a été le même. Le nombre d'exemplaires de chaque tirage pourrait être augmenté considérablement si l'on pouvait arriver à attirer l'attention du public des différents pays américains sur cette publication.

Le Bureau à publié pendant l'année une nouvelle édition en anglais du manuel du Paraguay. Le texte espagnol de cet ouvrage était préparé par Señor Don José Decoud, membre correspondant honoraire de l'Union Internationale au Paraguay.

On a aussi publié "Une liste de livres, d'articles de Revues et de cartes ayant trait à l'Amérique Centrale, 1800–1900," qui sera suivie avant peu d'une bibliographie du Chili qui est entre les mains de l'imprimeur.

Le Bureau a fait préparer et publier en espagnol et en anglais, pour l'usage des délégués qui ont assisté à la Conférence du Café à New-York, une brochure intitulée "El Café: Su historia, Cultivo, Beneficio, Variedades, Producción, Exportación, Importación, Consumo, etc."

Les membres correspondants honoraires de Saint-Domingue et de Nicaragua préparent actuellement des manuels sur leurs pays respectifs. Ces manuels sont très avancés et seront publiés dans quelques mois.

CARTES.

Dans le courant de l'année on a publié deux cartes du Guatémala et on a terminé celle du Brésil. De plus, on a terminé, il y a quelque temps, une carte de Costa Rica que l'on a soumise à l'examen du gouvernement de cette République. Une carte du Nicaragua est actuellement en voie de préparation.

BIBLIOTHÈQUE.

Conformément aux stipulations de l'article XIII du projet voté par la Conférence à Mexico pour la réorganisation du Bureau International, on a établi le 7 avril de l'année courante la Bibliothèque de Colomb. A cette époque la bibliothèque se composait de 8,948 volumes. Depuis, on a ajouté 1,038 volumes et brochures, dont 822 provenant de dons, ce qui fait monter le nombre de livres et de brochures actuellement dans la bibliothèque à 9,936, soit une augmentation de 4,986 volumes et brochures depuis 1899. Pendant l'année on a mis dans la collection permanente 43 nouveaux journaux et on a reçu 32 cartes.

Tous les pays de l'Union Internationale s'intéressent à faire augmenter la Bibliothèque et plusieurs d'entre eux, spécialement la République Argentine, la Bolivie, le Brésil, le Guatémala, et le Pérou, lui ont fait des dons importants.

J'ai l'honneur, d'être, Messieurs, votre obéissant serviteur,

W. W. Rockhill, *Directeur.*

RÉPUBLIQUE ARGENTINE.

EXPOSITION INTERNATIONALE D'HYGIÈNE À BUENOS AYRES.

La Légation de la République Argentine à Washington a fait connaître au Ministère des Affaires Etrangères en date du 27 octobre 1902, qu'une exposition internationale d'hygiène aura lieu à Buenos Ayres à l'occasion du second Congrès de Médecins de l'Amérique Latine. Le Congrès se réunira au mois d'avril 1904. Les institutions publiques et particulières qui s'intéressent à ce sujet sont invitées à faire partie de l'exposition. On a déjà obtenu de plusieurs compagnies de navigation des réductions dans le tarif du transport des objets à exposer.

L'INDUSTRIE DU BÉTAIL.

On lit dans un récent numéro de "El Tiempo," journal publié à Buenos-Ayres, que l'Argentine est aujourd'hui la principale nation de l'Amérique du Sud qui produit le bétail et que ce pays est destiné à devenir le fournisseur du continent et même de plusieurs marchés européens et africains.

En 1895, selon le recensement officiel, il existait un peu plus de 20,000,000 de têtes de bétail de la race bovine, 75,000,000 de race ovine et 5,000,000 environ de race chevaline.

Les meilleurs calculs font monter la première à 25,000,000, la seconde à 110,000,000, et la troisième à une augmentation presque nulle, en raison de la grande exportation de chevaux et de mules qui a eu lieu ces dernières années par suite de la guerre anglo-boer.

L'industrie du bétail et ses dérivés concourent annuellement pour un chiffre de 80,000,000 à 90,000,000 de piastres or, et occupe le premier rang de l'exportation des produits argentins.

Bien que les bêtes à cornes n'aient pas augmenté en nombre elles ont gagné en qualité et en poids, de même que leur valeur a doublé. Par suite du croisement et du soin apporté au choix des animaux, presque tous les établissements ruraux les ont amélioré de telle sorte qu'aujourd'hui on obtient des animaux dépassant facilement 600 kilogrammes et dans beaucoup de cas 1,000 kilogrammes.

Le progrès dont a bénéficié le bétail explique le véritable intérêt avec lequel on prête maintenant attention aux fêtes et concours d'animaux gras qui ont lieu dans la République Argentine.

IMPORTATION DE BOIS DE CONSTRUCTION POUR LES HUIT PREMIERS MOIS DE L'ANNÉE 1902.

Les importations de bois de construction, provenant des Etats-Unis pendant les huit premiers mois de l'année, se sont élevées à 52,517,000 pieds de pitchpin contre 73,817,000 pieds importés pendant la même période de l'année 1901, soit une diminution de 21,300,000 pieds. Les importations de sapin se sont élevées à 21,852,200 contre 29,588,000 pieds en 1901, soit une diminution de 7,706,000 pieds.

En 1901 les importations de bois de construction, provenant des Etats-Unis, se sont élevées à 113,826,000 pieds de pitchpin et à 47,314,000 pieds de sapin. En 1901, on payait le bois de pitchpin à raison de $6.34 or, les 100 mètres, contre $10.63 or en 1902 et le bois de sapin $5.28 or, les 100 mètres en 1901 contre $9.36 or, en 1902. Ces chiffres montrent une augmentation de 65 pour cent pour le pitchpin et de 80 pour cent pour le sapin.

MOUVEMENTS DE PORT DE LA PLATA PENDANT LES NEUF PREMIERS MOIS DE 1902.

Le Buenos-Ayres "Handels Zeitung" fait connaître que 171 vapeurs et 12 voiliers sont entrés dans le port de la Plata.

Pendant la même période 174 vapeurs et 8 voiliers sont sortis du même port transportant les merchandise suivantes:

	Kilos.		Kilos.
Maïs	36, 059, 849	Crin	3, 502
Blé	51, 735, 741	Viandes frigorifiées	5, 150, 708
Grain de lin	2, 234, 538	Caséine	8, 000
Son	2, 409, 406	Avoine	520, 359
Viandes en conserve	2, 976, 373	Graines pour oiseaux	14, 100
Beurre	246, 960	Chevaux	424
Foin	2, 282, 421	Moutons	26, 551
Langues	72, 638	Bétail	2, 267
Peaux de moutons	268, 222	Mulets	2, 026
Fruits	92, 360	Porcs	23
Peaux de chèvres	11, 184	Cornes	41, 000
Quebracho	4, 917, 500	Os	17, 900

SUPERFICIE DES RÉCOLTES DE LA RÉPUBLIQUE.

Dans un rapport publié récemment par le Chef du Bureau des Statistiques du Ministère de l'Agriculture de la République Argentine, on donne les chiffres suivants qui représentent la superficie ensemencée des principales récoltes du pays pendant les cinq dernières années:

Années.	Blé.	Graine de lin.	Années.	Blé.	Graine de lin.
	Hectares.	*Hectares.*		*Hectares.*	*Hectares.*
1898–99	3, 037, 701	332, 788	1901–2	3, 221, 066	782, 880
1899–1900	3, 167, 283	355, 329	1902–3	3, 254, 641	955, 875
1900–1901	3, 307, 749	607, 352			

D'après les chiffres ci-dessus on peut constater l'augmentation considérable qu'il y a eue dans la superfice ensemencée de graine de lin pendant les cinq dernières années, tandis que le blé reste presque stationnaire.

On divise la superficie des récoltes en 1902–3 de la manière suivante:

Provinces.	Blé.	Graine de lin.
	Hectares.	*Hectares.*
Buenos Ayres	1,092,360	255,062
Santa Fé	1,237,322	509,973
Entre Rios	251,604	74,279
Córdoba	673,349	116,550

BRÉSIL.

STATISTIQUES COMMERCIALES.

Le Consul des Etats-Unis à Pará, M. K. K. Kennedy fournit des renseignements intéressants dans son rapport du 9 octobre 1902, au Ministère des Affaires Etrangères au sujet des statistiques générales du commerce du Brésil.

On a commencé les travaux d'amélioration du nouveau port à Manáos. Ces travaux comprennent un système de docks et de quais qui facilitera le commerce toujours croissant de cette ville. La compagnie de vapeurs Booth en a obtenu la concession et a sous-loué une partie considérable des travaux à une compagnie de New York; un ingénieur de cette ville a été envoyé à Manáos pour diriger les travaux. On commencera incessamment les travaux de construction d'une usine d'éclairage électrique.

On doit faire des travaux de dragage à une profondeur suffisante pour permettre aux navires de gros tonnage de venir jusqu'aux quais et l'on construira des docks, quais et magasins qui s'étendront sur les bords du fleuve tout le long de la ville. On construira aussi des bassins de radoub pour la réparation des plus grands navires. Un syndicat allemand a obtenu cette concession importante, ses soumissions étant moins élevées, et on attend sous peu les directeurs du syndicat, qui sont allés en Allemagne pour obtenir l'argent nécessaire à cette entreprise et dès leur arrivée on commencera les travaux préliminaires de l'entreprise qui devront être terminés dans un délai de cinq ans environ.

On constate une amélioration constante dans la situation financière et commerciale et les hommes d'affaires s'attendent à une bonne saison.

On n'a pas encore publié les statistiques commerciales pour les huit derniers mois, mais d'après les renseignements recueillis de différentes sources, on peut voir que la plus grande partie du commerce est entre les mains des Américains.

Les exportateurs américains sont maintenant en bonne voie de s'assurer un plus grand commerce en adoptant des méthodes effectives, telles que l'envoi de voyageurs de commerce habiles qui parlent la langue du pays et qui se rendent compte de ce qu'on désire actuellement dans cette République. La reprise d'un grand nombre de travaux publics, qui étaient restés stationnaires pendant les deux dernières années, est une preuve de plus de l'amélioration dans la situation commerciale. On a recommencé la reconstruction d'un système de tramways et de conduits d'eaux et de cette manière l'argent entre en circulation.

Une compagnie nord-américaine fait des expériences sur le haut fleuve avec un nouveau système de télégraphe sans fil et si on le trouve pratique on va l'installer entre Pará et Manáos.

Il peut être intéressant pour les marins qui visitent l'Amazone de savoir qu'un phare sera construit à l'embouchure du fleuve sur l'île de Tatusca à quelques milles au-dessous de Pará. Il sera situé à 1° 11′ 45″ de latitude sud et à 48° 30′ 10″ de longitude ouest. Ce phare aura un feu blanc fixe à une altitude de 150 pieds et sera visible à une distance de 12 milles en temps clair.

Le gouvernement municipal de Pará s'est décidé à faire construire sur l'une des nombreuses îles en face de la ville, un grand magasin pour les huiles et autres produits inflammables qui menacent la sécurité de la ville. D'après la loi, les maisons de commerce qui tiennent cette classe de marchandises seront divisées en deux groupes, dont l'un se compose des maisons en gros, auxquelles on permet de garder une certaine quantité de produits inflammables, et l'autre groupe, qui comprend les maisons de détail, auxquelles on permet de garder une plus petite quantité de ces marchandises en réserve. Les importateurs ne pourront vendre cette classe de marchandises qu'aux maisons en gros.

Voici une liste des articles, dont la plus grande partie provient de New-York, qui seront affectés par la loi du 25 septembre 1902: huile de pétrole, allumettes, cachaca (rhum blanc), alcool, térébenthine, poix, goudron, résine, naphte, acides, salpêtre, soude caustique, poudre, dynamite, potasse, pièces d'artifices, cartouches chargées, cartouches vides avec les capsules et aussi les capsules.

On fait connaître aussi qu'un chemin de fer de quatre milles environ sera construit de Pará à Pena Cova pour transporter ces marchandises à la ville, et les Américains sont déjà sur place pour soumissionner.

Les importations d'huile de pétrole provenant des Etats-Unis dans cette vallée ont tellement augmenté pendant l'année dernière qu'on a dû organiser un nouveau système afin de faire face aux besoins et à la vente de l'huile. Pará sera le dépôt principal pour l'approvisionnement de toute la vallée de l'Amazone. En conséquence de la loi citée, l'huile a augmenté de 2 milreis (50 cents) par récipient de 5 gallons.

L'emprunt de $5,000,000, que désirait faire l'Etat de l'Amazone, a été arrangé par un financier important de New York et par conséquent l'Etat pourra entreprendre plusieurs améliorations qu'on avait en vue à Manaos et à d'autres points en amont du fleuve. L'emprunt est garanti, comme cela se fait toujours au Brésil, par les recettes douanières.

La suprématie des machines des Etats-Unis est complètement établie et si elles sont bien placées sur ce marché on peut en vendre des quantités énormes à l'exclusion, pour ainsi dire, des machines et outils étrangers. On ouvrira prochainement un grand magasin qui ne contiendra que des articles de fabrication nord-américaine, principalement des machines et en même temps le magasin servira d'approvisionnement pour tout le nord du Brésil.

TISSUS DE COTON.

M. Archer, Consul des Etats-Unis à Porto Alegre, fait connaître que les filatures indigènes fabriqent actuellement beaucoup de cotonnades qu'on importait autrefois de l'étranger. Ces filatures fournissent presque entièrement les grisettes, oxfords, denims, coutils pour pantalons, etc. On fabriques des quantités considérables d'indiennes et la qualité en est excellente et très durable.

On peut obtenir maintenant des nouveautés en cotonnades pour robes et même des dentelles fabriquées dans le pays. Des draps pour pantalons, des cachemires, dont les dessins et la qualité sont excellents, des *ponchos* et des couvertures de laine, ainsi que des *ponchos* et des couvertures de coton sont fabriqués par une filature de la ville, de sorte que l'importation de ces articles est très restreinte.

Il y a aussi des filatures de bonneterie qui fabriquent des camisoles, des bas, etc., qui égalent en qualité et en fini les qualités similaires des articles d'importation et par suite des prix avantageux toute concurrence est devenue presque impossible sur le marché.

M. Archer dit que le développement des industries nationales est dû presque entièrement au tarif protectionniste, et comme les revenus des douanes dans tout le pays ont continué à diminuer dans les dernières années, malgré l'augmentation des droits, il est évident que l'importation a dû diminuer considérablement.

Jusqu'ici la concurrence sérieuse de l'industrie nationale se borne principalement, sinon entièrement aux textiles; on importe encore de l'étranger, principalement de l'Allemagne et du Royaume-Uni, des machines, de la quincaillerie, de la poterie et de grosses marchandises en général.

DÉBOUCHÉS COMMERCIAUX.

Le Vice-Consul d'Espagne à Manáos fait connaître que les provinces situées le long de l'Amazone offrent un débouché important à toutes sortes d'armes à feu. Cette demande est due à la nature sauvage du pays et au grand nombre de personnes employées à la recherche du caoutchouc qui sont obligées de se nourrir du produit de leur chasse. On demande surtout des fusils de chasse, vieux modèle, mais les carabines trouvent facilement des acheteurs.

Dans ce rapport on dit aussi que toutes les chaussures vendues dans l'Amazone sont importées, soit de l'étranger, soit du midi du Brésil.

On ne connaît pas ici les chaussures espagnoles, bien que la mode et la qualité leur permettent de faire concurrence à l'article portugais qui tient la première place sur le marché. Les chaussures de première qualité qu'on vend ici sont principalement de fabrication anglaise.

Le commerce de meubles serait bien plus considérable sans le tarif prohibitif et les frais de transport qui sont très élevés, aussi l'ameublement des maisons est en général très simple. Les meubles en bois courbé d'Autriche jouissent de la plus grande demande.

FAITS DIVERS.

De tous les Etats du Brésil, c'est celui de São Paulo qui vient en tête de l'exportation en 1901. Pendant cette année elle a atteint la valeur de 293,873 contos, et le café figure dans ce chiffre pour la somme de 290,482 contos correspondant à l'exportation de 10,033,427 sacs de café. Parmi les autres produits exportés, on cite le tabac, les cuirs, les cornes, les peaux, le mica et l'eau-de-vie.

Pendant la période décennale 1892–1901, l'Etat de Sergipe a exporté 262,617 tonnes de sucre d'une valeur de 53,796 contos; 10,057,859 litres d'eau-de-vie de canne, valant 2,425 contos; 191,648 litres d'alcool d'une valeur de 74 contos et 225,178 litres de mélasse représentant 11 contos de reis. Le total de la valeur officielle de l'exportation a donc été de 56,306 contos, le prix du sucre étant de 204 reis le kilo. Comparativement à 1900, l'exportation en 1901 a augmenté de 35,883 contos, ce qui prouve le développement croissant du mouvement commercial de São Paulo.

COLOMBIE.

MODIFICATIONS DOUANIÈRES.

1.—Décret nº 868, du 28 mai 1902, portant augmentation des droits applicables à l'importation.

[Diario oficial du 9 juin, 1902.]

Article unique. Sont augmentés de 50 pour cent les droits d'entrée applicables aux marchandises de toutes sortes importées dans le pays.

Paragraphe unique. Cette augmentation sera prélevée à partir du 1^er^ juillet prochain.

II.—Extrait du décret nº 865, du 28 mai 1902, relatif au visa des manifestes (sobordos) et des factures consulaires, ainsi qu'à d'autres dispositions fiscales.

[Diario oficial du 10 juin 1902.]

Article 1er. Aux effets du visa consulaire, on distinguera quatre sortes de factures commerciales:

1°. Les factures sur lesquelles ne sont portés que les objets en fer, acier, cuivre, zinc ou bois destinés aux machines pour entreprises industrielles, à savoir: chemins de fer, bateaux à vapeur, éclairage électrique, télégraphes, téléphones, imprimeries, fabriques de verre et de faïence, de bougies, de tissus, ainsi que pour entreprises considérées comme d'utilité publique et reconnues comme telles en vertu d'une déclaration officielle;

2°. Les factures dont le montant de la valeur n'est pas supérieur à deux cents *pesos;*

3°. Les factures d'une valeur supérieure à deux cents, sans dépasser cinq cents *pesos*;

4°. Les factures d'une valeur supérieure à cinq cents *pesos*;

Art. 2. Les droits consulaires pour le visa des factures seront perçus d'après le tarif suivant, pourvu que ces documents ne mentionnent pas d'objets avec pierres précieuses, en or, platine ou argent, ce qui les soumettrait à la surtaxe dont il est fait mention spéciale ci-après:

Factures de 1re classe, par 1,000 pesos ou fraction de 1,000 pesos	$3
Factures de 2° classe, par 1,000 pesos ou fraction de 1,000 pesos	6
Factures de 3° classe, par 1,000 pesos ou fraction de 1,000 pesos	8
Factures de 4° classe, par 1,000 pesos ou fraction de 1,000 pesos	10

Les factures sur lesquelles se trouvent mentionnés des objets avec pierres précieuses, en or, platine ou argent seront assujetties aux surtaxes suivantes:

	Pour cent.
Pour les articles munis de pierres précieuses	40
Pour les objets en or	10
Pour les objets en platine ou argent	3

Paragraphe unique. Les consuls ne pourront apposer leur visa que sur des factures sur lesquelles sont portés des colis munis de la même marque, expédiés par une même firme, addressés à une même personne ou compagnie et ayant la même destination.

Art. 3. En ce qui concerne les colis postaux et en remplacement de la taxe consulaire sur les marchandises qu'ils renferment, il sera perçu 2 pour cent de la valeur de la facture ou la surtaxe applicable aux objets en or, argent, platine ou munis de pierres précieuses, payable en or ou l'équivalent en papier monnaie.

Paragraphe unique. La direction générale des postes et télégraphes se chargera de la perception de cette taxe et en donnera avis à qui de droit.

Art. 4. Les droits consulaires sur les manifestes seront de 5 pesos pour les premiers 100 colis et d'un peso par 100 colis ou fraction de 100 colis en plus.

Art. 5. Pour le débarquement des marchandises étrangères destinées à la consommation intérieure du pays dans un port quelconque de la République, que ce port soit franc ou ouvert au commerce maritime ou fluvial, le capitaine ou le subrécargue du navire est tenu de présenter un manifeste muni du visa consulaire.

Art. 6. Si, dans un port étranger, on embarque des marchandises à destination de la Colombie, et que ces marchandises doivent être transbordées dans un autre port étranger, les factures correspondantes devront être légalisées par le consul du port où la merchandise a été en premier lieu embarquée. Cet agent adressera immédiatement au consul du port où le transbordement doit s'effectuer un avis officiel portant désignation: du nombre, des marques et du poids total des colis, de la valeur de la marchandise et du port colombien vers lequel elle est dirigée, du nom des destinataire, expéditeur et consignataire et de toutes autres informations jugées nécessaires.

Le Consul du port de transbordement pourra permettre que les factures certifiées de la sorte soient inscrites sur le manifeste qui doit lui être présenté, si elles concordent avec les renseignements qui lui ont été fournis.

Art. 7. Pour les marchandises étrangères débarquées sur un point quelconque de l'isthme de Panama à destination d'autres ports nationaux, le manifeste devra être visé par l'administrateur des finances nationales, et le droit à percevoir pour ce visa sera de 3 *pesos* en monnaie d'argent au titre de 0,835 pour les premiers 50 colis et de 1 *peso* en même monnaie par 100 colis ou fraction de 100 colis en plus.

Art. 8. Les manifestes ou les factures devront porter mention du droit de visa perçu par le consul, l'agent consulaire ou l'administrateur des finances.

Art. 11. Il sera prélevé deux sortes de droits de tonnage les droits de *jauge* et les droits de *debarquement.*

Le droit de *jauge* sera perçu à raison de 10 centavos en or par tonne portée sur le rôle du navire, et ce droit ne sera prélevé que dans les îles de Saint-André et de Saint-Louis de Providence.

Le droit de *débarquement* sera de 1 *peso* 50 centavos en or par tonne de merchandise débarquée dans les ports nationaux maritimes ou fluviaux, francs ou ouverts au commerce, et destinée à la consommation intérieure du territoire de la République.

Art. 13. A moins que, en vertu de lois spéciales ou de contrats, il ne soit clairement spécifié le contraire, sont exempts du paiement du droit de tonnage:

1°. Les navires de guerre de nations amies et les bâtiments qui leur sont assimilés, sont autorisés à entrer et à séjourner dans les ports de la République pourvu qu'ils ne transportent pas de chargement particulier:

2°. Les navires arrivant sur lest;

3°. Les bâtiments ayant à leur bord plus de 50 immigrants;

4°. Les navires ne transportant que du charbon, du sel, de la glace, des briques, des carreaux, des tuiles et des marchandises embarquées dans un port ouvert de la République.

5°. Les navires nationaux.

Art. 14. Si au moment de la vérification de la marchandise, la facture consulaire n'était pas présentée en douane, la junte compétente évaluera en or ladite marchandise, et c'est sur cette base qu'on imposera à l'importateur une amende égale au quadruple des droits consulaires non perçus, sans préjudice de l'application des pénalités visées à l'article 326 du code des douanes.

Paragraphe unique. Il sera procédé de même si une différence est constatée entre la valeur portée sur les factures et celle que la marchandise qu'elles désignent a en réalité.

Art. 15. Toute entreprise industrielle, communauté ou personne à qui, à partir de la date du présent décret, il aura été accordé une franchise douanière sur les marchandises qu'elle importe en vertu d'un contrat postérieur, payera, en retirant les marchandises de la douane respective, les droits d'importation correspondants, mais ces droits lui seront restitués dès que le Ministère des Finances en aura donné l'ordre.

Art. 16. Le présent décret, qui modifie l'article 56 du code des douanes et d'autres dispositions fiscales, sera applicable, aussi bien dans les douanes que dans les consulats de la République, à partir du 1er août de la présente année.

CUBA.

PRODUCTION DU SUCRE.

M. Squiers, ministre des Etats-Unis à La Havane, a transmis en date du 24 octobre, 1902, l'état suivant, qui fait ressortir la quantité de sucre exporté ainsi que la quantité en réserve le 30 septembre 1902, comparée à la même date en 1901:

[Sacs de 320 livres.]

Ports.	Quantité exportée.		Quantité en reserve.	
	1901.	1902.	1901.	1902.
Habana	327,796	494,776	289,717	418,119
Matanzas	603,867	825,676	90,209	118,399
Cardenas	705,584	880,967	101,772	204.803
Cienfuegos	805,229	862,681	26,913	42,219
Sagua	279,177	397,483	13,436	36,046
Caibarien	271,619	291,015	35,400	75,055
Guantanamo	250,200	300,435	....	3,276
Cuba	39,433	67,769	6,032	9,103
Manzanillo	127,496	145,530	....	....
Nuevitas	67,030	139,450	....	....
Gibara	103,300	344,661	....	6,283

Sucre reçu dans les ports jusqu'au 30 septembre	629,111	835,078

OUVERTURE DE CERTAINS PORTS AU COMMERCE.

D'après une communication faite par le Ministre des Affaires Etrangères et aussi par le Ministre de la Justice, voici la liste des ports de l'île de Cuba qui sont ouverts au commerce.

La Havane, Matanzas, Cardenas, Ysabela de Sagua, Caibarien, Nuevitas, Gibara, Baracoa, Manzanillo, Santa Cruz, Tunis de Zaza, Cienfuegos et Trinidad.

D'autres ports, tels que Banco, Puerto Padre, Nipe et Sama sont autorisés à faire l'exportation des fruits ainsi que l'importation de marchandises étrangères, mais ils sont désignés comme sous-ports et dépendent directement de l'administration des douanes des ports ouverts au commerce.

ÉTATS-UNIS.

COMMERCE AVEC L'AMÉRIQUE LATINE.

IMPORTATIONS ET EXPORTATIONS.

On trouvera à la page 1639 le dernier rapport du commerce entre les États-Unis et l'Amérique latine, extrait de la compilation faite par le Bureau des Statistiques du Ministère des Finances. Le rapport a trait au mois d'octobre 1902 et donne un tableau comparatif de ce mois avec le mois correspondant de l'année 1901. Il donne aussi un tableau des dix mois finissant au mois d'octobre en les comparant avec la période correspondante de l'année précédente. On sait que les chiffres des différents bureaux de douane montrant les importations et les exportations pour un mois quelconque ne sont reçus au Ministère des Finances que le 20 du mois suivant et qu'il faut un certain temps pour les compiler et les faire imprimer, de sorte que les résultats pour le mois d'octobre ne peuvent être publiés avant le mois de décembre.

BUDGET POUR L'ANNÉE 1903-4.

Les prévisions pour les allocations exigées par le service gouvernemental pour l'année fiscale finissant le 30 juin 1904, d'après les chefs de Bureau des différents Ministères, ont été transmises au Congrès des États-Unis, à l'ouverture de sa session le 1er décembre 1902. Le total des allocations demandées s'élève à $589,139,122, soit $21,638,576 de moins que les estimations pour 1903 et $33,050,014 de moins que les allocations de cette année. Voici un tableau montrant les prévisions des différents ministères, mais on n'a pas tenu compte des fractions de dollars:

Corps Législatif	$11,508,483
Pouvoir Exécutif	319,500
Ministère des Affaires Étrangères	2,676,825
Ministère des Finances	172,313,526
Ministère de la Guerre	130,986,605
Ministère de la Marine	84,725,798
Ministère de l'Intérieur	163,018,616
Ministère des Postes	10,363,486
Ministère de l'Agriculture	5,660,150
Ministère du Travail	184,220
Ministère de la Justice	7,431,900
Total	589,189,112

Voici les principaux articles sous les différents ministères qui montrent des augmentations ou diminutions comparées aux allocations de l'année finissant le 30 juin 1903:

	Augmentation.
Corps Législatif, appointements et dépenses	$393,913
L'impression de documents publics, etc	718,000
Pouvoir Exécutif, appointements et dépenses	13,000
Commission du Service Civil, appointements et dépenses	75,000
Ministère des Affaires Etrangères	211,000
Ministère des Finances:	
Travaux publics	7,000,000
Divers	3,000,000
District de Colombie	2,700,000
Allocations annuelles permanentes	[a]3,600,000
Ministère de la Guerre:	
Etablissements militaires	[a]14,000,000
Travaux publics	[a]4,683,000
Ministère de la Marine, établissements navals	6,000,000
Ministère de l'Intérieur:	
Travaux publics	[a]273,000
Divers	1,650,000
Allocations annuelles permanentes	470,000
Ministère des Postes, appointements et dépenses	115,000
Ministère de l'Agriculture, appointements et dépenses	462,000
Ministère de la Justice, divers	472,000

---

[a] Diminution.

Voici un sommaire, par titres, qui fait ressortir les prévisions de 1904 et les allocations de 1903, les fractions de dollars étant omises:

	Prévisions pour 1904.	Allocations pour 1903.
Corps Législatif	$5,267,845	$5,290,617
Pouvoir Exécutif	26,061,653	27,491,680
Établissements judiciaires	756,270	909,471
Rapports étrangers	2,145,415	2,672,763
Établissements militaires	77,986,515	92,794,619
Établissements navals	74,884,540	75,049,781
Affaires indiennes	7,685,790	9,941,299
Pensions	139,846,880	140,053,467
Travaux publics	61,277,852	67,401,837
Service des Postes	8,242,856	102,486
Divers	52,444,073	64,731,251
Allocations annuelles permanentes	132,589,820	135,799,820
Total	589,189,112	622,239,126

GUATÉMALA.

CONDITIONS INDUSTRIELLES ET ÉCONOMIQUES EN 1901.

Un rapport du Consul anglais à Guatémala reçu au Ministère des Affaires Étrangères d'Angleterre, le 4 juillet 1902, contient un résumé concis et intéressant des conditions industrielles et économiques qui existaient dans la République en 1901. Quelques parties de ce rapport, étant extraites de divers documents publics et officiels, ont déjà paru dans le BULLETIN MENSUEL, mais nous reproduisons le reste qui contient des renseignements d'une certaine valeur.

M. TRAYNER fait connaître que la condition générale du Guatémala s'est améliorée dans les deux dernières années, surtout dans l'année 1901. Les importations ainsi que les exportations ont augmenté en valeur et le gouvernement a fait preuve du désir qu'il a d'apporter des améliorations dans le système agricole, en important de l'étranger du tabac et des semences d'autres produits afin de faire des essais en culture, ainsi qu'en établissant des écoles d'agriculture et en promulgant des règlements qui doivent être observés par ceux qui font ces essais ou qui entreprennent de nouvelles industries agricoles. Les récoltes dans les différents districts qui ont été très satisfaisantes, montrent une superficie étendue en culture et l'on espère qu'avant peu le Guatémala ne sera plus obligé d'importer le blé, le maïs, les haricots et le riz qu'on peut cultiver presque sans frais et sans travail dans le pays même.

Les travaux du Chemin de fer du Nord et de la chaussée qui doit s'étendre parallèlement à la ligne ferrée pour se terminer au même point sont en bonne voie d'exécution. Le temps nécessaire pour le transport entre l'intérieur et les États-Unis sera tellement diminué par l'achèvement de ces routes que le commerce d'exportation et d'importation augmentera considérablement, les frais de transport diminueront et le pays qui s'étend sur la voie du chemin de fer et de la chaussée sera ouvert à l'exploitation agricole.

Deux décrets importants qui intéressent les commerçants étrangers ont été récemment publiés et approuvés. Le premier de ces décrets stipule qu'à partir du 1er janvier 1902, 15 pour cent des droits originaux, dont 30 pour cent avaient été suspendus, seront perçus de nouveau; et le second décret prolonge jusqu'au 30 juin le délai du paiement du droit de $6 perçu à l'exportation du café.

Dans son rapport sur les conditions commerciales, M. Trayner fait observer que le pays offre actuellement un bon débouché aux instruments agricoles, tels que charrues, herses, rateaux, batteuses mécaniques, etc.

M. Trayner, qui a visité plusieurs plantations avant de faire son rapport, a constaté que l'une d'elles, qui a plus de 3,000 acres de superficie, produit chaque année de 10,000 à 12,000 quintaux de café; 30,000 quintaux de sucre; 22,000 gallons de lait; 300,000 bouteilles d'aguardiente, et 2,000 têtes de bétail environ, tandis qu'on emploie de 900 à 1,300 ouvriers.

La valeur totale des exportations de la République en 1900 accuse une augmentation en la comparant à l'année précédente, bien qu'on constate des diminutions dans quelques produits. La quantité de café a augmenté de 651,629 quintaux en 1900 à 673,344 quintaux en 1901 et la valeur de £1,297,187 à £1,352,425. C'est l'Allemagne qui en importe la plus grande quantité; les Etats-Unis et le Royaume-Uni viennent ensuite. Les exportations de sucre sont restées à peu près les mêmes, la valeur de ce produit pour les deux dernières années étant de £38,572 en 1900, et de £38,098 en 1901. Le commerce des bananes s'est développé d'une manière remarquable, les Etats-Unis étant le seul pays acheteur. L'exportation de bananes en 1901 est presque deux fois plus grande que celle de 1900, la valeur de ce produit étant de £26,269 en 1901 et de £12,123 en 1900.

On constate une diminution dans les exportations de caoutchouc, de cacao, de bois de construction et de cuirs.

L'état ci-dessous fait ressortir les principales exportations pour l'année 1901 et leur destination:

Articles.	Quantité.	Valeur.	Pays.
Café, quintaux	673, 344	£1, 352, 425	Allemagne, Etats-Unis, Royaume Uni.
Sucre, quintaux	55, 200	37, 098	Etats-Unis, Amérique Centrale.
Bananes, régimes	262, 691	26, 269	Etats-Unis.
Cuirs, quintaux	7, 018	18, 865	Allemagne, Etats-Unis.
Caoutchouc, quintaux	4, 420	49, 510	Do.
Bois de construction, pieds	2, 155, 696	8, 623	Royaume-Uni, Etats-Unis.
Autres articles	....	11, 107	Do.
Total	....	1, 503, 897	

Voici d'après un rapport publié par le Conseil agricole du Gouvernement, les récoltes pour l'année:

Sur une superficie de 11,648 acres on a récolté 295,940 boisseaux de blé, ce qui montre une augmentation considérable sur l'année 1899, dont la production totale était de 36,000 boisseaux, bien que la superficie ensemencée ait atteint plus de 27,000 acres. On a récolté 2,800 quintaux de riz sur une superficie de 672 acres de terrain, ce qui montre une certaine diminution dans la culture de ce produit.

Le maïs est l'une des plus importantes récoltes et constitue en grande partie la nourriture de la population indienne, ainsi que celle des mulets et du bétail du pays. Il est nécessaire d'en importer une quantité considérable puisque la récolte du pays ne suffit pas à la demande. En 1899, il y avait 221,600 acres en culture qui ont produit 860,167 boisseaux environ tandis qu'en 1901 la récolte a diminué à moins de 600,000 boisseaux provenant de 185,800 acres. Les haricots constituent une récolte importante, ainsi qu'un article d'importation, et en 1901 on a récolté 30,400 boisseaux sur une superficie de 20,100 acres. Actuellement il y a en tout 1,972 plantations ensemencées de blé et de riz, d'une étendue de 337,568 acres environ, et 16,038 plantations ayant une superficie de 3,588,704 acres sur lesquelles on cultive le maïs et les haricots.

Le nombre des plantations de café a augmenté pendant les trois dernières années. En 1888 il y avait 572 plantations produisant 446,430 quintaux environ, tandis qu'en 1900 il y avait 772 plantations. La récolte de 1900–1901 a été la plus considérable qui ait jamais été faite dans la République et on a obtenu de bons prix. Cependant la production de l'année suivante, 1901–2, n'a pas été très considérable, quoique la qualité se maintienne.

La diminution en production a été due surtout aux terribles tremblements de terre qui ont eu lieu dans les districts producteurs de café et quoiqu'il soit possible, d'après le rapport de M. Trayner, de déterrer une quantité considérable du café lui-même, la qualité et surtout la couleur en seront certainement changées.

La culture du caoutchouc et l'exportation du produit datent des dernières années. Cette industrie convient admirablement aux districts sur le littoral de la République, et devrait plus que récompenser toute diminution permanente qui pourrait survenir dans l'industrie caféière.

Le rapport du Ministre des Finances pour l'année 1901 montre une amélioration dans la situation financière et commerciale du pays.

Le total des revenus nationaux, y compris les recettes provenant du service postal et télégraphique, en 1901, s'est élevé à $14,449,330; les dépenses se sont élevées à $1,006,220, ce qui laisse un revenu net de $13,438,110.

Il y a actuellement 53 écoles dans la ville de Guatémala dont 25 sont des écoles publiques sous la direction du gouvernement et dont les professeurs sont nommés par les autorités. Les autres sont des institutions particulières et comprennent une école pour garçons et fillettes de la colonie allemande seulement. Cette école, dotée par le gouvernement allemand, a été fondée sur la demande de la colonie en vue du fait que le nombre des enfants allemands était plus que suffisant pour maintenir une école spéciale et les parents désirent naturellement que l'instruction de leurs enfants soit poursuivie dans leur langue maternelle. Il y a aussi parmi les nombreuses écoles, une école enfantine et une école commerciale.

Parmi les travaux publics les plus importants qui ont été entrepris dans le courant de l'année, on peut citer l'ouverture de six nouveaux bureaux de télégraphe et de sept bureaux publiques de téléphone; on a construit 70 milles de ligne télégraphique. Le système télégraphique a une longueur de plus de 3,000 milles et celui des téléphones de plus de 250 milles; il y a 157 bureaux de télégraphe et 77 bureaux de téléphone.

MEXIQUE.

STATISTIQUES SUR LA MANUFACTURE DES TABACS.

Le "Boletín de Estadistica Fiscal," publié par le Ministère des Finances, donne les renseignements suivants au sujet de la manufacture des tabacs au Mexique pendant les trois années fiscales de 1898–99 à 1900–1901:

1898–99.—Nombre de fabriques, 743; tabac fabriqué en cigarettes, 4,915,730 kilogrammes contenus dans 328,605,915 paquets; cigares ordinaires 174, 628 kilogrammes; nombre de cigares 45, 438, 759; cigares fins, 432,966 kilogrammes; nombre de cigares, 64,302,282; tabac a priser, 414 kilogrammes en 828 paquets; tabac de qualité fine, 22,939 kilogrammes en 39,443 paquets.

1899–1900.—Nombre de fabriques, 766; cigarettes, 5,906,520 kilogrammes de tabac contenus dans 375,542,765 paquets; cigares ordinaires, 236,559 kilogrammes; nombre de cigares, 53,466,432; cigares fins, 417,932 kilogrammes; nombre de cigares, 65,498,010; tabac à priser, 22 kilogrammes en 40 paquets; tabac de qualité fine, 23,733 kilogrammes en 30,726 paquets.

1900–1901.—Nombre de fabriques 740; cigarettes, 5,974,334 kilogrammes de tabac en 364,699,301 paquets; cigares ordinaires, 283,472 kilogrammes, nombre de cigares 55,014,618; cigares fins, 405,798 kilogrammes, nombre de cigares 60,348,278; tabac à priser, 16 kilogrammes en 33 paquets; tabac de qualité fine, 18,215 kilogrammes en 24,820 paquets.

Les fabriques de tabac ont payé au timbre dans chacune de ces trois années les sommes suivantes: 1898–99, $1,395,212.17; 1899–1900, $1,551,447.15; 1900–1901, $1,582,816.46.

La consommation annuelle du tabac dans les fabriques a été par mois de 5,546,677 kilogrammes en 1898–99; 6,584,766 kilogrammes en 1899–1900; 6,681,835 kilogrammes en 1900–1901.

Dans le même espace de temps les exportations de ces tabacs manufacturés ont été comme il suit: 1898–99, cigarettes et cigares, 404,701 kilogrammes, valeur déclarée à la douane $894,700; en 1899–1900, cigarettes et cigares, 276,967 kilogrammes, valeur déclarée à la douane $699,306; en 1900–1901, cigarettes et cigares, 284.283 kilogrammes, valeur déclarée à la douane $705,385.68.

Les exportations de tabac en feuilles ont été de 2,275,918 kilogrammes en 1898–99, valeur déclarée $2,515,606; 1,692,578 kilogrammes en 1899–1900, valeur déclarée $1,645,576; 1,735,073 kilogrammes en 1900–1901, valeur déclarée $1,509,328.25. Les exportations de tabac n'acquittent aucun droit.

Les quantités précitées montrent que la production totale dans chacune des trois années en revue était en 1898–99 de 7,822,595 kilogrammes, en 1899–1900 de 8,277,344 kilogrammes, en 1900–1901 de 8,416,908 kilogrammes. On estime que la production de l'année 1901–2 atteindra 10,000,000 kilogrammes.

DÉVELOPPEMENT DE LA CULTURE DU CAFÉ.

C'est le Mexique qui est le pays du Nord le plus propre à la culture du café. Les premiers essais de cette culture ont été faits en 1818 à Cordova, dans l'État de Vera-Cruz, et l'on voit encore dans cette région de grandes *cafetales* ou plantations de café bien que la culture du tabac soit maintenant l'industrie principale du district. Certains endroits de la République conviennent admirablement à la culture du café dont la qualité peut lutter avec les meilleures variétés de l'Arabie.

On peut cultiver le café à n'importe quelle altitude depuis le niveau de la mer jusqu'à une hauteur de 5,000 pieds, sa réussite aux diverses hauteurs dépendant des conditions locales du climat. Sur l'Isthme de Tehuantepec, où l'élévation de quelques-unes des plantations ne dépasse pas plus de 500 pieds, une température favorable est produite par les courants d'air traversant cette langue de terre d'un océan à l'autre, tempérant ainsi les chaleurs tropicales. On obtient des résultats tout aussi bons dans les montagnes et collines des états d'Oaxaca, de Michoacan, de Puebla, de Vera-Cruz et de Chiapas. Ces états sont les principales régions productrices de café, puisque le sol de la partie septentrionale est trop stérile et la température trop élevée pour cette culture, et une plus grande partie au sud de la République consiste de plateaux ayant plus de 5,000 pieds au-dessus du niveau de la mer.

On cultive principalement le *Coffea arabica*, qui ressemble au Mocha. La variété du myrtle, qui ressemble au Java, vient en second lieu par rapport à la qualité et l'on pense que le café de Libérie pousserait bien dans les terres basses près du littoral puisque c'est là qu'on le cultive dans son pays indigène. Le meilleur café du Mexique pousse dans l'État de Michoacan, près de la ville d'Uruapan. La baie, qui est petite, ne contient qu'un grain, mais l'arôme en est délicieux.

Une des plus grandes plantations du Mexique appartient à des Américains. Elle est située dans les montagnes de la Sierra Madre, État d'Oaxaca. Il faut un jour de voyage à cheval pour s'y rendre du chemin de fer du Sud, en traversant sept rangées de montagnes. C'est une plantation modèle, embrassant 6,000 acres, et pourvue de machines américaines du dernier modèle. Dans le Département de Palenque, État de Chiapas, plusieurs planteurs des États-Unis se sont engagés avec succès dans la culture du café et plusieurs compagnies ont obtenu des terrains qu'ils vendent en superficie de peu d'étendue pour les coloniser. Sur l'Isthme de Tehuantepec, une compagnie de l'Ohio a acheté 900 acres de terrains caféiers dans les collines au pied d'une chaîne de montagnes, tout près d'une propriété appartenant à une compagnie de Kansas City où fonctionne une usine montée des machines les plus modernes pour le nettoyage du café. Plusieurs autres planteurs du voisinage commencent à realiser des bénéfices sur leurs placements.

Une autre place qui convient admirablement à la culture du café se trouve le long du chemin de fer de Tehuantepec à 85 milles au sud du port de Coatzacoalcos. Elle est bornée des deux côtés par des rivières. Cette terre, connue sous le nom de "La Puerta" contient 40,000 acres. L'Etat de Vera Cruz renferme aussi des plantations de grande étendue où cette culture est poursuivie avec de bons résultats.

FAITS DIVERS.

On écrit de Durango qu'à l'encontre de ce que l'on craignait, la récolte du coton est désormais assurée. Elle sera cette année, l'une des plus belles que l'on ait jamais faites dans le Coahuila et le Durango. La perte de la récolte avait cependant été prédite, étant donné le manque d'eau. Par bonheur, ces fâcheux pronostics se sont dissipés et les industriels en cotonnades peuvent compter sur une abondante production.

Les travaux des ports de Manzanillo et de Coatzacoalcos avancent rapidement. A Manzanillo on travaille à la construction d'un briselames qui ne tardera pas à être achevé. En septembre dernier les travaux de ce port ont coûté $91,000. Les travaux exécutés dans le port de Coatzacoalcos ont coûté pendant le même mois $47,000.

La récolte du riz s'annonce bien cette année dans toute la République; elle sera même beaucoup plus abondante que les années précédentes, car on en a semé de très grandes quantités.

La plus grande partie de cette récolte est déjà vendue à des commerçants de Mexico et de Guadalajara. Plusieurs planteurs cubains ont signalé leur intention de venir s'établir dans les Etats de Vera Cruz et de Morelos et de consacrer leurs capitaux à la culture du riz. Ils exporteront cette céréale à Cuba où elle trouve un bon débouché.

Un *hacendado* du Territoire de Tepic, qui s'est consacré depuis plusieurs années à la culture de camphre, affirme que le Mexique peut produire du camphre de qualité supérieure au camphre malais. Une compagnie vient de s'organiser pour l'établissement d'une plantation de camphre, persuadée qu'elle retirera de cette culture d'excellents bénéfices.

Un certain nombre de fabricants italiens arriveront prochainement au Mexique pour installer des fabriques de porcelaine dans les villes les plus importantes du pays.

PARAGUAY.

INSTALLATION DU PRÉSIDENT EZCURRA.

L'installation du Colonel JUAN EZCURRA, nouveau président du Paraguay, a eu lieu le 25 novembre 1902. Le Docteur MANUEL A. DOMÍNGUEZ a été élu Vice-Président. Pendant la présidence de M. ACEVAL, Señor EZCURRA était Ministre de la Guerre et dans le discours qu'il a prononcé à l'occasion de son installation il déclare son intention de s'entourer des hommes les plus capables pour l'aider à améliorer l'état des finances et pour développer les ressources naturelles de la République.

NOUVEAU CABINET.

Le cabinet choisi par le président se compose des membres suivants:
Ministre de l'Intérieur, Señor Don EDWARDS HEYTAS.
Ministre de la Guerre et de la Marine, le Colonel ANTONIO CACERAS.
Ministre des Finances, Señor Don FULGENCIO R. MORANO.
Ministre de la Justice, Señor Don CAYETANO A. CARRERAS.
Ministre des Affaires Etrangères, Señor Don PEDRO PENA.

MODIFICATIONS DOUANIÈRES.

I.—*Décret du 8 août 1902, modifiant le décret du 3 avril de la même année sur le régime applicable aux vins et autres boissons.*

["Diario Oficial" du 17 août 1902, nº 554.]

ARTICLE 1er. Est abrogée dans le décret susmentionné l'augmentation des droits applicables aux vins ordinaires et aux boissons en général eu égard à leur force alcoolique et à la quantité d'extrait sec qu'ils contiennent.

ART. 2. Est maintenue, pour le vin de Chianti, l'évaluation de $0.15 en or par litre qui lui est assignée dans le nº 263 du tarif.

II.—*Exemption de droits à l'importation des animaux de l'espèce chevaline et mulassière.*

["Registro Oficial" de 1901, p. 31.]

Par ordonnance du 12 février 1901, seront rangés parmi les exemptions désignées à l'article 4 de la loi du 21 septembre 1899, les animaux de l'espèce chevaline et mulassière.

L'EXTRACTION DE L'HUILE DE PALMIER DE COCO.

La "Revista Financiera Comercial," de Buenos-Ayres, attire l'attention sur l'une des ressources dormantes du Paraguay, le palmier, appelé à tort "Palmera Paraguaya de Coco," dont le nom latin est *Acrocomia bocoya;* l'amande fournit 40 pour cent d'huile valant £16 la tonne. Il n'y a que peu d'années qu'on s'est occupé sérieusement de ce palmier, les petites quantités d'huile qu'on obtenait des amandes, écalées à la main, étant employées seulement par les fabricants de savon du pays. Après avoir envoyé aux principaux fabricants de savon en Europe de nombreux échantillons de cette huile, l'administration de la "Banco Agrícola" d'Assomption, qui s'en occupe maintenant, a trouvé qu'il y en aurait un bon débouché si l'on pouvait la produire assez bon marché. Afin d'arriver à ce résultat, il faudrait une machine pour enlever la partie molle du fruit et retirer l'amande de la coquille qui est extrêmement dure. On doit faire fonctionner ces machines à la main et les prix en doivent être modérés pour les faire distribuer parmi les paysans dans toute la République. On fait connaître aussi que Herr CHRISTIAN HEISECKE a inventé une machine pour cet objet mais on ne sait pas encore s'il a bien résolu le problème de l'extraction. Comme le palmier de coco pousse en grands nombres il est presque certain qu'on exigera une quantité considérable de ces machines et les commerçants sérieux voient dans l'exportation de l'huile de palmier l'une des meilleures sources de revenu de ce pays.

AGRICULTURE ET BÉTAIL SUR PIED EN 1901.

Voici, d'après les statistiques publiées par la "Revue Mensuelle du Paraguay," le nombre de bestiaux dans la Republique du Paraguay à la fin de l'année 1901, ainsi que la culture et production des terres arables.

BÉTAIL SUR PIED.

Bêtes à cornes	2,413,780
Chevaux	94,105
Juments	113,225
Mulets	5,974
Anes	4,665
Porcs	38,377
Chèvres	46,871
Moutons	236,755

RÉCOLTES.

	Superficie en culture.	Production.
	Hectares.	*Kilograms.*
Maïs	47,262	75,620,268
Manioca	37,333	848,831,280
Haricots	4,995	12,010,221
Pistaches de terre	6,010	19,232,280
Canne à sucre	8,552	410,509,000
Coton	75	43,476
Riz	1,181	3,189,700
Fèves de ricin	214	514,494
Café	917	2,203,089
Tabac	5,607	8,972,613

D'après la même autorité, le capital national et étranger placé dans le commerce du pays à cette même pêriode s'élève à $27,242,437 (en papier monnaie) et dans les industries dans la République à $19,047,095 (en papier monnaie).

PÉROU.

CULTURE DE COTON.

On plante et on cultive le coton sur une grande échelle dans le nord du district de Piura qui est renommé pour son coton à longue fibre. Il ne pleut que rarement dans ce district et par conséquent une vaste étendue de terrain reste inculte. En vue de porter rémède à cette situation deux compagnies ont été organisées pour faire venir l'eau des montagnes sur une distance considérable. On poursuit activement le travail de la pose des conduites qui sera bientôt achevé, de sorte que Arequipa offrira un débouché important aux machines de toutes sortes.

EXPOSITION INTERNATIONALE DE L'ALCOOL À LIMA.

Il vient d'être officiellement annoncé que la date de l'inauguration de l'exposition internationale des appareils utilisant l'alcool dénaturé qui devait avoir lieu le 1^er^ novembre, 1902, a été reportée au 1^er^ janvier 1903.

SALVADOR.

MODIFICATIONS DOUANIÈRES.

I.—Décret du 1^er^ août 1902, relatif à l'importation de machines et appareils destinés à la fabrication de la farine.

["Diario oficial" du 2 août 1902.]

ARTICLE 1er. Les nationaux pourront importer en franchise de tous droits et impôts municipaux et de douane en vigueur ou qui pourraient être établis dans la suite, les articles suivants: moteurs hydrauliques ou à vapeur de toute sorte, ainsi que leurs accessoires, moulins complets pour la fabrication de la farine, machines à égrener, à laver et à nettoyer les céréales, courroies, arbres, coussinets, etc.

ART. 2. Quiconque installera, pour la fabrication de la farine de froment ou de maïs, un moulin muni de tous les appareils nécessaires pour moudre, bluter et emballer de 10 à 25 quintaux de farine en dix heures de temps, aura droit, pour une seule fois et à titre de prime, d'importer en exemption de tous droits et impôts jusqu'à concurrence de 1,000 quintaux de froment. Si la minoterie parvient à produire 50 quintaux en dix heures, l'entrepreneur pourra importer sous le même régime de faveur jusqu'à concurrence de 2,000 quintaux de froment, et si la fabrication atteint 100 quintaux dans le même espace de temps, la franchise dont il s'agit pourra s'appliquer à 4,000 quintaux de froment.

ART. 3. L'industriel qui voudra installer des minoteries de plus grande importance devra présenter sa demande écrite au Comité central d'agriculture, s'il veut obtenir de plus grands avantages que ceux faisant l'objet de l'article ci-dessus. Ce comité adoptera telles décisions qu'il jugera convenables, mais les conditions du présent décret ne s'appliqueront pas aux franchises dépassant les limites ci-dessus indiquées.

ART. 4. Ceux qui, en vertu des avantages accordés par le présent décret, importeront du froment en exemption de tous droits et impôts s'obligeront à livrer pendant le mois d'avril au Comité central d'agriculture un quintal par cent quintaux de froment importé dans le pays; ce froment devra être propre à être semé, c'est-à-dire présenté en épis et autant que possible de production de pays chauds.

II.—Ordonnance du 16 août 1902, sur le régime applicable aux chaudrons en fer fondu ou forgé.

["Diario oficial" du 18 août 1902.]

Les chaudrons en fer fondu ou forgé, rivetés ou d'une seule pièce, pesant 20 kilogrammes et plus et ayant au moins 2 millimètres d'épaisseur, seront tarifés à raison d'un centavo par kilogramme, sans être assujettis à la surtaxe de trois pesos par 100 kilogrammes. Si les chaudrons dont il s'agit pèsent moins de 20 kilogrammes ils acquitteront comme par le passé un droit de 10 centavos par kilogramme, qu'ils soient étamés ou non.

La présente ordonnance entrera en vigueur à partir de la date de sa publication et les numéros 101 et 105 du tarif seront modifiés dans ce sens.

III.—Ordonnance du 18 août 1902, relative à l'importation des liqueurs spiritueuses.

["Diario Oficial" du 19 août 1902.]

Aux termes de l'article 574 du tarif, les importateurs de liqueurs spiritueuses de provenance étrangère qui n'ont pas de licence (*que no tienen patente*) doivent acquitter en plus d'une surtaxe de *dix centavos* par kilogramme un droit additionnel de *vingt centavos* conformément à l'article 287 du règlement sur les liqueurs.

Le Gouvernement ayant estimé qu'il n'était pas équitable de prélever cette double surtaxe a décidé que les importateurs des produits dont il s'agit ne seront plus assujettis au payement de la surtaxe susmentionée de *dix centavos*.

URUGUAY.

COMMERCE EXTÉRIEUR PENDANT LE 1er SEMESTRE DE L'ANNÉE 1902.

Le "Montevideo Times" du 1er octobre publie les statistiques recueillies de sources officielles, sur le commerce extérieur de l'Uruguay pendant les 6 premiers mois de l'année courante, comparées à celles de la même période pendant les années 1901 et 1900.

	Six premiers mois de—		
	1900.	1901.	1902.
IMPORTATIONS.			
Boissons en général	$1,480,042	$1,269,733	$1,026,754
Coméstibles, céréales, et épices	2,685,153	2,558,430	2,429,639
Tabac et cigares	106,697	136,145	99,570
Étoffes et drap tissé	2,411,700	1,936,962	2,103,786
Vêtements confectionnés	678,565	523,245	500,873

Approvisionnements pour navires	64,083	70,807	65,911
Total	17,707,638	17,782,249	20,599,554

La valeur du commerce total du pays pendant les six premiers mois de chacune des cinq dernières années est comme il suit:

1898	$31,514,398	1901	$30,291,580
1899	34,568,866	1902	32,302,289
1900	30,448,921		

VÉNÉZUÉLA.

EXPOSÉ DE LA DETTE PUBLIQUE.

D'après les chiffres publiés dans le "Venezuelan Herald" du 1^{er} novembre 1902, la dette publique du Vénézuéla au 31 décembre 1901 était comme suit:

DETTE EXTÉRIEURE.

	Bolivars.
Dette anglaise (3 pour cent)	66,614,550
Dette française et espagnole (3 pour cent)	6,546,925
États-Unis (réclamations mixtes américaines)	466,247

DETTE INTÉRIEURE.

Chemin de fer, 5 pour cent (banque de disconto)	46,880,000
Chemin de fer, 12 pour cent par an	3,544,341
Eaux de Caracas, 5 pour cent	10,175,199
Eaux de Caracas, 6 pour cent	59,808,671
Dette du sel	5,251,500
Intérêt non payé	34,953,634
Somme due à la Banque de Vénézuéla	8,815,797

Les recettes du gouvernement pendant les dix dernières années (1890–1901, juin à juillet) ont été de:

	Bolivars.
1890–91	47,941,886
1891–92	42,272,402
1892–93 (période de la révolution)	29,430,187
1893–94	47,862,489
1894–95	42,638,273
1895–96	47,560,636
1896–97	43,035,359
1897–98 (révolution et petite vérole)	31,505,405
1898–99 (révolution et petite vérole)	37,633,948
1899–1900 (révolution)	41,763,919
1900–1901 (révolution)	41,763,919

MODIFICATIONS DOUANIÈRES.

I.—*Corrections apportées à des erreurs de texte constatées dans la loi du 19 mai 1902, portant établissement du tarif d'importation.*

["Gaceta oficial" du 30 juin 1902.]

Est ordonnée la réimpression de la loi douanière dont l'édition, en date du 18 juin courant, était erronée.

Les erreurs constatées sont les suivantes:

Les marchandises dénommées sous les n^{os} du tarif 507, 508 et 509 ne doivent pas être rangées dans la Classe VIII mais bien dans la Classe IX sous les n^{os} 521, 522 et 523. Est modifiée en conséquence la numération des rubriques 510 et suivantes qui porteront respectivement n^{os} 507, 508 et ainsi de suite jusqu'au n° 520.

II.—*Ordonnance du 29 juillet 1902, rangeant sous la Classe VIII les différentes marchandises ci-après dénommées.*

["Gaceta oficial" du 1er août 1902.]

En vertu de la présente ordonnance seront rangées sous la Classe VIII, les marchandises suivantes:

Chemisettes en lin ou laine et chemisettes en coton avec léger mélange de lin.

Pantalons, jacquettes, blouses, gilets, caleçons, paletots, vestons, redingotes et tous autres objets d'habillement pour hommes en lin ou en coton, non dénommés.

Cols, devants de chemises et manchettes en lin ou coton, pour hommes et femmes.

Hamacs (*chinchorros*) de toute sorte.

Jupes et jupons de toute sorte (*fustanes*, *fastansones*), taies d'oreillers, matinées (*túnicos*) en batiste ou tissu léger de lin pur ou mélangé de coton.

Bijoux, perles, joyaux, pierres et objets précieux ainsi que les articles en or ou en argent ou combiné avec ses métaux, montres de toutes matières, boîtes vides pour montres et pour objets précieux, même importées séparément.

Soie pure ou mélangée d'une autre matière et étoffes et tissus en matière autre avec mélange de soie.

PRODUCTION GÉNÉRALE DE L'OR ET DE L'ARGENT.

Le rapport de M. GEORGE E. ROBERTS, Directeur de la Monnaie des États-Unis, donne les chiffres suivants ayant trait à la production des métaux précieux pendant l'année 1901. La production de l'or aux États-Unis pendant l'année a été de $78,666,700 et celle de l'argent de $33,128,400 (valeur commerciale).

Le Mexique a produit de l'or pour une valeur de $10,284,800 et de l'argent pour une valeur de $34,593,900. Au Canada la production de l'or a atteint $24,128,500 et celle de l'argent $3,145,000. En Afrique la production de l'or s'est élevée à $9,089,500; il n'y a pas de mines d'argent. L'Australie a produit de l'or pour une valeur de $76,880,200 et de l'argent pour une valeur de $7,829,500; la Russie a produit $22,859,900 d'or; l'Autriche-Hongrie $2,136,700 d'or et $2,000,000 d'argent; l'Allemagne $3,313,000 d'argent, et l'Espagne $1,911,000 d'argent.

Parmi les pays de l'Amérique du Sud, c'est la Colombie qui produit la plus grande quantité d'or, sa production ayant atteint $2,775,400; le Brésil a produit $2,801,000 d'or et $1,129,000 d'argent; le Chili $1,067,000 d'or et $5,553,000 d'argent; le Pérou $1,329,000 d'or et $3,360,000 d'argent; la Bolivie $6,157,600 d'argent.

En Chine la production de l'or s'est élevée à $9,091,000. L'Inde Anglaise en a produit pour une valeur de $9,395,000; la Corée pour $4,500,000, et le Japon pour $1,201,600; le dernier pays a aussi produit $1,037,000 d'argent. D'après ce rapport on estime la consommation industrielle de métaux précieux dans le monde entier à $80,000,000 en or et à $157,000,000 en argent.

BIBLIOGRAPHIE.

Les livres et les brochures qui seront envoyés au Bureau des Républiques Américaines, et qui contiendront des sujets ou matières traitant des pays de l'Union Internationale des Républiques Américaines, seront mentionnés dans le Bulletin Mensuel sous le titre "Bibliographie."

Tous les collectionneurs américains doivent une dette de reconnaissance au docteur CARL LUMHOLTZ, M. A., pour son livre "Le Mexique Inconnu," qui est un résumé de cinq années de recherches parmi les tribus de la Sierra Madre occidentale, dans les terres chaudes de Tepic et Jalisco, ainsi que parmi les Tarascos de Michoacan. Cette expédition, dirigée par le Docteur LUMHOLTZ, a eu son origine en 1890, grâce à l'aide donnée par diverses sociétés scientifiques et aussi par des particuliers. Le but de cette expédition était de conserver les traces des peuples primitifs du Nouveau Monde qui disparaissent rapidement. Les recherches ont été dirigées principalement du côté des régions éloignées de la Sierra Madre del Norte et dans les contrées voisines au sud et à l'est jusqu'à la ville de Mexico et les deux volumes de cet ouvrage donnent un récit succinct des explorations des membres de l'expédition, ainsi que de leurs travaux. On y parle des habitants des cavernes, des instruments anciens et des momies comme étant des sujets de première importance et on y traite en détail les mœurs et coutumes des survivants des races indigènes du Mexique. On parle aussi de la faune et de la flore du pays ainsi que de leur relation avec la vie domestique des habitants. Ainsi, on prête au chien sans poil, qui est spécial au Mexique, des propriétés curatives et on le met dans le lit des malades pour en obtenir des résultats bienfaisants. Parmi les Tarahumares on trouve des légendes au sujet de la création et du déluge semblables aux récits de la Bible, et les géants du commencement du monde ont aussi une place dans leurs légendes. Le docteur LUMHOLTZ parle avec beaucoup d'enthousiasme de l'intelligence élevée, du sens artistique et de la moralité innée des races primitive du Mexique et il fait remarquer que souvent les missionnaires ont plus besoin de convertir les soldats vainqueurs, les prospecteurs et les aventuriers que les barbares eux-mêmes. L'auteur s'étend aussi sur les relations qui existent entre la culture ancienne de la valléee du Mexique et les Indiens de Pueblo dans le sud-ouest des Etats-Unis et il éclaircit certaines phases du développement de la race humaine.

CONSULATES OF THE LATIN-AMERICAN REPUBLICS IN THE UNITED STATES.

WEIGHTS AND MEASURES.

The following table gives the chief weights and measures in commercial use in Mexico and the Republics of Central and South America, and their equivalents in the United States.

Denomination.	Where used.	United States equivalents.
Are	Metric	0.02471 acre.
Arobe	Paraguay	25 pounds.
Arroba (dry)	Argentine Republic	25.3171 pounds.
Do	Brazil	32.38 pounds.
Do	Cuba	25.3664 pounds.
Do	Venezuela	25.4024 pounds.
Arroba (liquid)	Cuba and Venezuela	4.263 gallons.
Barril	Argentine Republic and Mexico	20.0787 gallons.
Carga	Mexico and Salvador	300 pounds.
Centaro	Central America	4.2631 gallons.
Cuadra	Argentine Republic	4.2 acres.
Do	Paraguay	78.9 yards.
Do	Paraguay (square)	8.077 square feet.
Do	Uruguay	2 acres (nearly).
Cubic meter	Metric	35.3 cubic feet.
Fanega (dry)	Central America	1.5745 bushels.
Do	Chile	2.575 bushels.
Do	Cuba	1.599 bushels.
Do	Mexico	1.54728 bushels.
Do	Uruguay (double)	7.776 bushels.
Do	Uruguay (single)	3.888 bushels.
Do	Venezuela	1.599 bushels.
Frasco	Argentine Republic	2.5096 quarts.
Do	Mexico	2.5 quarts.
Gram	Metric	15.432 grains.
Hectare	do	2.471 acres.
Hectoliter (dry)	do	2.838 bushels.
Hectoliter (liquid)	do	26.417 gallons.
Kilogram (kilo)	do	2.2046 pounds.
Kilometer	do	0.621376 mile.
League (land)	Paraguay	4,633 acres.
Libra	Argentine Republic	1.0127 pounds.
Do	Central America	1.043 pounds.
Do	Chile	1.014 pounds.
Do	Cuba	1.0161 pounds.
Do	Mexico	1.01465 pounds.
Do	Peru	1.0143 pounds.
Do	Uruguay	1.0143 pounds.
Do	Venezuela	1.0161 pounds.
Liter	Metric	1.0567 quarts.
Livre	Guiana	1.0791 pounds.
Manzana	Costa Rica	1.5-6 acres.
Marc	Bolivia	0.507 pound.
Meter	Metric	39.37 inches.
Pie	Argentine Republic	0.9478 foot.
Quintal	do	101.42 pounds.
Do	Brazil	130.06 pounds.
Do	Chile, Mexico, and Peru	101.61 pounds.
Do	Paraguay	100 pounds.
Do. (metric)	Metric	220.46 pounds.
Suerte	Uruguay	2,700 cuadras (*see* Cuadra).
Vara	Argentine Republic	34.1208 inches.
Do	Central America	33.874 inches.
Do	Chile and Peru	33.367 inches.
Do	Cuba	33.384 inches.
Do	Mexico	33 inches
Do	Paraguay	34 inches.
Do	Venezuela	33.384 inches.

METRIC WEIGHTS AND MEASURES.

METRIC WEIGHTS.

Milligram (1/1000 gram) equals 0.0154 grain.
Centigram (1/100 gram) equals 0.1543 grain.
Decigram (1/10 gram) equals 1.5432 grains.
Gram equals 15.432 grains.
Decagram (10 grams) equals 0.3527 ounce.
Hectogram (100 grams) equals 3.5274 ounces.
Kilogram (1,000 grams) equals 2.2046 pounds.
Myriagram (10,000 grams) equals 22.046 pounds.
Quintal (100,000 grams) equals 220.46 pounds.
Millier or tonneau—ton (1,000,000 grams) equals 2,204.6 pounds.

METRIC DRY MEASURE.

Milliliter (1/1000 liter) equals 0.061 cubic inch.
Centiliter (1/100 liter) equals 0.6102 cubic inch.
Deciliter (1/10 liter) equals 6.1022 cubic inches.
Liter equals 0.908 quart.
Decaliter (10 liters) equals 9.08 quarts.
Hectoliter (100 liters) equals 2.838 bushels.
Kiloliter (1,000 liters) equals 1.308 cubic yards.

METRIC LIQUID MEASURE.

Milliliter (1/1000 liter) equals 0.27 fluid dram.
Centiliter (1/100 liter) equals 0.338 fluid ounce
Deciliter (1/10 liter) equals 0.845 gill.
Liter equals 1.0567 quarts.
Decaliter (10 liters) equals 2.6417 gallons.
Hectoliter (100 liters) equals 26.417 gallons.
Kiloliter (1,000 liters) equals 264.17 gallons.

METRIC MEASURES OF LENGTH.

Millimeter (1/1000 meter) equals 0.0394 inch.
Centimeter (1/100 meter) equals 0.3937 inch.
Decimeter (1/10 meter) equals 3.937 inches.
Meter equals 39.37 inches.
Decameter (10 meters) equals 393.7 inches.
Hectometer (100 meters) equals 328 feet 1 inch.
Kilometer (1,000 meters) equals 0.62137 mile (3,280 feet 10 inches).
Myriameter (10,000 meters) equals 6.2137 miles.

METRIC SURFACE MEASURE.

Centare (1 square meter) equals 1,550 square inches.
Are (100 square meters) equals 119.6 square yards.
Hectare (10,000 square meters) equals 2.471 acres.

The metric system has been adopted by the following-named American countries: Argentine Republic, Bolivia, Brazil, Chile, Colombia, Costa Rica, Ecuador, Honduras, Mexico, Paraguay, United States of America, and Venezuela.

PUBLICATIONS.

The International Bureau of the American Republics was established as the representative of the International Union entered into in 1890 by the independent States of this continent, for the publication in four languages of their tariff laws and all laws and provisions which might be enacted by them relating to trade and navigation, for the collection and publication of useful statistics and information, and for the promotion by these and other proper means of greater and closer commercial relations between the countries of the Union. In pursuance of this purpose, the Bureau has published for distribution a number of Handbooks, Reports, Codes of Commercial Nomenclature, a Commercial Directory of the American Republics, including the European dependencies in Central and South America and the West Indies, and a Monthly Bulletin, which is now in its ninth year and is the official organ of the Bureau. Many of these publications, especially the Handbooks, have naturally through the course of time become obsolete, and it is therefore necessary to bring them down to date. New editions have been published of the Handbooks of Guatemala, Venezuela, Mexico, and Brazil, but the work of revising the others has not as yet been completed. In the meantime, it has been deemed prudent to withdraw from circulation all those which need revision.

Below is given a list of the publications of the Bureau available for distribution.

Payment is required to be made in cash, money orders, or by bank drafts on banks in New York City or Washington, D. C., payable to the order of the INTERNATIONAL BUREAU OF THE AMERICAN REPUBLICS. Individual checks on banks outside of New York or Washington, or postage stamps, can not be accepted.

July 1, 1901.

BIBLIOGRAPHY OF BRAZIL.

PREPARED BY

P. LEE PHILLIPS, F. R. G. S.,

Chief of Division of Maps and Charts, Library of Congress.

The most complete list of Books, Magazine Articles, and Maps relating to Brazil that has ever been published, embracing everything of value upon history, biography, government, laws, religion, education, inducements and advantages offered immigrants, topography, coast line, soil, mineral wealth, flora, fauna, climate, natural advantages, transportation facilities, and all other subjects of whatever nature concerning the country.

Of special interest to librarians and specially useful in libraries.

The work is published under the auspices of the International Bureau of the American Republics, and it will be sent to any who may desire it on receipt of one dollar.

ADDRESS THE

INTERNATIONAL BUREAU OF THE AMERICAN REPUBLICS,

WASHINGTON, D. C.

BIBLIOGRAFÍA DEL BRASIL.

PREPARADA POR

P. LEE PHILLIPS, F. R. G. S.

Jefe de la Sección de Mapas y Cartas, Biblioteca del Congreso.

La lista más completa de Libros, Artículos de Revistas y Mapas referentes al Brasil que se ha publicado, y que comprende todo lo de valor relativo á historia, biografía, gobierno, leyes, religión, educación, alicientes y ventajas ofrecidas á inmigrantes, topografía, la costa, suelo, riqueza mineral, flora, fauna, clima, ventajas naturales, facilidades de transporte y á todas las otras materias concernientes á la naturaleza del país.

De especial interés á los bibliotecarios y particularmente útil en las bibliotecas.

Este trabajo está publicado bajo los auspicios de la Oficina Internacional de las Repúblicas Americanas y será remitido, mediante el recibo de un dollar, á las personas que lo soliciten.

DIRIGIRSE AL

INTERNATIONAL BUREAU OF THE AMERICAN REPUBLICS,

WASHINGTON, D. C.

VALUE OF LATIN-AMERICAN COINS.

The following table shows the value, in United States gold, of coins representing the monetary units of the Central and South American Republics and Mexico, estimated quarterly by the Director of the United States Mint, in pursuance of act of Congress:

ESTIMATE JULY 1, 1902.

Countries.	Standard.	Unit.	Value in U. S. gold or silver.	Coins.
ARGENTINE REPUBLIC	Gold	Peso	$0.965	Gold—Argentine ($4.824) and ½ Argentine. Silver—Peso and divisions.
BOLIVIA	Silver	Boliviano	.382	Silver—Boliviano and divisions.
BRAZIL	Gold	Milreis	.546	Gold—5, 10, and 20 milreis. Silver—½, 1, and 2 milreis.
CENTRAL AMERICAN STATES—				
Costa Rica	Gold	Colon	.465	Gold—2, 5, 10, and 20 colons ($9.307). Silver—5, 10, 25, and 50 centimos.
British Honduras	Gold	Dollar	1.000	
Guatemala Honduras Nicaragua Salvador	Silver	Peso	.382	Silver—Peso and divisions.
CHILE	Gold	Peso	.365	Gold—Escudo ($1.825), doubloon ($3.650), and condor ($7.300). Silver—Peso and divisions.
COLOMBIA	Silver	Peso	.382	Gold—Condor ($9.647) and double condor. Silver—Peso and divisions.
CUBA	Gold	Peso	.926	Gold—Centen ($5.017) alphonse ($4.823). Silver—Peso.
ECUADOR	Gold	Sucre	.487	Gold—10 sucres ($4.8665). Silver—Sucre and divisions.
HAITI	Gold	Gourde	.965	Gold—1, 2, 5, and 10 gourdes. Silver—Gourde and divisions.
MEXICO	Silver	Dollar	.415	Gold—Dollar ($0.983), 2½, 5, 10, and 20 dollars. Silver—Dollar (or peso) and divisions.
PERU	Gold	Sol	.487	Gold—Libra ($4.8665). Silver—Sol and divisions.
URUGUAY	Gold	Peso	1.034	Gold—Peso. Silver—Peso and divisions.
VENEZUELA	Gold	Bolivar	.193	Gold—5, 10, 20, 50, and 100 bolivars. Silver—5 bolivars.

Paraguay has no gold or silver coins of its own stamping. The silver peso of other South American Republics circulates there, and has the same value as in the countries that issue it.
